

THE KANSAS STATE COLLEGIAN

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, MONDAY, SEPTEMBER 13, 1920

NO. 1

MIKE AHEARN IS NEW HEAD OF ATHLETICS

WILL FILL VACANCY LEFT BY Z. G. CLEVENGER

WAS FORMER AGGIE COACH

Mike Has Been Member of Aggie Athletic Board Last Five Years—Aggies Beat K. U. Under Ahearn's Coaching

Mike Ahearn, credited with having done more for Kansas Aggie athletics than any other one man, has accepted the post of athletic director of the Aggies, left open by the recent resignation of Z. G. Clevenger. From the fall of 1905 to the spring of 1911 Mike Ahearn was head coach of the Aggies, taking the job when the college ranked at the bottom of Kansas athletics and building it up to Missouri Valley conference standing. He resigned in 1911 because it no longer was possible to carry on both as professor of landscape gardening and head coach, and again declined the job for the same reason when it was offered him in 1916.

With the creation of a department of athletics, greater opportunity for its head, who, as director of athletics, has no active coaching duties, was apparent to Ahearn when the proposal was laid before him this week. He declined the job of coach because it was a job for the man who was young in body as well as in mind. He accepts the job as director because it is a job for a man who is obliged to be young in mind only.

Aggies Strong For Ahearn
The name of Mike Ahearn probably is dearer to most Aggie students and alumni than that of any other faculty member. While not actively engaged in college athletics during the last nine years he has always been one of the most interested Aggie rooters and helpers. He has been a member of the Aggie athletic board the last five years and faculty representative in the Missouri valley conference the last two years.

Never since his resignation as Aggie head coach, however, has Mike Ahearn allowed athletics to outgrow him. As one of the most sought for officials in Kansas he has kept close to football, basketball, baseball, and track. He has been a constant adviser in the administration of Aggie athletics ever since his retirement from active participation.

Captain of baseball and basketball two years and captain of football a year while a student in the Massachusetts Agricultural college Ahearn had a good background for teaching the three major college sports before he ever coached any of them. He was college champion in tennis during his undergraduate days, playing also on the ice polo team. While never a track man himself he is familiar enough with the sport to have a good reputation as a track official. In the last three years Ahearn has been twice a runner up and once a champion in the Manhattan Country club golf tournament.

One Team Beat K. U.
But the thing that endears him above all else to most Aggies is that one of his football teams beat K. U.—the only Aggie win over the Jayhawkers in the football history of the two schools. It happened in 1906, four years before the Aggies were good enough to enter the Missouri Valley conference. His best football teams, however, were in 1909 and 1910. In 1909 Ahearn's eleven held the famous Roper M. U. machine to a 3 to 0 score, a lucky penalty giving Hackney's toe a chance to save the Tigers in the last few minutes of play. K. U. refused to play the 1910 Aggies who suffered only one defeat during the season. The total score for the two seasons was 672 to 42 for the opponents.

Ahearn's ability as a football coach may be judged by the record he made the first year he took over the job as Aggie mentor—1905—with practically the same material which in 1904 had not won a single game. Ahearn built a machine which lost only two contests.

While he is remembered principally for his record in football, Ahearn had teams in basketball and baseball also which ranked with the best in the Valley. The Aggie baseball teams Ahearn coached beat K. U. in the largest percentage of the games played. One year his baseball team won all four of the games played with Nebraska. His basketball teams always had even breaks with the best teams in the Valley.

Although not directly responsible for the coaching of any team as athletic director, his supervision of all sports in the college will bear great

er weight with his coaches as a result of his own undeniable success as a coach. His prestige as dean of Aggie coaches also will go a long way toward boosting the morale of Aggie athletes.

Leaves Affairs in Order
Coach Clevenger leaves the athletic affairs of the Aggies in splendid shape for Mike Ahearn to take up. The athletic department has a balance of \$2,000 on hand at present as contrasted with a deficit of \$1,500 when Clevenger came to Manhattan. The football coaching is provided for, the tickets and ticket sales plan are all ready for the opening of school, all supplies are contracted for and most of them have been delivered.

During the four years that "Clev" has coached the Aggies he has turned out strong contenders in all lines of sport in the Missouri Valley conference. He has given the Aggies Missouri Valley championships in basketball in 1917 and 1919, in track in 1919, and in baseball in 1920. At all times the other Valley teams have respected and feared the Aggies as a fighting bunch of well coached athletes.

ENTRANCE FEES ARE NOW HIGHER

RESIDENT FEE HAS INCREASED FROM \$5 TO \$10

Dr. W. M. Jardine Explains Increase Is Due to Higher Maintenance Expense

For two years it has been expected, talked about, dreaded, and at last it is with us. Higher matriculation fees have descended upon K. S. A. C. as well as upon every other state school.

The matriculation fee for residents of the state has been increased from \$5 to \$10; non-residents, from \$10 to \$15.

Incidental fee for residents, \$5 to \$10; non-residents \$10 to \$15.

Sick benefit fee for both residents and non-residents from \$1 to \$1.50.

A resident entering this fall as a freshman student will pay \$21.50 instead of \$11.00; a resident sophomore student will pay \$11.50 instead of \$6.00.

In speaking of the change, Dr. W. M. Jardine, president of the college, said:

"I regret exceedingly the necessity for increasing the fees but I know the students understand thoroughly that a dollar will not purchase any more for the institution than it will for the individual. They no doubt realize the tremendous expense to which the institution is put in maintaining itself these days.

"Every possible measure is being taken to retain the services of the strong men and women on the faculty and those connected with the institution until we can go before the legislature for financial assistance."

NEW PLAN FOR REGISTRATION

STUDENTS WAIT IN AUDITORIUM TILL CALLED

Registration Machine May Now Be Fed More Evenly—Does Away with Unnecessary Fatigue and Exposure

Yes it is registration day although it is hard to believe, for the new method of handling the situation has done away with the long, crowded pushing lines standing before the Gym. Today every student may have a seat in the Auditorium, where he can read the Collegian, chat with his neighbor and wait for the marshal to call his number.

This year there are five series of tickets issued for both upper and lower classmen, a series for each division; agriculture, veterinary medicine, home economics, engineering, and general science.

Long before 7 o'clock this morning lines of students waited at the north doors of the Auditorium for their numbers. The upper classmen received their numbers at the east door and the lower classmen and school of agriculture students, with and without permits, received numbers at the west door. As the students entered the doors they were asked for their classification and were given numbers according to their division.

The Auditorium is divided into two parts, the east side for the upper classmen and the west side for the lower classmen. The east side is divided into five parts, one for each division. The west side is divided into seven parts, one section for each division, one section for the school of agriculture students, and one section for the unclassified freshmen.

PRESIDENT JARDINE WELCOMES STUDENTS

After a pleasant vacation period I am happy to welcome the students, old and new, to the Kansas State Agricultural college at the beginning of another year of college work. In the life of the college you will find the training necessary to fit you for active participation in the duties of citizenship which you will soon be expected to assume. The successful functioning and continued existence of a democracy like ours depends upon an educated citizenship. If we are to govern ourselves wisely, it is vitally important that we undergo the training necessary to give us an intelligent point of view and the ability to sink self-interest in the interests of the whole.

Not only will college training fit you for the best citizenship, but it will give you the leisure to take an active part in the administration of local, state, and national affairs. Practically every man and woman is self-supporting, but it takes all of the time of the uneducated individual to earn his living. The educated man earns his living in fewer hours and can give time to public affairs or to recreation that makes life more worth while. At the Kansas State Agricultural college you prepare yourselves for a special profession or definite work in the world, fitting yourselves for the work you are best suited to or that appeals most to you, so that you may make an honest and substantial and satisfactory living. At the same time you prepare yourselves to become helpful members of society, leaders in your communities, and a vital force in determining the affairs and the future of the commonwealth in which you live.

We welcome you here because we have an institution with a program fitted to turn out just such young men and women as the nation needs. Service in cooperation with others, learning to do by doing, cultivation of the mind together with the training of the hand—these are the means by which you may acquire the power to accomplish and to dream dreams of greater accomplishment.

Our students are expected to work hard at college studies. No one can get very far until he recognizes the value of work, directed to a purpose and according to a plan. At the same time, all-round development requires participation in activities involving the student body, the college community, as a whole. The Students' Self-Governing association, the young men's and young women's Christian associations, literary societies, athletics, choral society and glee clubs, dramatics and debate, offer opportunities to learn to work with others, to get the group, instead of the individual, point of view, so necessary when you get out of college into the life of the community.

Let us work together for all-round studentship and a banner year for K. S. A. C.

W. M. JARDINE, President.

Placards are used to direct the students to the proper sections.

A marshal at the Auditorium will announce the numbers for each division as the students are wanted at the gymnasium. Prof. L. A. Fitz and Prof. J. P. Calderwood will give out the official calls for students as they are needed in the Gym. A runner will carry the call to the Auditorium, where the marshal will announce it.

By this method the registration machine will be fed evenly, for the students will be called for each division just as they are needed. This plan also does away with the useless fatigue and exposure to the weather that has always hitherto accompanied registration. It is an entirely new plan but one which the committee on assignment believe is going to be a success.

C. E. ROGERS PUTS OVER HUGE PUBLICITY CAMPAIGN

Moved Over \$600,000 Worth of Kanred Wheat

In a publicity campaign costing less than one hundredth of one per cent of the sales, C. E. Rogers, associate professor of industrial journalism and printing, moved over \$600,000 worth of Kanred wheat for the Kansas Crop Improvement association during the summer vacation. The average cost of an advertisement campaign is considered to be about 2 per cent of the gross sales.

The campaign consisted of display advertising and publicity stories in 26 county papers in the western part of the state, and in seven of the farm papers of Kansas, Nebraska, Oklahoma, and Missouri. Three daily papers known to have a large circulation in the wheat belt were also used in this campaign.

Although much of the success of the campaign was due to the large amount of publicity given Kanred wheat by the papers, over one-half of the replies received showed that they were the direct result of the display advertising. Professor Rogers not only had complete charge of the writing of the stories, but also selected the mediums that were used.

Offer Prizes

Prize amounting to \$100 each for the best poem and the best story written by a Kansas author are being offered this year by the Kansas Authors' club of which Prof. J. W. Seaton, head of the K. S. A. C. English department, is president.

RAY WATSON WILL RETURN IN FEW DAYS

WAS ENTERED IN TWO EVENTS AT OLYMPIC GAMES

RAN FINALS IN STEEPLE CHASE

Eliminated in Trial Heats of 5,000 Meter Run—Watson's Work Highly Praised—Experience Invaluable to Him

"I don't know yet what I will run, but you can bet your last dollar that I will be true to my many friends and to all those Aggies who believe in me. From the time the gun cracks until the tape is broken you can feel assured that I will be pulling every fiber I have for what portion of honor of the United States I am here to uphold, and that I will be doing the best I know how to show what sort of products the Kansas Aggies manufacture." Part of a letter written by Ray Watson to an Aggie coed.

Ray Watson, Aggie athlete who competed in the Olympic games has not yet returned to Manhattan. The last word from him came indirectly through Coach Bachman who left him in Antwerp. It is probable that Watson will be a week or ten days late in entering school.

Watson was entered in the 5,000 meter race and the 3,000 meter steeple chase at the Olympic Games in Antwerp, Belgium. He won the right to represent the United States in these events by his splendid showing in the elimination meets held in Chicago, New York, and Boston.

Fights Way To Finals

Ray fought his way to the finals in the 3,000 meter steeple chase at the Olympiad, but failed to place in the "money" when the finals were run off. He was eliminated in the trial heats of the 5,000 meter run as were all but two of the American contestants. Although he did not place in the games, Ray's experience in contests with the best in the world of sport will be invaluable to him in his work on the cinder path next season.

The Aggies are proud of the showing their track captain made in the premier sporting event of the year, and of the true Aggie spirit he displayed at all times.

Watson Is Praised

In New York and in Chicago as well as in the cities abroad where Watson came in contact with the other big athletes of several nations, he came in for warm praise, and other messages received from those who were fortunate enough to see his work declare that he did do his best for the Kansas Aggies. A Notre Dame man who was especially interested in Watson's participation on account of Coach Bachman's being a Notre Dame graduate reports that friends of his who witnessed Watson's work claim that he "is the real stuff, the real stuff!"

That Saying—"I'll Get Your Number" Takes a New Meaning

"What's your number?" No dearie, don't give him a withering glance and a "what is that to you, sir?" He isn't trying to get your telephone number so he can ask you for a date, and chances are he doesn't even care whether you have a room or not, to say nothing of caring where it is located. He, or someone of his clan, has been asking that same little question for (oh gee! how old is this college, anyhow?)

Some say the man at the door is just plain curious, Gwendolyn. I've heard that lots of times. But others think that he wants to find out how many folks change their numbers. Oh, but listen, dearie, you don't know the half. Sure, you heard that last year there were fifty 27s and forty-four 31s tried to get in. But this year they're going to be systematic. The psychology professors have got the thing in charge, and they intend to figure out just why you change the figure you do. Yes, it always looked to me like the erasers they sell down on Bookstore corner might have something to do with it too. You never can tell.

You've picked out your course already? Why how come? Most everybody always goes around to all the dean's offices to see which is the least crowded and then takes that course but then you'll probably change for some reason or another. Some have to wait so long in the dean's office before they can get "fixed up" that they get to believing that most of their whole four years will be spent in their dean's office, and pick out the division with the nicest furniture and the best reading matter. Yes, they say the furniture is what accounts for the H. E. division's big enrollment, and everybody knows that the Vets would be lost if they didn't keep a few copies of Snappy Stories sticking around during registration.

Oh you've been in?—And got out too? Well that's the important thing, sure enough. Yes I realize that nobody can go very far after they've got past—yes of course you wondered how many treasurers the college had. Everybody does. But what I mean is, are you through or is it merely a "continued until after the next session with the dean." You're though? Well Gwendolyn I'll have a coke on you—that is if you insist.

KANSAS STATE EXHIBIT TO BE SENT TO TOPEKA STATE FAIR

Exhibit Took First Prize at International Farm Congress

The Kansas state exhibit that took first prize at the International Farm congress, held at Kansas City last year will be sent to Topeka for the Soil Products exhibition, which is to be held at the Kansas State Fair in September.

The exhibit was prepared by Bruce S. Wilson, former assistant in charge of the cooperative experiments section of the agronomy department of the college. The exhibit includes a very choice selection of different grains and forage crops grown on the college farm at the Kansas State Agricultural college.

This exhibit also won first prize at an exhibition held at Chicago last December.

ATTIC OF FAIRCHILD HALL IS REMODELED THIS SUMMER

New Zoology and Entomology Laboratory Is Built

During the summer the attic of Fairchild hall has been remodeled. A new zoology and entomology laboratory has been built above the old zoology laboratories.

The large skylight that used to be over the natural history museum has been raised in order to give more light for the new laboratories. A large extension window has been made projecting from the roof so as to supply more light and provide ventilation.

Prof. E. A. Martin, assistant W. P. Hayes, and Prof. J. W. McCulloch will have offices on that floor.

TWELVE OLD GRIDIRON MEN WORKING OUT

BACHMAN AND VAN FLEET SUPERINTEND COACHING

PLAY AMES AT HOME-COMING

Twenty of Last Year's Freshman Squad Back—Clevenger's Going Will Not Affect Coaching as Some Believe

The Aggies are gathering in from the hustings, hedges, and byways bringing with them a thirst for gore spilled on the college gridiron. Said thirst is mainly for the heart's blood of the Jayhawkers from Kay You, but that of any of the Wildcat's opponents on the football field is fervently desired.

"Clev" and "Germany" will not be here to superintend the construction of an Aggie wrecking machine this fall, but the team will have the two coaches who were selected last spring, Bachman and Van Fleet, the latter of the military department. Captain Van Fleet and Coach Bachman are on the ground ready to start whipping the squad into shape today.

Mistaken Idea Abroad

Coach Clevenger when interviewed today said: "A mistaken idea has got abroad that, because of my going to Missouri university this week to take up my duties as athletic director at that institution, the football team will be left with an inadequate coaching force. This is not the case.

"I was not to coach football this fall, as that was to have been, and still is, the job of Coach Bachman. He is to have the aid of Captain Van Fleet of the military department, who is a former West Point star. It is evident, then, that my going will not affect in any manner the coaching of the football team."

Bachman Notre Dame Star

Coach Bachman is a former Notre Dame football player and track athlete. He has played at guard, tackle, fullback, and end on the Notre Dame team. He also played on the Great Lakes Naval Station team at center and guard. This team will be remembered as the one that trounced the Camp Funston team in 1917. The Camp Funston team contained the majority of the men who afterward played on the 89th division team, A. E. F. champions.

Hefty Squad Back

The new coaches will have a hefty squad of 12 letter men, together with the hopefuls, some 20 in number, from last year's freshman squad. The returning letter men are Huston, Captain Gatz, Gingery, Cleland, Bogue, Hinds, Winter, Gallagher, Burton, Quinlan, E. Cowell, and W. Cowell. Last year's freshman squad included Fletcher, Hahn, Dreibliss, Schmitz, Marshall, Blanchard, Price, Schneider, Axline, Yandall, Bryan, Stauffer, Sites, and McGuire.

The majority of the Aggie athletes have spent their vacations on the farm laying up brawn against the day when the Wildcat warriors gather on Ahearn Field to have another fling at the Jayhawk, the Tiger, the Sooner, and the other ancient rivals of Missouri Valley circles. They look fit to do battle at any time, and with three weeks tutelage from Coach Bachman and Captain Van Fleet they should be in prime condition to start the season on October 2.

First Game October 2

Football season tickets will be on sale today at the door of the Nichols Gym. There are five games on Ahearn Field this year, including contests with K. U. and Ames. The schedule for the season as announced by the athletic board is as follows:

- October 2—Hays Normal at Manhattan.
- October 9—Camp Funston at Manhattan.
- October 16—Emporia Normal at Manhattan.
- October 23—Creighton university at Omaha.
- October 30—Kansas university at Manhattan.
- November 6—Missouri university at Columbia.
- November 13—Iowa State college at Manhattan (Homecoming).
- November 20—Oklahoma university at Norman.
- November 25—Washburn at Topeka.

Granted National Charter

The Alpha Theta Chi fraternity has been granted a national charter by Alpha Tau Omega. This chapter will be installed early this fall. The Alpha Theta Chis have been local here since 1917, and their organization as a club dates from 1912.

THE KANSAS STATE COLLEGIAN

The Student Newspaper of the Kansas State Agricultural College

Published Every Tuesday and Friday of the College Year.

Entered at the Postoffice of Manhattan for transmission through the mails as second class matter.

Address all communications regarding stories, etc., to the editor of the Collegian and all letters in regard to advertising and subscription rate to the business manager.

TEAM WORK WILL DO IT

This term will spell either success or failure for the Students' Self Governing association which was organized last semester. This term will be the crucial test of the students' ability at wielding the governing power of the school.

The faculty committee of students' affairs are holding themselves in readiness to cooperate; they will not dictate. They are anxiously waiting the outcome of the new venture in student government.

The constitution has been worked out and adopted, and all is in readiness for action. To make the association a success every Aggie must boost it, first by paying 50 cents and joining, and second by being a real worker.

If S. S. G. A. fails it will be no one's fault except the students'. It is the Aggies' chance to show their worth. Other colleges have made the S. S. G. A. a success and there is no reason why K. S. A. C. cannot.

It is to every student's interest to become a member as no one may hold any office in a college organization if he is not a member. By not joining a student bars himself from the opportunity of holding office and taking a real part in the many college activities.

If every student backs S. S. G. A. it cannot fail for where there is cooperation there is success. As Kipling said:

"It ain't the individual,
Or the army as a whole;
But the everlasting teamwork
Of every blooming soul."

LEARN THE ROPES

Every true Aggie coming to college is like a good citizen entering a new community, he immediately becomes interested in the affairs of that vicinity. He desires to become acquainted with the activities so that he will know in what things he should take part and in what way he should conduct himself.

In order to learn all this he subscribes for his local paper; in the student's case, the college paper. It gives him the college activities, without which he could not be prepared to better his new community. It acquaints him with the methods of governing, giving him the incentive to take part in its government.

The Kansas State Collegian is this college paper. It gives the student all the information that is worth knowing about this new community. It stands for his ideals and interests.

Statistics show that 85 per cent of the live wire Aggies, those that have made a place for themselves in the college, read their own Collegian. They realized early that the college was a new community, one that should interest them, and in which they should take the greatest of pride because it is their community, made up entirely of them. They were responsible for the way it was conducted and the college paper was the means of keeping them posted as to its activities.

To be a live wire, and a help to the college, subscribe for the Collegian. Be a good citizen, stand back of your paper, for it is your paper and it is back of you. Be a part of the 85 per cent of live wire Aggies.

ALUMNI ASSOCIATION HAVE APPOINTED NEW SECRETARY

Cliff Stratton of Capper Publication Elected

Cliff Stratton has been selected as the new secretary of the K. S. A. C. Alumni association.

Mr. Stratton will arrive in Manhattan within a few days from Topeka, where he has been a special writer for the Capper publications.

Direction of the alumni activities with regard to keeping in touch with their alma mater, will be a large part of his duties. He will be permanently stationed at the college.

The selection of Mr. Stratton by the board of alumni directors was unanimous, according to members of the board. About 25 names were considered, but when Stratton was mentioned, it is said the trend of sentiment was overwhelming in favor of his name.

Stratton was graduated from K. S. A. C. in 1911 and since, except for the period of the war, has been in the service of the Capper publications. His latest position was on the Topeka Capital. His war record includes service in France, on the Mexican border and in the Pittsburgh coal fields.

COLLEGE GIRLS ORGANIZERS OF UNIQUE POLITICAL CLUB

"Baby Elephant Club" Organized in Many Colleges

"Baby Elephant clubs" are the latest activity of Republican women. They are being organized among all groups of college and secondary school girls in the United States. The "Baby Elephant club" originated at Wells college, Aurora, N. Y.

The clubs are organized now among Republican students in many of the large women's colleges, state universities and preparatory schools. The girls train themselves for speaking, form glee clubs, and quartets for singing campaign songs at Republican rallies and meetings in the surrounding territory. In some of the clubs the girls have announced competitions in the writing of campaign songs and poems.

NEW MUSIC ROOMS RENTED

FOURTEEN ROOM HOUSE IS LEASED FOR YEAR

Department Grows Rapidly—Instructional Staff Increases From Six to Sixteen in Last Four Years

As a result of the phenomenal growth of the music department of K. S. A. C. and the ensuing need of studios and practice rooms, the 14 room house at 1605 Anderson has been rented this year by the music department for the use of its students and faculty. The house has been put in shape during the summer and is in good condition.

The personnel of the K. S. A. C. music department has been considerably strengthened by several new instructors this year. In contrast to 1916 when the music department had six instructors, 16 will be employed on the teaching staff this year. Following is the list of instructors in the music department for 1920-21.

A. E. Westbrook, Harold Wheeler, A. L. Lovejoy, Elsie Smith, Fannie

Kellar, Mabel Leffer, Gladys Warren, Helen Colburn, Helen Hannen, Ethel Hossinger, Mary Becker, Raymond Williams, Louise Hughes, Katherine Kimmel, Bess Curry, and Boyd Ring.

TOPEKA AGGIES WILL TURN OUT AT KANSAS FREE FAIR

Topeka Alumni to Attend Dr. Water's Speech

In honor of Dr. Henry J. Waters formerly president of the State Agricultural college, the Aggie alumni of Shawnee county will attend in a body the meeting Thursday night, September 16, in the speaker's pavilion at the Kansas free fair at Topeka. The association voted this unanimously at a meeting in the chamber of commerce rooms. Doctor Waters is to deliver the address of the evening that night at the free fair.

The local alumni chapter also is planning to hold open house for the former Aggies among the teachers of the state during the teachers' convention next November. Dean H. E. Umberger of the extension department of the college, was the principal speaker at the meeting. The Shawnee county crowd are trying to be the first chapter in the state to have a 100 per cent alumni organization.

POINT SYSTEM IS WORKED OUT

**SEVENTEEN POINTS IS MAXIMUM
FOR EACH STUDENT**

**Eliminates Danger of One Student
Holding More Offices Than He
Can Properly Attend To—
System in Effect This
Term**

The point committee of the Students' Self Governing association have after a great deal of hard work and careful consideration worked out a system of points which has been officially approved by the faculty.

The purpose of the point system is to eliminate the possibility of one person holding more offices than he can properly attend to. According to the rules worked out by the point committee no person may hold more than 16 points at any one time.

The new rules read that each organization shall report the result of elections within one week after the election, to the chairman of the point committee. Only members of the Students' Self Governing association shall be deemed eligible to hold offices in any college organization.

The point rating shall be as follows:

- 10 points, president of S. S. G. A.
- 9 points, Royal Purple editor.
- 9 points, editor of Collegian.
- 9 points, business manager of Collegian.
- 8 points, presidents of college Y. M. C. A. and Y. W. C. A.
- 8 points, business manager of Royal Purple.
- 6 points, treasurer of Royal Purple.
- 6 points, president of Girls' Loyalty league.
- 6 points, fraternity and sorority presidents.
- 6 points, class presidents.
- 6 points, vice president, secretary, treasurer, and Big Sister of Y. W. C. A.
- 6 points, Royal Purple staff members.
- 5 points, secretary and treasurer of S. S. G. A.
- 5 points, presidents of literary societies.
- 5 points, W. A. A. president.
- 5 points, presidents of honorary societies.
- 5 points, presidents of professional fraternities.
- 5 points, members of football, basketball, track, and baseball varsity teams.
- 5 points, major parts in college plays and operas.
- 5 points, Y. M. C. A. and Y. W. C. A. cabinet members.
- 5 points, members of intercollegiate debate teams.
- 5 points, college orator.
- 4 points, members of Girls' Loy-

alty League council.

4 points, committee chairmen and vice-president of S. S. G. A.

4 points, class secretaries and treasurers.

3 points, Pan-Hellenic presidents.

FORMER COLLEGE PROF. GOES TO OHIO UNIVERSITY

**Dr. L. W. Goss Appointed to Chair
of Pathology**

Dr. L. W. Goss, formerly professor of pathology at the Kansas State Agricultural college, has been appointed to the chair of pathology at the Ohio State university.

Doctor Goss was a professor of pathology here for several years until last year when he accepted a position with Parke-Davis and company at Detroit, Mich., as head of the pathological laboratories.

Ohio State university is Doctor Goss' Alma Mater. He graduated there with the class of 1905. Ohio State university has now an enrollment of over 6,000 students and its pathology department is recognized as being one of the best in the east central United States.

Takes Up New Work

Homer Cross, who graduated from the electrical engineering course in '19 has entered railway engineering work with the Westinghouse Electrical and Manufacturing company. Mr. Cross after graduation went to the Westinghouse company where he completed the graduate student training course. He spent some time in the general engineering department, and now with a view to learning railway problems at first hand is spending a period of a number of months with the Brooklyn Rapid Transit company after which he will return to the Westinghouse company as a railway engineer.

Nothing is more characteristic of Kansas as an alfalfa producing state than the fact that the college will produce from 15 to 20 tons of alfalfa this year from the college campus. No other college produces as much alfalfa off its campus as K. S. A. C.

Frank Gulick has been appointed the animal husbandry physician in the home study service to take the place of Francis Welch.

MACHINE SHOP HAS NEW TOOLS

**MACHINERY PURCHASED IS
VALUED AT \$40,000**

**Tools Were Purchased This Summer
from the Government—Are of
the Latest Development in
Tool Manufacture**

During the summer the college has installed in the engineering shops about \$40,000 worth of machine tools, which were purchased from the government at a price of about 15 cents on the dollar, as based upon the cost to the government.

A large portion of these tools are either new or practically so as they were bought shortly before the signing of the armistice and the government did not have an opportunity to use them.

The engineering shops at the college have always been considered well equipped, but with these additional tools they will be in much better condition to give laboratory instructions.

The machine tools purchased are of the latest development in tool manufacture. These tools will enable the mechanical engineering students of the college to become familiar with the most modern processes of manufacture.

Miss Alice M. Brown, instructor in the zoology department recently received the degree of master of arts from the Kansas university.

Aggies Represented

K. S. A. C. was represented at the National Democratic convention, held at San Francisco, by Mr. David Blattner.

Mr. Blattner had charge of the wiring of the auditorium where the convention was held. He also supervised the wiring of the Coliseum for the Republican convention at Chicago. He is a graduate from the electrical engineering department of the college, class of '11, and has been in the employ of the General Electric company of New York City since his graduation.

Three New Librarians

Three new librarians, Miss Winifred K. St. John of Hamilton, N. Y., Miss Mariam E. Clay of Grand Rapids, Mich., and Miss Elizabeth Davis of Portland, Ore., have arrived to begin their year's work.

Miss St. John takes the position

left vacant by the resignation of Miss Luella Corey. Miss Clay takes Miss Marie Hedrick's place, and Miss Davis takes the place of Miss Ruth Sankey.

Miss Reta Diehlman will have charge of the history and civics

taught by the home study service during the coming year.

Miss Lois Witham expects to sail September 23 for China where she will teach chemistry in a college for women.

He carries a 100% stock of all wool goods and has one of the best equipped tailor shops in the state. All of his suits are strictly hand tailored, fitted in the basting, cut up-to-the-minute and will positively fit you. He is a real tailor having had over 30 years' experience and is an expert on alteration, cleaning, dyeing and pressing

REPORTS ARE TWO HUNDRED LACK ROOMS

ONLY 650 COEDS NOW PROVIDED FOR

THE BOYS FIND ROOMS EASILY

Few Houses for Rent—Light House-keeping Rooms Are Scarce—Dormitories Needed for Freshman Girls Believes Dean Van Zile

Approximately 250 girls are still roomless believes Mary Pierce Van Zile, dean of women; after checking over her latest statistics and reports. Dean Van Zile says that 200 girls have been placed in homes through her assistance and that of the Y. M. C. A. working in cooperation. It is estimated that over 100 girl students live in Manhattan and that the sororities usually have about 150 girls living in the sorority homes. Then, too, Dean Van Zile believes that probably 200 girls had rented rooms before they returned home in the spring. This accounts for a probable 650 of the coeds.

The college expects at least 900 girls this semester, but just where the other 250 are going to hang up their hats for the winter, the Dean of Women cannot say. Up to date there are only a few rooms left on the rooming list which Dean Van Zile has had prepared. However every day a few more rooms are listed and it is likely that all of the girls may be provided for.

Must Have Dormitories

"Dormitories for freshman girls is what this college needs and must have before another year, if the school is to properly take care of the incoming students," said Dean Van Zile.

The plans have already been drawn up for the dormitories and all that hinders action from being taken in the matter is lack of funds. It is hoped that the necessary funds for the construction of the dormitories may be appropriated in this year's session of the legislature.

The housing situation for boys has not been so difficult in managing as that for the girls. According to Dr. Holtz all of the boys have been provided for, although many of the rooms are considerable distances from the college and are in undesirable locations.

Few Houses to Rent

Manhattan is at the end of her rope in accommodating parents and families of the students, who wish to live in the city while their children attend college, according to F. W. Jensen, secretary of the chamber of commerce.

Mr. Jensen says that there are more than 30 families applying but without much chance of getting a house unless they buy one. A number of houses are listed for sale by the real estate men who refuse to rent. Many families will probably be turned away unless more property owners consent to rent or the light housekeeping situation loosens a bit.

Light Housekeeping Rooms Scarce
Light housekeeping rooms are now scarce although up until recently the supply filled the demand. Now with more applications coming in the number of light housekeeping rooms for rent has dropped to almost nothing.

If the increased enrollment is as large as the college expects, all present prospects seem to point to a room shortage. Everything possible is being done by the Y. M. C. A. and Y. W. C. A. to solve the rooming situation and it is likely that within a few days every Aggie will have some little nook or corner that he may call his home.

ENGINEERING PROFESSORS COMPLETE INVESTIGATION

Results To Be Given at American Society of Mechanical Engineers

Prof. J. P. Calderwood and Prof. A. T. Mack of the engineering experiment station of the Kansas State Agricultural college have just completed an elaborate investigation on the properties of insulation for refrigeration.

The results will be presented in a

paper before the American Society of Mechanical Engineers which will meet in New York, December, 1920. The results of this experiment will appear in a bulletin of the K. S. A. C. engineering experiment station.

NEW GRASS IS TO BE GIVEN A TEST BROUGHT HERE BY SOUTH AFRICAN STUDENT

In South Africa the Grass Has Displaced Alfalfa in Many Places—Has Many Advantages Over Alfalfa

A new and valuable grass, called "Teff" is to be given a trial at the college next year. Theodore Mostert, a South African student in agriculture, is bringing the seed here from south Africa where it is extensively grown.

In South Africa teff has displaced alfalfa in many parts of the country. The grass has many advantages over alfalfa. It has been made to grow in the driest as well as in the wettest parts of the country. It is an annual and may be grown and reaped after a crop of wheat has been raised.

Farmers in South Africa sow the wheat and teff at the same time, the wheat germinates in the winter whereas the teff will only germinate in the spring when the wheat is ready to be cut down. As soon as the wheat is cut the teff shoots up and in a very short time it may be reaped.

Miss Myra Scott is now employed as a reader in the home study service.

COMMITTEE HAS REPORT READY

FACULTY HAS APPROVED NEW SOCIAL RULES

Regulations of Social Affairs Committee Are Necessary to Organization of College—All Students Must Observe Rules

The social affairs committee of the Students' Self Governing association have worked out a set of rules for the coming year which have been approved by the Students' Affairs committee of the faculty.

The regulations of the social affairs committee are to be taken, not as arbitrary rules, but as necessary to the proper organization and operation of the college. They cannot be all inclusive and the college expects the students to be guided by the underlying principles of wholesome relationships in all situations, whether covered by these definite statements or not. Every student in the college is therefore bound, both by reason and by loyalty, to observe them since upon them depend the free and wholesome activities of the institution whose benefits he seeks.

The following rules have been approved:

Permission from the committee on social affairs of S. S. G. A. must be obtained for all social functions. This permit must be obtained 48 hours before the time set for the function.

All student social affairs shall not continue later than 12 o'clock in the evening, except one event each year for each organization—the closing time of which shall be fixed by the committee on social affairs. Refreshments which are considered a part of

the social function shall be within the hours granted by the social affairs committee.

Each organization is limited to but one social function each semester that requires the use of a public hall or college building, except that each organization is permitted one extra social function during the fall semester rushing season.

Students are not allowed to attend public dances, or dances which have not been approved by the social affairs committee.

Men callers may be entertained at the women's rooming houses on Friday, Saturday, and Sunday between the hours of 3 to 10:30 in the evening, and on other days from 3 to 8 in the evening.

Members of men's social organizations may receive women callers, providing the house mother is present, between the hours of 3 to 10 P. M. on Friday, Saturday, and Sunday.

Student social organizations may entertain dinner guests when the house mother is present or when other approved chaperons have been provided.

Unorganized groups of students may secure permission to dance by conforming to the rules that apply to dances given by organizations.

College organizations cannot give dances out of town.

The social affairs committee will not sanction hiking parties composed of less than three couples.

Hiking parties must return within

the city limits by 10:00 in the evening.

Parties composed of more than six couples must have a chaperon.

No organization will be granted a permission for a Sunday hike.

W. W. Tetrow, of '20, has a position as research assistant in the department of agricultural economics at the experiment station at Holton, and is doing work in connection with the study of the cost of production. Mr Tetrow assumed his duties June

1, succeeding M. Hiestand, of '19, who resigned to return to his farm at Yates Center.

Notification was received by the college the first of July of the promotion of Captain F. B. Terrill, head of the military department, to the rank of major in the regular army of the United States.

Dean Mary Pierce Van Zile spent her summer vacation at Christiana tavern in Edwardsburg, Mich., visiting with Mrs. Roy Eakin.

It's School Time Again

Manhattan's biggest industry has resumed work. We refer to the opening of our public schools.

We extend our greetings to the teachers and pupils, and our best wishes for a successful school year.

Upon you, young men and women, depends largely the future citizenship of this community and this country. Work hard; play hard; ever remembering that school is like life: you get out of it just what you put into it.

BIG SISTERS ON THE JOB EARLY

WILL HELP NEW STUDENTS TO GET ASSIGNMENTS

Meet All Trains Night and Day—Big Sister Party to Be Given at Gym Thursday Night

Big Sisters, captains, and team workers alike, are helping to put college registration through this year in a more systematic fashion than has been possible for several years. Beginning their work as early as last Friday they have been on the job, meeting trains, accompanying new students to their rooms, helping with assignment plans, and many of the other tasks attendant to the beginning of college.

Miss Charlotte Ayres, chairman of the Big Sister committee for the school year of 1920-21 worked out the plan of action which has been successfully carried out by the 15 captains and their respective 20 team workers.

Cooperating with the Big Sister workers this year were representatives of the college Y. M. C. A. who did many things to make the work easier for the girls.

All captains of Big Sister teams as well as the team workers themselves were up before the dawn this morning and were among those first on the hill to get out their assignments. They were all among the "1" numbers issued in the number scramble.

During the summer, Big Sister workers of the college Y. W. C. A. were hard at work getting in touch with girls whom they knew contemplated entering K. S. A. C. this year, and also prospective students. To these students the girls have written with their offer of help and many replies have been received accepting the offer of assistance from the older girls who know the "ropes."

Mrs. Mary Pierce Van Zile, dean of women, acted as advisor to Miss Ayres and her committee, representing the faculty Y. W. C. A. board.

Big Sisters this year, like all other years since their introduction to the Aggie campus at registration time, are recognizable because of the unmistakable purple and white badges which they wear. Any new student, either boy or girl, is entitled to assistance or advice from any of these helpers and they will be found courteous and approachable at all times.

The advisory board of the Y. W. C. A. will serve tea in the Y. W. C. A. rooms in Domestic Science Hall Monday afternoon, all day Tuesday and Wednesday morning. At this time all girls, new or old students, are welcomed. The purpose of these informal teas is to promote friend-

ship and to make it possible for all students to get acquainted with each other.

Thursday night the Big Sister party for all girls of the college will be given. Further announcement of this affair will be made on the college bulletin boards and through other sources. All girls are urged to attend the affair.

Big Sisters will this year as in all other years have as their chief aim the forming of lasting friendships with new girls. They wish to serve as a "society for the prevention of lumps in the throat," their special duty being to keep girls from getting homesick, and they will be glad if any new girl needing assistance will apply to them through the Y. W. C. A. office or the office of Dean Van Zile.

CRICKET MAY BE PLAYED AT THE COLLEGE THIS FALL

South African Student to Introduce Game Here

J. F. T. Mostert of Balfour, South Africa, is going to try to introduce cricket, the national game of the British empire, as one of the pastimes of the college. Prof. Z. G. Clevenger, head of the athletic department, has given his approval. If material, which is both costly and difficult to obtain, can be bought, it is quite likely that in the near future K. S. A. C. will be able to produce some good cricketers.

Mostert was captain and coach of the Pretoria college cricket team and he was also a member of the Transvaal school's cricket eleven.

All musical instruments sold on easy payment plan. Kipp's Music Store.

TO BE REGULAR NEWSPAPER NOW

PAPER TO BE PRINTED ON "NEWS PRINT"

Book Paper Used Last Year Has Almost Doubled in Price—Collegian Now Classified in the Newspaper Kingdom

The Kansas State Collegian is a regular newspaper now with the accent evenly placed on each of the words "news" and "paper." After a year of promenading in a coat of thick white book paper the Collegian has felt the tight reigns of the H. C. of L. Again the paper steps forth in regular news style printed on what journalists term "news print."

All city papers and the majority of college and university papers are printed on the "news print." Last year the Collegian was printed on book paper which in a way placed the paper out of the newspaper kingdom.

This year the book paper has raised in price to almost double its former rate. Now it is nearly twice as much per pound as the print paper. After carefully figuring on the cost the Collegian board found that by using the "print paper" several hundred dollars could be saved in nine months. As the print paper is much cheaper than the book and as it is the standard grade for use in newspaper work, the board decided at its last meeting that the Collegian for the coming year should be printed on the print paper.

OVER SIX HUNDRED BOYS ON Y. M. WORKING LIST

About Usual Number of Girls Want Work

This year there are more requests for work from both girls and boys than there are places to be filled. A large number of girls have been placed in homes where they can work for part or all of their room and board. However, there are still a large number of girls still looking for such places.

This year there is about the usual number of girls wanting work, but there are more men than in previous years. According to Dr. A. A. Holtz, there are over 600 men on the working list for this semester.

The Y. M. and the Y. W. are carrying on what might be termed an employment bureau. People desiring student help should apply to the Y. M. or Y. W. The students wanting work should also have their names listed. The Y. M. and Y. W. will then try to fill the bill, both for those desiring student help, and for the students wanting work.

Perhaps students having a part or all of their own expenses to make through school would be interested to know that there are several student loan funds which have ample funds and are willing to lend money to students who need it. Those interested in these loans may inquire for further information from Dean Mary Pierce Van Zile.

All musical instruments sold on easy payment plan. Kipp's Music Store.

Miss Nita Richardson of Wynne Wood, Okla., who is a member of the Alpha Zeta chapter of Alpha Delta

Phi, will attend school here this winter. Miss Richardson has attended school for three years at the Southern Methodist university at Dallas, Texas.

Have Orchard Tour

The third annual orchard tour under the direction of E. G. Kelly, entomologist for the extension division, was made the first week in September. Starting from Topeka, about 30 prominent orchardists headed by Mr. Kelly, visited during the week 34 representative orchards of the state. The tour, according to Mr.

Kelly, was an exceptionally successful one. The objects of the tour were threefold, viz., to study orchard management, to advertise Kansas orchards, and to get acquainted.

During the summer Miss Edith Bond of the physical training department taught interpretative dancing at the University of Chicago. Miss Bond taught the same dancing courses in Chicago that she taught to the Aggie girls last semester.

How does my suit compare
with my friend's clothes?
—is a sensible thought

It is the best kind of business for a young man to be dressed so that when he steps onto the sidewalk or into an office there is instant respect paid to his distinctive appearance—or you can term it his well-tailored appearance.

It is just as economical to wear correctly tailored clothes as it is to wear any other kind; and in the case of Society Brand Clothes—which we sell—the saving is all on the side of quality.

You will find these clothes have that hand finish, good fit, drape of coat front, and set of trousers which are the real components of style smartness.

The various models we are showing in

Society Brand Clothes

emphasize the desirability of simplicity in men's fashions.

We invite young men and men who stay young to come in and see and hear how we are solving the clothing problem for them. Whether you want a necktie, shirt, hat or shoes you want something that is exclusive in style without being excessive in price.

CHANGES ARE NUMEROUS ON FACULTY ROLL

DEAN POTTER GOES TO PURDUE
UNIVERSITY

SEATON TAKES POTTER'S PLACE

Dr. J. R. Macarthur Takes Position
in California Institute of Tech-
nology—Z. G. Clevenger Leaves
to Direct Tiger Athletics

Old students as well as new are making the traditional mistake of thinking the new instructor a freshman, for dozens of new faces are included on the K. S. A. C. teaching staff this semester.

Chief in interest, perhaps, among the resignations of faculty members is that of Dean A. A. Potter, head of the K. S. A. C. engineering department since 1905, who goes to Purdue university as head of the engineering department there. Dean Potter is succeeded by R. A. Seaton, a K. S. A. C. graduate who has been connected with the engineering department here since 1904.

Doctor Macarthur Resigns
Another resignation which will be of much interest to all of the old students is that of Dr. J. R. Macarthur, a member of the English department here since 1914, who goes to Pasadena, Cal., where he has a position in the English department of the California Institute of Technology. Dr. Macarthur has been particularly active during his residence here among the student organizations of which he was a member.

The most recent resignation to be announced is that of Z. G. Clevenger, director of K. S. A. C. athletics, who leaves K. S. A. C. for a position of the same nature at the University of Missouri.

Other Changes on Faculty
Other professors who have taught their last year at K. S. A. C. are Prof. H. H. Fenton of the department of electrical engineering, Prof. E. A. Stewart of the department of physics, and Instructor Charles Christoph, and Instructor Annette Leonard, of the English department. Prof. Jesse

Brenneman, formerly a professor at the New Mexico A. and M. college takes the position left vacant by the resignation of Prof. Fenton, and H. H. Laude, a K. S. A. C. graduate who comes here from the Texas A. and M. college has been secured to take the position of assistant in charge of the cooperative experiment section of the agronomy department, which the resignation of Mr. Bruce Wilson made vacant.

Among the new minor professors who go to make up the new instructional staff for the year are I. A. Wojtaszak, assistant professor of applied mechanics, who takes the place of Prof. W. B. Wendt; R. L. Green, associate professor of agricultural economics; Mrs. Elizabeth Hargrave Baldwin, assistant professor of household economics and director of the cafeteria; Miss Amy Jane Leazenby, assistant professor of household economics; and E. A. Knoth, assistant professor of physical education, taking the place of H. A. Lorenz.

THE Y. M. C. A. HAS A NEW SECRETARY

R. E. HOUSE ASSUMED HIS
DUTIES IN EARLY SUMMER

Repairs Amounting to \$500 Have
Been Made this Summer on the
Y. M. C. A. Building

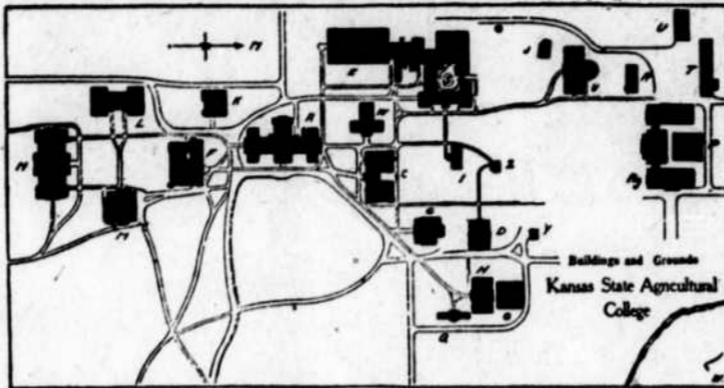

Rev. R. E. House of Burlingame has been secured to serve as building secretary at the Y. M. C. A. for this year. Reverend House during the past year has been pastor of the Baptist church in Burlingame. He has had 30 years of experience preaching in Illinois, Iowa, and Kansas.

He came to Manhattan early in the summer to assume his duties here, in order that he might be ready for the return of the old students and the incoming new students this fall.

After weeks of work, Reverend House reports that everything is in readiness. Repairs have been made on the Y. M. C. A. building amounting to \$500. The Y. has been given a general clean up. The lobby has been repainted, the bedsheets enamelled, the floors oiled, and the roof and other parts of the building repaired.

Ralph Foster who graduated with the class of 1920 in industrial journalism, has accepted the position of agricultural editor at the University of Arkansas.

BUILDINGS GROUPED AND NUMBERED FOR CONVENIENCE OF AGGIE STUDENTS

The Kansas State college campus is the second most beautiful in the United States. The many varieties of trees, its beautiful approaches, and the general layout of the grounds, make it a most artistic place.

The buildings are so grouped that it is easy for a student in each division to get to his various classes. The above illustration shows all the buildings on the campus.

The building marked "N" at the bottom of the page is the Nichols Gymnasium, where registration takes place. Buildings are designated as follows:

A—Anderson Hall. (President, Registrar, Business Office, College Physicians, Economics, Education, English Literature, Home Art, and Mathematics; Division of College Extension.)

Ag—Agricultural Hall.

B—Barn.

C—Denson Hall. (Chemistry, Electrical Engineering, and Physics.)

D—Dairy Barn.

E—Engineering Hall.

F—Fairchild Hall. (Library, Entomology, History, and Zoology.)

G—School of Agriculture Hall.

H—Horticultural Hall. (Botany and Horticulture.)

K—Kedzie Hall. Cafeteria; The

English Language, Journalism, and Printing.)

M—Auditorium. (Music.)

N—Nichols Gymnasium. (German, Military Science, and Physical Education.)

P—Stock-Judging Pavilion.

R—Farm Mechanics Hall.

S—Shops.

V—Veterinary Hall (Bacteriology, Physiology, and Veterinary Science.)

W—Chemistry Annex.

The rooms in the various buildings are numbered as follows, beginning with the northeast rooms on each floor and going the directions, south, west, north, and east.

Basement 1 to 52

First Floor 26 to 50

Second Floor 51 to 75

Third Floor 76 to 100

Dr. L. R. Vawter of the veterinary department of K. S. A. C. has accepted a position with the University of Nevada, at Reno, Nev., where he will do special research work with the University Experiment station of that institution. Dr. Vawter was connected with the department of pathology of K. S. A. C. for two years.

All the latest records and sheet music. Kipp's Music Store.

IN COLLEGE SOCIETY

The Gammi Chi chapter of Kappa Sigma fraternity entertained with a dancing party at the Country club in Wichita, Thursday evening, September 9. The chapters at Kansas university, Baker, Washburn and Stillwater, Okla., were the guests of the Gammi Chi chapter. A number of K. S. A. C. coeds who attended the party were Miss Lillian O'Brien, Miss Bertha Dubbs, Miss Ardis Atkins, and Miss Florence Johnston.

Miss Ruth E. Hurd and Prof. Edward West, both faculty members, were married on May 27 at the home of Professor and Mrs. L. E. Conrad. They will reside in Manhattan this winter.

June 19 was the wedding day of Miss Doris Bugbey, former member of the music department faculty, and Willey B. Wendt, associate professor in the applied mechanics department.

Miss Emily Lofinck and Mr. Willis J. Masemore were married June 2 and are at home at Coldwater.

FOOTBALL MEN OUT ON FIELD LIMBERING UP

SQUAD OF 30 IS OUT FOR FIRST PRACTICE

SCARCITY OF EXPERIENCED ENDS

Reported That Joe Bogue Will Not Be Out—Bachman Unwilling to Give Statement Regarding Prospects Until He Knows Players Better

The directors of the Manhattan chamber of commerce have voted to buy 200 season football tickets, which they will then dispose of among the downtown merchants. By so doing it is the desire of the chamber of commerce to show their confidence in Mike Ahearn, newly elected director of athletics, and also to show that they are willing to stand behind the Aggie athletes.

Aggie football letter men and aspirants for letters are out on Ahearn Field every afternoon now limbering up and learning again how to handle the elusive pigskin. The coaches, Bachman and Van Fleet, have been out with the squad since Wednesday. Suits were checked out and a little individual practice indulged in the first two days of the week, but the coaches could not go on the field with their men before September 15 according to a rule of the Missouri Valley Conference.

Some of the old familiar faces are missing this year, but there are a host of new ones from last year's freshman squad. Carl Roda, one of the greatest guards that ever wore Aggie moleskins was graduated last year and will not be back, nor will Leo Ptacek, fullback, and Charles Enlow, end. Prock Randels, end, is to teach school this year. Hobe Fairman, fullback, who was injured quite seriously in the Camp Funston game last fall will not be out this season.

Thirty Out for Practice
A squad of 30 was out for the first practice and more are expected as the athletes get their assignments straightened out. The new coaches have good line and back material, but there is a scarcity of experienced ends. It is reported that Joe Bogue, last year's captain and left end will not be out this fall, but the Collegian was unable to verify this report. If it is true the only prospects in sight for end that have had any experience on Varsity are Winter and Ginery, who are both better linemen than ends, but who have played at end. McGuire, Randall and Sites from last year's freshman crew are other good prospects.

Three Aspirants for Center
In the line there are three aspirants for the center position. Cleland is a last year letter man, and Murphy a substitute. Hahn made his letter in the S. A. T. C., year of 1918, but played on the freshman squad last year. He will give the Varsity men a run for their money this year. There are eight men out who have played at tackle, most of whom have also played at guard. The letter men are Winter, Ginery and Gatz. Others are Fletcher, Divilbiss, Tex Marshall, McGuire, Stauffer and Butcher. Huston is out, alternating work at the guard position with practice at booting the ball over the crossbar.

The backfield letter men include the Cowell brothers of three-letter fame, Hinds, Gallagher, Burton and Quinlan. From last year's yearlings Schindler, Axline, Bryan and Goerke have returned to compete for Varsity positions.

Coach Bachman stated that he was unwilling to give a statement regarding prospects until he became more thoroughly acquainted with the players, the student body, and the Missouri Valley conference schools. He said:

"I am not promising any championship team and shall not talk about such an eventuality until we have won first honors. I will say, though, that I shall do my best with the assistance of Captain Van Fleet to turn out a championship contender."

MISS TAUSCHE WILL TEACH PHYSICAL EDUCATION HERE

To Take Place Left Vacant by Miss Winifred Bartholf

Miss Louise Tausche of La Crosse, Wis., a graduate of the Sargent physical education school has accepted the position left vacant by Miss Winifred Bartholf, assistant in the women's physical educational department here. Miss Bartholf resigned shortly after

school closed last spring although she continued her work here through the summer school. Miss Bartholf is now supervisor of 1,500 girls at Fort Wayne, Ind.

NEW ENROLMENT SYSTEM WORKS

BAD WEATHER WILL SHOW UP ADVANTAGE OF SYSTEM

Plan to Divide Divisions into Departments for Registration Next Semester

That the new system of registration whereby the numbers for both the freshmen and the upperclassmen are given out by divisions, is an improvement over the old method is the opinion of Miss Jessie Machir, college registrar.

The advantages of the new system are not so apparent on a warm sunny day but when there is a rainstorm in progress or the thermometer registers 10 below or worse the enrolling students will find it much more pleasant to be seated in the auditorium than to be standing on the outside in front of the gymnasium. There was not nearly so much waiting at the assigners' tables this fall as there has been heretofore because students for a particular division were not called from the auditorium until they were needed in the gym.

It is probable that the divisions will be divided into departments when the numbers are given out on the next registration day as this will make the new system much more efficient. Such a division will insure each assigner having enough to do without being overly crowded.

S. S. G. A. IS GETTING PRETTY WELL ORGANIZED

800 MEMBERSHIP IN ASSOCIATION FIRST THREE DAYS

Election of Officers in About Two Weeks—Urge Consideration of Candidates

Memberships in the S. S. G. A. totaling approximately 800 were taken out during the three days of registration. This, according to the acting officers of the association, indicates that the S. S. G. A. is firmly on its feet and is going to mean a lot to every K. S. A. C. student this year. Subscriptions were solicited in the gymnasium, auditorium, and in Anderson hall during the first three days of this week. "Ship" Winter is acting as president of the S. S. G. A. until the return of Ray Watson who is vice president of the association. Miss Christine Cool is acting secretary of the association.

The election of the new officers of the S. S. G. A. will be held in about two weeks according to present plans. It is urged that all members be thinking about the matter so that they may have persons in mind who will be capable of filling the offices in the association.

After next Wednesday no one other than a member of the S. S. G. A. will be allowed a vote in any college organization.

Miss Irene Graham has charge of issuing permission for all college social affairs and Ray Watson has charge of general college affairs. Permission should be applied for 48 hours before the affair is to be held.

DR. E. V. FLOYD HAS RETURNED

HAS BEEN ON LEAVE OF ABSENCE FOURTEEN MONTHS

Specialized in Thermodynamics at University of Wisconsin—Completed Two Courses and Doctor's Research

Prof. E. V. Floyd of the physics department of the college, returned August 15 after a fourteen months leave of absence as an Honorary Research Fellow in the University of Wisconsin, where he specialized in thermodynamics. The purpose of the leave was to enable Professor Floyd to complete two courses and the doctor's research, the subject of which was the "Internal Energy of Gases." Two-thirds of the time was spent in building the apparatus with which crude readings were obtained which showed that valuable results were possible.

Before publishing the outcome of the experiment, two refinements must be made. The University of Wisconsin is loaning several hundred dollars' worth of apparatus to K. S. A. C. to make possible the finishing of this work. The wireless room on the third floor of the physical science building will be converted into a research laboratory where Professor Floyd expects to complete the experiment.

SOME PROFS HARKED TO CALL OF WILD WHILE BRIGHT LIGHTS LURED OTHERS

Like the flu, registration, the coal shortage, and various other afflictions, whether real or fancied, vacations, so they say at least, affect alike the just and the unjust. Perhaps that is how college professors as well as students get in on vacations.

Anyway the college profs. took 'em. And although as yet only two cases have come up of college professors who saw the country at close range, working in the harvest fields a la occasionally to ease up the monotony, they do say as how some of the dear teachers were just a wee bit downright wild when the blissful strain of teaching the freshmen how to spell, punctuate, tell a chicken from a pig, etc., etc., was over.

For instance take Prof. J. V. Cortelyou who during the college year presides over the young Aggies whose desire for self expression leads them to learn to jabber in three or four tongues. When college closed he bundled his family into the automobile and took them on a little jaunt to Hermosa Beach down in Southern California where he caught yellow tails and white bass until the fishing fever got into his blood to such an extent that he went off on an honest to goodness whaling expedition.

Dean Holton was content to stick closer home this summer than was his neighbor Professor Cortelyou. He has been rewarded however by his faithfulness to the old home town, by having one of the finest gardens in the city.

No gypsy that ever stuck his head out of a camper's wagon has anything on Prof. J. W. Searson, head of the K. S. A. C. English department. This summer Professor Searson went west first to Utah, and then to California and then—but nobody seems to know exactly just everywhere Professor Searson did go and probably by this time he can't even remember all of his wanderings himself.

Some of the Aggie profs. seemed to favor the cities this summer. Professor Crawford was one of these, although he did not seem to care particularly in what section of the country they were located.

Prof. R. W. Conover was another city lover. He spent most of his vacation prowling around in the jungles of Philadelphia studying there the movie industry, scenario writing in particular. Professor Conover says that "Humoresque" is his favorite movie and that if it were twice as good as it is it would still be rotten.

The city did not get its claws on all of the Aggie profs., however. Dean J. T. Willard and Prof. C. E. Rogers, among others, remained faithful to the call of the wild. Professor Rogers went down into the Ozarks for his vacation. Dean Willard, however did not shirk labor although he chose muscular exertion. The general science dean nailed four more side boards on his cottage at Green Mountain Falls, 7,500 feet above sea level.

Prof. H. W. Davis declares that he at least tried to be good during his vacation, spending most of it with his family in Indiana, and running off for a swim in Lake Michigan whenever he felt a sassy paragraph coming on.

But some of the Aggies, especially those who got a P or two and maybe a C firmly believe that no college professor could go on a vacation without, like a murderer revisiting the scene of his crime, just peeking in at some college. Maybe they all did. What'll you bet?

WELCOME BY PREXY GIVEN 1920 AGGIES

FIRST ASSEMBLY OF YEAR WELL ATTENDED

BEARDSLEY IS THE SPEAKER

Importance of Right Kind of Home and College Environment Stressed by the Speaker

Official welcome to the students of K. S. A. C., both new and old, was extended by President W. M. Jardine at the first assembly of the year, held at 11 o'clock Wednesday morning. The exercises were well attended.

"This is to me the most inspiring moment of the year," said President

Jardine, in addressing the student body at the first assembly. He dwelt briefly upon the significance of the occasion, speaking of the large number of students entering, at this time, the various institutions of higher learning in the United States.

The first chapel of the year was opened by Alpha Mater, after which Prof. E. V. Floyd of the department of physics offered prayer. A vocal selection, "The Fields of Ballymore" by Florence Turner Maley, was given by Mr. Williams, a new instructor in the music department.

The address of the morning was given by the Hon. Henry M. Beardsley, a prominent Kansas City attorney, and at one time mayor of the city. During his period as mayor he established a record for putting Kansas City in order. In spite of his prominence in city affairs the Honorable Beardsley has, for 27 years, found time to act as president of the Y. M. C. A. Mr. Beardsley graduated from the University of Illinois in 1879.

The significance of the biographies of prominent men was pointed out by the speaker, who emphasized the point that in the life of every great man, the right sort of a home sur-

rounding had a great influence over his career. The importance of an education and of grasping the important things to be gained by an education was also stressed by Mr. Beardsley.

"There must be men for leadership and the day waits for the leader. Obstacles and difficulties in the path of the heroic are but stepping stones to higher things," he said.

In closing his address he made a plea for more self sacrifice and less selfishness in the life of today, saying "Every wrong has its basis in human selfishness and every noble act is brought about by self sacrifice."

AGGIE DELEGATION BREAKS RECORD

TWENTY-NINE K. S. A. C. GIRLS AT Y. W. CONFERENCE

Largest Delegation Ever Sent from Here as Well as Largest at Conference

Oh we are the Aggies from Kansas, from Kansas.

Oh we are the Aggies from K. S. A. C.

We grow our potatoes; we can our tomatoes—

Oh we are the Aggies from K. S. A. C.

The above was the song by which the K. S. A. C. delegation to the Y. W. C. A. conference at Estes Park, Colo., made themselves known. Twenty-nine Aggie girls attended the conference, the largest number ever going from here. K. S. A. C.'s was the largest delegation sent from any college or university in any of the nine states represented at the conference. The conference was held from August 7 to 27.

The program for each day began with morning worship led by Miss Hilmer of the national board of the Y. W. C. A. Bible study classes began at 9 and the World Fellowship classes at 10 o'clock. Technical courses at which problems of various schools were discussed were held. Hikes, horseback rides, and motor trips were scheduled for every afternoon. The meetings in the evenings were followed by meetings of each delegation.

One of the sights of particular interest to the Aggie delegation was Baldpate Inn where the Seven Keys to Baldpate were to be seen hanging out in front. The scene was very much like the scene as shown in the play Seven Keys to Baldpate which was given at K. S. A. C. last winter. Among the trips much enjoyed by the Aggie coeds was the visit to the continental divide.

The Aggie girls surprised Miss Mildred Inskip, former college Y. W. C. A. secretary with a birthday party and a birthday cake, as her birthday anniversary occurred during the Y. W. conference.

The leaders of the conference, according to girls who attended from here, were all jolly, peppy, inspiring people. Doctor Smith of Smith college, the large girl's school in the east, gave a series of lectures during the conference. Work and play, a jolly bunch of girls, and a rain every day, all combined, say the girls who attended the meetings, to make the conference a success.

THE STUDENT LOANS ARE NOW AVAILABLE

JUNIOR AND SENIOR STUDENTS GIVEN PREFERENCE

Waters Fund and Faculty Fund—Seldom Lend More Than \$100—Maximum of \$400 May Be Obtained from P. E. O. Fund

For college students in need of securing financial aid during the college year several loan funds are available. In the case of the majority of these, however, junior and senior students are given the preference.

Two of the funds, the fund maintained by the P. E. O. and the fund maintained by the state federation of women's clubs, lend money to girls only. The Waters fund and the faculty fund are available to both men and women, but loans are seldom granted to other than juniors and seniors. More than \$100 is seldom loaned from the Waters and faculty funds. A maximum amount of \$400 may be obtained from the P. E. O. fund.

Dean Mary P. Van Zile has charge of making the recommendations for loans for women students. Men wishing to secure loans from the faculty or Waters fund should see some faculty member of the loan committee.

Miss Mabel Troutfetter of Colby, Miss Wilma Rosrk of Junction City, and Miss Elizabeth Adams of Maple Hill, spent the past week visiting at the Pi Beta Phi house.

ENROLMENT GREATEST IN HISTORY

YESTERDAY NOON 2,268 STUDENTS WERE ENROLLED

MANY LATE COMERS ENTERING

Short Course Students Have Not Yet Enrolled—Every Decade Since 1890 Has Shown Rapid Enrolment Increases

The heaviest enrolment in the history of the college at this early stage in the enrolment period is reported by Miss Jessie Machir, registrar. The total enrolment at 12 o'clock Thursday morning was 2,268, which is the largest number by far enrolled any previous year on the fourth day of the opening of the term.

By the end of this week it is hoped that the entire enrolment, with the exception of the short course students may be taken care of. However, every year sees many late comers, with some one enrolling almost every day for the first few weeks.

Last year the total enrolment for the first term was 2,476. The total enrolment number for the past fiscal year which is greater than any other enrolment in the history of the college equaled 3,352, which is 12 more than the enrolment of 3,340 in 1916-17. This was the highest enrolment in K. S. A. C. history up to 1919-20.

Each Decade Shows Increase

Every decade since 1890 has marked a period during which the enrolment has made rapid increase over that of the previous ten years. During the last decade the enrolment has increased from 2,407 students in 1910 to 3,352 students in 1920, an increase of 39 per cent. Between 1900 and 1910 there was an increased enrolment of 81 per cent and between 1890 and 1900 there was an increase of 122 per cent.

One of the largest increases shown last year was in the number of freshmen in attendance, 894 or 84 more than has ever attended any previous year. Ten years ago the freshman enrolment was only 593 showing a gain during the last decade of 67 per cent.

The goal set for the freshman class this fall is 1,200, almost 300 more than have ever enrolled before. Miss Machir said today that she believes the goal has been reached. As yet the number enrolled in the various classes has not been checked, so it is impossible to give a definite statement as to the number enrolled in the freshman class.

Many Courses Taught

K. S. A. C. students are often dubbed "The Farmers," a nickname which is misleading. Often people come to believe that agriculture is the only important course taught in the school. Just a glance at last year's enrolment in the various courses would convince even the most doubtful university brother that the Aggies are taught many things, with engineering as the most popular course among the men.

College enrolment records for the past year show that in the division of engineering there were 918 students enrolled, 640 in the division of agriculture, 574 in home economics, 503 in general science, 89 in veterinary medicine, 224 in the preparatory school, 480 non-collegiate special students and 690 in the summer school.

Glee Club Tryouts

The tryouts for the Girls' and Boys' Glee clubs will be held Monday afternoon, September 20. The girls will meet in the auditorium at 4:00 to 5:00 o'clock and the boys will meet from 5:00 to 6:00 o'clock. Prof. A. Lovejoy is very anxious to meet a great many new voices and urges anyone who thinks they can sing to see him on Monday afternoon.

Will Have Smoker

The American Legion will hold a smoker at the community building Monday evening at 8 o'clock. All ex-service men are invited to attend. Every one is asked to bring with him his discharge, as all day Monday and Monday evening there will be an officer at the building who will fill out applications for victory medals. These medals will be presented to the men on Armistice day, November 11.

R. K. Girard, who attended school here last year is attending the University of Missouri this winter.

John Charles Post, son of Rev. and Mrs. J. J. Post of Beverly, Cal., and a nephew of Miss Etta E. Chilson, a student at K. S. A. C. arrived this week to attend college.

OMICRON NU HAS HIGHEST AVERAGE

THETA SIGMA PHI GRADES RANK SECOND

Ionians Lead Literary Societies, with Average of 88.57—Chi Omega Ranks First Among Sororities

The grade standing of all college organizations for the second semester for the year of 1919-1920 was announced today by Miss Jessie M. Machir, registrar. Omicron Nu, honorary home economics fraternity heads the list of 47 college organizations with the grade average of 90.06. Theta Sigma Phi, honorary journalistic fraternity for women placed second on the honor list with an average of 89.49.

The Chi Omegas lead among women's social fraternities and the Alpha Tau Omegas are at the top of the list of men's social fraternities. The Ionians carry away the honors for the literary societies, while the Quill club was first of the honorary mixed fraternities. Alpha Zeta, first among the men's honorary organizations made an average of 87.2.

The list and standing in detail is as follows:

All Organizations

Omicron Nu	90.06
Theta Sigma Phi	89.49
Theta Chi Gamma	88.43
Alpha Zeta	87.20
Quill Club	86.40
Sigma Delta Chi	86.17

Canteen Has New Director

Miss Pauline Clarke has accepted the position of manager of the College Canteen for the coming winter. She has been busy this week securing counter and kitchen help and installing her system of management and already has the canteen running smoothly and handling the big student trade to which it is accustomed. Miss Clarke comes here from Madison, Wis., where she was director of a cafeteria.

Wanted:—Student with some experience on a soda fountain to work part time. Apply College Canteen.

BROWN BULL TO APPEAR AGAIN

WILL BE PUBLISHED FOUR TIMES THIS YEAR

Theta Sigma Phi May Take Part in Editing the Magazine—Milton Eisenhower Is Editor in Chief—Walter Karlowksi Is Business Manager

The Brown Bull, the college humorous magazine, is to be published four times this year. It will probably be a forty-eight page magazine with a large number of cartoons and photographs.

The Brown Bull was published

only once last year. It is edited by Sigma Delta Chi, men's journalistic fraternity. This year Milton S. Eisenhower is the editor and Walter Karlowksi the business manager.

There is some talk of the women's journalistic fraternity, Theta Sigma Phi, taking part in editing the magazine but no definite action has been taken as yet. The Topeka Capital and other papers had much favorable comment for the first edition last year.

The Capital said, "The Brown Bull, from a literary standpoint, is the best college humorous magazine that we have seen this year."

Mrs. Minnie Sequist left Tuesday for Topeka to act as judge in the girls' baking and canning club contest to determine which club will represent Kansas at the interstate contest to be held in Sioux Falls, Ia., the week following the Topeka fair.

All of his suits are strictly hand tailored, fitted in the basting, cut up-to-the-minute and will positively fit you. He is a real tailor having had over 30 years' experience and is an expert on alteration, cleaning, dyeing and pressing

MEN ARE GIVEN GOOD POSITIONS

TEACHERS OF AGRICULTURE PAID BIG SALARIES

More Trained Men Needed for This Work—Educational Department Insures Positions

At a salary of \$2,000 up to \$2,700, 75 more men could have been placed by the department of education last year as teachers of vocational agriculture had there been more men trained to accept positions in this field. This year the department will be able to place at least 150 men in Kansas and the surrounding states.

A year ago in Kansas there were only 31 schools teaching vocational agriculture, while this year there are 46 schools teaching it. This increase would have been much greater could teachers have been provided. Each year the appropriation for the vocational schools increases until 1926, according to the Smith-Hughes act. Therefore it is evident that in five years the number of schools teaching this work will have doubled in number.

The department of education can absolutely insure a man trained along this line a position at a salary of from \$2,000 up to \$2,700. The amount of salary depends entirely upon the man and his ability.

To prepare for this work, a man should take balanced work in the agricultural course and 18 hours of educationals as outlined by the department of education. Anyone interested in the work should see Dean E. L. Holton, head of the department of education, or C. V. Williams, professor of vocational education and state director of the work in Kansas.

DR. R. K. NABOURS IS TO RETURN SOON

HAS BEEN IN SOUTHERN ASIA SINCE 1919

Left K. S. A. C. on Leave of Absence to Study Karakul Sheep—Spent Summer in Bombay, India

A cablegram has been received from Dr. R. K. Nabours, head of the zoology department of the college, from Manila, P. I., stating that he

expects to reach Manhattan by Sept. 30.

Doctor Nabours left K. S. A. C. on a leave of absence, in October 1919, to study Karakul sheep, whose habitat is southern Asia. This breed is noted as producers of fur instead of the ordinary wool.

Doctor Nabours spent the winter in Constantinople, crossing the Black Sea seven times, and spent the major part of the summer in Bombay, India, and in southern Afghanistan, reporting a temperature there during July of 118 above in the shade.

MORE JOBS ARE NEEDED FOR K. S. A. C. STUDENTS

About 75 Students Have Work So Far—First Hour Classes Interfere

Considerable difficulty is being encountered this year in finding positions for students who desire to work outside along with their school work.

About 75 students have been able to find work so far, according to Dr. A. A. Holtz, of the Y. M. C. A., who is in charge of the employing of students for outside work. At present, there are 130 applications on file in Doctor Holtz's office waiting to be filled.

Some places are open in sorority houses, the work being waiting on table, but these positions require that the student must not have a first hour at the college. The majority of applicants have classes at this time and do not care to change. Students with experience in some line of business have secured jobs in stores and offices in the same line. Others work for farmers and in the resident districts doing chores, washing windows, cutting grass, and miscellaneous work.

GIRLS' K CLUB NOW APPROVED

TO BECOME ACTIVE ORGANIZATION THIS FALL

Only Club of Its Kind in the Middle West—Ten Girls Now Eligible for Membership

Are you an all round girl athlete, a good student, and the possessor of a purple K?

If you are, Aggie co-eds, in the fall you will be eligible to membership in the girls' "K" club, whose organization has recently been approved by the athletic board.

The club was formed last year by a number of Aggie girls who are working for a white sweater and a purple K, which are given by the women's athletic department to any girl who wins 280 points, and who shows extraordinary ability and spirit in the school athletics. Ten girls are now eligible for membership and will be initiated early in the fall term.

The purpose of the club is to encourage girls to take part in athletics throughout their college course. If any girl after becoming a member ceases to participate in school athletics she will be automatically dropped.

The farmer maids have put one over their university sisters, as this

is the only girls' club of its kind in the middle west. The Aggie K girls are proud of this fact and are anxious to make the club a "rearing success" as one of the members put it.

Each of the six charter members of the club can play hockey, baseball, basketball, volley ball, and tennis as well as swim, dive, paddle, and ride.

The charter members are: Edna Chapin, Clara Higgins, Mable Evans, Ruth Thomas, Avis Blain, and Clementine Paddleford.

RECEIVED HONORS AT CAMP CUSTER

AGGIE MEN PLACE SECOND IN SILVER CUP CONTEST

Record Made by K. S. A. C. Contingent to Be Part of War Record at Washington—Seven Aggies Attend Camp

Second place in a senior advanced camp course along purely military lines in competition for the silver cup awarded the school making the best record, was won by the K. S. A. C. contingent at the R. O. T. C. camp at Camp Custer, Mich., this summer.

Following are the names of the men who were in the Aggie contingent: W. F. Sterling, W. H. Koenig, E. E. Hodgson, R. E. Marshall, G. E. Gates and P. M. McKown. R. S. Rath was the only man from K. S. A. C. in the basis course.

Emphasis was placed on both the

theoretical and practical sides of the military training in the competition. The competition was based on the training the men had had, and their ability to put into practice what they had learned during the summer camp. Major L. C. Davidson, who was camp adjutant at Camp Custer returned this week to resume his duties in the military department.

The record made by the Aggie contingent this summer is to be made a part of the war records at Washington. When there is need for commissioned officers in the Reserve Corps of the army, this record will be taken into consideration.

The location of next year's R. O. T. C. camp is not as yet definitely decided, but the camp probably will be either at Camp Devens, Mass., or Fort Snelling, Minn.

DAY AND NIGHT SCHOOL AT THE MANHATTAN BUSINESS COLLEGE

Enroll now for the fall term. Get a thorough business training in an up-to-the-minute School of Business. Thorough courses are offered in—Commercial, Shorthand, Civil Service, Penmanship, Typewriting, Banking, English, Court Reporting, Salesmanship and Business Efficiency, Adding and Listing Machines, Secretarial, and Commercial Teaching.

Shorthand, Typewriting, Bookkeeping, and Business English and Correspondence are taught by mail.

For information phone 64, or address L. W. Nutter, President, Manhattan Business College. 2-4.

How does my suit compare with my friend's clothes? —is a sensible thought

It is the best kind of business for a young man to be dressed so that when he steps onto the sidewalk or into an office there is instant respect paid to his distinctive appearance—or you can term it his well-tailored appearance.

It is just as economical to wear correctly tailored clothes as it is to wear any other kind; and in the case of Society Brand Clothes—which we sell—the saving is all on the side of quality.

You will find these clothes have that hand finish, good fit, drape of coat front, and set of trousers which are the real components of style smartness.

The various models we are showing in

Society Brand Clothes

emphasize the desirability of simplicity in men's fashions.

We invite young men and men who stay young to come in and see and hear how we are solving the clothing problem for them. Whether you want a necktie, shirt, hat or shoes you want something that is exclusive in style without being excessive in price.

FRIDAY, SEPTEMBER 17, 1920

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Make the "Beat K. U." slogan a reality.
4. Aggies at the top of conference athletics by 1922.
5. Clean politics.
6. Greater cooperation between alumni, students, and faculty in bringing athletics to K. S. A. C.
1. Remodeling of the auditorium stage.

DORMITORIES FOR K. S. A. C.

The ever increasing enrollment is bringing the student rooming situation to a critical point. It has become so critical that according to President Jardine something must be done and done within a year, otherwise next fall K. S. A. C. will be unable to provide rooms for all of her students.

Dormitories for freshman girls is the solution to the problem, believes the President. Already the plans have been drawn up for the building. The thing which is holding off action on the dormitory plan is lack of sufficient funds.

These funds must come through an appropriation made by the legislature. The legislative body may not think it necessary that K. S. A. C. have dormitories as she has so far prospered without them. If the appropriation is granted it will be directly due to the fact that the Aggie students are behind the dormitory movement.

The student body can work individually and together for the appropriation. They can talk for it in their own community or town and to their parents. It is up to the student body to make the men and women who are interested in K. S. A. C. realize the actual need of dormitories. For it is the men and women who are interested in this college who will vote for the representatives that will boost the appropriation.

Talk is cheap and the Aggie students can put over a successful appropriation campaign if they start today to work for it.

A JOB FOR EVERYBODY

K. S. A. C. is a western school, characterized by its true western spirit. The school has a smile and a handclasp for every student; but better still it has a job for each one somewhere in the world that the Aggies call "hill activities."

There is a variety of school organizations at K. S. A. C., each taking up some phase of work different from the other. The Aggies boast of eight literary societies, twelve men's honorary fraternities, four women's honorary fraternities, and three mixed honorary fraternities. Each of these organizations is constantly on the lookout for students of real worth, who are not afraid to work.

Athletics is open to both boys and girls, and here there is an unlimited field of opportunity for those who have ability. Debating is open to all, and each term there is a tryout open to students who desire to make the college debating squad. The Y. M. and the Y. W. are always seeking new workers, for their field of work is large. Class politics annually calls from the student body boys and girls who have a political turn of

mind. These are only a few of the many fields of work open to the alert student who is interested in having a real part in the working world of K. S. A. C.

It is not hard to find your job if you are looking for one. Around every corner opportunities are waiting for the right man. On every bulletin board posters point out a job for you. The wise student will not reach for them all, but will use discrimination. He will study himself and determine what things he is the best fitted to do. He will choose a job to fit his ability. It is not the student that has his finger in every piece of the pie that always makes the best worker, for too often he will then be so overloaded with duties that his best cannot be given to any one thing.

The student who desires to be an Aggie booster will get into the working habit during his freshman year. He will immediately choose some job to do, for it is by doing that one acquires the Aggie spirit.

Too often a senior looks back disappointed over four empty years of college and realizes that school gave him little except the required number of credits. He realizes that all he looked for in college was the gay times and the easy path; he had no real job or part in the world of activities. He realizes that K. S. A. C. has a smile for everyone but the growler, a handclasp for everyone but the kicker, and a job for everyone but the slacker.

Y. M. AND Y. W.

EACH GIVE MIXERS

SIX HUNDRED GIRLS ATTEND Y. W. CARNIVAL

President Jardine Speaks at Men's Mixer and Football Pepstir—Boys Eat Ton of Watermelons

The Y. M. and Y. W. workers are believers in the theory that all work and no play makes school a dull place. So after four days of hard work helping the new students through registration, finding rooms for the roomless, and jobs for the jobless, the two organizations called "time out" Thursday evening while they held their annual fall mixers.

Tin whistles, paper caps, ice cream cones, kiddy slides, and a merry-go-round, were only a few of the lively carnival events which attracted the 600 college girls who attended the Y. W. C. A. carnival party given in the Nichols gymnasium yesterday evening.

Every college girl was handed an invitation to the carnival as she left the gym after enrolling. The object of the party was to promote good feeling and fellowship between the old girls and the new. Every year the Y. W. gives some sort of an all college girl mixer during the first week of school, and every year a new and different type of party is planned.

This fall the party took the form of a carnival. The interior of the gym was given a regular carnival at-

mosphere by the use of booths and bright decorations. Besides the many booths arranged around the room there was a merry-go-round, wheel barrow rides, a fish pond, kiddy cars, automobile buggies, and a fortune teller. Then, too, during the evening a number of the Y. W. girls entertained the guests with a short stunt.

The chaperons of the evening were Mary Pierce Van Zile, dean of women, Dr. Helen B. Thompson, dean of home economics, and Miss Irene Dean, head of the Y. W. C. A.

Luella Morris, chairman of the social committee for the Y. W. C. A. had complete charge of the arrangements for the carnival. Working under Miss Morris were the following committees:

Refreshments, Ruth Cunningham, Nita Clark, Dora Dakin; decorations, Sarah Meade, Hazel Olsen; entertainment, Esther Waugh, Gertrude Ramsey, Eleanor Watson, Hazel Richards; invitations, Irene Hoffhines.

The Aggie men's mixer and football pepstir was held in the gymnasium of the Y building Thursday evening at 8 o'clock. There were talks by President Jardine, Mike Ahearn, Coach Bachman, and Geo. Clammer of the chamber of commerce of Manhattan.

If the "old Aggie pep" has been missing for the past few years there is no doubt that it has returned with the new men this year. The yells and songs shook the rafters of the building while the manner in which the men completely destroyed a ton of watermelons is conclusive evidence of their ability to put things over this school year.

Dr. Merritt Resigns
Dr. Fred D. Merritt, professor of sociology and economics at this college has resigned to act as head of the de-

partment of economics and sociology and dean of the school of commerce and marketing at the Oklahoma A. and M.

Special Eight Day Sale

Beginning Saturday Sept 18. A Remarkable Gift Offer for Every Woman

A Dollar's Worth Free

"Everything Good to Eat"

At the Other End of the Wire

A TWIST of the wrist and electricity lights cities and towns, turns the wheels of industry, or affords conveniences to millions of people.

But let us follow the wire carrying this energy to its source and we find either a waterfall, a coal mine or an oil well.

Much of the supply of fuel in this country is being used up rapidly while the power of water is running to waste. For the rivers and streams of this country could, if properly harnessed, develop enough electric power to save 300,000,000 tons of coal annually.

By studying nature's forces—coal, oil and water—by applying them to machines, and finally by the perfection of apparatus to insure uninterrupted power service under varying conditions, the General Electric Company is serving to make electric power cheaper, more plentiful and reliable.

SOCIETY

AND SO THEY WERE MARRIED

Cupid certainly got his share of glory at this college within the last year for his record of weddings is well past the 35 mark and close to the 50 according to current reports. From a few days after Commencement until registration of the school year of 1920-21 wedding bells chimed almost daily announcing the nuptials of former Aggie students and faculty members. Only a few of many interesting announcements are given here but more will be made as they are given out to interested and congratulatory friends who have returned to school.

Among the first of the summer weddings was that of Miss Lucille Bomgardner and Mr. Ellet Robison which took place in Topeka on the night of May 31. Mr. and Mrs. Robison are making their home on the Robinson ranch near Towanda.

Miss Mildred Berry of Jewell City, and Mr. Charles Swingle of this city, both Aggie graduates, were married June 3 and are now at home in Fresno, Cal., where Mr. Swingle is in business.

Miss Margaret Armantrout of Guthrie, Okla., and Mr. Paul Martin of Hiawatha, were married May 28 at the home of the bride's parents, in Guthrie. They will make their home in Junction City this winter.

On May 28 Miss Helen Mitchell and Mr. Ivan White were married. Mrs. White graduated in 1918 and Mr. White was a '20 man.

Commencement day was the wedding day of Miss Ethel Ramey and Dr. S. R. Johnson of Hooper, Nebr. Hooper will be the residence of Doctor and Mrs. Johnson, Doctor Johnson being a director of the Simonson Serum laboratories located there.

Miss Mary Buchanan and Winfield F. Runan, '20, were married in Topeka, May 14. They will make their home in Dodge City where Mr. Runan has a position in the high school.

Miss Retta Kincaid of Hiawatha and Mr. W. K. Hervey of Lindsay were married in June. Mr. Hervey is a '16 graduate from the electrical engineering department. Their new home is in Lindsay.

On Sunday morning, June 11, Miss Thurza Pitman and Arleigh Goodrich of Sargent, Nebr., were married. Mrs. Goodrich, whose home is Baton Rouge, La., is a graduate of K. S. A. C.

Miss Oma Bardwell of Excelsior Springs, Mo., and Mr. Percy M. Best of Liberty, Mo., were married June

16. They will make their home in Denver, Colo., where Mr. Best is connected with the Gates Tire company.

Miss Helen Crane and Mr. Arthur Caswell were married at the home of the bride on June 17. Mrs. Caswell graduated with the Aggie class of '18 and Mr. Caswell is a K. U. man. They will make their home at 4932 Tracy avenue, Kansas City, Mo.

Miss Lola M. Gaunt of this city and Frank M. Crawford of South Dakota were married on June 20 at the bride's home. Miss Gaunt was formerly a stenographer in the electrical and physics departments of the college.

Miss Margaret Schelder of Logan and Mr. Harley Prudeaux of Iron Mountain, Mich., were married on June 21 in Junction City. Mrs. Prudeaux graduated in 1916 and Mr. Prudeaux will complete his work in the Stout Institute, Menomonie, Wis., this year.

Miss Lucile Carey of this city and Mr. Albert Boerckel of Peoria, Ill., were married on June 23. Mrs. Boerckel is a '19 graduate. They will make their home in Peoria, Ill., where Mr. Boerckel is engaged in business.

On June 30 the wedding of Miss Ruth Orr and Dr. Clyde Faubion took place. Mrs. Faubion is a '19 graduate of K. S. A. C. Doctor Faubion is a graduate of Western Dental college of Kansas City. They will live in Manhattan.

Miss Eunice Nicolay and Mr. Gabe Sellers were married on June 27 at the home of the bride. Mrs. Sellers attended K. S. A. C. for several years and Mr. Sellers graduated with the class of '17 and is now assistant professor of metallurgy and shop practice at the college. They are at home at 927 Moro street.

Miss Alice Duvall of Hutchinson and Mr. Francis N. Brooks of Peru were married July 2. They will make their home in Manhattan where Mr. Brooks will continue his work at K. S. A. C.

Miss Trixie Knight of Jamestown, and Mr. Porter Whitehead were married on August 29 at the home of the bride. Mrs. Whitehead attended college here and Mr. Whitehead is a '17 graduate.

Miss Dora Cate and Warren E. Crabtree were married on June 4 at the home of the bride, 203 N. 14th street. They will make their home in Twin Falls, Idaho, where Mr. Crabtree will teach vocational agriculture in the high school.

The marriage of Miss Selma Foberg and Mr. Vernon Wessen took place on June 7. They will make their home in Chicago. Mrs. Wessen was formerly assistant to Dean Umberger.

Among the more recent weddings

was that of Miss Mary Gorham of Garden City and Mr. Marcus V. McBeth of Cleveland which took place on the first day of September. Mr. and Mrs. McBeth will make their home in Garden City after September 15.

September first was also the wedding day of Ida May Dahnke and Mr. Vernon Denman, the ceremony taking place in Abilene, the home of the bride. Mrs. Denman graduated with the '20 class. They will make their home in Des Moines, Iowa.

On the second day of August Miss Doris Bachelor of Belleville and Sheridan Spangler of Abilene were married. Both have been students at K. S. A. C.

Interesting among the early September weddings was that of Miss Avis Blain and Mr. Arleigh Willis which took place at the Blain home on the second day of September. Mrs. Blain graduated from K. S. A. C. with the 1919 class and last year was an assistant instructor in the department of physical education.

Mr. Willis is attending a chiropractic school at Davenport, Iowa, and upon the completion of his work will return to Manhattan to practice.

Miss Helen Dawley of Manhattan and Mr. Leland G. Alford of Chicago were married on September 2, the wedding taking place at the bride's home. Both Mr. and Mrs. Alford are graduates of this school. Mrs. Alford graduating with the class of '20 and Mr. Alford with the class of 1916. They will be at home at 2106 Montrose avenue, Chicago.

Announcement was also made during the summer of the wedding of Miss Augusta Hartloff of Pomona, Calif., and Mr. Wayland Dunham of Topeka. Both have attended college here and are well known in Manhattan. They will be at home at the Nokomis apartments, Topeka.

Announcement of the marriage of Miss Genevieve Herrick of Topeka and Mr. Harry A. Smith is made. Mrs. Smith is well known in college circles, having visited her sister

Miss Sarella Herrick, a number of times.

Miss Esther Hostetler and Mr. Hubert Ghormley were married during the summer and are now at home at 514 E. Dakota avenue, Denver, Colo. Mrs. Ghormley graduated in 1917.

Miss Ruth Werning of this city and Mr. Bion McCormick of Zeandale were married during the summer. Mr. McCormick attended K. S. A. C. several years ago. They will make their home on the Strasser farm near Zeandale.

First Sergeant Frank Cumiskey of New York, who is a member of the instructional staff of the military department, and Miss Etta Tauer of Manhattan, were married Saturday, September 11 at St. Joseph, Mo. They

will make their home here in Manhattan.

Dr. W. M. Jardine, president of the college, gave an address to the members of the Copper Pig clubs at their annual banquet held in Topeka Wednesday evening.

Miss Lois Hanna of Clay Center, who attended school here during the year 1919-20, will attend the University of Kansas this winter.

Dean F. D. Farrell, head of the agricultural division of the college, and H. B. Walker, associate professor of irrigation and drainage, are at Dodge City this week, where they are speaking on the program of the annual International Drainage and Irrigation congress being held there. They are expected to return this afternoon or tonight.

COLLEGE SHOWS LARGE EXHIBIT

MANY DEPARTMENTS SEND DISPLAY TO TOPEKA FAIR

E. G. Kelly Has Charge of Entire Aggie Exhibit—Display to be Sent to Hutchinson and Wichita Fairs

K. S. A. C. is well represented at the Topeka Free Fair which is being held at Topeka this week, for under direction of E. G. Kelly of the extension department of the college one of the finest exhibits in the history of the state is being shown.

Everything of interest to farmers, from the latest farm machinery and general farm equipment to exhibits of grain and dairy products are on display. A wool display under the direction of G. L. Elling is being exhibited, and under the direction of Bruce Wilson, whose work has won 18 cups for the college, is shown one of the finest of grain displays.

W. C. Ward who is a new worker in the college extension department is at the state fair representing the work being done by the extension division of K. S. A. C. in the interest of better farm buildings and drainage systems.

Kanred, which has been made famous by the college, is on special display at the fair under the charge of Ralph Kenney, grain specialist, who explains the treatment of all kinds of wheat against destructive fungus.

P. L. Depuy has charge of an unusual and interesting display of rodents and will explain the processes of their extermination. Interesting in this display is the representation of the cross-section of an alfalfa field, moulded in plaster of paris, showing the runs of gophers, their nests, and the best way of putting out poison for them.

T. W. Case, veterinarian in the extension division will give data and information relating to animal diseases in a conference to be held with the farmers.

The horticultural department sent a display under the charge of L. C. Williams, including a Bordeaux insecticide spraying apparatus. Proper spraying of infected bushes and trees is included in the explanation of this display.

N. L. Harris of the poultry department is in charge of the poultry exhibit sent from the college.

Miss Rena Faubion of the extension division accompanied the dairy exhibit under the charge of C. R. Gearhart. Miss Faubion will explain a number of charts and displays on the food value of milk, its care and model equipment for handling on the farm. Mr. Gearhart is carrying on several tests of dairy cows.

R. W. Kizer of the animal husbandry department is in charge of a hog feeding demonstration. Charts and drawings showing the results of several feeding experiments make up a portion of this display.

A great sum of money has been spent in the preparation of this year's exhibit and it is believed that it will surpass any of previous years.

Home correspondence as offered by K. S. A. C. is being boosted at the state fair by V. L. Strickland who has charge of the Home Study booth there. There is also a model of the state office of the county farm agents and a chart showing how information is gathered by the county agents' organization, and distributed to the farmers. Carl Knasus and A. F. Turner have charge of this display.

E. G. Kelly has charge of the entire Aggie exhibit and will accompany it on its travels to the other two big state fairs, at Hutchinson and Wichita, respectively, the later dates being from September 18 to 25 and from October 4 to 16.

JAMES ROGERS NEW MEMBER OF ZOOLOGY FACULTY
Was Assistant Instructor Here in '17

James Rogers, who recently received the degree of Master of Arts at the University of Kansas, will be

an instructor in the zoological department next fall.

Mr. Rogers was an assistant instructor in the college the second semester of 1917. The following summer he went to California and took graduate work in the university of that state.

He stayed there until December of the same year then enlisted in the medical corps in the army. He was in the army two years. Upon his discharge he was elected as instructor in the biological department of Tufts medical college in Boston. He expects to arrive in Manhattan about September 1.

EXHIBIT PLACES IN BIG CONTEST

JOURNALISM DISPLAY PLACES TWICE IN PUBLICITY CONTEST

Awarded First Place for Best Agricultural Feature Story—Won Third Place for Best Exhibit on Display

The journalism department of the Kansas State Agricultural college won third place on actual display and first place for the best agricultural feature story, in a publicity contest held at Amherst, Mass., at the American Association of Agricultural College Editors, held this summer between June 30 and July 2.

The contest was divided into three classes. K. S. A. C. placed third in class one in which the places were awarded for the best actual exhibit on display. Cornell won first place and New Jersey second. In class two the places were awarded for the best exhibit and excellence of material for extension of agricultural information through print. In this class Ohio placed first and Kansas failed to place.

Class three the places were awarded for the story that conveyed agricultural information the most effectively. In this class Kansas placed first and Ohio second.

Over 20 of the largest agricultural colleges in the United States were represented in the contest. K. S. A. C. therefore feels that she is justified in feeling proud of the part she played in the contest, as there was only one out of the three classes in which she failed to place.

The K. S. A. C. exhibit which was prepared by E. T. Keith, associate professor of industrial journalism and printing, consisted of half a dozen large folders six feet by three which demonstrated the work done by the journalism department and by the students. The folders were so made that they could be hung up in the convention hall.

Miss Laura Eggleston of Wichita, who attended school here last semester spent the week visiting at the Alpha Delta Pi house.

NEW ASSISTANT STATE LEADER

MISS HINN FILLS VACANCY LEFT BY MISS MILAM

Miss Milam Assistant State Leader of Girls' and Boys' Clubs Since 1917—Now Attending School in New York City

The place of assistant state leader of girls' and boys' clubs, which was vacated early in June by Miss Little Milam has been filled by Miss Alene Hinn, a graduate of the University of Wisconsin.

Miss Milam spent the summer at the University of Chicago where she attended summer school. She is now taking work at Teacher's college in New York City.

Miss Milam came to K. S. A. C. in 1917 and much of the credit for the building up of the department to its present high standard is due to her untiring efforts.

She was one of the first to develop plans for contests in bread making. Her success in this line of work was so marked that she was appointed in 1918, and reappointed in 1919, to the position of chairman of a committee of five from the 33 northern and western states to work up plans and rules for bread club work.

The sewing club bulletin which she prepared has attracted attention and favorable comment from many other states as well as Kansas.

The new assistant leader, Miss Hinn, who assumed her duties early in the summer, came here from Missouri where she had spent some time as a home demonstration agent.

POULTRY HUSBANDMAN MAKES UNUSUAL EXPERIMENT ON HEN

Hen Grows Both Male and Female Feathers

Prof. W. A. Lippincott, poultry husbandman at the Kansas State Agricultural college, has succeeded in making a Plymouth Rock hen grow both male and female feathers.

He removed the left ovary from a hen and while she was molting, plucked all the feathers from the left side. When the hen grew new feathers, those on the left side were pointed and dark as in the male birds. She also grew hackle and sickle feathers on this side.

The bird presented a peculiar appearance; from the one side she looked like a cockerel and from the other like a hen. Professor Lippincott has been able to prove from the above experiment that it is the presence of the ovary in hens which causes the growth of rounded feathers.

Miss Gertrude Linn of the extension department has resigned and will attend the New York Teacher's college this year.

Straws to Be Used by Aggie Co-eds on Fool Proof Fountain

"Where is my powder puff?" frantically gasps Mademoiselle Coed at K. S. A. C., when, endeavoring to appease her breakfastless stomach, she stops on her way from the post office and sips at the fool proof fountain.

Girls with red hair, and girls with black hair, small girls, tall girls, freshmen, and school teachers, are joined by a common woe, when in the mad rush of classes and quizzes, they have left home in the morning without their "shine jinx."

Red noses predominate. Mirrors are no longer borrowed. Looking into each other's faces they see their own reflections.

"How can we go to the canteen," they cry. "I'm almost broke! I need a shampoo! My nails haven't been manicured for a month!" — so they wait, for they must have water.

They think earnestly, they plot desperately, for they must drink from the fool proof fountain. They put their heads together, red, black,

brown, and golden. Ha! they have it.

"A straw," they whisper. "A straw," they shout. Aggie women triumphant have solved the problem of fool proof ountain, the Sphinx of Anderson Hall. Again they can drink, without having their faces washed against their wills.

Sergeant Frank L. Weinberg of Fort Morgan, Ala., reported here Monday to act as instructor in the coast artillery unit.

DEPARTMENT IS OF HIGH RANK

NEW COAST ARTILLERY UNIT ORGANIZED

Twenty Acre Rifle Range To Be Completed by October 1—Seven New Instructors in Department

With the addition of five new instructors, a new coast artillery unit, a large amount of new equipment and a 20-acre rifle range, the military department of the college will rank with the best in equipment and training efficiency this year.

The growth of the department has made it necessary to appoint seven new instructors in addition to the former instructional staff. The appointments made are as follows: Major C. A. Chapman, coast artillery corps; Captain James A. Van Fleet, infantry; First Sergeant John M. Garry, infantry; First Sergeant William McClintock, coast artillery; Sergeant Garry, infantry; First Sergeant Marion Coffee, coast artillery corps; Sergeant Frank L. Weinberg, coast artillery corps.

The application made to the war department for the formation of a coast artillery unit at this school has been granted and the new unit will be organized immediately. It is intended that all sophomores in the division of engineering will be required to take this branch of the military training in place of the infantry training. It will be elective to all other students, subject to the approval of the dean of the division in which their major studies occur.

The chief instruction in the course will be along the line of handling heavy mobile artillery. The work will be supplemented by summer training at some coast artillery fort. During the past summer the members of the artillery unit were sent to Fort Monroe, Va.

Requisition has already been made for the equipment which is provided by the war department for the R. O. T. C. coast artillery unit. The equipment will include two heavy guns, one an eight inch howitzer, and the other a French 155 millimeter gun, a tremendous amount of range finding and other apparatus, and three motor trucks.

The department has received orders to vacate the old rifle range because of the danger to the livestock of the animal husbandry department of the college. A plot east of the college poultry farm has been leased. Here a rifle range of 300 yards, having six targets, will be constructed at an estimated cost of \$1,200. Space will also be reserved to provide for a pistol range and a 1,000 inch machine gun range. Work has already been started on the field and it is thought that by the first of October the range will be completed.

With the many changes which have been brought about in the military department during the last year, it is planned that a more standard course may be worked out, with the aim in view of making the work more constructive and more interesting.

Major F. B. Terrill, head of the military department, said today that the department can now easily accommodate the 800 students who are expected to enroll in the work.

Mrs. Harriet Allard left Tuesday for Great Bend to act as judge at the Barton county fair.

COLLEGE IS INSTALLING COAL CONVEYING SYSTEM

System Will Cost Approximately \$20,000

A complete new system for conveying coal to the college boilers from the coal pit outside, is being installed, installation to be completed by November 1, according to Jacob Lund, superintendent of heat and power at the college.

The new system will cost approximately \$20,000 when it is complete according to the present estimates.

The new system will replace the old system of handling the coal on small cars, pushed along temporary tracks built from the coal pit to the boiler room. It will eliminate all moving of the coal by hand, and in its labor saving feature, is expected to result in a saving of money also.

The difficulty of getting cement and structural steel had held up the construction of the coal machinery for months. The difficulty of buying and transporting the materials made it impossible to get the installation in working order by the opening of the school year.

SEVERAL CHANGES ARE MADE IN FRATERNITY LOCATIONS

Three Fraternities Purchase New Homes

Several changes have been made in the location of the fraternities this year. Three more fraternities, Alpha Tau Omega, Kappa Sigma, and Sigma Phi Epsilon have purchased houses and will occupy them this fall. The Phi Delta Tau fraternity house at 1447 Anderson has been remodeled this summer and gives the appearance of an entirely new dwelling.

Fraternities in new locations are Alpha Tau Omega, moved from 1408 Laramie to 1642 Fairchild; Sigma Phi Epsilon, moved from 1126 Bluemont to 221 North Delaware; Kappa Sigma, moved from 1115 Bluemont to 519 North 11th. The Alpha Delta Pi, women's fraternity which was located last year at 519 North 11th will be located in the old Acadia house in the 800 block on Osage street this year.

A number of local fraternities organized last spring will have houses this year, but their locations have not yet been announced.

Nevels Pearson of the extension department of the college left Monday for Topeka where he has been in charge of the contest for the boys' pig clubs and the county teams in the stock judging contest which met in the second annual contest at the Topeka Free Fair.

CATHOLIC BOYS TO HAVE HOME

HOUSE TO BE IN NATURE OF FRATERNITY

Several Other Catholic Student Homes Will Probably Be Erected in State—Will Be Completed this Year

Plans for the construction of a permanent home for the Catholic men students of K.S.A.C. were made at a meeting of the Knights of Columbus district deputies held in Manhattan this summer. A building committee of fifteen was appointed to secure a location and make preparations for the building of the home. It is hoped that the building will be completed within a year.

The house when completed will be in the nature of a fraternity house, and will be for the accommodation of Catholic students coming to Manhattan from other parts of the state. The Knights of Columbus are entering the field of student welfare at all of the colleges and schools of the state, and will probably erect several student homes.

The site for the building here has not yet been selected.

CORRESPONDENCE COURSES POPULAR THIS LAST YEAR

More Than 28,000 Persons Take the Work

More than 28,000 persons received instruction through correspondence from the Kansas State Agricultural college last year, according to the report for the fiscal year from the home study department just made public. Five thousand boys and girls in club work received lessons by mail from the department. Nearly two times as many papers were read in the department during the last year as in the year previous.

Enrollment in credit and vocational courses for the two years, shows an increase of 118 per cent over the preceding biennium. A special course for stationary engineers was taken by more than 700 practicing engineers in Kansas.

BUSINESS PICKED UP AT COLLEGE CAFETERIA MONDAY

Is Now Managed by Mrs. Elizabeth Baldwin

The college cafeteria, under the management of Mrs. Elizabeth Hargrave Baldwin, is again ministering to the wants of the hungry ones on the hill.

Mrs. Baldwin is a graduate from the department of home economics at K. S. A. C., class of '16, and has had a wide experience in lunchroom management, having served in that capacity at the University of Indiana, and also having charge of the Y. M. C. A. cafeteria at Estes Park, Colo., during the last three summers.

On registration day, breakfast was served to 255, lunch to 493, and supper to 215. The prediction is made that this number will be increased two and perhaps three fold before the school year is fairly under way.

During the first day, according to Miss Evalene Kramer, assistant manager, the patrons of the cafeteria displayed the most amazing appetites, and the checks mounted accordingly, but it is estimated that the average amount of the check for the year is slightly above 30 cents.

Last year the cafeteria offered part or full time employment to twenty-five students, and approximately the same number will be required this year.

Miss Mary Ward, who was in charge of the cafeteria last year, is managing a tea room for Levy Brothers of Houston, Tex.

M. A. Graham, who was a student here last semester is now in Wichita where he is in the life insurance business.

H. Phipps to California
H. Phipps, who graduated from the K. S. A. C. course in veterinary science in 1920 has accepted a position with the division of veterinary

science at the University Farm at Davis, Calif.

Miss Evalene Kramer is the new assistant director of the college cafeteria.

RAY WATSON UNFORTUNATE AT OLYMPIAD

COACH BACHMAN TELLS OF
RAY'S EXPERIENCES

MAY NOT RETURN FOR A MONTH

Was Crowding Leaders in Finals of
Steeple Chase When He Tripped
and Fell into Water
Hazard

Ray Watson, Aggie athlete who competed in the 1920 Olympiad at Antwerp has not yet returned to the United States and probably will not before the end of the month as he

RAY WATSON

was not listed in the passengers arriving on the Sherman, the ship which brought back the bulk of the American entries in the games.

Hard Luck in Every Meet
Coach Bachman, new Aggie mentor who was at the Olympiad and was also with Ray in the tryouts in Chicago, New York and Boston, was seen this morning. He gave the only first-hand account of Ray's experiences that has found its way to Manhattan. It seems from his account that Ray ran in hard luck in every meet he entered after the tryouts in Chicago.

Ray was scheduled for the 5,000 meter and 1,500 meter runs in the final Olympic tryouts at Harvard last July. However, after he arrived in the east, he decided to enter the tryouts for the 3,000 meter steeple chase which were held in New York a few days before the meet at Harvard. He placed fourth in these tryouts thus securing the right to run in the steeple chase at the Olympiad.

Wear Blisters on Feet
From New York he went immediately to the meets at Harvard. In the 5,000 meter run at the latter place he wore the same shoes that he had worn at New York. These shoes had warped from the effects of the water he ran through in the steeple chase and some of the spikes were protruding through the bottoms of them. The result was that Ray

had blisters on both feet that burst before the finish of the race. In spite of the intense pain he must have suffered Ray finished the race in seventh place. However, he was unable to run in the 1,500 meter race which was his "best yet."

Falls Into Water Hazard
At Antwerp Ray was eligible for only the 3,000 meter steeple chase on account of his showing at Harvard as detailed above. He placed sufficiently high in the trial heats to run in the finals of the steeple chase and was crowding the leaders when he tripped and fell head-first into one of the water hazards. The day was cold and the drenching Ray received was fatal to his chance of winning.

Coach Bachman stated that it was his opinion that Ray would have placed 1-2-3 in either the 5,000 meter run or the 1,500 meter had he been eligible to compete. However, he displayed remarkable spirit in every race he ran, never once quitting until he crossed the line, and Aggie students may well be proud of their entry in the Olympiad.

MAY INSTALL A CAVALRY UNIT HERE

APPROPRIATION NECESSARY
FOR BUILDING STABLES

Federal Government Will Furnish
Horses and Send Soldiers to
Care for Them—Fifty
Horses Needed

Whether or not K. S. A. C. will have a cavalry unit incorporated in the R. O. T. C. work will depend on the action of the state legislature this winter in making an appropriation for building stables for about fifty horses. In order to have a cavalry unit here it will be necessary to have proper facilities for stabling the mounts provided for. In the event that the unit is established here soldiers will be sent to care for the horses.

The college would have to furnish nothing but the stables if the unit is established here. The Federal government will furnish the horses, pay for their upkeep, and will station soldiers here to care for the horses. Fifty horses will be needed for the unit if it is installed.

Because of the facilities which would be afforded for training the students in the division in veterinary science, in looking after the horses under army conditions, the veterinary division is assisting the military department in getting the unit for K. S. A. C.

CLIFF STRATTON OUTLINES PLAN

NEW ALUMNI SECRETARY PRE-
DICTS STRONG ASSOCIATION

Alumni Strong for "Mike" Ahearn—
Will Help Bring Students
Here

"Best thing that has happened to Aggie athletics in years," is the way the alumni generally look upon the return of "Mike" Ahearn, according to Cliff Stratton, '11, the new secretary of the Alumni association. "Understand, I'm not knocking on Ahearn's work as a landscape gardener in the least," says Mr. Stratton. "I imagine he probably is a good one. He told me he was, once on a time. But among us fellows who used to know his work as a coach, it always has seemed he was wasting a lot of time trying to help Jupiter Pluvius make things grow."

"Seriously, if he doesn't put just a little more punch into Aggie teams than these have shown in recent years, a lot of us old fellows are going to believe the world has changed considerably. We saw him work in the days when the college didn't get the material it is getting now, and he did some wonderful things. We believe he can do it again."

Among themselves, some of the alumni are rather patting themselves on the back for getting "Mike" back when it was learned that Z. G. Clevenger had quit suddenly. Probably half a score or alumni in different parts of the state started for the same objective as soon as the news was received. It just happened that President Jardine had the same idea and was trying to get hold of Ahearn when the wires from the alumni started coming in, but that only shows that Prexy's mind "runs willingly with ours," the alumni claim.

At any rate, the alumni evidently intend to have a finger in the pie pretty nearly every meal from now on. The alumni organization is be-

ing reorganized. Cliff Stratton, who had a reputation in college 10 years ago of devoting a fair amount of his time to student activities and his spare time to the regular curriculum, has been engaged as full time secretary, and has offices in Room 32 in Anderson hall. Stratton was once editor of the Students' Herald, the forerunner of the Collegian, also business manager for two years. Since graduation he has been with the Daily Capital, at Topeka, handling the state house run and state politics since the spring of 1913. He served 10 months in the A. E. F. during the war, and a "life time" at Camp Cody, N. M.

"The agricultural college should have the most powerful alumni organization in the state," Stratton explained yesterday. "The alumni and former students are intensely loyal to the college, but for some reason we have just allowed ourselves generally to drift away from the institution and its problems. Several of us have an idea that the real reason for this is that the college hasn't asked the alumni to do any real work for the school after a graduate, and that was about all."

"That excuse, at least, is about due for the curtain. The alumni association is going to give the alumni plenty of work to do for the next few years. We are going to ask the alumni in every county, and in every larger city, to organize. We are going to ask the members of each local organization to see that every member alumnus in that community is being pushed forward to success just as fast as he is able and willing to go."

"Also the alumni are going to skim the cream in every community for the most desirable new students and send them to Manhattan. Apathy on the part of the alumni in several communities has allowed men to go to other schools who should have come here. This doesn't apply entirely to athletes, either. We expect to give the alumni exact information from time to time as to what the college is doing, and ask them to see that the folks at home get this information, and get it straight. The college depends on the good will of the people of Kansas for its support."

The college has done an enormous amount of work to deserve this good will in the past two decades, but the people don't all know about it. We hope to strengthen the alumni association so it will be the biggest and best rooters' club the college ever saw."

CHAPEL PLANS ARE UNDER WAY

FIRST FOUR ASSEMBLIES TO BE
ON TUESDAYS

Second Four Chapel Periods Will Be
on Wednesday—Are Willing to
Change Dates to Fit Speak-
ers' Plans

Plans for the assembly periods this year are well under way, the general outline for the year being completed. The first four assembly periods will be held on Tuesday at the regular time, third hour. The second four assemblies will be held on Wednesday, the third hour on Thursday and the fourth four on Friday.

"We do not intend to adhere too slavishly to this plan, however," said Dr. J. E. Kammeyer, chairman of the committee in charge of chapel plans. "If a speaker of outstanding excellence can come here only on a certain date we will change the chapel date to fit in with the speaker's plans."

On assembly days the periods will be shortened to 45 minutes so that

no classes will be sacrificed.

The music department will have complete charge of an assembly program every two months, and it is hoped that some student organization or group of organizations will take charge of one assembly each month. Student organizations wishing a chapel period should make arrangements with Doctor Kammeyer at once as the plans are worked out many months ahead.

The Bon Ton
Ralston

Did you ever see
a finer-looking shoe?

LAST MAKING is an art. Last makers are really born, just as sculptors are born. They model the human foot in wood.

The head of the production department of the Ralston Health Shoemakers is a skilled last maker. That is the reason Ralston Shoes are famous for their perfect fit. It is also the reason why the graceful lines of the Ralston styles are distinctive. It is one of the reasons why Ralstons are always comfortable and wonderfully serviceable. The "Bon Ton" model, shown here, is a noteworthy example.

Come in and see how attractive this shoe looks on your foot. The honest-value price will interest you.

FRATERNITIES PLEDGE OVER ONE HUNDRED

ALL SATURDAY GREEKS ARE
BUSY PLEDGING

SEVENTY TWO MEN WEAR COLORS

Fifty-seven Coeds Pledge Greek Organizations — Women Deliver "Bids" at 1 O'clock Saturday Morning

One hundred and twenty-nine small shaped pins and buttons are now being proudly worn on georgette blouse and coat lapel for 57 coeds and 72 men are now serving their days as pledges in the Greek world. At 1 o'clock Saturday morning a group of girls composed of one girl from each sorority went in a body to deliver the "bids" at the door of the fortunate rushee's rooming house. Before 8 o'clock that same morning the colored ribbons were on the new pledges and the time had been set for the pledge services. Four o'clock Saturday afternoon the frats began pledging and by evening the majority of the frats had fastened their Greek emblem on the coat lapel of six or seven new men.

This morning still finds a few undecided rushees some of whom are waiting to hear from dad or mother before accepting the colors and others who are "on the fence" seemingly unable to decide the pledging question.

The following are the names of the men and women who have been pledged up to date by the various social fraternities of the school:

Pi Beta Phi—Jean Moore, Nowata, Okla.; Julia Caton, Winfield; Dorothy Churchward, Wichita; Genevieve Mott, Herrington; Edith Fairchild, Denver, Col.; Geraldine Hull, Manhattan; Gladys Stoker, Concordia; Alverita Heaton, Concordia; Lillie Harkey, Fort Scott; Gene Hanna, Clay Center; Beulah Helstrom, McCrison.

Alpha Delta Pi—Helen Smith, Salina; Majorie Uhley, Fairbury, Neb.; Mildred Wright, Washington; Susan Carmody, Manhattan; Louise Mowry, Manhattan; Garnet Westbrook, Manhattan; Gladys Newton, Independence, Mo.; Bernice Meyers, Manhattan.

Delta Delta Delta—Louise Mangelsdorf, Atchison; Alma Hollowell, Washington; Frances Godden, Caney; Ann Ratliff, Manhattan; Pauline Knower, Enid, Okla.; Mildred Swenson, Clay Center; Grace Baker, Arkansas City; Virginia Groux, Wichita; Marie Freeman, Wichita.

Delta Zeta—Elizabeth Hinchet, Salina; Corinne Locke, Erie; Elsa Lear, Stafford; Mary Ellen Henderson, Atwood; Ruth Cleary, Stafford.

Iota Psi—Bessie May Coulter, Wichita; Margaret Schrader, Cedar Vale; Amy Lemert, Cedar Vale; Elsie Johnson, Colorado Springs, Col.; Gladys Gritz, Green Falls.

Chi Omega—Elizabeth Munson, Atchison; Doris Riddell, Salina; Laura Fayman, Kansas City, Mo.; Margaret Currie, Sterling; Margaret Falconer, Kansas City; Geneva Hollis, Fredonia; Rowena Thornburg, Formosa.

Kappa Kappa Gamma—Melba Stratton, Winfield; Polly Hedges, Hutchinson; Katherine Quirk, Newton; Jessie Lehman, Newton; Dorothy Dugan, Manhattan; Elizabeth Hepler, Manhattan; Faye Strong, Manhattan; Maude Irene Whitehead, Abilene; Margaret White, Parsons; Ruth Martin, Junction City.

Sigma Phi Epsilon—Raymond Binford, El Dorado; Allen Dailey, Poseyville, Indiana; Thomas Sears, Eureka; J. A. Herrin, Dodge City; Howard Webber, Dodge City; Anthony Athkins, El Dorado.

Sigma Nu—Clifford Currie, Manhattan; Clifford Jolly, Manhattan; Clayton Sauer, St. Joe, Mo.; Wayne Teeters, Abilene; Everett Stephens, Abilene; Atwell Barkley, St. Joe, Mo.; Jimmie Lansing, Chase; Dewey Imes, Manhattan; Dighton Whitehead, Abilene; Jim Parker, Paola.

Phi Gamma—James Leonard, Newton; Ray H. Morgan, Claffin; Vincent W. Nass, Atchison; Edward Watson, Osgood City; Joseph Quinn, Salina.

Beta Theta Pi—Frank Barnhisel, Wichita; John Ballard, Manitou, Colo.; Eugene Floyd, Salina; Victor Kirk, Iola; Sam Gatz, McPherson; Lyndon Rader, Caney; Gail Cox, Sedgwick; Earl Shannon, Hutchinson; Scott Pfeutze, Manhattan.

Sigma Alpha Epsilon—Addison Forrester, Manhattan; Ralph Ball, Manhattan; Caldwell Hessin, Manhattan; Myron Cassidy, Manhattan; Allen Hartman, Frankfort; George Harkins, Ottawa; Schyler Kollar, Woodward, Okla.; Barton Heath, Fairbury, Neb.; Wilmer Bennett, Concordia; Linus Muse, Concordia.

Alpha Theta Chi—Paul E. Smith, Herrington, Earnest Guyer, Protection; Raub R. Snyder, Protection.

Pi Kappa Alpha—J. W. Jenkins, Perry; Leo Cavanaugh, Perry; Emmett Graham, Manhattan; Wallace Goodell, Independence; N. V. Platner, Ellis; Ralph Adams, Newton.

Delta Tau Delta—Maurelle Dobson, Winfield; Lawrence Copening, Iola; Silver Fuller, Winfield; Charles Lawrence, Emporia; Guy Fink, Downs; Lewis Williams, Emporia; Hugh Bryan, Osgood City.

Sigma Phi Delta—George Allen, Topeka; Joe Faulconer, El Dorado; Burr Swartz, Hiawatha; Mott Carrolls, Wichita.

Kappa Sigma—Rex Guiprie, Simpson; Floyd Melrs, Sabetha; Lyle Glidden, Kansas City; Ralph McClellan, Iola; Dudley Bentley, Sterling; Clifford Hollis, Fredonia; Ralph White, Lockney, Tex.

Kappa Phi Alpha—Elmer Deshaizer, Kansas City, Mo.; Jack W. Dunlap, Scott City; Glen Rucker, Burdett; Fred Valdez, Santiago, Chile. Manuel Valdez, Santiago, Chile.

Alpha Psi—George E. Martin, Perry, Mo.; Lester R. Smith, Dunbar, Nebr.

Omega Tau Epsilon—Ellis Taylor, Louis Vinke, Irwin Hathway.

BOXING TO BE TAUGHT AGAIN

IS RECOGNIZED ATHLETIC SPORT
AT K. S. A. C.

Instructors Supplied from Military Department—Boxing Tournament to Be Held in May

Boxing is a recognized athletic sport at K. S. A. C., and may be substituted for physical education this year.

Instruction in the manly art will be given this semester on Wednesdays and Fridays, and each man enrolled in the classes will be required to devote two hours each week to instruction and training in this sport. The instructors will be supplied from the military training department. Capt. L. C. Davidson of that department will have charge of the classes.

The attention of the freshmen is especially invited in order that the prospective Jack Dempseys among the first-year men may develop fully their latent fistic prowess. Although no public bouts in the roped arena will be scheduled, a boxing tournament will be held some time next May, and awards made to the winner of the championship in each weight class as follows: To the winner of a championship, the college monogram; to the runner-up, class numerals twice, a monogram; and the letter "K" to any man who wins two monograms, one to be won by championship of his class.

The instructors in this branch of college athletics believe that more interest in boxing was developed at K. S. A. C. last year than at any other institution, and are confident of doing still better this year.

TO HAVE 35TH DIVISION REUNION

TEN THOUSAND DOLLARS RAISED
FOR EVENT

Men of National Prominence Will Be Present—Aggie Members of Division Planning to Go

The 35th division will hold its first reunion at Topeka next week, the 26 to 28. The citizens of Topeka have raised a \$10,000 fund for the event and it is to be expected that the veterans will be shown a regular time while they are refighting the old battles from the campaign at Doniphan on thru the woods of the Argonne to the rats of the Somme. Present plans indicate that everything possible will be done to make this first reunion a success. General Wright, former division commander, has promised that nothing shall keep him away and other men of national prominence will be present.

The system of registration will be by company on up to brigade and division headquarters and it will be possible for Buck Jones of the infantry to find Buck Smith of the artillery without unnecessary expenditure of effort. The reunion will be noted for its entire absence of detail, K. P. guard mount, and other natural hazards formerly encountered by the ex-drill dodger.

Aggie members of the division are pausing in their striving for the higher learning long enough to overhaul their old A. E. F. French and they expect to be there with the well known tinkling instruments.

CLEV. LEAVES GOOD RECORD WITH AGGIES

HAS COACHED FOUR VALLEY
CHAMPION TEAMS

LEAVES TREASURY WELL FILLED

Can Inspire Loyalty Into Entire Student Body—1920 Royal Purple Dedicated to Clevenger—Aggies Say Goodbye With Regret

The King is dead! Long live the King.

"Clev" left for Columbia last Thursday and "Mike" now reigns supreme, but while we're chanting the praises of "Mike" Ahearn it might not be amiss to stop for a moment to bid farewell to "Clev" and to consider his achievements in Aggie athletics. After we have considered his record here we shall have a fairly comprehensive review of the reasons that influenced the athletic directors at Mizzou when they offered "Clev" a substantial increase over his salary at Manhattan to come to Columbia.

"Clev" Popular With Students

Clevenger was popular not only with his athletes but with the entire student body. He has held three coaching jobs since he left Indiana U. and in each place a college annual was dedicated to him. The students at Nebraska Wesleyan, Tennessee U. and K.S.A. C. thus attested their regard for "Clev." The 1920 Royal Purple was dedicated to him. He is also held in high regard at his Alma Mater, Indiana U., where he was voted the best all-round athlete Indiana ever produced.

Four Valley championships were written into the Aggie records by Clevenger-coached teams. Two wins in basketball, one in 1917, another in 1919, a track championship in 1919 and a baseball victory in 1920 comprise the list of flag winners "Clev" has turned out, but that does not account for all his achievements in Manhattan. In 1916 his first season here the Aggies tied for Valley football honors, and his teams have always been respected and feared by their opponents.

Inspires Student Loyalty

These fighting Wildcat teams were the reflection of the loyalty Clevenger inspired in the student body. The Gang has always been out on the sidelines pulling for the team during the Clevenger regime. Take last year for example. The football team was crippled in the Funston game the first of the season and never struck its stride or anything approaching a "stride" until the Oklahoma game, but the students were out there just the same. After the disastrous football season the Wildcats came back with a championship contender in basketball, being the only team to chalk in a defeat on the register of Missouri games and last spring upset the dope by taking the Valley pennant in baseball.

Is Good Business Manager

In the business end of the athletic department "Clev" managed as well and as wisely as in the coaching department. When he came to Manhattan he inherited a balance of \$1,500—but it was in red ink. At the time he left, the treasury showed a balance of \$2,000 in black ink. It must be remembered that two of the years "Clev" spent in Manhattan were the extremely lean ones of the war period, when the average college had hard sledding in the financial division of athletic activities.

Manhattan loses and Columbia gains more than a cracking good coach and athletic department executive. The two towns lose and gain, respectively, one of the most popular couples of the younger married set, for Mrs. "Clev" was almost if not entirely as popular as "Clev" himself with the townspeople and students.

It is with real regret that the Aggies say goodbye to "Clev." He goes with the best wishes of the student body and faculty for success in his work at Columbia. The Tiger teams, always most cordial rivals of the Wildcats will become more beloved enemies. Here's hoping that "Mike" will be able to hold the hoodoo that "Clev" seemed to possess for use against the Black and Gold.

Will Visit Each Girl

The church relationship committee of the Y. W. C. A. has placed the names and church preferences of all the college girls in the hands of the pastors of the city. Each girl is to be visited and invited to a class in the

church of her preference. The following are churches offering classes for students: Methodist, Prof. R. R. Price and Rev. M. S. Collins; Congregational, Dr. Helen B. Thompson; United Presbyterian, Mrs. A. M. Reed; Presbyterian, Miss Irene M. Dean; Baptist, Mrs. Lewis Jacobson and Mrs. J. W. Zahnley, and Mrs. A. A. Holtz; Christian, Mrs. C. R. Hepler.

SCHOLARSHIPS TO BE OFFERED

GIVEN TO NEEDY EX-SERVICE
METHODIST CHURCH MEN

Three Aggie Students Received Scholarships Last Year—Application for Aid Must Be in by November 1

Word has recently been received that the Board of Home Missions and Church Extension of the Methodist church has arranged to continue the offer of scholarships to any needy Methodist student who was in service during the world war, including the S. A. T. C.

These scholarships will be awarded before November 1, and are likely to be awarded in the order of presentation, hence it is desirable that applications be made at an early date.

Three Aggie students that received this recognition last year were C. E. Hutto, J. O. Brown, and F. J. Peters.

Any student applying for the emergency scholarship aid for the school year 1920-21 must meet the following general conditions: he must have received honorable discharge from service under the United States government or its allies during the recent world war; he must be a member of the Methodist Episcopal church, or in its constituency; he must show promise of useful service and leadership in the life of the community in which he resides; he must furnish a statement of his financial resources for the year, which will show needs of additional funds; and he must meet specific conditions and requirements as outlined on the application blanks.

No application for aid this coming year can be considered later than November 1, 1920. It is expected that more will be recognized this year.

For further information on this subject, students are advised to see Prof. R. R. Price, who is chairman of the committee that has this matter in charge for the local church and college.

DURING VACATION PROFESSOR MANAGES 6-DAY CHAUTAUQUA

J. E. Kammeyer Travels With Chautauqua in Six States

Prof. J. E. Kammeyer, head of the economics department spent the summer months managing a six-day chautauqua. When the day school closed last spring Professor Kammeyer started for New Ulm, Minn., where the chautauqua gave its first program. From New Ulm the chautauqua worked its way through South Dakota, Iowa, northern Illinois, Missouri, and Kansas.

Professor Kammeyer lectured whenever a speaker was unable to keep his appointment. On several occasions Professor Kammeyer gave an address at the union meeting of the churches in the towns where the chautauqua stopped. The last program of the chautauqua was given at Bowling Green, Mo., September 16.

Three Feet of Good Books

Have you failed to notice those three feet of interesting books which stare at you from the loan desk in the stack room? The books, some two dozen in number, comprise books of special interest on subjects of natural history, economics, travel, and biography as well as poetry and fiction. The list is not supposed to include the new books which are kept on the shelf to the left as one enters the stack room.

To Hold First Meeting

The Athletic Board will hold its first meeting sometime this week. As chairman of the board, Prof. H. H. King replaces Prof. M. F. Ahearn. The new members are as follows: Dr. W. E. Muldoon, Prof. R. I. Throckmorton, and Major F. B. Terrell. The old members are Dean E. L. Holton, Dean R. A. Seaton, and Prof. Geo. A. Dean.

Ray Watson in New York
"Mike" Ahearn, head of the athletic department, received the following telegram: Arrived safely in New York. Wire will reach me at the McAlpin hotel.—Ray Watson.

MAY DRAFT FARMER FOOTBALL SLACKERS

BACHMAN DETERMINED TO HAVE 100
MEN OUT

FRESHMAN PRACTICE STARTS

Cross Country Run To Be Held Within Month—Three Cups To Be Given as Prizes to Winners

The athletic department has started on the 1920-21 campaign with a rush. Football practice is in full swing and has been since last Wednesday when the coaches went out on Ahearn field with a squad of 42 men for a stiff workout. The number has increased to 55 since then and Coach Bachman has asked the Collegian to notify the student body that 45 more men are expected for candidates for Varsity berths. He intimated that if he has not 100 men out within the week a conscription movement may be started to pry some of the husky alcove athletes with whom our campus is afflicted from the davenport.

Freshman Practice Wednesday

The erst-while high school stars who have entered K. S. A. C. this year are to report on Wednesday afternoon at the field to Dr. A. A. Holtz, general secretary of the college Y. M. C. A., who is to coach freshman football. Doctor Holtz is a former Colgate football man and under his leadership the wealth of freshman material on the campus should yield up a crew that will give the Varsity some stiff workouts.

Wednesday afternoon has been set aside as the period for student spectators at the field to watch the gang going thru the gruelling workouts that Coach Bachman has made the rule this year. These first practice sessions are going with a pep and zip that augurs well for success in this fall's campaign. The last week's routine was preliminary work—falling on the ball, starting quickly, charging, tackling the dummy, and various exercises designed to limber up the muscles of the candidates.

The new coaches, Bachman and Van Fleet have announced that no man has a sincere because he already holds a letter, and that if he fails to come up to scratch he is quite liable to find himself supplanted by one of the likely looking men from last year's freshman squad or one of the numerous other men who are out there trying.

Hold Cross Country Run

The football practice is not the only thing that is worth the while of Aggie athletes this fall, however. Announcement was made at the athletic office Saturday of a cross country run which is to be held within a month. The date is not definitely set as yet. This contest is to be between all Aggie runners who compete in the runs from 440-yards up. It is to be a time-handicap event so that all will have an equal chance. Ray Watson is the only man who will start from scratch.

There are three cups to be given as prizes to the winners of first, second, and third places. These cups are given by Manhattan business firms. They have been ordered and will be on display within 10 days. All K. S. A. C. runners are urged to start training for this race immediately.

To Have Football Seminar

It will be worth the while of any student new or old to attend the Wednesday afternoon "open-house" workout which, as has been announced, is to be featured this year. Coeds are cordially invited and especially urged to attend. It is planned to have a cheer leader out and to utilize the period, in part, at least, for practicing yells. And remember this, you upper classmen, the freshmen can't learn the yells unless some of you are there to teach them.

In the words of "Mike" Ahearn, "There will be no tea and biscuits or ice cream and cake served at the Wednesday afternoon football seminar, but the real stuff in pep, loyalty, and football ability will be dished out in large helpings. A blanket invitation is issued to the whole student body."

Miss Elizabeth Forrest, librarian of the Montana Agricultural college, is here visiting Miss Grace Derby and the K. S. A. C. library.

OTTAWA ATHLETE IN SCHOOL HERE

IS STAR FOOTBALL AND TRACK
MAN AT O. U.

Was High Individual Point Man in Inter-collegiate Track and Field Meet at Emporia—Enabled O. U. to Win Second

Dewey Wolgast of Alta Vista, one of the fastest all-round athletes who ever attended Ottawa university, has enrolled this fall at the Kansas State Agricultural college.

Wolgast was a star football and track man at the Baptist college, making the first football string two years. Last May he was high individual point man in the inter-collegiate track and field meet at Emporia, and enabled O. U. to win second place, although represented by a small number of athletes. He is a dash and hurdle man and a pole vaulter.

DEBATERS MAY PLUCK JAYHAWK

FOURTEEN COEDS WORKING ON
THE SQUAD

Spring Debate Schedule Planned—May Have Two Contests with Emporia Normal—Many Experienced Debaters Working

The chance to tangle with K. U. this year is being anxiously sought by the fourteen Aggie coeds working on the fall debate squad. This is the first year that debates with K. U. have ever been arranged, and Aggie debaters are competing with their more athletic brothers for the honor of "plucking the jay hawk bird."

The K. U. debate will in no way interfere with the annual Ames debate to be held either late in November or early in December. This is, perhaps, the biggest debate of the year. Two teams of three men each are to be selected from the squad of 14 men now working. The date for the girls' debate which is now being scheduled has not yet been decided upon, but it will be sometime the last of November.

The spring debate schedule includes the annual triangular debate between K. S. A. C., Southwestern, and the Normal school at Pittsburg. In addition to this debate it is hoped that two contests, one boys' and one girls' may be arranged for with the Emporia normal. It is also possible that a boys' debate for this spring may be scheduled with K. U.

The extensive system of debating followed by K. S. A. C. provides for the training of 60 or 70 students. About this number are given extensive training in inter-collegiate debate each year. In accordance with this policy no student can participate in more than one inter-collegiate debate during one school year. The aim of this system is to give training to as large a number as possible, rather than to win debates through the intensive training of a few debaters.

With a large number of experienced debaters in the squads this year, the prospects are bright for a successful year. The spring squad from which the spring debaters will be selected, will be chosen this fall, perhaps in November, when a tryout will be held. The tryouts are open to everyone, and it is hoped by those in charge of the work that all who are interested in debating, or who have had experience in debate work will try for the squad.

Each year debate scholarships are awarded to the two students, one boy and one girl, who do the best work in debate. Last year the scholarships were awarded to Miss Christine Cool, and Mr. J. W. Barger. Miss Cool had three year's experience in debate, while Mr. Barger had two.

TUESDAY, SEPTEMBER 21, 1920

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Make the "Beat K. U." slogan a reality.
4. Aggies at the top of conference athletics by 1922.
5. Clean politics.
6. Greater cooperation between alumni, students, and faculty in bringing athletes to K. S. A. C.
7. Remodeling of the auditorium stage.

THOSE EMPTY SEATS

The opening assembly for the school year of 1920-21, was held, as per custom, in the college auditorium, last Wednesday, during the fourth hour. President Jardine gave a few remarks, apropos of the beginning of a new school year, welcoming the Aggie students and the men and women who are teaching here for the first time.

When the president commenced speaking the auditorium was filled almost to capacity. There was much of importance to be said to the student body. There were many announcements to be made; an hour of sixty short minutes is at best a period of short duration. When the president finished his introductory speech, the speaker's time was cut in two, he had less than half an hour and he must necessarily condense his speech to conform to the time allowed. When the noon whistle sounded he was not yet through. Circumstances forced him to overlap his allotted time in order to have said anything. When he closed his speech, a few minutes after twelve, almost a third of the chairs were empty.

There is something almost ludicrous in the spectacle of a large number of persons attempting to leave a place both hurriedly and inconspicuously. It also follows that it is not in the best taste, and it is the realization of this fact that urges the person leaving to increase his stride as he nears the exit. Every one knows that it is somewhat rude, and they lament the fact, but dinner is waiting and the other will have eaten all the steak and preserves, and it is not the temper of the average person to sit through any kind of a speech when his appetite is crying to be appeased.

We admit that it was an interesting speaker on an interesting subject. We all felt rather mean about leaving, and sneaked out as quietly and apologetically as we could, but there were so many leaving that it looked bad. It unremediatedly gave to the speaker a wrong impression of us, as Aggies. He will perhaps, being human, carry this impression away with him, and may, in the natural course of events, communicate this impression to others. This is the sort of publicity and advertising that we, as Aggies, can not afford to permit. It amounts to the same thing as quitting under fire. It is not in accord with the spirit of the Wildcat to quit because the other team is pushing us. The Aggies always stay to the finish, however bitter it may be. Let us live up to the Wildcat traditions, even in the hour of assembly.

WHOSE COLLEGIAN IS THIS?

This is your Collegian. It proposes to be a bigger and more helpful institution in college life this year than it has ever been able to be before. It rests with you whether or not this is possible. How can you help? By keeping in touch with the staff members or the editor every week and getting information to them which you believe will make a good story.

"But I am not a journalism student!" we hear you say. Granted that you are not, that is all the more reason why as a student of a college affording one of the finest industrial journalism courses in the country you should learn more about the course, in order that you may boost it when you are away from here. If you will keep in touch with a staff member or will write the copy yourself and send it to the editor of the college, your co-operation will be deeply appreciated and you will feel before long a personal interest and share in the progress of the Collegian's life.

This year the Collegian intends to "stand pat" for two big issues, namely, the advancement of S. S. G. A. and legislation which will bring better salaries for our instructors and dormitories for freshmen girls. Again it rests with you, the individual student, whether or not these things are going to win out. You know they are right and both, if supported by you, will bring ultimate good to everyone concerned.

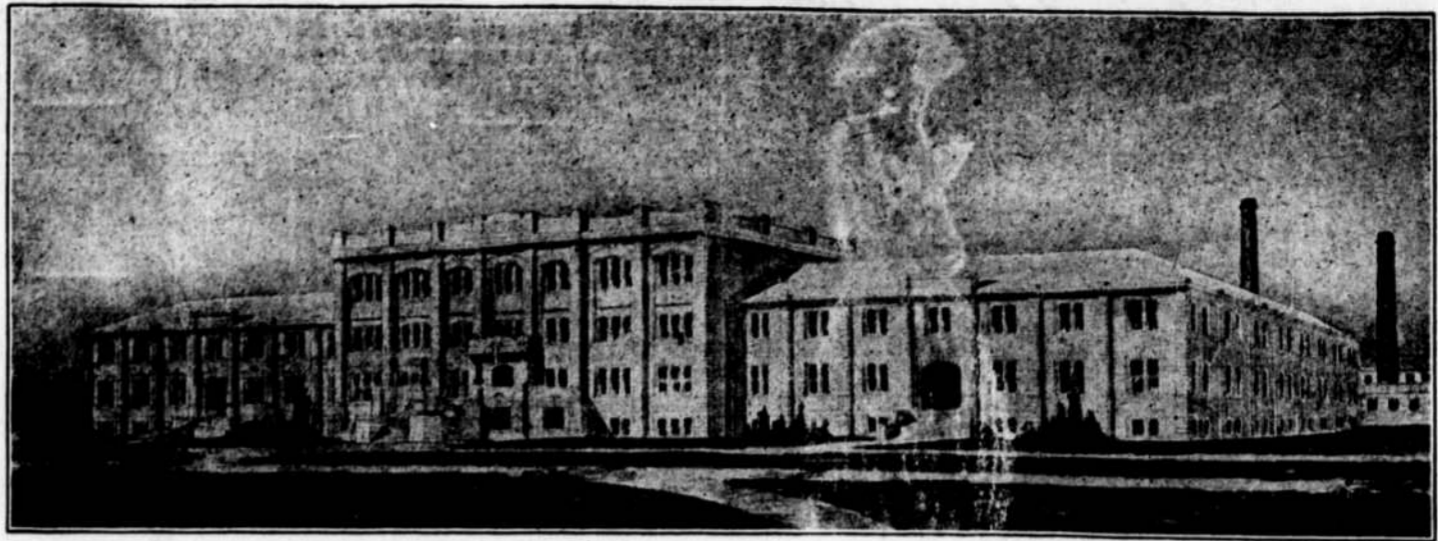

Be an Aggie booster, and be it by being a Collegian supporter. Sit down and write a story for us today. Tell us what you think about S. S. G. A. and give out your opinion concerning the other matters which are close to the hearts of the people concerned. Think of the other fellow a little and make it your purpose to do everything in your power to boost the big endeavors which Aggie students will undertake this year.

OTHER SCHOOLS ARE DOING IT

Nebraska university has completed a campaign which raised a million dollars for a new gymnasium. What are we Aggies going to do about a stadium? Are we going to let K. U. put it over on us once more? Contractors have already started to tear down the bleachers at McCook field to make way for the new \$400,000 concrete stadium. Let's get together and put a stadium on Ahearn field.

Ohio State university plans to build a stadium which besides being the largest stadium in America, will cost \$1,000,000, will seat 2,000 more than the Yale bowl, will cover 150,000 square feet, will have 83 entrances, and will have circulation facilities which will enable the structure to be emptied of a capacity crowd in seven minutes.

West Wing of Building May Be Completed by Second Semester

The new \$190,000 engineering building is still in the making, due to delay in getting the proper materials and to a scarcity of skilled labor. However R. A. Seaton, dean of the engineering division, believes that the west wing may be finished and ready for use by the beginning of the second semester.

The walls of the building are completed up to the top of the second story. As the west wing will consist of only two stories and a basement its walls are practically completed now. As soon as the stone work on the wing is finished the carpentering and plastering work will be started. As plenty

of workmen may easily be secured to do this work it is believed that work may progress rapidly on the west wing.

At present the classes in engineering meet in the various buildings over the campus. Some of the classes are held in the barracks, others meet in the attic of Anderson hall and still others meet in the basement of physical science building. When the new building is finished the division will completely fill it, so large is the enrollment. Last year there were over 1,000 men enrolled in engineering and this year a much larger number is expected.

ADD COURSE FOR MUSIC STUDENTS

WILL TEACH STAGE APPEARANCE AND POISE

Classes To Be Held Once Each Week—Art of Making Up Will Be One of Points Stressed

No graduate from the music department of K. S. A. C. who goes on the concert stage or into the field of public school music need be hampered by that lack of stage presence which so often detracts from the work of an otherwise talented musician. To give K. S. A. C. students definite training in stage appearance and poise a new course in platform deportment and stage appearance has been added to the course of the music department. It was originally intended to have one class limited to 10 members, but the new course proved so popular that it was necessary to schedule two classes, both of which are now filled. The classes are taught by Prof. A. L. Lovejoy.

Although in most cases the course is being taken this year by students who intend to go into concert work or into public school music work, it is planned to make the subject a required one in the music department next year. The enrollment in the classes this year is about equally divided between men and women.

The classes in platform deportment and stage appearance will be held once each week, one hour credit

being given for the course. Definite training will be given in appearance, poise, correct standing, walking, sit-

ting, and bowing. Special attention will be given to gestures and ensemble. Character delineation, so

necessary in concert work when lyric or operatic selections are given, will be treated fully in the course.

CHANGES MADE IN CAR SERVICE

DISCONTINUE USE OF FOURTH
STREET CAR LINE

Cars Stop on Near Side of Street Be-
fore Crossing Intersecting Streets
—Will no Longer Stop in
Middle of Block

The Galloping Goose of the Vattier street car line, so christened by those students who in the past five years have taken their lives in their hands and taken the perilous ride on this relic of the early days of transportation, was disabled last summer and has already become history, as the Manhattan City and Interurban company has decided to discontinue car service on these tracks. A number of students were noticed patiently waiting for the ancient fowl to appear and carry them to the college gate during the strenuous days of registration, but they waited in vain. Those students living east of Eleventh street, and north of Fremont, will find it necessary to walk to the corner of Eleventh and Moro, or to Fremont, to catch the car.

The company announces that hereafter the cars will stop on the near side of the street, before crossing intersecting streets, and will stop on signal at any intersecting street on the car line. Heretofore, it has been customary for the motorman to bring the car to a stop on whichever side of the intersecting street the passengers happened to be waiting. But in the future the company intends to operate its cars like a real system, and will not stop in the middle of a block, nor after crossing an intersecting street.

Cars will leave 10, 30, and 50 minutes after every hour, or a car every 20 minutes. The first car reaches the college entrance about 6:50, and the second at 7:30; after this every 20 minutes. The last car on week nights leaves Seventeenth street at 10:30, on Saturday nights at 11:30, and Sunday evenings at 9:30.

An appeal is now pending before the State Industrial court, for permission to raise the fare from five to 10 cents. If this is granted the company will issue books containing 20 tickets for \$1.50.

New Men in Charge

The work in cooperative experiments in the agronomy department is now in charge of two new men. The position formerly held by C. C. Cunningham is now in charge of H. H. Laude, while N. E. Dale now holds B. S. Wilson's old position as assistant in cooperative experiments. Mr. Dale is now away on a field trip in the eastern part of the state making locations for cooperative fertilizer tests with wheat.

DAY AND NIGHT SCHOOL AT THE MANHATTAN BUSINESS COLLEGE

Enroll now for the fall term. Get a thorough business training in an up-to-the-minute School of Business. Thorough courses are offered in—Commercial, Shorthand, Civil Service, Penmanship, Typewriting, Banking, English, Court Reporting, Salesmanship and Business Efficiency, Adding and Listing Machines, Secretarial, and Commercial Teaching. Shorthand, Typewriting, Bookkeeping, and Business English and Correspondence are taught by mail. For information phone 64, or address L. W. Nutter, President, Manhattan Business College. 2-4.

DEAN VAN ZILE WILL BE IN CHARGE OF VESPER SERVICE

Is Special Big and Little Sister Meeting

All girls in the college are invited to attend the Vesper service which will be held Thursday, September 23, in the Recreational hall with Mary Pierce Van Zile, dean of women, in charge. This is to be one of the "Big and Little Sister" meetings which are to be held each month. Mrs. Van Zile will give an informal discussion on "What is the Matter with our Young People," based on articles printed in some of the current periodicals. This will be followed by a social and "get acquainted" hour.

The first Vesper service of the year was held Thursday, September 16, at 4 o'clock. There was a good attendance of big and little sisters. Miss Irene Dean, Y. W. C. A. secretary welcomed the new students with an informal talk. Special music was given by Pearl Hoots. After a short business meeting, refreshments of tea and wafers were served.

JAYHAWKERS HAVE SEVEN OLD FOOTBALL MEN PRACTICING

Expect 75 to 100 Men Out—Strict
Training Regime by "Phog"
Allen

The first official football practice at the athletic field of our neighborhood valley, K. U., started last Wednesday afternoon. The University Daily Kansan did not give the number out for first practice but stated that between 75 and 100 men were expected by the last of the week. Included in the number who checked out suits were seven letter men, Nettles, Mandeville, Reid, Hatt, Helzer, Bell, and Lomborg.

A strict training regime has been adopted by "Phog" Allen, athletic director at Lawrence this year. He has announced among other things that tobacco in any of its forms, cigarette, cigar, or what the Vets know as "eating" tobacco, is taboo and its use will automatically bar a man from the squad.

W. R. Harder, a senior in the department of agronomy, spent last week at the Topeka Free State Fair looking after an exhibit of farm grains placed by the agronomy department. On October 1, he will go to Wichita to attend the International Wheat Congress in the interests of a similar exhibit.

PROFESSOR KENT TO SPEAK HERE

IS FORMER PRINCIPAL OF
SCHOOL OF AGRICULTURE

Will Give First of Series of Lectures
to Be Given by Vocational Guidance
Association

A series of lectures to be given by the Vocational Guidance association, under the auspices of the Y.M.C.A., has been announced by Dr. A. A. Holtz, general secretary of the Y. M. C. A.

The first number of the series will be given by the state superintendent of Vocational Guidance, Prof. Harry L. Kent, formerly principal of the School of Agriculture here, on Thursday, September 23, at 7:30 in the

evening. The subject will be "Agriculture as a Vocation."

Professor Kent is a graduate of K. S. A. C., and is at present director of the Hays Experiment station.

Have New Museum

A new museum is soon to be fitted up in what was originally an old store room on the first floor of the veterinary building. The room has been remodeled and the exhibits which are now in cases in the hall will be moved into the new room. The exhibits are mostly from the departments of pathology and anatomy.

Only Ten Freshman Vets

The department of Veterinary medicine seems to have been shunned by the freshman this year for some unknown reason. Less than 10 freshmen are enrolled in the work as compared with about twenty last year. This shortage of first year men indicates nothing, however, regarding the demand for veterinarians, according to Dr. H. Scott, an instructor in the department. Doctor Scott says

that the need for trained veterinarians is constantly increasing with the increase in agricultural education among the farmers.

Wanted:—Student with some experience on a soda fountain to work part time. Apply College Canteen.

Karl Quinsberry, senior in the department of agronomy, was at the Hays experiment station last week taking notes of the breeding work with sorghum, which is being carried on there. He will return to take up his college work next week.

Ill During Vacation

Because of a prolonged illness which kept her in a hospital during her vacation, Miss Florence Helzer, instructor in English, was prevented from accepting an offer made by the Madame Borgny Hammer company to travel with them during the summer. Miss Helzer is an honorary member of the Purple Masque, and coached the play, "Believe Me, Xantippe," successfully presented by the dramatic club last year. Madame Hammer will be remembered as the leading lady in the series of Ibsen plays given at the college last spring.

JAPAN LOOKING UP TO KANSAS

HERE TO WORK FOR IMPROVEMENT IN STOCK BREEDING

Kentaro Iwahe May Enter College to Study Animal Husbandry—Is Secretary of County Stock Breeding Association

Japan is looking to Kansas for improvement in stock breeding. Kentaro Iwahe, secretary of a county stock breeding association in Kagawa, Japan, has inquired of the Kansas State Agricultural college if he may enter and study animal husbandry. He writes:

"I was educated in Japan in a second grade school. After graduation and for three years I was connected with a county stock breeding association. During this interval I was veterinary examiner and the stock breeding promoter of the association.

"I suppose no doubt that this industry, as compared with that of America and Europe, is very crude and out of date. I desire to do all in my power to promote stock breeding in my own country and to bring it up to the level of that of other civilized nations; and I am convinced that this cannot be done unless the industry is studied in those countries.

"I am therefore writing to inquire whether it would be possible to enter and take a course in this subject in your school."

Poor Little Freshie She Got Her Tongue All Twisted Wrong

"Say," sang out a golden haired freshie as she burst through the door of Dean Willard's office—"Say," she repeated, and the sleek pompadors and frizzed damsels which draped the couch, table, and chairs lifted wondering eyes.

Agitation shadowed every line of the freshie's features. Her net was loose, her bobs awry, and her cheeks glowed. She clutched in one hand a vanity case and in the other a 5 cent pencil. On she tore without pausing, to the middle of the room. Here she stopped and in a pitched voice she tried again.

"Say—a—a is the Bean dizzy?"

FUNERAL OF MERLIN KISTLER IS HELD FRIDAY AFTERNOON

Kistler's Death Is Caused by Typhoid Fever

The funeral of Merlin Kistler, a freshman here last year, whose death occurred at Abilene Tuesday morning, was held at the Southern Funeral home here Friday afternoon. Burial was in Sunset cemetery. Mr. Kistler was one of the students who went to Pittsburg last winter to work in the mines during the coal shortage. His death was caused by typhoid fever.

WORK IN THE NEW STUDIO IS NOW WELL UNDER WAY

Six Music Instructors To Have Studios There

Work in the new 14-room studio which has been leased for five years by the K. S. A. C. music department, is well under way. Six instructors, Miss Helen Colburn, Miss Marren, Miss Kellar, Miss Hassinger, Mr. Boyd Ringo, and Mr. Williams have their studios in the building. The rest of the rooms are being rented to students for practice rooms. Most of the rooms are rented for half-

Big Ben
and
Baby Ben
Alarm Clocks

ROBERT C. SMITH
JEWELER
329 Poyntz

hour periods, a fee for the entire semester being charged. The building which is located on the corner of Sixteenth and Anderson has been remodeled to suit the requirements of the department, and is effectively relieving the studio shortage of the music department.

HOCKEY PRACTICE TO BEGIN EARLY PART OF NEXT WEEK

Will Have Hockey Color Tournament to Precede Choosing of the Class Teams

Hockey practice will start early next week according to Miss Edith Bond, women's physical education instructor. All girls interested in trying for the class hockey teams must sign their names on the placard which will be hung on the bulletin board in the women's gym.

Hockey tryouts will take the form of a color tournament this fall similar to the basketball color tournament which preceded the choosing of the class basketball teams last winter. The girls contesting for places on the hockey squads will be divided into teams each of which will be designated by some color. Every girl will have a chance to play in the color tournament.

These various color teams will then play each other until every team has played every other team. During these games, Miss Bond and Miss Louise Tausche will have a chance to look over the new and old material and choose only the most competent players for the class teams.

Returns From Chicago

S. C. Salmon, professor of farm crops of the agronomy department of the college, has returned from Chicago, where he has been in attendance at a conference to arrange plans for the holding of the Second International Hay and Grain show to be held next year.

It was hoped that plans could be completed for the holding of a National Students' Grain Judging contest but it was not found feasible for this year, but plans were laid for a contest to be held one year from this fall.

Clell A. Newell and A. R. Peterson have returned to college after spending several days at the State Fair in Topeka.

STORMS CAUSE POOR SERVICE

ELECTRICAL STORMS KEEP TELEPHONE SYSTEM IN DISORDER

Company Is Doing the Best It Can with Shortage of Labor and Material—Owner of System Is Out Working

If the telephone service drives you to distraction when you're calling for that urgently required date 'r somepin'—why, don't blame the telephone company.

At a meeting of the board of directors of the Manhattan Chamber of Commerce held this week, the manager of the Wareham Telephone company and a consulting engineer who is making a survey of the system in Manhattan, were called into conference on the numerous complaints which have recently been received by the company and by the local Chamber of Commerce.

It was demonstrated to the satisfaction of the Chamber of Commerce officials that the company is doing the very best that it is possible to do, to remedy conditions which have been caused by the unusually frequent electrical storms during the past summer, and by the shortage of labor and material.

The owner of the system is out in overalls, working every day on the lines. Additional switchboards and other equipment which are urgently needed to make the service satisfactory, cannot be bought on the present market at any price. A complete going-over of the system is under way as rapidly as men can be found to do the work, and material secured to do it with.

In the meanwhile, the Chamber of Commerce decided there is nothing for the public to do but to "grin and bear it" and incidentally to do as little social and unnecessary telephoning as possible during the hours between 8 o'clock and 11 o'clock in the morning. Those are the hours which carry the "peak load" of business calls on the Manhattan phones, and it will offer some relief to operators and equipment already over-

worked, if unnecessary calls are eliminated between the hours mentioned.

ators and equipment already overworked, if unnecessary calls are eliminated between the hours mentioned.

Have Genetics Seminar
Due to an oversight the seminar in genetics was omitted from the schedule. It will be held every Wednesday afternoon at 4 o'clock in Dr. H. L. Ibsen's office, Ag. 15 A. Faculty members and approved students are invited. It gives one credit if on an assignment by noon Wednesday, September 22. Both plant and animal papers will be reviewed. Prof. R. K. Nabours, Dr. H. L. Ibsen, Prof. Parker, and Prof. W. A. Lippincott will be in charge.

There is lots doing in the Purple Masque according to Miss Helzer but it is a secret. We are now using the "watchful waiting" policy.

SOCIETY

Miss Abbie Furneaux and Mr. Samuel Daniels were married September 1 at the home of the bride's parents at Moran. Mrs. Daniels graduated from K. S. A. C. with the class

of '20. She was a member of the Ionia Literary society and was prominent in Y. W. C. A. work. Mr. Daniels is a banker at Moran where the young couple will make their home.

Miss Clare Higgins of Hiawatha, and Mr. Ben Clapham, a senior in

the veterinary division of the college, were married at Hiawatha on Sunday, September 21. The bride graduated from the agricultural division of the college in 1918 and has been employed at the college since that time. Mr. Clapham has reentered college to finish his course this year. Mr. and Mrs. Clapham will be at home at 503 Leavenworth after October 1.

Announcement has been received here of the marriage of Miss Laura Wingfield and Mr. W. Glen Hamilton of Topeka, Sunday evening at the First Presbyterian church at McAllen. Mrs. Hamilton graduated from K. S. A. C. in 1914. She specialized in the home economics course. Since her graduation she has been in home demonstration work in North Carolina. Mr. Hamilton also attended college here, where he met Mrs. Hamilton.

Announcement has been received here of the marriage of Miss Sara Robinson of El Dorado and Mr. Daniel William Woolley of Channing, Tex., Wednesday, September 15, at the home of the bride's moth-

er in El Dorado. Miss Robinson graduated from Washburn in 1919. She was a member of the Kappa Alpha Theta sorority. Mr. Woolley attended college at K. S. A. C. where he was a member of the Delta Tau Delta fraternity. Mr. Woolley served in the 130th field artillery during the war. After being overseas for several months he was sent back to the United States as a trainer.

THETA SIGMA PHI GIRLS TO HAVE MEETING TODAY

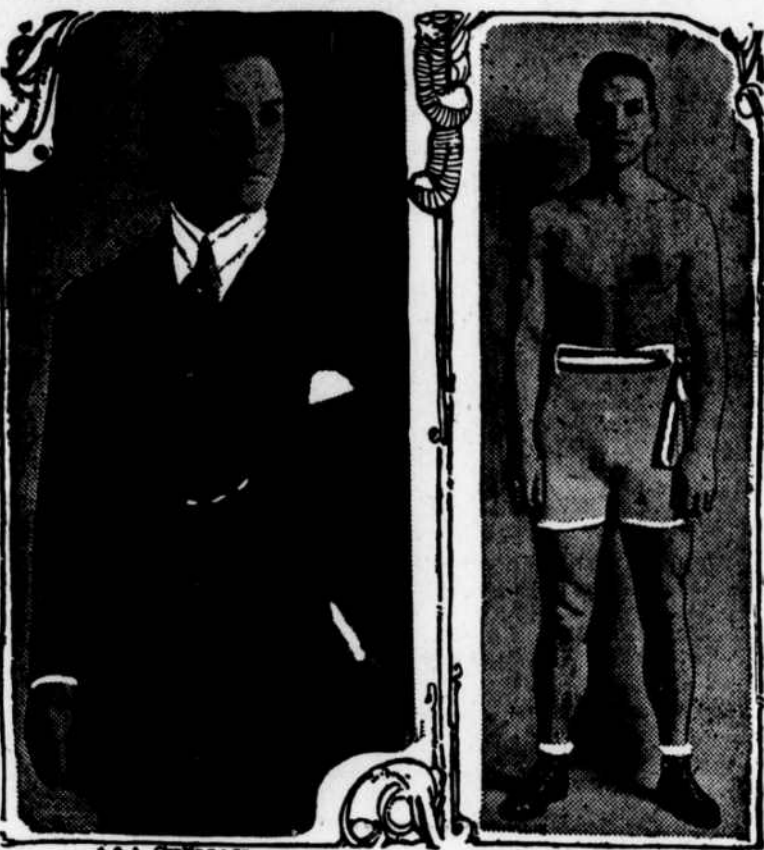

Will Outline Work To Be Taken Up This Year

Theta Sigma Phi, honorary journalism women's fraternity, will hold its first meeting this year in the Collegian office this afternoon. An outline of the work to be taken up this year by the fraternity will be outlined at this meeting. Miss Clementine Paddelford is president of Theta Sigma Phi this year, Miss Blanche Lea is treasurer, and Miss Ione Leith is secretary.

Theta Sigma Phi, which is a national organization, has recently established in Chicago an employment bureau for the benefit of Theta

Sigma Phi members. It is probable that the K. S. A. C. chapter of the fraternity will contribute to the fund for this bureau. Plans for assisting Sigma Delta Chi, honorary journalism fraternity, with the publication of the Brown Bull will also be considered.

C. C. Cunningham, formerly in charge of cooperative experiments in the department of agronomy, spent several days last week in Manhattan and at the college with his old friends. Mr. Cunningham is now farming near El Dorado, and reports a very successful year's work.

Fall Models in the Limelight

The fall models of Society Brand Clothes are being shown here now.

And the showing of suits and coats makes us feel just about as proud as a young man feels when "her father" sizes him up and says "I'm for you, my boy."

To those who are not familiar with Society Brand Clothes a surprise is in store at the faultless tailoring and excellent designs. They're tailored thruout, not merely fine examples of all wool fabrics.

There is nothing flowery about that statement, because Society Brand Clothes have a dignified yet youthful appearance, that is obtainable only by the highest class of tailoring.

You will like the new models. They are without fancy details, but strong on fit.

ENROLMENT IN ZOOLOGY LARGE

EQUIP NEW SECTIONS TO MAKE ROOM

Vacancies on Teaching Staff All Filled
—Ruth Hurd West Studying Inheritance Properties of Grouse Locust

Enrolment in the zoology department this semester is so unusually heavy that it has been found necessary to equip new sections in both the old and new laboratories.

New instructors have been added to the teaching staff to fill new places as well as to fill the many vacancies. L. R. Cleveland, formerly of the University of Mississippi, and who has held a chair at Emory university, Atlanta, Ga., also a graduate of Chicago, succeeds Earl A. Martin who has accepted a similar position in a college in New York City.

Miss Irene M. Huse of New Hampshire succeeds Edith Willmann as instructor in the zoology department. Miss Huse has held an instructorship at New Hampshire State college and has taken similar work at Harvard university.

An additional instructor which the department has secured is James B. Rogers, formerly of the University of Kansas. Mr. Rogers was a member of the department's faculty in 1917. Since holding the latter position he has done work at the University of California. During the past year he has held an instructorship in the Biology department at Tufts Medical college at Boston.

Ruth Hurd West holds the graduate assistantship in the department. At the present she is pursuing a problem on certain phases relative to the inheritance properties of the grouse locust.

M. U. STUDENTS BEGIN TO TAKE INTEREST IN POLITICS

Democrats Organize Both a Men's and Women's Club

Students in the University of Missouri have begun to take an interest in politics in view of the coming presidential election this fall. The Democrats are the first to get organized will both a men's and a women's Democratic club.

At first the two clubs were organized separately but the two will probably be combined at a later date. The Democratic State Speaker's bureau will furnish speakers for the political clubs.

Has Record Enrolment
Figures given out by George O. Foster, registrar of Kansas university show an enrolment of 3,103 for the first day after the regular registration, which is the greatest number ever registered that early in the year.

Popular departments in the university this year seem to be the English and political science departments

altho the enrolment is pretty well scattered thruout the entire list of courses.

Don't Throw Away

MAKE TESTS FOR MUSICAL ABILITY

PROFESSOR PETERSON TO TEST GROUPS OF STUDENTS

Tests Given This Summer Showed Splendid Results—Have Tried Tests on Thousands of School Children

Have you any music in your make up? You may think so, but do you know? Do you expect to be a second Galli Currel because you sing in your church choir, waltz beautifully, and are taking voice culture under Madam X? Why not know how much musical ability you have, what degree of musical success you might attain?

Professor Seashore who has experimented with musical ability for years has prepared a series of psychological tests by which he is able to pick out to a great degree of accuracy students who will succeed in music. He is also able to determine to some extent the degree of success which they may attain.

This summer Prof. J. C. Peterson,

head of the department of psychology at K. S. A. C. visited Seashore's wonderful laboratory at the Iowa State university where he saw all the apparatus used by Professor Seashore in his experiments upon thousands of school children. The material necessary for performing the "Seashore Group Tests of Musical Ability" is now in the K. S. A. C. laboratory and in a few weeks Professor Peterson will be ready to test groups of students in the music department.

Prof. P. P. Brainard and Prof. A. E. Westbrook will aid in giving the tests. Professor Peterson says that the tests which were given to small groups of students in summer school showed very gratifying results.

Remedy Social Conflicts

Big social events of the year at Kansas university will be scattered thruout the entire year so as to prevent jamming and conflicts as heretofore has been the case. All of the college classes will hold mixers in October, no dances will be held in the gymnasium during basketball season, and all organization dances will be held in harmony according to the new schedule which has been arranged by a committee that has been appointed since the first of June.

Dr. M. P. Schlaegel, '20, spent Saturday and Sunday at the Alpha Psi house. Doctor Schlaegel is now practicing at his home in Olsburg.

AGGIES' FIRST PEP MEETING BIG SUCCESS

J. U. HIGINBOTHAM, '86, GIVES SHORT TALK

"MIKE" URGES LOYAL SUPPORT

Coach Bachman Says Football Prospects Depend on Spirit of Student Body—Professor King Boosts Sales of Football Tickets

The football team has been out on Ahearn field all week getting its daily workout, but the student body took its first practice last Tuesday morning. It is safe to say that the student assembly held at that time was one of the most enthusiastic ever held at K. S. A. C. this early in the year.

An Aggie alumnus, J. U. Higinbotham of Detroit, Michigan, class of '86, spoke for a few minutes on the value of athletics in the college world. After his speech, Professor Kammer presented Mike Ahearn to the student body as the new director of athletics.

Fifteen Rafts For Mike

The crowded auditorium echoed with the fifteen rafts "Stuffy" Corby demanded for Mike. Mike put on his most modest blush and shoved his hands deep in his pockets, standing in this graceful attitude until the storm of applause had subsided. By that time he had regained his stage poise and customary Irish wit.

In a short, peppy talk he urged the Aggies to come out to the games and practices and to keep up the fighting Wildcat spirit which has become a tradition. To quote Mike "No baseball, basketball or football team, no, not even a ping-pong team can hope to win without loyal support."

According to Mike, K. U. is not to be the center of attention until the time for the big game. His strategy as outlined to the students is to take each team as it comes, playing no favorites, but planning on winning from each, then to go after K. U. with both hands—and feet. To quote him again, "There are many Aggie traditions but the oldest is the never-give-up fighting spirit of the Aggie rosters. The student who does not back the football team has no place in college athletics."

Bachman Asks More Men

Mike introduced Coach Bachman who kept to his pledge not to put out any bear stories concerning Aggie prospects. In a concise statement he put the entire football prospects up to the student body declaring, "The action of the team on the field is nothing more than the reflection of the spirit of the students." He asked that more of the husky material on the campus come out for the squad, putting it up to the students as their duty and right.

Dr. Holtz, the Freshman coach for this year, called for a record-breaking squad of yearlings to test the mettle of the Varsity.

Dr. H. H. King, new chairman of the athletic board, was given the usual glowing introduction accorded him by Mike Ahearn. Dr. King paid Mike the delicate compliments he customarily does when the two speak at meetings. He then introduced the new members of the athletic board, Doctor Muldoon, of the veterinary medicine division and Prof. R. I. Throckmorton of the soils department. Professor Throckmorton was absent but was commended by Doctor King as a strong addition to the board. Doctor Muldoon pledged his loyalty to the cause of Aggie athletics in a short speech.

Asks Financial Support

Finally, Doctor King himself put the proposition of financial support for football this season directly up to the students. He stated that but 300 season tickets had been sold this year as compared with 1,700 last year. It takes \$3.00 to purchase a season ticket for the 5 games on Ahearn Field this fall while single admission would cost \$4.50 for the games. He asked the students that would buy tickets to rise by divisions. The students in each division, including the home economics, responded practically 100 per cent.

The K men on the stage then started thru the audience to exchange tickets for money of those who had risen. However, thru some oversight of the authorities in charge of the assembly, the crowd was dismissed instead of being requested to remain until the ticket sales were completed. The result was that the K men were unable to reach more than half of those who had signified

their intention of purchasing tickets. Coach Ahearn estimated this morning that only about 1,000 tickets had been sold. It is necessary for the students to redeem their promises made in chapel by going to the coaches' office in person if they are not seen by a K man.

Might Use Military Tactics to Extract Those Dollar Bills

The young ladies who are valiantly upholding the financial end of the Collegian in main hall, should, besides their inherent feminine instincts of capture, know a little bit about military science. Did they study the military manual for a time the list of tight wads that they corral would undoubtedly be augmented.

Instead, for instance, of attacking at a tangent, as they unwarily do, and giving the objective, who has the advantageous side of the table, an easy chance for flight, they should work with an ambushing effect; say from behind the phone booth, step out in front of the enemy before he is quite parallel with the place of concealment, surround and capture him before he is aware of his plight.

This is only one of the many ways in which a study of military tactics would benefit the young ladies who are laboring heroically, yet against fearful odds, to extract that almighty dollar, or, more properly, two dollars, from those young men and women who are either naturally or financially bashful.

TEACH CHILDREN A NEW SYSTEM

MUSIC INSTRUCTION IS MADE GAME BY K. S. A. C. TEACHER

Kiddies No Longer Have To Wait Until Legs Grow Longer to Pedal

No longer will Manhattan kiddies taking instruction in piano have to "wait until their legs grow longer" before they can use the pedals. The new course in music instruction for children which has been made a part of the curriculum in music at K. S. A. C. this year, does away with all that. Music is made a game and the youngsters are given instruction which will furnish a sound foundation for further work.

For a number of years children have been given instruction in music at K. S. A. C., but the work has been limited by lack of equipment and sufficient teaching force. This year, however, a special instructor, Miss Helen Colburn, a graduate of the K. S. A. C. music department has been secured to do the work. Miss Colburn took special work in the musical instruction of children at Chicago this summer.

Miss Colburn makes music a game for children. A modified form of blind man's bluff is used to teach the kiddies the names of the keys, and a special game is used in which the children tell how many "children" each key has, and whether the "children" are sharp or flats. But best of all, from the children's point of view, there is a piece of apparatus which is fastened over the pedals and raised or lowered to suit the height of the pupil. This device enables the pupils to begin the use of the pedals with the beginning of the course in music.

There are about 25 children enrolled in the course for children. Two private lessons of twenty minutes each are given during the week, in addition to an hour of class work. There are three classes, one for those enrolled in kindergarten, one for those in primary work, and one for children in secondary work. The classes of high school pupils are taught by Miss Fannie Kellar.

GIVE BACHELOR OF MUSIC DEGREES HERE THIS YEAR

Replace Certificates Given For Three-Year Course

For the first time in the history of K. S. A. C. a degree of bachelor of music is being offered for a four years' course in music. Heretofore certificates in applied music and in public school music have been given for a three-year course.

The enrollment in the department of music this year is the largest in the history of the college. Four new instructors have been added to the department roll, two in piano and one in voice and one in violin.

Try New Experiment

The Clothing II classes are taking up the problem of "how can a family of five dress on 15 per cent of a limited amount of a certain salary." Dean Thompson has asked that the salary not exceed \$1,200 a year.

This is the first time an experiment of this kind has been worked out, but the girls seem very interested in the new plan. Only 15 per cent of the salary can be used in clothing, which is supposed to be a standard per cent and should cover the necessary clothing.

HAVE INFORMAL TALKS AT THE JOURNALISM SEMINAR

Next Meeting to Be Given Over to Press Club

Journalism seminar met for the first time Monday afternoon. The hour was taken up by informal talks by the instructors in the department. During the course of these talks, copies of an interesting booklet "The Specialist in Journalism" were distributed by Mr. Rogers.

The next seminar meeting will be given over to a meeting of the Aggie Press club. The club will be reorganized at this meeting, and plans for the coming year will be made. Officers will be nominated at the meeting.

VETS. FEAR THE HORSE OF IRON

THIS ACCOUNTS FOR SMALL ENROLLMENT IN WORK

Doctor McLeod Believes Tractor Will Not Affect Veterinary Practice to Any Great Extent

Why are there so few freshmen vets this fall? That is the question everyone in the veterinary division is trying to solve.

According to W. M. McLeod of the division, one reason for this slump is the horror held by many of the prospective veterinary students for the tractor. They fear that they cannot use their kits or their medicines on the iron horse of which we hear so much these days.

"This fear," said Doctor McLeod, "that the increasing use of the tractor may harm the veterinary business is, I believe, largely a false alarm. The increase in the use of tractors affects the number of horses on large farms only, for it has been demonstrated that the tractor is not adapted for the small farm. And then when we remember that the use of the tractor does not in any way decrease the number of other livestock on the farm, the weakness of the tractor argument becomes quite obvious."

SELL OVER THREE HUNDRED PURPLE CAPS TO FRESHMEN

K Fraternity Has Charge of Sales This Year

"Got 'cher cap yet?" is the current question among freshmen boys and K frat men. Over three hundred caps had been sold at the stand in Anderson hall, at noon yesterday.

The plan this year is to place the sale of the freshman caps in the hands of the K fraternity, instead of their sale by the sophomore class as was formerly the custom. The new plan makes the cap a guarantee of the wearer's interest in the school as well as his support of athletics.

EUROPEAN LITERARY SOCIETY HOLDS ELECTION

Mrs. Elizabeth Winters To Be President

The Eurodelphian literary society held election of officers last week. The following officers were elected: president, Mrs. Elizabeth Winters; vice president, Ruth Peck; recording secretary, Irene Maughlin; corresponding secretary, Christine Cool; treasurer, Georgia Bell Critchfield; critic, Opal Seiber; Collegian reporter, Gladys Ritts; marshal, Marla Seiber; assistant marshal, Eva Leland; junior member of Intersociety council, Carol Knostman; third member of the program committee, Esther Stay; third member of board, Agnes Ayers; pianist, Nellie Jorns; song leader, Mable Ginter.

K. Richmond Visits College

K. Richmond, a former Aggie in the department of journalism, came to Manhattan Wednesday for the purpose of conferring with Walter Burr, rural organization specialist in extension, concerning tuberculosis work in the rural community.

Mr. Richmond is field representative handling educational publicity for the State Tuberculosis association, with headquarters at Topeka. He reports that two other former students of K. S. A. C. are in the employ of the association, Miss Eunice Canton is office secretary, and Miss Alice E. Terrell, who graduated here four years ago, is handling the modern health crusade, a movement among school children for pure air, clean teeth, and plenty of out-door exercise.

PLAN SPECIAL TRAIN TO RUN ON OCTOBER 9

TO GET TRAIN 125 STUDENTS MUST GO

WILL HAVE ALL DAY HOLIDAY

Aggies Will Be Admitted Without Charge to Wheat Show—Students to March from Union Station to Exposition Grounds

An all day holiday and a special train to take Aggie students to Wichita are planned as features of October 9, which has been set aside as K. S. A. C. day at the Wichita Wheat show to be held October 4 to 16. Although plans for the trip are still tentative, there is practically no doubt but that the special train will be arranged provided a minimum number of 125 students will agree to make the trip.

Aggies To Be Guests

It is probable that the special train will arrive in Wichita about 10:30 Saturday morning, leaving there at 8:30 or 9 in the evening. The students and Manhattan people making the trip will parade from the Union station to the exposition grounds where the program will be given by the college band and other student organizations. After the program the students from K. S. A. C. will be guests at the Wheat show and of the people of Wichita. The Aggies will be admitted without charge to the Wheat show and the other entertainments connected with it.

Final arrangements concerning a rate reduction for the trip have not been made, but some reduction will undoubtedly be secured. A railway representative will be in Manhattan this week to complete arrangements with the committee appointed by the president to take charge of the arrangements for the trip.

Must Be 125 Students Going

The members of the committee wish to emphasize the fact that the securing of the special train and reduced rate is contingent upon the student body, as no train can be secured unless 125 students agree to make the trip. It will be possible to secure accommodations for as many as wish to go to the Wheat show. All of the students, whether or not they go to Wichita, will be given a holiday provided 125 Aggies sign up for the trip.

The college has been asked to make up a three day's program at the Wheat show. The first two days of the show will be devoted to a discussion of agricultural products by members of the experiment station staff, and outside speakers, of the rank of Governor Capper and Alonzo E. Taylor, formerly of the food administration.

The K. S. A. C. alumni and former students living in the vicinity of Wichita met several weeks ago, making tentative plans for the entertainment of Aggie students who visit the show.

Nearford Learns of Joys and Sorrows of Real Rush Week

I am tired, my tenders sag, my upholstered back is worn thin, and every joint has a rasping squeak. I have traveled blocks and miles, my brains and other internal workings whirl and knock. I need a soft oozy ointment for my aching hinges. I need a bath. I wish that I could slip out of the world and rest my weary parts on some forsaken junk pile far away from the city limits.

You see, I'm a nearford, and though I'm not conceded I certainly have covered myself with glory during the past week. I've had the privilege of transporting large numbers of the most ludicrous damsels that ever tripped the light fantastic. And I made it possible for my owner's group to "get away" with one of the girls that they wanted very much while other groups who were sure they had her cinched slept peacefully on.

But I'm so tired. I've carried some heavy weights this last week. I've heard that they are light on their feet, but oh boy! when they sit they sit! I like girls all right but they do talk an awful lot. And in the long run, say 20 or 30 miles, it can't be said that they have said so very much. At least it takes a lot of it to go very far.

I hope that I am going to be taken to the garage pretty soon. I've had my gears stripped and I've been punctured and patched, and tempor-

arily bolted and pinned together until I feel like a rummage sale.

I saw my duty though and I did it nobly. I helped to pledge five of the keenest girls on the hill. In short I am a pretty good sort and I like myself real well. Guess I don't want to die after all.—The Car That Was Rushed.

Just A Rookie

Resplendent in his new O. D. uniform with white tags and odor of moth balls, the Rookie again makes his appearance. His favorite pose is one of dignity. He stands on the street corner, head erect, cap at proper angle, arms folded over the manfully expanded chest, and regarding the world with a condescending eye. Awed by the superior presence as we timidly pass by, we gasp, "Who is this new Major-General?"

SCHOOL OF AG. HOLDS MEETING.

B. J. MILLER IS ELECTED PRESIDENT

Athletics for Year Was Discussed—Expect to Play Small Colleges and High Schools

A meeting of the School of Agriculture was held at 7 o'clock Tuesday evening in C26, for the purpose of electing officers and making plans for the coming year. The meeting was called to order by R. V. Barrington, last year's president. The officers elected were—president, B. J. Miller; vice president, B. Conroy; secretary, E. K. Glover; treasurer, L. W. Marshall; marshal, W. Wallace.

Athletics in the School of Agriculture was discussed, A. P. Davidson, dean of the school, pledging his most loyal support. Although the boys are already out for football practice they are yet without a coach. However, the college department of athletics has promised to furnish one soon. The team expects to slate a number of small colleges and high schools on its schedule this year if possible.

NEW STUDENT PASTOR COMES

REVEREND GUERRANT IS NATIVE OF KENTUCKY

Has Broad Education—In College He Was Active in Athletics

The Presbyterian Synod of Kansas has called to the college pastorate Rev. William Guerrant. Reverend Guerrant is a native of Kentucky, and was educated in Ballene college, Kentucky, and Davidson college, North Carolina. In the last institution he spent four years. Reverend Guerrant also was a student in the Kentucky Theological seminary, Union seminary in West Virginia, and Columbia seminary of South Carolina; from the latter place he was ordained into the ministry.

During his college career Reverend Guerrant was very active in college affairs, especially along the line of athletics. He was athletic director of the Union seminary, West Virginia, and manager of the Davidson college football team, as well as its captain. He was coach of three Union seminary baseball teams, manager of three league teams, and played professional baseball for six years.

In his professional work Reverend Guerrant has also had much experience. He was assistant pastor and director of men's and boys' work in the largest institutional church of the south at Charleston, W. Va. He was the student secretary of the Y. M. C. A. at the University of South Carolina for two years, and he organized the first playground association in the south at Columbia.

Reverend Guerrant was the pastor of the Presbyterian church at Brownstown, Ind., for two years, and later at Elizaville, Ky., from which position he comes to K. S. A. C. Here he has already created a favorable impression among the students of Presbyterian preferences.

If You Are Color Blind

Green and purple have always been considered as clashing colors. Regardless of tone effects, however, the purple beaconlights of the freshman class are now appearing abundantly over the campus in conjunction with their verdant wearers. Their greenness is usually evident at first sight, but for the benefit of those who are color blind here is an example: Freshman: "Do we have to wear these caps in the class room?"

LIVESTOCK AT TOPEKA FAIR TAKES PRIZES

HORSES TAKE PRACTICALLY EVERYTHING IN THEIR CLASSES

SHEEP WIN \$600 PRIZE MONEY

Fifteen Head of College Swine Make Excellent Showing—Cash Prizes Won by College Amount to About \$1,200

The K. S. A. C. livestock entered at the Topeka Free State Fair this year fulfilled all expectations of the animal husbandry department, and more than held their own against the strongest competition among institutions and breeders of the middle west, that has existed at this fair in recent years.

Win Seven Championships

The horses wearing the college colors were especially successful, and swept practically everything in their respective classes, the 15 head entered winning in all seven championships, eight first premiums, four seconds, three thirds, two fourths and one fifth. The imported Percheron mare owned by the college, was awarded the senior and the grand championship in the aged mare class, placing over a hitherto undefeated mare which had previously won the purple ribbon four times in succession.

The yearling Belgian stallion, Congo, bred and owned by the college, and showing for the first time, was awarded the junior championship ribbon, and also won the grand championship over the three-year-old "Ivondale," who two years ago stood second in his class at the International Livestock show, last year, was grand champion of his class at Waterloo, Iowa, and recently was sold for \$4,000.

Only Six Head Cattle Entered

Only six head of cattle were entered and these succeeded in garnering in a grand championship, three firsts, a second and a third. The grand championship, in the senior yearling class, was won by Pride's Eric, an Aberdeen Angus, and one of the firsts was on the best herd of three steers.

Fifteen head of college swine, competing for honors, also made an excellent showing, placing a first and a third among the Duroc Jersey sow pigs of over six months and under 12 months of age, a reserve championship in Duroc Jersey sow class, a third in senior yearling boars, and other awards.

Sheep Bring Home \$600

Among the sheep breeders, competition was not as keen as in other classes, and the 58 head owned by the college brought home almost all the ribbons offered and cash awards amounting to approximately \$600. It is estimated that the combined cash prizes won by the college entries in the livestock exhibit, amounted to about \$1,200.

Although not as many cattle were entered as last year, the total winnings indicate a more successful exhibit as a whole, than in 1919.

Immediately following the closing of the Topeka fair, the entire string of animals, installed in four special stock cars, were shipped to Hutchinson, where they will again compete with the show stock at the fair being held at that place, and where it is expected they will repeat their Topeka successes. The cars were in charge of C. B. Roberts, college herdsman.

Among the instructors of the animal husbandry department, who are now, or will be, present at Hutchinson during the fair, are Dr. C. W. McCampbell, head of the department, Prof. F. W. Bell, Prof. A. M. Paterson, Prof. E. F. Ferrin, and Prof. C. E. Aubel.

Brighter Conferences

The students who have to undergo humiliating conferences with any instructor in the Main hall will have a brighter outlook in the future than other students have had in the past. The rooms have been remodeled to the extent that the idea of a conference will be one of brightness instead of asperity. Although effective work has been done by the use of the paint brush the glaring bull-rushes still predominate on the ceiling of Prof. R. W. Conover's office.

Notice

A class in wireless telegraphy is being offered by the physics department. Laboratory Wednesday, 7-8 hours; recitation Tuesday and Thursday, 7th hour. See Professor Hamilton, physics department, for further particulars.

FRIDAY, SEPTEMBER 24, 1920

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Make the "Beat K. U." slogan a reality.
4. Aggies at the top of conference athletics by 1922.
5. Clean politics.
6. Greater cooperation between alumni, students, and faculty in bringing athletics to K. S. A. C.
7. Remodeling of the auditorium stage.

SHOULD THE FLUNKERS BE FINED?

Like serge dresses, winter suits, hats, and sugar, the matriculation fee has taken a boom upward this fall. This raise was necessitated by the increased running expenses of the college and because the legislature has not granted any increased amount of money for its maintenance.

The students have seen the reason for the action and have accepted the new rates with no other manifestation than a mere shrug of the shoulders, for the cost of living has increased in so many other lines that the raise in fees came as no novelty.

The burden falls on all alike. Those who waste the money spent on them pay the same sum as those who do the work expected of them as students.

The Massachusetts School of Technology seems to have introduced a system that is fair. All students who flunk in a subject are fined five dollars, this amount going into the general fund. If this method were applied here it would help conditions somewhat, though it might not reduce fees to any appreciable extent. Yet those students who aid in running up the expenses of the institution without learning anything would have to pay additional.

Not only would it be interesting to watch the financial results, but to see if the psychological axiom, "Punish bad deeds and reward good ones" would aid in bringing the delinquent students up to standard.

STUDY—AND GET STUNG!

Take the reserve room with open screenless window, a warm night, a dull reference book, an indefinite quantity of mosquitoes buzzing about, and an Aggie student. Find the result.

This is the proposition which has been confronting students of a serious turn of mind who have been earnestly trying to get a right start and keep up on readings assigned in reference books. Such students find that the singing of numerous mosquitoes, the wonder as to whether it is you or your neighbor that the mosquito has picked out as a tasty looking morsel, and finally the realization of whom has been selected, all fall a long way short of being conducive to study.

The serious minded student, as he trots homeward at 9 o'clock is likely to find himself much more impressed by mosquito bites than by the material in the library reference books and he is apt to be rather touchy concerning reserve rooms with screenless windows.

JANITORS MAY BECOME SPEED COPS

A Nearford squawks out its approach, a Hudson six with the exhaust open purrs by, a pop pop living up to its name dashes madly along the drive, a Dodge with a new klaxon horn makes itself known to the college world.

The professor frowns, pauses a moment till there is a lull in the confusion of noises and then again tries to make himself heard above the rumble and clatter of discordant sounds floating into the class room window.

Now, this is not any one particular incident, for this is an hourly, yes even semi-hourly occurrence. Just ask the professors who teach in Anderson hall, or any of the buildings bordering the main drive, what they think of the speed demons. Well, they will tell you that they are one of the biggest pests on the Aggie campus. Some mornings it is almost impossible for the professors to carry on classes in a number of the buildings, because of the never ending honking, chugging, grinding, and purring of the speed wagons.

It is nice for those who have cars and don't have classes, but what about those who have classes and no cars? Will it end by the Aggie janitors having to become speed cops?

At the rate things are going,—automobiles that is—it will not be long before the S. S. G. A. will have to turn its attention to campus speed regulations.

The useless noise on the K. S. A. C. campus is becoming a public nuisance. Every man with a cast away Ford built over to resemble a racer, puts on all the speed possible, and opens the car to the limit, when he dashes over the campus.

The only reason for this hullabaloo of noise, is that John Jones or some other such thoughtless Aggie wants the student world to crane its neck and gaze with envy at the noisy Bear Cat, Nearford, or what not.

In plain college English the reason for this useless racket is that some ambitious student wants to advertise, he wants the campus to see that he is of the upper crust in college society. Yes, any journalist will admit that it pays to advertise, but the college authorities are adverse to the plan of the car owning student appropriating free space on the campus drives to put across his fall advertising campaign. Anyhow so much noise is hard on the ears and on the rubbernecks of the poor carless majority.

POLITICAL DOPE AND CLUBS

"Nothing but dirty politics" is the common expression when someone speaks of the difference between the planks of the Democratic and Republican parties. The same words are emitted when the S. S. G. A. or the student council is mentioned.

Politics are dirty only when the wrong people stand behind the platforms and it is the educated people, such as the college produces, who should take an active part in politics. It is a safe wager that less than 50 per cent of the K. S. A. C. students know that the League of Nations is practically the only plank difference in the two big parties this year. The Democrats are for the League as Wilson wrote it while the Republicans stand for a world organization, similar to the League of Nations but with certain reservations.

Political clubs should be formed in the college. Alignment with some political party is not essentially necessary for the majority of the students, but it is of great benefit to them to belong to at least some organization where the fundamental principles—and they are the same in all parties—can be taught to the future political and industrial leaders of the country.

One college man in K. S. A. C. has already expressed the desire to organize a Republican club here. To mix in politics does not require that a man or woman make stump speeches, or circulate literature in behalf of his party, but it does mean that they are interested enough to learn something of the workings of political parties, to hobnob with them just enough to grow familiar with the working machine of our political system.

For instance all Kansas should know why an unknown man, uneducated and recently released from the state hospital, should draw 40,000 votes against Governor Allen in the state gubernatorial contest. The Industrial Court, which Allen stands for, explains the entire situation.

It will not be long until the men and women, now in college, will be the political leaders and industrial leaders, therefore they should not slight their education along these lines. An intelligent voter is a big asset to the country. College is a good place to make a start.

STAFF MEMBERS NOW APPROVED

ELIZABETH DICKENS IS ASSOC.
LATE EDITOR

All Staff Elected Worked on Collegian
Last Year. Two Places Still
To Be Filled

The Collegian board met Tuesday afternoon and officially approved a part of the Collegian staff selected by the editor, Miss Clementine Padelford. The staff chosen is as follows: Elizabeth Dickens, associate editor; Morse Salisbury, sport editor; Susan Carmody, feature editor; C. R. Smith, exchange editor; Don Ballou, art editor.

All of the staff selected worked on the Collegian last year. Miss Dickens, worked on the Collegian as exchange editor and as society editor, and has also had newspaper experience on the Manhattan papers. Mr. Salisbury conducted a column in last year's Collegian and has had considerable experience writing sport for various Kansas papers. Miss Carmody, who was feature editor of the Collegian last semester, will be remembered, in addition to the various features she conducted, as the director of the Aggie Press club stunt, which won first prize at the Aggie Pop night last year. Mr. Smith has done reportorial work on the Collegian, winning first prize for getting the most inches in the Collegian during the second semester of last year. Mr. Ballou has done considerable cartoon work for the Brown Bull, the Sigma Delta Chi magazine which was issued last spring. He was exchange editor of the Collegian the second semester of last year.

The society editor and the assistant sport editor who will have charge of girls' athletics have as yet not been decided upon by the board. These two places, however, will be filled within the next week.

SOUTH AFRICAN STUDENT TAKING GRADUATE WORK

Not Satisfied with Agriculture as Taught at Cornell

Additional evidence that the fame of K. S. A. C. as an agricultural college is more than local, is world wide in fact, is the presence this semester of M. G. Stahl of Capetown, South Africa, who is taking graduate work in the department of agronomy here.

Stahl is a graduate of the University of Capetown, having acquired a B. S. in agriculture at that institution. He attended Cornell university for some months after arriving in this country, but was dissatisfied with the opportunities offered at that place to carry on graduate work in agriculture, and after looking over the field decided to come to Manhattan.

He expects to receive his master's degree next spring.

DAY AND NIGHT SCHOOL AT THE MANHATTAN BUSINESS COLLEGE

Enroll now for the fall term. Get a thorough business training in an up-to-the-minute School of Business.

Thorough courses are offered in—Commercial, Shorthand, Civil Service, Penmanship, Bookkeeping, Banking, English, Court Reporting, Salesmanship and Business Efficiency, Adding and Listing Machines, Secretarial, and Commercial Teaching.

Shorthand, Bookkeeping, Bookkeeping, and Business English and Correspondence are taught by mail.

For information phone 64, or address L. W. Nutter, President, Manhattan Business College. 2-4.

IS ONE OF BEST PRINTING DEPARTMENTS IN THE WEST

Over 2,300,000 Impressions Made
Last Year

It may be interesting to students of K. S. A. C. to know that the printing department of the college is one of the largest and best equipped printing departments of the middle-west. The department was established in 1874 by J. A. Anderson, then president of the college.

At that time the department was very small and employed only one or two men and a small amount of student help. Since that time the department has grown until now there are sixteen employees on the regular payroll. A large amount of student help is also used. Last year over 2,300,000 impressions were made.

The department was first located in the basement of Anderson hall but later was moved to Kedzie hall where it is now located.

Publicity

I know a great star in the movies Who hasn't a thought in his dome. Aside from his face he's a typical case

That we label as "Nobody home." But he's rated all over the nation As a thoughtful and scholarly man;

For a star of the screen needn't work with his bean As long as his press agent can.

A certain old Dean of the Drama Is known as a patron of art. He says he was pals with Millet and Franz Hals

And gave Titian and Corot their start. But he only talks that way in private;

The public believes he is hep To Rubens, Van Dyke and Dore and the like. For his press agent gave him his rep.

The lad who can get a position To boost for a Thespian boss. Must furnish him stuff that will serve for a bluff.

For that is what puts 'em across. And we frankly believe that the drama

Would be even more of a rage. And score a real hit, if the actors would quit.

And the press agents went on the stage.

—By James J. Montague.

Phil Russell and Byron Dudley of Kansas City were guests at the Sigma Nu house last week.

Henry Enns of Kansas City and Edward Nellis of Topeka spent last week at the Beta house.

Guests last week at the Sigma Alpha Epsilon house were J. C. Snapp, Joe Cool, Giles Sullivan, Charles Church, Joe Williams, and James Kugler.

Fred Boyd, who attended Oklahoma A. and M. college last year, has re-entered school here.

Prof. J. G. Emerson, head of the public speaking department, was unable to meet his classes in extemporaneous speaking last week, because of illness.

W. K. Charles, a member of the class of '20, spent the week end visiting his brother, Eugene, who is enrolled in Industrial Journalism.

Prof. H. W. Davis of the English department, who is president of the Kansas Association of Teachers of English is now arranging a program for the annual convention of English teachers to be held in Topeka in connection with the State Teachers' association in October.

Walter Shady, prominent business man of Manhattan, is the new head of the auto repair shops. Mr. Shady leaves his downtown garage in charge of a manager. He proposes to make the auto repair shops pay their own expenses this year.

Mrs. Lura Keith, formerly of Council Grove, has accepted a position in the office of Prof. W. W. Carlson, head of the department of shop practice. Mrs. Keith took up her duties September 13.

Miss Alfreda Honeywell and Miss Ruth Dalton are teaching this winter at Jenks, Okla.

Mr. and Mrs. B. D. Whitehead of Abilene, spent Sunday at the Kappa Kappa Gamma house with their daughter, Maude Irene.

Fred Stevenson of Salina, and Henry Enns of Kansas City, spent the week end at the Beta Theta Pi house. Mr. Enns, who graduated from industrial journalism with the class of '20, is now the advertising manager of the Farm Journal at Kansas City.

Miss Katherine Kinman spent the week end at the Pi Beta Phi house. Miss Kinman is teaching public school music this winter at Nickerson.

Miss Corrinne Richards of Kansas City, spent last week end at the

K. S. A. C. Boasts of Dozens of Popular Profs. But Here Are a Few of the Choice Favorites

At times it is rather hard to say who is who at K. S. A. C., for the popular favor rests first on one and then on another of these superhumans that some call faculty members. Last year Dr. H. H. King won the professor popularity contest, but this year the school is kneeling at the feet of "Mike" Ahearn. By Christmas the Aggies may be standing in admiring circles around the desk of some feminine English teacher. So it goes and one can't say for sure and certain just who is who around this school. However there are some 12 or 15 profs. that at least should receive honorable mention in the Who's Who Column.

Now some of these popular profs. refuse to pose for the picture man, but the Collegian is going to give them a little publicity even if they won't let us use their pictures for publication.

At the head of the stairs in Kedzie hall, where the odor of baked beans and boiled cabbage is always evident, is the office of a sleek haired, neatly groomed professor who watches over the college careers of the pen pushers: Prof. N. A. Crawford, head of the department of industrial journalism, is a man who is for the students who mean business. You can no more fool him than you can make a dollar look like two, but if you show him that you're in the school game to get out all the good there is in it, as well as to give all the good you can, he will back you to the limit.

Miss Jessie Machir, registrar, is known among the new students as the lady that smiles. Miss Machir helps the new students in and the old students out. Her word, backed by the grade sheet compilations, is law. She is the keeper of our credits and flunks. She has each and every Aggie tabulated in the book of records. She even has their ages and phone numbers. Well, you just bet Miss Machir is one of the Who's Who people.

Most of the Aggie Profs. have to live up to their reputations, but Prof. Albert Dickens, head of the horticulture department has to live his down. For in addition to his horticultural duties he is, all against his will, chairman of the college discipline committee. Professor Dickens' perpetual smile leads one to believe that although he does have to come in contact with the "campus criminals," he has not lost his optimism.

Prof. J. W. Searson, head of the K. S. A. C. English department, is commander in chief of the rank and file of Aggie freshmen who live and learn and suffer through college rhetoric. Professor Searson is a member of the discipline committee too, and he tries sometimes to assume a dignity fitting his position.

But there's a little twinkle lurking in his eye that belies him, don't you think?

Prof. C. E. Rogers, who is the guiding star of all the young scribblers, is a man of whom it is hard to choose the nicest things to say because there are so many. Known in the newspaper world of New York city as "Chick" Rogers he has come to K. S. A. C. as assistant professor of journalism without having lost the oldtime pep which earned for him such a kittenish nickname. Rogers

is a man who knows his stuff and he has a generous friendly way of passing it on to students. His chief interest in life outside the journalism department is Baby Bill and the missus and if you knew them you'd feel the same way about it.

"Chemistry" King some of us call him, but his official title is "Doctor." Either way he's a regular fellow and the student who spends a year on this campus without having made friends with the smiling man who was acclaimed the best scout on the

faculty last year has missed one of the nicest things possible in college life. Doctor King is a living example that it is possible to get an E in chemistry and still be able to sit up and take notice.

An introduction to "Mike" Ahearn is a tradition rather than a necessity. A constant source of wonder to Aggie audiences are the stories told on "Mike". The number is second only to those told by the new director in his various chapel addresses, and both supplies are apparently inexhaustible. Every student at K. S. A. C. knows Professor Ahearn before he has been on the campus a week, and if "Mike" doesn't know all the students, he at least manages to grin at them all.

Professor Dean, the man whom the farmers are always glad to see coming. Why? Because he tells them how to kill all of the bugs that ruin the corn and alfalfa. Every bug and worm in the country is afraid of him, but the students are not.

E. L. Holton, the professor who has stood by the students at K. S. A. C. for the last 10 years, and was a friend to the "boys over there." He is interested in democracy, education, and you.

"Andy said so" nearly any sheep man in Kansas is likely to tell you when an argument arises over any point in the business of raising the fleecy brutes. They know "Andy" is the last word on sheep. In the K. S. A. C. catalog, pp. 14, 42, 107, and 111 you may find the dry details of his interesting career. The name and title in full reads Andrew Minie Paterson, B. S., associate professor of animal husbandry.

J. O. Hamilton, professor of physics, from the title of his department would seem the last man to be entered in a popularity race. The very mention of physics is enough to send an engineering, general science, home economics, or agriculture student to his room with low fever, mumbling inarticulate imprecations. However, Professor Hamilton is popular in spite of his association with the phy-

Campus Kitten Has Fit—But What Ails the Dainty Co-ed?

Over in Main hall they are glad that college began. They like the excitement, they say—for the only exciting event that happened at college during the whole of summer school was when the campus kitten had a fit. At least it was the campus kitten until it had the fit. After that it went the way that is popularly prescribed for kittens addicted to fits.

It was down in the canteen one morning that the kitten made its debut fit. There was one lone maiden besides the waitress, eating a late breakfast. The maiden was so absorbed in her breakfast that she took no note of the cat until it had been skimming around the room for some time. Then with a scream and a horrified thought of hydrophobia, she jumped to the table, screaming to the waitress to follow her example. But a short inspection of the room revealed the fact that the waitress had chosen the stairs as the better part of valor and had vanished.

What the summer school co-ed endured while perched on the table, wildly kicking the chairs away so that the cat couldn't reach her, will never be known. She says the time seemed five years, but adds on second thought that it might have been five minutes that she was perched there.

Finally the cat left the canteen and the co-ed ventured forth, taking the steps upstairs three at a time. Her toe hit the last step in the wrong place, and she went sprawling out into the hall where students were hurrying from one class to another. Sprawling on the floor, almost too dazed to arise, the girl saw something gray moving swiftly toward her (the cat had been gray). With a truly Commanche yell the "cat-pursued-one" fled up the stairs just in time to see a very embarrassed man with a pair of gray shoes, looking very hard into the recreation hall, and trying hard to look unconcerned.

That episode in itself was enough to ruin the poor kitten's reputation, but young Miss Puss didn't stop there. No! The kitten (at least so it is rumored) never stopped until she got into the registrar's office and turned a double somersault, nearly ruining a grade compilation. After that there was nothing much left in Miss Kitten's career but a funeral march and a few silent tears shed by the janitor.

Velda Stewart, graduate in the division of home economics, '20, is instructor in domestic science and art in the rural high school at Riley. Paul Jenkins, who attended school here last year, left Tuesday for Lin-

coln where he will enrol in the commercial course of the University of Nebraska.

Miss Aleph Christman and Miss Laura Eagleston returned to their homes in Wichita, Wednesday, having spent the past week at the Alpha Delta Pi house.

The class of descriptive drawing of the engineering division is now conducted in A80. This room is known as the "attic." The increased enrolment of the freshmen has made it necessary to use this room.

Mrs. Ruth Adams Skinner, '16, who has been spending some time this summer at the home of her mother at 1527 Leavenworth, left Manhattan September 14 for her home in southern Cuba. Captain Skinner has been in Cuba in the service of the marines for nearly three years. His term expires next spring, and he and Mrs. Skinner are planning to return to Kansas at that time.

Leo C. Moser, '18, now associate editor of the Iowa Homestead, was in Manhattan this week attending the meeting of the Midwest Association of State Farm bureaus.

Word was recently received that Bagdazar K. Baghdigian is now secretary of the Iowa Chamber of Commerce at Iowa.

Fall Models in the Limelight

The fall models of Society Brand Clothes are being shown here now.

And the showing of suits and coats makes us feel just about as proud as a young man feels when "her father" sizes him up and says "I'm for you, my boy."

To those who are not familiar with Society Brand Clothes a surprise is in store at the faultless tailoring and excellent designs. They're tailored thruout, not merely fine examples of all wool fabrics.

There is nothing flowery about that statement, because Society Brand Clothes have a dignified yet youthful appearance, that is obtainable only by the highest class of tailoring.

You will like the new models. They are without fancy details, but strong on fit.

SOCIETY

Phi Beta Phi announce the pledging of Miss Margaret Hamilton of Kansas City, Mo.

Sigma Phi Epsilon announces the pledging of Mr. Dale Carmen of Valley Falls, sophomore in agriculture.

Alpha Psi announces the pledging of Mr. Elder E. Leasure of Solomon, who is a sophomore in veterinary medicine.

The Kappa Sigma fraternity announces the pledging of Eugene F. Hudson of Winfield, freshman in civil engineering.

The Womens' auxiliary of the American Legion gave a party for the wives of vocational men at the home of Mrs. H. W. Brewer, 805 Poyntz, Monday evening, September 20.

Iota Psi wishes to announce the pledging of Miss Alyce Carter of Mound City, Mo., sophomore in the department of music, and Miss Bertha Falconer of El Dorado, a freshman in home economics.

Members of the Pierce-Keller post of the American Legion held a smoker Monday evening at the community house. An army recruiting officer was present and received applications for the Victory Medal which is to be issued to ex-service men.

The Eurodelphian literary society held open-house last Saturday afternoon, at which an interesting program was given. During the social hour, which followed the program, punch and wafers were served. Tomorrow afternoon at 3 o'clock they will hold open-house again, at which visitors will be welcome.

Miss Ethel Roop and Mr. Dan McIntire were married June 9, at the home of the bride's parents at Wakefield. Mrs. McIntire attended K. S. A. C. last year. She was a member of the Delta Zeta sorority. After a motor trip to Colorado, Mr. and Mrs. McIntire returned to Wakefield where Mr. McIntire is a banker.

A joint meeting of the Athenian-Browning literary societies will be held next Saturday evening in the society hall. When a member of either of these societies marries, it

is an old custom that he be required to furnish grape juice for the society. Those responsible for the grape juice this time are Mr. Ivan White and Mrs. Helen (Mitchell) White. Besides disposing of the

grape juice the meeting will serve to renew old acquaintances. Word has been received of the marriage of Miss Martha Livingston Denny to Mr. Harold Arthur Pratt which took place at Worcester,

Mass., September 11. Both Mr. and Mrs. Pratt were instructors in this college last year. Mrs. Pratt was assistant instructor in the department of zoology and Mr. Pratt was assistant instructor in the department of horticulture. Mr. Pratt is now an instructor at Cornell.

The Acacia fraternity announce the pledging of John Frey, Manhattan; Charles Ewing, Olathe; Earl J. McWilliams, Alta Vista.

RAY WATSON GLAD TO BE HOME AGAIN

**SAYS NO PLACE IN ALL EUROPE
LIKE K. S. A. C.**

HE TOURS BATTLEFIELD REGIONS

**Food Poor at First—Weather at
Olympiad Far from Ideal—In-
sufficient Training Provided
American Entries on
Way Over**

"There's no place like the old U. S. A., any part of it, and more especially there's no place like K. S. A. C. in the whole of Europe." These are the sentiments of Ray Watson as expressed on his arrival in Manhattan on Saturday morning. He had just returned from the Olympic games and a sightseeing trip thru France, Belgium and England but one could tell from the famous Watson smile that he meant every word of his rather comprehensive statement as to the comparative merits of Kansas state and other parts of this mundane sphere.

Ray has been away since the first part of August when he went to New York to compete in the tryouts for the steeple chase section of the American Olympic team. From New York he went to Boston where he entered the competition for the right to represent America in the 1,500 meter run. How he won a place on the steeple chase team at New York, but lost his race at Boston on account of a pair of warped track shoes has been told. While at Boston he had a visit with Seibert Fairman, class of '19, who is with the General Electric company at Lynn, Mass.

Food Poor at First
When he was questioned as to the treatment accorded the athletes on the trip across and after their arrival Ray stated that he had not much to say. He said that not sufficient opportunity for training was afforded the American entries on the transport which took them over and that the food given them at first was not of the usual quality given athletes in training. At that time the food was furnished by Belgians. Afterward the American army took over the feeding of the Americans and conditions were better.

The weather during the whole of the period during which the Olympiad was held was far from ideal. On the day in which Ray ran in the steeple chase finals the mercury stood between 40 and 45 degrees above zero. He tripped on the third water hazard and was completely immersed in the cold water. As a consequence he was completely chilled and was unable to regain his place with the leaders of the race which he had held when he tripped.

Tours Battlefields

After the Olympiad was completed Ray went to Paris and from there on a tour of the battlefield region of France after which he went to London where the Anglo American games were held. He stayed there for nine days during which time he was a guest together with other Americans, of the Achilles club, an athletic organization.

"We were treated like princes of the blood by the Londoners. We were dined and (whisper) wined in a regal fashion. No one could ask for better fare or treatment than we received in the British metropolis." That was Ray's statement concerning his stay in the "right little, tight little island".

It would seem from Ray's conversation that, while there may be some doubt as to the "right little" part of the above, there is absolutely no room for surmise concerning the "tight" section. At least if there is, it is not because of lack of opportunity for becoming tight, or, as our British cousins have it, "blotto," "whiffed," "paralyzed." One surmised that some of the Americans took full advantage of opportunities afforded while in England and even laid in a small supply of wet goods against the long drouth that has set in upon these United States.

Is In Splendid Condition

Ray is back here with a new vim and vigor for his senior year at K. S. A. C. He is still as hard a booster as he ever was for the Aggies. In fact, he is measurably more enthusiastic than he was last year. Those who knew Ray last year know that that's saying a mouthful. He is in splendid condition, having rested himself on his trip back on the Red Star liner "Lapland" and Aggie track fans will be greatly disappointed if some new records in the distance events are not set in the Valley meets during both the indoor and outdoor seasons.

High School Y. W. Girls Coming

Miss Irene M. Dean has received word that the State High School Y. W. C. A. conference will be held at the community house November 19 to 21. The college girls will help in entertaining the delegates and will show them over the campus. Miss Dean and Miss Marcia Seeber will give addresses of welcome to the girls.

Band Instruments Arrive

The new instruments for the college military band have arrived. This is the first year that the instruments have been supplied by the government. Prof. H. P. Wheeler, who will direct the band, said, after inspecting the instruments, that they are the best government-provided instruments which have come under his notice, including those of perhaps 20 bands overseas. There are 40 pieces in the shipment received.

ENGINEERS WILL PRINT MAGAZINE

**PAPER WILL APPEAR FOUR
TIMES DURING YEAR**

**Two Issues To Appear Before Christ-
mas—Morton Stigers Editor—
Lloyd Zimmerman Subscription
Manager**

"K. S. A. C. Engineer," a magazine devoted to the interests of the engineering students will appear four times this year instead of two times as in former years. Two issues of the magazine will appear before Christmas and two issues during the spring semester.

It is the purpose of the magazine to promote the interests of the engineering students and to keep them in touch with the engineering alumni. At the same time it will be a means by which the alumni of the college will be able to see what the engineering department is doing.

At a meeting Thursday afternoon the engineers elected Morton Stigers as editor in chief of the magazine and Lloyd Zimmerman as subscription manager. It is planned that the first edition will comprise two thousand copies and this edition will come off the press on October 15 or as near that date as possible.

The subscription price of the magazine will be \$1.00 for the school year or 75 cents for one semester. All students of the college are urged to subscribe for the magazine as it will contain material which will be of interest, not only to the engineers of the college, but to the general public as well.

S. S. G. A. TO NOMINATE HEAD

**WILL HOLD MEETING TOMOR-
ROW IN AUDITORIUM**

**All Classes Will Be Dismissed—
Only Association Members to Be
Present**

The first meeting of the Students' Self Governing association will be held Wednesday morning from 10:15 to 11:15 in the college auditorium for the purpose of securing nominees for the office of president and vice president of the association.

All of the college classes will be dismissed for the meeting but only those who are members of the association will be allowed in the meeting. All members who expect to attend the meeting must have their fee receipt to show at the door of the auditorium, for admittance.

In addition to the selection of nominees the time for the election will be set at this meeting.

PROFESSOR CALL MAKES TRIP OVER SOUTHWESTERN KANSAS

**Works in Conjunction with G. S.
Knapp, State Irrigation
Engineer**

Prof. L. E. Call of the agronomy department, left last week to visit the Garden City experiment station where he will inspect the experimental work in progress. At Garden City he was joined by G. S. Knapp, state irrigation engineer, who accompanied Professor Call on a week's automobile trip in the counties in the southwestern part of the state.

Mr. Knapp and Professor Call gave special attention to problems of irrigation and dry farming. Professor Call also inspected several fields of grain sorghum for the Kansas Crop Improvement association.

After the field inspection work has been completed, a seed list will be published, showing the exact condition of the seed offered for sale, as

to purity, trueness to type of the variety, freedom from mixtures or hybrids, smut and other objectionable characteristics.

New Instructor Comes

The latest addition to the faculty of the physics department is Mr. L. W. Hartel. Mr. Hartel came from Liberty, Mo., where he has been engaged in government highway work. He is a graduate of the Missouri university, and has taken post graduate work in Vanderbilt university at Nashville, Tenn.

PEP MEETING FRIDAY NIGHT

**MIXER AND DANCE WILL BE
HELD IN GYM**

**Pepstir Will Not Last Later Than 9
O'clock—Very Little Wind to Be
Expend in Speech Making**

The first big all college affair of the year will be the pep meeting and mixer to be held Friday evening. At 7:30 sharp every loyal Aggie of every class and division will meet at the auditorium ready to contribute both lungs and at least two or three vocal cords to the cause of Aggie athletics. Following the pep meeting a big mixer and a dance will be held in the Nichols gymnasium to which all alumni, faculty, and students, date or no date, are invited.

According to Mike Ahearn the pep meetings this year are to excel in quality rather than in quantity. There will probably be but three all year, but these three will surpass in pep everything previously staged by Aggie students. Very little wind is to be expended in speech making but an unlimited outlet will be provided for yelling and singing.

In order not to conflict with the all school mixer, the pep meeting will not last longer than 9 o'clock. Many special features are to make the mixer this year one of the bigger and better affairs for which K. S. A. C. is famous. Plenty of entertainment is going to be provided for both those who dance and for those who do not. The entertainment for those who do not dance will be staged in the literary society rooms in order to avoid over crowding the dance floor. A six piece orchestra is to furnish music for the dancers. Refreshments are to be served at all hours of the evening.

According to members of the social committee of S. S. G. A. in charge of the affair, the mixer is to be the snappiest affair in K. S. A. C. history. The faculty members of the institution are solidly behind the party and are planning to turn out 100 per cent strong to get acquainted with the Aggies, new and old.

Harold Snell, '17, visited for a few days in Manhattan before going to Chicago where he will enter the Art Institute.

W. W. Carlson, professor of shop practice, was in Indianapolis a few days ago to secure additional equipment for the shops.

Wayland Dunham, who attended school here last year, is now doing inspection work for the Kansas Fire Insurance bureau.

Miss Carolyn Lear is teaching home economics in the Hutchinson high school.

Miss Esther Folsom who has been a guest at the Delta Delta Delta house left Thursday for her home in Diamond, Okla.

"Crool" Parents and Blighted Love Make Seven-Reel Aggie Melodrama

All because the actress for whom he had "fallen" in the usual prescribed method was exported to Australia by his "crool" parents, V. H. M. Russel of Vancouver, B. C., left home and announced his intention of attending K. S. A. C.

Now young Russel's mother is near death and a search for the boy is being carried on by Captain F. H. Becker, just released from the British royal air force, to whom Russel confided his intention of entering K. S. A. C. Becker made the trip from London to Manhattan for the express purpose of finding the boy.

No V. H. M. Russel is registered in K. S. A. C. but Becker is sure that his friend is travelling under an assumed name. Each day finds Captain Becker carefully scanning the faces of the Aggie student body, but so far his search has been of no avail. The young Canadian left home two years ago, infuriated by the action of his parents, and declared his intention of never returning. As Russel's father is a man of wealth and position in Canada the boy soon left the Dominion fearing that too much effort was being exerted to secure his return. It was fourteen months ago that Becker received a letter from Russel stating his intention of attending K. S. A. C.

The scene for the seven reel "melodrama" is all set, and 2,000 Aggie students are perfectly willing to act as extras. If the Hero will please step forward the camera man can get to work without further delay.

VET UNIT OF R. O. T. C. TO BE PUT HERE

**FIRST COLLEGE IN THE U. S. TO
BE GRANTED UNIT**

PAY STUDENTS \$16.00 A MONTH

**Veterinary Units Also Placed in
State Agricultural Colleges
Colleges of New York,
Ohio and Iowa**

Veterinary units of the R. O. T. C. have been established at four land grant colleges, the first being the Kansas State Agricultural college, according to notification received today by R. R. Dykstra, dean of the veterinary division of the college, from the surgeon general of the army. The state agricultural colleges of New York, Ohio, and Iowa are the other three schools in which veterinary units will be placed.

Authority for establishing these units was granted in an amendment to the National defence act which was approved last June. Students who satisfactorily complete the required training in a veterinary unit will be, upon graduation, commissioned in the veterinary section of the Officers' Reserve corps, according to provisions of the amendment.

Lieutenant Brower in Charge

Lieutenant George W. Brower of Fort Bliss, Tex., will be in charge of the K. S. A. C. unit. Lieutenant Brower has been in the army since 1916 and has spent a considerable part of this time in the Philippine Islands. Lieutenant Brower will give specialized instruction in veterinary medicine as it relates to the army.

"The great need for a trained nucleus of reserve veterinary officers was demonstrated during the late war," a statement from the surgeon general's office says. "It is believed that the preliminary training in colleges as now provided by law will prevent the recurrence of such conditions."

Pay \$16 a Month

The veterinary unit is to be in two sections as in the case of other R. O. T. C. units. The last two years, or advanced course, will be elective. Pay at the rate of \$16 a month is provided for students enrolled in it. A summer camp which will be optional with basic course students but compulsory with advanced students, is to be conducted every year, probably at Carlyle, Pa. Students attending this camp will receive pay at the rate of \$1 a day and all living expenses while in attendance.

Miss Lois Edmundson of Kansas City was a week end guest at the Chi Omega house.

Richard Hartigan of Fairbury, Nebr., went home over the week end.

Fred Fisher, a student here last year, returned to his home in Overbrook after spending a week at the college.

Reiner Kaegyn of Ellis spent several days visiting at K. S. A. C. He was a student here last year and will be back in school next semester.

Prof. Albert Dickens will leave for Topeka tomorrow on business.

Ask For New Unit

Major F. B. Terrell, commandant of the military department, left Saturday, September 25, for Topeka, to confer with the Adjutant General of Kansas regarding the establishing of a National Guard unit at Manhattan. George Humphreys, ex-captain in the A. E. F., and vocational student at the college, and M. Stiger, senior in the military department, accompanied the commandant.

Journalism Bulletin Published

The fourth volume of the industrial journalism series of the Kansas State Agricultural college bulletin has just been published. The material of the bulletin is an address given last year by J. C. Mohler, secretary of the Kansas state board of agriculture, before the department of industrial journalism of the Kansas State Agricultural college. N. A. Crawford, head of the department of journalism edited the bulletin.

C. E. Reid, professor of electrical engineering, went to Americus last week to assist the council in letting a contract for a lighting system.

Miss Gladys Berger '19, spent the week end at her home, 1000 Bluemont. Miss Berger is teaching again this year at Simpson.

P. H. Virtanen, assistant in horticulture will leave for Dallas, Tex., October 1, where he will be an instructor in the commercial landscape gardening work.

PROFESSOR KENT TALKS TO BOYS

**GIVES FIRST VOCATIONAL GUID-
ANCE LECTURE AT Y. M.**

**Praises Agriculture as Vocation—
Tells Future Farmers to Serve
Apprenticeship**

"Agriculture as a Vocation" was the subject of the first lecture of the vocational guidance series of lectures offered by the Y. M. C. A. Thursday evening at the Y. M. C. A. building. Prof. H. L. Kent, superintendent of the Fort Hays experiment station being the speaker. Professor Kent emphasized the following important questions:

"What does the vocation have to offer in the way of advancement?"

"What are the living conditions?"

"Am I particularly fitted for the vocation?"

"Will I be happy?"

Professor Kent emphasized the fact that a college does not train a man vocationally, but that a college education is of a professional nature and upperclassmen should choose summer jobs or take jobs while in college that will give them the practical side of their chosen vocation.

"Serve your apprenticeship," Professor Kent said. "The man with actual experience is the man who can fill the bill. Whatever vocation you may choose, grasp every opportunity you can get to get all the actual experience you can as soon as you can."

Professor Kent especially called attention to the attractions of farm life. Modern conveniences are fast replacing the old laborious inconveniences on the farm. The trend of the people to the city is increasing the demand for farm products.

"The farmer must be a good business man," said the speaker. "He has great opportunities in business. He is manager, business man, and worker. He must market his crop and it is to his interest to help create a suitable market for it. There is an opportunity in agriculture."

MAY SELL BROWN BULLS AT K. U. FOOTBALL GAME

**Sigma Delta Chi Meets Tonight to
Start Definite Plans for Maga-
zine**

A meeting of Sigma Delta Chi, professional journalistic fraternity, will be held tonight at 5 o'clock in K55. The purpose of the meeting is to start definite plans for putting out the Brown Bull magazine in time to sell it at the K. U.-Aggie game. The magazine will be published four times during the year.

During the summer the Brown Bull had a great deal of advertising in Life, Judge, Topeka Capital, St. Louis Globe-Democrat, Kansas City Star, and other publications. Practically every college magazine with which the Brown Bull exchanges, has quoted the Aggie humorous book.

A number of cartoons have already been drawn for the first issue but many more are needed. There are several cartoonists in the college who can help out in drawing for the magazine and they are asked to be present at the meeting this evening at 5 o'clock.

Any one interested in writing for the magazine, woman or man, is welcome to attend the meeting.

BACHMAN IS PUTTING OLD FIGHT IN MEN

**HAVE HEAVY AND LIGHT BACK-
FIELD COMBINATIONS**

HUSTON BOOTING PIGSKIN AGAIN

**First Team Not Yet Chosen—Bach-
man Puts Men Through Foot-
ball A B C's—Line Is Shap-
ing Up Well**

"Keep your head up when you hit that line." "That's it, that fellow knew you hit him." "Rotten! Rotten! Your not playing tiddliwinks, you're practicing football!" These remarks or similar ones will greet the ears of the weary student who strolls out on Ahearn field to revive his jaded brain by watching his betters hit the dummy, the charging machine or the line.

Squad Have the "Old Fight"

Coach Bachman is instilling into his men the "old fight" so necessary to success in football. He is succeeding tremendously. The men are driven to their limit every night, and every night the limit seems to have been stretched a little over that of the previous sessions. One of the linemen was heard to remark, "Coach is all right but he has no sense of humor. His idea of the best joke going is to bite the ear off an opposing player."

First Team Not Chosen

The Varsity has been divided into five squads for scrimmage during the practice sessions of the last few days. The men are all trying hard to land within the elect circle of the first team and lively competition is had between the different practice elevens. It is too early as yet to predict a possible first team line-up, but some of the men are beginning to draw away from the field.

It looks as if it might be possible this year to have a backfield combination that has rarely been seen on an Aggie gridiron in recent years. This combination is a pair of backfields, one heavy bunch for line bucking and another light, fast trio for end runs and pass handling. The heavy men that are showing up as the best at line smashing are Goerke, Sears, and E. Cowell. The first two are 180 pound, and Blacksmith Cowell while not so heavy is as hard a hitter as they get. The logical men for a light, fast combination are Jack Evans, dash man on the track team, Heinie Hinds, and Brady Cowell.

With the two combinations outlined an Aggie coach could use the heavy trio to batter the enemy defenses with an off-tackle smash or straight line bucks until they become loggy, then send in the fast combination and run the opposing team off its feet. Heretofore Aggie backfields have been light in the main and no gains thru the line could be reckoned on with certainty.

Huston Out Again

Huston is out there booting the old pigskin with all the accuracy he displayed in '18 and '19. The Aggies need fear no punting duel with other Valley teams when Dewey's trusty toe is in reserve for any emergency. In case a touchdown is not to be had he can be depended upon for 3 points whenever the ball is within the enemy's 40 yard line. However, it looks as though he would not be depended upon so absolutely as he was last season to the detriment of ground-gaining ability.

Bachman Puts 'em Through

The line is shaping up well. It is receiving a thorough, grueling training in football ABC's from Coach Bachman. It is a pretty safe bet that no Aggie end who has smarted under his remarks so far is going to lose his wits so far as to be "sucked in" on end runs of the enemy. Nor will a lineman forget to "use his hands" on the offense after Bachman has peeled some of the hide from his self-complacency with his caustic remarks.

Mike Ahearn asks the students, co-eds and all not to forget the Wednesday afternoon football seminar. The invitation is general and all-embracing to every Aggie, prof, or student, to come out, watch the team, cheer them on, and boost a little.

Have Seven Milling Products

Prof. L. A. Fitz, head of the milling department, gave out the statement that the K. S. A. C. milling department is now able to serve the public with the seven milling industry products, Aggie's Best flour, College K Brand flour, graham flour, corn meal, breakfast grits, and cracked wheat. Orders of 10 pounds or over are delivered.

TUESDAY, SEPTEMBER 28, 1920.

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Make the "Beat K. U." slogan a reality.
4. Aggies at the top of conference athletics by 1922.
5. Clean politics.
6. Greater cooperation between alumni, students, and faculty in bringing athletics to K. S. A. C.
7. Remodeling of the auditorium stage.

BULLETIN BOARDS WILL TELL YOU

Watch the bulletin boards! They are the silent "town criers" of the college. All that happens on the hill will be there. There are four large bulletin boards on the campus. One is at the meeting of the walks leading from the east entrances. Another is at the south gate and there is one at each end of Anderson hall. Bulletin boards of the literary societies and of the military department are located in Anderson hall. Glance at these boards each time you pass and keep up with life on the hill.

CITIZEN OR SLACKER—WHICH

"Everybody knows more than anybody." So said the world's greatest apostle of democracy, Lincoln. That's an expression of the philosophy underlying the type of government America is attempting to work out. It is directly opposed to the theory of government based upon the divine right of kings, college faculties or any other special class.

Autocratic authority, administered from without, may be the best means of control for children, but there comes a time when we must put away childish ways. College students are not children. They are a selected group of young men and women with a high level of native ability and education. If self-government cannot succeed in a college we will have to admit that democracy is a failure, but no real American is ready to admit that.

The S. S. G. A. is a course of training for the duties of American citizenship. The man or woman who refuses to vote or tries to avoid paying his just share of taxes is called a slacker. By the same reasoning a student who refuses to join the S. S. G. A. and take an active part in self-government is a slacker. Let's have one hundred per cent citizens in K. S. A. C. and no slackers.

WOULD THIS WORK AT K. S. A. C.?

A movement is on foot at the University of Kansas and many other state universities to do away with freshman pledging to greek letter organizations. Such a ruling would be harmful to any one particular school, however, unless all the schools in the Valley would do the same.

The question of sophomore pledging is one that is being seriously considered everywhere, and now authorities at K. S. A. C. are advocating such an action. Authorities here say that there would be fewer misfits in the Greek letter world if a man or woman could not be pledged until he or she is a sophomore. The organization would have a big chance to judge the individual and the individual would have a chance to look over the fraternities.

It is also advocated that sophomore pledging would raise the grade standard, for students would try to make a good showing in their grades in order to make good in the eyes of the Greeks. It would promote athletics, student political work, journalistic work, and many other activities for the same reason.

Many of the fraternities and sororities argue that it would almost annul the organizations to force sophomore pledging, but the authorities still think that if all schools would enforce such a rule, no one institution would be affected. They also believe that it is up to K. S. A. C. to start the movement.

MUSIC FOR MOPEY AFTERNOON

What do you do—Aggie student—on Sunday afternoon? Isn't it generally a mopey time o' day, when you have nothing to do and nowhere to go? A lot of us find it so, anyhow, and here's a suggestion for a remedy.

Do you remember the band concerts of last year? Of course you do if you are an old student, and if you are a freshman you

probably have heard about them. We old students remember that the concerts were always on Friday or Saturday evenings, and that in the congestion of "date night" affairs, they almost got lost in the shuffle. Not that we didn't enjoy the concerts, for we did, but somehow there were just too many things to go to on Friday and Saturday.

Now why couldn't the concerts be given on Sunday afternoons? The landladies surely wouldn't object and after all, when Bluemont, Mount Prospect, and Wildcat have been explored, Sunday afternoon hikes aren't what they used to be. Cold weather is getting nearer too, and the price of shoe leather isn't quite what it was in the good old days either. Of course, we know of the state law against pay affairs on Sunday, but surely there is enough resourcefulness in the student body to get around that point. We all know that forty and fifty piece bands cannot derive their maintenance from ozone and ether, and they take up collections at church, don't they? Why couldn't the same method be employed at a Sunday afternoon concert?

Why can't we have band concerts on Sunday afternoon instead of on nights when we are all rushed to death? We don't know—but we would like to find out.

THE FRESHMEN MUST ORGANIZE

Just as an active interest in public affairs by all citizens and prospective citizens tends toward a wide awake and powerful government, so will a student's interest in all the affairs of his institution and his class make an active, strong school, or class in that school.

There are now nearly 800 freshmen in K. S. A. C. At present they stand apart from each other; 800 individual men and women. This incompact and unorganized group will have to buck three compact and organized classes that have learned to think and act as one person. To successfully hold its place the freshman class will have to combine in the same way, and this cannot be done if there are 800 disinterested students, or 600, or 300, or even 100. If the class is to be powerful every freshman in the school must take upon his own shoulders the responsibility of seeing that his class attains its rightful place.

There is always too much of a tendency for the majority of students to sit back and let the honored and energetic few run things. This not only leaves a hole big enough for the rank school politicians to jump thru and haul in their dirty work, but in time the rest of the class become as sheep, running without question whenever and wherever the bell calls.

The sense of responsibility that a student shows in college will mark his after career, and the drone in school will never be spoken of as a "live wire" in years to come. The freshman may fear making a mistake, and make mistakes he will, but that is to be expected, and each mistake really places the maker that much nearer the ultimate goal.

Ability isn't especially necessary; it is the willingness to do and to cooperate, and a sense of responsibility, that really count. Get into the game, freshies, and make your class a winner.

SCHEDULE MADE OF ASSEMBLIES

MUSIC DEPARTMENT WILL GIVE FOUR PROGRAMS

Nine Dates Left Open for Programs
to be Given by Student
Organizations

The schedule of assembly dates for the coming year has been worked out by Prof. J. E. Kammeyer. The schedule is as follows:

Tuesdays—September 28; October 5, 12; February 8, 15; March 1; Wednesdays—October 20, 27; November 3, 10; March 9, 16, 23, 30; Thursdays—November 18; December 2, 9, 16; April 7, 14, 21, 28; Fridays—January 7, 14, 21; February 4; May 6, 13, 20, 27.

A program by the music department is slated for October 27, December 9, March 1 and April 28. The following dates have been left open for programs to be given under the auspices of student organizations: September 21, October 20, November 18, December 16, January 14, February 15, March 18, April 21 and May 27.

Organizations desiring to take charge of a chapel program sometime during the year should make arrangements with Professor Kammeyer at once in regard to the matter.

She Is't Very Old But She Can Bake a Prize Winning Loaf

Lots of girls graduate from college without learning to bake bread, but not so with little Miss Stella May Heywood of Bennington, who with Miss Sylvia Barker and Miss Anna Rehberg visited K. S. A. C. last week.

In fact Stella May Heywood, who is the 14 year old sister of Austin Heywood, a freshman in the division of agriculture is the winner of the first prize for bread baking awarded at the Kansas state fair last week. The three girls attended the fair with their exhibits and because of the recognition of their work they are this week enjoying a visit to Sioux City, Iowa, representing their locality in the contest team of twelve wheat growing states. In the tryout at Sioux City the girls are working for a place which will send them to the big show at Chicago.

The three girls were greatly interested in K. S. A. C. and judging from their words of appreciation of the school they will all before long be active Aggie boosters. Little Miss Heywood well expressed the average Aggie's opinion when she said of the college cafeteria line:

"My! isn't it funny!"

Born to Mr. E. A. Herr, senior in agriculture, and Mrs. Elizabeth (Gish) Herr, '16, August 17, in Manhattan, a daughter, Laura Elizabeth.

FIVE NEW INSTRUCTORS IN ENGLISH DEPARTMENT

All Have Rank of Instructor Except
Mr. Matthews

New instructors in the English department this year number five, the new members being Miss Helen Rushfeldt, Miss Annabelle Garvey, Miss Anna May Sturmer, Miss Helen Eleock, and Mr. Charles Matthews. All have the rank of instructor with the exception of Mr. Matthews who is an assistant professor.

Miss Helen Rushfeldt, a graduate student of Columbia, who comes from Hawley, Minn., is teaching in College Rhetoric I and English I classes.

Miss Annabelle Garvey, a graduate student of Wesley college and the University of Kansas, is instructing college rhetoric classes. She has just returned from a year of travel in Europe where she spent a great deal of time in Constantinople investigating the United States trades commission.

Miss Anna May Sturmer, a graduate student of the University of Nebraska and an experienced teacher in the university, is teaching both college rhetoric and English literature classes.

Miss Helen Eleock, a graduate student of the University of Kansas and formerly teacher of English at Holton, is also teaching college rhetoric classes.

Assistant Professor Charles Matthews, a graduate student of the University of Chicago, is also a graduate of the Pittsburg Normal school at Pittsburg, Kansas.

Born to Mr. Fred Griffie, '19, and Mrs. Lois (Bellomy) Griffie, '17, July 20, in St. Paul, Minn., a son, Donald Gordon.

AGRONOMY DEPARTMENT IS AIDING KANSAS FARMERS

Work Consists of Experiments Conducted on Farms Over
State

An important service is being rendered the farmers of the state by the department of agronomy of K. S. A. C. through its work in cooperative experiments. This work is in charge of H. H. Laude, an alumnus of this college. The work consists of experiments in crops and fertilizers conducted on farms in all parts of the state. Mr. Laude explains that the experiments are purely cooperative, the farmers furnishing the land and the labor while the college furnishes the seed and does the threshing.

The department has just finished sending out wheat seed for the com-

ing year's tests. Ninety-five different tests are being made in the state for the purpose of determining the best adapted varieties for the different counties. In the central and western parts of the state the hard wheats are being tested while in the eastern counties only the soft wheats are tried out.

W. A. A. GETS NEWS FROM MANY OTHER ASSOCIATIONS

Each School in Central Conference
Sends Two Letters
Yearly

Miss Jessie Evans, president of the W. A. A., has received a number of W. A. A. news letters from various other athletic associations, members of the central conference of American college women.

Each school in the conference sends two letters a year, in November and March, to each of the other associations telling of its activities, social gatherings, and finance. At present there are twenty nine schools in the conference of the Central States and although the conference is a new association, it has gained much favorable comment already.

Dean Farrell To Speak
Dean F. D. Farrell has been asked to read a paper on the subject "Some Practices Which Help to Popularize Experiment Stations and Their Work" at the meeting of the American Association of Land Grant Colleges and Experiment Stations which is to be held at Springfield, Mass., October 20.

CLEVENGER COMMENTS ON THE VALLEY FOOTBALL PROSPECTS

Thinks Ames Will Prove Strongest
Tiger Opponent

In speaking of the arrival of Clevenger at Columbia and commenting on the football prospects for the coming season the Columbia Evening Missourian says:

"Clevenger seems to think as do many others who watch the valley teams that Ames will prove to be the strongest team the Tigers will meet this season.

"Ames will meet Kansas the week before they play Missouri, and the outcome of the Missouri-Ames game depends largely on the Ames-Kansas game. If Ames defeats Kansas they will probably beat Missouri; but if they lose to the Jayhawkers we will have an even break."

He also predicts the game between the Kansas Aggies and Missouri will be of great interest.

"With a number of old men back and some excellent new material, Missouri undoubtedly has a better team than last year, but we must not forget that the Aggies and other Valley teams will have a large number of old men on this season's lineup."

DAY AND NIGHT SCHOOL AT THE MANHATTAN BUSINESS COLLEGE

Enroll now for the fall term. Get a thorough business training in an up-to-the-minute School of Business.

Thorough courses are offered in—Commercial, Shorthand, Civil Service, Penmanship, Typewriting, Banking, English, Court Reporting, Salesmanship and Business Efficiency, Adding and Listing Machines, Secretarial, and Commercial Teaching.

Shorthand, Typewriting, Bookkeeping, and Business English and Correspondence are taught by mail.

For information phone 64, or address L. W. Nutter, President, Manhattan Business College. 2-4.

Need More In Class
It is hoped that some who can conveniently do so will enroll in the wireless class, offered Tuesday and Thursday, seventh hour, and Wednesday seventh and eighth hours. Bulletins giving further information will soon be posted in various places.

Shannon Brown, who was a sophomore in agriculture here last year, is now working in the Santa Fe offices in Topeka.

APPLES TO BE SOLD AT COST

OVER 100 BARRELS OF FRUIT ARRIVE TODAY

Is First Experiment of Faculty Members in Cooperative Buying — Buy Meat at Low Cost

One hundred and forty barrels of apples which are to be distributed to the faculty, cafeteria, fraternities, and boarding clubs at cost, arrived today from Leavenworth county.

Several members of the extension faculty arranged with I. N. Chapman, agricultural agent of Leavenworth county for the shipment of the fruit. The apples may be secured for \$8.00 per barrel which will be a saving of more than \$1.00 per bushel on this grade of apples. Over 100 barrels have already been sold.

This is the first experiment in cooperative buying that the members of the faculty have tried; however, they are now discussing the feasibility of buying several cases of government meat at a low price. A men's clothing club is also being considered.

ATHENIAN SOCIETY ELECTS OFFICERS FOR FALL TERM

R. S. Knox To Be President—R. W. McCall Is Vice President

The Athenian Literary society has elected the following officers for the fall semester: president, R. S. Knox; vice president, R. W. McCall; recording secretary, G. M. Brown; corresponding secretary, J. W. Barger; treasurer, R. H. Newkirk; critic, C. W. Howard; marshal, F. A. Swanson; assistant marshal, R. D. Hilery; chairman of board of directors, S. D. Capper; second member of board of directors, Vern Stanbaugh; third member of board of directors, A. B. Collum; chairman of program committee, A. J. Englund; second member of program committee, I. K. Landon; third member of program committee, V. V. Cool; prosecuting attorney, J. W. Barger; and junior member of intersociety council, C. H. Howe.

SORORITY USES BIPLANE TO AID IN FALL RUSHING

Kappas at K. U. Take Rushes Spinning Through Air
At last, according to the Univer-

sity Daily Kansan, like all warfare, the inter-sorority scraps at the beginning of the year have been taken to the air, and the "ultra" stage of "cushing" was begun when the Kappa Kappa Gamma sorority of K. U. hastened the decisions of several of their "rushes" by spinning them thru the air in a Handy-Page biplane. The Kansan does not state the possibility of the plane having been used as an instrument of terror rather than enjoyment, and the fact that the young ladies in issue may have been scared into their decisions by such commands as "get out and walk if you do not care to pledge."

SEVEN K. S. A. C. FACULTY MEMBERS IN "WHO'S WHO"

President, Three Deans, and Three Department Heads Listed by Book

Seven members of the State Agricultural college faculty are listed in the 1920-1921 "Who's Who in America," the standard reference work for biographical sketches of well known Americans.

The college professors listed are Dr. William M. Jardine, president; Dr. J. T. Willard, vice president and dean of general science; E. L. Holton, dean of the summer school and professor of education; Dr. Helen Bishop Thompson, dean of home economics; J. W. Searson, head of the department of English; Albert Dickens, head of the department of horticulture; and Nelson Antrim Crawford, head of the department of industrial journalism and printing.

Miss Margaret Currie spent the week end in Topeka.

We wish to announce to our patrons that we have moved our business from 320 A Poyntz to Room 4 of the Marshall bldg., where we shall be glad to welcome our many patrons. Collins Beauty Parlor. 5-6

ENGINEERS INTEND TO MIX GOOD TIMES IN WITH WORK

Will Have Hike, Smoker and Dance within Next Few Months

At the engineering seminar Thursday afternoon the engineers outlined a program which proves that they intend to have a good time along with their school work. The engineers are planning to have several hikes, a smoker, a dance, and several other social events in the next few months. A social committee is to be appointed later.

The engineers intend to back college athletics and other activities to the limit. A portion of the time was spent in which football was the topic of discussion. Hobe Fairman urged all members of the division to secure tickets and urged all freshmen to try for the class team, for as Fairman put it, "A good freshman squad means much toward a winning varsity."

Girls desiring employment for afternoons, inquire of Miss Irene M. Dean, Y. W. C. A. secretary, or Mrs. Mary Pierce Van Zile, dean of women.

We wash everything from silk shirts to overalls. Manhattan Steam Laundry. Phone 157. 4-8

Miss Barbara Murray, senior in home economics, was called to her home in Ash Grove, Mo., last week by the serious illness of her grandfather.

Oscar Steanson, who was graduated here in agriculture last year, was a college visitor Saturday. He is in vocational agriculture work at Abilene.

Y. W. TO HOLD A CONFERENCE

SIMILAR TO MEETING HELD AT
ARMY CITY

Advisory Board, Committees and
Officers Meet Together
Thursday

The committees of the Y. W. C. A. will hold a conference similar to that held in Army City a year ago last spring, Thursday, September 30, in Recreation hall.

The usual Vesper services will be held at four o'clock, all college girls being invited. After this the members of the committees, members of the advisory board, and special advisors will hold their conferences. A program will be given by members of the advisory board, officers of the association, and out of town speakers.

The committees will be divided into groups and their special needs will be discussed. A general discussion for all will follow. Supper will be served at a reasonable price. The conference will close at eight o'clock.

Members of the advisory board are Mrs. Leo Melchers, Miss Bernice Fuller, Miss Grace Hesse, Miss Mary McDonald, Mrs. J. V. Cortelyou, Mrs. J. P. Calderwood, Mrs. W. M. Jardine, Dean Mary Pierce Van Zile, Mrs. A. H. King, Mrs. A. H. Bressler, Mrs. B. R. Hull, and Mrs. C. H. Paine.

Editors Visit College

Editors of a number of farm journals, here attending the middle west farm bureau conference, visited the agricultural college last week. Among them were S. O. Rice of the Capper Farm Press, Paul Stephens, American Farming; C. V. Gregory, Prairie Farmer; R. P. Crawford, Nebraska Farmer; George K. Bartlett, Kansas City Weekly Journal; L. C. Moser, Pierce Farm Weeklies, Arthur C. Page, Orange Judd Farmer. Special interest in the work in industrial journalism was expressed by several of the visiting editors.

O. T. Bennett, '18, agricultural agent for Marshall county, visited the college last week.

Miss Roxine Parker, '18, of Ottawa, visited friends at the college last week.

Miss Leah McIntyre has accepted a position as dietitian in a Marine Hospital in San Francisco, Cal.

Miss Lois Emily Litchfield, '20, is teaching home economics in Los Angeles, Cal.

Mr. Edward Shaffer was called home last week on account of the death of a friend, Glenn Hart of Fredonia.

LOST:—Diamond ring in D. S. building. Reward to finder. Return to Dean Thompson's office. 5-2

Notice

Cross country track practice starts today at 4:15. Every one who is going to try out must be present.

E. D. MCCOLLUM NOMINATED SENIOR CLASS PRESIDENT

Homer Henney and Edward Barger
Nominates for Office of Treasurer

The first meeting of the seniors, which was held in F2 last Thursday evening, was devoted to the selection of class officers.

The following nominations were made: President, E. D. McCollum; vice president, Charlotte Ayres; treasurer, Homer Henney and Edward Barger; secretary, Frances Whitmire; S. S. G. A., Ruth Willis, Bly Ewalt, and Rex Maupin; marshal D. Z. McCormick; cheer leader, Ray Watson; historian, Clementine Padelford; election committee, Marcia Seaber, Esther Andrews, and Chauncey Sawyer.

Let us keep you clean—A. V. Laundry and Dry Cleaning Works.

Barton Heath spent the week end at his home in Fairbury, Nebr.

Miss Doris Riddell spent the week end at her home in Salina.

Miss Marie Hammerly, '20, is teaching home economics at Farmington, Ia., this year.

Prof. C. E. Rogers of the journalism department, is one of the Aggies' most faithful football fans.

Dr. C. E. Zollinger, who is engaged in practice at Junction City,

was a visitor at the Alpha Psi house last week.

Maurice Laine is now managing the College book store for Mrs. Guy Varney.

SOCIETY

Wallace Holsinger of Rosedale, freshman in agriculture has pledged to the Acacia fraternity.

Dr. C. W. Hobbs, head of the department of vaccine laboratories, and Dewey Wolgast, of Ottawa university have pledged to the Acacia fraternity.

The Franklin literary society held open house Saturday evening, over one hundred members and visitors being present. An old fashioned carnival was in session during the evening, and money was provided at the door so that the needy ones could take in the various entertainments. Mrs. A. J. Mack, who has endeared herself to all the Franklins by reason of the good stand-in she seems to have with the fates, was in charge of the fortune telling booth. There was a merry go round for those who wished to renew the dizzy sensations of youthful days and as games of chance were not discouraged by the authorities in charge, many a fortune was lost before the owner could tear himself away from the big wheel with the fascinating numbers on it.

Punch and wafers were served after the show.

Let us keep you clean—A. V. Laundry and Dry Cleaning Works.

James C. Snapp, one of the Aggie baseball stars of last year spent last week at the college.

H. M. Spiker, senior in animal husbandry, left Friday for Chanute on a business trip. He returned Sunday night.

Ernest Miller, freshman in mechanical engineering, spent the week end at his home in Coffeyville.

Miss Florence Mitchell, '19, who is teaching at Frankfort, spent last Sunday at the Chi Omega house.

Mr. Leonard Morgan has withdrawn from school and will attend Oklahoma A. and M. college this year.

A Surprisingly Sensational Drama of Speedy
American Life, Indoor and Out

"Al St. John In Trouble"

Prosperity from the Soil.

America must never sacrifice agriculture to industry.

To turn the nation into a vast network of factories at the expense of the farms would force importation of food upon a scale which other nations could not hope to meet.

The farm feeds us and feeds our industries. The farmer is a foremost citizen. He is recognized as such by this bank and every service is extended to him as readily as to another business man. Perhaps you need a nice calendar, we have a few left.

DEPARTMENTS ARE BACKING WHEAT SHOW

PLANNING SPECIAL STUNTS FOR AGGIE DAY

ROUND TRIP TICKETS FOR \$7.00

Tickets to Be Sold in Main Hall Tuesday and Wednesday—Will Wear College Colors

Interest in Aggie day, at the Wichita Wheat show, Saturday, October 9, is at a high pitch, and competition is keen among the student organizations of various divisions as to which one will send the biggest representation to the show.

Three organizations of students in the division of agriculture are busy at work on plans for the holiday. The three clubs, the Block and Bridle, K. S. A. C. and the Dairy association all plan to send a big bunch down to Wichita, serving as a nucleus for the whole agricultural division. The members of the Block and Bridle club are planning to wear distinctive arm bands with the words K. S. A. C. Block and Bridle club on them.

All of the students making the trip will wear K. S. A. C. colors. The ribbon will be furnished by the college, being distributed to the students at the station.

Engineers Plan Special Car

The engineers are planning a special car for their division. By having the special car they will be able to put on stunts, decorate the car, and carry out various other plans of identification. D. G. Lynch is chairman of the engineer's committee on stunts.

The Aggie Press club, the organization of all journalism students is planning to issue a special edition of the Collegian to be sold on the streets of Wichita. The paper will be sold by members of the club.

It is the tentative plan of the college military department to have about 60 cadets from the cadet corps take an active part in the activities at the Wichita Wheat show, on K. S. A. C. day, according to Major F. B. Terrell, commandant of the department.

It is intended to select the men from the sophomore or advanced military course because of their drill experience. The detachment will probably be transported in government trucks, leaving Manhattan with equipment on Friday, October 8, and on reaching Wichita, will go into camp, parading on Saturday, and returning Sunday, October 10.

It is probable that after reaching Wichita parties of students of various divisions will be formed for the purpose of visiting places of especial interest to members of each particular division. The engineers are planning to visit construction work at Wichita, the home economics students will probably visit one of the larger tea rooms, and the agricultural and veterinary students will visit the stock yards, mills, and some of the other agricultural enterprises.

Sell Tickets in Main Hall

C. E. Nelson, traveling passenger agent for the Rock Island, will be in Manhattan Tuesday and Wednesday, October 5 and 6, and will have a booth in Anderson hall where tickets for the Wichita trip may be purchased. It is hoped that as many students as possible will purchase their tickets from Mr. Nelson. The price of the round trip ticket is \$7.00.

Dean F. D. Farrell has written to Wichita for details of the Harding program, and information on the subject will probably reach here within a few days.

Announce Engagement

Mrs. David Bice, Delta Zeta house mother, gave an informal dinner party Wednesday evening to announce the engagement of Miss Pauline Clarke, '15 to Mr. Dorian Ricard, '16. Miss Clarke is a member of the Delta Zeta sorority, and is director of the college canteen at the present time. Mr. Ricard is a member of the Acacia fraternity. He is managing editor of a technical journal at Kansas City. Miss Florence Evans, of the applied arts department, Mrs. Roy Haege, of Tulsa, Oklahoma, and Miss Nelle Rouse, besides the active chapter, were guests at the dinner.

Many Attend Races

Several car loads of college people attended the automobile races at Council Grove last Saturday. V. S. Bolt, sophomore in mechanical engineering, planned to drive his car in the races but motor trouble prevented his doing so.

Everybody Out Tonight
Pep for the football season will start off tonight in the auditorium when the student body will gather for the first enthusiasm convale which is being given in anticipation of the victory over Hays Normal. Every Aggie student will be out for the first pep meeting and it is expected that on account of the new developments in leadership that greater interest will be manifested.

ELECT OFFICERS OF QUILL CLUB

FIRST MEETING OF THE YEAR HELD MONDAY EVENING

Professor Crawford Gave Report of Trip—Decided Upon New Plan of Meeting

The Quill club met Tuesday evening and elected officers for the coming year. Elizabeth Dickens was elected chancellor; Prof. C. E. Rogers, vice chancellor; Osceola Burr, keeper of parchments; R. C. Nichols, scribe; and Jessie Adee, warden of the purse.

Professor Crawford, national high chancellor, gave a report on his trip west this summer. He installed runes at the University of Denver and at the State College of Washington, and visited the runes at the University of Wyoming and at the University of Southern California.

The Quill club decided to hold their meetings in the homes of members of the club this year instead of in the journalism room.

TRACKSTERS GET READY FOR K. U.

AGGIE CROSS COUNTRY RUN EARLY IN NOVEMBER

Five to Be Picked for Meet with K. U. to Be Later in November

Preparations for the five mile cross country race which will be held November 6 are being made by twelve track men who have been working out during the past week.

This is the first time a cross country race for Aggie track candidates has been staged by the college, and Coach Bachman wants all the distance men in school to enter the race. Any man in school is eligible to compete and is urged to do so.

In order to give every man an equal chance the time handicap system will be used. Ray Watson will be the only man to start at scratch.

Trophy cups will be awarded to the men finishing first, second, and third. These cups are furnished by the loyal merchants of Manhattan. As soon as the cups arrive they will be placed on display at the Co-op book store.

Five men will be picked from the contestants of the Aggie cross country race to make up the team that will compete with K. U. the latter part of November. The men placing in this race will be awarded the official track "K."

MAY EXCHANGE TROUBLES NOW

"TROUBLE EXCHANGE" IDEA IS CLIFF STRATTON'S

Boys with "Blues" Invited to See Alumni Secretary—No Advice Given

Books, clothes, and sometimes even quiz papers, have in the past been exchanged at K. S. A. C., but it was not until the arrival of Mr. Cliff Stratton, secretary of the Alumni association, that the idea of a "Trouble Exchange" hit the college.

In fact Mr. Stratton may be said to have brought the "Trouble Exchange" idea with him, and as soon as his secretarial work is well in hand, the exchange is to be organized. The idea is that when a boy (for the exchange is a "men only" affair) gets the blues, he can go to Mr. Stratton and unload his troubles.

No advice is to be handed out at the alumni secretary's office across from the post office, but when an Aggie boy feels that he is getting a bit more in the line of hard knocks than is his rightful share, he is welcome to hold a "talk it over party" with Mr. Stratton.

Allen Laybourn is a new freshman member of the journalism department. He enrolled Monday.

AGGIE COED FORGETS ABOUT CAREER WHEN CUPID STEPS INTO THE GAME

Cupid certainly is a funny fellow. He's always smashing somebody's ideas about a career and being a "manhater," or a "womanhater," or something. Consider the case of two people who were in school last year.

Miss Catharine A. Fox of Columbus, Ohio, is the lady in question and Leo A. Magrath of Williamsburg, is the man. They're going to be married on October 6, in spite of the fact that just a year ago at this time Miss Fox was at the entrance of a course of study in institutional management which was to be the highway to her career. And just a few months ago "Mac" was getting limbered up for the baseball season when he was to display the strength of his wicked pitching.

And that's where Cupid comes in. Cupid always hangs around the Aggie campus during registration week and looks everybody over and decides who is whose and proceeds to fix things up.

E. H. LINDLEY MAKES TALK AT ASSEMBLY

OUTLINES WORK OF NEW PIONEERS

SEEK BETTER SCHOOL RELATIONS

Colleges Ought to Serve People Together—Must Unite to Develop State Commerce and Agriculture

Dr. Ernest H. Lindley, Chancellor of the University of Kansas, our traditional rival in matters of athletics, but a friend and sister institution of K. S. A. C. in matters educational, speaking on the subject, "The New Pioneers," addressed the student body at the auditorium, Tuesday, September 28.

Doctor Lindley came to Kansas university from the presidency of the University of Idaho, influenced by the opportunity for cooperative service in the state of Kansas. Upon being introduced by President Jardine, the chancellor was given an ovation including the famous Rock Chalk yell with Ray Watson as cheer leader.

Chancellor Brings Pioneer Message
The chancellor brought a message of optimism and loyalty and voiced a plea for the continuance of the support, sympathy and cooperation of K. S. A. C. in the great pioneer work before the institutions.

"The University of Kansas is not only at Lawrence, but at Manhattan and all over the state where people have aspirations for themselves and for their children," declared Doctor Lindley, and referred to K. S. A. C. as the other part of the university. "The future of the state depends on the new pioneers and the financial and moral support given the pioneer in the educational world at the present time. The states which are predominant today, are the states which have been the most liberal in their educational appropriations."

"The pioneer of today is armed with test tube and microscope, while the pioneers of yesterday were of two types, those fearless adventurers of the sea, and the men who won the west, armed with gun and axe. The former are spiritual, if not physical descendants of the latter."

"Everything that has been added to our usefulness, to our civilization in the way of progress and improve-

ment, is traceable to the passion of the pioneer to solve problems, to his unconquerable spirit, his courage and his demands for improvements, and his ability to use his brains. We now have the law of accelerated progress, of constantly increasing speed,

Miss Fox while in K. S. A. C. was a member of the Eurodelphian society and during the first semester was president of the Newman club. She played an important role in the presentation of "Seven Keys to Baldpate."

Magrath was a member of Alpha Psi, the Hamilton society, the "K" fraternity and was last year captain of the Aggie nine.

St. Peter's church in Columbus, Ohio, will be the scene of the wedding on the morning of October 6 and the new Magrath residence will be in Greeley, Nebr., where Doctor Magrath, who is a '20 vet, has a practice.

ment, is traceable to the passion of the pioneer to solve problems, to his unconquerable spirit, his courage and his demands for improvements, and his ability to use his brains. We now have the law of accelerated progress, of constantly increasing speed,

DR. ERNEST H. LINDLEY

and this speed of change places a premium on brains. The freshman in the Manhattan high school knows more about the physical and scientific world than did Samuel Johnson in his prime.

Use Nature's Powers

"The idea of controlling the forces of nature and having them to do the bidding of man was conceived and developed in the brains of the pioneers of the past," said Doctor Lindley, "and the pioneer of the present is dreaming of, and seeking the answer to the problem of harnessing the sun and other forces of nature. The pioneer is ever back of progress, and back of the pioneer is usually scientific and intensive study. The achievements of Kanred wheat never grew out of the brain of a practical farmer, but were made possible through a scientific knowledge of the science of agriculture."

"The glory of man," declared the chancellor, "is his power to use his brain. The most important discovery of the last century is not the airplane nor the wireless, but the fact that man is in sight of the laws whereby he can control his own mind. Only 10 per cent of our brain power is being used; the whole man has not awakened yet."

"Kansas university and the Kansas State Agricultural college are primarily servants of the people. These and other institutions will go up or stay down together, in direct proportion to the manner in which they serve the people."

Give Vaccinations Free
Dr. C. M. Siever is now giving typhoid vaccinations free of charge to all students who desire them. One dose is given each week for three weeks. The vaccination insures two years immunity from typhoid fever. Smallpox vaccinations will also be given if desired. Doctor Siever advises the students to take advantage of this opportunity for free vaccination.

SWINE JUDGES OFF FOR SHOW

TEAM GOES TO LINCOLN, AMES, AND DES MOINES

Elmer McCollum, Merton Otto, Hilery Mather, Homer Henny, and C. A. Newell Make up Team

The K. S. A. C. swine judging team left Wednesday afternoon to attend the National Swine show which is to be held at Des Moines, Iowa from October 4 to 8. The team went on the Blue Valley branch to Lincoln, Nebr., where they will judge the swine herds of the Nebraska college of agriculture.

Today the team goes to Ames, Iowa to judge the herds of the Iowa State college. While at Ames they will also visit noted herds of that vicinity, including the Bower Chester White herd and the Dean Curtis Berkshire herd.

From Ames the team will proceed to Des Moines, Iowa, where they will be entered in the Swine Judging contest of the National Swine show. The team will arrive in Des Moines on Sunday and prepare for the contest which is to be held on the following Monday.

On Monday night the team will be the guests at a banquet for college stock judging teams. Tuesday will be spent in viewing the stock.

The members of the team are: Elmer D. McCollum, Bogard, Mo.; Merton L. Otto, Riley; Hilery Mather, Manhattan; Homer J. Henny, Horton; C. A. Newell, Matfield Green.

PRESS CLUB TO PUT OUT PAPER

WILL SELL SPECIAL EDITION COLLEGIAN AT WICHITA

Sue Carmody Elected President at First Meeting of Club Monday

The first big undertaking of the Aggie Press club will be the publishing of a special edition of the Collegian to be sold at the Wheat show at Wichita. The publishing of the special edition, which was favored by the club in preference to a stunt at Wichita, will mark the beginning of the Press club's work this year.

Miss Susan Carmody, whose stunt "The Last Quarter" won the Pop Night cup for the Aggie Press club last year, was elected president of the club at the first meeting Monday afternoon.

Miss Clementine Paddleford, editor of the Collegian, presided at the meeting. The other officers elected were Maurice Laine, vice president, and C. R. Smith, secretary-treasurer.

The Aggie Press club was organized last year for the purpose of promoting friendship and cooperation among the journalism students on the hill, and bringing the journalists of Kansas into closer association with the journalism department of K. S. A. C.

S. S. G. A. ELECTIONS TO BE HELD NEXT TUESDAY

Bill Knostman and Ray Knox Are Nominees for President

Next Tuesday elections for the president and vice president of S. S. G. A. will be held at the window opposite the post office. All members of the organization must present receipts at the window before they will be allowed to cast a ballot.

Bill Knostman and Ray Knox are the nominees for the office of president and W. C. Wilson and Mike Paeck are the nominees for the office of vice president.

Begin Work On Buzzer

The class in wireless has increased from two to 12, with prospects of several more students if their schedules can be arranged. Simple code work on the buzzer is being given now, and soon actual work with the instruments will begin. The "buzs" will then have an opportunity to "listen in" on the big stations such as New Brunswick, San Diego, and Annapolis.

HAYS COMBAT OPENS AGGIE PIGSKIN WAR

MEN IN GOOD CONDITION FOR FIRST GAME

WILL BEGIN AT FOUR O'CLOCK

Team Slightly Under Average Missouri Valley Weight—Only 1,300 Season Pastboards Sold—Time to Redeem Pledge Made at Pep Chapel

The Aggies are all rarin' to go in the first game of the season with Hays normal on Ahearn Field tomorrow at 4 o'clock. There have been a few minor injuries to men on the squad during the scrimmages of this week, but no one is so badly hurt as to be unable to play if needed.

The Hays game should be an easy one for the Wildcats but you never can tell. The bunch they had last year was a rangy, speedy aggregation that used lots of passes. No dope on this year's team is available so early in the season except that the Normal coach wired Mike Ahearn that his team would give Mike's a good battle.

Team Slightly Under Weight

The Aggie team will be a trifle under the usual weight of Valley teams this year. While it is not certain who will start the game a fairly good guess can be made. It looks at present as if the initial lineup would be: Hahn, c. 188; Huston, 194, and Marshall, 177; guards: Gatz, 212, and Winter, 175; tackles: Randles, 168, Sebring, 163, ends: Axline, 154, quarterback: E. Cowell, 159; Hinds, 146, halfbacks; and Goerke, 178, fullback. Any engineering student, with the assistance of his trusty "slip stick" can figure up that the line as detailed will average 182 pounds per man, and the backfield 159 pounds. If he pursues his researches further and finds the average of the whole team, his result will be 165 pounds per man.

Backfield Material Light

There are men who are a trifle heavier than may get in Saturday's game. If they do the average weight will be boosted a small amount, but not more than three pounds at the most. The average weight of the line is not much below the usual avoidupolis of a Valley team, but the backfield material is appreciably lighter than the average of the teams the Aggies will face this fall. Some of the men who probably will get a chance in the line and their weights are: Stauffer, 182; Murphy, 176; Franz, 178; Divilbiss, 206; Linn, 149; Bogue, 163; Sites, 144; Church, 182; and Schmitz, 193. In the backfield Evans, 146; Sears, 170; Yandall, 151; and Barnes, 155 will have a chance to show their stuff if the going is not too hard.

Coach Bachman is putting out no bear stories on the eve of the contest—nor is he putting out any other sort of a story. "Come out and look 'em over" is his message to the students. "If they're all right you can tell by the way they play. If they aren't—well, you can tell that by the way they play!"

No Serious Injuries As Yet

There have been a few minor injuries to crack players but it looks as if they would not be serious enough to keep anyone out of the game. Randles was unfortunate enough to stop a freshman with his nose on Tuesday and spalled the classic outlines of his face somewhat. Axline bruised his hand badly in the same scrimmage. Neither of them will take any active part in scrimmage the rest of the week, but should be in condition by Saturday.

The game will be called at 4 p. m. on the College field. The officials are: Meeks, Michigan university, referee; Hill, Kansas university, umpire; and Major Wier, St. Johns Military Academy, head linesman.

The sale of season tickets has not gone as rapidly as was expected. The Aggie students are not redeeming their pledges made at the pep chapel held on Tuesday, September 21. Only 1,300 of the season pastboards have been bought and paid for. Mike Ahearn says, "The time to redeem those pledges made at the pep chapel is now before the games start. Tickets may be had of any K man, at the Co-op Book store and at the Commercial club rooms down town. They will also be on sale at the gate Saturday."

Grace Turner Elected

The Alpha Beta literary society has elected the following officers for the coming semester: president, Grace Turner; vice president, Emmet Kraybill; secretary, Tracey Jontz; and treasurer, Eva Platt.

FRIDAY, OCTOBER 1, 1920

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Make the "Beat K. U." slogan a reality.
4. Aggies at the top of conference athletics by 1922.
5. Clean politics.
6. Greater cooperation between alumni, students, and faculty in bringing athletes to K. S. A. C.
7. Remodeling of the auditorium stage.

FRESHMEN WITH THE RIGHT SPIRIT

Few freshmen entered into the spirit of wearing the caps more cheerfully than did the vocational freshmen, but because these men are older than the average freshman should be no reason for ridicule. Remember that these men are ones who know the value of an education, and are here to obtain one under the vocational handicap of wounds which prevent them from going back to their former employment.

Among the vocational students are men from many walks of life, all of whom are here because they thought enough of their country to fight for it. They should be respected for wearing the cap which they are proud to possess, in that it is a demonstration that they are full of the right kind of pep, and are for K. S. A. C. first, last, and all the time.

WHEN THE BIG GAME IS ON

The student body should climb into the bleachers with the feeling that they are one of the players, they should be with the team to the man and should show it by their actions.

Not only should the opposing team have to beat the eleven men but the encouragement of a loyal body of student rooters. When the recruit rushes out on the field in his initial game, his first move is generally scientifically wrong. He either fumbles, fails to block his man or lets an opponent through. At last he gets his balance and becomes a part of the machine physically and mentally.

When "time out" comes he reflects and for the first time realizes that the student body is with him.

So says Pat Page, famous ex-football man of the University of Chicago.

WHAT SOME FOLKS THINK

"I don't care about the students loafing in Aggieville, throwing horseshoes and using the place as a general thoroughfare for all points east—but if they have to walk four to six abreast I wish to goodness that they'd walk in the street."

It was a downtown business man speaking. He had made a hurried business trip to Aggieville, and was trying to plow his way up the street during the noon hour when swarms of students were hurrying from their noon classes, seeming to believe that they had rented, leased or by some means become the rightful owners of the whole of the Aggieville sidewalk.

Isn't this a pretty true picture, Aggie students? Don't we

appropriate a little too much of the sidewalk occasionally, forgetting that there are a few people in the world besides those who are dismissed from classes at twelve o'clock and have to get back at one?

A TIP TO AG FRESHMEN

Here is a tip to you, freshmen ags.

Out in Water's hall on the second floor is an agricultural reading room. It is maintained for the agricultural students and should be taken advantage of by every freshman from the very beginning of his course. If you have not already found the room slip out north some time and look it over.

There are some 60 agricultural papers and farm journals from Kansas and surrounding states on the shelves out there awaiting your perusal. Then too, you will find a good supply of agricultural bulletins and circulars, both from this station and from the United States department of agriculture, covering almost any subject.

Take a bulletin. They are free and you are welcome to them. If you think that your father or your neighbor back home might be interested in one, mail him a copy.

WILL THE SOPHOMORES FIGHT?

Last spring the question of having a color rush was brought before the freshman and sophomore classes but the sophomores being afraid of the numerical superiority of the freshmen declined to enter the contest unless some restriction was put on the number of contestants. This year the juniors and seniors of Indiana university are bemoaning the fact that the sophomores have shown the "yellow streak" and have failed to present themselves for the annual class scrap. Instead the freshmen seem to have possession of the campus for the rest of the year.

In direct contrast to this is the situation at Grinnell college where the sophomores met the freshmen in a straight fight and came out victorious. Although the freshmen outnumbered the sophomores two to one they tied up but three sophomores during the contest which lasted from seven o'clock in the evening to six o'clock in the morning.

Nothing serves to organize the first year men so efficiently and nothing serves to promote school spirit so effectively as to have a thorough demonstration of fighting class spirit in an annual class scrap of some kind. If such a scrap is properly regulated by the upperclassmen the only harm is a few bloody noses and bruised heads and who, we ask, is the worse for an occasional disability of this kind?

SOPHOMORE CLASS HOLDS NOMINATION-OF OFFICERS

J. W. Farmer and H. L. Sebring Are Nominees for President

The first meeting of the sophomore class was held Tuesday evening at 7 o'clock in C-26. The main object of the meeting was the nomination of the officers for the year.

The nominations were as follows: President, J. W. Farmer and H. L. Sebring; vice president, Dora Dakin, N. V. Plattner, D. Anderson, and M. E. Ramsey; secretary, Lorna Troup, Agnes Ayres, and H. L. Collins; treasurer, Joe McGuire, L. Means, and S. D. Criswell; marshal, D. K. Corby; assistant marshal, R. J. Spratt and Ellis Kimball; S. S. G. A. representative, R. J. Spratt and Warner Adams, Irene Maughlin, and F. H. Miller; historian, Mary Fitzgerald; men's athletic director, P. Sharp and Mr. Nelson; women's athletic director, Renna Rosenthal and Ruth Kittel.

Lloyd Deister who was a junior in the general science division last year is visiting friends in K. S. A. C. this week.

Mr. and Mrs. Wright of Washington were dinner guests at the Alpha Delta Pi house Monday evening.

Miss Berenice Spence was called home Thursday to attend the funeral of her grandfather.

Miss Elithe Kaull will spend the week end at her home in Kansas City.

SUMMER THEIR TIME TO STUDY

HOT MONTHS NOT ALL PLAYTIME FOR MUSIC FACULTY

Chicago Most Popular with Aggie Musicians Who Like Breezes with Their Melody

Chicago, where one may study and at the same time enjoy the cooling lake breezes has proved to be the favorite spot of faculty members of the K. S. A. C. music department for whom summertime and playtime are not synonymous.

Chicago did not claim all of the Aggie musicians however, as Miss Katherine Kimmell spent the summer in New York, where she studied under Edmund Myers. Miss Mabel Leffler proved the nomad of the department, straying up to Canada where she visited Quebec and took a trip up the St. Lawrence river.

Miss Helen Colburn, a new instructor in the department, who is a former K. S. A. C. student, studied in Chicago this summer. In addition to her study of the piano with Henriot Levy, she took special work in music education for children with Calvin B. Cady.

Miss Mary H. Baker, a new instructor who comes from Buena Vista, Va., also spent her vacation in Chicago, studying theory work with Percy Grainger. Miss Elsie Smith and Miss Helen Hannen, and Prof. A. E. Westbrook completed the Aggie colony located in the "Windy City." Miss Smith was enrolled in the American conservatory in the artist class of Joseph Lhevinne, eminent Russian pianist. Miss Hannen studied with Alexander Sebald, Professor Westbrook studied voice placement with Sandor Radanovitz and song repertoire with William Lester.

Among the music folks who "stuck around" Manhattan during summer school were Prof. A. L. Lovejoy, Prof. Harold Wheeler, and Miss Bess Curry. Miss Helen Hannen, and Professor Westbrook also taught in summer school before taking up their summer vacation work.

R. C. Spratt Is President

The civil engineers organized last week and elected officers for the coming year. R. C. Spratt was elected president; P. L. Sites, vice president; Arthur Brewer, treasurer; E. Von Relsen, secretary.

Plans were made to hold a civil engineers' hike Thursday, October 14. The hike is to be in honor of the freshmen civils and all engineering faculty will be guests on the hike.

Organize Second Glee Club

At the Glee club tryouts which were held last week 125 men tried for places in the Apollo club and 100 girls tried out for the St. Cecilia club. On account of the large number of good voices brought to his attention, and the few vacancies in the regular club, Prof. A. L. Lovejoy is considering organizing a second glee club.

This club would take care of a greater number of voices and at the same time would be an available source from which to fill vacancies on the first club.

Cokes Are a Bunch Of Nothing Costing Ten Cents Per Shot

After considerable time spent on investigation and meditation, the definition of a coke has been discovered. It was found that a coke is, as a prominent chemistry professor said, "a whole lot of nothing that costs ten cents a shot, with just enough caffeine added to create a desire for others."

Cokes have gained popularity with the girls because they can drink them and talk at the same time. Boys buy them so they can drop into the canteen six times a day and still have enough left from their week's allowance to buy twenty-five cent specials for two on date nights. Such is the way the coke started.

The original fad started down in Africa among the slaves of the courts of kings who were called runners. Their business was to run from one court to another carrying messages. This was often a job that lasted several days and as there weren't any Harvey houses or corner drug stores along the way, the runners carried their own rations. Coke leaves were found to be light in weight and stimulating to the runner.

Today they are used by the court-riding students who are doing their own running around over the campus. Today the students have created such a demand for them that over 200 are sold every day at the canteen and College Drug store to fulfill the needs of the fends.

If one was to say that there were 200 glasses of intoxicating liquors sold to students every day, the proud papas and mammas would throw up their hands in horror and refuse to send their darlings to the Kansas State Agricultural college.

But, oh what's the use of speculating, everybody must have his daily coke—which will you take, plain or straight?

B. K. Baghdigian, a graduate in industrial journalism, is secretary of the chamber of commerce and the advertising club of Iola. Mr. Baghdigian was formerly director of Americanization for the St. Louis chamber of commerce.

LOIS E. WITHAM SAILS TO CHINA

WILL HEAD CHEMISTRY DEPARTMENT IN COLLEGE

Sails From Vancouver, B. C., September 23—Is K. S. A. C. Graduate

Miss Lois Emily Witham, graduate of K. S. A. C. with the class of 1916, sailed on September 23 from Vancouver, B. C., for Foochow, China. Miss Witham is sent out by the Topeka branch of the Women's Foreign Missionary society, and will serve in Foochow as the head of the chemistry department of the Foochow Women's college.

While in college Miss Witham took an active part in student affairs. Since her graduation she has been employed as an instructor in the college, both in the chemistry and bacteriology departments and holds a high record as a teacher in both departments.

She has been an active worker in the Methodist church during her residence here, and has been a leader in church affairs.

Prof. Raymond Williams of the music department, was a dinner guest at the Sigma Phi Delta house Sunday.

Ernest Laude returned Saturday evening from Iola, where he has been for the past week helping his brother in the printing office.

"Like a Greek God" That Is the Way Mike Looks To 'em

TO THE INDUSTRIALIST: Did you see the picture of Mike in the Star the other day? My, my, isn't he the fine looking Irish satire of a bird? Looks like a Greek god. Look at the smile on him. Look at the battle in his eyes and the fight in his hair. Look at the bull-dog grit of the boy as you gaze on that classic mug.

Sure I was overjoyed to see my Hibernian hero's angelic face, may the saints preserve him.

Hurrah for the Irish! You can't keep 'em down and you can't help admiring them. Here's to Mike, may he and his boys knock the everything whey out of all the gangs that come against them.

I hope to live long enough to see Mike develop the talent that will plant a 'big boot in the academic basements of Missouri, Kansas, and Nebraska, and lift the whole bunch clear off the right of way. I'm willing to pull off my last shirt, tear the old thing into shreds and go ragin' and rarin' around like a Bull of Bashan if Mike and the boys will put it over.

Mike, your old friends who don't want to die, salute you. If you live till you die, and the Lord knows whether you will, we want to see you go back to old Ireland once more as a famous beauty and a victorious coach before you leave this country. —Hennessy Clancy Rushmore, '79.

Miss Louise Dawson, '20, is teaching this winter at Clifton, Ariz.

GIRLS MEETING NEW PROBLEM

WILL SOLVE QUESTION OF
COTHING A FAMILY

Class Now Busy Utilizing Scraps for
Kiddies So Dad Can Keep Up
Appearances

The common desire of all thrifty faculty members to lower the high cost of living, and especially that portion of the expenditure which must each year be set aside for clothing, has long been voiced in the classroom, but not until this fall has anything definite been planned by which this desire might be realized.

Sometime before the opening of the fall term, the instructors in clothing planned an experiment which they hope to introduce successfully into the college this year. The aim of the experiment is to make the student in clothing realize the need of strict economy, and to help plan a neat, yet serviceable wardrobe on a small income.

Each of the eight classes in clothing II is divided into groups of five. Each group constitutes a family, composed of the father, mother, and three children, and is responsible for the handling of the budget, the sum of which varies from \$900 to \$1,200 a year. Only 15 per cent of this amount, however, is allowed for the wardrobe of the family.

The ages of the three children, ranging from 14 years to six months, the location of the family, the occupation of the man and the general aims of the family, must all be outlined and considered while planning the wardrobe.

Laboratory work is actually carried out in making clothes for definite persons. Children from different families in Manhattan, or relatives from out of town are used as models. Commercial patterns are used, and the material is chosen by the group or by the person wishing the garment made. This gives the student a chance to work over clothing for the children and to use scraps of cloth which would otherwise be thrown away.

The girls find their greatest problem in distributing the income fairly. At present the question of how much the woman needs, and how much the man must have in order to make a good appearance in the business world, is giving them great concern.

To Offer Prizes

Prof. J. W. Searson of the English department who is president of the Kansas Authors' club has arranged for the club to give two prizes to Kansas authors, \$100 for the best poem and \$100 for the best short story. Judges will select the material from all the literature written in the state in 1920. Awards will be made sometime after January 1, 1921.

AFTER EIGHT YEARS OF WORK LOCAL FRAT IS GRANTED NATIONAL CHARTER

Perhaps no petitioning group of fraternity folk have ever enjoyed more worth while interest than the members of Alpha Theta Chi who on May 27 were granted a charter in Alpha Tau Omega. This, fall the Greek circle welcome to their midst the members of Delta Theta of Alpha Tau Omega whose residence is located at 1642 Fairchild and who boast an active membership of 24 and an alumni of 37.

Organized April 5, 1912 as a club, known then as the "Red Tie Club," the members of Alpha Theta Chi worked earnestly and devotedly to prepare the way for the granting of a charter of Alpha Tau Omega. From the date of organization to the present the initiates and pledges have numbered 65, and in the list will be found the names of men who have every year done things to add to the glory of K. S. A. C.

Interesting among the recommendations which were sent to national headquarters of Alpha Tau Omega with the local petition were the letters of Governor Henry J. Allen who gave the group of men high credit for their splendid part in the service given by students of this college during the emergency at the Pittsburg coal mines in the dead of winter last year. Governor Allen said:

"I had unusual opportunity to know the grade of the members of this local organization. During the recent state operation of the coal mines by volunteers, this fraternity sent us 14 men from a total of 21. These men distinguished themselves for their splendid spirit under the most difficult circumstances and for the success of their endeavors. The leadership of this group of young men at the college is of a splendid character. They are serious minded men who will make proper uses of the right to fraternity."

President W. M. Jardine was quite as generous in his recognition of the group and his letter to Alpha Tau Omega reads:

"This fraternity heads the list of fraternities as to scholarship according to our latest tabulations made concerning the standing of organizations. Its members are a group of faithful, serious-minded men, who, as a rule, will make good in whatever they undertake. Their aims and ambitions are set in the right direction. I believe the men composing this organization have the mettle to win and I should be very glad to see them affiliated with a good national organization for mutual helpfulness."

Scholarship records of K. S. A. C. give the chapter an enviable rating, they having earned four first places in scholarship standings since the fall semester of 1917, one second, and third place in the spring semester of the school year of 1917-1918.

In athletics the new chapter of Alpha Tau Omega has been particularly fortunate in having representative men of a very high type who have won honors for the group, but greater than that, have represented the institution in the outside world in a very commendable fashion. Football, basketball, track and all other phases of real sportsmanship have been participated in by members of Alpha Tau Omega with real vim and they have played the game with right ideals, and the proper college spirit which has given them the inherent ability to grow and develop into a power in this school.

Mrs. Louis Stahl is the house-mother this year and the honorary members are Prof. Levi J. Horlacher, formerly of the animal husbandry department, and Prof. Porter J. Newman, of the K. S. A. C. chemistry department.

The charter members are E. Leo Bebb, J. Farr Brown, O. T. Coburn, A. Wilcox Foster, Robert R. Fuller, Millard R. Getty, Bruce C. Hutchins, Perry J. Hershey, Walter R. Horlacher, Paul Kovar, LeRoy M. Leiter, Robert S. Love, N. Dale Lund, Elmer D. McCollum, Clyde C. McPherson, Carl F. Mershon, Charles Nitcher, Larens H. Reyburn, Walter W. Rodwald, Walter J. Rogers, C. M. Rust, Walter R. Rolfe, Charles R. Smith, Morton J. Stigers, Ray B. Watson, A. Wilbur Wilcox, and Philip Woodbury.

Miss Edith Grace Wakefield, '20, has a position as home economics instructor at Waldo, Kan.

JOURNALISM DEPARTMENT WRITES UP THE GRADUATES

Three Thousand Booklets Distributed
to Students, Alumni and
Newspapers

"The Specialist in Journalism" is the name of the booklet that has been printed by the department of industrial journalism and printing.

The book contains information regarding the courses offered in journalism and tells of the work that the alumni from this department are now doing. Some are leaders in farm journalism, some are in special trade fields, others meet the demand for teachers, and still others are in newspaper and advertising work. All are successful in their work and are proving to the world that the journalism department at K. S. A. C. ranks high among all colleges.

Three thousand copies have been printed and are to be distributed among the journalism students here.

sent to all alumni from the journalism department, to all newspapers in Kansas, and to all the agricultural papers throughout the United States.

L. E. Call, head of the department of agronomy, and G. S. Knapp, state irrigation commissioner took an overland trip to Garden City the latter part of last week, where they inspected the experimental work at the station there as well as the general crop conditions of that section.

DAIRY TEAM WINS CUP IN CONTEST

ARE HIGH TEAM IN JUDGING
ARYSHIRE CATTLE

Kansas Places Fifth Among Various
State Teams—Next Trip Is to
National Dairy Show

The dairy judging team from the Kansas State Agricultural college placed fifth among the various teams at the Waterloo Dairy Congress held at Waterloo, Iowa. This is the substance of a telegram received here from H. W. Cave, assistant professor of dairy husbandry, who accompanied the team. The wire also gives the ranking of the teams as follows: Minnesota, Iowa, Missouri, Nebraska, Kansas, South Dakota.

The Kansas team also won a special cup for being high team in the judging of Ayrshire cattle.

George Drumm, Robert Lush, and Clement Young were the members chosen for the team, with George Starkey as alternate. The team left for Kansas City last Friday where they visited the Overland Guernsey farm and the Long View Jersey farm. They arrived in Waterloo Saturday morning and spent the day in workouts on the herds there. The contest was held Monday afternoon, with about ten teams from the middle western states competing.

The next trip will be to the National Dairy show at Chicago, October 5. The team will go through Wisconsin, and will visit the principal herds in that state.

Miss Helen Hutchins was a dinner guest at the Alpha Delta Pi house Tuesday evening.

Miss Anabelle Garvey, instructor in the English department, will speak before the Women's club at Atchison, Thursday, October 7.

J. G. Tew, a new instructor in engineering drawing, reported for duty last Monday. He takes the place of L. C. Teeter who resigned last spring to accept a position as county engineer of Riley county.

Miss Marion Kirkpatrick, former student in K. S. A. C., is teaching near Belleville this year.

Miss Mildred Arends, '20, is teaching home economics in the high school at Highland.

Miss Marie Thomas, '20, is teaching in the Medicine Lodge high school.

NEW HONOR TO AGGIE GRADUATE

ROBERT W. CLOTHIER PRESIDENT NEW MEXICO COLLEGE

Took Bachelor's Degree in General Science in 1897—Master's Degree 1899

Dr. Robert W. Clothier, who since the spring of 1920, has been president of the New Mexico College of Agriculture and Mechanic Arts, is a graduate from the division of general science at K. S. A. C.

Doctor Clothier received his bachelor's degree here in 1897, and at the end of four years work at the college as assistant chemist, received his master's degree in 1899.

From 1901 to 1906, Mr. Clothier was professor of chemistry and agriculture at the Missouri State Normal school, and later became professor of agriculture and horticulture at the University of Florida. From 1907 until 1913, he served as professor of agriculture and acting dean of agriculture at the University of Arizona, and following this, spent a year in graduate study at Cornell university.

During the years 1914 to 1920, Professor Clothier was in the employ of the United States department of agriculture, the while holding a professorship in farm economics in the Mississippi Agricultural and Mechanical college. In 1917 he was awarded the degree of doctor of philosophy at George Washington university, where he had carried on graduate studies while with the United States department of agriculture.

To Have Tournament

In order to stimulate student interest in athletics, a basketball tournament is being organized among the local fraternities and clubs. Any of the above mentioned organizations that wish to enter the club tournament can do so by communicating with Harold Howe through the college post office.

SOCIETY

P. D. Williams, sophomore in general science, has been pledged to the Kappa Phi Alpha fraternity.

Miss Marvel Merillat and Mr. Carl Miller were married September 24 at the home of the bride's parents, Sleepy Eye, Minn. Mrs. Miller was a student at K. S. A. C. for several years. She is a member of the Kappa Kappa Gamma sorority, and of Theta Chi Gamma, honorary girls' general science fraternity. Mr. Miller took a course in industrial journalism and is a member of the Sigma Nu and Sigma Delta Chi fraternities. He now holds a position as business manager of the Telescope Publishing company, Belleville.

The Ionian literary society held open house last Saturday. After an interesting program prepared especially for new girls, the new officers, who had been elected the previous week, were installed. Following are the officers for the first semester: president, Frances Whitmore; vice president, Marguerite Hammerly; treasurer, Maude Lahr; secretary, Alice De Witt; marshal, Ursula Senn; assistant marshal, Irene Graham; critic, Rowena Thornberg; junior member of the Inter-Society council, Rowena Thornberg. During the social hour ice tea and wafers were served.

The Browning literary society held

open house in the Browning hall last Saturday afternoon. After an interesting program which consisted of readings, songs and a stunt, a social good time was enjoyed. Punch and wafers were served.

The Omega Tau Epsilon fraternity has pledged William H. Swab, Haddam; Arnold R. Jones, Haddam; Paul Burke, Geneva, Nebr.; Dorsey A. Sanders, Richburg, S. C.; Harvey A. Meyers, Americus; Benjamin F. Pfister, Fort Scott.

The marriage of Miss Sophia Lutz and Mr. Glenn Lee took place at the home of the bride in Cawker City, September 22. Mr. Lee, a former student of K. S. A. C., is a member of the Pi Kappa Alpha fraternity. Mr. and Mrs. Lee will make their home in Glen Elder.

Dr. Carl Libby of Glen Elder and Miss Dorothy Norris of Kansas City were married at the home of the bride's brother in Kansas City on September 4. Both are graduates from K. S. A. C. Dr. Libby from the department of veterinary medicine and Miss Norris from the department of home economics. Dr. Libby is a member of the Pi Kappa Alpha fraternity and Mrs. Libby is a member of the Delta Delta Delta sorority. Dr. and Mrs. Libby are at home in Glen Elder where Dr. Libby is practicing veterinary medicine.

Pi Delta Tau has pledged Ralph Muir of Salina and Felix Jackson of Kansas City.

Miss Mildred Rust and Mr. William I. Turner were married June 15, at Milton. Mrs. Turner was a sophomore in home economics here last year. Mr. Turner graduated from K. S. A. C. last spring, having taken his major work in the department of agricultural economics. The

young people are now living on a farm in the northwest part of Sumner county, Kansas.

A joint meeting of the Athenian and Browning literary societies was held last Saturday evening. After the regular Athenian program and installation of officers, grape juice and wafers were served. The refreshments were furnished by Mr. Ivan White in accordance with an old Athenian tradition which requires that when a member marries he shall supply the society with a certain amount of grape juice. Mr. White and Mrs. White, who was before her marriage Miss Helen Mitchell, were both present.

Pi Beta Phi sorority held open house Tuesday night from 7 to 8 o'clock for the Sigma Nu fraternity. On Thursday night the sorority held open house from 7 to 8 o'clock for the Beta Theta Pi fraternity.

The Catholic students of the college were entertained Monday evening, October 27, at the home of Mr. and Mrs. J. B. Floersch, 204 S. Juliette avenue. The evening was spent in dancing. Refreshments of ice cream and cake were served.

Alpha Delta Pi entertained with a tea Wednesday afternoon at the chapter house in honor of their house mother, Mrs. Dodd. The house was attractively decorated with late garden flowers and the serving table was adorned with candles and small baskets of carnations. During the afternoon Miss Berenice Meyer and Miss Berenice Spence sang several selections. In the receiving line were Mrs. Dodd, active members of the chapter, and the patronesses, Mrs. Mont Green, Mrs. Palmer Bressler, Miss Jessie McDowell Machir, Mrs. H. W. Davis, and Mrs. J. W. Searson. Mrs. Alden Huse, who is also a

patroness, presided at the tea table and was assisted by Miss Lucille Gramae, Miss Berenice Meyer, and Miss Lillian Stewart. The guests were the house mothers and representatives from the various sororities.

The board and cabinet of the Y. M. C. A. entertained men prominent in Hi-Y work, now members of the freshman class, at the Pines cafeteria Tuesday evening. Short speeches and toasts followed the dinner. Those present were Frank Adams, Jr., Elmdale; William Sapcut, Apache, Okla.; Ross Stapp, Norcatur; Phillip Heartburg, Manhattan; Harold Smythe, Wichita; Milton Turpin, Winfield; Irving McCutcheon, Burlingame; and Marvin Jordan, Manhattan. It is realized that all freshmen who are interested in Y. M. work were not invited, as they were not known, but

the Y. men wish to get in touch with all men interested as soon as possible.

Alpha Theta Chi has pledged Brom Hixon of Wakeeney, junior in animal husbandry; Newell F. Moore of Great Bend, freshman in general science; Bruce A. Rogers of Quinter, freshman in general science; Ernest Johnson of Holdrege, Nebr., junior in flour milling.

The faculty members of the music department gave a reception Sunday afternoon for the new members of the department at the home of Miss Elsie Smith at 1318 Fremont.

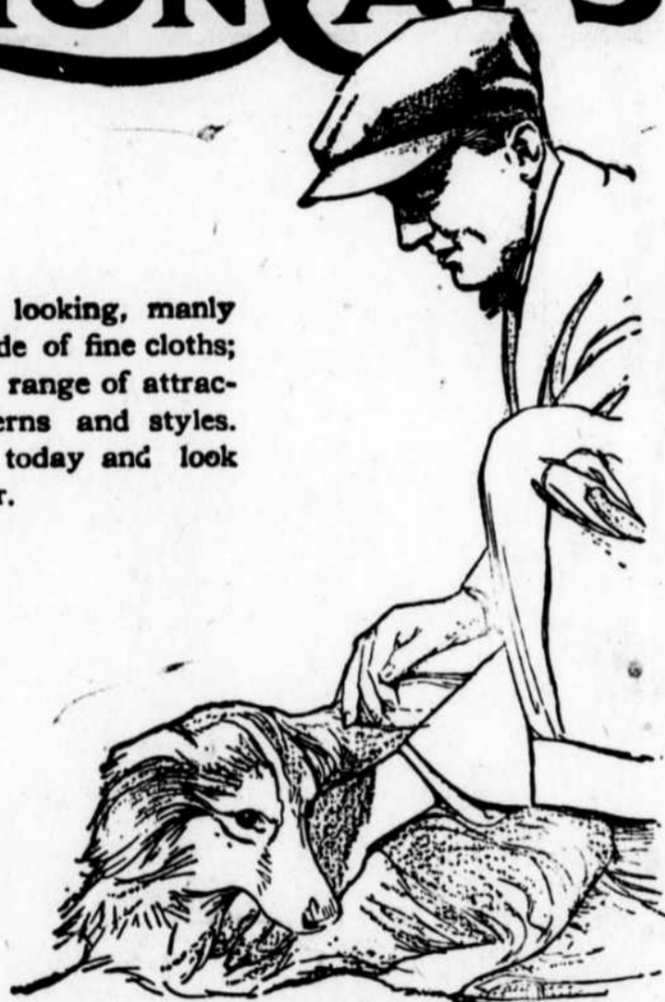

Pi Kappa Alpha has pledged the following men: Mr. Burton Colburn, Manhattan; Mr. Robert Gwinn, Anthony; Mr. Charles Couch, Anthony; and Mr. P. E. Brown, Atchison.

The members of Theta Sigma Phi, honorary journalistic fraternity, were at home to all girls enrolled in the department of journalism, Wednesday afternoon from 4:00 to 5:30, in the rest room of the Home Economics hall. Miss Clementine Paddelford explained the aims and purposes of Theta Sigma Phi, and Miss Izell Polson, instructor in industrial journalism, discussed the national standing of this purely professional fraternity. Mrs. C. E. Aubel, an alumna member, gave a short talk about the help and inspiration to be gained from membership in the organization. Refreshments of punch and wafers were served.

Dallas Grover, midshipman U. S. N., visited his brother at the Pi Kappa Alpha house while on leave from the naval academy at Annapolis.

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, TUESDAY, OCTOBER 5, 1920

NO. 7

REPUBLICANS OF COLLEGE TO ORGANIZE

TO START POLITICS AT K. S. A. C.

TO HAVE A MEETING THIS WEEK

Milton S. Eisenhower Appointed Chairman for Organization by State Republican Committee—Challenge Democrats

A meeting of all Republicans in college is called for Tuesday evening from 7 to 8 in F-2. Election of officers and definite arrangements for the club's work will be made.

With the coming election only one month off, the Republicans in the college have started to organize and a Republican club is to be formed immediately. Milton S. Eisenhower has been appointed by the Republican State committee to take charge of the organizing of the club at K. S. A. C.

Get All To Vote

The most important practical work of the club will be to get all students to vote either at the Manhattan polls or in their home towns. It has been estimated by Herbert Cavaness, Republican director of clubs, that very few college students take any interest in an election.

Mr. Cavaness points out that college is the place for a man or woman to begin taking part in the running wheels of the government and it is the place for him to learn to become a good citizen. A leader in college will be a leader in later life and a good college citizen will make a good citizen always.

Absent Voters' Law

It used to be that a college student could not vote unless he went to his home precinct, but the absent voters' law has changed this. The law reads "Persons unavoidably detained from township or ward, having complied with the registration law, may vote at any voting precinct." An affidavit must be subscribed by the absent voter and then his ballot is mailed to the county clerk of his home county.

The Republican club here at K. S. A. C. will meet often within the next few weeks so that the members may learn the many issues at stake this year and so that they may go to the polls on November 2 and vote intelligently.

Meeting This Week

A meeting of all Republicans in college and all other persons interested, will be held this week. Watch the bulletin boards for announcements. The time will also be announced in chapel. At the first meeting the local officers will be elected. The meeting will be in charge of Milton S. Eisenhower, appointed by the state committee, and Mr. Stratton, alumni secretary at K. S. A. C.

As soon as the club is definitely organized a speaker will be brought to the college. It is the plan of the club to get a nationally known Republican to speak here such as Governor Allen, Mr. Hughes, or others.

Challenge Democrats

The Republican club will also challenge any Democratic club that may be formed in college to a debate. Outside persons may be brought in for the debate or the work may be kept among the students. These matters will all be decided at the meeting this week.

DEBATERS NEED NOT SCRAP WITH SMALL SCHOOLS NOW

1920-21 Schedule Includes Four Debates With Large Institutions

Aggie debate teams no longer have to tangle with small schools, says O. H. Burns, debate coach. The 1920-21 schedule includes four dual debates with large schools by women and two debates by men.

The men's dual debate with Ames, and the women's dual debate with Emporia State Normal make up the fall schedule. These debates will take place late in November or early in December. The question for debate with the Iowa Aggies is the "Progressive Land Tax." The question for the women's fall debate has not yet been decided.

The spring debate schedule includes the women's dual debate with Emporia State Normal. The questions and dates of these spring debates have not been decided.

The system of debate followed by K. S. A. C. is extensive rather than intensive. No student will be al-

lowed to participate in more than one inter-collegiate debate each college year. Although this system does not always prove victorious in a contest it does provide for the systematic training of 90 to 100 debaters who are on the squads each year. Twenty-four debaters will actually participate in inter-collegiate debate.

County Club Elects Officers

The Sumner County club reports the following election of officers: Grace Turner, president; Clyde Baughman, ice president; Helen Blair, secretary-treasurer; Ruby Thomas, chairman of social committee. The club is planning to give a hike soon.

PEP HAS FLOOR AT BIG MEETING

W. U. GUERRANT GIVES ENCOURAGEMENT TO TEAM

Ray Watson Describes Trip to Antwerp—Is First of Three Pep Meetings Outlined for Year.

Pep was the object of the big mass meeting in the auditorium last Friday night. pep was the subject of its speakers, and pep ran rife from the beginning to the end.

Every one agreed with Mike Ahearn in his assertion that those absent did not know what they were missing. Good sport that he is, however, the head of the athletics lentily excused them on the grounds of proverbial date or the necessity of "dolling up" for the mixer. But, Mike stated, that reason or no reason, every one should have made it a point to be present as there are only three pep meetings planned this year, the one held Friday night, one before the K. U. game, and one before the homecoming game with Ames.

A living example of a "fighting preacher" was on his feet the minute Mike sat down, and for fifteen minutes kept the students laughing. Rev. W. U. Guerrant, new student pastor of the Presbyterian church, is a young man who understands young men, he is an ardent supporter of athletics, and has coached many a man into big league baseball. Reverend Guerrant has these oft spoken of "live wires" completely out of the running, for he is overflowing with the "pepper" he spoke about.

K. S. A. C.'s representative in the Olympic games, Ray Watson, was back on the platform with his old time spirit; he put the bunch thru some good old yells and then described his trip to Antwerp.

The pep meeting instilled in the students an abundance of confidence and practically insured the victory that came Saturday.

FRESHMEN HOLD THIRD MEETING

WILL NOMINATE OFFICERS ACCORDING TO COMMITTEE RULES

Former Moments Characterize Former Meetings—Constitutional Committee Chosen Last Week

At 5 o'clock this evening the freshman class will meet in the auditorium for the third time for the purpose of nominating officers.

High tension and some stormy moments characterized the business session of the second freshman meeting last Friday, and after an hour and ten minutes of dissension the assembly was adjourned with the appointment of a constitutional committee, composed of one student from each division. This committee has drawn up rules for the nomination and election of officers. All actions of the first meeting at which the agriculture students and the engineers were not represented were disregarded.

The members of the constitutional committee are: R. D. Cuthbertson, general science; Mary E. Henderson, home economics; S. L. Smith, engineering; George Humphrey, agriculture.

Plan Outlines For Department

The members of the English department are planning outlines for College Rhetoric I, the purpose of which is to coordinate the work of the department. The committee consists of Prof. R. W. Conover, chairman, and Miss Bernice Fuller and Miss Helen Elcock. Miss Margaret Russell is working on a similar outline for English literature.

Sunday dinner guests at the Sigma Phi Delta fraternity house were Mr. and Mrs. Spielman, C. W. Colver, instructor in chemistry at the college, Lieutenant Porter of Camp Funston and Leslie Harold Dugan.

Military Officers Are Sent Warning Of Intended Plot

A warning that the old Civil war cannons which have so peacefully, these many years, stood guard north of the main entrance to the Nichols gymnasium, were all set to belch forth smoke and flame once more, was recently received by the military officers of the college.

The warning explained that a plot had been uncovered wherein some enthusiastic athletic followers intended to inject a bit of additional jazz into the next pepster meeting by placing in each of the veteran howitzers a heavy charge of black powder, packing it with other material more or less solid. It was suggested that the result might prove disastrous to Fairchild hall and to stray pedestrians who might walk within point blank range of the battery in action.

An investigation conducted by the department, revealed no evidence of any Red activity as yet. The temptation to bring these old relics out of their dormant state will probably be removed by filling the bores with concrete.

SUPPLY NINETY MEN WITH WORK

OVER 100 STUDENTS REGISTER FOR EMPLOYMENT

Farmers Near Manhattan Are Co-operating with Y. M. C. A. in Furnishing Students with Work

Ninety men have been placed in fairly permanent part-time jobs by the assistance of Dr. A. A. Holtz, Y. M. C. A. secretary.

There are over 100 self supporting students who have registered their application for employment and only 90 of these have secured permanent work. Doctor Holtz says that the chief difficulty lies in the fact that a great many of the men who apply for work have assignments that do not allow them regular hours for the positions which demand such hours.

The majority of those who apply are not in the least particular as to the kind of work which they do. No matter what the job is, there is always someone to take it, providing the hours do not conflict.

Some of the farmers living adjacent to Manhattan are lending co-operation to the Y. M. C. A. in giving self supporting students employment by providing transportation to and from the college, supper and breakfast and lodging, in return for a few hours labor in the morning and evening. Those who have no classes on Saturdays have little trouble in securing work for this day.

Recently such farms as the Blue-mont farm and the Casement farm have sent in calls for a number of men, providing transportation and paying \$2 per day and board. At present, to those who have half day periods without classes, corn shocking and silo filling jobs are usually obtainable. Table waiters have been in good demand. Anyone knowing of odd jobs that are begging should pass the information to Doctor Holtz.

Miss Fuller Talks To Girls

Miss Bernice Fuller of the English department who before coming to K. S. A. C. did social service work in the Y. W. C. A. at Boston and Philadelphia, spoke before the committee conference of the Y. W. C. A. Thursday evening on the subject, "In Service for the Girls of the World."

PLEADS FOR UNDERFERED TEACHERS --RECALLS TRAGEDY OF COLLEGE DAYS

When a D. S. girl goes out into the big wide world, she spends most of her subsequent life regretting the sins of her college days. Many a professor is a few pounds thinner because of her failure to provide sufficient food for him during her season of dinner work. Such is the dark shadow hanging over her otherwise happy life and it is my fondest wish that some time I may be able to atone in a measure by offering to them a meal sufficient for the strenuous life of a college professor.

I blush with shame as I recall that one little, measly white leghorn was made to serve for the meat course for four people at three different dinners. Professor Westbrook had the first chance at the bird. It was roasted. I tremble yet when I think how near it came to flying onto the floor during the professor's mad attempt to carve it, and how near I came to tipping over the stool as I observed the near catastrophe through the transom.

Next day it was presented to Professor Crawford to serve in the form

AT LEAST 500 TO WICHITA IN AGGIE SPECIAL

MUSIC DEPARTMENT WILL HAVE LARGEST REPRESENTATION

ARE SELLING TICKETS TODAY

At Least 75 Ags and 75 Engineers Will Make Trip—65 Piece Military Band to Lead Parade

Not less than 500 and possibly as many as 1,000 Aggie students will go to Wichita on the Kansas State Agricultural college day special Saturday morning. A representative of the Rock Island railroad will open a ticket booth in Anderson hall this morning. Tickets will be sold today and tomorrow. The price is \$7 for a round trip.

Music Dept. Sends Largest Number The music department will have the largest departmental representation on the special train. The International Wheat show has agreed to bear the expense of the band of 65 pieces. A total of 90 music department students will make the trip.

At least 75 Ag. students and 75 engineers are going. The home economics division will send a delegation of about 100 girls. A party of journalists will make up part of the division of general science aggregation.

The train will leave early enough to arrive in Wichita to take part in the program preceding Senator Harding's speech there. His address is scheduled for 9:30 o'clock. A space in the auditorium will be reserved for the visiting Aggies.

Stunts will be given by various organizations on the parade from the railroad station to the auditorium. A special edition of the Collegian will be distributed by the journalism department. Klod and Kernel Klub will give a demonstration of the development of sowing through the ages. The vet and engineers will have distinctive stunts.

Band To Lead Parade The parade will be led by the 65 piece military band. Next in order will come the detachment of cadets. Following these will be department, division and organization groups.

The band and members of the music department will have part in the program preceding Senator Harding's address.

Following the program a number of parties are planned. The girls of the home economics division expect to visit a model tea room which is conducted by an alumna of the college. The Ags plan a tour of seed and implement houses. The engineers are arranging to see important industrial plants in the city. Journalism students hope to go through the plants of the two leading papers. "The return trip will be made in time for students to attend church Sunday morning," President Jardine said.

CONFERENCE WORKS OUT NEW VOCATIONAL PLANS

Prof. C. V. Williams in Charge—Conference Organized by Department of Education

A conference organized by the department of education, in charge of Prof. C. V. Williams, state director of vocational education, was held here last Saturday, September 25. Its purpose was to work out a

definite plan for presenting vocational agriculture in high schools.

Superintendents of four selected high schools in the state having approved courses in vocational agriculture, the directors of vocational agriculture in these schools, and members of the department of education having in charge the work in vocational agriculture, attended the meeting last Saturday.

Win First Place

The swine judging team won first place at the National Swine show at Des Moines, Iowa, yesterday. Three Kansas men placed among the first 10. Mather placed second, Otto sixth, and Henry seventh. The team will return Thursday afternoon.

COLLEGIAN TO HOLD CONTEST

TOTAL OF \$20 IN PRIZES IS OFFERED

Will Give \$10 to Student Who Writes Most Column Inches During Term

The Collegian contest which is staged each semester among the pen-pushers of the college opened last Tuesday and the future Lardners and Simonds are energetically scouring the campus for every line of available news. The contest will continue until the close of the semester. Every student enrolled in Collegian practice is eligible for the contest except the Collegian editor, associate editor, and feature editor, sport editor, and exchange editor.

A total of \$20 in prizes is offered. The student credited with the largest number of column inches will receive a prize of \$10. The premier feature story and the best editorial will each be worth \$5.

Due to an oversight the contest money of last semester was not awarded but it will be paid this fall. The winners of last spring's contest were C. R. Smith, who was credited with the largest number of column inches and Albert Meade, who wrote the best feature story.

W. A. MCKEEVER STIRS UP TOWNS

COLLIER'S WEEKLY COMMENTS ON HIS WORK

Professor McKeever, Formerly of K. S. A. C., Is Now of the University of Kansas

Prof. William A. McKeever now of the University of Kansas, formerly of the Kansas State Agricultural college, is doing some great work in Oklahoma. Harford Powell, Jr., editor of Collier's Weekly, has the following to say in last week's Colliers:

"There is a man at large out in Oklahoma who ought not to be. He is bouncing about that fair young commonwealth stirring up unrest. His attention is devoted chiefly to the middle-sized cities, and he is rapidly getting them dissatisfied with themselves. Something ought to be done about him."

"The man is one William A. McKeever of the University of Kansas. His activities in his own state are reputed to have stirred up the biggest movement Kansas has known since the time of the prohibition wave, and now he is doing it in Oklahoma."

"What is he doing? He has got all the middle sized cities competing with one another to determine which is the better place in which to rear a family of children. The contest will come to an end November 15, and the city adjudged winner will receive \$2,500, offered by the Rotary club of Shawnee."

"Really the man is a menace—to improper conditions. Long may he wave."

World Forum Meets Tonight

This evening at 7:30 o'clock a meeting of all members of the World Forum, will be held in the Y. M. C. A. building. James H. Moyer, president of the Forum, has asked that all members be present to reorganize for this year. At this meeting plans will be discussed and made for the World Forum which will meet here February 14, 15, and 16, and plans for a monthly meeting are to be taken up. If a monthly meeting is arranged for, world problems which will be of interest to all students in K. S. A. C. will be discussed.

TEACHERS GET SCRATCHED BY THE WILDCATS

BACHMAN'S TEAM CLEANS UP HAYS TO TUNE 14-0

CAN STAND MORE PRACTICE

To Depend More On Passes This Year—Many Penalties Kept Aggie Score Down

Coach Bachman's Aggie Wildcats took the Hays Normal teachers to a 14-0 "cleaning" in their 1920 debut on Ahearn field Saturday. The day was ideal, and Aggie fans and supporters of the team from Manhattan turned out for a record attendance at the first game of the season. The big crowd saw an Aggie team that has the old fight in unlimited quantities, but that has a long road marked by daily practice sessions to travel before it develops its possibilities entirely.

Will Depend On Passes

Judging from Saturday's exhibition, the Wildcats are going to depend more on passes than has been the custom in former seasons. Six passes were completed for a total gain of 73 yards, while 11 were incomplete and one was intercepted. "Prock" Randles, the best the Aggies have at snagging passes was out of the game with a twisted ankle. This fact undoubtedly kept down the total of completed passes, although "Shorty" Cowell did yeoman service on the receiving end of the aerial plays.

Sears Makes Two Touchdowns

The two Aggie touchdowns were the result of straight football. Sears, fullback, plunged across the line for both counters and Huston kicked goal. One touchdown came in the first quarter and one in the second. Henle Hinds ran thru a broken field for another touchdown in the third period, but the score was disallowed as a penalty was inflicted on the Aggies for being offside.

Those penalties were contributing factors in keeping the score low. The Aggies were penalized a total of 105 yards—the length of the field. The penalties resulted from over eagerness on the part of Wildcat warriors to get in the fray. The majority of the penalties were assessed for being offside, but several can be laid at the door of the backs for getting in motion before the ball was snapped.

The Hays team was completely outplayed, and the score should have been higher than it was. The Aggies gained 240 yards from line of scrimmage as against 34 gained by the Teachers. Wildcat gains from passes totaled 73 yards while Hays did not gain a yard by this method of attack, their only attempt being incomplete. Bachman's men lost the ball on downs three times when they were within striking distance of the Hays goal. Huston also missed two attempts at dropkicks from distances within the 40 yard line. Both misses were by a very narrow margin. When Dewey's eye regains its old time accuracy he will be the sure point getter that he has been in former years.

Substitutions Are Numerous

After the first half substitutions were numerous, some 30 men being given an opportunity to show their wares before the game ended. The lineup at the opening of the game was: Hahn, rg; Huston, rg; Marshall, lc; Winter, rt; Gatz, lt; Bogue, re; Sile, lc; Axline, qb; Hinds, rb; Cowell, lb; and Sears, fb. This combination played the first half without change, and scored the Aggie's points. At the half Winter was replaced by Stauffer at tackle and Sears gave way to Schindler at the fullback station. Bryan soon took Hinds' place at half, and from then on the substitutions came fast and furious. Randall and Evans got in at half, Goerke at full and Cowell at quarter. In the line, Cleland at center, Murphy at right guard, Hollister at left guard, McGuire at end, Divilbiss at left tackle, Ptacek at end, and others who went in too quickly to record, played for varying periods.

Team Needs More Training

The Aggies made 16 first downs as against one lone first and 10 registered for Hays. A few of the downs were made on passes but the larger number resulted from straight football with the backs going thru on an off tackle smash or a cross buck. Sears, Aggie fullback, who carried the ball over for both touchdowns was a consistent gainer on plunges

(Concluded on page six)

TUESDAY, OCTOBER 5, 1920

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Make the "Beat K. U." slogan a reality.
4. Aggies at the top of conference athletics by 1922.
5. Clean politics.
6. Greater cooperation between alumni, students, and faculty in bringing athletes to K. S. A. C.
7. Remodeling of the auditorium stage.

REPUBLICANS RUSH POLITICS

Now that the Republicans in the college have started out to help put Harding in the president's chair, it is likely that some Democrats will organize a club and so we will have a real political warming right here at school.

A great deal of interest is being shown by the Republicans in this year's campaign. Officers have been elected for the Aggie group, and now the club is after a big Republican who will come to the college to address the students. All members of the Republican club will be wearing badges within the next few days.

So now the Democratic National committee is looking for some one to organize a Democratic club in the college. Any one who wishes to take the responsibility upon himself should write to the College Women's bureau, Department of Organizations, Democratic National committee, Room 97, Murray Hill Hotel, New York City. The work of organizing would have to commence at once. However, as the time is short, the club would have to be started without awaiting a reply from the National committee.

The Republicans have announced that anyone, whether he is a Republican or Democrat, may attend their meetings, as the general purpose of the club is to bring out the issues and candidates of the present campaign clearly so that K. S. A. C. students may vote intelligently. The Republican club is making it possible for many students to vote by urging them to register at their home precinct and then having their ballots mailed home on election day. This is made possible by the absent voters' law which was passed recently.

MELODRAMA ON A PANTRY SHELF

To the uninitiated, the auditorium stage may seem large enough. But to those people who, as members of audiences, have had occasion to note the inadequacies of its appointments, the statement that the auditorium stage is not suited to present demands will sound most mild indeed. It has long been the worry of play coaches and musical directors. Because of the strange freaks of the stage, the dark shadow of failure has hovered over the heads of student casts that have, from time far back, attempted anything from within its borders.

The stage is not lacking in dimension if only width and height are considered. But in the matter of depth it is about as adequate as a shelf from the kitchen cupboard. Elaborate scenic effects are impossible. Ordinary sets, even, must be telescoped and flattened out to meet its narrowing requirements. There is so little of freedom of movement behind the scenes that doors can be but partly opened, players bump into each other and opera casts and choruses must wait outside on the lawn in full costume, to go on, when the whistle blows, with a rush and a scramble that threatens braces and backings and renders of little effect even the most thorough training in ensemble action.

The curtain descends almost in the middle of the stage. The stage director may choose between placing all of his properties back of the curtain and transforming the action into the limited picture-frame effect of lateral movement, or he may place them outside of the curtain in plain view of an audience which when the curtain goes up, holds its breath in dread fear of consequences to juxtaposed chairs, divans, and tables. And when the curtain starts to come down, hysterical ones in the crowd cover their eyes in horror, and actors, losing their characters, scamper for cover, as the great boom crashes floorward through the assemblage of waste paper baskets, wicker chairs, and baby grand pianos.

Every play becomes a melodrama with an earthquake at the end of each act.

So long as these conditions remain, further advancement along musical and dramatic lines is impossible. The difficulty of changing scenery between the acts, the unavailability of depth effect, the limitations upon the actions of the characters, the utter inadequacy of the sheer mechanics of the place, render a really finished production out of the question.

With funds made possible by Festival week, much has been done to fit up the stage in the matter of new scenery, better lighting, and the coordination of controls. But the repairs are but makeshift at best, and the auditorium stage must remain an absolute limitation to further dramatic and musical endeavor until it is remodeled entirely along up-to-date theatrical lines.

WHAT THE PARASITE SAYS

Sure the school ain't got no pep. No more spirit than a bottle of ketchup. I reckon you know that it is run by a few social climbers or maybe porch climbers would be better. Take the S. S. G. A. What is it? What good will it do us, the common stude? They tell me that at the last meeting about half of the school or less decided what was good for the rest of us. I think you have to sign up some pledge or something to get in. Me, I ain't signin' no pledges. Well, we'll wait and see what good we get out of it. It won't amount to anything though. Wait and see.

They had a pep meeting the other night. Everybody howled his or her head off about the team winnin'. That stuff makes me tired. Time to holler is after the game is won. This howlin' stuff don't put no meat on the team, nor no handles on the ball. I ain't goin', because the team let K. U. beat 'em last year.

I come pretty near goin' down to K. U. too. That cured me. I can get all the dope in Henry's Collegian. Come to think of it he ain't takin' it this year. Said he wasn't going to furnish news for all the parasites on the hill. Can you beat that? Well between you and me the paper ain't no good anyway. Just like everything else up here. No pep, no spirit. Ain't got a cigaret have you?

The framing for the roof on the west wing of the engineering building is now practically completed.

The pump which furnishes the water supply for the college was repaired last week.

OVER THOUSAND READ COLLEGIAN

Y. W. CHAMBERS HELP IN SUBSCRIPTION CAMPAIGN

Twenty per Cent Goes to Y. W.—
Alumni Campaign Will Increase
Subscription List

As a result of the subscription campaign for the Collegian which was carried on by the finance committee of the Y. W. Thursday and Friday of the first week of school, over 1,550 students will read their own college paper this winter.

Members of the Y. W. C. A. worked on the campus during the subscription campaign and report a collection of \$1,040. The committee of workers included Florence Henney, Alice Mustard, Belle Hagans, Myra Scott, Esther McStay, Esther Curtis, Ila Knight, Vera McClelland, Marguerite Bonduant, Gladys Ross, Margaret Ansdel and Frances Taylor.

Of the amount collected on the drive 20 per cent will be turned over to the Y. W. as their share of the receipts.

Walter Karlowski, business manager of the Collegian, estimates that the alumni subscriptions will increase the total to \$5,000.

TWO NEW EXPONENTS OF X, Y AND Z ARE HERE

MATHEMATICS DEPARTMENT GETS NEW INSTRUCTORS

Miss Emma Hyde and Mr. Clarence F. Lewis are helping Math Sharks in Straight Course

New teachers in the department of mathematics at K. S. A. C. this year are Miss Emma Hyde and Clarence F. Lewis.

Miss Hyde holds the degree of master of arts from the University of Chicago. She has had experience in teaching mathematics in the high schools of Lawrence, Emporia, Kansas City, James Milliken university, and the Kansas State normal. Miss Hyde is a former president of the Association of Mathematics Teachers and at present is a member of the committee on mathematics of the State Teachers' association.

Mr. Lewis was graduated from the special course in mathematics at the University of Denver, and held the position of professor of physical science and assistant in mathematics in the New Mexico university for several years. During the war he was engaged in the chemical warfare of the United States.

WILL HOLD SPECIAL DEBATE TRYOUTS TO FILL GIRLS' SQUAD

Subject for Debate Is "Resolved That Inter-collegiate Athletics Should Be Abolished"

It has been found necessary to have a special girls' debate tryout in order to fill the fall squad. The tryout will be held Friday, October 8, in A-62a between 2 and 5 o'clock in the afternoon.

The subject for debate is "Resolved That Inter-collegiate Athletics Should Be Abolished." The judges of the tryout will be O. H. Burns and Dr. J. G. Emerson.

Those who wish to try must make an appointment with O. H. Burns whose office is in A-59a. All girls who have had experience in high school debating are urged to try for the squad.

W. L. Chambers Visits College
W. L. Chambers, founder and for 41 years publisher of the Rooks County Record, of Stockton, visited the Industrial Journalism department last week.

Mr. Chambers has leased his paper and is taking a vacation. He came to the college in search of a man to undertake a partnership in the lease. Mr. Chambers has one of the long time records in reading the Kansas Industrialist. He has read it regularly, he says, since 1880.

Mr. and Mrs. Ray Newkirk left last week for their home near Geneseo. Because of the illness of his father, it will be impossible for Mr. Newkirk to continue his work in college this winter.

New Professor Arrives
J. G. Tew, a graduate of Rhode Island State college, who has taken graduate work at Yale and Brown universities and who was recently supervisor of apprentices for the Taft-Pierce Manufacturing company, arrived last week to help handle the freshman and sophomore work in the department of applied mechanics and machine design. Mr. Tew takes the place of L. C. Teeter, assistant in applied mechanics, who left the college last spring to become county engineer of Riley county at a considerable increase in salary.

GYMNASTIC TEAM MAY GO TO WESTERN MEET

Coach E. A. Knoth Will Train K. S. A. C. Men

This year a college gymnastic team will be sent to the Western Intercollegiate Gymnastic, Fencing, and Wrestling Association meet, providing that the college will stand the expense and a good team can be trained. The meet will be held either at Indiana or Wisconsin university. E. A. Knoth, instructor in physical education will coach the team.

Last year Mr. Knoth's team of four men from the University of Illinois won first and second all around championships, three first places in separate events, and the fencing championship. Work on the team will start next week and any man interested in gymnastic work is requested to report at the office of Coach Knoth in Nichols gymnasium.

Miss Velda Stewart, '20, is teaching in the rural high school at Riley.

Engineers To Take Test
Thursday and Friday afternoons, October 7 and 8, between the hours of 4 and 5:45 o'clock all freshman engineering students will be given the efficiency tests that were formulated by the society for the promotion of engineering education. The tests which were performed here last year with gratifying results were also given to engineers in 100 colleges over the United States. Some interesting as well as practical charts and reports of the results have been published.

Prof. E. S. West requests that freshman girls will please be more careful about leaving unmailed letters of a personal nature lying loose about the chemistry labs.

Doing Social Service Work
Miss Winifred Bartholf, who was instructor in the department of physical training last year is doing social service work for the General Electric company at Fort Wayne, Ind. Miss Bartholf has charge of the recreation work of the company and of a number of physical training classes.

E. L. Rhodes, farm management specialist, spent two days last week in Iola where he addressed the farmers' institute in session there on "Co-operative Marketing" and "Farm Management."

Roy Haege, B. S. in civil engineering, '18, visited at the college last week. Mr. Haege has been employed as salesman by the General Electric company for the past year.

WOMEN TO AID OF DORMITORIES

FEDERATION OF CLUBS HOLDS DISTRICT MEETING

Five State Schools Send Representatives to Topeka—Proposed Building to Be in Three Sections

A state-wide campaign has been started for the purpose of erecting girls' dormitories on the campuses of five institutions in Kansas.

Last Wednesday eight district meetings started in different sections of the state, conducted by the Kansas Federation of Women's clubs. These meetings will last for several weeks. A representative of the state-wide committee for the promoting of the dormitory project will be given an opportunity to appear on the program at these meetings. Dean Van Zile spoke Thursday at the meeting at Burr Oak and the last part of October she will speak at Clay Center.

Five state schools sent representatives to a state-wide committee meeting held in Topeka Saturday. The schools are University of Kansas, Kansas State Agricultural college, Kansas State Manual Training normal, Kansas State normal, and Hays normal. The schools each had four representatives, including the dean of women of each of these schools, one faculty member, one student member, and one alumni member. At this meeting they made plans to present the governor for the passing of the appropriation bill through the legislature.

The committee from K. S. A. C. was composed of Mrs. Mary Pierce Van Zile, dean of women; Miss Hildegard Kneeland, faculty representative; Miss Effie Hendricks, student representative; and G. C. Wheeler, of Topeka, alumni representative.

The proposed building is to be divided into three sections. Each section will accommodate 50 girls. Each of these sections is to be as a separate building with the exception that one community kitchen will be used by all.

CHINESE STUDENTS' CLUB ORGANIZES FOR THE YEAR

Will Supply America with First Hand Information of Their Home Country

The Chinese Students' club of K. S. A. C. held its first business meeting his semester last week at 617 Poyntz avenue. The club resolved that the Chinese students will in the future take more active part in churches and organizations where China will be discussed.

"We are going to supply our American friends with first hand information on China, and wish China to be intelligently understood in Manhattan," said one of the Chinese students. He also said, "Because of the friendly relations between America and China the peoples of the two republics should understand each other well, by personal acquaintance and through the exchange of ideas."

There are eight Chinese students in this college. They are only a part of the 2,000 Chinese men and women who are seeking higher learning in colleges and universities throught this country.

Mrs. Richard Miller spent the week end at her home in Kansas City.

Over Thousand Take Chemistry
There is a total of 1,200 students enrolled in the chemistry department this semester. Eight hundred of this number are taking chemistry I, 50 are studying to be professional chemists and the remainder enrolled are in the advanced chemical courses.

NATIONAL GUARD UNIT TO BE ESTABLISHED HERE SOON

Unit Will Rely on Ex-service Men for Officers

Manhattan is to have a National Guard unit consisting of machine guns and infantry, according to the report brought back from Topeka by Major F. B. Terrill, former captain George Humphrey, former Captain Floyd Hawkins and former Lieutenant Morton Stigers, who visited the adjutant general concerning the organization of such a unit.

Th adjutant general was enthusiastic at the prospect, and assured the delegation of his hearty support. With the number of ex-service men in the city and college, this organization should be one of the best in the state.

The unit will rely on ex-service men for officers, and it will be necessary to enlist at once as it is desired that a working unit be formed immediately. Enlistments are to be made for a period of three years, but in the case of a member changing location, he will either be transferred to another unit or discharged.

Reserve officers are permitted to accept duty in this project by a recent ruling of the war department. Application should be made to one of the previously named men.

Miss Ada Dykes, who was formerly an instructor of public speaking at the college, is now taking graduate work here. She has been in chautauqua work the past two years.

KANRED TO TOP IN MORE STATES

IS INDORSED BY MISSOURI AND ARIZONA

New Variety Yields Are Larger and More Disease Resistant Than Soft Wheat

Here is some more good news about Kanred wheat, the new variety developed by the college and about which we have heard so many good things the last few years. Kanred is a success in Missouri and Arizona.

Variety tests of wheat conducted at the Missouri experiment station at Columbia have just been reported to crop specialists in the college department of agronomy. The report says that the eight leading varieties yielded from 17 bushels to 24 bushels per acre. Kanred was at the top of the list with a yield of six bushels more than Karkoff and more than any soft wheat included in the test.

In a letter written recently to L. E. Melchers, head of the work in plant pathology here, W. E. Bryan of the department of plant breeding at the University of Arizona has the following words of commendation for the new variety:

"I might say that the Kanred wheat in the Salt River valley near Phoenix this last spring, was the most disease resistant variety which we had growing there on a field scale. We had growing there the past season a number of Turkey strains originally from Kansas, the Early Baart, the Sonora, the Macaroni, and several hybrid varieties. The Kanred, however, was more disease resistant than even the Mararoni."

Elsa Ann Brown spent the week end in Topeka.

Work On Pump House Delayed

The construction of the new pump house on the east edge of the campus has been indefinitely delayed because of financial embarrassment, according to G. R. Pauling, custodian. The matter now awaits action of the state legislature. The building, if erected as planned by T. R. Grist, student in engineering, will be a neat, octagonal stone structure. The two frame buildings now being utilized will be torn down.

G. W. Salisbury, a former Aggie graduate, is now assistant county agent leader in the farm bureau office with headquarters at Manhattan. Mr. Salisbury comes from Oswego, where he has been employed as county agricultural agent.

Miss Grace Gish, '20, is teaching physics and mathematics in the Medicine Lodge high school. She has charge also of girls' athletics and is now coaching the girls' basket ball team.

PRESENT PLAY IN NOVEMBER

PURPLE MASQUE PLAN TO GIVE NEW YORK PRODUCTION

Tryouts Are Open to All Students—
Date of Tryouts Not
Yet Set

Purple Masque plans to present one of the successful New York plays some time in November. Tryouts for the play are open to any one enrolled in college. A definite date for the try-outs has not been set but will be announced later.

Purple Masque is a dramatic fraternity organized to promote interest in dramatic art. The present officers are Vorin Whan, president; C. C. Wilson, vice president; Renna Rosenthal, secretary; Herbert McClelland, treasurer. This organization is boosting the plan for remodeling the stage in the auditorium.

A new plan of giving one-act plays once a month will be tried out this year. The best actors in these short plays will be chosen for the parts in the fall and Festival week plays. More definite plans will be announced in the future.

SOCIETY

Announcement has been received of the engagement of Miss Faith Hull, a student last year, to Mr. Cecil Allison of El Dorado. The wedding will take place at Christmas at Whiting, Ia., where Mr. Allison is engaged in farming.

The annual mixer of the School of Agriculture is to be held in the recreation center in Anderson hall next Friday evening at 8 o'clock. Every man and woman in the School of Agriculture is invited. Those in charge extend a special invitation to vocational students. This year the mixer is being held in the interests of the School of Agriculture athletics and for that reason 25 cents admission will be charged. The school demonstrated last Friday that it has a winning team which is deserving of all the support the students can give it. These annual mixers always have a sort of "homey" atmosphere about them which is not true of the college mixer and for that reason afford an unusual opportunity for the School of Agriculture students to find out just who is who in their division.

At 3:30 this afternoon about 200 girls of Prof. R. R. Price's Sunday School class met at Lovers' lane; from there they hiked to the Country club where Mrs. Price had prepared an informal entertainment in their honor. The object of the afternoon is to enable the girls to become better acquainted with one another.

Fred E. Davis has pledged to the Alpha Psi fraternity.

Sigma Phi Delta has pledged C. O. Keller, of Carthage, Mo., sophomore in animal husbandry.

Phi Delta Tau have pledged A. T. Newman, Coffeyville; Joe Bellamy,

Manhattan; Bruce Johnson and Belmont Rising, Salina.

Miss Gladys Love and Mr. Forest Langdon were married October 1 at the home of the bride's parents, Mr. and Mrs. Alexander Love, 727 West Fortieth street, Kansas City, Mo. Mrs. Langdon is a graduate of home economics in '19, and a member of the Eurodelphian literary society. After graduation Mrs. Langdon was dietitian for a hospital in St. Louis, Mo. Mr. Langdon attended college in '17 and '18, and is now engaged in business in Kansas City.

The Students' Self Governing association held its first annual all student mixer Friday evening, October 1, at Nichols gymnasium. As soon as the pep meeting at the Auditorium was over students went immediately to the gym which had been decorated with ferns and potted plants. At the door each student was tagged before entering the dance hall. Wheeler's orchestra furnished the music for the dancing. Students who did not wish to dance went to the literary society halls where get acquainted games were played. Throughout the evening ice cream cones were served. There were approximately 1,000 students present.

The Hamilton and Ionian literary societies and invited guests, chaperoned by Miss Grace Derby hiked to Wild Cat Saturday evening after the football game. After the wienie roast the crowd grouped around a huge bon fire and sang Hamp-to and college songs. A short program composed of talks by some of the members and readings by Miss Elinor Watson and Miss Oceola Burr were given. Twenty-five couples were present.

The Webster and Eurodelphian literary societies in joint session Saturday evening held open house. Invited guests of the societies were Professor and Mrs. R. R. Price of the history department, Rev. and Mrs. M. S. Collins of the Methodist church, and Rev. W. U. Guerrant, student pastor of the Presbyterian church.

The Delta Tau fraternity entertained with a house dance at their chapter home Friday evening, October 1.

The Franklin literary society held a hike last Saturday evening after the football game. About 50 of the members of the organization attended. They hiked to Wild Cat where the evening was spent roasting wienies and toasting marshmallows. Prof. and Mrs. E. S. West chaperoned the party.

The Theta Chi Gamma, honorary general science sorority will hold a reception for all general science girls in the home economics rest room, Thursday, October 6.

Dr. and Mrs. C. W. McCampbell, Prof. and Mrs. E. V. James and Prof. and Mrs. A. M. Paterson entertained Saturday evening, October 2, at the McCampbell home at 343 North Fourteenth street in honor of Prof. and Mrs. E. F. Ferrin and Prof. and Mrs. Stanley Smith. Bridge was played at seven tables. Professor and Mrs. Ferrin are leaving soon for St. Paul, Minn., where Professor

Ferrin has a position in the Minnesota State university, and Professor and Mrs. Smith are leaving within a few days for Fargo, N. Dak., where Professor Smith will teach in the North Dakota agricultural college.

Prof. and Mrs. H. B. Winchester entertained with a bridge party, Friday evening, October 1, at their home, 1221 Laramie in honor of Prof. and Mrs. E. H. Ferrin who are leaving soon for St. Paul, Minn., where Professor Ferrin has a position in the university.

A pretty announcement party was

given by Miss Pauline Clarke Wednesday evening at the Delta Zeta house, announcing her engagement to Mr. Dorian Ricord, of Kansas City, Mo. Miss Clarke's sorority sisters and Miss Florence Evans were guests at the party, at which a color scheme of rose and green, the Delta Zeta colors, was used. Killarney roses were given as favors. Miss Clarke, who is at present manager of the college canteen, graduated from K. S. A. C. in 1915. She is a member of the Delta Zeta sorority, the Eurodelphian literary society, and the Newman club. During the war Miss Clarke served

in the medical department as dietitian at Camp Lewis, and later as cafeteria director at Camp Meade. Mr. Ricord, who is managing editor of the Implement and Tractor Dealers Trade Journal at Kansas City, graduated from the K.S.A.C. journalism department in 1916. He is a member

of the Acacia fraternity and while in college served as business manager of the Collegian and was a member of the Royal Purple staff. During the war he was overseas with the 117th ammunition train and after his return was for a time in sales work with the John Deere Plow company.

Prosperity from the Soil.

America must never sacrifice agriculture to industry.

To turn the nation into a vast network of factories at the expense of the farms would force importation of food upon a scale which other nations could not hope to meet.

The farm feeds us and feeds our industries. The farmer is a foremost citizen. He is recognized as such by this bank and every service is extended to him as readily as to another business man.

Perhaps you need a nice calendar, we have a few left.

presents

**JOHN
BARRYMORE**
in
'Dr. Jekyll and Mr. Hyde'

The greatest drama of dual identity ever written, enacted by America's greatest living actor. Robert Louis Stevenson's immortal work presented with life-like realism.

BLACK EYE FOR AMES IN DEBATE

AGGIE MEN ALREADY PREPARING FOR DUAL MEET

Four Experienced Men on the Squad
—Are Busy Gathering Information from Various Magazines

"A black eye for Ames." That characterizes in a word the debating situation as it is showing up to date. The Aggies are scheduled to have a dual debate with Ames the latter part of November upon the question: "Resolved: That a progressive tax on land should be adopted in the United States."

Already eleven men under the direction of Prof. O. H. Burns, debate coach, are trying out for the team every Tuesday and Thursday at 5 o'clock. From the men trying out six will be selected to represent the interests of K. S. A. C. against Ames. According to members of the squad this is to be the biggest debate of the season. The fact that the squad is already working hard on a debate to be delivered two months hence is evidence that Professor Burns, too, realizes the importance of the contest.

The work so far has been mainly the collecting of facts although the work in delivery is to commence immediately. Just now Professor Burns and his men are leaving no books untouched nor any magazines unexplored in fortifying themselves with information. With four experienced men on the squad the prospects cannot help being bright. A. J. Englund and J. Wheeler Barker are both men with two years' platform experience while Vincent Cool and Ellis Kimble both had experience in the pentagonal debates here last year. The new men out are: W. W. Weaver, J. W. Farmer, M. E. Ramsey, E. J. Jelden, Clarence George, L. L. Haggard, and W. H. Knostman. All of these men have the qualities of pep and persistence which are absolutely necessary in debate work.

NEW DIRECTORY OUT THIS MONTH

NAMES POSTED IN MAIN HALL FOR CORRECTIONS

New Suggestions for Directory Will Be Welcomed by Registrar—Few New Features This Year

This term's student directory is being made ready for the printer at the registrar's office. It will probably make its appearance by October 25.

For the last few days there has been a list of student and faculty names on the bulletin board in Anderson hall for the purpose of corrections. All persons of the college are asked to watch this bulletin board for their names and correct any mistake in the address, phone number, or classification, as this is the only way in which all of the students can be located.

There will not be many new features in the directory this year. The registrar asks that if any student or member of the faculty has any new suggestions to make for this term's directory, that they will call at her office and speak to her about it.

Bill Knostman spent Sunday at his home in Wamego.

Miss Ernestine Bibb is teaching domestic science and art in the seventh and eighth grades at Los Angeles, Cal.

F. H. Gulick of the home study service will teach in the animal husbandry department while the stock judging teams are out of town.

Edna Chapin is attending Sacred Heart academy and will return to college next semester.

Three New Classes Organized
The new classes have been organized for the men taking training under the Federal board for vocational education. They are classes in poultry raising, dairying, and general agriculture. The classes have been organized for the benefit of the non-collegiate men who desire the work that is given only in the collegiate course.

K. S. A. C. WILL NOT SEND EXHIBITS TO CHICAGO SHOW

To Be No Student Grain Judging Contest This Year

The International Hay and Grain show in connection with the International Livestock show will be held in Chicago from November 22 to December 4 according to S. C. Salmon, professor of farm crops.

"The show is open to the entire agricultural world," explained Professor Salmon, "although in the contests, Kansas and the states directly east will be alone in one class and will have only to compete with each other. The agricultural college will send no exhibits this year. The exhibits from Kansas will be entirely from farmers."

There will be no student grain judging contest this year although it is thought that one can be arranged for next year. So far the judges for the grain contest have not been chosen. G. I. Chrittle is the superintendent of the exhibit, and B. H. Heide is the man to write for the premium lists.

The Crowd Pleased Mike
"During all the 16 years of my stay in Manhattan I have never seen a larger crowd at an opening game than held forth at the football match last Saturday." That is Mike Ahearn's statement concerning the turnout at the premier session of the 1920 season on Ahearn field. Mike continued, "I was a little late in getting to the field on account of the last minute ticket buyers at the office, and when I got to the field I thought that there must be some mistake. I had to take three looks before I was sure as to whom we were playing. From the size of the crowd I judged that it must be the homecoming game, and with K. U., at that. My estimate of the attendance is between 2,500 and 3,000."

Dean Helen B. Thompson and Miss Margaret Russell were dinner guests Wednesday at the Girls' Cooperative club at 1503 Fairchild.

Miss Odessa Dowd of the chemistry department, is studying for her master's degree at the University of Wisconsin. During her leave of absence Miss Esther Brunner is taking her place.

George Vander Veer of the chemistry department, resigned to accept a position at the University of Illinois.

A. M. Paterson, professor in the department of animal husbandry, was in Kansas City Tuesday purchasing lambs for the experimental feeding tests this winter.

Among the several hundred students enrolled in the division of agriculture are four students who are taking postgraduate work in the department of animal husbandry, Frank Gulick, Dale Fetzer, Henry Marston, and W. R. Horlacher.

This summer C. E. Reid, professor of electrical engineering, designed a city lighting system for Athol, which was put on a transmission line from Phillipsburg. The lights were turned on for the first time September 18 by Professor Reid.

SCHOOL OF AG TROUNCES ALMA

PREP SCHOOL ELEVEN REGISTERS 25-0 WIN

Harold Theiss, Freshman in Engineering Is Coaching Team—Schedule Incomplete

The School of Agriculture started off its football season in the proper way when it won from Alma high school with a score of 25 to 0 last Friday afternoon.

According to A. P. Davidson, principal of the school, there is a husky bunch of fellows out this year and with proper coaching the squad will no doubt continue to bring home the long end of the score. So far the team has been without a regular coach.

Harold Theiss, who was a member of last year's team and who is now a freshman in engineering, has been doing the coaching. Since the schedule is rather incomplete, just where the next game will be played is not known. The big game of the season, however, will be with St. Benedict college of Atchison, November 20.

Boyd Agnew, who was graduated last spring, left last week for Aberdeen, Ia., where he will have charge of agriculture, manual training, and athletics in the high school.

S. C. Salmon, professor of crops, left for Colby last Friday morning where he inspected sorghums injured by the recent frost.

A careful study of the H. C. L. as it affects Aggie students discloses the fact that the following commodities have not advanced in price: button hooks, radium, postage stamps, toy balloons, marriage licenses, and strychnine.

Major J. L. Wier and wife of St. John Military academy at Salina were dinner guests at the Phi Delta Tau house Saturday evening.

Miss Aileen Neusbaum, who for the past two years has been employed as stenographer in the printing department, has resigned her position.

Loy Tabor, who was a student in engineering in K. S. A. C. last year and is now employed as cashier in the Schulze Baking company at Kansas City, Mo., spent the week end in Manhattan visiting relatives and school friends.

The deans all worked overtime last week preparing data for the biennial report for the governor and the state board of administration.

All engineering freshmen will be given the psychological tests by the department of education next Thursday and Friday afternoons from 4 to 5:45 o'clock.

The road materials testing laboratory of the engineering experiment station has prepared an exhibit for the good roads section at the Wheat show at Wichita.

Arthur Lee, a graduate of the University of Illinois, has been employed as instructor in architecture to take the place of S. A. Smith who is leaving to accept a position at the North Dakota State college.

Paul Sharp, Jimmy Albright, and Maurelle Dobson drove to Winfield Saturday to spend the week end.

Helen Lawrence, '20, and Velma Meserve, '20, spent the week end at the Alpha Delta Pi house.

Kent Dudley spent the week end at his home in Iola.

Season now begins for woolen hose and kid gloves. The best quality at Rogers, Haberdasher.

ANNOUNCEMENTS

Girls not enrolled in regular swimming classes may swim on Tuesday and Thursday afternoons between 4 and 5 o'clock.

Hockey practice begins Tuesday, October 5. The following practices have been scheduled: freshman, Friday; 5 o'clock; sophomore, Wednesday 5 o'clock; junior and senior, Tuesday 5 o'clock.

Thursday afternoon after Vespers All Big and Little Sisters will meet with their captains for the get acquainted hikes which have been planned.

Mr. McCarthy, '07, Mr. Bennett, '18, Fred Layton, '15, of Blue Rapids, and J. G. Cowell of Clay Center, were dinner guests at the Delta Tau Delta house Saturday evening.

Miss Katherine M. Bower, instructor in the English department spent the week end in Kansas City visiting with her parents and friends.

Gordon Gilman, who is enrolled in electrical engineering, spent the week end with his parents at Council Grove.

Sunday dinner guests at the Pi Kappa Alpha house were Mr. and Mrs. Graham and Miss Irene Graham, Mr. and Mrs. Colburn and Miss Ethelyn Colburn, Mr. and Mrs. E. G. Jenkins and Miss Aurile Jenkins of Perry, and Mr. and Mrs. Harold Goble of Riley.

Clifford Stratton, secretary of the alumni association, and Mrs. Stratton, were Sunday dinner guests of the Delta Tau Delta fraternity.

Coach W. C. Bachman, E. A. Knott of the physical training department, and Dr. W. E. Muldoon were in Kansas City over Sunday visiting friends. Mike Ahearn says that this is not going to be a permanent form of celebration after every game.

The T. P. M. club will meet today at the home of Mrs. J. O. Hamilton with Mrs. Hamilton and Mrs. D. A. Dodd as hostesses. The following program will be given: "Richard Jeffries" by Mrs. G. A. Dean, "October Musings" by Mrs. A. H. Bressler, "Nature in Poetry" by Mrs. A. R. Springer, and music by Mrs. Roberts.

Flannel shirts and jerseys of all descriptions. Rogers' Haberdashery. Phone 157 when you get that bundle ready. Manhattan Steam Laundry. 4-8.

The department of sociology will be in charge of the meeting of the Domestic Science club Thursday, October 7. A paper on the "Development of Pottery in the United States" will be read by Mrs. J. T. Willard and roll call will be answered by "Other Collections." The Fifth District federation will also be discussed. The members of the sociology department are: Mrs. Smith, Miss Harriet Parkerson, Mrs. C. B. Daughers, Mrs. Roberts, Mrs. Spilman, and Mrs. W. M. Jardine.

Ralph Foster, '20, editor of agricultural extension of the University of Arkansas, is spending the week in Manhattan.

Paul Fink, John Heshon, and Dick Phayer of Downs, were guests at the Delta Tau Delta house Saturday afternoon.

Prof. Harry Brown of Kansas City, Mo., is here for a few days. He is repairing the organ in the Presbyterian church. Professor Brown formerly directed the college band and orchestra here and is well known at the college as well as by the townspeople. He is at present director of instrumental music in the city schools of greater Kansas City.

Mr. and Mrs. H. O. Garvey of Topeka, spent the latter part of last week with their daughter, Annabel Garvey, who is instructing in the English department.

Miss Lovern Webb, '20, visited in Manhattan during the week end.

TEACHERS GET SCRATCHED BY THE AGGIE WILDCATS

(Concluded from page one)

while the speedier Cowell showed well on broken field work. Had the backs been afforded better interference, Aggie gains would have been more extensive.

The Wildcat team this year will be one that will bear watching and local support from the student body. The penalties in Saturday's game were heavy, but that is a common occurrence in early season games on account of the eagerness of the men to get in the game, and with training most of the technical fouls will be avoided. Coach Bachman has a gang of Wildcats with the fighting spirit developed to the nth degree, and with further training to rub off the rough spots, and loyal support from the student body, a successful season may be looked for.

Miss Elizabeth Adams, of Maple Hill, spent the week end in Manhattan visiting with her sister, Miss Emily Adams.

Ernest Lahn, who is a senior in agriculture, spent the week end at his home in Abilene.

PRESENTS

"IL TROVATORE"

Direct Engagement From The Metropolitan Theaters St. Paul and Minneapolis—Now Playing Kansas City

THE COMPANY OF FIFTY INCLUDES

Beatrice Pizzorni of La Scala, Milan
Consuelo Medina of the Colone, Buenos Ayres.
Speria Castel, of the Reggio, Torino
Alfredo Graziani, of the Metropolitan, New York

Giuseppe Dori of the National, Havana
Eduardo Lejarazu of the Boston Opera
Soto-Mayor of the National, Havana
Francisco Cruz of the Liric, Rio Janeiro

WHAT MUSICAL CRITICS SAY

St. Paul News: "The role of Azucena in 'Il Trovatore' was extraordinarily well sung by Speria Castel. She possesses a remarkably free, clear and flexible contralto, responsive to demand. Her reception was deservedly enthusiastic."

Kansas City Journal: "Alfredo Graziani sang with tremendous power and tonal beauty, and his acting was strikingly fine."

Omaha Bee: "When 'Il Trovatore' is presented with the spirit and musicianship which the principals and conductor endowed it last evening, it fairly dazzles with the wealth of its musical beauty. Beatrice Pizzorni was a constant joy. She is young and her voice is of excellent quality and she sang with a beauty of tone and a surety and clearness which won her deserved recognition. She is not only a singer, but an actress of ability."

NO VACATION FOR ONES WHO STAY BEHIND

AT LEAST TWO HUNDRED STUDENTS TO WICHITA

TRAIN LEAVES AT 4:30 A. M.

Special Coaches From Wichita Leave at 10:15 Saturday and Sunday Evenings—Many Going From Manhattan

No vacation will be granted tomorrow to the students who stay at home. This was the announcement made by President Jardine before leaving for Wichita Wednesday evening. At that time only 200 students had purchased tickets to Wichita, but it is expected that a larger number will buy tickets later. Tickets may be purchased up until time for the special Aggie train Saturday morning.

Leave Early Saturday Morning

The Aggie special will leave Manhattan tomorrow morning at 4:30 and is due to arrive in Wichita at 8:50, in time for the day's program which commences at 9 o'clock. There will be special touring coaches from Wichita to Manhattan, which will leave Wichita at 10:15 Saturday evening, and at the same time Sunday evening.

It is in large part due to the work of the various college organizations that the holiday has been made possible. Practically all of the larger divisional organizations have been actively boosting the Wichita trip. In the agricultural division, the Block and the Dairy association have all been active. The engineers have planned several special stunts to be given between Manhattan and Wichita. The stunts have been worked out by a special committee with Gail Lynch as chairman. The Aggie Press club, the organization of journalism students is putting out a special eight page Collegian, featuring the agricultural and engineering division.

Will Visit Places of Interest

Parties of students from various divisions are planning to visit in Wichita places of especial interest to students of their division.

It is probable that the attendance from K. S. A. C. will be augmented by a large number of townspeople who will choose tomorrow as the day to visit the fair, both on account of Aggie Day and on account of Harding's speech.

The Wichita Golden Jubilee in honor of the city's 50th anniversary began Monday noon with the Wichita day parade held in connection with the Wichita Wheat show and exposition. The Wheat show doors were opened at 1 o'clock. It is predicted that the attendance at the Wheat show this year will be a record breaker, 300,000 persons being expected to witness some part of the two weeks' program. Nearly a half million dollars has been spent through the southwest for the purpose of making the Wheat show an unqualified success.

SONORA OPERA COMPANY IS TO PRESENT IL TROVATORE

Will Be at Marshall Theater Next Tuesday Evening

The Sonora Grand Opera company, which is to present Il Trovatore at the Marshall theater next Tuesday evening, has just returned from a successful tour of South America and Europe.

The company has one of the most extensive repertoires maintained by any company, either in Europe or America, and numbers among its brilliant successes Aida, Faust, Lucia di Lammermoor, Tales of Hoffman, Rigoletto, and Il Trovatore.

A Grand Opera orchestra is carried with the organization under the conductorship of Ignacio del Castillo, who has had the honor of conducting for Tetrassini for two seasons, and who formerly was first conductor under Polacco at the Metropolitan opera house, New York City.

Will Give Concert

The assembly program for next week will be held Tuesday, October 12. The program will consist of a concert to be given by the College band and the Apollo club. The entertainment will virtually be the same as the one given at the Wheat show in Wichita Saturday.

Prof. Albert Dickens left Tuesday night for Wichita, where he will judge the horticulture exhibit at the wheat show.

Doctor Jardine To Speak
President William M. Jardine will address the Science club in the home economics rest room at 7:30 o'clock Monday evening. He will discuss the system used in California to encourage the settling of farm land by competent resident owners. The meeting will be open to the public.

HE PUTS MEN ON THEIR FEET

STRICKLAND HAS LONG STRING OF STUDENTS

28,000 Men and Women Depend on Strickland for Chances of Success

A man who not only understands men but gives men a chance to benefit by that understanding is V. L. Strickland, director of the home study service of the Kansas State Agricultural

V. L. STRICKLAND

college, upon whom 28,000 men and women depend for their chances of success in the world.

Mr. Strickland puts his personality on paper so successfully that he makes friends of all his 28,000 pupils. "You put me on my feet and got me started," said a young man to Mr. Strickland. This man has completed his home study courses in practical electricity, shop mathematics, and gasoline engines and had taken the short course in auto mechanics offered by the college. He was on his way to the southern part of the state to accept a job in a big garage where he was to receive a large salary for his services as electrician.

In Chicago is a young high school teacher of agriculture who has achieved so much by his teaching that one of the big Chicago papers recently gave an illustrated account of the results of his work. He qualified for the position as instructor through the help received from the correspondence courses of the home study service and gives the department credit for his success.

Students whose attendance at high school or college has been interrupted or who for any reason have fallen behind in their work and wish to use their spare time catching up find the home study service of utmost value.

Pupils Like Human Touch

The personal interest which is given to each person taking up the correspondence work is shown by a letter from a woman who had finished a home study course. She says: "I like the human touch which you give to the corrections on your papers. I think it makes the instruction seem more real to the student. The remarks show careful grading and individual interest in the student himself. I was always more interested in your remarks than in the grade you placed on my paper."

Mr. Strickland became director of the home study service in the fall of 1918. Under his direction the department has had rapid growth. The enrolments in regular correspondence courses show an increase of 118 per cent over those of the previous biennium.

Lessons to 28,000 Persons

During the last year 28,000 persons were given continued instruction services of three lessons or more. In addition to this the department has had 18,375 contacts by letter alone with the people of the state as well as other thousands through lectures, lantern slides, and other forms of service.

Posted In The Gym

Notice of the stunts that will have to be performed by girls who wish to win red and blue caps in swimming has been posted on the bulletin board in the gym. The Women's Athletic association gives 50 points for a blue cap and 25 points for a red cap toward a K sweater.

Miss Dorothy Churchward will spend the week-end at her home in Wichita.

LINCOLN SOCIETY ELECTS OFFICERS FOR SEMESTER

B. J. Miller Is Chosen President—B. A. McCampbell Is Vice President

The Lincoln literary society elected the following officers for the fall semester: president, B. J. Miller; vice president, B. A. McCampbell; recording secretary, E. K. Glover; corresponding secretary, F. Hagans; treasurer, M. C. Wallace; critic, E. R. Honeywell; marshal, L. W. Marshall; assistant marshal, G. E. Stutz; board of directors, U. P. Olson, R. T. Kinman, S. N. Rogers; program committee, V. E. Fletcher, J. W. Hale, R. J. Weisner; Collegian reporter, E. K. Glover; cheer leader, E. R. Honeywell; chorister, B. J. Miller.

KNOSTMAN WILL HEAD S.S.G.A.

MIKE PTACEK NAMED VICE PRESIDENT

Small Percent of Members Vote—Offers Chance for Machine Politics in School

Bill Knostman was elected president of S. S. G. A. for the coming year and Mike Ptacek was elected vice president at the S. S. G. A. election which was held Tuesday.

Bill Knostman is one of the best known men among the students. He is the holder of two basketball K's, one earned in 1917 on a Valley championship team, and one in 1920. He is a good student as well as an athlete. The coveted junior honors in the division of general science were awarded to him last commencement.

Mike Ptacek is the youngest of the Ptacek brothers who have all taken a prominent part in the life of K. S. A. C. during their time in school. He is a candidate for the varsity squad and bids fair to place this year. Politics are no new game to him, for he held the office of class president during the spring semester of his freshman year.

In Tuesday's election only 16 per cent of the entire student body voted and only 35 per cent of the members of S. S. G. A. Such a condition offers excellent opportunity for machine politics to hold sway in the political world of the school. The election was well advertised and was held in recreational hall where students are constantly coming and going. Every member of S. S. G. A. must have known that the election was being held.

The returns of the election are as follows:

For president—Bill Knostman, 284; Ray Knox, 76. For vice president—Clyde Wilson, 149; Mike Ptacek, 210. For amendments as recommended—Yes, 333; no, 12.

DR. NABOURS HOME FROM WORLD TOUR

VISITS NINE COUNTRIES DURING YEAR'S ABSENCE

INVESTIGATES FUR INDUSTRY

Finds Wonderful Transformation in France Since Last November—Germany in Effort to Regain Lost Position

Dr. R. K. Nabours, head of the department of Zoology who has been on a trip around the world investigating conditions and opening up trades in the fur industry, returned Tuesday to take up his work at the college from which he has been absent since last fall.

He visited France, Germany, Italy, Greece, Turkey, Russia, the frontier of Afghanistan, India, and returned by way of the Straits Settlement and Philippines. The fur industry he found had suffered a slump in the last few years and was not in very good condition but with the return of settled conditions the world over, the future of the fur industry looks bright.

French Conditions Improving

In speaking of the war torn countries which he visited Dr. Nabours said: "When I visited France last November conditions were bad, the lands were torn up, ruins were everywhere and it seemed impossible that the country could ever be rebuilt. This spring, however, when I came back through France I found that a wonderful transformation had taken place, the lands were cleared, the barbed wire rolled up and practically the only sign of ruins were the walls of buildings that were still standing in their war torn condition. Good crops were everywhere, and the people were cheerful and forgetting the war."

"The Germans are making a brave effort to regain the position they lost during the war but they are still very hungry. I was unable to penetrate into the heart of Bolshevik Russia but those parts that I did visit were in very bad condition. I found that the American people were feeding 750,000 people a day and 500,000 of these would starve if it were not for the American people. Russia still remains the problem of the world."

Turkey Still At War

"In Turkey the conditions were

still as if in a state of war. Everywhere were soldiers, and warships were in every harbor. The city of Constantinople is the most interesting city I have ever visited. In it are people of every nation of the world. American business men are taking a prominent part in affairs, as they are in every part of the world. They are participating in the business affairs of the world in a big way and most of the important men in this capacity are college men. Their greatest need at the present is for college men who have a business training.

English Good Sports

"England is entering into the spirit of reconstruction and the fighting men of England who had suffered all during the war at the hands of the Germans are wishing that Germany may soon reenter the world of commerce and business. The English are good sports and seem to cherish no resentment against the foe they were fighting but two years ago."

In India Dr. Nabours found a very interesting country. Out of a population of 315,000,000 there are 300,000,000 who are children in intellect. When he got back to Manila he found the prevalence of American customs and western civilization with the Americans as usual taking a very prominent part in the business of the country.

"The world has suffered a severe shock and conditions are unsettled but gradually are becoming normal again," said Dr. Nabours, likening the condition of the world to a volcano. "After a great eruption there are a number of little volcanoes which are continually springing up for some time after the large volcano has settled down. In the course of time, however all becomes normal again."

PURPLE MASQUE TO HAVE HOME

WILL BE ROOM ON THIRD FLOOR OF ANDERSON

To Contain Scenery Enough for Staging One Act Plays—Will Offer New Talent

Purple Masque is working on plans that will enable it to have a permanent home in which its members will be able to accomplish some outlined plans that they have in mind.

A room on the third floor of Anderson hall has been chosen as a permanent home. In this room they hope to have enough scenery to put on one-act plays of all kinds. The idea of one-act plays is to find out the ability of persons inclined toward dramatic work.

Delta Zeta held open house Thursday evening from 7 to 8 o'clock for the Pi Kappa Alpha fraternity.

SOLDIERS TO TANGLE WITH AGGIE SQUAD

BACHMAN FEEDS WILDCATS RATHER STRONG MEAT

NO DOPE ON FUNSTON TEAM

Aggies in Better Trim Than at Last Year's Funston Game—Line-up to be Practically Same as at Hays Contest

While the fortunate Aggie students who have so managed as to have the \$7 necessary to make a trip to the "Peerless Princess of the Plains" are making merry at the Wheat show on Saturday, the rest of us students will be treated to an exhibition of football put on by the Wildcats and the Camp Funston soldiers. It promises to be a real showing of the national collegiate pastime.

Feeds 'Em Strong Meat

Coach Bachman has been feeding his Wildcats on some pretty strong meat this week getting them ravenous, so to speak, for the fray. The rough spots which showed up in the Hays game in a rather glaring manner have been polished off quite largely. The backs who drew penalties for getting in motion before the ball was snapped and the linemen who were assessed yardage because they were off side have drawn a modicum of attention from the coach. Judging from the subdued air these men have been wearing, the remarks of the coach have taken root and are destined to remain with them, to the detriment of opposing teams.

The Aggie lineup will be practically the same as that which started the Hays game. Winter, right tackle, was called home by sickness in his family the first of the week and may not return in time to get in the game. Randles' ankle may be in such shape that he will be able to participate in the battle on Saturday. Outside these two possible changes, there will probably be no difference between this week's and last week's initial appearance of the Wildcats.

No Dope On Funston Team

When questioned regarding the game Coach Bachman stated, "We are going to play Camp Funston on Saturday, but we have no dope on the team that will oppose us." Those who saw last year's game will recall the Funston aggregation as a rough team, with little practice or conditioning. However, that gives no line on Saturday's game as the personnel of the Seventh division, stationed at the camp, is entirely different from that of the organization last year.

The Aggies are in better trim than they were last year at the time of the Funston game, and in all probability there will not be so many injuries as last year even though the play be as rough. The Wildcat backfield is also heavier than the 1919 combination of backs and should be able to puncture the forward wall of the soldiers for more consistent gains. The line will be heavier than that which started last Saturday's game, for with Winter gone Stauffer, a 200-pounder will probably perform at tackle. Should Randles get in at end it will mean a gain of some 20 pounds over the weight of Sites who played last Saturday.

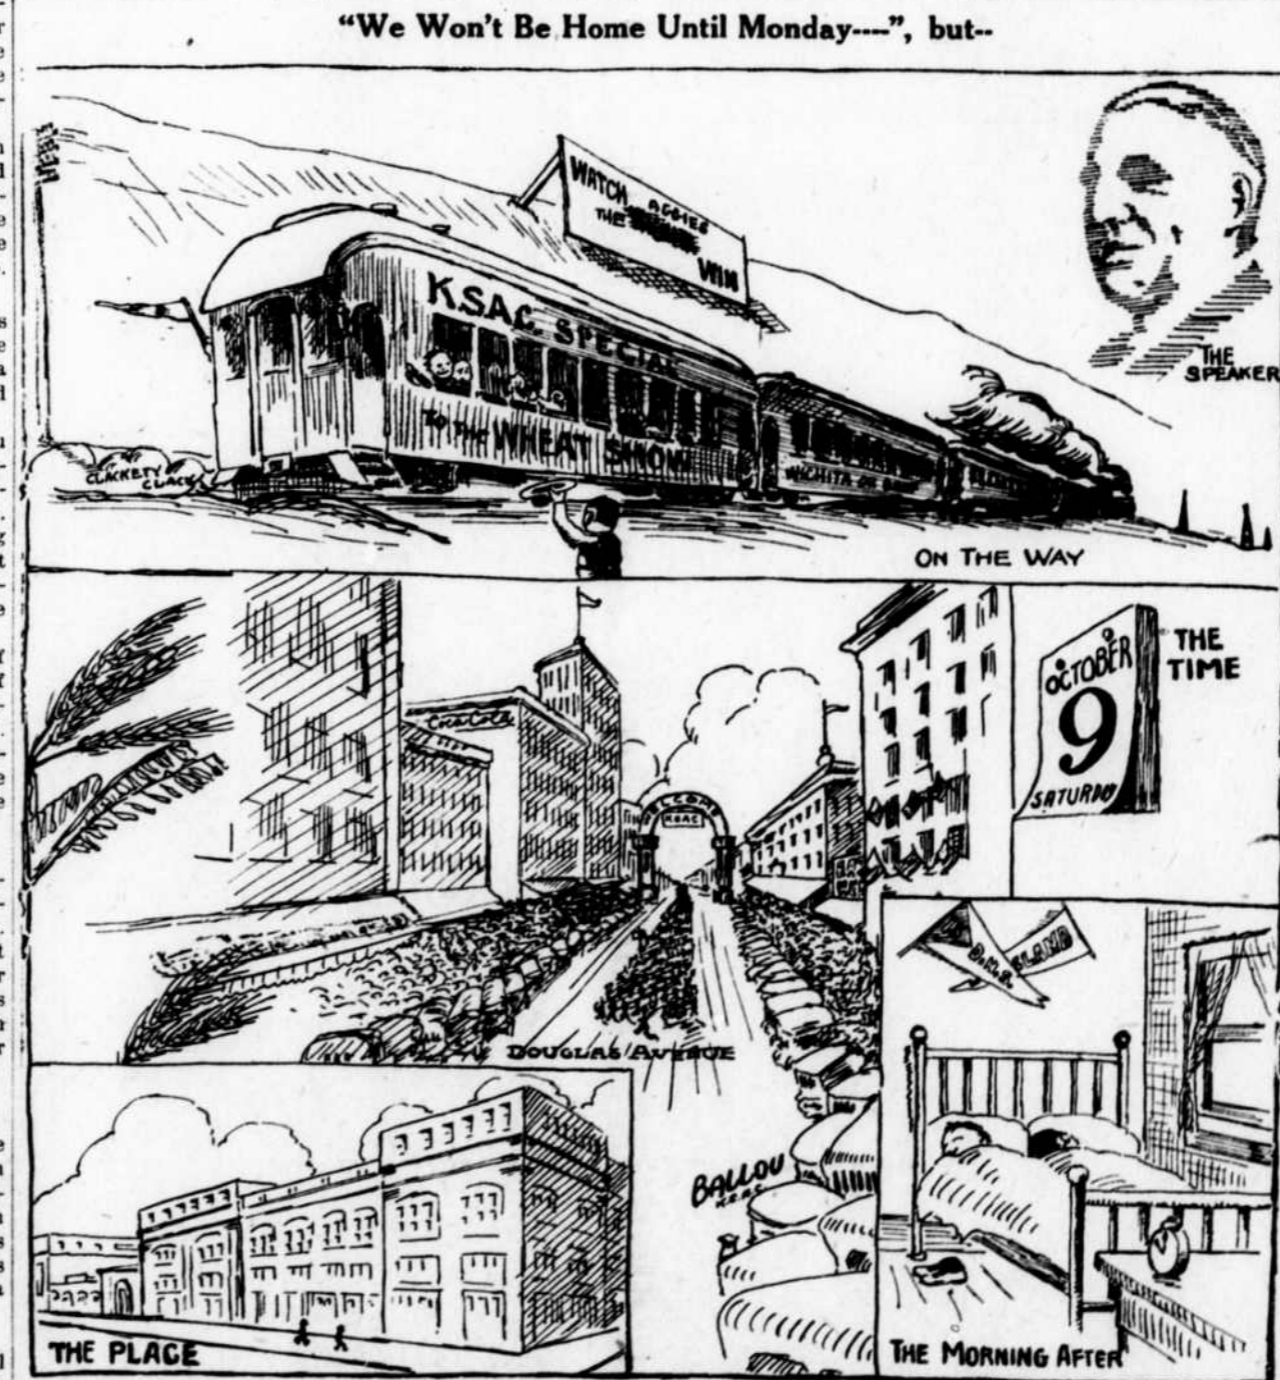

The sale of season tickets has been progressing quite well during the past week and but 140 of the season admittance books remain unsold. That means that 1,860 have been sold which is a season record at K. S. A. C. Mike Ahearn is especially anxious that the final 140 tickets be sold before Saturday, as after that date there will be no advantage in purchasing a season ticket over paying single admissions. The season pasteboards may be had at the athletic office, from K men or at the Co-op Book store.

ANNOUNCEMENTS

On account of the Wichita excursion the girls of the Eurodelphian, Ionian, and Browning literary societies will not hold their regular meetings Saturday afternoon.

At Vespers next Thursday the second lecture in the series "Commandments in the Twentieth Century" will be given on "Shame or Reality." Miss Grace Derby of the library staff will lead the meeting.

Chapel next week will be Tuesday, October 12, at 10:15 in the morning. The program will be given by the college band and the Apollo Glee club.

Prozy Says We'll Be Back in Time For Sunday School.

TO REORGANIZE LOYALTY CLUB

ASSOCIATION TO SUPPORT ALL
COLLEGE ACTIVITIES

Last Year Girls' Loyalty Club Sent
Aggie Band to K. U.
Game

Interest on the part of Aggie coeds should be centered these days on the reorganization of the Aggie Loyalty club, an organization of girls which gives girl students a chance to support all college activities, particularly athletics.

Last September the Loyalty club was organized for the first time with Bly Ewalt as its president and Miss Grace Hesse, faculty advisor. In the first organization there was also created an executive council consisting of Louise Manglesdorf, Rowena Thornburg, Jessie Evans, and Faith Martin.

Last year the big piece of work done by the Loyalty club was the sale of tags for the purpose of raising funds to send the college band to the K. U. game.

The executive committee of the Aggie Loyalty club consists of two seniors, two juniors, one sophomore, and one freshman. These officers are elected the last Tuesday in April of each school year, the freshman member to be elected at the first meeting of the following year.

The first meeting of the club will be called within a few days and every girl student in college who is a member of S. S. G. A. is eligible to membership and should be out at that meeting.

FLOYD HAWKINS IS IN "Y" WORK

KNOWN FOR DIFFERENT OC-
CUPATIONS AT K. S. A. C.

Successively Military Instructor, Typo-
graphy Teacher, Family Man,
Minister, and President of
Various Organizations

Floyd Hawkins is engaged in work for the state Y. M. C. A., as district secretary of the fourteen north central counties. His territory extends east and west from Jewell county to Marshall county and includes Dickinson county on the south.

He is working in a supervisory capacity where the work is organized, bringing the service of the state "Y." close to the community, reestablishing associations that have not been active since the war, and organizing new territory. He supervises the distribution of the general educational fund apportioned to these counties. This is for the benefit of soldiers with less than 10 per cent disability, and may be used for correspondence or residence work of less than college grade.

Hawkins has headquarters at the office of the rural service department in Anderson hall, and plans to spend Saturdays and Mondays here, recruiting from the Aggie men secretaries for county work in rural areas. He states that there is a big demand for workers and large opportunities for advancement in this field.

Hawkins will be remembered by last years' students as the man who had a different occupation for every

K. S. A. C. CLUB DIRECTORS RETURN FROM SIOUX CITY

Attendance at Interstate Fair this
Year Neared 25,000 Mark

R. W. Morrish, director of Boys' and Girls' clubs, and Miss Alene Hinn, in charge of Girls' clubs, recently returned from the interstate fair at Sioux City, Ia.

The record attendance for one day at the fair came to near the 25,000 mark. Livestock exhibits are the main feature, it sometimes being known as the interstate livestock fair. This fact reflects still more glory on the Jefferson county boys' livestock team, that won second place at Sioux City. Joe Goodwin, a former Aggie, now county agricultural agent for Jefferson county was the team's proud chaperone.

The Kansas delegation was completed by Miss Irene Taylor, '08, with her Shawnee county Girls' Breadmaking team, that had carried off the honors at the Topeka free fair.

METHODIST SUNDAY SCHOOL CLASS A PHENOMENAL ONE

Attendance Grows from Thirty to One
Hundred Eighty within
Three Years

The girls' Sunday school class at the Methodist church, taught by Prof. R. R. Price, is a challenge to any like organization at any state or denominational school in the state.

This class started three years ago with an attendance of from 30 to 50. Last year the class outgrew successively two class rooms and reached an average attendance of 170. This year the class started with an attendance of 180.

The phenomenal growth of Professor Price's class has so inspired other classes that it was necessary to resort to the army barracks method of supplying class rooms this fall.

There is a total of 232 men enrolled in electrical engineering this semester. The freshmen lead with 106, then come the sophomores with 70, juniors 36, and seniors 20.

This year the college is running no chance of a shortage of coal. There is now on hand enough coal to last until well into March if the winter is of average severity.

Miss Ada Roberston, '20, is teaching home economics at Courtland.

STANLEY A. SMITH RESIGNS TO GO TO NORTH DAKOTA

Professor Smith Graduated from K.
S. A. C. in 1913, Teaching Here
Since Graduation

Stanley A. Smith has resigned his position as assistant professor of architecture to take the position of professor of architecture at the North Dakota Agricultural college, with a very material increase in salary. His resignation became effective October 1. He will move to his new location as soon as arrangements can be made. Mr. Smith is an alumnus of K. S. A. C., graduating with the class of 1913. With the exception of one semester he has been teaching here since his graduation.

Sunday dinner guests at the Kappa Sigma fraternity house were President and Mrs. W. M. Jardine, Dean Mary Pierce Van Zile, and Prof. F. H. Fox.

ENGINEERS HAVE LARGEST ENROLMENT

ENGINEERS MAKE CORDUROY DEBUT

SENIOR ELECTRICALS APPEAR IN CHAPEL IN DISTINCTIVE COSTUME

Choose Corduroy Norfolk Suits as Distinctive Wearing Apparel—Have Caps to Match

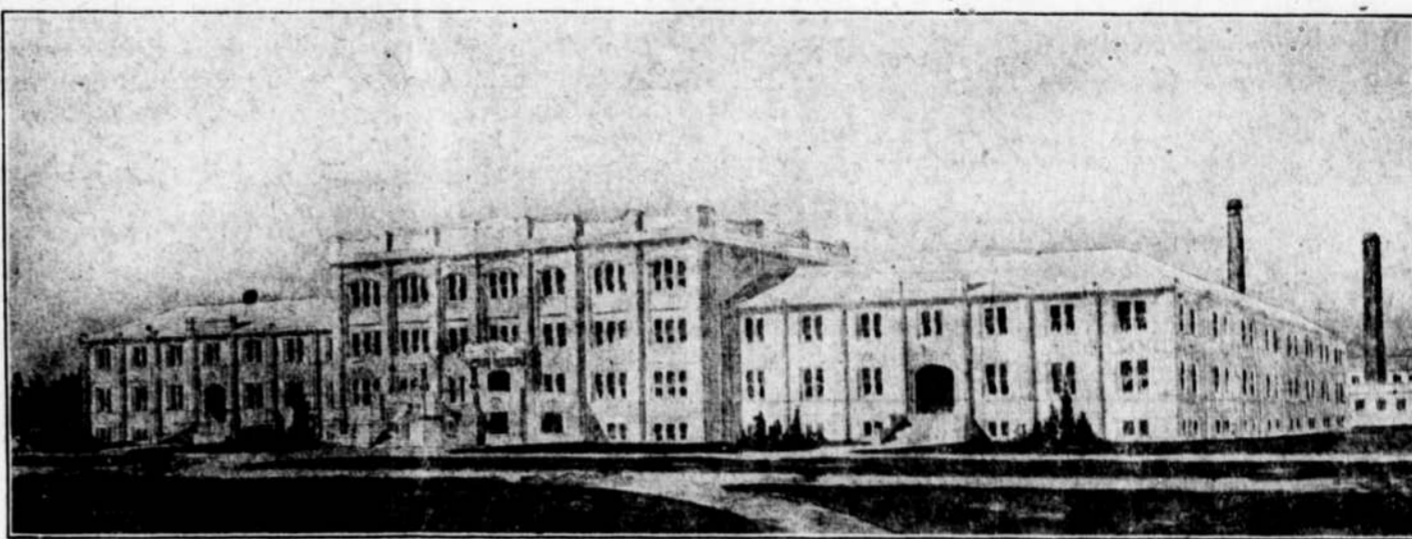

Dressed in Norfolk corduroy suits of olive color the senior electrical engineers caused considerable comment as they took their place in the pit at the Chapel exercises Wednesday morning.

Last spring the senior electricals

decided that since the students of almost every other department of the college had some distinctive dress that they too were going to have one. A meeting was held and it was decided that the Norfolk corduroy suit of olive color with a soft roll collar would be the distinctive dress. Corduroy caps to match the suits were also decided upon. Roy Briese was elected chairman of the suit committee at this meeting. This year there are eighteen seniors enrolled in the department of electrical engineering.

Various other departments of the college also have a distinctive dress of some kind. The agricultural seniors, for instance, wear a large broad rimmed Stetson hat of light gray. The vets carry a cane. All journalists carry a monocle as their mark of distinction and the agronomy seniors wear large black Stetsons.

New \$190,000 Engineering Building Is Going Up Rapidly Now

In spite of numerous delays due to difficulty in getting proper materials, and the scarcity of labor, the construction of the new \$190,000 engineering building is now speeding up. It is believed by R. A. Seaton, dean of the engineering division, that the west wing may be entirely completed

by the beginning of the second semester.

The west wing, consisting of two stories and a basement, is practically completed now, as the walls of the building are finished to the top of the second story. After the completion of the stone work on the wing, carpentering and plastering will begin.

It is believed that progress will be rapid as workmen may easily be secured.

At present the classes in engineering meet in the various buildings over the campus. Some of the classes are held in the barracks, others

meet in the attic of Anderson hall and still others meet in the basement of physical science building. When the new building is finished the division will completely fill it, so large is the enrolment. Last year there were over 1,000 men enrolled in engineering and this year the number is larger.

THIS FAMOUS BABY TRACTOR MAKES ITS FIRST TRIP WITH AGGIES

The famous one-man tractor, mechanical mascot of the engineering students of K. S. A. C. will take its first journey away from the college when it goes to the Wheat show at Wichita to lead the parade of students on Aggie Day, October 9.

The shops of the engineering division of the college have been making, on factory scale, since 1916, a 1 1/2 h. p. single cylinder gas engine. This engine is being made as a part of the regular class work of engineering students and others working in the pattern making shop, foundry, blacksmith shop, and machine shop. The large cut shows the engine mounted on the truck and the parts

that of a stationary engine. The tractor shown in the cut is the result of this development. It consists of one of the regular stationary engines mounted on the truck wheels which are driven by the engine by a unique transmission system.

The mechanical mascot has been used by the engineers for every demonstration of college students and in every two or three months for a little take part. As a usual thing the "animal" is taken out over the campus every two or three months for a little exercise over the side walks. Being an aristocratic creature it prefers sidewalks to pavements.

The story and the picture of this

ENGINEERS LEAD IN ENROLMENT

ELECTRICAL DEPARTMENT IS LARGEST IN DIVISION

Present Enrolment Shows Increase of 20 over Total Enrolment for Both Terms of Last Year

At the end of last week the engineering division reported an enrolment of 583 collegiate students. This is an increase of 20 over the total collegiate engineering enrolment for both semesters last year.

A point of pride with the engineering division for a number of years is that in spite of the fact that K. S. A. C. primarily is an agricultural school there are more engineering students enrolled here than there are agricultural students. The enrolment this year shows the engineers still in the lead with the general science division in second place with 491 students and the agricultural division with 464 students.

As usual the electrical engineering department heads the engineering courses with an enrolment of 236. Civil engineering comes second with 122 students, mechanical engineering with 105, architecture with 45, agricultural engineering 27, and flour mill engineering 14.

In general the outlook for all engineering students this year is a gratifying one. With the completion of the new engineering hall there will be open to all engineers added facilities for their training and the consensus of opinion from the engineering students is that it is going to be a big year in every respect.

SHOP MEN BUSY DURING SUMMER

DO INDUSTRIAL WORK AND VISIT TECHNICAL SCHOOLS

Professor Carlson Was with Bureau of Public Roads at Washington

Industrial work claimed many of the members of the shop practice department this summer, while others spent their time profitably in visiting technical schools.

Professor Carlson, superintendent of the college shops, spent the greater part of August in Washington, D. C., engaged in work connected with the equipment division of the bureau of public roads. This division has charge of all the equipment turned over to the bureau by the war department. In order to facilitate the use of this equipment the government is planning to place several large shops in different parts of the United States. Professor Carlson's work this summer was the organization of these shops and the location and listing of the equipment.

E. C. Jones, assistant professor of shop practice, spent most of the summer in the employ of the Warner and Swasey Machine company at Cleveland, Ohio. His work was in connection with the assembly and operation of the Warner and Swasey screw machines.

D. E. Lynch, assistant professor of shop practice, who is in charge of the blacksmith shops, visited a number of industrial plants and schools this last summer. Among these were the following: University of Cincinnati, Washington university at St. Louis, the University of Chicago and five technical high schools in Chicago. Professor

SELL COLLEGE-MADE LATHES

SHOP PRACTICE STUDENTS HELP SUPPLY KANSAS SCHOOLS

College Shops Have also Sold Several Small Gasoline Engines

Wood turning lathes have been shipped recently to the boards of education in Alton and Clyde by the K. S. A. C. shop practice department. These lathes are made by the students enrolled in the shop practice course.

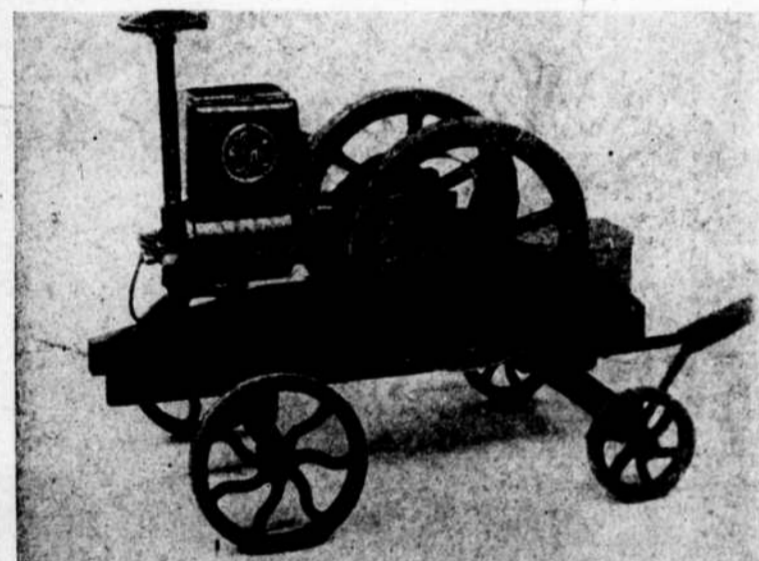

The lathes are thoroughly tested before being sent out and the performance of the machines that have been used for several years shows a splendid record of service. Sixteen student built machine have

been in use in the college shops for a number of years and have required practically no repair.

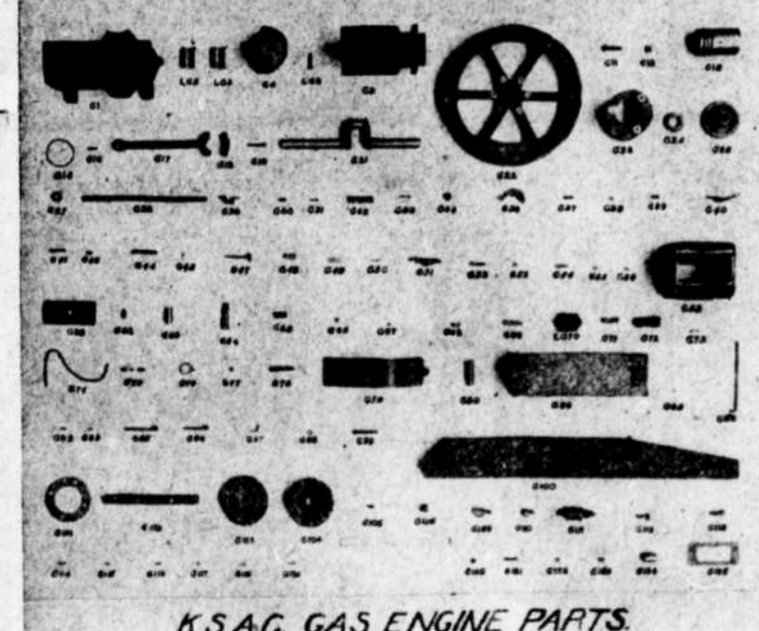

The college shops have sold a number of small gasoline engines over the state which have been in service from three to five years. The shops have not been called upon to furnish any repairs during this time.

Both the lathes and the engines are sold to high schools at greatly reduced prices. Any one interested should correspond with W. W. Carlson, superintendent of the college shops.

Mr. and Mrs. I. O. Mall and son "Dick" who have been spending their vacation with relatives in Manhattan left September 23 for the state university at Austin, Tex., where Mr. Mall has been promoted to assistant professorship of mechanical engineering and machine design at a considerable increase in salary. Mr. Mall, an '18 graduate, did some research work at K. S. A. C. while he was here.

THE "K.S.A.C." ENGINE. H.P. 1 1/2.

K.S.A.C. GAS ENGINE PARTS.

below show in detail the pieces which go to make up the gas engine, and it will be noticed that every part is numbered in a way which insures repairs in case they are needed.

A number of these machines are in use over the state for pumping water, running washing machines, cream separators, grind stones, and other machinery, and to date not a single part has proved defective or has had to be replaced on any of the machines out in service.

It occurred to some of the energetic students that this engine might be suited for other purposes than

miniature tractor has been printed in technical, farm, and daily papers the country over and so, altho this is the first actual trip it has ever taken away from home, in reputation it has traveled millions of miles.

Preliminary to paying a visit to the city of Wichita the mascot underwent a thorough overhauling at the hands of its driver, E. F. Stalcup. The mechanical parts of the engine were all put in perfect working order and such modern accessories as electric lights, an electric horn, an exhaust horn, and a trailer were added to the equipment.

FRIDAY, OCTOBER 8, 1920

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Make the "Beat K. U." slogan a reality.
4. Aggies at the top of conference athletics by 1922.
5. Clean politics.
6. Greater cooperation between alumni, students, and faculty in bringing athletes to K. S. A. C.
7. Remodeling of the auditorium stage.

WHY KANSAS AGGIES MAKE GOOD

A graduate of the Kansas State Agricultural college elected president of one of the growing agricultural colleges of the southwest, a more recent Aggie alumnus named as chief of the office of publications, United States department of agriculture—these are two announcements of the last few weeks.

They are examples of what Kansas Aggies are doing. Scores of others might be mentioned. An Aggie graduate is president of one of the large western universities. Another alumnus is editor of the group of farm papers having the largest rural circulation in the world. Still another is executive of the paper manufacturers' association. One of the leading physicists of the world, formerly president of one of the old New England colleges, is an Aggie. So are several of the most widely known botanical scientists in the United States. In the most diverse fields, from Africa to Riley county, Kansas, in farming, in law, in engineering, in missionary work, in teaching, in editing, in investigating, Kansas Aggies are making their mark.

It is due partly to the school, partly to the men and women who come to the school. Nobody can advance farther than his native abilities permit. But he can develop these abilities to their capacity by working at the right things in the right place. For nearly two generations a sturdy, self-reliant body of students has been attending the college. It has found here a solid, honest, wholesome atmosphere. The two together have made Aggie grads what they are.—Kansas Industrialist.

GET OFF THE FENCE

With the announcement of the formation of a Republican party in the student body of K. S. A. C., and no visible signs of life from the Democrats, arises the question of what interest a mere college student should take in the progress of world affairs as far as national politics is concerned. From one side of the fence we hear both Republican and Democratic loyalists shouting for action and from the other side of the fence we hear that despicable group, the "Indifferentists" whose power in a community is as deadly as poison gas.

What are you going to do about it, Aggie student?

There is in Manhattan at this time a boy of Hawaiian birth who is earning his way around the world by shining shoes and doing other bits of work of equally servile character. He admits that he is an uneducated person but expressed a sincere desire a few days ago to be deserving of the privilege of voting as a citizen of the United States. His contempt for the college student who feels he can afford to let voting privileges at such a momentous time slip by unheeded, is certainly to be considered.

"This is a wonderful school," says the Hawaiian, "but the boys and girls who are here don't appreciate it the way they ought to. I'll bet there ain't one outa ten who has any ideas on this election business which is coming and they are too busy living their own selfish lives to be bothered."

How right is the Hawaiian who stands on the outside of our college circle and longs for the privilege that is ours! Just how fair is it for us to throw up citizen privileges merely because we college circle and longs for the privilege that is ours? Just how fair is it for us to throw up citizen privileges merely because we are inclined to become too concerned with our personal interests and ambitions?

AND WE ARE COLLEGE MEN AND WOMEN

The next time someone howls to you about machine politics in K. S. A. C. just casually inquire of him whether or not he took part in the S. S. G. A. elections which were held last Tuesday. The counting of the ballots revealed the startling fact that only one-third of the members of the S. S. G. A. or 16 per cent of the student body and only 36 per cent of S. S. G. A. members took the trouble of casting their votes in that important election.

Of the 363 ballots cast, fully one-third were rejected because of improper marking, and it follows that if K. S. A. C.'s vote is to count in the November election it will be necessary to stage an educational campaign in intelligent voting.

NO CURE FOR LIZARDITIS

There is no telling who the first lounge lizard was. Adam has been suspected of having had the germ. He lolled about Paradise with nothing to do but slick up his hair and lamp the forbidden apples until he finally slipped and got kicked out into the cold and "crewel."

Anthony, vampee of the beautiful Cleopatra, has, however, doubtless achieved more fame as a 100 per cent lizard than Adam, or any other student of women's eyes. He had the world at his finger tips, you will remember, when Cleo first sighted him. But the moon hadn't changed twice before his fate was sealed and stored away in dark, dusty Egypt.

Lounge lizards of today—especially those who infest our college paths and halls, will do well to ponder seriously over the luck of Adam and Anthony. They should remember that lizarditis is fatal unless it is stopped in the first, sickly stages. No matter how mighty the brain or brawn of the college young man, he cannot afford to expose himself more than eight or 10 hours a day.

All of which brings us down to what we have wanted to say all the time: Lizarditis is what a nice young fellow has when he quits work and study and concentrates all his emptiness on the superfine art of being all that's dear and charming and clever and tender. It shines up his clothes and his flaxen hair, fills him full of Swiss chocolate and Hershey bars and remembrances of what Maybelle and Imogene and George—the dear boy—told him about the party a week ago last Tuesday, don't you know, and ultimately leaves him a beautiful wreck of a man.

There is no cure for lizarditis except early marriage. Enough work to do and the energy with which to do it is the only preventive.

SCIENCE LINES THE FARMERS' POCKETS

LIVESTOCK WINS IN MANY SHOWS

FANCY RUPERT A STEER THAT NEVER WAS BEATEN

Canary Bell Won the French Cup—Also Holds Seven Day Production Record in State

Livestock belonging to the K. S. A. C. animal husbandry department have won over 200 prizes, including 35 championships, 129 firsts, 55 seconds, and 39 thirds during the last year.

Among this herd of prize winning livestock was one animal which held the unique record of having never been beaten in his class. Fancy Rupert was the champion hereford steer at the American Royal, International, and Denver shows last year. The college deemed it wise that he should be sold, having won everything that it was possible for him to win. He was sold to Armour and company for \$352. Fancy Rupert had already won more than twice this amount in prizes.

Another animal owned by the college which holds a remarkable record is the Ayrshire cow Canary Bell. At 10 years of age this cow made a record of 12,128 pounds of milk and 451 pounds of butter fat. Recently she established a record of 528.6 pounds of milk and 23.9 pounds of butter in seven days. This is the highest seven day record ever made in Kansas.

In 1918 Canary Bell won the French cup for the mature class with 19,863 pounds of milk and 744.5 pounds of butter fat. Besides being a good milk cow she has several daughters that have established records.

The Owl's Design, a Jersey cow owned by the college has three yearly records of 14,000 pounds of milk and 600 pounds of butter fat. While she has been in the college herd she has made six register of merit records which average 12,226 pounds of milk and 520 pounds of butter fat.

LIEUTENANT BROWER IS FORMER AGGIE STUDENT

Comes Here to Take Charge of Veterinary Unit of R. O. T. C.

Lieut. Charles W. Brower who is to take charge of the veterinary unit of the R. O. T. C. is a former K. S. A. C. student. Lieutenant Brower attended K. S. A. C. for one year at the age of sixteen. He comes here from Fort Bliss, Tex., where he has been camp veterinarian since April 25 of this year. Mrs. Brower is expected to arrive in Manhattan today.

Lieutenant Brower was appointed veterinarian of the quartermaster corps in 1916, commissioned Second Lieutenant, V. C., in June of that year. From September 1918 until November 1919 he was department veterinarian in the Philippine Islands with rank of captain, V. C. N. A. Upon return from Philippine service he attended meat inspection school at Chicago, Ill., and was graduated from that institution.

He was veterinarian at Camp Dodge remount depot from February 1920 until April 1920 and from then until the present time has been camp veterinarian at Fort Bliss, Tex.

K. S. A. C. is one of the four land grant colleges in which these veterinary units have been established. The other schools in which veterinary units will be placed are the state agricultural schools of New York, Ohio, and Iowa. Lieutenant Brower will give special instruction in veterinary medicine as it relates to the army.

GEORGE DRUMM TO HEAD DAIRY CLUB THIS YEAR

C. H. Young Is Vice President—Every Student Eligible to Attend Meetings

George Drumm was elected president of the Dairy club at its first meeting of the semester. C. H. Young was elected vice president, and George Starker was elected secretary-treasurer.

The purpose of the Dairy club is to keep up interest in the dairy business. The meetings are held regularly on the second and fourth Monday nights of every month at the Y. M. C. A. Every student is eligible to attend, and those who are interested will be welcome at any time.

S. C. Salmon, professor of crops, recently returned from the western part of the state where he was inspecting crop conditions. He reports that most of the sorghums were sufficiently far along before the recent frost to avoid injury.

FIELD OF KANRED WHEAT ON THE COLLEGE FARM

AG DIVISION HAS FIVE FOREIGNERS

MEN ARE FROM ASIA, AFRICA, AND SOUTH AMERICA

J. F. T. Mostert Chose K. S. A. C. After Seeing Kansas Corn in Bronx Museum in New York

Five students from foreign countries are enrolled this semester in the agricultural division. Three are from Asia, one from South Africa, and one from South America.

Several large yellow ears of corn in the Bronx Park museum at New York City are responsible for J. F. T. Mostert's attendance at K. S. A. C. Mr. Mostert, who is a sophomore, comes from Balfour, Transvaal, South Africa, and was told by his father that he could attend college wherever he wished. He did not know whether to go to Australia or to the United States, but finally decided upon the latter. Although he wrote to the division of agriculture at Washington, D. C., asking what school was the best in the United States for agriculture he was still undecided as to the school he would attend when he reached New York. One day Mostert went to the Bronx Park museum in New York and saw some large ears of corn which came from K. S. A. C., and he thereupon decided that the college he wanted to attend was out in Kansas. After finishing his course in agronomy and animal husbandry, Mostert plans to go back to his father's 9,000 acre ranch and teach the South Africans to raise corn like that which decided the location of Mostert's college career.

Fernando Valdes, who is from Santiago, Chile, South America, is enrolled in the milling course. When he came to America he wanted to learn all about the milling industry and went first to Minnesota university. As that university has no milling course, Valdes came to K. S. A. C. at the end of six months. Next February he expects to return to Chile where he will help his father manage a large mill.

Phillip Young hails from Han Chow, China. He is a senior in the agricultural division, and at the present time is representing the Chinese government at the National Dairy show at Chicago.

Wing K. Lau's home is in Canton, China. Mr. Lau, who is a junior this year got in touch with K. S. A. C. thru the Canton Christian college, getting his information from Prof. R. Levine, a K. S. A. C. man teaching at Canton. This summer Lau spent his time travelling over the northern part of the United States. When he has finished his work at K. S. A. C. he will return to China and go into commercial business.

K. L. Lung is another student whose home is in Canton. Mr. Lung was converted to agriculture by his father who did not want his son to take up engineering. When Lung has finished his work in agriculture he expects to tour Europe, studying the agricultural conditions of that country.

COLLEGE PRIZE HERD PAYS EXPENSE OF ITS UPKEEP

This Includes Feed, Pasturage, Rent, and Labor Needed for Its Care

Many persons over the state claim that anyone can raise prize winning livestock if the state pays the bills. The idea that the state pays for the production of prize winning livestock at K. S. A. C. is a mistaken one. The state never has and will never have to contribute money for the production of prize winning livestock at K. S. A. C. The state has not invested a dollar in the livestock herds owned by the college.

The start in pure bred livestock at the college was made in 1902 and 1904 when a few public spirited Kansas breeders made the college a donation to be used in the production of pure bred livestock. Each year the college sells some of its pure bred

stock to breeders over the state. This has helped to improve the quality of livestock raised in the state. Since that time the herd has been entirely self sustaining.

The herd has been able not only to pay for its feed but also for the labor necessary for its care. This is an even more noteworthy achievement when you consider the fact that the college does not own a pasture but has had to rent pasture at excessively high prices. All feed consumed by the livestock during the winter months must be bought at high prices. Consider these facts and then ask if pure bred livestock pays.

Ags Learn How to Profiteer But Get Nothing But Grade

"Have you sold those hen berries this week, Eddie?"

"Nope, not yet," was the answer from behind a Daily Drover's Telegram. "I see by the paper here that they are reducing the prices of some necessities, such as Ford's and the like, so maybe the common people can afford to eat eggs now. I look for eggs to hike two or three cents by tomorrow, I think I shall unload mine then."

If you happen to overhear a conversation resembling the foregoing do not wax wrathful and smite the participants with a brick, nor yet rush off and report them to the authorities as a plural Ponzii. In spite of their scientific, cold blooded scheming and betting on the market, these men are humans and students like the rest of us. They are laboring constantly under that ever present fear of an "F" at the end of the semester. This deep talk is simply a part of their work.

To be more exact, they are students in farm management and are studying marketing. At the beginning of the semester each student in the class is given, theoretically, certain amounts of different farm products, such as hay, wheat, hogs, kaffir, and steers which he must sell at some time during the semester. The exact time of selling each product is decided by the student himself. He is expected to read the Kansas City daily market report as given in the Daily Drover's Telegram and also to study the effect of economic conditions upon the market.

At the end of the semester each student's record is looked over and an estimate of his judgment made. The man with the most "money"—that is, the one with the best buying and selling judgment, gets the best grade.

WICHITA SENDS 75 TO K.S.A.C.

TWENTY-FOUR WOMEN AND FIFTY-ONE MEN ENROLED

Thirty-one Wichita Men Taking Engineering—Fourteen Women Enroled in Home Economics Division

Seventy-five students of the college, 24 women and 51 men, boast of the fact that Wichita is their home town. Fourteen of this number are enrolled in the home economics division, eight in the school of agriculture, three in the division of veterinary medicine, 31 in the division of engineering, and 19 in the division of general science.

The following students from Wichita are enrolled in the various divisions of the college:

Division of home economics—Irene Drake, Bessie Coulter, Dorothy Churchward, Gerda Olson, Luella Morris, Madge Kasten, Mildred Baer, Florence Barnhisel, Verna Breese, Virginia Groix, Betty McCain, Ruth Wilson, Ruby Pruett, Eva Leland.

Division of veterinary medicine—Thomas Perry, Lenio Bate, Lloyd Grandfield.

FRANKLIN ROOSEVELT SPEAKER HERE TUESDAY AFTERNOON

Vice Presidential Candidate Touched on League and Republican Candidate

Franklin D. Roosevelt, Democratic candidate for the vice presidency, spoke for a few minutes last Tuesday afternoon before a crowd of Manhattan people, including a large number of students.

The Democratic candidate spoke for a few minutes on the League of Nations and threw a few handfuls of soft, warm mud at the Republican candidate. He failed to touch upon the subject of education.

Mr. Roosevelt promised that if elected, the Democratic candidates would not allow a single American soldier to leave this country without the consent of congress and the American people.

Phone 157 when you get that bundle ready. Manhattan Steam Laundry. 4-8.

Show Evolution of Seeding

The Klod and Kernel club, an agricultural organization of the college will give an exhibit at the Wheat show at Wichita illustrating the evolution of methods of seeding. The exhibit is to be a part of the parade, and will consist of a man at the head of the exhibit sowing seed broadcast by hand, and the successive stages of the development in methods of sowing. The latest improved types of drills will be drawn by a tractor, showing the modern methods of seeding.

Bearcats Chum With Kingly Cadillacs On The College Campus

Democracy is manifested by inanimate things as well as otherwise, and nowhere is this illustrated so well as on the drives in front of Anderson and Kedzie halls.

There, where the dinky bearcats chum with the kingly Cadillac, there, where the tiny Ford rubs fenders with its six-cylinder brother, there, where all cars from the largest to the smallest are equal, there will the stroller find essence of this country's democracy.

Yet, with what contrariety does the world run. Where is the man whose girl steps from the underslung strip-down into his enemy's Marmon 34 who will not curse automobiles as the agents of autocracy and the proverbial capital?

Home Study Offers New Course

Reta Diehlman, instructor in home study service, is completing the preparation of a course in civics and citizenship. This course will be offered both for college credit and for study circle work. It deals with the fundamental principles of social science and their practical application in the community. So far, Miss Diehlman says, the extension divisions of Oregon and Wisconsin are the only agencies offering such a course.

STOCK JUDGING TEAM WINS FIRST

THREE AGGIES PLACE AMONG FIRST TEN

Hillary Mather Places Second, Merton Otto, Sixth, and H. J. Henny Seventh

The Kansas Stock Judging team won first place at the national Swine show contest at Des Moines, Iowa, this week. The team won by a big lead over a large field of contestants. The scores for the five leading states were Kansas, 3,732; Missouri, 3,635; Nebraska, 3,578; Iowa, 3,539; and South Dakota, 3,055.

The team was coached by F. W. Bell, associate professor of animal husbandry, who also accompanied the team to Des Moines. Three Aggie men succeeded in placing among the first 10 contestants. Hillary Mather placed second, Merton Otto sixth, and H. J. Henny seventh. At the Kansas Free fair contest at Topeka, in September, Merton Otto was high man.

The members of the team who represented the college at Des Moines were Hillary Mather, Merton Otto, H. J. Henny, E. D. McCollom, C. A. Newell, and J. Farr Brown.

The stock judging teams coached by Professor Bell are feared by other schools more than those put out by any other coach. The team's high standing is in keeping with the records of the Kansas stock judging team of last year. Last year the team placed third in the Des Moines contest. With the splendid start made by the team, it is anticipated that by the end of the season Kansas will crowd some state for first in the stock judging honors in the United States.

ESSENTIAL TO YOUNG MEN

The importance of a good banking connection for young men cannot be overestimated. Systematizing finances by using a checking account is a valuable training to young men. Quite often, the advice and counsel of our officers is helpful.

Besides, a young man who carries an account at this bank and shows proper interest in his financial affairs is not necessarily limited to his own resources in meeting business opportunities

SEED KANRED TO 2,500,000 ACRES

KANSAS HARVESTS 5,000,000
ACRES THIS SUMMER

Produces Three to Five Bushels
More An Acre Than Any Other
Hard Wheat

Three to five bushels more to the acre than any other hard wheat is the average yield of Kanred, the new hard wheat that has been developed by the Kansas agricultural experiment station. The amount harvested in Kansas of this new wheat last summer was 500,000 acres. The overwhelming success of this new wheat has caused the 1921 acreage to jump to 2,500,000.

The Kansas Crop Improvement association inspected more than 15,000 acres of Kanred in the field this summer to insure the Kansas growers pure seed at reasonable prices. The association is composed of 600 Kansas farmers and is operated on a cooperative basis. This organization did a great deal to boost the acreage of Kanred among the growers. Paid advertising telling of the advantages of Kanred was inserted in many farm papers, 26 county papers, and three dailies. The superiority of Kanred was told to every farmer in the state. C. E. Rogers of the journalism department, had charge of the advertising campaigns.

This new variety of wheat was developed from a single head of Turkey at the Kansas experiment station and has proved its superiority in practically all sections where hard wheat is grown. One of the important factors about this new wheat is that it is more resistant to rust than any of the other varieties. In cold resistance it has also proved its superiority. Because of the early maturing qualities possessed by this wheat it escapes much of the injury caused by hot winds and drouth. Kanred is no longer an experiment—it is a tried and proved variety.

This new wheat has increased the net profits from \$6 to \$10 an acre over that secured for Turkey and Kharkoff. This is a very important factor, as can be readily seen. There is somewhere in the neighborhood of 7,000,000 acres of hard wheat grown in Kansas alone. A little problem in multiplication will give an interested person the number of million dollars additional profit the farmers of the great plains area would realize if they all grew Kanred.

"White Elephant" is Largest Albino Rat In the United States

There are rats that the charming Coed Conceals 'neath luxuriant hair, And rats that the faculty ladies Hide beneath strands growing rare.

In politics, there's a type called rats And rats in the printer's trade, But the Rat of rats, dear public, Is the rat which Doc. Ibsen has weighed.

Yes, there are rats and other rats, and, no doubt, several kinds of rats can be found at K. S. A. C., and it may be possible that we have contenders for blue ribbons among other species. But in this particular

breed, we feel quite certain that the college is entitled to the championship trophy.

What is declared to be the largest domestic, or to be scientific, White Albino rat in the United States, and perhaps in the world, is in the possession of the animal husbandry department of the college. The monster rodent is being used in an experiment in heredity of size being carried out by H. L. Ibsen, professor of genetics, to determine how size is inherited in animals, and what laws and factors govern the extent to which this inheritance of size is reproduced in the offspring.

When the rat was obtained from Dr. J. S. Hughes, of the chemistry department, it weighed 515 grams

at the age of eight months. This giant of the rat tribe had attained this unusual weight on a ration consisting mostly of the whites of eggs. It attained its weight, 633 grams, at the age of 18 months, while in the genetics laboratory. The super-rat was christened "White Elephant" by the chemistry department. He was mated to one female, and is at the present time the proud father of 69 living offspring, and several of his sturdy sons, now about eight months old, already average 500 grams, which is considerably larger than the average male rat at maturity. Nearly all of White Elephant's brothers and sisters have been noted for their heavyweight propensities.

The largest White Albino rat

which the genetics department has any record of, is the "Goliath," the largest of 30,000 rats raised by Dr. Helen Dean King, of Philadelphia, an authority on rats and famous throughout the scientific world for her successful experiments in inbreeding, carried on with the aid of these animals. Goliath, in his palmiest days, tipped the beam at 511 grams. White Elephant, who is more than 100 grams heavier, would therefore look upon his contemporary as a very stunned specimen of the Albino race.

White Elephant's present menu calls for tankage, corn meal, casein, bone ash, alfalfa, and butterfat and unaware of the fame that is his by virtue of size, he complacently watches, from the confines of his unpretentious cage in the basement of the new agricultural building, perhaps idly speculating on this foster-father of his, Doctor Ibsen, this queer human with the investigative turn of mind, who is always weighing, tabulating, and labeling, but of whom, as a culinary chef for rats, White Elephant thinks extremely well.

Miss Winifred L. Neusbaum, '14, has accepted a position as instructor in advanced dietetics and economic food problems at the University of Wisconsin. She is also taking animal chemistry and experimental work in foods for credit toward a master's degree.

SHORT HURT IN AIRPLANE SMASH

**INJURIES NOT CONSIDERED
SERIOUS**

Victor Aslop of Salina also Hurt—
Both Men Taken to Lincoln
Hospital

Mac Short of Salina, junior in mechanical engineering, was injured Monday afternoon at Lincoln, Nebr., when his plane fell from a considerable height. His companion, Victor Aslop, of Salina, was also hurt and the two were taken to a Lincoln hospital. A message received at the Beta house from Salina stated that their injuries were not considered serious.

One of Short's three planes was wrecked near Fairview this summer and he was compelled to leave it there. Saturday morning he left for Salina with the intention of getting this plane repaired and moved, and to make arrangements for selling one of the others. He expected to buy a larger and more powerful ship, and it is supposed that he was demonstrating the machine he wished to

sell when the accident occurred. Mac began his flying career when he was 13 years old by building one of the first gliders in Kansas. He was in the aviation corps during the war, and has lately been paying his college expenses by making passenger flights. Last spring during commencement week he did considerable flying over the town and the campus.

SOCIETY

Miss Elizabeth Rothermel entertained last Saturday night for the members of the Phi Gamma fraternity which is made up of Catholic men students at K. S. A. C. The party which was given in the social center on the campus, was one of the most interesting ever given for a student group and marks the beginning of a series of social affairs which will be given for that group this winter. In addition to the chapter members and their guests, President and Mrs. W. M. Jardine, Dean and Mrs. Farrell, Dean and Mrs. J. T. Willard, Dean Helen B. Thompson, Dean Mary P. Van Zile, Dean and Mrs. R. R. Dykstra and Dean R. A. Seaton and a number of other faculty people attended the affair. Wheeler's orchestra furnished the music for the dancers and during the evening punch

was served by a group of the young people who assisted Miss Rothermel.

Kappa Kappa Gamma entertained informally Tuesday afternoon be-

tween the hours of four and six o'clock for their housemother, Mrs. Miller. Violin, piano and voice selections were given by Miss Catherine Quirk, Norine Weddle and Miss Margaret Rochford. Light refreshments of coffee, sandwiches and opera sticks were served to the 70 guests present.

Kappa Gamma announces the pledging of Miss Alice Stewart of Montana and Miss Ruth Norman of Eureka. Miss Stewart is a niece of Pres. W. M. Jardine.

Miss Florence Logan, '20, and Mr. Theron Hunter were married September 1 at the home of the bride's parents in Eskridge. Mr. and Mrs. Hunter will make their home in Topeka, where Mr. Hunter is connected

with the state public health laboratory at Washburn.

Announcement has been made of the marriage of Miss Pearl Akin, '05, and Mr. Arthur Glaze which took place March 19, 1920. Mrs. Glaze was a teacher in the junior high school. Mr. Glaze is also a teacher and will be principal at the Jetmore high school this year.

The Kappa Sigma fraternity have pledged Vernon Carrier of Hutchinson, freshman in journalism.

The Pi Beta Phi sorority held open house Tuesday evening from 7 to 8 o'clock for the Sigma Alpha Epsilon fraternity.

Miss Grace Ellen Shelly, '10, and

Mr. John L. Macklin were married June 30 and are now at home at the Pine Valley Dairy farm, Colorado Springs.

The Alpha Beta literary society held open house in the hall Saturday evening. After a program of music and stories, Lawrence Byers made an interesting speech on the work the architects are doing in the college. This was the first of a series of talks on the different departments which are to be given. After a short business meeting, an informal program of games and songs was enjoyed. Refreshments of grape juice and wafers were served.

TAILORING

The good old way of tailoring has given place
to a better new way.

The individual tailor who once worked at his own
bench has joined our organization of two thousand
individual tailors working side by side under one
roof—each man specializing on the part that he
can do best. The result is—

More finely finished detail, making a better
complete garment.

Great buying power through volume.

More economical operation through unity and
specialization.

Better tailoring values as a natural result.

It will be interesting to every man who appreciates
real quality woollens to see our offerings priced in
the neighborhood of \$60 tailored to individual
measurement.

We assume the responsibility of fitting you and
pleasing you in every respect.

REPUBLICANS WILL TAKE A STRAW VOTE

ALL K. S. A. C. STUDENTS AND FACULTY ELIGIBLE

RESULTS GO TO STATE COMMITTEE

Election To Be Held Wednesday and Thursday in Anderson Hall—Milton Eisenhower Will Be in Charge

The Republican club, which was organized last week, will take a straw vote among all college students Wednesday and Thursday morning and afternoon in Anderson hall. All K. S. A. C. students and faculty members are eligible. The ballot printed in the Collegian should be used but if another form is used, it should be made similar to the one printed. No ballot that is not signed by the voter will be accepted.

Eisenhower Permanent Chairman
The Republican club in organizing elected Milton S. Eisenhower as permanent chairman upon the recommendation of the Republican state committee. The straw vote is the first active work of the organization but the club is promising to make itself known between now and election day.

Every student in K. S. A. C. is being urged to take an active part in the coming election. The Republican club is anxious to get a debate with the Aggie Democrats if persons of that party organize soon. The straw vote, to be taken Wednesday and Thursday, is only for president and governor. There should be at least 2,000 votes cast in the college.

Results To State Committee

As soon as the straw vote is completed here the results will be sent to the Republican state committee headquarters at Topeka. A straw vote has been taken all over the nation and Senator Harding leads about three to one, but many persons say that a straw vote indicates nothing. In Manhattan in a straw vote taken by the Rexall drug store, Senator Harding carried the town by only one vote.

Here is the Collegian ballot:

- For President
- HARDING ☐
- COX ☐
- For Governor
- ALLEN ☐
- DAVIS ☐

QUILL CLUB IS HAVING CONTEST

MANUSCRIPTS MUST BE SUBMITTED BY NOVEMBER 1

Should Be Sent to Prof. N. A. Crawford or Prof. H. W. Davis

The contest for membership in the Quill club, a national organization composed of those who have shown exceptional ability in writing, is now open, and any manuscript of literary merit may be submitted. Short stories, feature stories, editorials, verse, scenarios, or a collection of short paragraphs will be accepted.

All articles must be typewritten on regulation paper, size 8 1/2 by 11 inches. Each contestant must submit a manuscript of at least 800 and not more than 3,000 words. Manuscripts may be sent either to Prof. N. A. Crawford or Prof. H. W. Davis. The contest closes November 1.

Judges Cattle at Fair

P. C. McGilliard, assistant professor of animal husbandry at K. S. A. C., went to Topeka last week in the interest of the dairy department. Professor McGilliard attended the Indian Creek Grange fair, where he judged the dairy cattle. Indian Creek grange is one of the strongest and best known granges in Shawnee county. Professor McGilliard is an alumnus of K. S. A. C. having been graduated with the class of 1916. He came to K. S. A. C. as assistant professor in August of 1920.

Aggie Co-Eds Spring Surprise on the Boys at Football Practice

"Ra, ra, ra; ra, ra, ra, girls, girls," was the greeting the girls of the Women's Athletic association who came out to Ahearn field Wednesday evening to see the pigskin fly, got from the profs and boys on the side lines. Each W. A. A. girl got last week through the post office a secret note saying, "Bring another girl with you and meet at the gym Wednesday at 5 p. m. Don't tell anyone for we want to go out to the football field and surprise the boys."

And the girls were there. They sang Aggie songs and gave yells until their voices refused to work any more.

Jessie Evans, president of the association, and Irene Drake, cheer leader, have whispered it in W. A. A. circles that the Aggie girls intend to see every Wednesday night's football practice, but don't tell the boys.

MISS HEIZER IS ELECTED COACH

WILL HAVE CHARGE OF PURPLE MASQUE PLAYS

Herbert McClelland Elected Publicity Man—Committee Appointed to Arrange for One Act Plays

The Purple Masque, honorary dramatic fraternity held its first meeting last week for the purpose of discussing plans for the dramatics of the school year.

Miss Florence Heizer who has done splendid work in coaching Purple Masque as well as senior plays for the past two years was unanimously elected coach for the coming year. Herbert McClelland was elected publicity man.

A committee was appointed to arrange for a number of one act plays which are to be given preliminary to the long fall play. Full explanation of these plays will be given in a later edition of the Collegian.

Other committees were appointed to see about tryouts and to arrange for the equipment of the new Purple Masque studio in the tower of Anderson hall.

WATERS HALL PLANS FINISHED

TO ADD CENTRAL BUILDING AND WEST WING

Plan For 100 by 300 Foot Brick Stock Judging Pavilion—To Be Equipped with Amphitheater

Plans for the future development of Waters hall have recently been completed by G. F. Baker, professor of architecture. According to these plans a large central building and a west wing will be added to the present building.

The new central building will accommodate an agriculture museum, an agriculture library, class rooms, offices, and an auditorium which will seat 1,000.

The west wing is designed for class rooms, offices, and one of the most modern dairy departments in the country. An addition to the present east wing will be built to house the meat laboratories.

To the rear of these buildings and connected to them by a stone walled service yard, is to be a large 100 by 300 foot stock judging pavilion. The pavilion will be equipped with amphitheater for classes, stalls for stock, and departmental offices. When complete these buildings will be unexcelled by those of any other school in the country.

STUDENT AFFAIRS CALENDAR ANNOUNCED BY S. S. G. A.

Committee Desires to Get in Touch With Departments and Groups

The Calendar committee of the Students' Self Governing association has reported the following calendar of student affairs for the school year 1920-21: October 29, Pep meeting; November 4, Pep meeting; November 15, Artist series; December 3, Aggie Pop Night; December 7 or 8, San Carlo opera; December 17 and 18, Glee Club Vodvil; February 7-12, Farm and Home week; February 18-20, World Forum; February 21, Artist series; March 14, Artist series. This calendar will be carried out as the various departments and student groups get in touch with the committee.

Report Not True
Investigation of the story that Bernard Quigley died from complication of pneumonia and injuries received in the Hays-Aggie game proved that report to be unfounded according to a statement given out today by athletic director, Mike Ahearn. The investigation disclosed that Quigley had been in the hospital since the Wednesday before the game and that he was in no way connected with Saturday's contest.

HARDING SHARES COLLEGE HONOR

WHEAT SHOW VISITORS LEARN CANDIDATE'S IMPORTANCE

Glee Club Drowned Out by Noise But Band Made Presence Known

A little lesson in simple arithmetic to the effect that 300 students, even though they be from the Kansas State Agricultural college are not equal in importance to a single presidential candidate was given the Aggies who went to the Wheat show at Wichita Saturday. But although the voices of the 10 or 12 thousand visitors at the Wheat show rather drowned out the voices of the Aggie Glee club, the band at least was able to hold its own with the crowd, heading the parade up Douglas avenue to the Hippodrome.

But failure of the Aggies to keep squarely in the limelight did not spoil the fullness of the day for the visitors from Manhattan. Those who saw the Russian ballet said that alone repaid them for the trip.

The special train left Manhattan at 4:30 o'clock Saturday morning, reaching Wichita at 8:30, half an hour ahead of schedule time. Most of the students flocked into the corridor of the union station to await the hour of the parade. A few of the more curious found the Harding special and had a peek at the candidate and the candidate's wife at the prosaic business of eating breakfast.

By 9 o'clock the parade was formed to march up Douglas avenue to the Hippodrome. Led by the 65-piece Aggie band with the candidate, governors, ex-governors, congressmen and near-congressmen following, and the rest of the Aggies trailing, Wichita's guests of honor gave the thousands of spectators who lined the street a new sensation in parades.

The student-made miniature truck was made an exception. It hiccoughed its way through the business section of Wichita in the wake of the big parade. Copies of a special wheat show edition of the Collegian, student newspaper, were distributed from the truck along the line of march.

Much favorable comment was occasioned among wheat show visitors by the splendidly written and edited paper which was the work of the Aggie Press club.

All students who wore the purple and white Aggie badge were admitted to a section in the rear of the Harding party reserved for distinguished visitors.

An alumni booth set up by Cliff Stratton, alumni secretary, was visited by many old grads and former students during the day. Those who had lost touch with college learned of the important work planned by the alumni.

Extra coaches attached to the regular train leaving Wichita at 10:15 o'clock took the place of a return special. Most of the excursionists returned to Manhattan on this train, arriving in time for Sunday school, as had been promised by President W. M. Jardine.

Sounds Good For Ags

Eighty-six percent of the agricultural graduates of K. S. A. C. are engaged in agricultural occupations, according to F. D. Farrell, dean of the division of agriculture at the college. The occupations include farming, which is followed by the majority of agricultural graduates, agricultural teaching, extension work, and employment in expert capacities with seed houses, banks, breed associations, marketing associations, fertilizer companies, creameries, grain and livestock commission companies, orchard companies, the United States department of agriculture, the state experiment stations, and many other agencies.

Makes Wood Cut

The Kansas Aggie tags which K. S. A. C. students wore to the Wichita Wheat show were printed from a cut made by Prof. E. T. Keith of the printing department. The work is clear cut, although made on short notice for the Wheat show delegates.

DAIRY TEAM COPS HONORS AT CHICAGO

CAPTURE TWO INDIVIDUAL AND TWO TEAM CHAMPIONSHIPS

DRUMM WINS \$400 SCHOLARSHIP

Young Wins Gold Medal for Best Individual Judging—Win High Place in Both Jersey and Holstein Classes

Chicago, Ill. — Kansas high team of contest. Twenty one states competing. Young, high individual won gold medal. Drumm, high Jersey man won \$400 scholarship. Team high on both Jersey and Holstein. Won National Dairy show cup. Hoard's Dairyman cup, Holstein cup, Jersey cup.—H. W. Cave.—Telegram received yesterday from the dairy judging team in Chicago.

Capturing two individual and two team championships, the Aggie dairy judging team again won the National Dairy show cup for K. S. A. C. in the contest at Chicago last Saturday.

In the face of keen competition from teams representing 21 states the K. S. A. C. team carried off the following prizes: for the best individual judging, a gold medal, won by Clement Young, a junior in the dairy course; for the best judging of Jerseys, a \$400 scholarship, won by George Drumm, a senior in the course; the National Dairy show cup, the Hoard's Dairyman cup, a cup for high place in Jersey judging, and one for the high place in Holstein judging.

Coaches Two Winning Teams

Prof. H. W. Cave, who trained the team, has the distinction of having coached teams that won the National Dairy show cup for two consecutive years.

The team has been away from home since September 24, when they left for the Waterloo Dairy Cattle congress. In the contest held during that Congress, the Aggie team placed fifth in dairy judging, and won the Ayrshire cup. From Waterloo they went to Chicago, passing through Oconomowoc, Wis., where they visited the famous Pabst herds. The men will probably arrive in Manhattan Wednesday afternoon.

Den Farrell, of the division of agriculture said yesterday, "I consider it very unusual for a college to win this important honor for two consecutive years. Professor Cave coached both winning teams, and though other schools worked just as hard, we had an advantage over many other teams in that Cave has an unusually good practical knowledge of dairy cattle, and showed good judgment in selecting from the great number of farm-reared students in the course, those who themselves have had a practical experience with dairy stock."

Philomathian Elects Officers

At the last meeting of the Philomathian literary society, preceding the regular program, officers were elected. Amy Conrow was elected president; Mona Vogelmann, vice president; Ida Coron, recording secretary and treasurer; Fernie Ward, marshal; Fay Wickam, assistant marshal; Wilma Hartley, critic.

ARE ALMOST 800 FRESHMEN HERE

ENGINEERS HAVE LARGEST ENROLLMENT

Are 848 More Men Enrolled Than Women—1,642 Men in College

K. S. A. C. is well started on the scholastic highway this year with a total enrollment of 2,436. Of this number 355 are special short course and school of agriculture students. The engineering division toots ahead of the rest of the school with an enrollment of 582, the electrical engineers boasting 253.

Just the fall enrollment this year brings in 796 freshmen, while with both the fall and mid-year enrollments in 1919 there were only 98 more.

As usual the men have it over the women here as they have a total of 1,642 to the women's enrollment of 794. It is expected that the mid-year enrollment will swell the number of students by several hundred.

Swanson To Hays Station

A. F. Swanson, '19, has been temporarily transferred from the Hays branch experiment station to the bureau of farm management of the United States department of agriculture in which he will assist in making a survey of the cost of producing winter wheat in Missouri, Oklahoma, Kansas, and Nebraska. Mr. Swanson expects to spend several weeks at this work and then will come to Manhattan where he will spend a part of the winter working on sorghum experiments being conducted cooperatively by the agronomy department and the Fort Hays station.

HARLAN SMITH IS MAKING GOOD

IS CHIEF OF U. S. D. A. DIVISION OF PUBLICATION

Young Writer Has Rapid Rise in Profession — Graduated From K. S. A. C. in 1911

Another journalistic alumnus of K. S. A. C. has made good. Harlan D. Smith, one of the best known graduate journalists of the college has been made the new chief of the division of publications, United States department of agriculture.

HARLAN D. SMITH

This is a promotion from the headship of the office of information. The name of this office has been changed to "the press service" and it will form a part of the division of publications.

Mr. Smith was graduated from the college in 1911, and immediately became an assistant in the department of industrial journalism, which was then in charge of Prof. Charles Dillon. Upon Mr. Dillon's resignation in 1913, Mr. Smith became acting head of the department.

During all the time in which he was connected with the department, Mr. Smith did extensive newspaper and magazine writing. He has done probably more free-lance magazine copy than any other alumnus of the journalism course.

DR. H. T. HILL TO TEACH HERE

IS ASSISTANT PROFESSOR IN PUBLIC SPEAKING

Formerly on K. U. Faculty—Is Graduate of Iowa State College

Dr. Howard T. Hill began his duties this week as assistant professor in the department of public speaking. He is a graduate of Iowa State college, has had work in the Harvard Law school, and was graduated from the Chicago University Law school with the degree of Juris Doctor. He was formerly on the faculty of the Kansas university. He resigned from there to be commissioned ensign in the navy, and has since been manager of the Ellison-White chautauqua circuit in Canada and along the Pacific coast.

"You can say for me," said Professor Emerson, "that the school is very fortunate in securing the services of so brilliant and accomplished a speaker and teacher." Professor McMurray of Kansas university says, "I consider Doctor Hill as one of the most capable young teachers of public speaking."

Boys In Charge of Chapel

E. F. Stalcup, Gall Lynch, and Charles Morris, left Thursday night for Wichita. Friday morning they had charge of a special Aggie chapel at the Wichita high school. They spoke on "Why Go To College," and brought out the special features to be found at K. S. A. C. Ralph Peters will hold a similar chapel at the Hutchinson high school.

WILDCATS WIN ARMY BATTLE IN WALK 55-0

ALL AGGIE PLAYERS GET WORK-OUT IN GAME

TEAM'S PERFORMANCE IMPROVES

Open Field Running of Backs and Blocking by Wildcat Lineman Feature in Contest—Penalties Heavy

The Wildcats got rough with the soldiers from Funston last Saturday. Not since the Washington game in 1917 have spectators at Ahearn Field seen such an avalanche of touchdowns made against an enemy team. The final score of Saturday's battle was 55 to 0.

The team displayed considerable improvement over their work in the Hays game, especially in their interference for men carrying the ball. Another feature that has improved is the open field running of the backs. They are learning to use the change of pace, and are eluding opposing tackles for gains. Axline in particular has acquired the change of pace and uses it to good advantage in running back punts.

The way in which the soldiers were outclassed is shown by the yardage figures. The Aggies gained 454 yards from line of scrimmage, while the Funston eleven made 3. Eleven Wildcat passes were tried and 6 completed for a total gain of 119 yards. The soldiers completed one pass for a gain of 1 yard. Their other two trials were incomplete.

Sears Made First Touchdown

The first touchdown was made by Sears, fullback, after 6 minutes of play. The army received the initial kickoff, but were forced to kick on the third down. Hinds returned the ball to the 40 yard line, and a procession of end runs and line bucks carried it across. Huston kicked goal. The Aggies kicked off to the army the second time. The soldiers returned to the 25 yard line, and kicked on the first down. The kick went out of bounds for no gain to the soldiers, and the Aggies put it across the line in two downs. E. Cowell made an end run of 12 yards to put the pigskin over. Huston kicked goal.

The soldiers chose the kickoff just at the end of the quarter and Axline returned to the 30 yard line. At the start of the second quarter the Aggies kicked 40 yards. The soldier who received was downed in his tracks. The Funston eleven kicked on the first down and Hinds returned to the 30 yard line. After an incomplete try at a pass, Sites snugged a pass for 25 yards and Sears plunged across on the next down. Huston kicked goal.

The Aggies failed to score during the rest of the quarter on account of drawing too many penalties. Several fumbles also helped in keeping the enemy's goal line intact. At the half the Wildcats had the ball on the soldier's 10 yard line.

Second String Into Game

Coach Bachman sent in the second string at the beginning of the second half. Funston kicked to Murphy who returned to the Aggies' 25 yard line. The Wildcats started a march down the field, and reeled off three 15 yard gains in succession. They were within striking distance of the Funston goal when Winter lost the ball when he was tackled. The army was forced to kick and Cowell returned to their 25 yard line. On the second down Winter got away for a 25 yard run thru a broken field and a touchdown. Murphy kicked goal.

The army again kicked to Cowell who returned to the 40 yard line. Two rattling good runs thru a broken field, the first by Winter, the second by Evans, put the ball across the line. Murphy kicked goal.

No points were scored by the Wildcats during the balance of the quarter, penalties again counting heavily against yardage gained.

New Team In at Fourth Quarter

An entirely new team was put in to the game at the beginning of the fourth quarter, many of the first string going back in. Huston kicked to the soldiers, who kicked to the Aggies on the third down. Hinds returned the punt to the 30 yard line, and a 27 yard pass, and the end run by Cowell, and a pretty piece of broken field running by Axline put the oval over for 6 more points. Huston kicked goal making it 7.

At this time Coach Bachman began substituting again, and before

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Make the "Beat K. U." slogan a reality.
4. Aggies at the top of conference athletics by 1922.
5. Clean politics.
6. Greater cooperation between alumni, students, and faculty in bringing athletes to K. S. A. C.
7. Remodeling of the auditorium stage.

THOSE VACANT SPOTS

Some cafeteria patrons are developing the habit of reserving space in the line for some favorite side-kick. If the custom persists, some of these days when we chance to cross the apparently vacant sidewalk in front of Kedzie, some gruff voice will inquire, "How dare you walk into Daisy Jones that way?"

Yes, this will actually be the case if things continue at the rate they are going now. Today for instance the line was full of little vacant spots one foot by one which numerous devoted students were saving for their best pal. The best pal comes dashing in at the last moment just after the twelve o'clock whistle blows, or the five o'clock as the case may be, and plants himself in one of the little vacant spots saved for him. Elbows a few more inches of space, frowns a little, smiles a little and then everything is lovely.

Perhaps the students behind him have been standing in the line for half an hour just because they didn't have any best pal to save space for them. Too bad S. S. G. A. or the faculty discipline committee doesn't take up the matter and publish a few rules against cheating in the cafeteria line.

PRIMITIVE TACTICS HOLD SWAY

Center rushes and line smashes are all very proper and spectacular in their rightful places, but the mere student hurrying to a class does not like to revert to such tactics to get through main hall. If the congestion in front of the post office was absolutely necessary the student would not mind reverting to the primitive, but such isn't the case and it ruffles his temper.

The place to read the letters from the folks, scan the columns of the home papers, and exchange the Hill's gossip is in the rest room, not out in the hall. Take heed, you people that hold family and frat house reunions in the main traffic way, and give the other fellow a chance.

ONE MORE LIST OF DON'TS

This is a discourse on manners, not social usages, but common elementary manners. It is addressed to a certain section, happily not very numerous, of K. S. A. C. students who are violating the fundamental rules of courtesy at every student assembly. The Collegian is constrained to believe that the students who are guilty of offences against common politeness by virtue of their conduct during student assemblies are not willfully impolite, but are simply thoughtless. Accordingly, a list of "Don'ts" is hereby offered which may serve to remind

them of what is expected of them, as students of K. S. A. C., in the line of assembly manners.

Don't read your notes for the last class or write them for the next, also don't try to get the lesson for the fourth hour class.

Don't bother to tell your companion the latest one you have heard. He probably told it to the fellow who told you.

Don't go to assembly merely to hear the orchestra and the announcements, then leave when the speaker begins his address. Even though your mental caliber be .22 short, try to make a noise like a .45 special.

Don't snore should you happen to fall asleep. It's not conducive to your neighbor's appreciation of the fine points of the speech.

Don't begin to gather up your books and put on your wraps the moment 11:15 arrives. Classes will not start until the assembly period is over.

SOCIETY

Mrs. MacLeod, the Beta house mother, entertained for all fraternity and sorority house mothers at the Beta house Wednesday afternoon.

Phi Delta Tau fraternity has pledged Mr. H. E. Ash, freshman in music and Mr. K. C. Frank, sophomore in engineering. Mr. Ash and Mr. Frank both live in Manhattan.

Miss Ruby Pruitt of Goddard, and Miss Mary Fitzgerald of Waterville, have pledged to the Iota Psi sorority.

Friday afternoon Dean Mary Pierce Van Zile with the aid of a committee of faculty women, entertained the 200 W. C. T. U. delegates, who were attending the state wide convention here last week.

Announcement has been made of the engagement of Miss Ruth W. Scott, daughter of Mr. and Mrs. A. L. Scott, 912 Lane street, Topeka, to Mr. Charley Fay Buck of Enterprise. The wedding will take place October 12 at the home of the bride's parents. Miss Scott is a graduate of the Kansas State Normal of Emporia. Mr. Buck is a graduate of the Kansas State Agricultural college '14.

Friday evening Bethany Circle, an organization of the Christian church, entertained all the new college girls of the church, at the home of Miss Ruth Willis. Guests of the evening were Rev. and Mrs. J. D. Arnold, Mrs. and Mrs. W. P. Blain, Mrs. Hugh Durham, Mrs. G. R. Pauling, and Mrs. Lenora Moore Jennings.

Miss Irene Dean will entertain this afternoon in the home economics rest room for the members of her college girls' Sunday school class of the Presbyterian church. All Presbyterian girls in K. S. A. C. are invited to come, whether they are members of the class or not. This is to be a "get acquainted" afternoon and everyone is urged to attend.

The annual mixer of the School of Agriculture was held in Recreation hall last Friday evening. The early part of the evening was spent at games while the latter part was spent in dancing. Ice cream and wafers were served. A large number of School of Ag alumni and several members of the faculty were present. A. P. Davidson, dean of the school, talked on the subject of athletics in the School of Agriculture, after which money was raised for the support of the football team. Dean and Mrs. Davidson were the chaperons.

Mr. and Mrs. R. E. Deniston announced the marriage of their daughter, Elsie Ann, to J. Dwight Smith, to take place at the home of the bride October 30.

Miss Deniston entertained with a buffet luncheon Wednesday night at her home, 811 Osage. Her little sister let the "cat out of the bag" which bore the letter tied to a wide blue ribbon around its neck. The guests present were Miss Deniston's high school bunch. They were Miss Mildred McKee, Miss Ardis Atkins, Miss Frances Johnston, Miss Martha Frank, Miss Helen Thayer, Miss Garnett Westbrook, Miss Eva Dittmar, Miss Rae Frank, Miss Grace

Sachau, Miss Elsa Lear, Miss Jeanette Sleeper, and Miss Lillian O'Brien.

The members of Theta Chi Gamma, honorary general science fraternity, were at home to the girls in the division of general science Wednesday afternoon from 4 to 5:30 o'clock, in the home economics rest room. In the receiving line were Dean Mary Pierce Van Zile, Dean J. T. Willard, Miss Margaret Russell, Miss Myra Scott, Miss Marguerite Hammerly, Miss Ione Leith, and Miss Clementine Paddleford. Miss Russell, faculty advisor of the fraternity, spoke about the purposes of Theta

Chi Gamma. Dean Willard told what the faculty expects of the organization, and Miss Scott, president, explained the origin of Theta Chi Gamma and the requirements for membership. Any girl regularly enrolled in college may become a member at the end of her sophomore year if her grades in English average 90 percent, and her grades in other subjects average 85 percent. Prof. J. W. Searson, head of the department of English, told what it means to an alumnus to be a member of such an organization as Theta Chi Gamma. Punch and wafers were served during the afternoon.

BOILERS INSURE INCREASED HEAT

NEW EQUIPMENT IS INSTALLED
BY COLLEGE

Facilities of Plant Taxed by School's
Growth—Have Winters' Coal
Supply

Two new high pressure boilers are being installed at the college heating plant and the old stock which once served its usefulness will again be pressed into service. These changes will greatly increase the capacity of the plant.

A concrete pit capable of storing about 400 tons of coal and which is provided with a means of flooding in case of fire, is being constructed. Enough coal can thus be safely stored to operate the plant for eight or 10 days in the most severe weather. The coal has formerly been scattered in small piles over a large area.

The gradual growth of the college and the constantly increasing demand for heat and power have taxed the capacity of the power plant during the last few years. Last year the situation became serious because of the coal shortage, and it was difficult to meet the heat and power demands.

Little space is available in the power plant for further growth. What will be done when additional buildings are added to the campus is a problem, and the logical solution seems to be a new building, separate from the main engineering building, and devoted only to the generation of heat and power.

FRESHMAN FOLLIES OF 1920

By this time we fully realize our handicaps.

The Freshman

Who is that greenish looking yap
Who has that blank look on his map
And thru Main hall e'en wears his cap?

A Freshman.

doubt?

A Freshman.

BUT—
Who is it's hardly ever late,
Who pulls down that 98,
And who's the future graduate?

A Freshman.

AND—
Who is it that in years to come
May make the world hump and run
And put high prices on the bum?

That Freshman.

FOR—
Who lands big jobs along the way,
And who corrals the nifty pay
That wasn't in his yesterday?

A Freshman?

SO—
Be there a guy with us today
Whose soul is of such dirty clay
That he gets mad if he must say
He's Freshman?

In H-27

1st guy (somewhat vaguely)—
"Am I in the right room? I'm looking for Freshman—"

Wise Guy—"Oh, you're a Freshman, eh? Sure, your right, this is where they study green things."

A freshman may hate to wear his purple cap, but he hates a great deal more not to have one to wear. A lot of caps are disappearing every week; someone is either collecting souvenirs or playing dirty.

First Freshman—(Speaking of physical examination). "I've just found out that I'm underweight."
Second Green Thing—"Is that so? I haven't found out yet who I'm under."

Mysteries it takes a Freshie a year to solve:

How to open a postoffice box.
Where the president's office is.
How to make the dairy barns from the gym between classes.

How to talk in the library without sounding like a brass band.
How to study without a book.

How to walk through the veterinary building without holding his nose.

How to feel like an upperclassman.

A. A. Potter, former dean of engineering here, and now dean of engineering at Purdue university reports a record enrolment of 1,800 in the engineering department of Purdue.

Y. W. MEMBERSHIP DRIVE TO BEGIN WEDNESDAY

Campaign to Interest Every Girl in
Association Work and to
Secure Members

The Y. W. C. A. membership committee will launch a membership drive beginning October 13, which will last for a week. The object of the drive is to interest every girl in college in the work of the association and to secure her as a member. The campaign is in charge of Miss Ruth Peck, who is chairman of the membership committee.

Miss Jamie Cameron of Abilene spent the week end at the Alpha Delta Pi house.

Miss Ruth Harrison spent the week end with friends in Topeka.

STYLE HEADQUARTERS

Where Society Brand Clothes are sold

© A. D. & C., 1920

To the college man who hasn't a pet clothing store

To a great many men this store is a "pet store"—an institution that they naturally walk into when they need something to wear.

We would like to serve you that way.

Here you will find Society Brand Clothes. We were attracted to this brand by the style and quality of these clothes and the integrity of the house that makes them. They were attracted to us because we had built up the sort of trade that wants clothes as good as Society Brand. Like attracts like.

We think these clothes and our service will attract you. Men are not disappointed in Society Brand Clothes. They give a very peculiar and interesting satisfaction.

It is the satisfaction that comes from knowing—even before you walk into the store—that you are going to get something you will always be glad you bought.

FIRST POLITICAL CLUB ORGANIZES

MILTON EISENHOWER APPOINTED CHAIRMAN

Republican Club Will Challenge any Democratic Club to Debate on Present Campaign

The first political club for K. S. A. C. is being formed and indications are that Republicans and Democrats will get into some warm debates before election day.

A Republican club is being formed by Milton Eisenhower, who has been appointed chairman of the organization by the Republican state committee. As soon as the officers are elected and the club fully organized, a speaker will be sent here by the state committee.

The Aggie Republican club is planning on challenging any Democratic club in the college to a debate on the present campaign. The club is also planning on getting a straw vote from all students in the college.

The main purpose of the club is to get all students who are eligible to vote on November 2. The club also is going to make a study of the current issues and the candidates in order that all of the members may go to the polls and vote intelligently.

AGGIE WILDCATS

WIN IN A WALK

(Concluded from page one)
The quarter was finished practically every Aggie man who was suited up had had a chance in the game. A series of passes and runs put the ball on the soldiers' 15 yard line in 6 downs and Brady Cowell dashed across with the leather. Huston kicked goal.

Funston Plays For Time
The army kicked off and Cowell ran back to the 50 yard line. Cowell made two beauty runs thru a broken field and Hinds went across for the Aggie's eighth touchdown. Fletcher missed goal.

The Funston eleven was in poor condition and played for time in order to regain their wind on many occasions. Several soldiers were knocked out by the fierce tackling and blocking of the Wildcat warriors. Not a single Aggie was injured.

The Wildcats were penalized heavily again Saturday on account of over eagerness to get in the play. A total of 70 yards in punishment for illegal playing was assessed against the Aggies. The soldiers drew 25 yards of penalties.

A. S. KEENE WILL SPEAK TO ARCHITECTS THURSDAY

Will Talk on Architecture as a Profession—Anyone Interested May Attend Meeting

Arthur S. Keene, a prominent architect of Kansas City, Mo., will address the architectural students at their seminar Thursday afternoon at 4 o'clock in room E-59. Mr. Keene is one of the leading architects of Kansas City. Among the prominent buildings which he has designed and erected are the following: the Sweeney Auto school, the Third Christian Scientist church, the Wesley hospital, the Saint Luke hospital, and the Gate City National bank. He was also the architect for the Wichita club. Mr. Keene has served as president for the Kansas City chapter of the American Institute of Architects.

The Architectural society extends a cordial invitation to any who are interested in hearing Mr. Keene's address.

ANNOUNCEMENTS

The W. A. A. girls are to meet at the gym tonight at 5 o'clock, prepared for a 10 mile hike into the country. Each girl is to bring her own eats. The hikers will return on the interurban.

All girls who have signed up for hockey practice should meet at 5 o'clock on the following evenings: Juniors and seniors, Tuesday; sophomores, Wednesday; freshmen, Thursday and Friday.

The freshman class will meet tomorrow evening at 5 o'clock at the auditorium.

SIDELINE YARNS

That change of pace that Coach Bachman has been teaching his backfield men is showing up well in broken field running. Axline and Cowell brothers used it to good advantage in running back punts and kickoffs Saturday. Hinds is also using it on end runs. It is a baffling, shifting method of running that is responsible for much of the yardage gained by any well coached team. By the use of the change of pace "Brick" Travis of Missouri university sifted thru the whole K. U. team last Thanksgiving for a touchdown. Here's hoping Axline can do the same about October 30.

The blocking of the Wildcats is going to be a feature of their play this year if they continue as they have started. On at least three occasions Saturday but two army men were left on their feet when Aggie backs were running back punts. Mike Ahearn was heard to remark once, "Why that man could have run the ball back on crutches. No one was up to stop him."

During the first two quarters of the game Saturday, Coach Bachman was jerking the players as soon as they made the slightest error in play. When they came in he would tell them about it in no uncertain terms. He also kept Mike Ahearn busy noting down mistakes in his little black notebook. The complacency of some of the players over the victory Saturday would seem to be due for a rude shock when the coach unlimbers his ideas at Monday's practice.

As soon as Axline made his touchdown in the fourth quarter coach called him in in order to try Hinds at quarterback. Axline came in quite obviously in a huff, mumbling to himself. When he got within hailing distance of the coach he called in aggrieved tones, "What th' deuce have I done now?" Coach Bachman smiled his nicest and replied "You made a touchdown on those soldiers, didn't you?" Whereat the Aggie quarter sat down quite meekly.

By the way, Hinds is not such a bad quarter himself. Did you notice how he sucked the Army ends in, then sent Cowell around the end for a touchdown. It was as neat a completion of the play as was made during the game.

Winter made his initial appearance at half Saturday. He is surprisingly rangy for such a large man. When he learns to sidestep and to use the stiff arm he will be a valuable asset to the Aggie team. With Winters, Sears, and Goerke in the backfield, the Wildcats will have a line smashing trio heavier than anything seen on Ahearn field in the last three years.

While the victory Saturday is cause for elation to Aggie fans, because of the improvement in playing tactics displayed by the team, it would be well not to attach too much importance to the result of the game. The Camp Funston team lacked much of having as good men

as played on the soldier eleven last year. They were not in condition, and did not work together any too well. The Aggies will have many tougher problems than that presented by the Funston defense to solve before the season is over.

In speaking of the football prospects of the coming season the Iowa State Student at Ames says: "The backfield that Dr. Paine has severed from his material this fall will show a substantial gain in weight from the one with which Mayser trimmed the

Kansas Aggies so badly last year." Dr. Paine will find an entirely different type of team at K.S.A.C. this season and no doubt the results of last year will be reversed.

Delta Delta Delta has pledged Miss Elizabeth Powell of Topeka. Sigma Phi Epsilon has pledged Phil Heartburg of Manhattan freshman in industrial chemistry.

The Acacia fraternity has pledged G. E. Troupe, sophomore in general science.

The Sigma Alpha Epsilon fraternity held initiation services Sunday, October 10, for the following men: Richard Stanhope, Eureka; Ralph Shideler, Girard; Theodore Knox, Frankfort; Jerome Wilson, Kinsley; Harry Wareham, Manhattan.

Alpha Delta Pi has pledged Miss Marion Traynor of Dodge City.

Miss Lillian Baker, chief clerk in the home study service, has been transferred to the printing department.

If the girl who took the red sweater from the store at 17th and Leavenworth at 6 o'clock Sunday evening, will return it, she may be saved considerable annoyance. It-p

Good Taste in Footwear

To the woman who cares to be shod well but not extravagantly the JOHN KELLY fall models which we are now showing will make a strong appeal.

Graceful, pleasing lines, a smart appearance and the look of quiet elegance that is

achieved when fashionable leathers of the first quality are wrought by expert craftsmen.

Our sales people will take pleasure in showing you the styles of your preference. Whether it's a smart walking boot, a fall oxford or a dainty, graceful tie, we have it and the style is right.

Priced as low as shoes of refinement and superlative quality can be.

TRYOUTS FOR COLLEGE PLAY BEGIN MONDAY

TRIALS TO BE HELD EVERY AFTERNOON NEXT WEEK

JUDGE TALENT BY NEW SYSTEM

Every Student Is Eligible to Try—Purple Masque Will Give Three Plays This Year

Tryouts for the first college play have been scheduled by the Purple Masque fraternity for every afternoon next week between the hours of 4 and 6 in Prof. J. G. Emerson's office, G56.

Use New System
Last year students who tried out for a play were required to be prepared to give some selection along the dramatic line and were judged according to the way the selection was given. This year the Purple Masque has worked out a new system of tryouts. Professor Emerson doesn't say what this system is, in fact it's a surprise. All the president of Purple Masque will say is "We want everyone to try out. Just bring your brightest smile, come, and do whatever we tell you."

The Purple Masque made a reputation for itself last year by the two high class plays it produced, namely George M. Cohan's "Seven Keys to Baldpate" which had a season's run in New York, and the Festival week play "Daddies" which was secured for amateur production only through the courtesy of David Belasco and its Kansas author, William Hobble.

Will Give Three Plays
Preparations are being made to give three plays this year, the first some time in November, the second in February, and the third during Festival week.

"There will be a chance for a number of would be dramatists to come to the front this tryout," says Miss Florence Helzer, head coach.

The Purple Masque has in view even better plays for this year and is anxious to secure the very best talent in K. S. A. C. to make this year of dramatics a successful one.

WILL HAVE TWO WHACKS AT K. U.

TRACK MEET AND FOOTBALL GAME OCTOBER 30

Twenty Men Working on Cinder Path—Will Choose Team October 23

The Wildcats will have two chances to "whop" the University of Kansas on Saturday, October 30. In addition to the football game on that date there will be a cross country run between the two schools. A team of five men from each school will compete. The point winners will be awarded the track K.

The Aggie contestants will be chosen at a cross country run to be held on Saturday, October 23. Some 20 men have been working out during the past month and are in good shape for the test. A time handicap system will be used, Watson being the only man to start from scratch. Cups will be awarded to the winners of first, second, and third places in this run.

Ray Watson, captain of the track team, is anxious that more men come out for the run. Any Aggie student, freshman or upperclassman, is eligible for the preliminary race on October 23. Of course, only sophomores, juniors, and seniors, can run in the K. U. dual meet.

Methodist Students To Hike
College Sunday School classes of the Methodist church will go on a hike this evening, October 15. There are more than 900 students enrolled in college who are Methodists or who express a preference for the Methodist church. Mr. Clammer's class of young men were the pioneers in planning this all Methodist hike in which all other classes of the church have been asked to join.

Freshmen
All first year students who are taking the special course, yet have freshman standing, must present their credentials before they will be allowed to vote or be voted upon. Please attend to this at once.—Frank L. Howard.

W. A. Wattles To Princeton
Willard A. Wattles, Kansas writer and professor at the University of Kansas, has accepted a position as professor in Princeton university, Princeton, N. J. Mr. Wattles is author of the poem "Lanterns in Gethsemane," the book "Sunflowers," and he contributed to the book "Songs from Hills." He is a member of the Poetry society of America and of the Kansas Authors' club.

MUSIC PROGRAM MAKES BIG HIT

APOLLO CLUB AND BAND ENTERTAIN ASSEMBLY

Singers Introduce New Dramatic Features Into Performance—Miss Bess Curry Is Soloist

The official 1920-1921 debut of the Apollo club and band was made at assembly Wednesday. Both organizations scored a big hit with the student body, and a record attendance was present.

The Apollo club gave their program first, introducing new dramatic features into their performance which were extremely popular with the audience. The Apollo club is directed by Prof. A. L. Lovejoy. The concert by the band was given under the direction of Prof. Harold Wheeler.

Following is the program given by the club: Sailor's Chorus by Perry; Hie-Away Home by Parks; Kentucky Babe, a negro folk song; Italian Street Song from Naughty Marietta, the soprano solo sung by Miss Bess Curry, and the Bells of Shannon.

The concert by the band included the following numbers: Le Pere De Les Vieitoire; Ballet Egyptian; Babes in Toyland; and the Carmen Waltz, in which Miss Curry sang.

"Y" MEMBERSHIP DRIVE NOW ON

MANY FRATS AND CLUBS REPORT 100 PER CENT

Men Are Asked to Join As a Vote of Approval of Y's Work

The Y. M. C. A.'s 100 per cent membership drive which was started on Wednesday evening simultaneously with the Y. W.'s drive, is progressing with marked success. Within 24 hours after the drive had started several of the fraternities and clubs reported 100 per cent.

Earnest Hartman is chairman of the drive and he has appointed one or more representatives in each organization to canvass the individuals in their respective groups. This membership campaign is in no way connected with the financial campaign which will come later. Men are being asked to join as a vote of approval of the Y's work for the past year.

No discrimination will be made against students who do not sign.

MISS GRACE DERBY LEADS Y. W. MEETING THIS WEEK

Big and Little Sisters Organization Holds Special Meeting Every Month

Vespers this week was the second of a series, "The Ten Commandments in the Twentieth Century." Miss Grace Derby was the leader. Her subject was "Sham or Reality." She dealt with the application of the third and seventh commandments to life, particularly to college life.

Three college girls also made short talks. Helen Neiman spoke on "Sham or Reality in the Class Room." Mabel Ginter on "My Purpose in College, Sham or Reality," and Alice DeWitt on "Sham or Reality in Friendship." This was the regular monthly big and little sister meeting.

PRESIDENT JARDINE AND DEAN FARRELL ATTEND CONFERENCE

Principal Speaker of Conference is Herbert Hoover

Pres. W. M. Jardine and F. D. Farrell, dean of the division of agriculture, attended a conference of the state board of agriculture which was held Thursday morning in Topeka. The conference was on "Marketing" and "Marketing Conditions." The principal speaker of the morning was Herbert Hoover.

Wednesday evening President Jardine and Dean Farrell were entertained at a dinner given by the Rotary club of Topeka.

Melodious Strains Swell The Breeze About The Old Ag

Have you heard those melodious notes that issue from the old Ag? Now we take it for granted that you are used to hearing everything from a soprano screech to a gizzly base when you pass the auditorium, but what of those tender strains that swell the breeze round the old Ag?

Students who are will-be musicians will soon find that the cause of the noise is only an innocent looking Columbia phonograph which Prof. W. E. Peterson and Prof. P. P. Brainard are using to tell would-be singers just how far it is wise for them to pursue Dame Melody.

Yes, the apparatus is here and the tests have begun. The first group of students interested in the Seashore group tests of musical ability were tested last Wednesday. In fear and trembling they seated themselves in G-27, for all who have had any psychology know that in Professor Peterson's office may be found anything from an electric buzz saw to a row of kiddie's blocks.

For this experiment Professor Brainard used only a Columbia record and played—you mustn't know what, for a test wouldn't be a test if you knew the questions. And if you aren't enough of a musician to get to take the test, you'll surely be interested in the results.

A Fine Edition
The Kansas State Collegian issued a splendid special edition in honor of K. S. A. C. day at the International Wheat show. It was devoted extensively to the Aggies' special train to Wichita and was a good example of competent college journalism.—Wichita Beacon.

Class Takes Trip
L. E. Conrad, head of the department of civil engineering, with several other professors accompanied the Monday class of highway engineering to Geary county where they inspected the construction work being done there. G. A. Russell and Lloyd Miller, graduates in '20, are supervising the work.

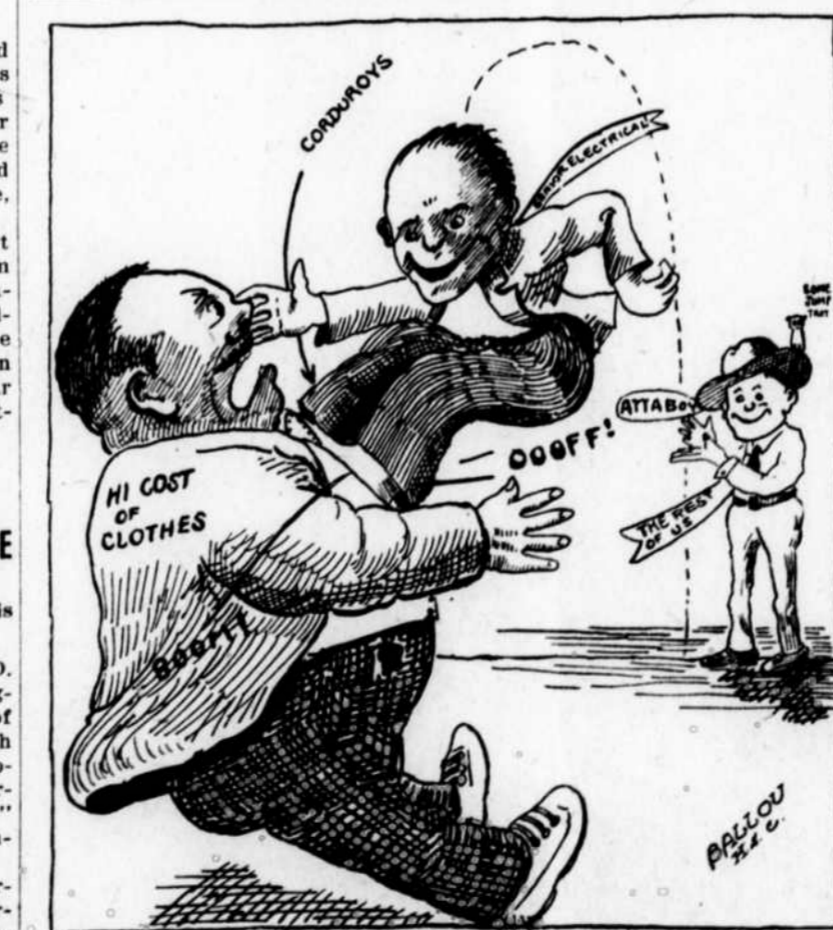

Announce Pledging
Delta Zeta has pledged Miss Elizabeth Dickens, of Manhattan. Miss Dickens is a junior in the department of industrial journalism.

STATE ENGINEERING COUNCIL HOLDS MEETING AT TOPEKA

Make Plans for Presenting Bills to Legislature

The Kansas State Engineering council met at Topeka October 9. The Engineers Registration bill and the Uniform Boiler code were referred back to the original committee for redrafting and presentation to the legislature.

The Engineers Registration bill requires the registration of all practicing engineers and is designed to protect the health and property of citizens of Kansas by requiring evidences of ability of all engineers whose work may effect the safety of others. The Uniform Boiler code requires that all boilers brought into the state shall meet certain standards, thus safeguarding citizens against the dangers of boilers.

You Tell'm Corduroy, You're Rough!

TO ENCOURAGE MORE AGGIES IN ATHLETICS

GYM MAN PLANS INTER-ORGANIZATION MEET

GIVES EVERYBODY A CHANCE

Circulars Sent Out to Get Sentiment of Students—Mike Thinks It May Develop Stars

The department of physical education at K. S. A. C. is planning the adoption of a system of intramural, or inter-organization athletics for the school. E. A. Knoth, assistant professor of physical education, and director of the physical training classes for men, is sending out circular letters to all organizations of the school in order to obtain an expression of the sentiment of the student body regarding the plan.

Each Unit To Have Manager
Each fraternity, military organization, boarding club, or any other independent unit in the college will appoint an intramural manager whose duty it will be to represent his organization in the intramural athletic council, see that his various teams are organized and captains elected, send names of teams and captains and scores of contests to the director of intramural athletics. The program will include contests in basketball, track, baseball, boxing, wrestling, swimming, and tennis. Suitable awards to winners will be made by the athletic board.

Plan Found Successful
This plan of athletics has been adopted by many of the more progressive eastern schools, and by California university. It has also been tried out and pronounced successful at Bethany college, Lindsborg, where last spring under the guidance of Coach Omer boys, girls, and faculty members all competed in different sports.

E. A. Knoth, who will be director of intramural athletics should the plan be adopted, desires that every organized group of men on the hill be represented in the project and requests that the names of prospective members be submitted to him at the athletic office in Nichols gymnasium not later than October 25.

Mike Ahearn, director of physical education and athletics in the college, is heartily in favor of the plan.

"Perhaps some modest athletes who do not come out for varsity squads, and who would participate in intramurals will be found to be of varsity calibre through these contests," Ahearn said. "Athletes who otherwise would waste their sweetness on the desert air, to quote the classics, might be induced to take an interest in school contests through the instrumentality of such games as are proposed by Mr. Knoth."

Dale To Michigan University

E. E. Dale, who was one of the instructors in the botany department last year, has accepted a position at Ann Arbor this year and is also working on his Ph. D. degree there. Mr. Dale was granted a master's degree by the college here last spring.

To Elect Collegian Board
The election of the new Collegian board will occur next week. Nominations will be recorded with the presentation of a petition signed by 20 students. Four members are to be elected, and in order that the election may be held the last part of next week, all petitions should be sent to Prof. N. A. Crawford before next Wednesday. Any student who has a genuine interest in the Collegian is eligible for nomination.

FRESHMEN WILL HOLD ELECTION

ADOPT TWO NEW FEATURES IN CONSTITUTION

Will Elect Officers for Full College Year—To Have Devotional Leader

The freshman class will hold election of officers all day Monday, October 18, at the window opposite the post office. All first year students who are taking the special course, must present their credentials before they will be allowed to vote or to be voted upon.

With comparatively little friction or quibbling the freshman class at its third meeting last Wednesday night adopted a constitution and by-laws and nominated its officers for the year.

The nominees are as follows: president, Frank L. Howard, R. D. Cuthbertson, and Ralph Jenkins; vice president, James Leonard, Scott Pfuetez, Maude Whitehead, and Ray C. Smith; secretary, Dorothy Dugan, Gladys Gritz; treasurer, Sue Huston, Curtis Brown, Edgar Davis, Bert Swartz; devotional leader, Marie Correll, Mabel Hurr, Louise Schnieder, Derill Ziegler; marshal, Joe Quinn, A. R. Stark, Ralph Muir; representatives to the S. S. G. A. council, George Humphrey, Barton Colburn, A. E. Muse, Harold Jefferies, Fred Geffern; parliamentarian, J. J. Madison, Fred Davis, Gladys James; athletic director, A. R. Stark, M. J. Rosiere, A. P. Atkins, Charles Couch, Coleman Ash; historian, A. T. Newman, Virginia Groux, Mary E. Henderson.

One person from each division was selected to form a committee to have charge of the balloting and the counting of the ballots, as follows: general science, Scott Pfuetez; veterinary science, F. N. Davis; home economics, Florence Barnhisel; engineering, R. M. Nichols; agriculture, Charles Danielson. Two permanent cheer leaders were elected, J. C. Post, and Marion Coyle.

The constitution deals with the class officers, their election, eligibility for voting, explains the duties of the officers, etc., and as unanimously adopted contains two unusual features. A devotional leader was added to the list of officers, and it is hoped that the establishment of this office will create a precedent. It was also decided to elect officers for the full college year instead of one semester as is the custom with the upper classes.

POWER WELDER HASTENS WORK

WELDS BOTH STEEL AND BRASS SHEETS

Contrivance Built by K. S. A. C. Graduates—Machine Valued at Nearly \$1,000

Steel sheets up to one-eighth of an inch and brass sheets up to one thirty-second of an inch can be welded in a few seconds by the electrical spot welder that is being used by the electrical department to weld steel and brass sheets. The machine was built in the college shops by C. E. Browning and George Hamilton, both of the class of 1920.

Spot welds are made by passing large currents of electricity at a low voltage through small spots on two steel sheets. These spots are heated to a white heat in one or two seconds, and the welding quickly accomplished. The current is supplied by a 10 K.V.A. transformer giving 4,000 amperes on the low voltage side. The commercial value of a machine of this type is nearly \$1,000.

Booth Speaks To Journalists
L. R. Booth, assistant director of advertising for the Capper publications of Topeka, talked to the journalism students at the regular seminar hour Monday afternoon. The main points of the talk were, organization, system, and management in the news-field.

Miss Florence Swenson spent the week end at her home in Kansas City.

GOOD CHANCE TO BEAT THE PEDAGOGUES

EMPORIANS HAVE HEAVY TEAM BUT NO SPEED

K. U. SWAMPS THE TEACHERS

Team Undergoing Stiff Practices this Week—New Tactics in Daily Scrimmages

What's the dope on the Aggies' chances against other Valley teams? We'll be able to answer that question in part, at least, after the Saturday game with Emporia normal. We will have a direct comparison with K. U., for the school down the Kaw played the Teachers two weeks ago, beating them 47-0.

Have Stiff Practices
The team is going through another week of hard practice. Passes are receiving much attention from the backfield men and the linemen are going through strenuous practice of defensive work. Daily scrimmages with the freshmen give opportunity to put new tactics into use. The men are holding up well under the grueling work, only a few slight injuries being the result of the scrimmages.

Shorty Cowell was thrown heavily Tuesday afternoon and sprained his ankle slightly. He will probably be able to play Saturday. The other injuries are bruises or lacerations, that, while painful, will not keep any man out of the game.

Prock Randles' ankle is still giving him considerable trouble, and it is doubtful whether he will play against the pedagogues.

Emporia Men Heavy

The Emporia normal has won one game this season and lost two. The win was over Pittsburgh normal, while the losses were to the University of Kansas and Ottawa university. The Teachers are reported to have a heavy team, one of the heaviest in the Kansas State conference, in fact. They will probably be as heavy in the line as the Aggies and a trifle heavier in the backfield. However, they do not possess the speed that the Aggies have been showing. The large score by the University of Kansas piled up against them would indicate that their defense is weak. It must be remembered that that was two weeks ago, however, and that a team may change greatly in two weeks.

Large Score Predicted

Many of the Aggie fans and Manhattan supporters of the team are looking for a lop-sided score to be made against the Emporians, thinking that it will bolster up the morale of the team. Wild predictions as to the size of the score are being indulged in quite freely. The Aggie coaches, as usual, are not predicting. From present prospects, many new combinations will be tried Saturday if the visitors do not crowd the Aggies too hard, and probably the score will not be of large proportions.

Mike Ahearn wishes to announce that he still has a few season tickets, and that these will be on sale at the athletic department offices in Nichols gymnasium at any time previous to 3 o'clock Saturday. A saving of fifty cents will be made by buying season tickets to use for the remaining three games on Ahearn field.

TWENTY FOUR GIRLS TAKE TEN MILE HIKE TUESDAY

Anna Best, Hike Manager, Has Arranged for Two Hikes Each Week

Twenty four Aggie coeds who aspire to become members of the W. A. A. went on a 10 mile hike in Eureka valley Tuesday evening, returning home on the interurban.

Miss Anna Best, hike manager, has arranged to have two hikes each week while the weather permits. The dates set for these hikes are as follows: October 18, Monday, 5 miles, to Hackberry Glen; October 20, Wednesday, 10 miles, to Rocky Fort; October 25, Monday, 5 miles; October 28, Thursday, 10 miles, to Ashland Bridge; November 1, Monday, 5 miles, and November 4, Thursday, 5 miles.

C. W. McCampbell, professor of animal husbandry, returned Sunday from Birmingham, Ala., where the Alabama State fair was held. Doctor McCampbell was one of the judges who placed the cattle there.

FRIDAY, OCTOBER 15, 1920

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Make the "Beat K. U." slogan a reality.
4. Aggies at the top of conference athletics by 1922.
5. Clean politics.
6. Greater cooperation between alumni, students, and faculty in bringing athletes to K. S. A. C.
7. Remodeling of the auditorium stage.

TOMORROW IS OUR LAST CHANCE

Tomorrow's the last chance for Aggie rooters to cultivate a spirit of cooperation with the team before the first Missouri valley game of the season on October 30. That's the day we play the University of Kansas. Aggie rooting on that day should be up to Missouri valley standards. Whether we like it or not, we'll have to admit that the rooting on Ahearn field has not been all that it should be. At times it has been in strong contrast with that at other schools.

At K. U. the rooters cooperate. At the Washburn game last week the Washburn visitors were all on one side of the field while the K. U. students were all on the other. As the K. U. team came on the field the entire K. U. section stood without being told and with uncovered heads sang their college song. Instead of three sections doing the yelling, the cheering was done under one leader with two live assistants who continually watched their leader. When the cheer leader called for a yell, he got it, and it was not necessary for him to remind the students that it was customary to stand for their college yell. At the close of the game the entire crowd remained standing until the team left the field.

Let's have 'em out tomorrow and practice up, for it's our last chance before the K. U. game. Let's have two yell leaders where we had one before. Let's have the rooters yelling together—and perhaps we will remember to stand for Jay Rah.

WHAT DO YOU BELONG TO?

"I don't belong to anything!" we hear you say.

Then you're missing half your life and if you fail to avail yourself of the opportunity to join one of the literary societies on the hill, or any of the other organizations, all of which stand for worthwhile things in student life, you will miss one of the happiest experiences in the career of any Aggie.

There are eight literary societies, three brother and sister organizations, and two mixed groups. Within the bounds of one of this number is surely a place for you. The Hamiltons and the Ionians go together, the Eurodelphians and the Websters, and the Brownings and the Athenians. The mixed organizations are called Alpha Beta and Franklin. The primary purpose of each of the societies is to promote student fellowship and to make for cooperation in student endeavor.

If somebody extends an invitation to you to attend a meeting of one of the societies, accept it. In literary society circles will be found representative men and women of K. S. A. C., an affiliation with whom will result in mutual good.

SHALL THE COW BE OUSTED?

"The name of this school should be 'Kansas State college' and not the 'Kansas State Agricultural college'"; R. A. Seaton, dean of the division of engineering, said in an interview today.

"All of the Aggie alumni who have been graduated from the engineering division, want the name changed," Dean Seaton said. "The alumni feel that is applying for an engineering position it is unfair for them to have to say that they were graduated from the agricultural college, because the name does not give the employer the correct idea of the work they have taken. It would be much better if they would say that they graduated from the State college."

"We would not consider calling the institution the 'Kansas State Engineering school' or the 'College of Home Economics,' or the 'State School of Music,' because it would be unfair to the other divisions on the hill. Persons who are not thoroughly acquainted with the school naturally assume that the name indicates the kind of subjects that are taught here."

"While the work in agriculture here ranks very high, it is but one of the several lines of activity carried on by the college. The students of agriculture in this college constitute only one part of the entire enrolment. Already this year there are 250 freshman engineers, and the total enrolment in the division for the year is expected to reach 1,000."

"The freshmen are divided among the different engineering departments as follows: Electrical 117, mechanical 43, civil 60, architecture 15, agricultural engineering 9, flour milling 6."

Students taking journalism, music, home economics, veterinary medicine, and other subjects are urging that the name be changed. The number of different curriculums offered here is equal to that offered by many of the better universities. In fact the principal collegiate courses not instituted in this school are law, medicine, and theology.

PAMPHLET INFORMS AGGIES ON FALL ELECTION ISSUES

Professor Burr Distributes Booklet in Sociology Classes

Prof. Walter Burr who is doing rural leadership work in the extension department has distributed to the students in his sociology classes a little pamphlet published by the state printer which contains three amendments to the Kansas state constitution to be submitted to Kansas voters this fall. These amendments which have to do with farm homes and good roads will engage the attention of every K. S. A. C. voter.

The Farm Homes amendment proposes to provide by law a fund to encourage the purchase, improvement and ownership of farm lands for occupancy and cultivation. The fact that in Kansas, the state which looks upon itself as a state of home owners, forty-eight per cent of the farmers were tenants in 1918, gives purport to the need of the Farm Homes amendment.

Another amendment which the state legislature by almost unanimous vote will submit to the people of Kansas is the Good Roads amendment.

Any Kansas Aggie who wishes information on the amendments in order that he may vote intelligently

at the coming election may get a copy of the Constitutional Amendments from the loan desk of the library from Professor Burr, or from one of the sociology students.

W. A. A. ELECTS MANAGERS OF GAMES FOR THIS YEAR

Irene Drake, Belle Hagans, Anna Best, and Lillian Rommel Chosen

The Womens' Athletic association have elected game managers for the year. The following girls were chosen: Irene Drake, basketball; Belle Hagans, hockey; Anna Best, hike; and Lillian Rommel, tennis.

The association is planning a party in the near future for the Aggie coeds. They hope to arouse the interest of the girls, especially the new girls, in all college sports. A good demonstration of their pep was put on Wednesday evening when the W. A. A. met on the athletic field for the practice football game.

For Sale: Strictly modern home 1101 Bluemont. Oak floors down stairs, fire place, cement basement, gas, cistern, garage, excellent furnace, 1 1/2 lots, upstairs partly furnished. Special price for quick sale. Immediate possession. Kittell Realty company. Suite 3 Farmer's Union Bldg. 10-3

Our Mistake

An article entitled "Ag Division has Five Foreigners" appeared in the Collegian of October 8, in which the name of Foley Kiang was unintentionally omitted. Mr. Kiang is a Chinese student, and a senior in the division of agriculture.

Miss Marie Kent spent the week end in Topeka.

We wash everything from silk shirts to overalls. Manhattan Steam Laundry. Phone 157. 4-8

C. H. Scholer went to Topeka Thursday for a conference with the state geologist, Dr. R. C. Moore, regarding the cooperative work being done between the road materials testing laboratory and the state geologist in making a survey of road building materials in Kansas.

Miss Ruth Garvin spent the week end at her home in Lawrence.

For Sale: 9 room modern house. Hardwood floors, cistern, near college. \$4,500, furnished \$5,000. Kittell Realty company. 10-3

Dating Up Ethel---

Dear Ethel

The other day

I saw a sign

In Anderson Hall

Which said

The COLLEGE CANTEEN

Down stairs

And you know

What a devil

I always was

And I went down

And it was dark

But finally

the door

And then

Two more doors

Opp. each other

And in one place

I saw a fellow

That had another fellow

Down in a chair

And I went in

At the other door

And there was

The COLLEGE CANTEEN

And it was so good

I ate 33c worth

Including war tax

And when you come up

To the K. U. game

I will take you

Down there

And show you what

A real canteen is

And maybe

Buy you something

Yours as I was

Horace

TESTS SAVING STATE MONEY

ROAD TESTING LABORATORY SAVES STATE \$25,000

Examine 2,239 Samples of Road Material—Work Requires Services of Ten Persons

Within the last two years the road materials laboratory has received and tested 2,239 samples of road materials which were to be used in building hard surface roads in Kansas. Through these tests many localities learn that there is material suitable for building good roads in their own community which is superior to materials which would otherwise have to be shipped in.

It is difficult to set an exact valuation to the state of the tests conducted by this laboratory but it has been estimated that the value of the tests which made possible the use of local sands, stones, gravels, and other natural deposits of road materials is \$275,000 for the biennium.

Another source of saving to the state produced by the road materials testing laboratory is in preventing the use of unsuitable materials which would greatly decrease the life and usefulness of the roads built. While the cement, brick, and other road building materials manufactured in Kansas plants are generally of high quality, it is not safe to use them in large and expensive construction work without testing. It is estimated that the saving to the state through the use of better road materials is \$320,000 for the biennium.

Although very little money is appropriated by the state for this work it has grown until now it requires the services of 10 persons on full time. Few investments which the state has made have returned larger dividends than the money appropriated for testing road materials.

Y. W. ADVISORY BOARD HOLDS FIRST MEETING

Plan to Study Newer Phases of National Association Work

The first regular meeting of the advisory board of the Y. W. C. A. was held last week at the home of the president, Mrs. E. Melchers. Several members of the cabinet were present and reported the work and campaigning done by their committees. The board plans to take up special study during the winter concerning some of the newer phases of national association work. The first subject under the special study is Health, which will be discussed by Dean Mary Pierce Van Zile at the November meeting.

PROFESSOR CRAWFORD TO DO BOOK REVIEWING FOR POETRY

Reviewing Staff Composed of Widely Known Poets of Both U. S. and England

Prof. N. A. Crawford, head of the department of industrial journalism has been asked to do regular book reviewing for Poetry, one of the best exponents of modern poetry in the United States.

Poetry is a magazine internationally recognized as the strongest publication in the field of new poetry.

The reviewing staff of Poetry is composed of widely known poets of the United States and England. Among the members of the staff are Alice Corbin, Edgar Lee Masters, and Richard Adlington.

Professor Crawford has had poems published in the New Republic, The Nation, Contemporary Verse, The Midland, Current Opinion, and various other well known publications.

HARRY VAN TUYL IS NOW STATIONED AT FORT MEYER

J. W. Worthington, '17, Has Received Commission as First Lieutenant

Harry E. Van Tuyl, '17, who has recently been commissioned, and who is now stationed at Fort Meyer, writes that he is mighty well satisfied with the service.

Van Tuyl states that J. W. Worthington, '17, has received a commission as first lieutenant of the regular army. Worthington is now in Honolulu, where he has been stationed since his graduation. He is in the veterinary department of the army.

"VODVIL" WILL BE GIVEN ON DECEMBER 17 AND 18

No Definite Plans Given Out—Good Material in School This Year

Plans for the annual "Vodvil" to be held December 17 and 18 are now under way. The dramatic and music departments, which have charge of the program are enthusiastic concerning suggestions which have been made for this year's performance, and concerning the material in school this year. No definite plans have been given out yet.

The fact that it has been decided to give two "Vodvil" performances will recall to old students the packed house which greeted the performance given last year.

O. W. Hinshaw has arrived in Manhattan from El Paso, Tex., where he has been for the past eight months doing inspection work for the Federal Horticultural board. Mr. Hinshaw expects to spend the winter here. He will be connected with the entomology department, and will do special graduate work toward a master's degree.

TO BUY MAPLE SYRUP CHEAPER

SECOND MOVE FOR COOPERATIVE BUYING LAUNCHED

Cooperative Apple Buying Is Success—Not Enough Apples to Go Around

A second move for cooperative buying is now being launched. The State Farm bureau is having maple syrup shipped in quantities direct from the producers in New York. F. A. Dawley, assistant county agent leader at the college has consented to receive orders from faculty members and others connected with the college who wish to buy the genuine article at the cooperative price.

In an issue of the Collegian an item recently appeared telling of the cooperative buying of apples by faculty members. The movement was a failure in only one respect—several people who expected to purchase a barrel of the apples were disappointed, there were not enough to go around. Recognition is due P. P. Brainard and George E. Gemmell of the home study service, and A. M. Paterson of the animal husbandry department for the time and effort they gave to this enterprise.

Helps Distribute Heifers
R. B. Becker, of the dairy department, has recently returned from Holton where he helped County Agent Leaker distribute eight Jersey heifers to the clubs there. Mr. Becker and Mr. Leaker have been working together for some time to organize Boys' and Girls' Pure Bred Jersey Cattle clubs in Jackson county. This club was organized with a membership of eight boys and girls. On many farms the Jersey heifers distributed to the club members will be the first pure bred stock. The club work will tend to turn the interest in the future toward pure bred stock.

Prof. N. A. Crawford, head of the journalism department, and Clifford Stratton, alumni secretary, were in Topeka Wednesday of last week to attend the funeral of Miss Bertha Hempstead, who was at one time editor of the State Journal.

CIVIL ENGINEERS DRAW BIG MONEY

LACK OF MEN MAY HINDER ROAD BUILDING

Inexperienced Graduates Offered \$200 Per Month—College Asked to Recommend First and Second Year Men

Unless more young men than have studied to become civil engineers in the last few years take up the profession in the future the government will be seriously handicapped in its federal aid road program, in the opinion of R. A. Seaton, dean of engineering in the Kansas State Agricultural college.

"It has been estimated that only one-third of the civil engineers needed in the federal aid road program will be graduated in the next few years according to the present enrollment in engineering schools," Dean Seaton says. "This year our enrollment in civil engineering is only a 10 per cent gain over last year—no greater gain in enrollment than other departments of the engineering division."

"I received three requests for civil engineers in one day's mail this week. Salaries ranging from \$2,200 to \$2,500 a year are offered inexperienced graduates. This shortage is certain to embarrass the government in its road building program."

So acute is the need for engineers that the Kansas State Agricultural college has been asked to recommend young men who have completed one or two years of work in the engineering division. Salaries for men having these qualifications range from \$115 to \$125, and expenses, per month.

HOMECOMING MIXER PLANNED FOR ALUMNI

Many Old Students Coming Back to See Mike's Team Break the Record

The alumni association is planning a big homecoming mixer to be held on the evening before the homecoming football game. The plan is to hold the mixer not later than 10 o'clock and no college organization will be allowed to hold any function until after 10 o'clock on that evening.

It is hoped that the largest crowd of alumni ever assembled at the college will be present and preparations are being made for a crowd of 1,000 persons.

The fact that two well known Aggie boosters, Mike Ahearn and Cliff Stratton, will be here to greet the homecomers will prove a drawing card to the alumni. Already many old graduates have signified their intention of coming back to see Mike's team in action.

H. Umberger, president of the alumni association, is to appoint a

committee from the alumni who will look after the preparation for the mixer.

J. B. Fitch left last week for the National Dairy show at Chicago and will leave Chicago next week for Riverside, Cal., where he will judge dairy cattle at the Southern California fair.

BEYOND THE HILL

Phillips university, a denominational school which has heretofore had compulsory chapel for the students, has fallen in line with the free American spirit and has made chapel attendance optional with the student altho his attendance is greatly urged and desired.

Out of a total enrollment of 3,125 to date, the University of Kansas has 1,986 men and 1,139 women. The college is the most popular division of the university while the school of education is at the bottom of the list with only eleven students, four men and seven women.

Head coach Dr. Forrest C. Allen of K. U. is aiming at lightness and speed this year, in preference to "beef." In accordance with this policy the nineteen men on the university varsity squad average only 170 pounds and the backfield also is light with the heavy men fighting to keep up.

Student rooms at Ohio State university have had the rent increased from \$3 to \$5 per week over last year while the average for rooms is between \$20 and \$25. Some landladies were asking as high as \$40 per month for their rooms.

Freshmen in the Colorado agricultural college will wear the freshmen caps this year as the result of the defeat suffered by them at the hands of the sophomores at the annual class day rush. The result of this contest annually determines whether or not the frosh will wear the distinguishing cap.

Indiana university, Purdue university and the Indiana State normal

school are on the verge of complete collapse because of an insufficient state tax levy. Members of the faculties of these schools are resigning in alarming numbers to accept positions at larger salaries in other institutions. The presidents of the three institutions met before the state board of tax commissioners to urge an immediate increase in the tax levy.

Phillips university is offering a course in oil geology in consideration of the great demand for geologists in the development of oil territories in the state of Oklahoma.

According to a recent ruling of the faculty of Utah university, freshmen will no longer be pledged to fraternities. The purpose of the new ruling is to avoid giving first year students a narrowed outlook on school life and to inspire them first of all with a spirit of loyalty to the school rather than to a particular fraternity or sorority.

Considerable agitation is coming from the students at Grinnell college for the removal of the restriction against Sunday dates which has been one of the traditions of that institution.

The Brown Bull is to have an opponent in the arena this year in the Crimson Bull which is to be put out by the Sigma Delta Chi of Indiana university. The Crimson Bull is a humorous magazine of a similar nature to the Brown Bull.

Out of a probable enrollment of over 600 at Nebraska Wesleyan this year the freshmen will number one half of the total number and the sophomores one fourth. This is the largest number ever enrolled at the institution.

Miss Annette Perry, '16, is assisting her sister in a tea room in Baltimore, Md.

J. M. Kimball of Topeka, business manager of the state board of administration, was a college visitor Monday afternoon.

Mr. H. A. O'Brien who assisted in the music department last year is taking private instruction under Edmund Meyer in New York City.

VET MUSEUM TO BE BEST IN U. S.

SPECIMENS VALUED AT \$5,000 TO ARRIVE SOON

Is Great Addition to College Property—Display to Be Open to Public by January 1

Veterinary students are looking forward with interest to the arrival of the new equipment of the new vet museum, which, when installed, will be the first one of its kind in the United States.

Included in the collection, which has been secured for the most part from the Kansas City Veterinary college and is valued at approximately \$5,000, will be found mounted specimens of injurious plants and specimens of all kinds of diseased animal tissue. Those who are familiar with material of this sort declare that the collection when on display will be one of the most educational and attractive exhibits in the country.

R. R. Dykstra, dean of the veterinary division, says that in all probability the display will be opened to the public by the first of the year. The museum will be on the ground floor of the vet building.

Floyd M. Pickrell, '18, is now county agent of Clark county. Miss Doris Riddell spent the week end at her home in Salina.

ESSENTIAL TO YOUNG MEN

The importance of a good banking connection for young men cannot be overestimated. Systematizing finances by using a checking account is a valuable training to young men. Quite often, the advice and counsel of our officers is helpful.

Besides, a young man who carries an account at this bank and shows proper interest in his financial affairs is not necessarily limited to his own resources in meeting business opportunities.

Service in clothes selling

THE greatest success in business comes, in the end, to the store that gives the greatest service. We all want success; but sometimes we forget that serving is the way to it.

Serving, as we understand it, means more than "waiting on" a customer, pleasantly, delivering his purchase promptly, etc. Service begins when you buy, not when we sell; yes, before we buy; it begins with the makers of our goods. That's why we buy, and sell

Hart Shaffner & Marx clothes

They serve; they serve the wearer. And that's why you ought to buy and wear them, and be content with nothing else.

Elliot's Clothing Store

SOCIETY

The marriage of Miss Mary Ward to Mr. Scott Mitchell Strain took place Wednesday, October 6, at Columbus, Ohio. Mrs. Strain was in charge of the cafeteria at K. S. A. C. last year. Mr. Strain is cashier of a bank in Akron, Ohio, where Mr. and Mrs. Strain will live.

The marriage of Miss Ruth Scott, of Topeka, to Mr. Charles Fay Buck, of Enterprise, took place Tuesday evening at the home of the bride's parents. The Reverend W. B. Fisher of the Methodist Episcopal church, of Wakarusa, officiated. Miss Scott was a student at Washburn college and has taken special work at the Kansas State Agricultural college. She is a member of the Alpha Sigma Alpha sorority. Mr. Buck is the son of Mr. and Mrs. C. A. Buck of Oskaloosa. He is a graduate of K. S. A. C. with the class of '15, and is a member of the Sigma Nu fraternity. He is head of the mechanical department of the Kansas flour mills at Enterprise.

The Social club held its first meeting of the year in recreational center Monday afternoon. The hostesses were Mrs. B. L. Remick, Mrs. R. R. Price, Mrs. V. L. Strickland, Mrs. P. L. Gaine, Mrs. C. E. Reid, Mrs. A. E. White, Mrs. G. A. Dean, Miss Elsie Smith, Miss Ethel McDonald, and Miss Pitman.

Quill club met Monday evening with Prof. N. A. Crawford at his apartment, 221 N. Juliette. J. W. Searson, head of the English department, gave a talk on the "Increase of Publishing Due to Present Prices." Figures were given to show that the reduction of publisher's prices is due to the cost of printing and to the great difficulty in securing publisher's books. After a short business meeting punch and cake were served to the guests.

The marriage of Miss Grace Skinner to Mr. Collis P. Bosworth of

Kansas City, Mo., took place on June 20. Mrs. Bosworth was a student at K. S. A. C. in 1916-17. She has taken nurses' training at Parkview hospital. Mr. and Mrs. Bosworth are at home at 2728 Gilham Road, Kansas City, Mo.

Miss Vera Peake of Belleville and Mr. Hugh Noble of Oberlin were married Thursday, September 23 at Broken Bow, Nebr. The bride was graduated from the general science course of the Kansas State Agricultural college in 1917. The groom is a student in Denver university. Mr. and Mrs. Noble are at home at 4376 Ames street, Denver, Col.

Miss Grace Marshall of Kansas City and Mr. Cecil W. Haines were married Wednesday evening, October 6, at the home of the Reverend Frank S. Arnold, pastor of the East Side Presbyterian church, Kansas City. The groom is the son of Mr. and Mrs. W. D. Haines, 349 North Fourteenth street. He finished the Manhattan city schools in 1910 and was graduated from the dairy husbandry course of the Kansas State Agricultural college with the class of 1914. Since his graduation he has been connected with creamery and dairy work in Hutchinson and Kansas City. At present he is with the Missouri dairy. Mr. and Mrs. Haines are at home at 808 Indiana avenue, Kansas City, Mo.

Announcement has been received of the marriage of Miss Esther Hostetter, '17, and Mr. Hubert Ghormley at Georgetown, Colo. They will make their home at 514 East Dakota avenue, Denver.

The Alpha Psi fraternity has pledged Fenton O. Killian of Perryville, Mo., and Roy Z. Shear of Mulleville. Mr. Killian is taking the course in veterinary medicine, and Mr. Shear the six-year course in veterinary medicine and animal husbandry.

The first social event for the faculty this term was the reception and dance which the College Club gave Thursday evening for its new members at the Recreation hall. The hall was attractively decorated with palms and cut flowers. In the receiving line were the new members and Mrs. Edward E. Fishback, Mrs. W. M. Jardine, Miss Katherine Bauer, Miss Florence Heizer, Mr. and Mrs. E. F. West, Mr. and Mrs. Cliff Auble, and Prof. R. W. Conover, and Dr. J. G. Emerson. Throughout the evening punch and wafers were served. Those presiding at the punch table were Mrs. M. C. Sewell, Mr. and Mrs. Hal Davis, Mr. and Mrs. Arthur Peine, Miss Elizabeth Rothmerel and Miss Katherine Kimmel. 250 faculty members were present. The new members of the club are Professors C. W. Matthews, W.

L. Dehner, D. A. Cummings, L. W. Hartel, R. B. Williams, R. B. Becker, H. T. Hill, C. W. Bachman, A. R. Lee, L. R. Cleveland, J. G. Tew, F. A. Smutz, I. A. Wojtaszek, F. Fox, Herndon and J. W. Rogers.

Miss Ruby Mills of Macksville, and Mr. Thorne Compton of Larned, were married in Hutchinson at noon Tuesday, October 12. They left immediately for Wichita, where they will make their home. Mrs. Compton was for almost five years connected with the animal husbandry department of the college, acting as secretary to the head of the department. Mr. Compton was in college here several years ago, in the engineering division. He is at present employed as a construction engineer, with headquarters in Wichita.

E. L. KNOTSMAN CLO. CO.

The Smithy's Cousins Claim Championship of Aggieville These Days

Hearken back to ye good old days in front of ye old blacksmith shop in ye old home town.

Does it not again thrill you to hear the clank of steel against steel and the shouts of "ringers" and "leaner" and "now Ezy, put the next one a leetle bit closer."

What is this anyhow—a duel? No! Simply a resumption of that grand old American institution—the game of horseshoes.

Down in Aggieville, in back door yards, and even on the front lawns games are in daily progress, champion striving against champion, and would-be champions against the title holders. There are no physical limitations to this game. Anyone that can throw a horseshoe over twenty-five feet is eligible. Of course, some accuracy and precision are required else some erstwhile spectator or too enthusiastic rooter be the receiver of a ringer around his neck, or ear, or, more unfortunate still, have a "leaner" leaned against his face.

If one wants to "go out" for this game there is no need of checking out a locker. Get on the grounds early as the first rule of the game is "first there get to play until exhausted."

Or you might bring along the horseshoe over your door and start a little game of your own.

horticulture department, arrived Monday to begin his duties. Professor Barnett has held a similar position in Washington State college.

ANNOUNCEMENTS

The Browning and Athenian literary societies will hike to Wildcat, Saturday evening after the football game.

The Company A Glee club will meet at the barracks at 2:30 o'clock Sunday afternoon.

The Philomathian literary society will have its annual cake day, October 16, at 8:00 in the evening.

The Eurodelphian literary society will give its regular program Saturday, October 16, at 3:00 in the afternoon.

The Hamilton literary society will meet as usual in the Hamp-lo hall tomorrow evening.

The Aggie Press club will hold a meeting after the regular journalism seminar next Monday afternoon. Plans will be discussed for the first Press club social affair of the term.

The men who were down at the Patton mine last year are asked to send in their names to Cliff J. Stratton.

The Girls' Loyalty club will have its first meeting Monday, October 18, at 5 o'clock.

Tryouts for the first Purple Masque play will be held every evening next week between the hours of 4 and 6 in Prof. J. G. Emerson's office in G56.

Freshman class election will take place Monday, October 18, from 8 to 5 o'clock.

The Rifle club will meet this evening at 5 o'clock.

The Aggie Press club will meet Monday evening at 5 o'clock in K57.

Boys, look for the shirt and cap sale Ad. in this paper. A. M. Rogers, 1220 Moro St.

Delta Zeta was at home Tuesday evening from seven until eight o'clock for the Delta Tau Delta fraternity. Thursday evening they were at home to the Sigma Nu fraternity.

For Sale: 4 room house on Blue-mont avenue. Pull lot, \$800 this week. Kittell Realty company, Suite 3 Farmer's Union Bldg. 10-3

Prof. J. B. Fitch left Saturday for Chicago where he will judge dairy cattle at the National dairy show which is being held there this week. From Chicago Professor Fitch will go to Riverside, Cal., to attend the California State fair.

Alpha Theta Chi has pledged N. D. Ziegler, L. A. Laybourn, and D. S. Hall, of Oakley.

Alpha Theta Chi have held initiation for Otto R. Coburn, Preston; P. J. Hershey, Whitewater; W. T. Rolfe, Wetmore; C. R. Smith, Herington; Morton Stigers, Manhattan.

The Chi Omega fraternity have pledged Miss Elizabeth Taylor of Kansas City.

Don't throw away your dull safety razor blades. Have them resharpened for less than half the cost of new blades. Leave blades at Cooper's Barber shop, in the Main hall. On the campus. 10-6

Phi Gamma has pledged Richard Herold, of Fredonia, freshman in architecture, James Rosiere, freshman in engineering, and J. D. Buchman, freshman in agriculture.

A. M. Paterson, associate professor of animal husbandry, has returned from a trip through the valley states. Andy stopped off at Muskogee, Okla., where the Oklahoma Free State fair was being held, long enough to designate which were the best sheep exhibited.

George E. Martin spent the week end at his home in Perry, Mo.

Elder Leasure spent the week end at his home in Solomon.

Lester Smith spent the week end in Lincoln, Nebr.

Dr. W. M. Mason who is a senior member of the board of administration, from Topeka, stopped at the college Monday morning and visited the president's office.

Sunday dinner guests at the Kappa Sigma house were Miss Eleanor Ball, Miss Lillie Harkey, and Miss Lillian O'Brien.

Corduroy hiking breeches and corduroy shirts. The best quality in wollen shirts. A. M. Rogers, 1220 Moro street.

For Sale: 6 room strictly modern bungalow, maple floors, fire place. Cistern, gas, plenty of shade, near college. Kittell Realty company. 10-3.

L. G. Grandfield visited at his home in Wichita over the week end.

Prof. O. E. Reed, formerly head of the dairy department at K. S. A. C., visited at the college last week. Professor Reed is now in Indiana as head of the Gossard Breeding Estates of Martinsville.

TO HELP HIGH SCHOOL GIRLS WITH CLOTHES

CLOTHING CONFERENCE TO BE HELD HERE NOVEMBER 12

LIVE MODELS DEMONSTRATE

Conference Is Part of Y. W. C. A. Campaign for Purpose of Teaching Girls to Combine Style and Comfort

More than 350 girls from high schools throughout the northern part of the state are expected to attend a clothing conference to be held in the recreational center, on November 12.

The conference is under the auspices of the Y. W. C. A., which has launched an educational campaign for the purpose of teaching girls that garments can be stylish and becoming, and still be comfortable and healthful, allowing the wearers to forget about their clothes during work and play.

Chamber of Commerce Will Help

The girls will arrive in Manhattan at 3 o'clock in the afternoon. They will be met at the train by the local chamber of commerce and taken for an auto tour of the city. After completing a tour of inspection of the campus and buildings of the college, they will be invited to the recreational hall where a garment-wearing demonstration will be staged by 18 girl students of the division of home economics.

Live Models to Parade

Live models will parade across the stage one at a time, while Miss Glanton of the clothing and textiles department will engage in a running commentary on the shoes, dress, style of hair dressing, and the general hygienic and esthetic advantages of each particular style worn.

Illustrate Proper Hair Dressing

Most of the dresses will be supplied by students of the department. Correct and appropriate apparel for various occasions and places will be displayed by the models. An exhibit of the proper shoes, stockings and undergarments, from a hygienic viewpoint, will be shown in glass cases, as will also drawings illustrating the proper methods of combing and dressing the hair.

A similar conference will be held at Newton for the benefit of the high school girls of the southern part of the state, on November 19.

CO-EDS TRY FOR AQUATIC HONORS

WILL COUNT TOWARD POINTS FOR K SWEATER

Red Caps Count Twenty Five Points and Blue Caps Fifty

"Every girl a swimmer, every swimmer a life saver" has become the favorite motto of many an Aggie coed. All of which is due to the fact that the girls are trying to earn a red or blue cap in swimming, thus gaining 25 or 50 points respectively toward a K sweater.

The swimming requirements for a red cap are to swim two lengths of the tank using the same stroke the entire distance, and to swim two lengths of the pool using any other stroke for the entire distance. The diving requirements are a plain front dive and either a roly-poly or a kneeling dive.

To win a blue cap the coed must pass in good form any four of the following strokes: side stroke, breast stroke, back stroke, crawl, or trudgion, and pass three required dives and two optional ones in good form. The required dives are running front, back dive, and side dive, and the optional ones are the mercury, swallow, jack knife, sailor, handstand, hand spring, forward roll, and spread eagle.

The swimming pool is open to any girl in the college eighth hour Tuesdays and Thursdays.

China Sends Delegate

Phillip H. Young attended the International Dairy and Farm show and Child Welfare exposition which was held in Chicago from October 7 to 16. Mr. Young went as China's delegate.

Miss Ila Knight returned Sunday from a visit with her parents in Jamestown.

Extempo Classes Popular

There are over 300 enrolled in extemporaneous speaking classes, according to Dr. J. G. Emerson, head of the department of public speaking. A majority of those taking extemporaneous speaking are from the freshman and sophomore classes in the engineering department. The extremely large enrollment in extemporaneous speaking makes it impossible for the department to offer any other course this semester.

TEST FRESHIES' MENTAL ABILITY

RESULTS NOW BEING SCORED BY PSYCHOLOGY CLASSES

Scores To Be Given Out Soon—Some Colleges Use Tests in Place of Entrance Examinations

Are you brighter than high school graduates in other colleges over the United States? Are you above or below average intelligence? Has the home economics division brighter students than those in general science, agriculture, or engineering? These are a few of the questions that the psychology tests which were given last week by the department of education will answer for the freshmen.

On Tuesday, Friday and Saturday of last week all freshman students except those in the division of engineering were given the Thorndike intelligence tests for high school graduates.

"Though more than 100 students failed to appear for the tests and some took them as a joke," says Prof. J. C. Peterson, "the fact that Columbia will allow the tests to be used as a substitute for the regular entrance examination and students who make a high score in the test are admitted though they lack a number of high school credits shows the importance that big schools attach to the tests."

The Thurston engineering tests which were given on Friday and Saturday of last week to approximately 500 freshman engineers have been given by 100 colleges over the United States to 33,000 freshmen for the purpose of testing out the qualities most necessary to success in engineering.

The tests were given by Professor Peterson, Prof. O. H. Burns, Prof. V. L. Strickland, Prof. P. P. Brainard, and Prof. W. H. Andrews. They are now being scored by members of the department of education and students in advanced psychology classes. In two or three weeks the score will be ready to be given out to the students.

Present Medal

At the meeting of the Quill club last week the Searson medal, which is awarded to the winner of the Quill club short story contest, was presented to Milton Eisenhower, winner of last year's contest. The medal won by H. A. Moore, the year before, which was never presented due to war conditions has also arrived and will be sent to Mr. Moore, who is now out of school.

SONS OF MASONS MEET TO FORM ORDER OF DE MOLAY

Members of the DeMolay of Kansas City Explain the Purpose of the Organization

The sons of Masons held a meeting Wednesday night to organize an order of DeMolay. About 35 young men between the ages of 16 and 21 attended the meeting held in the Nichols gymnasium.

Dr. N. L. Roberts was in charge and R. H. Peters was elected temporary chairman. Z. R. Hook and members of the De Molay at Kansas City explained the organization. Degrees of the Order will be conferred upon the applicants at the Scottish Rite consistory of the Valley of Lawrence as soon as possible.

R. J. BARNETT TO TAKE MIKE AHEARN'S OLD JOB

Barnett Graduated from K. S. A. C. in 1895—Has Been at Washington State College

R. J. Barnett, associate professor of pomology at Washington State college, is to take the place in the horticulture department vacated by the appointment of Professor Ahearn as director of K. S. A. C. athletics. Professor Barnett was graduated from this college with the class of 1895. He was an instructor in this college from the year 1906 to 1911. He was awarded his M. S. from K. S. A. C. in 1911.

Good Night Lady When the Editor Makes a Mistake.

Everybody makes mistakes and a great many folks get by with their errors quite famously. But to a few of us who were not born with silver spoons in our mouths, nor with the new moon over our left shoulder there is a reckoning for every mistake. Anybody who hopes to relieve Arthur Brisbane or any other of the big leaguers in the newspaper game will agree with what Association Monthly says about "Mistakes." Here are a few of the things which are given for fact:

"When a plumber makes a mistake he charges twice for it.
"When a lawyer makes a mistake it is just what he wanted, because he has a chance to try the case all over again.
"When a carpenter makes a mistake it's just what he expected.
"When a doctor makes a mistake he buries it.
"When a judge makes a mistake it becomes a law of the land.
"When a preacher makes a mistake nobody knows the difference.
"When an electrician makes a mistake he blames it on the induction; nobody knows what that means.
"But when an editor makes a mistake—good night!"

SHOOTING TO BE COLLEGE SPORT

FORTY MEN HAVE ORGANIZED K. S. A. C. RIFLE TEAM

Longwell Is President—Target Practice Begins This Week—To Meet Other Colleges

That shooting is to be one of the college sports this year was decided by the forty men who met Friday evening at the barracks to reorganize the K. S. A. C. Rifle club.

The club has enough ammunition for both the indoor and the outdoor range, according to Floyd Longwell, the newly elected president of the club. Other officers of the club are secretary and treasurer, P. Steiger; and marshal, W. P. McMahon.

It was decided in the first meeting that target practice should begin this week. Later in the year rifle teams to compete with other colleges are to be picked.

The rifle club will hold regular meetings the first and third Tuesday of each month. Any rifleman who is interested is urged to become a member of the club and start practice immediately.

STUDENTS GET VOICE IN Y. W.

EACH SCHOOL IN CONFERENCE HAS REPRESENTATIVE

Miss Marian Muse Is K. S. A. C.'s Representative—Conference Schools Have Four Field Representatives

Since the Cleveland convention of the Y. W. C. A. last April, the student associations are being given more voice in the national and field work. This past summer each student association chose a delegate to represent it at the summer conference held at Estes park. These representatives are called "under-graduate representatives. Meetings were held each day during the conference and policies were discussed for field and national work. Miss Marian Muse is "undergraduate representative" for this association.

There are four states in this field, Kansas, Utah, Colorado, and Wyoming and there are 22 colleges represented. The representatives from these colleges elected four girls who are to represent them as undergraduate field representatives. One girl is chosen to represent the normal schools, one the large denominational schools, one the small denominational schools, and one the state universities, agricultural colleges, and all state schools. Miss Leona Bomgartner from the University of Kansas was elected to represent the agricultural colleges and universities.

These four girls go to Denver twice a year to attend the field committee meeting. They then report to each student association.

Nice Little Surprise

M. W. Furr, of the civil engineering department, received quite a surprise a short time ago in the way of three \$50 checks. Mr. Furr spent the summer as assistant division engineer for the Wabash railroad at Springfield, Ill., and the checks were allowed as a bonus for satisfactory service.

HARDING HAS LEAD IN THE STRAW VOTE

ELECTED OVER COX BY 237 VOTES

ALLEN IS WINNER OVER DAVIS

Total of 1,241 Votes Cast—Aggies Do Not Vote Straight Ticket—Some Try to Stuff Ballot Box

Senator Harding led the Aggie straw vote last week by polling 624 votes to the 387 received by Governor Cox. Allen won over Davis in the gubernatorial contest by a vote of 598 to 164. A total of 1,241 votes was cast. Many persons voted for either president or governor but did not vote for both.

Tried to Stuff Box

Two persons tried to stuff the ballot box but they were rather careless in their attempts for they neglected to use different kinds of paper, or to change their handwriting. One person cast a total of 19 votes and another cast 16. These, of course, reached the waste basket without being counted.

One for Knostman

Many odd things were discovered in the straw vote. Bill Knostman, president elect of the Student Self Governing association, received one vote for president of the United States. One other cast a vote for state janitor, but it is best not to mention the man's name. Another voted for both Harding and Cox. He didn't want to be partial.

It was proved in the straw vote that Aggies do not vote a straight ticket but scratch the ballot every time they feel so inclined. Many who voted for Cox for president, voted for Allen on the governor's ticket. Others who picked Harding for president, voted for Davis for governor. An artist, who believed in making a picture of it so that it would be understood, drew a cartoon of Harding and of Allen and wrote at the bottom "My choice."

Since political interest has been stirred up at K. S. A. C. Many students are wearing either a Harding and Coolidge button or a Cox and Roosevelt badge.

IL TROVATORE IS WELL ATTENDED BY STUDENTS

Opera Is Sung in Original Italian—Miss Castelli Causes Much Favorable Comment

Judging from the crowd at Il Trovatore, the opera given by the Sonora Grand Opera company at the Marshall theater last Tuesday evening, the students of K. S. A. C. are truly lovers of good music. The opera was sung in the original Italian and was rendered in a much better manner than the average opera of road companies.

The chorus was unusually well balanced for an opera of that class. The two leading parts, Manrico and Avcena were taken by Alfredo Graziani, tenor, and Speria Castel, contralto. Miss Castel caused much favorable comment not only because of her voice but also because of her able acting. Those in position to know say that Miss Castel's acting was equally as good as her singing. Mr. Graziani with his strong clear tenor drew much applause.

The part of Ferrando was sung by Francisco Cruz, a bass who has a wonderful voice but as he had a minor part the audience had little opportunity to hear him. The part of Leonora taken by Beatrice Pizzorni was especially well acted. The opera was given complete, and was a treat for the many students and townspeople who attended.

Miss Mary Ellen Henderson spent the week end in Winfield.

- 1920 Football
- October 2, Hays Normal, 0; K. S. A. C., 14.
- October 9, Camp Funston, 0; K. S. A. C., 55.
- October 16, Emporia Normal, 7; K. S. A. C., 7.
- October 30, K. U. at Manhattan.

- November 13, Iowa Aggies at Manhattan. (Homecoming game.)
- November 20, Oklahoma university at Norman, Okla.
- November 25, Washburn at Topeka.

Pictures of Instructors Out

The 28,000 men and women who are rising to success by means of the efficient work of the home study service may now visualize their instructors, even though they may be deprived of the privilege of seeing them in person. The department has just issued a booklet with cuts of each of the eight members of its personnel, and short paragraphs giving the record of each.

PLAN WORK OF Y. M. EXTENSION

NEW DEPARTMENT WILL VISIT HIGH SCHOOL

Plan of Visits Is to Boost Colleges in General and K. S. A. C. in Particular

The extension service of the Y. M. C. A., a department which has come into existence this year, is now working out plans whereby all of the high schools of the state which are in a radius of a hundred miles of Manhattan will be visited by representative men of the college. The visits have the double purpose of creating a desire on the part of high school people to attend college and boosting for K. S. A. C.

The plan is to have a representative from each of the college divisions and from such of the departments as wish and to send representatives, together with a male quartet and other available entertainers, to visit high schools. An entire chapel program will be put on for the students.

In carrying out this extension service the Y is asking the cooperation of the home service department, the Alumni association under the leadership of Cliff Stratton, and the divisional and departmental organizations of the college. C. C. McPherson is chairman of the extension service committee on the Y. cabinet.

PLAN HALLS OF RESIDENCE HERE

WOMEN'S CLUBS BACK OF CAMPAIGN

Dean Van Zile to Present Plans Before Fifth District Meeting at Clay Center October 26

A legislative campaign is now being made for the purpose of securing Halls of Residence for K. S. A. C. and K. U. After a recent meeting of the state committee on the Halls of Residence, at which Governor Allen and the board of administration were present, Dean Mary Pierce Van Zile, who attended the meeting said: "Because of the crowded condition at the beginning of college it was necessary to take immediate action and I believe the campaign will be a success as the women's clubs are actively supporting the campaign."

On October 26 Dean Van Zile will speak at Clay Center before the meeting of the fifth district convention there. Plans for the Halls of Residence are being presented before the women's clubs all over the state by the Deans of Women at the colleges concerned in the movement.

MEW EQUIPMENT INSTALLED IN LABS FOR USE OF VETS

Laboratory Super-Centrifuge, Costing \$160 to Be Used to Clarify Vaccines

One of the most interesting new additions to the equipment of the veterinary division is a Sharples laboratory super-centrifuge, costing about \$160.

The veterinary division is using it to throw the vaccines. The centrifuge is operated by either steam or electricity. The media or vaccine is put into a hollow cylinder which makes about 40,000 revolutions per minute. This throws out about 98 per cent of the organisms and clarifies anything heavier than a liquid such as certain chemicals or salts.

O. W. Hunter associate professor of bacteriology, is trying to use it in making food out of waste products. The organisms build protein out of waste product. By use of this centrifuge the organisms are expelled and the protein left.

Honorary Elects Officers

Phi Kappa Phi has elected the following officers for the year: president, Dr. William M. Jardine; vice president, Dean Helen B. Thompson; secretary, Miss Grace Derby; sergeant at arms, Dean R. A. Seaton.

NORMALS AND AGGIES IN TIE SCORE 7 TO 7

STRONG NORMAL TEAM UPSETS THE DOPE

AGGIES PLAY A RAGGED GAME

Intercepted Pass Goes to Normal Touchdown—Evans Makes Aggie Tally by Clever Broken Field Run

The unexpected happened Saturday on Ahearn field. The teachers from Emporia played the Aggies to a close-fought tie game instead of being buried under an avalanche of touchdowns as the Aggie fans so confidently expected. The pedagogues scored a touchdown in the second quarter and kicked goal, and from then led the Aggies until the last quarter when Evans snagged a pass on the enemy 15 yard line and raced across the goal line for a touchdown. Dewey Huston kicked goal, tying the score, but the Aggies did not possess the necessary punch to score again and the final count showed Aggies 7, Normal 7.

Aggies Over Confident

The Aggie team played in a reversal of form over their brilliant work against Funston the week before. They were confident of an easy victory and the whirlwind attack of the rejuvenated Emporia team took them off their feet. They seemed to be panic stricken during the first half and were unable to pull together on offense or defense. Fumbles were numerous and costly, as were penalties. Plays that gained ground were abandoned for other formations that the teachers solved, throwing Aggie runners for losses. Interference was negligible on end runs. On the other hand, the Emporia eleven displayed a dashing attack and fought like tigers on the defense.

Aggie Passes Fail

At that, the pedagogues were playing in luck to tie the Aggies. They gained but 109 yards from line of scrimmage, while the Wildcats battered the line or passed the ends for 263 yards. In the passing game the Aggies tried 19, four of which were completed for a total gain of 57 yards, 12 were incomplete, and three were intercepted. The Hargliss crew tried but four passes, completing all of them and gaining 46 yards by this method.

The passing game was both the strength and the weakness of the Aggie play. An intercepted Aggie pass was turned into a touchdown by the Normal eleven, and a completed Aggie pass, Cowell to Evans went for the lone score that represented the Wildcat punch. The Normal play was marked by good generalship on the part of the Emporia helmsman. Their tactics were to keep the ball in Aggie territory by punting and to try for gains from scrimmage only when the ball was obtained within striking distance of the Aggie goal. Their chance came on an intercepted pass in the second quarter, and he said that they made the most of it. Dillon, left half for the visitors carried the leather across on the second down after tearing off 30 yards through a broken field on the previous play.

Normal Punter Good

The Normal punter, Stewart, who played left end on the offense and right halfback on the defense held Dewey Huston practically even on punts. His game was to kick out of bounds for about 40 yards each time. Dewey was trying to play the same strategy, but his sights were not so accurate as those of the Hargliss kicker, and the oval often went out of bounds too soon. On kicks that landed inside the side lines Heinie Hinds did yeoman work running back, in the last quarter. In the first three quarters Axline fumbled the majority of the enemy punts—those that he did not misjudge. The Swede could not seem to strike his stride.

Emporia's Left Through Line

Time after time enemy tackles came through the line standing up and threw Aggie backs before they could reach the line of scrimmage. Captain Van Fleet who was coaching the team Saturday tried many combinations in the backfield, hoping to turn the Aggies' luck, but only one substitution was made in the line. The ends on the Wildcat crew were replaced twice, but it must be admitted that they were slower than the wing men on the Hargliss eleven.

The honors of the game must be accorded to Stewart, Normal left end, the punter for the teachers, and (Concluded on page six)

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Make the "Beat K. U." slogan a reality.
4. Aggies at the top of conference athletics by 1922.
5. Clean politics.
6. Greater cooperation between alumni, students, and faculty in bringing athletes to K. S. A. C.
7. Remodeling of the auditorium stage.

NEW WORK PLANNED

The extension service proposed by the Y. M. C. A. is a step in the right direction. It is a comprehensive plan for the education of the young people of the state as to the value of a college education, and a better plan for the boosting of the college which we are attending. It is to be carried out by bringing before the high schools of the state the accomplishments of the school by men who are themselves typical of the best in college activities.

It has been found that high school students in making their choice of schools are nearly always influenced by coming in personal contact with college students themselves. The personal influence is of vital importance, not only in making the choice of a school but in making the big decision of attending college. The extension service aims to unite the students in making a concerted effort in the boosting of K. S. A. C. and in the building up of a greater institution for the future years.

In doing this work the Y. M. C. A. has chosen wisely to ask cooperation of the home study service, the alumni association, and the various divisional organizations of the college. As an agricultural college K. S. A. C. has a national reputation that is enviable, but the people of the state do not appreciate the width of the field covered in home economics, general science, engineering, architecture, music, and journalism. It should be the students' duty as loyal Aggies to let the advantages of our institution be known to the prospective college students of the state.

FOOTBALL AND WOMEN

Football is a good deal like the eternal woman: You never can tell what she is going to do the next moment, much less the next week. We walked out on Ahearn field Saturday expecting to walk back and forth for, say four touchdowns—yes, four would be about enough to keep the team from getting all puffed up about it. And, lo, what happened? Your most temperamental coed never sprung a bigger surprise than Bill Hargiss's Teachers, with their funny little League of Nation's signals and a fight that had purpose.

But out of this simile of the eternal woman and football there comes a heap of comfort for the Aggies. If the team can change so much in the week between the Funston and Emporia games, is there not a good chance of a still bigger change in the two weeks between Emporia and K. U.? Knowing something of the fickleness of women and football we offer this thought.

Do you recall what happened between the Ames and Oklahoma games last year? It was as if there had been two totally different teams playing as the Aggies in those two games.

Sure, we played a discreditable game last Saturday. But there's going to be plenty of chance to atone for that. K. U. offers the first, and likeliest, opportunity.

WHEN BOOKS SEEM DEAD

These are the days when the woods and the open fields call to the outdoor man with an irresistible appeal. To those of us who received our preliminary training in life on the handle of the hoe and pitchfork, the invitation of nature to hunt with dog and gun, carries a particular appeal. It is but an echo of our kid days on the farm, which come back to us as we sit in the classrooms these October afternoons. There comes to us a vision of the woods of our recent boyhood, with their mystery and wildness, with the frost bitten autumn leaves falling like a shower of multi-colored confetti, of the corn shocks and the hedges and the weed-grown divisions of the fields with their wonderful wild game possibilities.

Then did we stalk the mallard and the teal, ruthlessly and effectively trail the cotton-tail and the gray squirrel, armed with an old 12-gauge or a 'single shot 22', without thoughts of license or closed seasons or credits. Those were the days of real sport on the farm.

A considerable number of the Aggie boys are reverting to type these days, and, forgetting for a day or a half-day the higher learning, they are taking the long tramp up and down the Kaw and through adjacent woods and fields. Which only serves to show that the average K. S. A. C. man is still mostly boy.

SOCIETY

Theta Sigma Phi held initiation Thursday evening for Miss Elizabeth Dickens and Miss Orille Bourassa at the home of Miss Clementine Paddelford, 1017 Poyntz avenue. After the initiation a short business meeting was held, after which refreshments were served.

Kappa Kappa Gamma has pledged Miss Miriam Glass of Fayetteville, Ark.

Iota Psi held open house for Alpha Theta Chi fraternity from 7 to 8 o'clock, October 12.

Iota Psi entertained with an at home for their chaperone, Miss Bernice Fuller, of the English department, from 4:30 to 6 o'clock Tuesday afternoon.

Iota Psi have pledged Miss Bernice Fuller, instructor in the English department, Miss Grace Hesse at the department of foreign languages, and Mrs. C. W. McCampbell.

Pi Beta Phi held open house Thursday night from 7 to 8 for the Delta Tau fraternity.

Kappa Sigma held formal initiation services last Tuesday night for Mr. N. E. Divebliss.

Theta Sigma Phi, women's honorary journalistic fraternity, will hold pledge service tonight for Miss Geta Lund, senior in industrial journalism; Miss Jessie Adece, junior home economics; and Miss Sue Carmody, special.

Prof. and Mrs. H. B. Winchester entertained Prof. and Mrs. E. F. Ferrin at dinner Friday evening. Professor and Mrs. Ferrin left the latter part of the week for the University of Minnesota, where Professor Ferrin has accepted the position of professor in the swine department.

Delta Delta Delta entertained with

a six course Japanese dinner party, Wednesday evening, October 13, in honor of their house mother, Mrs. Ricker. The guests were the house mothers of the various fraternities and sororities.

Miss Mary C. Strite, '05, and Mr. Harvey A. Burt, '05, were married at Kanopolis August 25. Miss Strite since graduation has been a teacher in the public schools and for the past 10 years in the city schools of Spokane, Wash. Mr. Burt has followed the electrical profession and at present is local superintendent for the Colorado Power company at Boulder, Col.

The Browning and Athenian literary societies chaperoned by Prof. and Mrs. R. R. Price and Prof. and Mrs. W. E. Grimes took their annual fall hike to Wildcat Saturday evening. The societies met at the gymnasium immediately after the foot ball game and started for the hiking grounds about 6 o'clock. The outstanding feature of the hike was the good eats. After the supper a program was given, which consisted of pantomime, "The Courtship of Miles Standish."

Mr. and Mrs. Myron S. Collins entertained Tuesday evening for the Delta Tau Delta fraternity. Other guests were Mrs. Birdsall, the alumni members of this vicinity and their wives, several faculty members and their wives, and President and Mrs. W. M. Jardine. Mr. and Mrs. Cliff Stratton were special guests. Mrs. Collins was assisted by Mrs. C. W. Mullen of Oklahoma City, Miss Gladys Filippo, Miss Carol Knostman, and Miss Florence Banker.

Mr. and Mrs. W. E. Grimes entertained for the seniors and pledges of the Alpha Delta Pi sorority and their house mother, Mrs. Dodd, October 7. A two course dinner was served by Mrs. Grimes at her home 1821 Leavenworth. The house was attractively decorated with bowls of late garden flowers.

Freshmen of the Pi Kappa Alpha fraternity entertained the senior members on Friday night with the annual corn jigger dance.

The Dorcas class of the Presbyterian church entertained all Presbyterian college girls Tuesday, from 4 until 6 o'clock at the home economics rest room. The members of the social committee were hostesses. The purpose of the party was to help the Presbyterian girls get better acquainted with one another. A number of faculty and town women were guests at the party.

The 28 Aggie girls who attended the Y. W. C. A. conference at Estes park this summer had a picnic supper in the city park Thursday evening from 5 until 8 o'clock. This was the first time the girls have all been together since they returned home. They met to make plans for the Vesper service which they will have charge of next week.

Mrs. David Bice entertained Monday evening, October 11, with a dinner party at the Gillett hotel, in honor of the senior members of the Delta Zeta sorority and a number of the alumnae who are in town. A four course dinner was served to the following guests: Miss Winifred West, Miss Marian Clarke, Miss Garnet Grover, Miss Gertrude Ramsey, Miss Mary Polson, Miss Pauline Clarke, Miss Izil Polson, and Miss Opha Babb.

Sigma Phi Delta has pledged C. L. Waller of Horton, freshman in animal husbandry.

Pi Kappa Alpha have pledged Mr. Clyde Simmons of Abilene, who is a special student in general science.

Alpha Delta Pi held open house for the Sigma Alpha Epsilon fraternity Thursday evening, from 6:30 to 8:00 o'clock.

W. E. Grimes and R. M. Green, both of the department of agricultural economics, spent Thursday at Topeka where they attended a special meeting of the state board of agriculture. The meeting took up the problem of marketing. Herbert Hoover, former United States food administrator was the principal speaker.

Wanted: Student pressfeeder at Mercury office. 1t.

For Sale: Suburban tract five acres, 4 room house, \$1,800. Kittell Realty company. 10-3.

COUNTY CLUBS BOOST K. S. A. C.

KEEP STUDENTS IN TOUCH WITH HOME

Old Students Take an Active Interest in Freshmen

Students from Cloud, Washington, and other counties who are organizing county clubs in college are on the right track, according to Cliff Stratton, '11, general secretary of the alumni association.

"One of the most serious mistakes any student can make," says Mr. Stratton, "is to break loose from home ties and home interests just because he is in college. Many do this unconsciously, but a large number of them live in an entirely separate world for the three or four years they are in school."

"It would be a good thing for the students, for a home community, and for a college itself, if every student belonged to a home county organization, and kept in touch with the other folks from his own community. In my time I know that there were students quitting college every year, a large number between terms, who might have finished their course if 'some one from home' had stepped in with an encouraging word at the right moment. The seniors and juniors should make a point of learning who are the freshmen from their counties, and see that they get started right and keep going right."

"Of course, for every senior and junior to look up every freshman from his county would be a waste of time. But with a county organization, the newcomers could be divided among the older students, and taken care of easily."

Another good thing for the county organization to do, Stratton says, would be to see that some one person or some committee takes care of the newspapers back home.

"Let the home folks know what their children and their neighbors' children are doing at K. S. A. C.," Stratton urges. "Send a weekly newsletter to the home paper, telling about as many students from that community as possible; just little personal items generally. The editor will be glad to print them. Your folks will be glad to see you mentioned. All the neighbors will sit up and take notice. The neighbors' kids will get in the habit of thinking about K. S. A. C., also, and that wouldn't be a bad thing."

Return From Annual Trip

Prof. and Mrs. J. D. Walters have returned from their six weeks' annual trip to Champaign and Urbana, Ill., where they visited their daughter, the wife of Dr. A. Emch of the mathematics department of the University of Illinois. They made the trip overland in their car. While at Urbana Dr. Walters had an enjoyable visit at the university chapter of the Beta Theta Pi fraternity.

Miss Mildred Wright and Miss Helen Smith spent the week end at Miss Smith's home in Salina.

Literature Students Study Ibsen

Professor Conover's class in current literature has finished an interesting study of Ibsen's plays. Professor Conover, who has made a special study of Ibsen, presents the work in a most interesting manner. Professor Conover will be remembered for his lectures on Ibsen before the plays were given by Madame Hammer's company last year.

HUBERT BECKWITH COMES TO FILL FACULTY VACANCY

To Take Place of E. W. Markle of Electrical Engineering Department

Hubert Beckwith, a graduate of the Georgia Institute of Technology, has been employed in the electrical engineering department to fill the vacancy made by the resignation of E. W. Markle, instructor in electrical engineering.

Mr. Beckwith took the student engineer's course, after his graduation, with the Westinghouse Manufacturing company, and after finishing this course he had 15 months' experience in the testing department of this company. He has had further experience with the Atlantic Steel company and was in charge of electrical work in other manufacturing plants of the south.

During the war Mr. Beckwith did special work developing anti-submarine devices, and was given the commission of ensign in the navy.

MISS RUTH PECK ELECTED JUNIOR CLASS PRESIDENT

Bill Martin Is Vice President and Marian Brookover Is Secretary

Miss Ruth J. Peck of the department of general science has been chosen as junior class president for this year. The other officers who were elected at a recent meeting of the junior class are as follows: Bill Martin, vice president; Marian Brookover, secretary; Louise Mangelsdorf and James McKittrick, S. S. G. A. representatives; Rowena Turner, social chairman.

ANNABEL GARVEY ATTENDS STATE MEETING OF CLUBS

Gives Talk on London Convention of W. C. T. U.

Annabel Garvey, a member of the English faculty, has returned from Atchison where she was one of the speakers at the meeting of the First District Federation of Women's clubs.

Miss Garvey, who was a member of the G. F. W. C. Overseas' unit, had as her subject at the meeting different phases of the London convention of the W. T. C. U. to which she was the delegate for this state.

R. D. Nichols, '20, has been stationed permanently at McPherson where he is engaged in cost of production work being conducted in connection with the department of agricultural economics of the college.

ALL GIRLS MAY TRY FOR CLASS ATHLETIC TEAMS

Fifty Freshmen Have Signed Up for Hockey—Practice at Five O'clock

Any of the 500 freshmen and sophomore girls taking gymnasium work, or any upper classmen who cares to, may try out for the hockey, basket ball, and tennis teams. Already 50 freshman girls have signed up for hockey. First teams will be picked from the best players at the different practice games which have been scheduled as follows: juniors and seniors, Tuesday; sophomores, Wednesday; and freshmen, Friday. All practices are held at 5 o'clock.

A color tournament in hockey similar to the one in basket ball last year is to be scheduled soon.

An unusually large number have signed up for tennis and swimming, but so far no contests have been planned.

Contrary to the rumor that has been circulated, K sweaters will be awarded to all coeds who make the required number of points in athletics.

FRED HEWITT FOX IS NEW ENGINEERING INSTRUCTOR

Has Several Years' Experience—Studied at Sorbonne While in Paris

Fred Hewitt Fox of Chattanooga, Tenn., graduate engineer of Ohio State university, has been selected to fill the position of instructor in the department of civil engineering.

Mr. Fox has had several years' engineering experience including topographical surveying, railroad, and highway engineering, and concrete construction. He served as lieutenant in an engineering unit for two and a half years. While in France he assisted in reconstruction work and took post graduate work at the Sorbonne, Paris.

CONFECTIONERY PARLOR

Service

Say students, don't you know that you can get real service at the PINES CONFECTIONERY?

The Plan

The tables will be numbered from 1 to 50. Pencil and menu cards will be placed on the tables. Kindly select what you want and write it on the order blank. Mark the number of your table on it and deliver the order to fountain dispenser.

Result will be service.

L.C. SHAFER, Prop.

To Store Coal Under Water

A reinforced concrete coal storage pit is being constructed west of the power boiler room. This pit will make it possible to store a large amount of coal under water, thus getting rid of danger of spontaneous combustion which has frequently caused considerable loss from fire.

Miss Ella Wilson spent the week end in Wichita.

Two On One

Monday morning young Mr. Soldier gets up and goes down town to mail a letter. On the road back he glances down and notices he has on only one legging so he hurries home to look for the other. He arrives at his room and is unable to find it high or low, finally discovering he has them both wrapped on one leg.

Miss Elizabeth Hinchey spent the week end at her home in Salina.

Study By New Plan

The world fellowship committee of the Y. W. C. A. has adopted a new plan in promoting interest in world problems among the girls of the local association. They will use the reading circle method and expect to add to the association library a number of the best books on women's problems in different lands.

Miss Alice Rice spent the week end at her home in Topeka.

Society Brand Clothes

FOR YOUNG MEN AND MEN WHO STAY YOUNG

Marked Style Changes in Men's Clothes for Fall

Style changes for Fall as correctly interpreted by Society Brand Clothes will be heartily welcomed by undergraduates who pay particular heed to their appearance.

The long vent in the coat has gone. Vents in modish suits this Fall will be noticeably shorter.

Body contours have changed. The high waist line and the pinched-in effect have gone.

Coats hang with greater fullness from the shoulder. The result is a pleasing effect of unusual ease and smartness.

These are the distinctive style features that mark this season's models in Society Brand Clothes.

WITH THE VARIED GRADES OF CLOTHING FLOODING THE MARKET, LOOK FOR THE LABEL AS YOUR GUIDE

FARMERS AID IN FINDING PLANTS

NEW COLLECTION BEING MADE BY COLLEGE

Ask Farmers To Send in Rare or Doubtful Plants for Identification

A complete collection of the various species of plant life is now being made by the botany department.

Up to date more than 16 hundred varieties of plants from the forests of Michigan have been received by the department. The Ackenberry collection has recently been enlarged by receiving a few species of plants from the donor. Complimentary to these sources, the department has been receiving daily shipments of rare plants for identification. The research division welcomes these shipments as they are anxious to use the plants for analytical and educational purposes.

At present, F. C. Gates, assistant professor of the department, is making a county collection of the various plants prevalent in the state. He is appealing to the farmers of the different counties to send in all rare or doubtful plants rather than merely to send in a report of the prevalence of the plant in question.

L. E. CALL WILL ATTEND ALMA MATER ANNIVERSARY

Will Also Attend Meetings of American Society of Agronomy at Springfield, Mass.

L. E. Call, professor of agronomy, left Thursday for the Ohio State university at Columbus where he will attend the semi-centennial of his alma mater. While there he will see the game between Purdue and Ohio State.

From there he expects to go to Springfield, Mass., where he will attend a meeting of the American Society of Agronomy. Professor Call is a member of some of the important committees and will read before the society a paper entitled "Prerequisites for Farm Crops." He expects to return to Manhattan October 25.

R. M. GREEN AND M. EVANS ARE NOW ON AG FACULTY

Evans Graduated Here Last Spring—Green Comes from Missouri University

Two additions have been made to the faculty division of agriculture. R. M. Green, who comes from the University of Missouri where he was graduated in 1914, has been made associate professor of agricultural economics and now has charge of the marketing work of that department. While working at the university after his graduation, Professor Green wrote a number of bulletins and circulars dealing with economic subjects which were issued by the agricultural experiment station there.

Morris Evans, who received his degree of bachelor of science in agriculture at K. S. A. C. last year, has been appointed instructor in agricultural economics and will aid in the teaching of farm management, farm cost accounting, and assist in the farm organization and cost of production studies of the experiment station.

A. M. Paterson, associate professor of animal husbandry has sold the college Hampshire ram, which took first place in his class at the Kansas Free fair and at the Hutchinson state fair. The ram was sold for \$225.

The names of more than 50 K. S. A. C. alumni from Texas, Oklahoma, and Kansas were registered at the college alumni booth at the Wichita Wheat show.

Should Make Application Now
Ex-service men who desire to make application for the Victory Medal may do so at the office of Doctor Holtz or of O. W. Price, at the office of the Federal board. Those who have not yet made application should do so as soon as possible as it is the desire of the American Legion to have all the medals issued by Armistice day.

"You and Me Benches" Are Again Popular These Fine Evenings

"Have your date to yourself." This sounds like an advertisement. Instead, it is the Aggie man's slogan, which he wishes to pass to the masculine ears of the Aggie students.

No, the students need not ask where. Calmly are they taken by the arm, and, willingly led, they ascend the old stone steps, pass through the wide hall, turn to the right and there before them is the reading room of the K. S. A. C. library.

They pause, look about bewildered, then with a knowing wink and happy smile, they swing on their heels and start off toward home.

Telephone lines are soon busy. Mary, Kate, Nancy, and Jane, trip down the various wanderings of each particular staircase in answer to the ting-a-lings.

Then as the sly old moon pokes his head over the high Prospect ridge, red cheeked dietitians-to-be meet would-be South American explorers; together they follow lines of cement which lead to the house of letters. They ascend the library steps, pass through the wide old hall, enter the reading room, each group of two wearing the expression of discoverers.

They line out for those double seated "You and Me" benches; which, with their high front partitions, side stops, and elevated shoulder rests, shut off the world without, and leave "they two" to peruse the lengthy explanations on foods and slopes, in the gentle seclusion of the chummy seat.

Miss Hammerly Forum President
Forum, honorary debate society, at its first meeting elected the following officers: president, Marguerite Hammerly; vice president, W. F. Rolfe; secretary, Luella Sherman; treasurer, Grace Turner; marshal, H. E. Mather.

F. S. Hagy, '18, formerly connected with the Extension Division at K. S. A. C., is county agent of Hardin county, Ohio. Hagy is furnishing the Hardin county farmers with a series of A. H. bulletins.

TO AID MEN IN SECURING FARMS

JARDINE DISCUSSES PLAN FOR CHECKING EVILS OF TENANCY

Support of Farm Home Amendment Will Enable Kansas to Carry Out Similar Project

Dr. W. M. Jardine, president of the college, gave a comprehensive discussion of the California land settlement plan before the members and visitors of the Science club, last week.

The president who spent some time last summer in an exhaustive study and investigation of the California plan for checking the evils of tenancy, and assisting of worthy citizens in securing farm homes, gave the plan his full approval. The system has proved a practical working success.

A tract of 5,000 acres was purchased by the state and divided into smaller units of from two to 40 acres and sold to worthy citizens on long time payments, carrying a very low rate of interest. The land was charted and laid out by soil experts and valued according to the character and productive ability of the land.

President Jardine declared that if the farm homes amendment is supported this fall it will enable Kansas to carry out a project somewhat similar in providing farm homes for deserving tenants who wish to acquire homes of their own.

Choose Freshman Commission

The Freshman commission of the Y. W. C. A. will be chosen in a few weeks. The girls for this commission will be selected largely on faculty recommendation, and will be judged by their scholastic standing, their ability to lead, and their interest and enthusiasm in Y. W. work.

Miss Gladys Newton spent the week end at her home in Kansas City, Mo.

Things we think things others think and things we think of things others think.

Dear Editor:—The sight of the college faculty at the "mixer" in Nichols gymnasium, President Jardine, two deans, and 27 professors, associate professors, instructors, assistants, clerks, stenographers, and a janitor—must have been an inspiration to all freshmen.

I never realized before what inroads commercial life and other institutions had made on our faculty until I went to the mixer. When I realized that of all the splendid men and women who comprise our corps of instructors, only 30 were left with the institution, I really began to worry about the college and its future.—An Alumnus.

Dear Editor:—"Oh Gee! I said 'hello' to that prof."

How many times a day do you hear someone say that. And really it is a strain as you are tearing from class to class trying to resurrect the knowledge you absorbed in that 15 minutes before you went to sleep to have to put this mental question to yourself, "Is he a prof. that I must say 'how do you do' or is he just one of the kids that I can say 'hello' to?"

It seems rather silly doesn't it? If the profs at K. S. A. C. wore gowns and stood on their dignity it would seem out of place. But here where our ideal is as far as possible comradeship and good fellowship between student and teacher, why the formality?

Maybe we are wrong and perhaps we haven't proper respect for those "older and wiser than we"—but anyhow we'd like to know how the professors feel about it.—Lizzy D.

Dear Editor:—I have these many days, secretly nurtured within my heart, a grievous complaint, until it has now outgrown my reticence, and I feel that I must tell it to some more or less sympathetic soul.

This deep seated grudge of mine, is directed chiefly against this disturbing fair sex of K. S. A. C. Girls seem to be the most flagrant and most persistent violators of pedestrian traffic rules in Anderson hall. A small nucleus of representatives of the talkative sex, formed to discuss last summer's vacation or some other equally pressing subject, soon draws coeds as sugar attracts

flies, and within a few minutes, there is a solid formation of animated femininity, leaving no chance for a mere man above the bantam weight class to wiggle through. Even the flying en masse attacks of the varsity squads, would be powerless against these close formations.

The writer has thought of a few suggestions for relieving the congestion and these are respectfully submitted for the editor's approval. First, is the placing of traffic cops in the hallway to enforce these rules. Instituting a sign language, such as is used by the boards of trade, to be used in making bids for dates. The rules for the regulation of street traffic could be applied in solving the congestion problem in the hall, such as, keep to the right, no speeding or halting in direct line of traffic, hand signals before turning or before parking yourself along the wall, prohibiting groups from coming through the hall in an unbroken company front, and most important of all, no gathering of more than two men or one dozen women to be permitted to take place in the passage way between periods.

Perhaps the writer's peevishness is an isolated case, inasmuch as it was caused mostly by his missing an appointment with an exceedingly desirable young lady. But he would like to know the attitude of the other studs on this question.—Ungallant Reformer.

Dear Editor: Let's Take the Cow Out of the College. Once upon a time the division of agriculture was the largest on the hill, in fact it was about the only one. My, how times have changed.

Now there are the engineers who constitute 28 per cent of the students, according to figures from the catalog. And there are the dear girls over in the home economics hall, 574 of them, or about 18 per cent. There are 503 in the general science division. There were but 19 per cent of the students enrolled in the division of agriculture last year and yet this institution is officially and otherwise known as the Kansas State Agricultural college. How long will the college be called the Cow College? Just as long as it is known over the country as an agricultural college. The University of Kansas will continue to dominate the state as long as the state is made to believe that the State college teaches only agriculture and its associate cultures. The official name of the institution down the Kaw is Kansas State university. Why shouldn't this place be officially known as the Kansas State college?—D. B.

ANNOUNCEMENTS

The World Fellowship committee of the Y. W. C. A. will meet Thursday afternoon after Vespers.

Dr. Alexander Irvine will speak in chapel Wednesday morning at 10:15.

All girls who wish to go on a 10 mile hike for points in W. A. A. will meet at the gym Wednesday afternoon at 5 o'clock.

Purple Masque tryouts for the first college play started yesterday afternoon at 4 o'clock. Tryouts will continue to be held every day this week between the hours of 4 and 6 o'clock.

Girls who went to the Y. W. C. A. conference at Estes park this summer will have charge of Vespers which will be held in the Recreation hall Thursday afternoon at 4 o'clock.

Faculty women and the wives of faculty from New England who are interested in meeting each other are asked to meet in L40, Wednesday, October 20 at 5 o'clock.

Meeting, Wednesday evening, 7 o'clock, Webster hall, third floor west end gymnasium.

Theta Sigma Phi will hold a meeting Friday, October 22, at 4 o'clock in the afternoon in K55.

Friday night Mary P. Van Zile, dean of women, will entertain all the freshmen girls in Recreation hall. Special

guests of the evening will be the teachers of the freshmen girls. The The chairmen of Big Sister committee will assist Dean Van Zile in the entertaining and serving.

The Cloud-Mitchell County club will have a hike Friday evening, October 22. Members bring dates and meet at the fountain in the city park at 5 o'clock.

Prof. J. P. Calderwood, professor of mechanical engineering, presented a paper at the annual meeting of the Kansas, Oklahoma, and Texas engineers that was held at Dallas, Tex., October 14, 15, and 16. Professor Calderwood's paper was on the purchase of lubricating oils for Kansas institutions.

The animal husbandry depart-

ment has purchased the sheep which are to be shown at the International Stock show next December. One portion was secured from the H. W. Harvey herd near Hebrew, Utah, another lot was purchased from the Hays experiment station.

GIVE US A TRIAL

A. V. LAUNDRY

VETS MAY HAVE CLINIC BUILDING

TO ASK LEGISLATURE FOR NECESSARY FUNDS

Architectural Department Draws Up Plans for Building—Are Now in Hands of State

The Kansas legislature will be asked to provide funds for the erection of a new veterinary clinic building, which if granted will give K. S. A. C. the best building of its kind in the United States. Plans are now completed for the building which will be modern in all respects, and thoroughly sanitary.

The plans were started and drawn up by the architectural department and are now in the hands of the state. The rapid development of the division has far outgrown the facilities furnished by the present building. Members of the veterinary faculty feel that the building is needed mainly because of the poor accommodations now available. The building is not only small, but unsanitary and inadequate in all respects. Progress in a work of this kind is necessarily very slow, but from all reports the work is developing favorably.

SEE BROWN BULL HOMECOMING DAY

HUMOROUS MAGAZINE TO OFFER CASH PRIZES

Theta Sigma Phi to Help Publish First Number—Everyone Urged to Contribute

The first issue this year of the Brown Bull will be a homecoming number. It will be put out and sold at the homecoming game with Ames on November 13.

The magazine is ordinarily edited and published by Sigma Delta Chi, but Theta Sigma Phi, women's journalistic fraternity, will assist in putting out this number.

Cash prizes are to be offered to Aggie students who wish to write for the Brown Bull. One prize will be given for the best short humorous story submitted, and a cash prize will be offered for the best list of jokes that is submitted. Work should be started on this at once as all copy for the magazine must be in the hands of the printer within the next three weeks. The names of the winners will not be known until the magazine comes out. All students in the college are eligible to try for the prizes.

A third cash prize will be given for the best cartoon submitted to the Brown Bull. The cartoon may be on anything that concerns college life and, naturally, must be of humorous character. Cartoons accompanied by jokes are the most appropriate. Since the magazine is to be a homecoming number, several cartoons concerning alumni would be acceptable.

The two journalistic fraternities intend to make the homecoming issue of the Brown Bull a good one, and they must have the help of all persons who are humorously inclined.

All contributions to the magazine should be addressed to Milton S. Eisenhower, editor Brown Bull. All these contributions will be entered in the contest for the best humorous story or the best list of jokes.

VENUS PENCILS

FOR the student or prof., the superb VENUS out-rivals all for perfect pencil work. 17 black degrees and 3 copying.

American Lead Pencil Co.
220 Fifth Ave.
New York

The largest selling quality pencil in the world

All cartoons should be given or mailed to Morse Salisbury or Don Ballou. It is a good plan to see either of these men before making any drawings as they can give a number of suggestions for the kind of material wanted.

If there are any girls who want to favor Theta Sigma Phi with contributions, they should see Miss Clementine Paddleford, who is the president of that organization. Definite prizes will be announced later.

L. E. Melchers, professor of botany and plant pathology, returned last week in Doniphan county, where he has been making an examination of corn root rot.

W. E. Haney spent the week end at Lawrence.

Phone 157 when you get that bundle ready. Manhattan Steam Laundry.

Sell K. U.-Aggie Tickets

Tickets for the K. U.-Aggie football game will be on sale Wednesday, October 20. As the crowd at this game is to be one of the largest in the history of Ahearn field, it will be well for the majority of the people to get their tickets early in order to avoid the rush.

Art Exhibit Postponed

The art exhibit is not to be given this week according to Miss Araminta Holman. The pictures were to come from the Findley art galleries in Kansas City, but were delayed in transit.

Miss Florence Swenson spent the week end at her home in Kansas City.

The "K. S. A. C. Engineer" will make its appearance on October 20 as advertised. There will be two issues this semester.

Knows Weather Year Ahead

A member of the faculty of the University of Kansas claims to have discovered a new law of nature. He believes that the weather runs in 15 month cycles, coinciding with the sun spots. He claims to be able to predict the weather ahead in a general way for the year. He says he can tell whether it will be a good year for wheat, or for corn, or whether anything will grow. As a starter he says next year will be bad for wheat and only "so-so" for corn.

NORMAL AND AGGIES IN TIE SCORE; 7 TO 7

(Concluded from page one)

Dillon, left back on the Emporia eleven. Hinds played a consistent game for the Aggies, running back punts for good gains when shifted to quarter in the last period. His broken field running was the best displayed on the field.

The lineup:

Aggies	Normal
Sebring.....re	McGahan
Stauffer.....rt	Holm
Huston.....rg	Ecord
Hahn.....c	Hatcher (Capt.)
Marshall.....lg	Manly
Gatz.....lt	Neis
Randles.....le	Stewart
Axline.....qb	Kock
Yandall.....rh	Davis

NO. 12

CRIPPLED AGS TO ENTER THE OMAHA GAME

WINTER, CLELAND, AXLINE,
AND COWELL ARE OUT

CREIGHTON HAS STRONG TEAM

Strenuous Practice Sessions Featured
Past Week—Bachman Preparing
for October 30
Game

Bachman took a crippled team of Wildcat warriors to Omaha Thursday. Saturday will see the first game of the 1920 Aggie season on a foreign field. The Creighton team is probably the strongest the Aggies have yet met. They have a heavy line and a pair of fast halfbacks.

Coach Bachman is not putting out any bear stories this season, but

HUSTON

when he was questioned regarding Saturday's game on Thursday before his departure he told a hard luck tale. "Four good men will be out of the game on account of injuries Saturday," he said. "Cleland, center, Blacksmith Cowell, halfback; Axline, quarterback; and possibly Winter, halfback, will be on the sidelines."

Creighton A Strong Opponent
"We are going to meet our strong-

E. COWELL

est opponent of the early part of the season at Omaha Saturday. They have the scoring punch as is attested by their 48-0 victory over Simpson last Saturday. A pair of fast, shifty backs, and a stonewall line will confront the Aggies in the Creighton game."

The Wildcats have undergone a strenuous week of practice in the effort to rub off the rough spots that showed in the game with the Emporia normal last Saturday. Scrimmages with the scrubs from 4 o'clock till dark have been the rule during the past four days. The defense of the line has been bolstered up by the return of Schmitz, 200 pound tackle to the game. Schmitz, a rangy lad who uses his hands with telling effect on the defense, and who tears 'em up on the offense has been bothered with a bad pair of feet all season, but is in fair shape now and is plugging the gaping hole at right tackle that has been apparent since Winter went to the backfield.

Randles Is In Again

The backfield has received a grueling drill in passing and blocking. With Randles again in the game on receiving end of passes, the main problem is now to find a back who can hurl the leather to the right place at the right time. Many passes last Saturday were thrown to the

ground far out of the reach of the Aggie ends or backs who were supposed to receive them.

The Probable Line up

The lineup that will bear the Wildcat colors at the start of Saturday's game will probably be: Randles, re; Schmitz, rt; Huston, rg; Hahn, c; Marshall, lg; Gatz, lt; Sebring, le; Hinds, quarterback; Randall, rh; Evans, lh; Sears, fb.

W. COWELL

If Winter is able to play he will start at left half. The big fellow pulled a tendon in his right foot in Wednesday's practice. Hinds will start at quarterback in place of Axline who has a stiff neck.

Preparing For K. U. Game

Coach Bachman scouted the K. U. Drake game last Saturday and brought back the information that the Aggies would face a team of much better caliber than any with which they have battled so far on October 30. The backs of the University team are not fast but they are shifty. The forward wall is beefy and well trained. New plays are being experimented with by the Aggie mentor this week in the hope of solving the Kay U riddle. The practice sessions have been behind closed gates, even the usual Wednesday afternoon football seminar being dispensed with in the interest of greater secrecy.

Reserved seats for the October 30 game are now on sale at the athletic office and are going rapidly. It behooves those Aggie fans who want to seat their visitors in the choice positions to rustle over to the gym and obtain what is available.

CREAMERY MEN TO MEET HERE

SHORT COURSE WILL BEGIN
HERE NEXT WEEK

Interesting Daily Programs Planned
—Banquet to Be
Given

More than 100 men are expected to enroll in the short course to be held at K. S. A. C. October 25 to 29, for the field superintendents of the creameries in Kansas. The men will be from the creameries in the state, with a few from Missouri and Nebraska, and men from other states who buy cream in Kansas. Of the 100 expected, about 50 to 60 will be the field superintendents, and the remainder will be managers of the large creameries in this state. The meetings will be held in the dairy building.

The managers of the creameries in this state are now having a golf tournament. They will be in Abilene, Wednesday, and will motor from there to Manhattan, in time for a banquet Wednesday evening. The banquet will be given at the Christian church for all the men enrolled, for the managers, and for those on the daily programs.

One of the most noted of the speakers secured for this week is Prof. F. W. Bouska. Professor Bouska is a dairy chemist and also does research work for the American Association of Butter Manufacturers. He travels all over the United States and is very difficult to secure for such a meeting as this short course.

T. A. Borman, publicity man for the Beatrice Creamery company, Mr. Slater of the Blue Valley Creamery company, G. L. Warner, president of the Merritt-Schwier Creamery company of Great Bend, and Paul Elquist, president of the Kansas Creamery Improvement association, will speak at the meetings. Representatives from other creameries and separator companies will discuss creamery problems.

The speakers from the college will be H. M. Jones, state dairy commissioner, Prof. O. W. Hunter, Professor Maxey, Professor Gearhardt, Prof. H. B. Winchester, Prof. H. W. Cave, and Professor Crandall.

Baby Tractor Has Loud Voice But No Police Record Yet

K. S. A. C.'s baby tractor may have the loud voice of a young infant, but the police record of the tractor when it struck Wichita might well be the envy of a hardened criminal. For the tractor got called by every policeman in the city when driven down the street by its chauffeur, E. F. Stalcup, and never once was there an arrest made.

When the baby tractor, which was built at the shops of the K. S. A. C. engineering department went down to Wichita to distribute the special Collegians, and began to tune up for its usual little song, almost the whole of Wichita turned around. It seemed that way to the traffic policeman anyhow, and the baby tractor's chauffeur was requested to move on. He did, but not far. Before long he was again surrounded by a crowd, among whose number was policeman number two. The cops in Wichita didn't seem to have a bit of originality for they all told the chauffeur the same thing.

Finally after the tractor had visited the beats of all the policemen it went around to the beat of the first one again, but by that time the police had formed a coalition and the tractor was surrounded. So the little tractor beat a hasty retreat to the Wheat show grounds, thus escaping a criminal record.

TO HAVE NOVEL CHAPEL PROGRAM

J. A. LEBARGE OF CAMP FUN-
STON WILL ENTERTAIN

Wednesday's Program Includes Banjo
Numbers, Dialect Readings,
Character Changes, and
African Chant

The assembly program for next week will be held on Wednesday at the usual hour. The program will be given by J. A. LeBarge of Camp Funston. Mr. LeBarge is a musician of unusual ability and renders a program that is entertaining to all. The program is as follows:

Banjo numbers; March, Mascot by LeBarge; Traumerel by Schuman; Concert Waltz by LeBarge; Imitation of Old Darkey, LeBarge.

Dialect readings: Antonio at Base Ball; Ze Spidare and ze Fly; Dot Good for Noddings Dog.

Le-o-lin, which is a musical novelty, that has pleased thousands of soldiers and civilians at home and abroad.

African Chant: Dat Man's all Mine; Mind yo' own Bizness; Banjo song.

Characters: (Quick change) Mike Murphy; Country School Professor; Street Fiddler of Italy.

Broom Fiddle: Ragtime to Grand Opera.

Wants The Fob Returned

Some time ago an instructor laid his Ingersoll on his desk and left the room. Shortly afterward he returned and found the watch missing. He does not care much for the "common, black face, erroneous Ingersoll," as he calls it, but he does care for the fob attached. This fob is a high school medal granted for four years of scholarship, and is highly prized by its owner. He posted advertisements, but with no result. His name is clearly engraved on the back of the medal, so its owner should have no trouble in locating him.

TWENTY YEARS AGO THE COLLEGE PAPER HAD SEVEN EDITORS AND ONE REPORTER

Seven editors, three business managers, and one reporter. That was the way they stacked up on a college paper of 20 years ago. There was an editor-in-chief, a literary editor, a local editor, an exchange editor, two associate local editors, an alumni editor, a business manager and his assistant, a subscription manager, and a reporter.

The paper had a motto which was "let every one cultivate his own genius." This motto appeared in every issue directly beneath the name of the paper on the front page. The whole front page was entirely made up of news items. Some of them ran like this, "This is Lincoln's birthday," "Look out for the mid-term examination," and this one, evidently written in the spring "Dust storms are becoming much more frequent than agreeable. A 48 mile wind last Friday played all sorts of tricks with wearing apparel besides nearly blinding those who were unfortunately enough to be out in it." Evidently the editorial mind has changed but little.

In the issues for the year 1896 the paper maintains a strict non-partisan

NEW COUNCIL IS ORGANIZING YEAR'S WORK

COMMITTEE CHAIRMEN ARE NOW
APPOINTED

REPRESENTS COLLEGE GROUPS

Will Enforce Regulations of S. S. G.
A. Policy—To Have Headquarters
on the Campus—Have
Third Meeting Monday

Members of the Students' Self Governing association have now been elected by the various organizations of the school and the council committee chairmen have been chosen. With the council membership complete it is now ready to begin its second year of work in regulating social affairs, and in maintaining standards of discipline for the students.

The members of the administrative council are as follows: W. H. Knostman, president; Mike Ptacek, vice president; George Humphrey and L. E. Muse, freshmen representatives; R. C. Spratt and Frank Miller, sophomore representatives; Louise Mangelsdorf and J. A. McKitterick, junior representatives; Bly Ewalt and Ruth Willis, senior representatives; Christine Cool and S. D. Capper, literary societies; Kent Dudley, Men's Pan Hellenic; Ila Knight, Women's Pan Hellenic; Clara Evans, Women's Athletic association; H. L. Bunker, tentative representative of Men's Athletic association; Luella Morris; Y. W. C. A.; Ray Knox, Y. M. C. A.; Alvin Ritts, school of agriculture.

R. C. Spratt is the chairman of the discipline committee; Kent Dudley, of the finance committee; J. A. McKitterick, of the social affairs committee; Bly Ewalt, of the calendar committee; H. L. Bunker, of the school spirit committee; Ila Knight, of the points committee; and Christine Cool is Collegian reporter for the council.

The council has held two meetings, and will meet again next Monday. Delay in organizing the council was caused by the lateness of the freshmen election, but the committee work is now proceeding rapidly.

It is the intention of the council to bear out in fact the real meaning of a "Student Self Governing association." The policy of the association will be largely that outlined in the Y. M. - Y. W. pamphlet which was issued early in the semester.

The council will later have offices furnished on the hill, as definite headquarters from which to do business.

TO GIVE PRIZE FOR BEST TITLE

BROWN BULL WANTS NAME FOR
AGGIE CARTOON

Pastel Features Fat Woman and Thin
Man at Student Hop—Winner
Gets Subscription to
Collegian

Titles for the pastel in Anderson hall featuring a fat woman and a puny man at an Aggie hop must be submitted to the Brown Bull, care of Milton Eisenhower, by next Friday in order that the prize title may be selected in time for the first issue of

the magazine on homecoming day.

The pastel which has attracted a great deal of attention since it was put up Thursday shows a college hop at which the fat woman and the small man are the centers of attraction. The lady is apparently enjoying the party immensely while the man is sweating, fuming, and wishing that the orchestra would blow up.

A prize of a year's subscription to the Collegian will be given for the best title, and a year's subscription to the Brown Bull will be given as the prize for the second best title.

All contributions, cartoons, and writings for the Brown Bull must be in the hands of the editor, Milton S. Eisenhower before Tuesday, October 26. All copy will get to the publisher before November 1, so that the magazine will be out on time for the homecoming game.

All advance subscriptions to the magazine should be mailed to Walter A. Karlowski, business manager, or to Milton Eisenhower, editor.

RESERVE SEATS AT K. U. GAME

AGGIE ROOTERS TO BE ON NORTH
SIDE

Watson Urges Freshmen and Upper-
classmen to Do Their Best—They
Owe It to the Team

Plans are now under way to have at the K. U. game the wildest mob of rooters ever heard on the Ahearn field. The majority of seats on the north side will be reserved for Aggie rooters who will give their first attention to the idea of rooting so hard that a K. U. victory will be impossible.

There will be a section for freshmen, one for upper classmen, and another for the Girls' Loyalty club. Absolutely no dates will be allowed in these sections, as there will be another section reserved for those who insist upon taking ladies to the game. Admission to the respective sections will be by rooster, tickets only, and these will be furnished free of charge. Definite arrangements will be made later for their disposal, but they will be given only to those leathery lunged rooters who can demonstrate their ability to yell.

So far the freshmen have far outclassed the upper classmen in volume. However, they have the large fault of not knowing some of the yells as well as they might.

"To date the yelling has been very poor," said Ray Watson, head cheer leader. "There has been a mixture of people on the north bleachers, composed of knockers who are either dead, blind, or otherwise incapacitated for booster service."

"I am not asking that the bunch yell much this year—only before the game, during intermission or when some man is hurt or men transferred. I am not asking for any concerted yelling during play unless our goal is in danger."

"When I ask for a yell, it is because it is necessary, and I want everyone to give all he has. That is what the team is giving and the only thing to do is to back them up 100 per cent strong."

"I want to see the bleachers filled from 5 to 6 Wednesday evening for yell practice. Freshmen, you need it badly; upper classmen and Girls' Loyalty club, wake up, you need practice too; and all of you owe it to the team."

JUNIOR ELECTRICALS ELECT PAUL PHILLIPS AS PRESIDENT

Purpose of Organization Is to Pro-
mote Livelier Interest in Elec-
trical Work

The Junior electricals have organized for the purpose of promoting a livelier interest in their work. The organization will enable them to do better and more efficient work both in the department and in the college.

The following officers were elected at the first meeting: president, Paul Phillips; vice president, G. L. Garlock; secretary and treasurer, Paul Kovar; reporter, Harold S. Nay; sergeant at arms, H. J. Stalb.

There are 38 juniors this year. During the summer several of the men were with large companies in the east, while the others were doing practical work closely connected with their course.

The men are planning a peppy program for the year, which will be of interest to the outsiders as well as to the members of the class.

Make Debate Squad

The following girls made places on the fall debate squad at the tryout last Thursday: Marjorie Ault, Annette Kauser, Nellie Griffith, Helen Vanquest, Lois Clark, Viola Monsey, and Marie Correll.

CUP HANDICAP RACE WILL BE RUN SATURDAY

WILL AWARD CUPS TO THREE
WINNERS

TWENTY ONE MEN ENTERED

Six Best Athletes to Compete Against
Jayhawkers Cross Country Team
Day of K. U. Aggie
Game

The first annual individual cross country for Aggie tracksters will be held tomorrow at 3:30 o'clock. The race will be a cup handicap race, the distance of which will be approximately five miles. The cups which are to be given for the first three places are now on display in the Co-op book store window.

A preliminary race was run last Friday for the purpose of getting the time of the various men so as to be able to base the handicaps. The men started with one lap on the track and after chasing out to the agronomy farm and back, finished with two laps on the cinders.

Watson To Run Last

Upon the times secured the following handicaps are based. The first squad composed of Betts, Firebaugh, and Bangs will start at 3:30; the second squad, Hunter, Riley, and Mowery at 3:31½; the third bunch, Henri, Turpin, Wolgat, Boyer, and Ibach at 3:33; the fourth bunch composed mainly of men from which the varsity team will be picked, Kuykendall, Mathias, Clapp, Stotts, Green, Knight, Means, Von Reisen, and Cunningham at 3:34; and one minute later Watson will leave the marks.

By giving the above handicaps, the men will be quite evenly matched and the outcome of the placing very uncertain.

Sweaters To Be Given For Sport

From the showing made by the eligible men in the cup race Saturday, a cross country team of six men will be picked to compete against K. U. the same day as the K. U. Aggie game.

The race will start at 1:30 o'clock so as to finish before the game. The first five men to finish from each team will count for their school.

This is the first attempt to revive cross country, but from appearances the Aggie team will be able to make a good showing against the Jayhawker squad.

Although cross country will be considered a minor sport, letters probably will be given, but instead of the large roll collar sweater given for athletics at present, a light weight V neck jersey will be given.

There will be a full time game between the freshmen and the second string varsity men just following the finish of the cross country race.

CHOOSE HOCKEY TEAM CAPTAINS

COLOR GAMES ARE IN PROGRESS
NOW

Tournament Is Patterned after Bas-
ketball Tournament Played Last
Winter

A girls' hockey color tournament similar to the basket ball color tournament of last year is now in progress, and all girls trying out for hockey have been placed on a color team, 16 girls being on each team.

Captains chosen for the different teams are: Anna Best, purple; Rena Rosenthal, blue; Duella Mall, red; Edna Hoke, yellow; Meta Baker, green; Amy Lemert, orange.

Four games have already been played, but the remainder of the game schedule is as follows: yellow-purple, Friday, October 22, 5 o'clock; yellow-orange, Tuesday, 26, 4:15 o'clock; green-blue, Tuesday, 26, 4:15 o'clock; red-purple, Wednesday, 27, 5 o'clock; yellow-green, Thursday, 28, 5 o'clock; purple-orange, Friday, 29, 5 o'clock. There will be two other games, one between the yellow and blue teams and the other between the red and orange teams. The date has not yet been set for these games.

The attendance of the players at these games will be taken into consideration in the choosing of the class and varsity teams. If a team fails to have the required number of players on the field by 15 minutes after the time scheduled for the game, the delinquent team must forfeit the game.

FRIDAY, OCTOBER 22, 1920

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Make the "Beat K. U." slogan a reality.
4. Aggies at the top of conference athletics by 1922.
5. Clean politics.
6. Greater cooperation between alumni, students, and faculty in bringing athletics to K. S. A. C.
7. Remodeling of the auditorium stage.

"Hello, doesn't last for a minute,
A clear little queer little word,
But say, there's a lot of cheer in it;
It's like the first chirp of the bird
In spring, when the hilltops are greening
Right after the cold and the snow.
I think when it comes to real meaning,
There isn't one word like 'Hello.'"

K. S. A. C. is a school of strangers. Each person is acquainted with a small portion of the student body and the rest of the students are absolute strangers. We, as individuals, are so near each other that arm touches arm, yet an invisible wall separates us from those who might be our best friends. Some dare to scale this wall, but for most of us it is a barrier impassable. We meet each other in the classroom, on the campus, at entertainments, yet we do not speak. Eye meets eye, but the lips are silent, and we pass—strangers.

Why not have a more friendly feeling toward the other person? Why not have a "Hello Day," a day when each person speaks to everyone that he meets, whether it be in the classroom, on the campus or in Anderson hall? In days past the walk from the library to the chemistry annex was "hello walk" but it has been forgotten. Let's revive the "hello" spirit, by setting aside one day each week for a "hello" day.

HICKORY LIMB VERSUS GYM LOCKER

The embarrassing situation in which you found yourself as a youngster when you went swimming and the dog swiped your clothes, is nothing to the degradation that one undergoes when he climbs out of the college swimming pool to find various articles of his wearing apparel missing. If it were only a watch or a ten dollar bill that was stolen, it would not be so bad, but when one's shirt and trousers disappear along with the money and watch—well!

There has been entirely too much petty thievery and honest-to-goodness stealing going on about the campus this year. Many of the girls have come in from gym practice and found articles missing. It is no uncommon thing for a man to come in from track practice and have to wear a friend's shirt home because his has been taken.

The epidemic of petty thievery that seems to have spread abroad in the school is apparent in many places than the gymnasium. Books, pen, hats, sweaters, and other articles without number have been purloined from their owners. A large element in the student body would seem to have its collective eye open to the "main chance" and to be unable to resist the temptation to "cop" whatever is loose and unguarded on the campus.

Carelessness in keeping track of bank balances is another sin that must be laid at the door of a much-too-large section of the student body. Literally hundreds of checks are returned to Manhattan merchants every school year with the "insuf." which is the outward sign and symbol of slipshod bookkeeping on the part of the student written across the face of each. Aggieville and Manhattan merchants have been mighty good to students generally in being lenient concerning this matter of checks drawn against insufficient or non-existent balances. However, there are signs that these merchants will not always be so long suffering and patient as they have been. Already it is very difficult to cash checks in some of the business houses that have been "stung" too hard, without thorough identification.

It behooves Aggie students to observe this matter of morals and business methods closely and to deal firmly with the class that is responsible for the wave of petty thievery and the writing of non-negotiable checks. One or two prosecutions of persons responsible for such misdemeanors would do much to better conditions.

SCHOOL OF AGS
PLAYING TODAY

FOOTBALL TEAM GOES TO ESKRIDGE FOR SECOND GAME

"Hobe" Fairman, Ex-Aggie Football Star, Is Coach of School of Agriculture Team

The School of Ags will play the second game on their foot ball schedule with Eskridge high school at Eskridge today. The home team has not had a game since October 1 when it trimmed Alma high 25 to 0, and as a result of the rest is in excellent condition for today's battle.

"Hobe" Fairman, senior in engineering and ex-Aggie football star, has just been engaged by A. P. Davidson, dean of the School of Agriculture, to coach the Ag team the rest of the season. So far the squad has had no regular coach. All the coaching the team has had thus far has been given by Harold Theiss, a freshman, who played on the School of Ag team last year.

Dean Davidson considers himself lucky in getting a man of "Hobe's" caliber to handle the job. Fairman is a two year letter man and was holding down the position of full back last year when he was seriously injured in the army game.

The probable line up today: Scholz, r. e.; Hepworth, r. t.; Clark, r. g.; Olson, c.; B. Conroy, l. g.; Smith, l. t.; Butler, l. e.; Monley, q. b.; Buxter, r. h.; Stolley, l. h.; J. Conroy, f. b.

Next Wednesday the Ags will play the Wamego high school at Wamego. Wamego has a heavy team and has won from Eskridge. The way the Ags handle Eskridge today will give some dope on the game Wednesday.

THREE "K" MEN ELIGIBLE TO WORK ON AMES DEBATE

H. I. Richards, Everett Willis, and C. W. Howard, Inject Pep Into Squad

The announcement of O. H. Burns, debate coach, that H. I. Richards, Everett Willis, and C. W. Howard, were eligible for the Ames debate has injected real pep into the fall squad.

Richards a senior in agriculture, is a "K" man, who has been out of college for two years. He is a hard worker and when given a chance at a place is almost certain to make something of it.

Willis, a junior in agriculture, won his "K" in the Ames debate two years ago. He knows what it means to debate Ames and will add strength to the squad.

C. W. Howard, a junior in industrial journalism, is also a "K" man. He has been out of school for three years but comes back with the old time pep.

With the addition of these three old men to the fall squad, Coach Burns has little fear of the Ames debate.

Prof. and Mrs. C. E. Rogers were dinner guests at the Pi Kappa Alpha house Sunday.

Mrs. Arthur Volkman of Woodbine visited her sister Olivet Mitsch at the Chi Omega house last week.

Mr. and Mrs. Stanley Smith left here for Fargo, N. D., where Mr. Smith has accepted a position as instructor in the architectural department of the State college. Mr. Smith was a well known instructor here in the architectural department. He was a graduate of this college in 1908 and is a member of the Beta Theta Pi fraternity.

C. C. McPherson of Paris, Ark., has enrolled in college. Since the first of June Mr. McPherson has been superintending a Cadman Chautauqua circuit, beginning in Washington and extending as far southeast as Louisiana.

Miss Kathrine M. Bower, instructor in English department, spent the week end visiting in Kansas City and Lawrence.

Miss Irene Whitehead spent the week end at her home in Abilene.

G. A. Maxey of the dairy department, took his market dairy class on an inspection tour last week. They visited the dairy house of the Linn Dairy Farm. The purpose of the tour was to give the members of the class a practical knowledge of how the various dairies handle the milk for market purposes.

SIDELINE YARNS

The Aggie fans hated to see the tie game Saturday, not because of the score, but because of the poor football played by the team. However, the fans are not the only ones who heave a regretful sigh when they think of the game. Think of the Varsity men who played therein and who had to confront Coach Bachman at Monday's practice session.

Hinds was getting on to the Normal method of tackling high after the first quarter and made several gains by ducking the tacklers. The majority of the Normal tackles were made around the necks of the Aggie battlers.

What did you think of the Emporia idea of having a teacher's meeting before each down? No signals were called, the play being arranged during the session back of the line. The new method of play rather disconcerted the Aggies for the first few downs.

The Normal has a fast pair of ends in McGahan and Stewart. The pair were down the field on punts far ahead of the Aggie interference for their safety man.

Dewey Huston's forte in kicking would not seem to be the kick down the sidelines and out of bounds. He was outmanned at that game by Stewart, the Normal punter.

The dope's decisively against the Aggies for breaking the K. U. jinx this fall. The University slapped the Normal 47-0 in the first game of the season. However, the Normal upset the dope in Saturday's game, and the Aggies may be able to pull the same sort of a wheeze on the K. U. battlers.

E. F. FERRIN LEAVES FOR UNIVERSITY OF MINNESOTA

To Be Professor in Swine Department There—Will Have Charge of Stock Judging Teams

E. F. Ferrin, associate professor in the animal husbandry department, left Saturday morning for the University of Minnesota. Professor Ferrin had charge of the swine department while at K. S. A. C. and he will be professor in the same department at the University of Minnesota. There he will also have charge of the stock judging teams.

Professor and Mrs. Ferrin will make their home at the University farm, which is connected with St. Paul and Minneapolis by interurban. F. W. Bell, associate professor in the animal husbandry department, will take charge of Professor Ferrin's work here.

A. R. Saunders, who has taken work in the Grey university college, Orange Free State, Africa, has been sent to K. S. A. C. by his country to take up the agricultural curriculum. With his advanced collegiate standing, Saunders thinks that he may be able to finish the work here in three years.

Norine Weddle spent the week end with her parents in Lindsborg.

R. A. Seaton, dean of the division of engineering, was visited last week by Mr. and Mrs. Roy R. Miller. Mr. Miller is now with the General Electric company of New York. While at K. S. A. C. he was wireman and repairman in the general repair department for two years before going to the General Electric company. He was graduated from the college in 1919.

John H. Parker of the department of agronomy, left last week for Marshall, Ill., where he attended the meeting of the high council of Alpha Zeta. Professor Parker is the high scribe of that fraternity.

W. A. Watson will address the K. S. A. C. engineers on October 28 on the proposed good roads amendment to the state constitution.

Klod and Kernel Klub took the first definite action on preliminary plans for their third annual grain judging contest to be held next spring, when they appointed a committee to begin the collection of materials and money for the contest.

Robert Schell who attended K. S. A. C. in 1917-18 and who is a member of the Beta Theta Pi fraternity, has returned to take up a course in agriculture.

Miss Fuller, chaperon of the Iota Psi house, spent the week end at her home at Topeka. Miss Grace Hesse acted as chaperon during Miss Fuller's absence.

Y. M. C. A. MEMBERSHIP CAMPAIGN IN FULL FORCE

Ruth Peck Is in Charge of Work—Has Twelve Captains Working Under Her

The Y. W. C. A. annual membership campaign started last week and will continue for one week. During this time every girl in school who is not a member will be visited personally and asked to join, either as a regular or as an associate member.

Any girl who wishes to further Christian standards of conduct is eligible to become a member. The signing of a membership card does not mean the pledging of definite financial support, as the association's finances are taken care of by the financial campaign which is to come later in the year.

The campaign is conducted by Miss Ruth Peck, who has working under her a committee of 12 captains, each of whom has four assistants. These girls will visit non-members and explain to them the principles and duties of the association.

Basketball Men Out

A call is issued for candidates for the basketball squad to meet in Nichols gymnasium on Monday, Wednesday, and Friday afternoons at 4 o'clock. Captain Ham Burger, the terrible Swede, would appreciate the attendance of as many hopefuls as possible at these sessions. At the University of Kansas some 30 men have been working out for two weeks.

Miss Margaret Miller spent the week end at her home in Salina.

Miss Marie Manser, '19, is teaching in the department of home economics at Drumright, Okla.

C. H. Scholer, testing engineer of the road materials department, returned Saturday from Topeka where he inspected the concrete floors in the new addition to the state printing plant.

George Winters, sophomore in general science, who was operated on for appendicitis at the Parkview hospital last week, is improving.

R. M. Green and W. E. Grimes, both of the department of agricultural economics, attended the special meeting of the state board of agriculture at Topeka last week. Herbert Hoover was the principal speaker.

Mrs. Warren Hestwood of Kansas City, Mo., and Miss Mildred Hayer, a guest of Louise Mangledorf's, spent the week end at the Delta Delta Delta house.

REVIVED INTEREST TAKEN IN Y. M. WORK THIS YEAR

Y. Building Is Used by Many College Organizations

The Y. M. C. A. has come back into its own this year as is abundantly shown by the constant stream of students passing in and out of the general office in recreation center. In addition to receiving these many callers the general secretary coaches the freshman foot-ball team, teaches Bible Education I, and makes form one to four talks in Manhattan churches on Sunday.

The Y building at the corner of Fremont and Eleventh has not escaped this revival. Several college organizations hold meetings there, the school of agriculture, football team uses a room for a dressing room, and the large dining room is being used by a cooperative boarding club.

Members of Theta Sigma Phi sold doughnuts at the Aggie-Normal foot-ball game Saturday.

Miss Nita Richardson and Miss Elithe Kaul will spend the week end at Miss Kaul's home in Kansas City, Mo.

Mr. and Mrs. George Ferrier and daughter, Betty, were dinner guests at the Alpha Delta Pi house Sunday.

Miss Lois Stewart, '15, is teaching home economics and at the same time doing graduate work in the University of Wisconsin.

Miss Grace Gish, '20, is teaching physics and mathematics in the Medicine Lodge high school. She also has charge of girls' athletics.

Miss Myrtle Carey, graduate in the division of home economics, '20, is teaching domestic art in Union college, College View, Nebr.

Miss Sophia Shirley, who was a student at K. S. A. C. last year, is attending the Pittsburg normal school this year.

W. P. Lambertson, speaker of the Kansas house of representatives, was a dinner guest of Miss Ruth Lambertson at the Alpha Delta Pi house Sunday.

The physics department is having the class rooms on the north side of Denison hall fitted with weatherstrips. This will make these rooms much warmer during the winter months.

Marion Harrison, who for five years has taught in the clothing department at K. S. A. C., is now teaching in the University of Syracuse, New York. In her dressmaking classes she and her girls are visiting the large department and special clothing shops, thus studying the materials and ready-to-wear clothing.

Miss Mildred Wright, Miss Gladys Newton, and Miss Helen Smith will spend the week end in Salina at the home of Miss Smith.

Dr. N. D. Harwood was in Norton last week vaccinating hogs at the state tuberculosis sanitarium against hog cholera. Some member from the veterinary division visits regularly all state institutions to look over health conditions.

H. F. Lienhardt of the veterinary division is in Reno to investigate a peculiar disease among horses that has sprung up in that locality. Nine horses have already died and the disease is taking on serious aspects.

Miss Marjorie Uhley spent the week end at her home in Fairbury, Nebr.

Vivian Solt, has rebuilt his Ford into a racing car and will compete in numerous races. He will enter his one-time Ford at Blue Rapids, November 13 and at Salina November 14 in a feature race for rebuilt Fords. Fifteen hundred dollars in prize money is offered.

Saturday evening dinner guests at the Kappa Sigma house were Harold Smith of Salina, Wilbur Knight and Fred H. Fox.

K. S. A. C. LOSES PARSONS TO NEBRASKA UNIVERSITY

Ames Graduate Succeeds Him as Farm Engineering Instructor

R. H. Driftmier, a graduate of the class of 1920 of the Iowa State Agricultural college at Ames, Ia., has arrived in Manhattan to be instructor in the farm engineering department of the Kansas State Agricultural college, specializing in farm machinery and rural architecture. Mr. Driftmier was in the service of the United States army during the war.

Mr. Driftmier takes the position left vacant by the resignation of J. D. Parsons, formerly assistant professor of farm engineering at the college. Mr. Parsons left on August 1 to be associate professor of farm engineering at the University of Nebraska, Lincoln, with an increase in pay which was far more than the department at Manhattan, under the present limitations of the budget, was able to offer him. As associate professor at Nebraska university, Mr. Parsons draws a larger salary than the head of the department at K.S.A.C. Mr. Parsons is a graduate of K. S. A. C. with the class of 1915.

Service

Say, students, don't you know that you can get real service at the PINES CONFECTIONERY?

The Plan

The tables will be numbered from 1 to 50. Pencil and menu cards will be placed on the tables. Kindly select what you want and write it on the order blank. Mark the number of your table on it and deliver the order to fountain dispenser.

Result will be service.

L.C. SHAFER, Prop.

ENROLMENT HEAVY IN COLLEGE FORGING CLASSES

Art of the Stalwart Smith Has Devoted from Many Divisions

More than 280 are enrolled in the college forging classes, says D. E. Lynch, foreman of the blacksmith shop and instructor of forging. This number does not include 45 men who are enrolled from the school of agriculture, and the short course men.

A large number from the division of general science have elected forging. This is done so that they may qualify to teach under the Smith-Hughes law. Mr. Lynch says that 95 per cent of the college enrolment in forging is from the engineering division for the college. Forging is required in all engineering courses.

Three courses in blacksmithing are being offered this semester, and all classes are large. The blacksmith shop is equipped with 46 forges and anvils and in many of the classes all are in use.

J. WHEELER BARGER HEADS PI KAPPA DELTA THIS YEAR

Debating Fraternity Has Made Unusual Growth During Past Year

The Kansas Gamma chapter of Pi Kappa Delta has elected the following officers for the ensuing year. President, J. Wheeler Barger; vice president, C. W. Howard; secretary-treasurer, V. V. Cool; scribe, Arnold England.

Dr. J. R. Macarthur, national president of Pi Kappa Delta and editor of the Forensic, the national organ of Pi Kappa Delta, has written to the local chapter. He says that Pi Kappa Delta has never before experienced the growth that it has within the last year. He points to the year 1920-21 as being the golden opportunity for Pi Kappa Delta to become one of the most useful forensic organizations of the country.

While at K. S. A. C. Dr. Macarthur had much to do with the founding of the Kansas Gamma chapter.

NEW CONCERT COMPANY IS ORGANIZED AT K. S. A. C.

To Give Training and Furnish Rural Entertainment

The Salon singers are a group of music students of K. S. A. C. who, under the direction of Professor Lovejoy of the department of music, have been organized into a concert company. This company has the double purpose of giving students professional training and of furnishing the division of college extension with an organization for rural entertainment. The members of this company are Florence Myers, Ollivette Mitsch, and John Elliot.

The classes in pomology are going to exchange varieties of apples with the leading agricultural colleges over the United States. The purpose of the exchange is to enable the students taking the work to make a complete list of identification. Up to date the boys have studied 51 varieties of apples.

Miss Elizabeth Mable and Miss Margaret Falconer spent the week end at their homes in Kansas City.

Miss Louise Michée and Miss Helen Porter drove down from Wichita to spend the week end at the Delta Delta house.

DR. IRVINE IS CHAPEL SPEAKER

**SAYS U. S. HAS LEARNED LITTLE
FROM EUROPEAN WAR**

**Believes U. S. Is More Reactionary
Now Than at Any Time Since
the Civil War**

"The United States is more reactionary now than at any time since the Civil war," said Dr. Alexander Irvine in an address at the assembly exercises Wednesday morning. He also declared, that "the United States had learned less from the European war than any other nation engaged in the conflict."

Doctor Irvine is a native of Ireland, a graduate of Oxford and Yale, and has been professor of psychology at Culver Military academy. He served England during the war, and previous to this wrote a number of books and did much social service work.

Touching upon the European situation, Doctor Irvine said, "The test of victory is the use we make of it. Germany's defeat is for her future good. No European country is advancing faster in reconstruction than the United States. We are far from democracy now, and the solving of that important problem is up to the present generation."

"One day I said to a bunch of Englishmen, 'You conquered by the sword, even as Babylon, Greece, Chaldea, and Assyria. And even as those nations went down by the sword, you shall go down. Your country and mine, have no more assurance of perpetration than England has."

"We of the west will be the candidates for England's honor, and then the yellow men of the east will rise and wipe us out. So it has continued through all history."

"It is in your power to change the order of things, Kansas boys, and if the old spirit of John Brown is alive you must make the largest possible use of it."

SOCIETY

The Lincoln and Philomathian literary societies held their annual "cake feed," as the event is known, in the society hall last Saturday evening. When members of these societies marry they are required to furnish the society with refreshments for this annual function. This year the cakes were furnished by Mr. and Mrs. Snyder and Mr. and Mrs. Akers.

The Architects club enjoyed their regular semester "get together" dance last Friday night at Recreational hall. The dance was chaperoned by Maj. C. A. Chapman, and Mr. and Mrs. C. F. Baker.

Franklin literary society held its weekly meeting Saturday evening in

the Franklin hall. The program consisted of music, readings, a debate, and the reading of the Spectator, the society paper. Three new members were initiated. The society voted not to meet the night of the K. U.-Aggie football game.

Miss Garnett Westbrook and Miss Eva Dittmar were hostesses at an informal party given in honor of Miss Elsie Deniston and Mrs. Marguerite Edelbute Simpson, Monday night. The evening was spent in dancing, after which light refreshments were served. The guests were Miss Jeanette Sleeper, Miss Lillian O'Brien, Miss Helen Thayer, Miss Mildred McKee, Miss Grace Sachau, Miss Rae Frank, Miss Martha Frank, Miss Dorothy Dugan, Miss Ardis Atkins, and Miss Frances Johnstone.

Miss Nellie Jorns and Miss Frances Mardis were guests of honor at a surprise party given last week by Mrs. Huling, at her home on Laramie street. Refreshments of ice cream and cake were served. A birthday cake, which had been made especially for the occasion, was decorated with 18 candles, and contained a ring, a thimble and a penny. The guest list included Miss Nellie Jorns, Miss Frances Mardis, Miss Josephine Hemphill, Miss Hazel Burdette, Miss Josephine Bussey, Miss Ruby Rickels, Miss Nellie Klaus, Miss Esther Huling, and Mrs. Huling.

MUST GET ALL "BULL DOPE" IN

**OCTOBER 26 IS DEADLINE FOR
HUMOROUS CONTRIBUTIONS**

**All Are Eligible for Brown Bull
Poster Contest Now On**

All persons who are writing or drawing for the Brown Bull, must give their contributions to the editor before next Tuesday, October 26. All copy and cartoons will be in the hands of the publisher by November 1 in order that the magazine will be out for the homecoming game.

Everyone in the college is eligible to enter the Brown Bull contest for the best name to the poster that is now being shown in Anderson hall. The big fat woman and the puny little man are attracting a great deal of attention. The person receiving first prize for naming the poster will be given a year's subscription to the Brown Bull. Others will receive honorable mention. A reproduction of the poster will be run in the Brown Bull.

This time 2,000 copies of the magazine will be sold at the homecoming game. Advance orders may be sent

to Walter Karlowksi, business manager, or to Milton Eisenhower, editor.

STRATTON RESERVES SEATS FOR THE HOMECOMING GAME

**Five Hundred Alumni and Former
Students Expected—K. S. A. C.
Has Nine Alumni Associations**

Cliff Stratton, secretary of the alumni association, is busy making reservations for the K. U. and Homecoming games. Athletic managers will hold several hundred tickets for the alumni until the day of the game.

Five hundred alumni and former students are expected for the Homecoming game, November 13. There will be a section in the grandstand reserved for them. K. S. A. C. is proud to boast of the following alumni associations: Atchison, Chase, Cloud, Jewell, Reno, Riley, Sedgwick, Shawnee, and Wyandotte. A score of other counties will be organized between now and December 1.

Wanted: Student pressfeeder at Mercury office.

PLAY TRYOUTS END TONIGHT

NEW SYSTEM OF CLASSIFICATION FITS ACTOR TO PART

One Hundred Persons Working for Roles—Players May Be Given Chance in Other Shows

Tryouts for the first college play under the direction of the Purple Masque dramatic fraternity close tonight at 6 o'clock. From all indications tonight will be a record tryout. One hundred persons have tried out and many have shown exceptional possibilities.

"Every one a type, everyone a fair chance" is the purpose of the new system of tryouts which have been worked out by the Purple Masque committee who are, Miss Florence Heizer, Miss Winifred West, Miss Rowena Thornburg, Vorin Whan, and Herbert McClelland.

Other years much good material has been lost because a person who had dramatic talent and did well at the tryout did not fit into the type needed in the play picked. The person would not come back for another tryout because he felt that he had not been treated fairly and thus lost all interest in dramatics.

The new system when thoroughly established will do away with such difficulties. Each student is catalogued after he has tried out as to his type, parts he has played, parts he might be able to play, and good or bad points which showed up in the tryout. A complete record for future reference is kept of all the information regarding every person who ever tries out. When a play is chosen all students who showed possibilities for a distinct type will be called upon to try out for the part.

ANNOUNCEMENTS

A special meeting of the Students' Self Governing association executive council is called for next Monday evening at 8 o'clock in F56 for the purpose of discussing policies for this year.

Prof. W. H. Andrews asks that all persons who are going to attend the County Teachers' association leave their names with him today so that they may get special carfare rates.

All Mitchell county students who are going on the hike this evening should meet at the north entrance of the city park at 5 o'clock.

Rifle club will have a special meet-

ing at the gym this evening at 5 o'clock.

Hamilton literary society will have its regular meeting tomorrow evening at 8 o'clock.

Browning literary society will give a special debate program tomorrow afternoon at 3 o'clock.

Webster and Eurodelphian literary societies will hike to Eureka lake tomorrow. The members are asked to meet at the west end of the gym tomorrow afternoon at 2:45 or 4:45 in order to catch the 3:15 or 5:15 Interurban.

The Quill club meets Monday evening at the home of the chancellor, Miss Elizabeth Dickens.

All Kansas City students will meet

at the gym Sunday evening at 5 o'clock to go on a "get acquainted" hike.

Prof. L. D. Colburn of the illustrations department of the college will speak in journalism seminar Monday on the subject "photography."

Members of the Mitchell-Cloud county club will meet at 5 o'clock this evening at the fountain in the city park for a hike to Wildcat.

Injured in Chemistry Lab.

Lennert B. Mallott, a student at the University of Kansas, whose home is in Kansas City, was injured by acid and flying glass in a chemistry laboratory last week. A chemistry instructor examined Mallott's eye and failed to find any glass in it, but a Kansas City specialist later found it necessary to remove one eye.

SECOND STRING VARSITY AND FRESHMAN TEAM MIX SATURDAY

To Play at 4 O'clock—No Admission Charges

Doctor Holtz, freshman football coach, announces that at 4 o'clock Saturday afternoon, following the cross country run, there will be a football game between the varsity second team and the freshman team. The second string varsity and freshman game will be free to all.

A messenger will bring reports to the field from the Associated press of the results of the Aggie-Creighton game that will be played Saturday afternoon in Omaha.

H. B. Winchester, assistant professor of animal husbandry, has returned from Horton, where he had charge of the judging of livestock at the county fair held at that place.

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, TUESDAY, OCTOBER 26, 1920

NO. 18

OSCAR SEAGLE TO SING HERE NOVEMBER 15

TO GIVE OPENING CONCERT OF
ARTIST SERIES

TICKETS ON SALE OCTOBER 25

John Powell, Virginia Pianist, Will
Appear in Second Program of
Series—Mabel Garrison to
Give Last Number

The first number of the All Star Artist Series will be given on the night of November 15 when Oscar Seagle will appear here in a concert. Following the Seagle concert will come John Powell, pianist, on February 21, and Mabel Garrison, soprano, on March 14.

Tickets for the Artist course will go on sale after October 25, but reservations which are to be made at the Co-op bookstore in Aggieville will not be considered until 11 o'clock on the morning of November 10. Mail orders sent to Prof. A. E. Westbrook will be accepted, and it is requested that applicant state location preference.

Season Tickets \$3

Seats on the first floor if purchased for the season can be secured for \$3 and the charge for balcony season tickets is \$2.50. Single admission prices for the first and second concerts are \$1.25 but \$2 will be charged for a single admission to the Garrison concert.

Oscar Seagle, who is one of the leading baritones of the country, will appear before the Manhattan audience in a program of high order. He is especially noted for his renditions of folk songs and negro spirituals. The numbers which will make up his program here on November 15 are of wide range and those interested in the Artists series will miss one of the most worthwhile numbers ever offered here if they do not hear Seagle.

John Powell Coming

John Powell, "the Virginia pianist" will appear here in the second program of the series on the night of February 21. The European tour from which Powell has just returned is a veritable triumph and his coming to a Manhattan audience is regarded as a real privilege by musicians and laymen alike.

Mabel Garrison, for a number of seasons soprano soloist with the Metropolitan Grand Opera company, will be the last number of the winter's musical course. Her concert is set for March 4.

TO INVITE K. U. ENGINEERS HERE

DIVISION HERE WILL ENTERTAIN MEN

Will Conduct Several "Tour of Inspection" Parties About College, Especially Through Engineering Buildings

The division of engineering are sending a special invitation to the engineers of K. U. to attend the K. U.-Aggie football game and at the same time to look over the engineering department of this school.

Several "tour of inspection" parties consisting of K. U. engineers will be made over the college and more especially over the engineering department. This plan will let the engineering students of K. U. know what the engineering department of K. S. A. C. really is.

Many students who go to K. U. and enrol in the engineering department of that school do so under the delusion that since K. U. has the oldest engineering school in the state it is therefore the best. K. S. A. C. engineers will not concede that K. U. has the best engineering school. The division at K. S. A. C. has much more and better equipment, better buildings and just as good instructors as has our sister school down the valley.

FOURTEEN MEN ELECTED TO MEMBERSHIP IN TRI K CLUB

H. H. Laude and L. A. Fitz Are
Among New Members—Hold
Initiation Tonight

At a special meeting held last Tuesday evening in Professor Call's office, the Kiod and Kernel Klub elected the following men to membership:

B. B. Bayles, R. S. Mather, E. H. Coles, J. C. Wingfield, E. W. Davis, Wright Turner, Eugene Walker, Walter Harder, C. Morgan, E. B. Wells, R. F. Copple, and E. E. Huff. H. H. Laude, of the agronomy extension and L. A. Fitz, professor of milling were also taken into the club. Initiation of the newly elected members will take place tonight at the home of Prof. R. I. Throckmorton at 825 Houston.

Tri-K is an agronomy organization which limits its members to juniors and seniors and faculty members of the agronomy department. The club is already making plans for the big annual grain judging contest to be held some time in the spring. E. H. Teagarden has been appointed manager for this year's contest.

GETTING READY FOR CONGRESS

Y. W. C. A. GIRLS ARE ORGANIZING FOR CLOTHES EXHIBIT

Committees Have Been Chosen and Work Is Well Started—Meeting November 19

Committees to have charge of the plans for the clothes congress to be held here November 19 for the benefit of the high school girls of the northern part of the state have been organized, and the work is well started. The committees of Y. W. C. A. girls have charge of selecting and arranging for the program, gathering material for the meeting, and entertaining the girls.

The members of the committees chosen are as follows:

Committee on collecting garments: Luella Morris, chairman; Carol Knostman, Esther Waugh, Margaret Shrader.

Committee on the selection of models: Ruth Harrison, chairman; Ruth Martin, Ruth Gillis, Irene Hoffines.

Committee on publicity: Garnet Grover, chairman; Elizabeth Dickens, Clementine Paddelford. Reception committee: Bly Ewalt, chairman; Dorothy Kniddle, Sarah Morris, Alberta Edelblute.

Committee on the selection of garments: Miss Mary Polson, chairman; Miss Irene Maughlin, Mrs. Elizabeth Winter.

Miss Margaret Ansdell is chairman of the arrangement committee. She selects her own committee and has not as yet turned in the list.

The committee on selection of garments asks that anyone having garments which they think would be of interest or would assist high school girls in choosing a college wardrobe will please submit the same to Miss Mary Polson. It should also be noted that the date is November 19 instead of November 12 as first announced.

Civils Have Meeting

The civil engineers had a get-together meeting last week for the purpose of getting acquainted with the new students in engineering. A hike had been planned but due to unfavorable weather the meeting took place in the engineers' laboratory. Refreshments of wienie sandwiches, doughnuts and coffee were served.

PEARSON TAKES BOYS' STOCK JUDGING TEAM TO ATLANTA

Boys at College to Do Preliminary Work—Under Direction of Extension Division

Nevels Pearson, '20, who is coaching the boys' stock judging team left Tuesday, October 12, with the four boys who won places on the team, for Atlanta, Ga. There the team entered the contests in stock judging for boys which were held October 19-22. These contests are national in scope and are participated in by teams representing each state.

The boys on the team were at the college last week working on the placing of animals in the college herds. On the way to Atlanta they did some further work in preparation for the contests at Lexington, Ky., where they inspected a number of herds.

The Kansas boys are picked from the 5,000 members of the clubs organized throughout the state by the extension division of the college, and are all able to qualify as experts.

Miss Bertha Miller came from Salina Wednesday to attend the Neubaum-Tabor wedding. Miss Miller held the position as stenographer at K. S. A. C. last year for Prof. J. W. Searson.

Mr. and Mrs. J. B. Deal, who were called to this city a few days ago by the serious illness of their son, Louis, returned to their home in Newton Wednesday. Louis, who is a student at the college, was taken to the hospital Monday for an operation.

Galloping Goose Wants to Return— Hamburgers, Bah!

The galloping goose, who in former years rocked the Aggies forty bumps a second, has given up her career on the track to be a hamburger stand.

Yes, a hamburger stand. Now the odor of onions and frying grease may be detected at any hour of the day or night if one is in three blocks of the hamburger goose house.

The goose's service is more valuable as a kitchen than it ever was as a street car. Nevertheless the fowl is still longing down deep in its scarred wooden heart to again travel the steel rail back to the corner of Thirteenth and Anderson. If the street car fares keep climbing up it is probable that the hamburger stand may again take to wing, up the old trail. For to the goose, that is the life. Hamburgers. Bah!

Estes Park Vesper Service

The five girls who were delegates to Estes park this summer had charge of Vespers. Christine Cool lead devotions, Lee Winter spoke on "The Trip and Purpose of the Conference", Maude Lair, "Classes and the Meetings", Florence Henny, "Recreation", Ione Leith "What the Meeting Meant to Me." The girls also sang songs that were sung at the conference.

POLITICIANS TO TANGLE MONDAY

REPUBLICAN AND DEMOCRATIC CLUBS TO HAVE DEBATE

Each Side Will Give Its Views of Campaign Issues—Will Be Three Speakers from Each Club

A political debate between the Republican and Democratic clubs will be held next Monday evening at 7:30 o'clock. The place for the debate has not been definitely decided as yet.

The debate will be conducted somewhat differently than the ordinary interscholastic debate. Each speech will be confined to fifteen minutes and there will be three speakers from each club. There will be no rebuttals.

There will be no affirmative and negative sides to a definite question for the Republicans will give the issues of the campaign as they see them and the Democrats will do the same.

The debate promises to arouse a great deal of interest and many college students and Manhattan people are expected to attend.

AG. TEAM HOLDS ESKRIDGE 9-6

TEAMS ARE HANDICAPPED BY STICKY FIELD

"Hobe" Fairman Working Team Hard in Preparation for Wamego Game Wednesday

Playing on a muddy and uneven field against a heavy team, the School of Ag held Eskridge high school to a score of 9 to 6 at Eskridge last Friday afternoon. An inch of rain fell at Eskridge Friday morning leaving the gridiron in a rather sticky condition for the game.

During the first quarter the teams battled evenly and neither succeeded in putting the ball over the goal line. In the second quarter, however, after a number of unsuccessful attempts, the Eskridge kicker, a negro, succeeded in placing a drop kick between the goal posts. In the last half the Ags seemed to find themselves and although their opponents got a touchdown by blocking a kick, the Ag team was playing better ball than before and continued to do so until the final whistle which found the team in possession of one touchdown and within ten yards of another.

Scholz carried the ball across for the Ags but Stolley failed to kick. No doubt the failure of either team to kick goal was due partly to the mud.

Coach "Hobe" Fairman and his men are working hard every evening now getting ready for their game Wednesday at Wamego with the Wamego high school. Wamego has a heavy team and has won from Eskridge but judging from the way the Ags were going at the end of the last half Friday they will give Wamego a close game tomorrow.

SOCIETIES TO HOLD BEBATE TOURNAMENT

WINNING TEAM CHOSEN BY PROCESS OF ELIMINATION

FIRST CONTEST TO BE NOV. 6

Question Is Resolved That Kansas Industrial Court Law Should Be Repealed—Second Contest November 20

The debate team winning the prize to be offered by the English department, for the winner of the intersociety debate will be determined by an extensive debate tournament, to be held on the first and third Saturday of November in the various society halls. Never before has the intersociety debate been conducted as a tournament or the winning team chosen by a process of elimination. The intersociety debate was a popular society contest before the war but during the war it was discontinued and has never been started until this year. The intersociety council plans to make this tournament of great interest to the societies, second only to the annual oratorical contest that is conducted every winter.

Rules Are Worked Out

The intersociety council has very carefully worked out the following rules under which the tournament will be conducted.

Affirmative team will debate in home hall.

There shall be three members on each team. Each society shall have both a negative and affirmative team. K. U. debaters and those who have worked on a squad are not eligible.

Constructive speeches shall be seven minutes and rebuttal speeches three minutes. Each member of the team shall give rebuttal.

President of the society in whose hall the debate is to be held shall appoint a chairman of the meeting and provide music while the judges render their decisions.

One judge shall be chosen by each society and one by agreement. No society sponsor shall judge a debate in which his society is represented.

Decision of the judges must be written on cards furnished by the intersociety council. The card must be signed. Judges render their decisions without consultation.

Each contesting society shall choose one timekeeper, the warning to be according to agreement.

Each society shall elect or appoint a student coach to be responsible for its team. Names of the coaches must be reported to Luella Sherman, Christine Cool, or J. Wheeler Barger.

Society yells and songs are permitted.

Question, Resolved, that the Kansas Industrial Court law should be repealed.

First Debates November 6

The schedule for the afternoon of November 6 is as follows: from 1:30 to 3 o'clock Hamilton affirmative team debates the Athenian negative in the Hamp-lo' hall; Browning affirmative debates the Ionian negative in the Browning-Athenian hall; Eudolphian affirmative debates the Alpha Beta negative in the Web-Euro' hall. From 3 to 5 o'clock Athenian affirmative debates the Webster negative in the Browning-Athenian hall; Webster affirmative debates the Franklin negative in the Web-Euro' hall; Alpha Beta affirmative debates the Hamilton negative in the Alpha Beta hall; Franklin affirmative debates the Browning negative in the Franklin hall; Ionian affirmative debates the Eudolphian negative in the Hamp-lo' hall.

In the evening of November 6 the eight winning teams of the afternoon contest will be pitted against each other in four debates, according to a schedule that will be worked out by the council immediately following the afternoon contests.

On the afternoon of November 20 the four winning teams of November 6 will hold two debates, and in the evening the two undefeated teams will determine the winner in a final contest.

WORLD FORUM IS NOW ORGANIZING FOR YEAR

Take up Discussion of World Problems—James H. Moyer President

Last week the World Forum club met at the Y. M. C. A. and organized for the year. The members of this club are the 34 students who at-

tended the Student Volunteer convention at Des Moines, Iowa, and Pres. W. M. Jardine, Dean Mary Pierce Van Zile, Dr. A. A. Holtz, and Miss Irene Dean.

The purpose of this club is to meet once every month and discuss world problems. There is to be a special program prepared for each meeting. Any student desiring to become a member must make his wish known to some member of the club and his name will be considered and approved by the organization.

All monthly meetings will be open to the public, except when the president calls for a closed business session. The present officers of the club are James H. Moyer, president; William Knostman, vice president; Gladys Ritts, secretary-treasurer.

COX-ROOSEVELT CLUB ORGANIZES

HOLD FIRST PUBLIC MEETING
TONIGHT IN F2

Dr. C. O. LaShelle and R. C. Spratt to Speak—Accept Debate Challenge of Republican Club

At 7 o'clock this evening in F2 the K. S. A. C. Cox-Roosevelt club will give its first public program. Dr. C. O. LaShelle of Manhattan will speak on some phase of the League of Nations, and R. C. Spratt, a sophomore in engineering who was with the 110th engineers, A. E. F., will also talk. Arrangements have been made for a second public meeting Thursday evening. Some prominent speaker will be on the program.

The K. S. A. C. Cox-Roosevelt club was recently formed by the Democrats in the college, and a thorough organization worked out with the following officers: president, D. L. Signor; vice president, S. D. Capper; secretary-treasurer, Miss Mary Frances Davis.

The purpose of the Cox-Roosevelt club is to put the real issues of the present campaign before the student body. The absent voters law makes it possible for any one to vote and send the ballot to the county clerk of his or her home county to be counted.

The Democrats have decided to accept the Republican club's challenge to debate, and committees are now making the necessary arrangements. Several have expressed the opinion that at a political meeting only one side of the question is given. This debate will give both sides. Watch the bulletin board for particulars.

MOWRY ELECTED SENIOR ADONIS

VOTED AS BEST LOOKING SENIOR ENGINEER

Honor Carries With It Job of Erasing K. U. Signs from Sidewalks

Last Thursday the engineers elected R. D. Mowry as the best looking senior engineer in the college. The honor also carried with it the job of erasing the conspicuous signs, that the K. U. men painted on the college campus entrances and on the steps leading east from the auditorium.

Last year just before the K. U.-Aggie football game a few K. U. students came to Manhattan and placed a number of inartistic signs upon the campus sidewalks. In the engineering seminar last Thursday it was suggested that since it was almost time for the K. U. game the signs ought to be erased. R. D. Mowry immediately made the motion that they elect the best looking engineer in the senior class to do the job.

Mowry nominated A. H. Brewer for the position. Brewer retailed by nominating Mowry. The election resulted in Mowry being elected by an almost unanimous choice. The signs were removed Thursday night.

Captain Reyburn Entertains Company C

Captain Reyburn entertained company C last Wednesday evening with a smoker at the Women's American League building at Ninth and Poyntz. Talks were made by Major F. B. Terrill, Major Chaplin, and Captain Reyburn.

These company "get together" events are being encouraged by the military department as a means of making the students better acquainted with the department and with each other.

AGGIES SCORE THREE POINTS CREIGHTON 0

POOR GENERALSHIP LOSES CHANCES TO SCORE

AGS OUTGAIN OMAHANS 3 TO 1

Coach Bachman Is Pointing His Team for K. U. Battle—Secret Practice All Week

The Aggies came back from Creighton with the scalp of the Omaha school dangling at their belts. However, they did a very poor job of collecting that scalp, outgaining the Creighton team 3 to 1 from line of scrimmage, and making 18 first downs to the 3 first-and-tens that the Creighton eleven managed to gain. With all the superiority in play indicated in the yardage and downs figured the Aggies had to be satisfied with a 3-0 victory gained by the toe of Dewey Huston in the last minute of play.

The score of the Aggie team was due in large part to poor generalship. When the Wildcats worked the ball down the field to striking distance of the Creighton goal with a series of plunges and off tackle smashes that tore through the Omaha line for a succession of three first downs the play was suddenly changed to a trial at end runs with the result that Aggie backs were thrown for two ten yard losses and Huston was forced to kick out of danger.

Only once was the Aggie goal even threatened by the Creighton men. In the second quarter Hinds playing safety let a punt roll thinking it would go across the goal. Instead it stopped on the Aggies' 4 yard line. On the next play Huston punted out of danger. At no other time was the ball past the Aggie 40 yard line.

Sears was the most consistent gainer for the Ahearn men through the line. Warren Cowell gained more yardage around the ends than any of the other backs. Randall who started at right halfback was thrown and his back badly twisted in the third quarter of the game. His injury is not serious enough to keep him out of the game this week, however. No other injuries were suffered in the game, but Marshall who played at left guard in the Creighton game and who has been a regular at the guard position will probably be out of the game for the rest of the season. The big Texan has a bad charley horse that was not helped any by his participation in the Creighton game.

The Aggie hospital list is assuming alarming proportions as the four Missouri Valley games on the schedule approach. Besides Marshall, who will probably not be able to play at all, there are Winter whose broken foot will not be knit before the Oklahoma game at the earliest, Everett Cowell, who may be able to play in the K. U. game, and Cleland with a bad elbow that will keep him out of the next two games.

The seat sale for the contest with the University of Kansas next Saturday is going rapidly and all indications point to a record crowd. The Kay U. rosters are planning on a special train to carry them down to see what they are confident will be a walkaway for the Jayhawk aggregation.

However, the school down the Kaw may meet with an upset of the dope next week end. The Aggie team played together better in the Creighton game than it has so far this season. The Wildcats have yet to develop a scoring punch however. The team that makes 18 first downs to the enemy's 3 and still fails to score a touchdown lacks much of having its attack perfected.

Coach Bachman is doing his best to perfect the offensive play of his team this week. He requests that the students stay away from practice during the remainder of the week as they will have to be requested to leave should they come. Secret practice with the freshmen drilled in the K. U. plays will be held.

Green Travels Over State

R. M. Green, associate professor of agricultural economics, left recently for Hodgeman, and Barton counties where he will do some work in connection with the marketing studies being made by the department. From there Professor Green expects to start on a long trip over the state stopping at Pawnee, Ford, Pratt and many other counties where he will investigate the problem of marketing wheat as well as the farm storage problem.

TUESDAY, OCTOBER 26, 1920

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Make the "Beat K. U." slogan a reality.
4. Aggies at the top of conference athletics by 1922.
5. Clean politics.
6. Greater cooperation between alumni, students, and faculty in bringing athletes to K. S. A. C.
7. Remodeling of the auditorium stage.

EVEN UNTO OUR LAST CLEAN COLLAR

"For a winning team if possible, but winning or losing, for the team always." That is the slogan of true sportmanship.

That the team will, individually and collectively, extend every effort humanly possible, to win Saturday's football contest, is a reasonable certainty. That the student body of this institution will, to a man, faithfully reflect this spirit and determination to take the measure of the K. U. machine, is also beyond question. In order that the team may receive forceful and convincing evidence of this attitude on the part of every Aggie with a single spark of loyalty, Ray Watson, cheer leader, has issued a plea for cooperation with the team in the form of more concerted and effective yelling during the battle.

The Jayhawker aggregation has been playing a strong game, and in locking horns with them, the Aggies will meet real opposition, with the dope favoring the visitors. But dope is notorious for being unreliable.

If the Aggies win, our enthusiasm will know no bounds. The players will receive from the worshipping fans the praise and homage which is justly due them. They can have the town, our girl, and our last clean collar. We will be for them stronger than horseradish. And the team will appreciate this spirit. But if our men lose, after every man has given to the team in the fight the best that he has, we will still be just as strong for them. There will be no petty-minded faultfinding or criticism of their playing. We will let the coach do the criticising; his criticism will be constructive, ours would only be destructive.

MANNERS—WHERE ARE THEY?

Manners at K. S. A. C.—are they becoming microscopic, or aren't they back from vacation yet?

Wherever they may be or whatever may be the reason for their absence, manners do not seem to be particularly in evidence this fall. Almost every student in college needs to watch his manners more closely and observe the ordinary courtesies of everyday life.

For example an instructor recently came into class and stood for five minutes until the various private conversations had been completed before the roll could be called. We, as students, expect a certain amount of courtesy from our instructors, yet we do not expect to return the courtesy.

Through Anderson hall we rush without regard for the person into whom we may bump. Everyone seems to have the motto, "Everyone for himself and the devil take the hindmost." Some men even forget the little courtesies due to the women whom they meet. The women also forget to acknowledge a courtesy when it is given.

A foreigner in speaking of the American class distinction made the remark, "In America every boy is born a gentleman and every girl a lady." As college students it is our duty to live up to such a description. When we were children most of us had the fundamentals of good manners drilled into or beaten into us by means of "Ye old peach sapling." Let us not forget those things now even though we are no longer threatened with chastisement should our memory prove slack.

GET OFF!—THE HOSPITAL'S FULL

The great American sport of riding bicycles on the sidewalk is becoming a real danger at K. S. A. C. All of the students riding wheels seem to prefer to attempt running over students on the sidewalk rather than take the chance of being run down themselves by automobiles.

While the automobile casualties in Manhattan have been rather alarming lately, they offer no excuse for piling up on bicycle casualties. The unoffending student walking down the hill from Anderson is disconcerted to say the least when a bicycle speed demon whizzes by, and should the disconcerted pedestrian chance to sidestep just as the rider comes up behind, the consequences might prove serious.

Just because you prefer the sidewalks to the paved road is no excuse for endangering the life, limbs, and peace of mind of your fellow students. If you're scared to ride in the road—the walking's fine.

DO YOUR DUTY!

One week from today the doors of the polling places will be thrown open and all loyal American citizens will go to respective precincts and cast their ballots. There is no doubt but that the heaviest vote in history will be cast this year.

It is the duty of every college student, who is of lawful age, to vote on November 2. The soldier who said that his one bullet would not win the war was called a traitor; the citizen who says his vote will not win the election is a slacker, for he is shirking his duty by failing to select those persons whom he feels will work for the best interest of American policies.

Through the efforts of the K. S. A. C. Republican club arrangements have been made with the Manhattan city clerk whereby all Aggies may vote in the polling place of ward three, in the Y. M. C. A. building. Under the absent voters' law, a person who is not in his home precinct, may cast his vote at any polling place and then have his ballot mailed home. But it will save much time and trouble if all Aggie students will cast their vote at the Y. M. C. A.

The Aggie Republicans have adopted the slogan "Vote before noon next Tuesday."

HAVE ANOTHER WORLD FORUM

MEETING TO BE HELD HERE
FEBRUARY 18-20

Ministerial Union Influenced to Have
Forum by Last Year's
Success

The success of the World Forum last year has influenced the ministerial union in connection with the Y. M. C. A. and Y. W. C. A. to have another Forum here this year on February 18, 19, and 20.

Speaking of the Forum last year, Bishop McConnel who was one of the main speakers of the convention, said, "I never have seen a school in which the students, the faculty, and the townspeople cooperated so wholeheartedly in putting across any movement of this kind as at K. S. A. C."

The World Forum last year had men from all parts of the world, many of them with wide experience in agricultural work, and men who knew world conditions, as speakers at the convention. The purpose of the Forum was to bring before the students the opportunities of all parts of the world, especially the opportunities for service.

The same general plan will be followed this year and with favorable weather conditions it is confidently expected that the Forum will be an even greater success than it was last year.

WOULD-BE CAR THIEVES ARE FOUL BY MAJOR TERRILL

College Military Man Shoots from Upstairs Window as Men Tamper with Tire

Two well dressed young men attempted to steal a tire from Major Terrill's car while it was sitting in front of his house at the corner of Ninth and Houston streets one evening last week.

Major Terrill heard them fooling with the car and from an upstairs window told them to quit and threatened to shoot if they moved. One of them started and the Major shot and hit him, but before Major Terrill could get down stairs they made their escape. The police were summoned but the robbers made good their getaway.

"Y" PROGRAM FOR BOYS' WORK IS LARGEST IN TEN YEARS

Ivan H. Riley Is in Charge of the Work

The program of Boys' Work adapted by the College "Y" comprises what the local commercial club calls "the biggest plan for reaching boys attempted in Manhattan in the last 10 years."

The plans for the work will operate through the various churches, civic organizations and the high school "Y." Each of these organizations together with the chamber of commerce and the Rotary club will elect one member to the executive council, which in turn will have charge of all boys' activities. Ivan H. Riley is in charge of the work.

The purpose of this movement is to promote intellectual, moral, physical, and spiritual development among the boys of Manhattan, and to unify the work of all organizations that have boys at heart.

Prof. H. W. Cave was in Hutchinson last week where he attended the meeting of the Kansas Holstein-Friesian association.

P. C. McGilliard went to Topeka Tuesday to attend a Holstein cattle sale near that city.

John Moore, a junior in animal husbandry, returned to Manhattan last week from Kansas City where he operated on for appendicitis. From there Moore went to his home in the western part of the state for recuperation. He will return to K. S. A. C. within a few weeks and resume his work here.

Dr. George Dean, '16, is spending a few days visiting friends in Manhattan. Until recently he was a major in the veterinary corps, having enlisted in March, 1916, as a second lieutenant. During the war Doctor Dean held the highest rank of any graduate veterinarian of this college.

Miss Lorena Taylor, '14, has been appointed assistant literary editor of the Osteoblast, the year book for the American school of osteopathy at Kirksville, Mo. Harry Merner, a student here during the years of '15 and '16, has been appointed as sales manager of the magazine.

The roof of the main wing of Anderson hall is undergoing some much needed repairs. New cornices are being put on, and the old rotted gutters replaced. Some of the stone work is also being worked over.

Professors' Faith in Teachings Shown By Faculty Kids Enrolment

Proof that our faculty has a deep and abiding faith in its teaching capacities, lies in the unusual number of faculty offsprings or connections in attendance at this institution. It is easily reported that some faculty fathers and uncles have the herculean job of passing on the concentrated brain food to their own little Percys and Adelaides. Hear the modest little coed saying, "What's the assignment, uncle Dick?" or, "Pop, you just got to quit giving us such awful lessons."

Some of the faculties-in-law and other connections follow: Allan Daly, nephew of Prof. H. W. Davis; Ernest Reichart, cousin of Prof. L. C. Melchers; Reid Machir, nephew of Miss Jessie Machir; Miss Humphrey, niece of Professor Lippincott; Alice Stewart, niece of Pres. W. M. Jardine; Elizabeth Dickens, daughter of Prof. Albert Dickens; Esther Andrews, daughter of Prof. W. H. Andrews; and Pauline Keith, niece of Professors E. T. Keith and E. B. Keith.

MAY GET HOOVER TO SPEAK HERE

PRESIDENT NOW NEGOTIATING
TO SECURE SPEAKER

President W. M. Jardine is negotiating to secure the services of Herbert Hoover as a leading attraction at Farm and Home week, which has been scheduled for February 7 to 12. A number of recognized authorities on subjects of especial interest to rural Kansas have been secured to give addresses.

One feature, a decided innovation, will be Newspaper day. Prizes are to be awarded to the newspaper exhibited having the best front page, and to the one having the best write up of Farm and Home week. A room will be devoted to the exhibit, and competent judges will be secured from among the newspaper men of Kansas and other states.

A well planned publicity campaign has been organized, and attractive Farm and Home week stationery is now in use. The stationery symbolizes the Kansas sunflower, with agricultural hall as the center and the departments of the college as petals.

It is the determination of Thomas J. Talbert, director of institutes and demonstration, and his assistant, Mabel Caldwell, to make the entire session the biggest and best of any that has ever been held.

St. Cecilia club has a larger enrolment this term than every before in its history.

The carpenter shops recently built a portable garage for F. N. Seaton, editor of the Manhattan Mercury.

R. T. Challenger, '08, who has been with the Montana State college since 1909 has been granted a year's leave of absence and is taking advanced work in machine design at Berkeley, Cal.

SCHOOL MA'AMS WILL ATTEND STATE MEETING THIS WEEK

Many Schools Pay Railway Fares of
Their Teachers While Others Pay
a Bonus

Practically every high school in the state will close its doors on Thursday and Friday of this week in order that the "school ma'ams" may attend the Kansas State Teachers' conventions on October 27, 28, and 29.

Emporia has voted to pay the round trip railway fare of all of its teachers to the Topeka meeting. Jewell City will pay its teachers a bonus of \$10 each for attending the meetings, and Norton will pay a \$20 bonus. Kansas City, Wichita, Pittsburg, Atchison, Fort Scott, Arkansas City, Newton, Chanute, Lawrence, and Ottawa are among the larger cities that have reported a 100 per cent enrolment for these meetings. From the rural schools a heavy enrolment is reported from every county in Kansas.

Last year the Kansas State Teachers' association was held at Topeka, Wichita, Pittsburg, and Salina, and the total number attending the four meetings was 12,927. This year the officers of the K. S. T. A. are expecting the attendance to exceed 15,000.

RALPH JENKINS HEADS FRESHIES

MAUDE WHITEHEAD IS VICE PRESIDENT

Joe Quinn and Ralph Muir Tie for Marshal—Only 254 Freshmen Vote

Ralph Jenkins was elected president of the freshman class at the election held on Monday, October 18, receiving 119 votes out of a total of 254 votes cast for the presidency. Frank L. Howard came in a close second for the office with 112 votes.

The other officers elected are as follows: vice president, Maude Whitehead; secretary, Francis Godden; treasurer, Bert Swartz; devotional leader, Marie Correll. Joe Quinn and Ralph Muir tied for marshal with 117 votes; S. S. G. A. representatives, Pat Muse, and Burton Colburn; parliamentarian, J. J. Madison; athletic director, A. R. Stark; historian, Mary E. Henderson.

The fact that only 250 to 260 votes were cast out of nearly 800 freshman illustrates the gross disinterest of the majority of the class in affairs that directly concern them.

Dislocated Eyebrow Club Now Starting Among Aggie Folks

Have you joined the royal order of the Dislocated Eyebrow club? If you haven't you are losing out on one of the most popular, most noble, and most loyal organizations ever connected with K. S. A. C.

But maybe you have not heard about it. The club is yet in its embryonic stage but every day sees its ranks increased in magnitude. According to the president of the new order the prerequisites for membership are extremely limited. In fact the organization is democracy itself. Whether you be man or woman, freshman or senior, married or unmarried you are eligible with this one proviso: you must be able to sprout or cause to be sprouted on the upper side of the paramount facial aperture one of those pubescent structures, which are always the label of the second lieutenant and the villain, and which in the words of the populace are known as the dislocated eyebrow or the common old fashioned mustache stripped down.

According to the little purple ticket book there is to be a foot ball game here October 30 with our sister institution down the river. Someone has said that the Wildcats hope to garner for themselves more scores that day than their visitors, and it is with the purpose of fostering that idea that the club is being promoted.

Anyone with the foregoing qualifications may join at any time by seeing one of the charter members and having the official vow, which runs something like this, administered:

"I, John Doe, do hereby solemnly promise that upon failure of our most honored aggregation of Wildcats to, upon the thirtieth day of October, this year of our Lord, nineteen hundred and twenty, secure from the Jay-hawkers the long end of the score, I, John Doe, do solemnly promise to for a period of not less than 30 days, grow or cause to be grown upon my being a mustache."

Press Club To Have Party

The Aggie Press club held its regular meeting Monday evening at seminar period and discussed plans for the first social function of the year, which is to be held some time in the latter part of November or the first part of December. The following committee was appointed to make plans for the function: Miss Elizabeth

Dickens, Chairman; Miss Edith Haines, Donald Ballou, and C. R. Smith.

Attend National Conferences

H. Umberger, dean of extension, and Walter Burr, director of rural service in that division, attended national conferences at Springfield, Mass., last week. At a recent meeting of the state board of administration they were appointed delegates to the Association of Land Grant colleges, and Mr. Burr to the American Country Life association.

"Ain't It the Limit" The Things Society Editors Will Say?

Two sweet young things decided that they would get married and the writeup of the wedding was the finishing touch to the tragedy. Details of the story will be eliminated for the sake of brevity but you must hear what was said about the better half of the deal.

"The bride was beautifully gowned in a dress of white georgette crepe with a white picturesque hat, while the groom looked his best in a pretty suit of dark green.

"The witnesses were Miss Anna and Mr. Joseph Smith, sisters of the groom. The former was very beautiful in a gown of tan georgette crepe with a pink picturesque hat while the bridesmaid was quite himself in a suit of dark brown.

After the wedding itself everybody was treated royally with the wedding breakfast, only the family being present."

The close of the story included the editorial good wishes for a long and happy life in the holy bonds of wedlock.

Rural Service Is New Publication

An interesting publication has been added to the list of those put out by the college printing department. It is entitled Rural Service and is full of terse items telling of progressive activities that have been put on by schools, churches, and other community organizations in various parts of Kansas during the last few weeks. This is to be a monthly publication during the season of the school year. As its name suggests, it is being issued by the Rural Service department.

Bundy To State Journal

V. E. Bundy, who for the past year has been editor of the Chronicle has accepted a position on the Topeka State Journal and began his work there last week. He will cover the legislature when it is in session, and until then will cover the chamber of commerce. Bundy graduated from the industrial journalism course at K. S. A. C. last spring, and is well known among both town and college people. His work on the Chronicle will be taken over by Miss Elizabeth Dickens, junior in the industrial journalism course.

GIRLS PLANNING FOR K. U. GAME

WILL WORK OUT LINE OF ACTION TUESDAY

Meeting to Be Held at 4 O'clock Tuesday in H. E. Rest Room

Plans for the girl students' part in the pep meeting held annually before the K. U.-Aggie game will be perfected at a meeting of every girl in college which will be held in the H. E. Rest room this afternoon at 4 o'clock. At that time Miss Grace Hesse, faculty advisor for the Girls' Loyalty league, under whose auspices the pre-pep meeting is being held, will meet with the girls to help them work out a line of action to be followed by the Aggie girls as their part of the pep proceedings.

Every girl who is a loyal Aggie should be at that meeting without fail. She should come with snappy ideas for the pep meeting and ideas which can be worked out on the day of the great game. Heretofore the girls' part in the K. U.-Aggie game has been more or less heartless but due to the insistent efforts of the League members last year more spirit was shown, and it is hoped that even a greater demonstration may be manifested this year.

The girls need a good strong cheer leader, one who can create enthusiasm and make the girls work. Come to the meeting on October 26 with suggestions as to who you think will fill this bill. All suggestions as to ways and means through which girl students can work constructively to back the team will be appreciated by the Loyalty league. Reserved seat tickets will be given out to the girls at the meeting.

Mr. Latshaw has returned from West Virginia, where he was called by the Grisella Chemical company as an expert witness in a damage suit in which the farmers of the vicinity claimed that poisonous fumes of the plant were destroying a large part of their crops.

W. E. Grimes of the department of agricultural economics, was in Marion last week where he did some work in connection with the tenancy studies being done there.

Ninety five tests of wheat are being made by the milling department in order to determine the chemical composition of the new crop.

Prof. H. H. King has been unable to meet his classes the last few days on account of the serious illness of Mrs. King, who underwent an operation last week. It is reported that she is doing as well as could be expected.

Barber County Club Elects

Barber County club held a meeting in F2 Tuesday evening and elected the following officers: president, Bly Ewalt; vice president, R. S. Circle; secretary-treasurer, Curtis Brown; marshal, Louis Knight. The club decided to send the Collegian to every high school in the county and pledged itself to do everything in its power to bring Barber county students to K. S. A. C. Later in the semester the club expects to have a social event.

WATSON WINS CROSS COUNTRY

KUYKENDALL SECOND MAN GIVES
WINNER A CLOSE RACE

Choose Team to Meet K. U. from
First Ten Men in Saturday's
Race

The cross country run held last Saturday for the purpose of picking the team for the run against the University of Kansas team next Saturday was won by Ray Watson in the remarkable time of 4 minutes 24 4-5 seconds. Ray started five minutes after the first man left the mark and a full minute after all the other athletes had started on the five mile grind. Ray wins the cup offered to the winner of the run.

Kuykendall was second man in, giving Watson a close race to the field where Ray drew away from him. Matthias followed the leaders at about 200 yards for a third. Both Kuykendall and Matthias will be awarded cups. The first six to finish were the three leaders named and Henri, Stotts, and Clapp.

The team for the October 30 run with K. U. will be chosen from the ten leaders in the race. Six men will compose the team and the first five men in will count in the scoring.

We are prepared to take that Xmas picture. Come early to avoid confusion. New location 1101 Moro. Studio Royal.

SOCIETY

Delta Delta Delta have pledged
Miss Etta Conroy.

Sigma Phi Epsilon held open
house from 6:30 to 8 o'clock Tues-
day night for the faculty. About 60
were invited.

Prof. R. W. Conover was a dinner
guest at the Sigma Phi Epsilon house
Wednesday evening.

Sigma Phi Epsilon held open
house for all the fraternities Thurs-
day evening from 6:30 to 8 o'clock.

Iota Psi was entertained at the
home of Mrs. N. W. Kimball, 800
Huston, Sunday evening at a buffet
supper.

Phi Delta Tau have pledged Mr.
Joe Welter of Coffeyville and Mr. Will
Hornish of Pratt.

The 12 members of the Labette
county club hiked out to Bluemont
Friday evening where they had a
wienie roast. Mr. and Mrs. Bickford,
members of the club, were chaper-
ones.

More than 50 members and guests
of the Elkhart club hiked to Hack-
berry Glen Friday evening. Story
telling and singing helped to make
the affair enjoyable. The hike was
chaperoned by Miss Mary M. Mc-
Donald.

Athenian literary society held its
regular meeting Saturday. The pro-
gram consisted of impromptu num-
bers, and a debate on the leading
political issues of the present cam-
paign. The debate was followed by
a business meeting and extempor-
aneous speeches. A joint meeting with
the Browning society was voted to
be held next Saturday evening.

Kappa Phi Alpha fraternity gave
a house dance last Friday evening
at their fraternity home. The music
was furnished by a three-piece or-
chestra. The dance was chaperoned
by Mrs. Alice Marcotte. The house
was artistically decorated with the
fraternity colors, brown and old
gold.

The members of the Men's Pan-
Hellenic will hold a smoker next
Wednesday evening from 7:30 to 10
o'clock in the Elk's hall for all frater-
nity men of the college. This
smoker is to be a general mixer and
get-acquainted affair. Speeches will
be made by Pres. W. M. Jardine and
Prof. J. E. Kammeyer.

The marriage of Miss Aileen C.
Neusbaum and Mr. Loy Tabor took
place at the bride's home at 212 S.
Seventeenth street Wednesday after-
noon at 3 o'clock. The Rev. Lewis
Jacobsen of the Baptist church of-
ficiated. After the ceremony which
was attended by only the relatives
and a few friends, the bride and
groom left for Kansas City, Mo., where
they will make their home. The
bride has been employed for the past
two years as clerk in the K. S. A. C.
printing department. The groom was
a student in engineering here last
year. He is now cashier for the
Shultz Baking company in Kansas
City, Mo.

Miss Rae Frank and Miss Martha
Frank were hostesses Thursday even-
ing at an informal dancing party given
in honor of Miss Elsie Denniston. Lun-
cheon was served to Miss Ardis Atkins,
Miss Helen Thayer, Miss Eva Ditt-
mar, Miss Frances Johnstone, Miss
Grace Sachau, Miss Mildred McKee,
Miss Dorothy Dugan, Miss Garnett
Westbrook, Miss Jeanette Sleeper and
Miss Lillian O'Brien.

Miss Elsie Denniston and Mr. J.
Dwight Smith of Omaha, Nebr., were
married Saturday at 11:30 o'clock
at the home of the bride's parents,
Mr. and Mrs. R. E. Denniston, 811
Osage. The Rev. J. M. McClelland
officiated. After the ceremony a
four-course luncheon was served.
Red and white carnations were used
in the decorations. Out of town
guests were Mr. Tom Neely of Abi-
lene and Mr. Edward Winterton of
Omaha, Nebr. Mr. and Mrs. Smith
left Saturday afternoon in their car
for Omaha, where they will make
their home. Mrs. Smith has attended
college here. Mr. Smith was a fresh-
man in college here last year and is
a member of the Pi Kappa Alpha
fraternity.

Miss Clara Larson of Topeka, and
Mr. William Mackender were mar-
ried Thursday evening at the home
of Mr. and Mrs. William Quail, in
Topeka. The service was read by
Dr. Charles M. Sheldon. Miss Lil-
lian Larson, sister of the bride, was

maid of honor and Mr. Burton Quan-
tic of Riley, was best man. Both
Mr. and Mrs. Mackender attended
college here last year. The bride
was a student in the department of
music at Washburn previous to her
attendance here. The couple left

Thursday evening for Riley, where
they will make their home.

GAME CALLED AT 2:30

ADMISSION \$1.50

RESERVED SEATS 50c

A Scheme to Increase Taxes

Three amendments to the Constitution of Kansas will come before
the people November 2 for their approval or rejection, in sub-
stance as follows:

- 1.—To saddle on the public an additional burden of
debt for hard surface roads.
- 2.—To enable the State to engage in the real estate
business by purchasing a large area of land for
cash and selling it on the installment plan.
- 3.—To provide for a reclassification of property
which would bring the question of taxation wholly
within the realm of politics, thus affording the
best politicians opportunity to give advantages
to the interests they especially represent.

Both Parties Turned It Down

The backers of this three-way proposition to boost taxes urged
the Republican and Democratic party councils to endorse it in
their platforms, but after giving the subject careful consideration
both councils declined to do so.

The Kansas Taxpayers' League, made up of citizens in every
part of the State, who actually pay taxes, earnestly recommend
to their fellow taxpayers that they vote against the three amend-
ments proposed, which, if accepted, would mean the expenditure
of millions upon millions of dollars on visionary projects put
forth by men who expect to obtain profitable employment on the
innumerable boards, or in the offices which would be created.

HAVE A. T. O. INSTALLATION

HOLD SERVICES FOR DELTA
THETA CHAPTER LAST WEEK

Thirty One Men Initiated—Fratern-
ity Founded in 1865 at Virginia
Military Institute

Installation services for Kansas
Delta Theta chapter of Alpha Tau
Omega fraternity were held on Fri-
day and Saturday at the chapter
house, 1642 Fairchild.

Initiation services for the individ-
ual members began Friday morning
and were completed Saturday after-
noon under the supervision of Ralph
E. Weaverling of Lincoln, Nebr., chief
of Province Three of the fratern-
ity. Formal installation ceremon-
ies for the chapter and installation
of the officers were held after the
installation banquet at the Gillett
Saturday night.

Alpha Tau Omega was founded in
1865 at the Virginia Military Insti-
tute by a group of men who had
seen service in the confederacy, for
the purpose of bringing about, as
much as possible in a fraternal way,
a closer bond of union between the
north and the south. Since its in-
ception the fraternity has consistent-
ly carried out these policies until
today the chapters are scattered
throughout the north as well as the
south. Alpha Tau Omega was the
first fraternity in the United States
to become incorporated.

To date there are approximately
16,000 members in the fraternity
with 73 chapter houses. In this pro-
vince there are chapters at Wyom-
ing, Colorado, Colorado Agricultur-
al college, Nebraska, Missouri, Kan-
sas, and K. S. A. C. Thomas A.
Clark, dean of men at the Univers-
ity of Illinois and greatest author-
ity on undergraduate life in Ameri-
ca, is Worthy Grand Chief of the
fraternity.

The men initiated at this time
number 31. Active members:
Worthy Master E. D. McCollum,
Walter J. Rogers, E. Leo Bobb, Carl
F. Mershon, Robert S. Love, Char-
les Nitcher, Philip Woodbury, Ray
B. Watson, Charles R. Smith, Lau-
rence H. Reyburn, Walter T. Rolfe,
M. R. Getty, Leroy M. Lietter, Chas.
C. McPherson, W. R. Horlacher, J.
F. Brown, C. Morton Rust, Paul Ko-
var, Morton Stigers, Perry J. Her-
shey, Lorin Moore, and Ralph Mur-
ray. Inactive members: James B.
Angle, Carl J. Rodewald, Bruce C.
Hutchins, Ira Freeman, A. W. Wil-
cox, Thomas Lee, and Otto R. Col-
burn. Faculty members: Gabe Sel-
lars and P. J. Newman.

The pledges of the fraternity are
N. D. Ziegler, D. S. Hall, Newell
Moore, Ernest B. Johnson, Paul E.
Smith, Brom Hixon, Bruce A. Ro-
gers, Allyn Laybourn, Raub R.
Snyder, and Ernest F. Guyer.

K. U. EXPECTS BATTLE ROYAL ON SATURDAY

COACHES CONCEDE AGGIES GOAL FROM DROP KICK

KANSANS IN GOOD CONDITION

Use Almost Entire New Team From One Played With Ames—Jayhawkers Not Over Confident

HIS OUIJA KNOWS

"There is only one thing that will win. Fight is the answer. The question is who has the most of it. My ouija will tell."—Telegram received today from Forrest C. Allen, director of athletics at the University of Kansas.

By CAP. GARVIN
Sport Editor of Daily Kansan
Lawrence, Kans., Oct. 27.—When the Kansas eleven goes against the Aggies Saturday afternoon, they will go into what they consider one of their hardest games of the season. Head Coach Dr. F. C. Allen has been drilling his men this week on breaking up some of the Aggie plays he has gleaned from games this season. Both the coaches and men realize though that the Farmers are holding something up their sleeves; just what this is no one seems to know.

Concede Drop Kick To Aggies
In discussing the chances of a victory, neither Coach Allen nor Laslett would give a whole lot of encouragement. They will nearly concede Manhattan a goal from drop kick, consequently are putting in overtime with the offensive of the Kansas plays. "An overwhelming score such as the 1904 victory is not to be thought of," said Doctor Allen.

Kansas Players In Condition
Kansas players for the most part are in condition for the game Saturday.

CAPTAIN NETTLES, K. U.

day. There were no serious results from the Ames game. The Jayhawkers realize they are playing on Manhattan territory and against that wonderful Aggie fighting spirit.

Reports from Manhattan to the effect that four of the Aggie stars are on the light duty roster, does not make Kansas any more confident of the Saturday chances.

Coach Allen was using nearly an entire new team from the one that played Ames last week. McAdams and Allison in the backfield, with Johnson playing full with them. In the line Bell, Davidson, Fraker, and Hale are the new men. Whether these men will be started Saturday is not known. They have been working all week in the new positions.

Summing the whole situation up, Kansas has the fightingest team they have had in years, and it is this fight that they are depending on for Saturday's game.

The men who will make the trip and the positions they play: Reid and Ivy, lb; Nettles and Davidson, lt; Fraker and Godlove, lg; Hale and Saunders, c; Smith and Higgins, rg; Jones and Sandefur, rt; Bell and McDonald, re; Bunn and Lohborg, qb; Simon and Mandeville, rh; Little and Allison, lh; Welch and Spurgeson, fb.

Brakemen Are Unreasonable
Several Sigma Nu men went to K. U. last Saturday to the Ames-K. U. game. The expenses of the trip amounted to about 80 cents. Some brakemen are unreasonable.

COACH F. C. ALLEN, K. U.

TO PRESENT POP STUNTS TUESDAY

COMMITTEE TO CHOOSE SEVEN BEST IDEAS

All Organizations Eligible For Try-outs—Gladys Bushong is Chairman of Pop Committee

Try-outs for the Aggie Pop night will be held from 2 to 4 o'clock next Tuesday afternoon, November 2, in K58.

Each organization expecting to enter the contest must choose one of its members to outline the plans of its stunt before the committee, of which Miss Gladys Bushong is chairman. Each presentation should be as clear and brief as possible, as ten minutes is the limit of time allowed. The committee will choose the seven best stunts to be presented on Pop night.

All organizations are eligible for the try-outs. Miss Dean believes there is an increase of interest being shown this year, especially among the men's fraternities and societies.

Mrs. Charles Helstrom and daughter, Ruth, of McPherson, came Wednesday for a visit with Miss Beulah Helstrom, who is attending college.

GRAND OLD MAN OF AGGIE ATHLETICS JUST SMILES AND REMEMBERS 1906

"Who is Colonel Brady?"

If this question were included in the psychology tests through which Aggie freshmen live and crib and suffer, even the greenest freshman would score 100 per cent plus. For even the most backward "purple cap" knows Colonel Brady as the grand old man of Aggie athletics, and realizes that it is Colonel Brady and Huston's toe that have made the Aggie athletics famous throughout the Valley.

And Colonel Brady has been in Kansas long enough to know a real football team when he sees it, too, for he came to Manhattan in 1870 and has stuck around here ever since. So when the Colonel admits that "we've got a pretty good team this year" it means a lot even though he refuses to forecast the outcome of the game.

When Colonel Brady hit Manhattan there just naturally wasn't much of a college here—let alone a football team. K. S. A. C. was in its embryonic Blumont stage at that time, being situated west of the present site. Since the college has grown up and developed a real sure enough football team, the boys have no more enthusiastic supporter than Colonel Brady, who is out on the side lines every night to watch practice and help in any way he can.

The year 1906 is, for some reason or other, a favorite year of Colonel Brady's and he loves to dwell on the main football event of that season. The wild condition of the town on the night after the big game, and

the dizzy heights to which players rose on the shoulders of friends are still vivid in his memory. The success of the team Dr. Brady attributes to the fact that there was no individual stalling, every player endeavoring himself for the greater good of the team.

Every football captain since 1906 has had his eye on Colonel Brady's cane. After the K. U. game in which the K. U. jinx was cracked Colonel Brady picked up a cane wrapped with Aggie colors which someone, in his excitement, had left on the field. As no one claimed the cane, Colonel Brady presented it to the athletic department to be held in trust for the next captain of a team that beat K. U.

For 14 years the cane has hung in the athletic office and the old relic was beginning to look a little rusty. Ribbons needed pressing, and all that, you know. And now the cane has disappeared. Nobody seems to be worrying about it, though. Mike just grins, and Coach Bachman, quite per usual "isn't putting out any bear stories" but around in athletic circles they're whispering that the old stick is being "slicked up." Ike Gatz is mighty particular you know—and this year being his last year he wants the trophy looking nice and span when—but that's telling.

Anyhow it's reassuring to remember that Mike had charge of athletics when they found the cane—and now Mike's come back, and—but if you could see Colonel Brady's smile you'd understand.

POLITICAL CLUBS HAVE DEBATE MONDAY EVENING

Question is "Whether Or Not There Should Be a Change of Administration"

Monday night at the Democrat-Republican debate will be the last chance for K. S. A. C. politicians to get the latest political dope before they cast their vote Tuesday.

The debate is to be held at the Y. building, and will be called at 7:30 o'clock. Dr. Kammeyer will

preside. The question to be debated is "Whether or not We Should Have a Change of Administration." The affirmative is taken by Miss Christine Cool, Alfred Huesner, and Tom Hampson. The negative side will be debated by Charles Howard, Arnold England, and J. Wheeler Barger.

President W. M. Jardine left Thursday evening for Topeka to attend the State Teachers' association. President Jardine gave a talk today relative to the teaching of agriculture before the Agricultural Round Table, which is a section of the teachers' association.

News By Wireless

Wireless messages may carry the story of the Aggie-K. U. game from Manhattan back to Lawrence, if plans being worked out by Wilson Riley, a K. U. junior, are completed.

Riley plans to come to Manhattan and to obtain the use of a sending instrument here, while a receiver will be left in Lawrence to send the information throughout the student district.

A. W. Hoffman has pledged to the Acaela fraternity.

COACH C. W. BACHMAN, K. S. A. C.

WILDCAT MEN CRIPPLED FOR K. U. BATTLE

SIX FIRST STRING MEN OUT OF SATURDAY'S GAME

BACHMAN PUTS FIGHT IN WILDCATS

Hard Drills Given the Team This Week—Coach Says Aggies Will Fight Despite Injuries

Aggie Hospital List

Captain Ike Gatz	lt
Tex Marshall	lg
Ship Winter	hb
Shorty Cowell	hb
Swede Axline	qb
Shifty Cleland	c

The Wildcat is seriously crippled for his battle with the Jayhawk tomorrow. No Aggie team in history has had to go into the K. U. contest with so many first string men on the bench as will be there Saturday. The outlook for success in the weekend argument with the school down the Kaw was pretty dark at the first of the week when it was known that four of the stellar performers in the Wildcat gang would be unable to play, but the final, finishing, dark blue touch was put to the pall of gloom hanging over our prospects when Captain Ike Gatz was injured in scrimmage Tuesday night and it was found that he probably would not be able to play Saturday.

Hole On Left Flank

Ike's injury combined with that of Tex Marshall leaves a gaping hole on the left side of the line that will be hard to fill. The Aggies are none too strong in the line to meet the hard charging Jayhawkers even with the best they can muster, and a hole two men wide on the left side of the line is a severe handicap. Franz has been performing in

CAPTAIN GATZ, K. S. A. C.

Tex's place and Stauffer or Schmitz will probably team up with him on the left flank. Stauffer is big, but he lacks experience. Schmitz is a fightin' fool, but is handicapped with a pair of bad arches.

Randles and Sebring will guard the wing positions in the Kay You battle. Their playing has improved in the last two weeks since the Emporia game. That improvement is the one bright spot that relieves a trifle the all-prevailing gloom. In the backfield Hinds will start at quarter back, Yandall and Brady Cowell at the halfback positions, and Sears at fullback. Ship Winter had been depended upon to buck the heavy K. U. line, but he is definitely out for two weeks more. Everett Cowell is still warming the bench, although he may be able to play a few minutes Saturday. Axline has not recovered from the twisted neck he received in the Normal game two weeks ago.

K. U. Defense Impregnable

Close students of the games this fall are pretty well agreed that about the best the Aggies can hope for is a scoreless tie. The K. U. eleven has shown the most perfect defense in the Valley this year and probably will keep our weakened offense from scoring. The University offense lacks much of being as finished as their defense and the patched up forward wall of the Aggies may be able by a miracle to hold the Jayhawk backs.

Coach Bachman is anxious to make

(Concluded on page 8)

MIKE

PRESS CLUB TO PUT ON PARTY

WILL BE DISTINCTLY "NEWSY" IN STYLE

May Have Second Edition of Scandal Collegian — Elizabeth Dickens Chairman of Committee

An affair that promises to be one of the most unique ever given on the Hill is being planned by the members of the Aggie Press club for all journalism students enrolled in the college. Invitations are being extended to a representation of the faculty, the S. S. G. A. and the different classes, for the event which is to take place in Recreation hall Saturday evening, December 4.

A committee composed of Elizabeth Dickens, chairman; Edith Haines, Orville Bourassa, Don Ballou, and C. R. Smith is in charge of the entertainment, which is to be distinctly "newsy" in style. Reporters will be on hand, and it is rumored that a special second edition of the "Scandal Collegian" will be issued for the occasion.

Amusement will be provided for everybody. Dancing will not begin until 9:30. All students enrolled in journalism courses are urged to come, and get acquainted with their neighbors.

TO OPEN CLASS IN COLUMN CONDUCTING NEXT SEMESTER

Work Will Come under Journalism Course—H. W. Davis To Be Instructor

A column conducting class will be opened next semester by Prof. H. W. Davis of the English department providing enough students enroll in the course.

The class will study the column departments of the best papers in the country and will practice column departmental writing. Attention will also be given to the study of the humorous paragraphs of the best papers and practice given in this. The class is open to journalism students and will come under the journalism course. Several have already signed for the work.

VETS PICK C. E. SAWYER AS HEAD OF ASSOCIATION

Dr. George Dean, '16, Gives Talk to D. V. M. Association

C. E. Sawyer was elected president of the Veterinary Medical association at the first meeting held October 19. Other officers elected were E. H. Barger, vice president; K. R. Dudley, secretary; T. J. Foley, treasurer; R. J. Weinheimer, marshal; G. B. Kirkwood, assistant marshal.

The members of the board elected were seniors, H. C. Boyd and J. E. Williams; juniors, J. W. Van Vleet; sophomores, D. E. Davis. L. B. Bate was elected critic.

After the election Dr. George Dean, '16, gave an interesting talk to the association.

N. E. Dale, of the department of cooperative experiments, spent all of last week in Barber, Pratt, Kingman, and Rice counties where he inspected the harvesting of cooperative experiments with corn and sorghums.

H. H. Laude, of the department of agronomy, left last week for Marshall county where he will inspect some variety tests of corn and sorghums being conducted by the farmers in cooperation with the agronomy department of the college.

Visits Engineers' Study Classes

Floyd I. Pattison, specialist in engineering for the home study service, has returned from the study of ten Kansas cities. He visited classes of stationary engineers to give them personal instruction and assistance. The classes are made up of men engaged in practical engineering, who are working toward greater efficiency or promotion. They meet regularly for the discussion of lessons sent out in these extension courses. Questions they are unable to solve are reserved for the visit of Mr. Pattison. This is the first of a series of similar tours he will make this winter.

Long Trousers Are Not Required For Entrance At K. U.

A college man, and still in short trousers.

The University of Kansas claims the distinction of this unusual combination through the fact that Corwin Waterson, 15 years old, and a little over four feet tall, is enrolled as a member of the freshman class.

For a number of days the students of the university wondered about him, and it was left to one of the hill journalists to find his history. He was graduated last year from the Vinland high school.

Mathematically figuring, young Knickerbocker Corwin Waterson will be graduated and still have two years to reach his maturity in years. He is the youngest student in the university.

Glee Club To Give Twenty-Five Minute Cantata Soon

Will Also Give Readings, Duets, Solos and Dances

The Glee club is working on a 25 minute cantata which is to be given here sometime in the near future. Soon after the performance here the girls will go to Junction City, White City, Clay Center, and Wamego. The exact dates and the order of their appearance in these towns is not known.

In addition to the cantata the members of the club will give readings, duets, solos, and dances.

AGGIE GRADUATE GETS COST DATA

SWANSON SURVEYS WHEAT PRODUCTION COSTS IN FOUR STATES

Figures from Kansas, Missouri, Oklahoma, and Nebraska Compiled by U. S. D. A.

A. F. Swanson, '19, of the Fort Hays branch experiment station, in company with a party of four other men of the United States department of agriculture stopped at Manhattan Saturday enroute to Nebraska where they will continue their investigation of the cost of production of wheat.

The party has just completed its survey of Missouri, and reports that it found Missouri farmers willing to aid in the work, by giving freely any information the investigators requested. In this survey, which is to include Kansas, Oklahoma, Nebraska, and Missouri, the government is using what is known as the "survey" system. Under this plan one man is sent to each of the farms examined and obtains first hand from the farmer himself, the cost of all the various items connected with the production of the wheat crop.

SENIORS MUST FILL OUT APPLICATION FOR DEGREE

Notices to Be Sent to Students Having Deficiencies for Graduation

Cards were mailed out this week from the office of Miss Jessie Machir, registrar, to all seniors enrolled in the college, requesting each senior student to come to the Registrar's office, to fill out an application as candidate for a degree. Each senior must give the name of thesis subject, if any, and see that all of his credits are properly recorded on the dean's card. This card should be submitted to the dean for substitution or approval of electives.

Before the second semester assignment is made out all records are checked for graduation, and notices will be sent to students having any deficiencies for graduation.

Take advantages of our 20 per cent shoe sale now. Watson's Shoe Store.

Miss Helen Smith, Miss Gladys Newton and Miss Mildred Wright motored to Salina Saturday to attend a house party given in their honor by Mrs. Smith. They attended a dance at the Country club Saturday evening.

Gladys Ritts, senior in home economics, has returned to college after being in Topeka for nearly a week having her eyes treated. Carl Field of McPherson, has returned to Manhattan and will enter college this semester.

Dr. and Mrs. A. A. Holts were dinner guests at the Eureka club Sunday. Doctor Holts gave a short talk of interest to the boys. F. D. Farrell, dean of agriculture, spent the fore part of last week in Washington, D. C.

KANRED RESISTS RED LEAF RUST

BY CROSSING MAY ADAPT IT TO
TENNESSEE CONDITIONS

Wheat Production in Southern States
Could Be Increased by Obtain-
ing Rust Resistant Variety

Recent developments give hopes that Kanred wheat, the new variety developed by K. S. A. C. a few years ago, may be a blessing to the farmers of the United States in still another capacity.

In a letter recently received by L. E. Melchers, professor of plant pathology, news comes from the plant breeders of the University of Tennessee that Kanred has proved itself completely resistant to red leaf rust in that state. However, Kanred like the other hard red winter wheats, such as Turkey or Kharkoff, is not adapted to climatic conditions found in the eastern states and therefore cannot be grown there profitably.

The plant breeders hope that Kanred may become of potential value to that section by crossing this remarkably rust resistant variety with some of the soft red winter wheats, such as Fulcaster, which are adapted to Tennessee conditions. From such a cross agronomists think they may obtain a new rust resistant variety which will be equally as desirable as the local varieties in yield and strength of straw.

Leaf rust has been one of the chief limiting factors in wheat production in the Atlantic states, and if a highly productive rust resistant variety can be obtained, wheat production in that section will be greatly increased.

MISS NELLIE BEHNKE IS ASSISTANT TO DR. SIEVER

Has Been Working at County Hos-
pital in San Diego, Cal.

Miss Nellie Behnke is a new assistant in Dr. C. M. Siever's office. Until recently she has been working in the San Diego county hospital, San Diego, Cal.

She received her preliminary training at the Lake Shore hospital at Cleveland, Ohio. The work in the college doctor's office has increased to such an extent that it was necessary to obtain more help. During the year 1919-1920 the attendants handled 16,094 cases besides many calls at the rooms of sick students.

Scribes Think Road To Success Is Long And Hard and Lone

There's always something that takes the joy out of life. Take for instance the case of the would-be journalist. After he has trailed a choice bit of news to its lair, and finally managed to get it down on paper according to the numerous rules laid down by his instructor, he is confronted by rule number 27, "use the typewriter."

Number 27 is a splendid rule, no doubt; short, terse, to the point, and like most rules, easier said than done—on the typewriter.

The poor sophomore journalist, who has been hoarding his story for a week, unable to pluck up enough courage to use the typewriter, finally enters the editorial sanctum in Kedzie, and sits down with a nonchalant air at a machine in the rear of the room.

He inserts the paper without any difficulty, and encouraged by this piece of luck, confidently strikes the "margin release." Ye gods and little machine guns! The fiendish clatter that occurs shatters the typist's nerves and renders him senseless for the moment. The editor and the assistant editor glance around nervously. The typewriter is still tingling from the effects of the blow when the journalist recovers. He decides to let the strange keys alone and stick to the familiar letters. Bravely, yet timidly, he begins, striking each key softly with his forefinger. His copy follows:

"John sMut h: mebmmer to t he deport? ment of cibul engineering spint \$ sund ay? wit hispay runts in toPeka?."

"Oh, are you a typewriter? Won't you do mine for me?"

A fair co-ed stands besides the journalist, who mops his streaming brow and with humble pride attempts to read his story.

"Um-m, looks like you had a few typographical errors," murmurs the co-ed and departs, giggling.

Send Out Invitations

Invitations are being sent out to the alumni to attend the homecoming game November 13. In addition to the game the mixer to be held in the gymnasium the evening of the game will prove a big drawing card to the old grads. Those in charge of the homecoming program are Prof. Albert Dickens, Mrs. Elizabeth Baldwin, Karl Knaus and director Mike Ahearn.

Longfellow's Arrow Had Nothing on the Professor's Ducks

An alumnus, an ex-Aggie football star, and now a prof in the veterinary division was recently out hunting ducks and he had found them, even in greater quantities than he had anticipated. The Prof was armed with a loaded double barreled shot gun, and as the birdies took to the air he shut both eyes and blazed away. Bingo! went the weapon. In fact, it was the loudest noise he had heard or read about since the days of the great world war. In spite of the explosion the ducks were not all out of range but time was flying fast. He clawed wildly at the trigger but with no results. And then—"What in the blankety blank is the matter with this gun?"

He examined. Both shells were exploded. In his excitement he had shot off both barrels at once.

Is Called Aggieville Special

The Aggieville special is the name which the Daily Kansan has assigned to the special train which will bring the "Thundering Thousand" to Manhattan for the K. U.-Aggie game on October 30. The train leaves Lawrence about noon and will return at midnight.

S. W. Honeywell, graduate of the class of 1920 in electrical engineering, in a letter to Prof. R. J. Kloeffer tells of interesting work in the testing department of the General Electric company at Lynn, Mass., where he is taking the student apprentice course.

CO-OPERATIVE EXPERIMENTS ARE HELPFUL TO FARMERS

Work Is in Charge of H. H. Laude
of Agronomy Department

The department of agronomy through its work in cooperative experiments, in charge of H. H. Laude, is rendering the farmers of the state a practical service which ranks well with that offered by any other department of the college.

Experiments are conducted all over Kansas by this department in cooperation with the farmers of the different localities. Numerous experiments are carried on with wheat, oats, corn, barley, sorghums, potatoes, and other crops. Just now the department is conducting a total of 357 different tests.

In 65 tests conducted in various parts of the state by the agronomy department, home grown seed produced an average of 3.8 bushels per acre more than introduced seed of the same strains.

John H. Parker, professor in the department of agronomy, returned last week from Marshall, Ill., where he attended a meeting of the national officers of the Alpha Zeta fraternity. This is an honorary agricultural fraternity with chapters in 29 of the leading agricultural colleges and universities of the United States.

Miss Fay Young, '20, spent the week end at the Delta Delta Delta house.

Miss Muri Gann, '18, is teaching domestic science and art at Oscaloosa this year.

FRIDAY, OCTOBER 29, 1920

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Make the "Beat K. U." slogan a reality.
4. Aggies at the top of conference athletics by 1922.
5. Clean politics.
6. Greater cooperation between alumni, students, and faculty in bringing athletes to K. S. A. C.
7. Remodeling of the auditorium stage.

MAKE 'EM LIKE US

Did you ever go into a foreign country for purposes of a competitive nature and during your visit there have a sort of a sinking feeling because all the faces that your gaze met seemed opposing and none friendly?

If so, you have some idea of how some of the K. U. visitors may feel next Saturday if some of us fail to show them the proper courtesy.

We may be rivals during the game, but at any other time let us fraternize with the Jayhawker visitors as if they were one of the Aggie family. Let's not permit our rivalry to exist outside of sporting circles, but impress on them the fact, that though we are their athletic rivals, out of that sporting circle, we are their supporters, ever ready to root for our sister institution down the valley. Let's play the part of the courteous host to our visitors, and it's ten to one that the Lawrence folks will some time return the favor.

BACK TO ROMAN HOLIDAY STUFF

The neighbor dreamed peacefully under the soothing influence of feminine voices united in harmony. Through the moonlit forest sailed airy figures circling in perfect rhythm to the strains of invisible music. Then suddenly with the irrelevancy of dreams, the scene changed. In the pit of an ancient arena wild beasts were raging and the amphitheatre trembled with the roar of the blood thirsty lions. A volley of shots was fired and the enraged cries of the animals were mingled with the crash of falling timbers.

The dreamer sat upright, ears straining and nerves quivering. Then with a sigh, one third relief and 60 per cent annoyance, he realized that a visiting sorority was being applauded for its song.

In the old days before the war the fraternities rewarded the serenaders with applause that, while sincere, did not endanger the equilibrium of surrounding dwellings nor yet inject into the dreams of neighboring slumberers exaggerated visions of the Roman holiday.

KEEPING UP THE EDGES

When asked how he attained his great wealth, a rich old Scotchman once replied, "Weel, wha' I ha' now I got it by keepin' up the edges."

We of America have so much wealth, such great opportunities, that we sometimes neglect to "keep up the edges" so busy are we pursuing big money and a good time. But the time will come, as all thinking people agree, when the "fiddler will call for his fee," and if we of this generation do not consume our own smoke, so to speak, then assuredly we will seriously handicap our children, and our children's children.

The freshman in chemistry laboratory who leaves unused chemicals lying in the balance room, or thoughtlessly throws them away, does not realize that he is forming a habit that will hurt him in the business world. The printing student who never stops to pick up the type he drops, will some day have to unlearn this habit if he is to be successful. Care and thoughtfulness should have a big place in our Aggie code of ethics.

BABY DOLLS ARE LOSING PRESTIGE

The face value of the sweet, pretty young thing is constantly diminishing, and one of the phases of college life and activity in which its valuation is sinking the lowest is dramatics.

The rehearsals for the Purple Masque play have shown that looks without at least semi-intelligent backing have no part in determining the ability of an actor.

The baby doll has had the front of the stage long enough. It's about time she retired in favor of her less conspicuous sister.

ANNOUNCEMENTS

Five mile hike scheduled by the W. A. A. for November 1.

Annual K. U. pep meeting will be held tonight from 7:30 to 8:30.

Emporia debate squad has changed its time of meeting to Tuesday and

Thursday evening at 7 o'clock in the Forum room.

Sailors are asked to register on the bulletin board in main hall.

Hamilton literary society will hold its regular meeting tomorrow evening at 8 o'clock.

Rifle club practice on the indoor ranges starts next week. Members may shoot from 5 to 6 o'clock each

evening, Friday evening until 9:30 and Saturday morning after 10 o'clock.

Members of the Girls' Loyalty club to meet tonight before the pep meeting in the girls' gymnasium. Wear white sweaters if possible.

Eurodelphian and Ionian literary societies will not meet Saturday afternoon on account of the K. U. game.

Browning and Athenian literary society will meet in joint session Saturday night at 7:30 o'clock.

Apollo Glee club will give a mask ball at the gym tonight.

Division of Agriculture will give a barn dance at the gym Friday evening, November 6. Everyone is invited.

Miss Elizabeth Davis and Miss Grace Derby of the library staff attended the State Library association at Topeka this week.

1920 Football

October 2—Hays Normal 0; K. S. A. C. 14.

October 30—K. U. at Manhattan.

November 6—Missouri University at Columbia.

November 13—Iowa Aggies at Manhattan. (Homecoming game.)

November 20—Oklahoma University at Norman.

November 25—Washburn at Topeka.

RESERVED SEATS STILL ON SALE

ATHLETIC OFFICE HAS 300 SEATS LEFT

K. U. Rooters Did Not Take All Seats Sent—Tickets Here Saturday Morning

On account of the fact that the Aggie section of seats for the K. U. game has been sold out the athletic department has taken up the matter of securing more seats with Doctor Allen of the University of Kansas and has made arrangements whereby any unsold tickets in the K. U. section will be put on sale here at the athletic office on Saturday morning. There are 800 seats in the section reserved for the University, 300 of which have already been sent to Lawrence.

Doctor Allen has promised to keep Mike Ahearn informed concerning the sale of tickets at Lawrence. It seems probable at present that there will be several hundred to be sold in Manhattan on Saturday morning. These seats will be on the east and west sides of the grandstand which is on the south side of the field. On account of the limited capacity

BARBER SHOP

A Place with the College Atmosphere
In the Main Hall on the Campus

THIS IS A GOOD TIME TO SELECT THAT WATCH

One cannot be too particular in the selection of a time-piece. For correct timekeeping, quality must have first consideration. At this season we are fortunate in having a large collection of fine watches moderately priced. If you can select one now we will have plenty of time in which to adjust it for you. If you wish it engraved it can be done leisurely and carefully. By waiting until late in the Fall when there is a holiday rush, it is not possible for you to get the same deliberate service that you can be sure of now.

Here are two particularly good watches:

Men's Gold-Filled Watch—In a twenty-year case; 17 jeweled movement; adjusted and timed; thin model; plain or engraved. Price \$30.00. Others, \$8.00 to \$75.00.

Women's Bracelet Watch—14 kt. solid gold case; 15-jeweled movement; a good timekeeper. Price \$37.00. Others \$24.00 to \$65.00.

CROSS COUNTRY MEET SATURDAY

COMPETE WITH JAYHAWKERS IN LONG DISTANCE RUN

Probable Aggie Entries Are Kuykendall, Watson, Henri, Scotts, Clapp, and Mathias

The Aggie cross country team will pluck the feathers from the Jayhawk long distance birds Saturday at 1:30 o'clock. There will be six men on each team to start, and the first five men on each team to finish will count on the score.

The method of scoring is different from that used in other contests. Each man scores the number of points against his team in respect to the place he finishes, the first man to finish scoring one point, the second two, and so on. The low score wins.

The probable Aggie entries are Watson, Kuykendall, Henri, Stotts, Clapp, and Mathias.

JAYHAWKERS TO SEE AGGIE HILL

INSPECTION TOURS THROUGH ENGINEERING BUILDINGS

Have Largest White Rat in World Here—Is Complete Flour Mill In Waters Hall

When the enthusiastic rooting disciples of Mt. Oread arrive here Saturday morning to do verbal battle with the Aggie supporters at the football game, they will find on their hands several hours of time. They will naturally improve this time by inspecting the institution that is putting out the Wildcat team which they so fondly hope to humble.

During the big battle, the Aggie will likely be unyielding and uncompromising in his attitude toward our athletic rivals, with his one thought and purpose the dragging of the K. U. colors in the dust to defeat. But before the game, and also after the conflict, every Aggie loyalist, from the president to the janitors will deem it an honor and a pleasure to show the visitors from down the Kaw a few things and places which may be of interest and which might assuage their impatience for the game to commence.

The engineering students of the college have extended an invitation to the K. U. engineers to give their division the once over, and have arranged to conduct them through every department of the division. The students of agriculture and of veterinary medicine also refuse to concede supremacy to K. U., and the visitors may learn why by visiting the buildings occupied by these divisions.

A short distance north of the campus proper, is the farm barn erected in 1913 at a cost of \$25,000 and in it some of the \$160,000 worth of livestock owned by the college.

Moisten throats, make 'em clear, Victory over K. U. is near. Use mints or gum. 4 pkgs., 15c at Cress Racket, 1218 Moro.

Lost—Key ring and five keys. Notify Roy Oplinger, 622 Vattier or K. S. A. C., Box 372. Liberal reward.

SOCIETY

SOCIAL CALENDAR

Friday

Apollo club dance in the gymnasium. Iota Psi dance in Recreation hall. Prof. and Mr. A. M. Paterson entertain card club.

Sigma Alpha Epsilon dance at Harrison's. Delta Zeta house dance. Pi Kappa Alpha dance at Elk's hall.

Saturday

Delta Tau Delta house dance and Hallowe'en party. Acacia dance in Elk's hall. Beta Theta Pi house dance.

Sigma Phi Delta banquet for Phi Delta Theta of K. U. and Washburn, and dance in Recreation hall. Sigma Phi Epsilon house dance.

Monday

College Club dance at Recreation hall.

Mrs. Inez Sargent, matron at the Pi Kappa Alpha house, entertained with a teaparty on Wednesday afternoon, October 20, for the matrons of the various fraternities and sororities.

The freshman members of Delta Zeta entertained with an informal lawn party Thursday afternoon of last week. The party was a utilitarian one and at the end of the afternoon the weeds on the Delta Zeta lawn had all departed. The girls then served a porch luncheon of doughnuts and apples to the fraternity pledges who had been helping them with their afternoon's work.

Prof. and Mrs. W. A. Lippincott and Prof. and Mrs. C. F. Baker entertained their card club at the home of the Lippincotts, Friday evening, October 22. Cards were played at five tables. Prizes were won by Mrs. R. I. Throckmorton and Mrs. V. L. Strickland. Light refreshments were served.

Doniphan County club held its annual dancing party at Nichols gymnasium last Friday night. The hall was decorated with potted plants and with the club's colors. A five piece orchestra from Kansas City furnished the music. Light refreshments of sandwiches, ice cream and coffee were served.

"Web-Euro" annual fall hike was held last Saturday afternoon. Special cars carried the hikers to Eureka lake. After the supper all gathered around the campfire for the special program. The program was as follows: reading, Agnes Jones; duet, Pearl Hoots and Bill Knostman; talks by presidents of the societies, Rev. M. Collins, Reverend Guerrant; Reading, T. L. Bayer.

Mrs. N. W. Kimball, Mrs. Mary Pierce Van Zile, Mrs. L. E. Conrad, and Mrs. S. A. Baldwin entertained the Iota Psi sorority at the home of Mrs. Kimball at Sunday evening luncheon.

Mrs. L. R. Eakin and Mrs. Forest Forrester entertained with a mask Hallowe'en party for the Chi Omega fraternity at the Country club last Saturday evening. The rooms were decorated in autumn leaves and orange and black crepe paper. The music was furnished by a three piece orchestra. After the dance a two course supper was served by the hostesses assisted by Miss Helen Eakin and Miss Janice Barry. The chaperones were Dean Mary Pierce Van Zile, Mrs. N. W. Kimball, Mrs. Ada Petit, and Mrs. L. R. Eakin.

The local chapter of Delta Zeta observed Founders' day with a formal banquet at the chapter house Sunday, October 24. The dining room was decorated in the fraternity colors of rose and green, the colors festooned on the chandelier and reaching, in twisted ropes, to all corners of the tables. Huge centerpieces of Killarney roses, the Delta Zeta flower, and rose shaded candles, formed the principal table decorations. Miss Mary Polson presided as toastmistress, and toasts were given by Miss Winifred West, Miss Garnet Grover, Miss Madge Price, Miss Evalene Kramer, Miss Elsa Lear, and the house mother, Mrs. David Bice.

Dr. L. Jean Bogert gave a picnic party to the instructors in her department and a few others Saturday October 23. The party went from Manhattan to Camp Funston on the train. Some of the army officials met them with cars and showed them over the camp. The women were shown through the army hospitals near Fort Riley and were then taken to the polo match. The party returned to the hostess house where supper was served. Dr. Bogert's guests were: Elizabeth Rothermel, Mildred Tackaberry, Marian Williams, Elizabeth Kirkpatrick, Ruth Trail, Martha Pittman, Louise Glantton, Hidegarde Kneeland, Mildred Lauder, Emma Jane Leazenby, Mary McDonald, Alice Skinner of Topeka, Mrs. C. Aubel, Bess McKittick, Margaret Russell, Mrs. J. F. Brodie.

Miss Mary Fuller Riggs will visit this week end with Miss Jessie Machir. Miss Riggs is a secretary in the bureau of appointments at the University of Kansas.

Practical Things for Men

There are a few articles of
jewelry that nearly every
man wears, not so much for
personal adornment as for
practical use. He always
wears Cuff Buttons, Tie
Pins, a Ring or a Watch
Chain with a Locket or
Gold Knife fastened to the
end of it.

Perhaps some of these
articles are getting a little
old and out of date and the
carrier would like a new one.

If that should be the case
our showing of practical
jewelry for men is complete,
and we invite you to see our
assortment.

Always pleased to show you

VOCATIONAL MEN 250 IN NUMBER

STUDENTS SENT TO K. S. A. C.
FROM TWENTY STATES

About One Third are Taking Collegiate Course—Many Completed Preparatory Work Here

There is perhaps no group of men at K. S. A. C. more widely representative of the different states of the union than those in training under the Federal board for vocational education. Over 250 citizens of 20 states are attending K. S. A. C. through the agency of the government. They represent such geographically comprehensive states as New York, Alabama, Texas, Oregon, and Minnesota. And the fact that these men are sent here by the government speaks well for the college.

Of these men more than one third are taking the collegiate course, many of them having entered the college work this year after finishing the preparatory work here last year in the school of agriculture. The enrollment in the various departments of the college is as follows: agriculture 42; engineering 22; industrial chemistry 5; veterinary medicine 5; industrial journalism 1.

Of the remainder, 80 are enrolled in the school of agriculture and 95 in the trade courses, including auto and tractor mechanics and machine shop practice.

O. W. Price, supervising officer of the board, speaks very highly of the interest the men are displaying in the work this year. He also speaks highly of the hearty cooperation of the college in this big task of rehabilitating the disabled men.

SUNFLOWERS

The Cat

When you kiss
A dollar goodbye
You know
It will never come back.
But
When you kiss
A woman
Goodbye
Or anything else—
Yes,
More than likely.

Lucy Is Low

I hate to see old Autumn come
With chilly blasts and withered
leaves,
I sob to see sweet flowerlets die,
It gives my tender heart the
heaves.

—Lucy Wonder.

We cannot understand why a young man with a good position should hesitate to marry nowadays. He can buy a good five room cottage for \$6,500, furnish it for \$3,000, buy food for himself and wife for \$1,200 a year, and dress comfortably on \$300 with only \$1,800 or \$2,000 additional for his better half.

We are glad to note that retail profiteers have now reached the stage where they are willing to admit that wholesale prices are down in every other line except their own.

With Jack Johnson and Jess Willard both residents of Kansas we can almost afford to tell Dempsey where to get off—over the telephone.

If you want to study it over first, don't write. Use the telephone.

Pickles and Lemons

Jack Spratt
His wife grew fat,
Her clothes no longer fit;
So he fed her on acid
Till she was quite flaccid,
And now they lap over a bit.

A financial writer proclaims that the excess profits tax discourages invention. We suppose that he intends to make an exception of the invention of lies.

OUR ALUMNI

K. D. Thompson, is now employed as county agent of Rooks county. While in school he was both a debater and a member of the stock judging team.

J. N. Bridgeman, '91, has been in charge of the construction of nearly \$45,000 worth of paving and storm sewers for Junction City since June, 1919.

Mrs. Zepherine Towne Shaffer is living in Ames, Iowa. Her husband, Colonel P. M. Shaffer, formerly the commandant here, has been detailed as head of the department of military science at the Iowa State college this year.

Miss Elizabeth Cotton, '18, of Wabunsee and Robert S. Hargis of Inman, were married September 7 at the home of the bride. They are at home in Lanape, Ark., where Mr. Hargis is superintendent of schools.

Mrs. Ivy (Harner) Selvidge, '93, with her daughter, Helen, spent two weeks in Manhattan recently at the

home of Mrs. Selvidge's parents, Mr. and Mrs. John Harner.

Mrs. W. A. McCollough, '02, left last week for her home at Van Nuys, Cal., after an extended visit at the home of Miss Hattie Parkerson of College Hill.

Arthur E. Hopkins, '16, who has been employed at the Schenectady office of the General Electric company has been recently transferred to the Chicago office of the same company. His official title at the Chicago office is that of switchboard specialist. He is one of the four specialists in the Chicago district who have the care of all switchboard work for Michigan, Wisconsin, North and South Dakota, Montana, Nebraska, Kansas, Missouri, Arkansas, Iowa, Illinois, and part of Indiana.

ROOKIES TO GET LIVELY SEASON

PLAN TO HAVE INTERCOMPANY
FOOTBALL GAMES

Each Company to Have Dance—Encourage Military Hikes—Grand Military Hop in Spring

Major F. B. Terrill, commandant of the R. O. T. C. units here has a lively, interesting, and beneficial year planned for the rookies, along social and athletic, as well as military lines.

As soon as the regular football season is over he plans to stage a series of inter-company football games lasting until the Christmas holidays. He intends that each com-

pany shall have a dance at sometime during the year, and that a grand military hop shall crown the department's social season sometime in the spring.

He is encouraging military hikes and camps, to be equipped and rationed by the department, and in as many ways as possible he is trying to alleviate the monotonous routine that would otherwise prevail.

W. D. Lebaugh, junior in agriculture, has been forced to drop his school work on account of poor health.

Miss Hazel Shellenberger, '14, is teaching her second year in the Chisholm, Minn., public schools. She has charge of the domestic science work which includes the location schools, as well as the city schools.

They Don't Want To

The freshman girls decided in a meeting which they held last week that they would not wear any distinctive class wearing apparel. For a time the girls had seriously considered wearing some mark of distinction, but when the matter was put to a vote the majority were opposed to the plan.

MUSIC FACULTY GIVE CONCERTS

SUNDAY AFTERNOON ENTERTAINMENTS BEGIN OCTOBER 31

Concerts Will Be Given Each Sunday Until December 5—Begin at 4 O'clock

The first of a series of Sunday afternoon concerts by the faculty members of the music department will be given October 31 at 4 o'clock by Miss Helen Hennen and Miss Fannie Keller. A concert will be given every Sunday afternoon following this date until December 5. Numbers by two faculty members will be given at each concert.

The schedule of concerts to be given after October 31 is as follows: November 7, Miss Bess Curry and Miss Gladys Warren; November 14, Miss Mary Baker and Miss Katherine Kimmel; November 21, Miss Mabel Leffer and Mr. Arnold Lovejoy; December 5, Mr. Boyd Ringo and Mr. Raymond Williams.

COLBURN "PUTS ONE OVER" ON WOULD-BE PROFITEER

Head of Illustration Department Get Long Ordered Lens at Pre-War Prices

F. E. Colburn, head of the department of illustrations, "put one over" on a would-be profiteer recently while he was attending the annual meeting of the National Photographers' Association of America at Milwaukee.

The college had ordered a photographic lens of a firm some months ago and the firm, because of the increase in price, had "forgotten" to fill the order. A representative of the firm was at the convention selling lenses at a very reasonable rate, apparently having plenty of them. Professor Colburn, who didn't feel exactly friendly toward the firm, threatened to circulate the story of the firm's trickery with the college. The threat was all that was necessary for action. Colburn got a lens for the old price.

C. W. McCampbell returned last week from Dallas, Tex., where he acted as one of the judges at the Texas State fair.

A. M. Paterson, associate professor in the animal husbandry department, left last week for Valley Falls for the purpose of making arrangements for a cooperative experimental organization whose function is to work out a number of sheep experiments.

L. E. Melchers, professor in the department of botany, and H. H. McHenry, of the University of Minnesota, made a trip last week to Abilene for the purpose of examining wheat stubble for root rot.

C. W. McCampbell, head of the animal husbandry department, left Saturday for Hays, where he will arrange for some experimental work, which is to be carried out there this winter. The first part of this week he went to Medicine Lodge where he selected the steers to be used in the experiments that are to be worked out this winter.

The following members of the English faculty attended the State Teachers' association at Topeka last week: H. W. Davis, who is president of the Kansas Association of Teachers of English; R. W. Conover, Miss Ada Rice, Miss Annabel Garvey, Miss Florence Heizer, Miss Margaret Russell, and J. W. Searson.

Professor Emerson addressed the Kansas State Teachers' association on the topic, "Student Self Government" last Friday at Topeka.

Miss Annabel Garvey, instructor in the English department, spent the week end at her home in Topeka.

C. E. Reid, professor of electrical engineering, left last week for Brewster in response to a telegram requesting his help in establishing a lighting system there.

Hon. E. L. Barrier, a member of the board of administration, was a visitor at the college last week.

L. E. Melchers, professor of botany and plant pathology, returned last week from Kansas City, where he was called for the purpose of inspecting the fume injury to the sweet potato plant. On his way home he was asked to stop at Topeka for the purpose of examining a few carloads of potatoes which had been shipped in from Minnesota.

Prof. O. H. Burns spent Sunday in Linn county.

Prof. N. A. Crawford has been invited to deliver an address before the Eighth District Kansas Authors' club conference at Garden City, November 11.

Miss Mary Cruzen spent the week end at her home in Gallatin, Mo.

Whether the students of K. S. A. C. are Democrats or Republicans, the majority are advocates of a front porch campaign.

The electrical engineering department has recently purchased and installed a 103 cell Edison storage battery of 75 ampere hour rating. This battery will give a steady, constant potential up to 125 volts, and will be used in electrical measurement and calibration work, as well as being of general service in the electrical laboratory.

Miss Virginia Gireux and Miss Marie Freeman spent the week end in Kansas City, Mo., with Miss Freeman's father.

Miss Mildred Sterling and Miss Mildred Swenson spent the week end at their homes in Clay Center.

Mrs. Williams visited her niece, Miss Marie Freeman, at the Delta Delta house last week.

George Troup, a student in the department of music, was operated on for appendicitis at the Park View hospital last Friday.

STUDY THE WORK OF AG. COLLEGES

PRESIDENT JARDINE LEADS DISCUSSION

Aggie Head and Deans of K. S. A. C. Attend Convention of Land Grant Colleges at Springfield, Mass.

President W. M. Jardine represented K. S. A. C. in the annual convention of land grant colleges which was held at Springfield, Mass., October 19 to 22. At this annual convention, problems of interest to land grant colleges were discussed.

This year special attention was given to the changes in the four year course in agriculture, the Smith-Hughes act, and increased salaries for teachers. President Jardine is a member of the committee on organization and policy. He opened the discussion on "Changes in the Four Year Course in Agriculture."

Dr. Helen B. Thompson, Dean F. D. Farrell, Dean H. Umberger, and Dean R. A. Seaton were other representatives to the convention from here.

Tryouts for Aggie Pop night will be held the first week in November. Every organization is asked to try out for this stunt night.

Morris Evans, of the department of agricultural economics, who was recently operated on for appendicitis, is rapidly recovering. Mr. Evans has been at the Park View hospital.

Bacteria Have Kinks In Tails and Travel As Fast as a Horse

Scientists are moved to greater wonderment every year as they delve into musty tomes and carry on their great research work in mysterious laboratories. But to an instructor in plant pathology at K. S. A. C. was given the privilege of discovering a student who has the newest definition for bacteria.

Prof. Henley H. Haymaker, of the botany department, in inspecting a number of examination papers, ran across the following brilliant remarks concerning bacteria:

"Bacteria are not animals. They are small and of many kinds. They travel in proportion to their size, some as fast as a trotting horse and some as fast as railroad trains. They are very small. There are both harmful and beneficial bacteria."

"The types of bacteria include those with one tail, those with a kink in the tail, those with many tails and those with tails on either end."

The ambitious botany student in order to make clear to Professor Haymaker illustrated the types of bacteria and needless to say the pictures of the bacteria with a "kink in the tail" and the drawing of the "animal" with "tails on either end" were conducive to mirth.

A. C. McClintic is in the race for superintendent of insurance on the Democratic ticket. Mrs. McClintic was formerly Miss Carrie Gates, '10.

Miss Elthe Kaul and Miss Nita Richardson spent the week end at Miss Kaul's home in Kansas City, Mo.

BIGGEST YELL FEST OF YEAR IS ON TONIGHT

AHEARN AND KING BOOKED FOR
LEADING PARTS

MEETING BEGINS AT 7:30 O'CLOCK

Cups To Be Presented to Winners of
Cross Country Run—Two
New Songs Will Be
Tried

Pep will hold full sway tonight at the biggest yell fest of the year which will be staged in the auditorium at 7:30 sharp. Every Aggie, whether a yell leader, coach, football man, professor, or student will be up on his toes and rarin' to go for the big event long before the scheduled hour of meeting.

Will Present Cups

In addition to the usual yelling Mike Ahearn and Prof. H. H. King are each booked for a leading part on the program. After the leather lunged Aggies have given their songs and yells a good airing, the cups will be presented to the three winners of last Saturday's cross country run.

The Girls' Loyalty club is planning to give a special stunt at the pep meeting, but just what this is going to be they refuse to say. The glee clubs will give several numbers, after which tickets for the booster section of the bleachers will be given out.

In addition to the old stand-by yells, two new songs will be practiced. They are as follows:

(Tune, The Bear Went Over the Mountain.)

O, Michael Ahearn's a Wildcat
And Charlie Bachman's a Wildcat
And the Aggie team are all Wildcats
And I'm a Wildcat too.

That's why we'll beat K. U.
That's why we'll beat K. U.
(Repeat first three lines.)

(Tune, Chorus of Marching Through Georgia.)

Jay Rah! Gee Haw! Our motto's
"Beat K. U."

Jay Rah! Gee Haw! That's what
we're going to do.

The Aggie Wildcat's out for blood,
He's going to quench his thirst.
Farewell to thee, Jayhawk Birdie.

TO SELL SCORE CARDS AT GAME

MONEY GOES TO WOMEN'S NATIONAL JOURNALISTIC REGISTER

Theta Sigma Phi Has Pledged \$50—
Score Booklets To Contain Pictures and Sport Dope

Score cards will be sold by Theta Sigma Phi at the K. U.-Aggie game. The funds received from the sale of these cards will go in part toward financing of the Women's National Journalistic Register, to which each chapter must pledge.

This organization was formed within the past year by Theta Sigma Phi for the purpose of aiding all capable literary women, collegiate and non-collegiate, in securing work upon magazines, newspapers, house organs, with advertising firms in the west and middle west. As the only requisite for membership is capability all the trained women journalists will be served.

The score booklets which are to be sold at the game tomorrow will contain pictures of the Aggie players and coaches and several pictures of K. U. stars. In addition to the pictures, sport dope and cartoons will make the booklet a worth while addition for the K. U. page in any memory book.

Miss Elizabeth Adams of Maple Hill will spend Saturday and Sunday with her sister Emily.

The latest in shoes at 20 per cent off for a short time only. Watson's Shoe Store.

WILDCAT MEN CRIPPLED FOR K. U. BATTLE

(Concluded from page one)

as good a showing as possible in Saturday's game as it is his first Missouri Valley contest. He is drilling the men as few Wildcat teams have ever been drilled before. The team that will start Saturday may not be the strongest the Aggies have, but it will lack nothing in fight. The men are getting the fight-to-the-last ditch spirit and are determined to show the Jayhawk a battle royal.

"Aggies Will Fight"

The coach when asked regarding Saturday's game said, "I have nothing to say except that we have 6 men on the hospital list, and are therefore under a heavy handicap, however, we will give the Lawrence battlers all we have and are not calamity howling about our injuries. It is all in the run of football luck. It may happen to K. U. next year."

K. U. Coming 700 Strong

The seat sale has gone with unusual rapidity. All the reserved seats were sold by Wednesday. The Lawrenceites are coming up 700 strong, bringing with them a band and their KU KU Klan. The merchants of Aggieville and the banks downtown are closing for the game and are also decorating their windows for the event.

Miss Thelma Smith and Miss Verna Smith were called to Erie Monday by the death of their grandfather, Mr. Locke. Miss Corrine Locke left for Erie two weeks ago, when her father's illness became critical.

LOYALTY CLUB HAS THE PEP

DEAN VAN ZILE AND PROFESSOR
KING TALK TO GIRLS

Miss Hesse Explains Plans of Club
For Year—Try Out New
Songs and Yells

That the girls have the pep to push the Aggie team was shown by the spirit in which the large number of girls came to the meeting of the Girls' Loyalty club in the home economics rest room Thursday evening.

The pep meeting opened with the singing of one verse of Alma Mater. Speeches on loyalty and college spirit were then given by Mary Pierce Van Zile, dean of women, and Prof. H. H. King.

Pearl Hoots then led the girls in the singing of two new pep songs which have been submitted to Ray Watson. Miss Grace Hesse, who is the club's advisor, explained the plans worked out by the committee for this year. The committee members are: Miss Bly Ewalt, Miss Rowena Thornburg, Miss Faith Martin, Miss Jessie Evans, and Miss Grace Hesse.

At the close of the meeting more songs and yells were given while the tickets were being distributed for reserved seats in the special section to be occupied by the Girls' Loyalty club. Girls who were unable

to be present at the meeting may secure tickets from the president, Bly Ewalt, or any member of the committee.

Dr. Nabours To Speak

Dr. R. K. Nabours, who recently returned from a year in Russia, Turkey, and other eastern countries, will address the Science club in the home economics rest room at 7:30 o'clock Monday evening. His subject will be "Some Incidents of a Recent Trip Around the World." The lecture will be open to the public.

To Have Red Cross Drive

At the regular meeting of the American Legion next Monday night plans are to be perfected for the handling of the Red Cross drive on Armistice day. The town is to be divided into sections and the drive in charge of members of the Legion, is to start at 8 o'clock. The drive is to take the place of the usual celebration. Original plans to have a pageant and in connection present the remaining Victory medals have been abandoned for the reason that "the men are too busy making a living."

Make Saturday Visiting Day

Senior electricals plan to make Saturday visiting day. Donned in their corduroys they expect to become acquainted with practically all departments of the school. It is understood that they will not be averse to receiving company along the route of their progress.

AGGIES HAVE FEW REGRETS AFTER GAME

HOLD NIGHT OF TERROR BEFORE THE BATTLE

NEARLY 5,500 JAM AHEARN FIELD

Practically All Classes Were Forcibly Dismissed Saturday Morning—Large Number of Alumni Here

In spite of the fact that the Jayhawk bird again flew away victorious the Aggie rooters have nothing to regret—they celebrated beforehand. Thus in the time honored way do the Wildcat followers comfort themselves, for they celebrated the night before.

Adding enthusiasm to the affair was the expected arrival of the K. U. "Bum" club. The preparation for this delegation which came in on the Midnight Special added much zest to the occasion and, according to Manhattan people "made night horrible." The college bell rang intermittently throughout the evening as a signal to Aggie watchers to be on guard, and by 1 o'clock the guards were well established by the college gate. The K. U. bums, evidently appreciating their reception made no effort to disturb what little peace and quiet was left in Manhattan.

Students Take Vacation

There was vacation in almost every building on the campus Saturday morning. Near the end of first hour the gang "got organized" and began a tour of the buildings, inviting the students to retire from their classes and when the classes proved shy, they invaded the room with shouts which made keeping school impossible. The breaking up sessions invariably closed with cheers for the instructor whose class had been "dismissed." During second hour, the bum club paraded, and gathering in front of Anderson gave some yells and a cow bell serenade.

The K. U. special which was scheduled for 11:15 o'clock did not arrive until after twelve. It was met by a large number of Aggies, as well as by the K. U. bums.

Record Crowd At Game

Probably the largest crowd Ahearn field has ever seen packed the seating capacity at the game. Even before 1 o'clock the mob began pouring in. Seats were at a premium. The south side on both sides of the grand stand was reserved for the K. U. rooters, the Aggie boosters and Girls' Loyalty sections being on the north.

Although the official count has not yet been made it is believed that the crowd at the game numbered about 5,500. Probably about 1,000 of the crowd were either from K. U. or were K. U. sympathizers. A large number of out of town alumni were here for the game. The K. U. bum club, intent on living up to the name to the utmost "rushed the gate" enabling about 300 to get in without admission. A number were knocking down as the horde swept in, bringing a policeman, who endeavored to quiet the mob. A demonstration was given by the K. U. bunch before the game, the band, the Jaw Hawk bird, the Ku Klux Klan "or whatever they were," as Mike says, and numerous signs complimentary to the football ability of K. S. A. C. participating in the parade. During the half the Aggie band paraded to the K. U. side and played while the K. U. band played for the Aggies. A freshman parade also added to the pep between halves.

MILITARY MEN ARE LIVE WIRES

DEPARTMENT IS LARGER AND MORE ACTIVE THIS YEAR

Officers in Military Department Are Interested in Many Activities Outside Regular Work

The daily routine of the officers of the military department of K. S. A. C. is varied by the many activities which they constantly engage in.

F. B. Terrill, major, infantry, U. S. A., is the head of the department. The other officers supervise the several departmental units as follows: Major C. A. Chapman has charge

of the coast artillery units. Captain L. C. Davidson, is commandant of cadets with the infantry units. Captain J. A. Van Fleet is also an infantry officer but in addition has supervision of the machine gun work. Lieutenant G. W. Brower has charge of the veterinary units. Major E. L. Claeren, U. S. R., is secretary of the department. The military band is in charge of Sergeant John McGarry, infantry, U. S. A.

Of the above named units the coast artillery and the veterinary are new this year. The machine gun work was started last year. There are immediate prospects of securing a cavalry unit here for next year, depending of course on the action of the state legislature.

A new range is being prepared east of the poultry farm and the bayonet course is being moved to this new location from its former place west of the gymnasium.

Members of the staff of instruction of the military department are also active in other lines of college interest. Captain Van Fleet is assisting in the coaching of football. Captain Davidson is conducting classes in boxing. Sergeant Comisky is also giving boxing instruction to several classes.

CALL RETURNS FROM MEETING

MAY ADOPT PLANS DISCUSSED BY AGRONOMISTS

Kansas Is at the Top in Activity and Numbers in Agronomy Society

L. E. Call, professor of agronomy, returned last week from a meeting of the American Society of Agronomy held at Springfield, Mass.

Professor Call reports the best attendance and most enthusiasm of any meeting of agronomists he has attended in years. If plans in accordance with ideas presented at the meeting are adopted here, probably one semester of soils will be required and crops will become elective except for students specializing in agronomy. Such a change would probably include geology as a required subject.

Professor Call read a paper before the society entitled "Prerequisites for Farm Crops" in which he emphasized the need for students to have a course in botany before taking up their work in farm crops.

Although the membership of the society is only between 500 and 600, Kansas and K. S. A. C. have always been at the top of the list both in number of members and in the activity of those members.

The society made plans for increasing the membership to 1,000 during the coming year. The meeting next year will probably be held at New Orleans.

STATE HIGHWAY ENGINEER DISCUSSES GOOD ROADS

Kansas Is Second in Highway Mileage—Forty Eighth in Hard Surfacing

In an address to the engineers Thursday afternoon, M. W. Watson, state highway engineer said "The good roads amendment to the state constitution simply enables Kansas to do what all other states are doing, either build good roads or help the counties to build good roads. The amendment provides that the state may aid in the cost of building roads to the extent of \$10,000 a mile or not more than 25 per cent of the cost of building."

Mr. Watson brought out the fact that although in highway mileage Kansas stood second only to Texas, she was forty eighth in the matter of hard surfaced roads. Even Arkansas is ahead of Kansas in the matter of hard surfacing.

Have Recognition Services

Recognition services for the new members of the Y. W. C. A. were held in Recreation hall Thursday evening between 7 and 8 o'clock. Miss Effie Hendricks had charge of devotions, and Miss Ruth Peck led the responsive reading. The president, Miss Marcella Seiber, made a short talk in which she explained the purpose of the organization. Music was furnished by the Y. W. octette, and by Miss Katherine Kimmel of the music department.

D. W. Working, '88, now dean of the college of agriculture and director of the agricultural experiment station at the University of Arizona, visited at the college on Tuesday, October 22. Dean Working was on his way home from a convention of agricultural colleges and experiment stations held at Springfield, Mass.

Old Tin Cans and Dogs' Tails are as Always—Inseparable

He was very dark and his hair was of the wavy kind that women rave about. He timidly entered Recreation hall and glanced about. Instantly he was the cynosure of all eyes, a hush fell over the hall. Then someone whistled and he started forward eagerly. His timidity conquered, he began paying his respects to the various couples scattered about the hall. In a short time he had greeted nearly everyone and had departed for the outside.

Then suddenly from out of the north came dismal walls and the sound of galloping padded feet, accompanied by the thumpy thump of what sounded very much like a tomato can. It was. Down the hall, sweeping all before him came the recent visitor. At regular and all too frequent intervals a small tin can, attached to the north end of the visitor rose gracefully in the air to descend with loud and emphatic noises. At each of these descents the visitor gave vent to querulous and heart breaking notes of inquiry, his speed increasing with the pitch of his voice. It was evident that he was disappointed with K. S. A. C.

Suddenly the visitor decided to mount the stairs. He ascended rapidly, accompanied by the can and the echoes of his indignation, which were fast filling old Anderson. Up the stairs and straight to the office of Doctor Seiver he hurried. The doctor hearing some one enter, without looking up asked, "How many classes and what was the matter with you?" Then, perceiving that his visitor was a small woolly black dog, that more than anything else in the world desired to become permanently separated from the tenacious tomato can that had accompanied him, the doctor reached for the ton-sil removers and severed the string.

DEDICATE NEW CHURCH SUNDAY

RIGHT REVEREND THOMAS LILLIS OFFICIATES

Church of Seven Dolores One of Finest Buildings in This Part of Country

Imposing as it was dignified, the dedication of the new church of the Seven Dolores took place Sunday morning at 10:30 o'clock, the Right Reverend Thomas F. Lillis of Kansas City, Mo., officiating. Assisting him were Father Ennes of Concordia, Father Cogley and Father Deters of St. Marys college, Father Roche of Ogden, Father Hundt of Wamego and Father Simmer of Flush.

Father Ennes who was the first priest of the local parish and who is now serving at the Cathedral of Concordia, celebrated the high mass after the church building had been blessed by Bishop Lillis. Father Ennes also celebrated the 9 o'clock mass on Monday, All-Souls' day.

The new church which is located at the corner of Juliette and Pierre streets is one of the finest structures of its kind in this part of the country. Built of red brick and finished within and without with finest materials available it is a building of which the town and county and even the state can well be proud. Within the past ten years the growth of the parish has been so great that the undertaking of a building project even at such uncertain times was made imperative.

Pays K. S. A. C. Visit

James P. Monroe, chairman of the federal board for vocational education, visited the college Monday. Mr. Monroe has charge of the Smith-Hughes work and the re-habilitation work. This was Mr. Monroe's first visit to K. S. A. C. He is making a tour of the country visiting all colleges which have courses in vocational work. He is a prominent manufacturer of Boston but at present is in Washington, D. C.

Parker Talks At Meeting

Kansas chapter of Alpha Zeta, an honorary agricultural fraternity, met Monday evening. John H. Parker, professor of crops, who has recently returned from a meeting of the high council of the fraternity at Marshall, Ill., explained to the local chapter the accomplishments of the national fraternity, and told of the plans made for the coming year. He also mentioned the condition of the other 28 chapters which are scattered about over the United States. After Professor Parker's talk the active members of the chapter and faculty members made plans for the year's work here.

TOMORROW IS FIRST DAY OF TICKET SALE

MAY BUY ARTISTS SERIES PASTEBOARDS AFTER CHAPEL

TEN TEAMS OF GIRLS WILL SELL

Two Thousand Tickets Will Be Disposed of—First Number Will Be November 15

With our K. U. guests taken care of and probably the best man nearly elected for the presidency of the United States, interest on the part of the student body now reverts itself to a most important matter, the fact that on Wednesday morning tickets for the Star Artist series will go on sale.

Eleven teams of 10 girls each will have tickets for sale after chapel, Wednesday, and from that time on until the 2,000 tickets which are to be sold are disposed of, it will be possible for every student on the hill to avail himself of an opportunity to hear three of the finest musical artists in the country.

The captains of teams that will have charge of the work of selling the tickets are: Louise Mangelsdorf, Clara Evans, Rowena Thornburg, Marie Correll, Dorothy Knittle, Geraldine Hull, Gladys Taylor, Pearl Hoots, Hortense Caton, and Mary Frances Davis. Each of the captains chooses her own team.

Desirous of making it easier for students to secure tickets for the Artist Series of 1920 a large number of ticket sellers will be on the job on the days the tickets are to be sold. In addition to this tickets can be secured at the office of the music department. A large number of mail order requests for tickets have already been filled.

Seat reservations can be made for the series after 11 o'clock on the morning of November 10 at the Co-op bookstore in Aggieville.

Oscar Seagle who will open the Artist series on the night of November 15, is a baritone of ability and charm and his program will include a series of songs, both new and those more familiar.

John Powell, American pianist, and Mabel Garrison whose appearances here are dated, respectively, February 21 and March 14 are the other two numbers of the series.

STUDIO ROYAL TO BEGIN WORK

STARTS ON CLASS BOOK PICTURES MONDAY

Is Now Located at 1101 Moro—Developing and Incidental Work to Be Handled in Kansas City

Photography for the 1921 Royal Purple will begin next Monday, at the Studio Royal, which is now located in the building formerly occupied by the Amos studio at 1101 Moro. The building has been completely remodeled and redecorated during the last few months, and its appearance has attracted considerable favorable comment.

The gallery room is finished in a color scheme of gold, blue, black and brown. A dressing room tastefully finished in old ivory and pink is another attractive feature of the studio. A special room has been reserved for the Royal Purple staff, where copy may be prepared for engraving, and where general art work may be done.

The studio does not have a large assortment of backgrounds, but this handicap appears to be partially if not wholly made up for, by the use of air brush and hand decorating in making each photo have individuality of background.

Only the photography will be undertaken in the studio in Aggieville. All developing and incidental work will be handled at the general headquarters of the firm in Kansas City. The Studio Royal, as is generally known, is a branch of the Hixon-Connelly company of Kansas City.

Paul Fetzner, a graduate of the mechanical engineering department last spring, was in town Friday and Saturday to see the K. U. game. He is on his way to take up work in the sales department of the Westinghouse Electric company at Pittsburgh, Pa.

Willard Chemical Society Elects

Willard Chemical society held its first meeting Tuesday evening. The officers elected were president, Zatie Carp; vice president, Clare Downing; secretary, Sam Thackeray; marshal, Wiley Whitney, treasurer, Carl Conrad; chairman of the program committee, Gladys Hartley. The program consisted of talks by Doctor Brubaker and Clare Downing. The society of which anyone majoring in chemistry may become a member meets on the first Tuesday of each month.

PARTIES START AT 10 O'CLOCK

NOTHING TO CONFLICT WITH HOMECOMING PEP MEETING

Pepster Program to Be Over by 9:30—Mixer At Gym Planned For November 12

Believing that the entire college should back the Aggie team before as well as during the Homecoming game on November 13, the social committee of the S. S. G. A. will not authorize any social function for the night of November 12 earlier than 10 o'clock.

The plan for the Homecoming game with the Iowa Aggies November 13 includes a pep meeting in the auditorium on the night before the game followed by a mixer in the gymnasium.

Last year there were so many parties and dances the night before the Homecoming game that the attendance at the pep meeting was much lighter than it should have been. Cliff Stratton, general secretary of the alumni association, and M. F. Ahearn, athletic director, promise that no pep meeting program will last later than 9:30 o'clock, in order that other functions may not be interfered with.

It is hoped that the entire college, alumni, students, and faculty, will join in the homecoming program which is now being worked out.

GET TASTE OF JAYHAWK MEAT

WATSON COMES IN FIRST WITH KUYKENDALL SECOND

Aggies Win Cross Country With Low Score of Twenty Four

The Wildcat had a taste of Jayhawk meat on Saturday before the game. The football battle went not to the liking of the record crowd of Aggies at Ahearn field, but the cross country run before the game was a spectacular and closely contested event that went to the Aggies, putting the crowd in great good humor for the football classic.

The two teams of six men each lined up at 1:35 o'clock for the start. They left the field in a bunch and the crowd betook itself to "kidding" the visiting rooters and to all the various devices used by spectators at an athletic event to while away the time. In about 20 minutes after the start of the leaders of the field, two men came into view about half a mile away across the campus. The two ran on neck and neck around the curve of the track and onto the field where it was seen that they were both Aggies, Kuykendall and Watson, with Ray leading and talking encouragement to Kuykendall. Ray finished a yard ahead of Kuykendall in 24 minutes and three seconds.

The next three men in were University tracksters, but Henre came in sixth, Matthias seventh and Clapp eighth, after a neck and neck race against a K. U. runner in which the superior finishing ability of Clapp told. The last two in were University men.

The score was counted by giving one point to the first man in, two points to the second man, and so on up to the tenth in. On this basis the final score was Aggies 24, K. U. 31. The low score won the event. The placing was Aggies, 1, 2, 6, 7, 8; K. U., 3, 4, 5, 9, 10.

Make Dairy Barn Investigation

The engineering experiment station of the college in cooperation with the American Society of Agricultural Engineers has been investigating the degree of ventilation possessed by various types of dairy barns during winter weather. Data from various barns showing good and bad conditions have been submitted to the experiment station, and to these the theory of heating has been applied.

HARD FOUGHT STRUGGLE TO K. U. 14-0

HUGH CROWD SEES JAYHAWK JINX FUNCTION

AGGIES PUT UP STIFF SCRAP

Game Marred by Fumbles on Part of Both Teams—Aggies Make More First Downs

The K. U. jinx which has dogged the Aggies functioned for his fifteenth year Saturday. The University team left Ahearn field with a 14-0 victory over the fightin' Aggies after an interesting and clean fought game. A record crowd of some 7,000 K. U. and Aggie rooters saw the contest. The game was featured by many sensations that kept the jam of onlookers on their toes during the whole period of play.

Win By 50 Per Cent Luck

The University score represents 50 per cent luck and 50 per cent scoring ability. The first touchdown came in the first two minutes of play. Captain Gatz won the toss and chose to receive the kickoff. Dewey Huston returned a poor kick to the Aggies 35 yard line. The Aggies started a march down the field that the Jayhawk battlers were unable to stop. Sears made 8 yards through the line and then Henle Hinds skirted the K. U. end for a thriller lasting 43 yards. The K. U. warriors seemed panic stricken and a dense blue pall of silence appeared to settle over the Jayhawk rooters as the two teams lined up on the University 30 yard line. The Aggie backs fell into the familiar punt formation, Henle called the signals, the ball was snapped to Brady Cowell—and he muffed a poor pass. Bell, the University end, had swooped in from the right, and arrived at the exact moment to scoop the ball in as it bounced from the ground. He never lost a step, but started down the field, running like a broken cart horse, but behind the prettiest bit of impromptu interference seen on Ahearn field in many a day. Two men stayed with him well across the Aggie goal line and four others clipped the Aggies who had started in pursuit. That's the story of the 50 per cent luck part of the score.

Second Touchdown Earned

The second K. U. touchdown was fairly earned by passing ability and generalship. It came slightly after the middle of the second period. After a punting duel between Huston and Little in which Dewey had the edge in distance, but which gained no advantage for the Aggies because of superior returns by K. U., Reid, Jayhawk left end, intercepted a pass near the center of the field. He was downed in his tracks. On the next down Little, K. U. right half, shot a 25 yard pass to Reid, which put the ball on the Aggie 20 yard line. Here Lomborg showed his generalship. Instead of changing plays he pulled another pass, Lomborg to Mandeville. The pass was a beauty, just over the Wildcat line and to one side and before the Aggie safety could down him, Mandeville was across for the last K. U. score. Lomborg again kicked goal.

Game a Thriller

The game was a genuine thriller, filled with fumbles and sensational runs. The K. U. team fumbled more than the Wildcats, but their fumbles were less costly, although twice they lost the ball on fumbles when they were within scoring distance of the Aggie goal. The Aggies outgained their opponents from line of scrimmage, making 292 yards to K. U.'s 278. They also had the edge in first downs made, the summary showing Aggies, 9; University, 4. However, the Aggie gains were made in the center of the field and when they got within scoring distance of the University they were held for downs or fumbles to the enemy.

The University resorted to punting on the second down many times in the third and fourth quarters when the Aggie line proved impregnable, and their backs could not skirt the ends. In the exchange of punts between Dewey Huston and Huan and Little, Dewey proved himself capable of kicking farther than the opposing booters, but the Aggies lost this advantage because of slow work in getting down under punts and keeping returns to a low yardage. Reid and Bell, K. U. ends, were particularly deadly in this style of play and many times our safety was either downed in his tracks, or forced to signal for a fair catch. The K. U. punters kicked high to allow their

(Concluded on page six)

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Aggies at the top of conference athletics by 1922.
4. Clean politics.
5. Greater cooperation between alumni, students, and faculty in bringing athletes to K. S. A. C.
6. Remodeling of the auditorium stage.

ERECT MEMORIAL STADIUM

Where will we put the crowd, probably larger than that attending the K. U. game, that will be here for the homecoming? The bleachers were crowded to capacity last Saturday and every available inch of room on the field was used to seat spectators, and still many of the people who attended the contest were forced to stand.

The need for a stadium on Ahearn field was clearly demonstrated at the K. U. game. And the K. U. game is not the big game of the year, the homecoming game with Ames Aggies surpassing it in importance and probable attendance.

K. S. A. C. is past the bleacher stage in her athletics. New arrangements must be made to care for the ever growing crowds that attend the contests on Ahearn field. There are not enough entrances and exits to care for a crowd of more than 3,000 people and there are not enough ticket booths to handle expeditiously a jam of people such as we had Saturday.

The memorial for the K. S. A. C. men who were in the service has never materialized. Nothing has come of the brave talk of the \$400,000 Memorial hall to be erected on the campus by student and alumni subscription. Might not the stadium movement and the memorial campaign be combined to make possible the erection of a stadium that would be at the same time a memorial?

IT'S UP TO THE S. S. G. A.

We get judged by what we do. Strangers in Manhattan Friday night or Saturday morning who saw Aggie students throwing eggs at a theatre and K. U. men tearing down decorations and shooting craps on the street will not have a high opinion of the two schools.

But these actions on the part of a few of the students do not represent the spirit of either institution. Nine out of every 10 students would repudiate them. The great majority of the students in the university and the college have a different idea of domestic science from making an omelet on the front of a theater and a different idea of mathematics from calculating the chance of throwing a seven or an eleven.

Visitors unfamiliar with college, however, do not understand this. When they see 15 or 20 rowdies raising Cain downtown, they think they are seeing "college life."

It ought to be made clear, to the few men who took part in the trouble downtown, that they have the disapproval of the reputable students. Here is a chance for the S. S. G. A. in the college, and for the organization that corresponds to it at K. U., to show that they have convictions and the nerve to put their convictions across.

SIXTY SEVEN THOUSAND VOLUMES

A college library of 67,000 bound volumes invites your attention.

The library habit is well worth cultivating while in college. Not many of us will have a building full of books for our use after we leave the institution—so why not take advantage of our present situation?

In addition to the 67,000 bound volumes in the library there is the periodical room where a number of the larger dailies, the Kansas county papers, and numerous magazines are kept.

A library habit is a good thing to get while you are a freshman, for it will stick by you and prove of value throughout your college course.

Why not go over to the library some day?

You may find a lot of things you didn't know were there.

SURE IT'S A HARD LIFE—BUCK UP!

Flunk slips, a thin pocketbook, a blue letter from home, a busted up love affair. Sure, sometimes it's a hard life, you feel down and out. You wouldn't be human if you didn't go down.

But the point is, can you think when you're down? Or do you just get off with the world and think that it isn't giving you a square deal?

Do you think at all? Instead of having all these "feel sorry for yourself" thoughts, does your mind go blank and is it impossible for you to think when you're "down?"

If so you're in bad straits and take it from one who has been down and out and unable to think it's bad business to let your

mind stay that way. The next time the bottom of your world acts as if a bolshevik has stepped on the gas, don't let your mind go out as if a fuse had been blown. Think! And if you think constructively, you'll act. Maybe you'll find the proverbial pot of gold and that'll fix up your money troubles. Maybe you'll be inspired to write mother and dad just the kind of a letter that will help them out of their difficulty. And as likely as not you'll get a telephone call from your best girl.

What's the use of giving up when you're down? Why not spruce up and do a little hard thinking. Nine times in 10 there is a way out of every difficulty if one will take time to think it out. One of the first things every college student will have to learn is to think when he starts "down" and to think still harder when he discovers that the elevator of his mentality has reached the cellar.

Things we think things others think and things we think of things others think.

My Dear Editor:—For some time there has been a discussion of the changing of the name of our college. I want to say that I am not a student in the division of agriculture, nor do I expect to enroll in that course, but I most emphatically deny allegiance to those representing so-called non agricultural courses who desire the name of our school changed to the Kansas State college.

The desire for this change arises I think from a narrow interpretation of the term, agriculture. There is no course offered in this school, in my judgment, that should not very properly be offered in the curriculum of an agricultural college of our rank. The very best of music, the most skilled engineers, the ablest writers, all can very properly contribute their best to that basis of all human existence, agriculture.

Kansas has a university. She has no use for two academic institutions but she unquestionably does need her agricultural college. Would it not appear unreasonable for one of the greatest agricultural states in the country to support two great universities, and to consider the subject of agriculture as only a minor course in one of them?

K. S. A. C. is known, and not without honor, throughout the whole world. Missouri Valley has more than once accorded highest honors to Aggie teams. What assurance have we that a Kansas State college would attract from the Kansas homes that element which has made this college what it now is. Imagine substituting K. S. C. in our old song: "K. S. A. C. Carry the Banner high!"

K. S. A. C. long may thy colors fly—
—Satisfied with the Old Order

Dear Editor:—I have just read the letter in which someone comments on the terrible faux pas of greeting a professor with "Hello." If I may be permitted the expression in your refined household journal, Madam Editor, I'll be damned. Strange as it may seem, professors are people. If their dignity is frac-

tured by anybody's "Hello," they should be quietly but firmly called to the chair of etiquette in some pleasant seminary. (Please don't say "cemetery" here even if it does sound more appropriate.) Anybody who tries to draw a line of social distinction between faculty and students is—but I think I shall leave the description to someone with a more sparkling and profane vocabulary.—A Professor.

ANNOUNCEMENTS

World Fellowship committee of the Y. W. C. A. will meet after Vespers Thursday evening.

Girls of the W. A. A. will go on two hikes this week. A 10 mile hike is scheduled for Wednesday, November 3, and a five mile hike for Thursday, November 4.

W. A. A. cabinet will meet Wednesday evening at 5 o'clock.

Alpha Tau Omega fraternity will be at home to the faculty, college and townspeople from 4 to 5 o'clock Saturday, November 6.

Women's Athletic association will hold its regular monthly meeting Thursday evening at 5 o'clock.

Girls on the Emporia debate squad will meet Thursday evening at 5 o'clock.

W. H. Olin of Denver, Col., will speak in chapel Wednesday at 10:15 o'clock on the subject "On the Heights."

Rifle club practice on the indoor ranges starts tonight. Members may shoot from 5 to 6 o'clock each evening, Friday evening until 9:30 and Saturday morning after 10 o'clock.

Saves School \$400

About two years ago Professor Reid bought some apparatus that had been used by the government for instruction purposes, and that had been slightly damaged by fire. Included in this were 103 Edison cells, which cost him 10 cents apiece. The Edison company allowed 40 per cent for them toward the purchase of a new battery, and since the cost of a new battery of this voltage would be \$1,000, this amounted to a saving of nearly \$400.

Colored pictures of all the different breeds of dogs have been placed on the walls of one of the class room 33 in the veterinary building. The pictures were taken from the National Geographic magazine. A printed description accompanies each picture. Students who are lovers of dogs should not fail to see these pictures.

AGGIE WOMAN IN POLITICS

MRS. JOSEPHINE RAND ROGERS
RUNS FOR SENATORSHIP

Is Wife of Prof. E. J. Rogers, '85,
Who Was at One Time On K.
S. A. C. Faculty

K. S. A. C. is coming to the front with women in public service, and not last among the feminine leaders of the day is Mrs. Josephine Rand Rogers, of San Jose, Cal., who is running as an independent candidate for the state senatorship of the 27th district of California.

Mrs. Rogers, who is the wife of Prof. J. E. Rogers, of Stanford university, attended this school in the year of 1887-1888. Her husband who is a graduate of K. S. A. C., '85, was at one time a member of the K. S. A. C. faculty, having taught in the physics department.

Mrs. Rogers was an ardent supporter of the woman suffrage movement in New York state when it was viewed with derision, and in California she performed brilliant service in its behalf until victory was achieved. Constructive methods and initiative in child welfare work have made Mrs. Rogers famous. A course in scientific motherhood which is offered by the University of California is due to her efforts in this direction.

A strong following of both men and women is supporting the campaign of this former K. S. A. C. student, and the result of the battle will be viewed with interest.

BAKER HAS NEW GRADING METHOD

DESIGN CLASSES GET POINTS ON
PROBLEMS SOLVED

Total of 57 Points Necessary for
Passing—Points of 75 May Be
Carried Over

Professor Baker has instituted a new and interesting system of grading in his design classes. When the class has finished a problem the best solutions of it are picked and the following points are given: medal, 6 points per week; 1st mention, 5 points per week; 2nd mention, 4 points per week; 3rd mention, 3 points per week; no mention, 3 points per week deducted.

In order to make a passing grade for the semester a student must make a minimum of 57 points. A total of 54 gives a grade of unfinished, and a student receiving this grade must do an additional problem. One who receives less than 54 points fails for the semester.

In any given semester, points in excess of 75 may be carried forward to the next semester, but may not be carried forward for more than one semester. The faculty reserves the right to give no mention and to give less than three points per week. If two or more students tie for mentions, all receive the full number of points. For example, if a student receives second mention of a 10 weeks problem, he is credited with 40 points.

Miss Dorothy Knittle and Miss Lucy Stalling were dinner guests at the Pi Beta Phi house Thursday.

Miss Grace Derby and Miss Elizabeth Davis were in Salina last week where they attended the state library association.

Prof. J. W. Searson, chairman of the program committee of the Manhattan Commercial club, is holding a series of conferences with members of the committees to arrange the annual program.

Luke Is Having Too Much Fun to Come Back This Semester

"Hey, Wamego. Where ya been
all the time?"

This will be the greeting all Aggies will give Luke Gullfoyle, baseball captain for this spring, when he returns to school next semester. Luke is having too good a time to come back for the first term.

Since the baseball season closed last year and the Aggies walked away with the Valley championship, Gullfoyle has had a number of interesting experiences. He went to Denver and then north to play ball. He got as far north as Canada, but now he has followed the birds south.

"Wamego" will be back in school next semester and from indications of new material that has come to K. S. A. C., the Aggies will have another Valley winning team.

Ten Debates Scheduled

O. H. Burns, coach of debate, reports that prospects for debating are the best this year of any season since he has been at the college. There are 32 members of the squad already at work with a prospect of 10 intercollegiate debates ahead.

ANOTHER AGGIE IS SUCCESSFUL

DR. D. F. JONES, '11, IS PLANT
BREEDER IN CONNECTICUT

Has Issued Important Book on Bi-
ology and is Leader in Re-
search Work

Another Kansas Aggie has made good. Dr. Donald F. Jones, '11, who is now plant breeder for the Connecticut agricultural experiment station is joint author of a recent book on "Inbreeding and Outbreeding," published by J. B. Lippincott and company. The work is one of a series of "Monographs on Experimental Biology" being written by leaders in research along biological lines and is considered one of the most interesting that has appeared this year.

Doctor Jones was a Wichita boy and probably first became interested in plant breeding and genetics while taking courses in those subjects at K. S. A. C. under Dr. R. K. Nabours, and H. S. Roberts, formerly head of the botany department. After spec-

ializing in horticulture and forestry in his course here, Doctor Jones spent the next two years as assistant plant breeder at the University of Arizona, from there going to New York where he took the position of instructor in horticulture in Syracuse university. Later he took graduate work in plant breeding and genetics at Harvard and for the last three years has been at the Connecticut station.

Gobs To Stage Dance

Dry land sailors of the hill are planning their second annual Naval ball for November 11. The dance is to be held in Recreation hall, and all sailors are to appear in their dress blues. This does not mean that a man has to have his Sunday go to meeting clothes here in order to go to the dance, but simply that all men who can should wear the sailor uniform.

PREPS LOSE TO WAMEGO 40-0

WILL PLAY ABILENE NOVEM-
BER 5

Big Game of Season Will Be With
St. Benedict College at
Atchison

In a game characterized by its large number of forward passes and end runs, the School of Ags lost to Wamego high school by a score of 40 to 0 at Wamego, Wednesday afternoon.

The Wamego team was not more than five pounds to the man heavier than the Ags and perhaps the unusual number of end runs and forward passes tried by the high school team, showed that they realized the futility of the line plunge.

Wamego team has good interference, in fact, the best the Ags have met this season. In the first quarter "Hobe's" men were at one time within ten yards of the goal line but failed to make their downs. The Wamego aggregation was a fleet footed bunch which, with their good interference, made their end runs a success. Fairman refereed the game himself.

The next game slated for the Ags is for November 5 with Abilene high school. The big game of the season will be with St. Benedict college at Atchison.

THIS IS A GOOD TIME TO SELECT THAT WATCH

One cannot be too particular in the selection of a time-piece. For correct timekeeping, quality must have first consideration. At this season we are fortunate in having a large collection of fine watches moderately priced. If you can select one now we will have plenty of time in which to adjust it for you. If you wish it engraved it can be done leisurely and carefully. By waiting until late in the Fall when there is a holiday rush, it is not possible for you to get the same deliberate service that you can be sure of now.

Here are two particularly good watches:

Men's Gold-Filled Watch—In a twenty-year case; 17 jeweled movement; adjusted and timed; thin model; plain or engraved. Price \$30.00. Others, \$8.00 to \$75.00.

Women's Bracelet Watch—14 kt. solid gold case; 15-jeweled movement; a good timekeeper. Price \$37.00. Others \$24.00 to \$65.00.

STRATTON URGES AGGIES TO VOTE

BETTER MISS A CLASS THAN
MISS AN ELECTION

Says It Is Almost Treason Not to
Vote—Students Cast Ballots
at Y. M.

If you haven't already voted do so before the poles close, is the urge of Cliff Stratton, general secretary of the alumni association, to every student who is a qualified voter. Better miss a class than miss an election, he says.

"If there is any class in this country that owes it to himself and his state to vote, and vote intelligently, it is the college graduate and the college student," said Stratton. "To my mind, it is almost treason not to vote. The future of this nation depends on the active interest taken in the government by thinking people."

"I know it is popular in certain college circles to look down on politics and politicians. It oughtn't to be. The college man or woman who doesn't vote has no license to become a Pharisee in thinking or speaking of politicians. The politician is a much better type of citizen than the non-voter, for he at least realizes that some one has to run the government. The non-voter seems to believe the country will run itself. It won't."

"Of course if he doesn't know the names of the candidates for county offices, he can vote only on national and state officers. But he should do this. The city of Manhattan has made arrangements to take care of the student vote at the Y. M. C. A., although the absent voter under the law can't cast his ballot at any voting precinct."

For the benefit of students who wish to know who are candidates for the state legislature and district judges, Mr. Stratton has a complete list of these in his office in Room 28, Anderson hall. Students are always welcome at the alumni headquarters.

C. F. BAKER SUBMITS PLAN FOR GIRLS' DORMITORIES

Will Make New Hall Harmonize With
Other Buildings

Prof. C. F. Baker, head of the department of architecture, has submitted plans for the dormitory for freshmen women which, it is hoped, will be acted upon favorably. The hall of residence, to be erected as a single building, will be divided by fire walls into three distinct units, each unit to house fifty girls.

There will be a matron, parlors, reception rooms, and a dining room for each unit. An attempt is being made to have the building fully harmonize with the other buildings on the campus, and at the same time have more of the aspects of a home. Ample porches, terraces, and lawns have been provided with the view of creating a home-like atmosphere.

BEYOND THE HILL

Healthy lungs and a reputation for loyalty are the qualifications necessary for membership in the "Howling Hundred," a new pep organization in Grinnell college. Special meetings of the organization will be held daily after chapel.

Because of the excessive number of rent profiteers at the University of Illinois, more than 5,000 students resorted to the plan of having the list of profiteering landlords together with the prices they were charging published in the student publications.

Paddling is among the offenses punishable by suspension by the student senate at the University of Missouri.

Interesting among the list of papers on the exchange list of the Collegian is the White and Blue, student paper of Brigham Young university, the only Mormon institution of higher learning in the United States.

Coach Allen of K. U. in a recent pep speech to the students of that institution, vigorously flayed the politicians of the college for placing politics above football. He spoke especially of the different football men running against each other for different political offices.

Phillips university is giving the army intelligence tests to freshmen in the college in order to determine the general adaptability to college life, and also any special adaptation. The results were unusually high with 80.8% of the students making an A or a B grade.

Wisconsin, in an effort to revive the old time pep has arranged to have the men and women students of the college seated in separate sections of the bleachers for unified yelling. The experiment is being carefully watched by other colleges of the country.

K. U. Men Captured 4 O'clock Pepstir Says False Report

Time—3 o'clock Wednesday morning.

Place—1019 Bluemont.

Occasion—A message.

"Girls! Girls! two captures and a pep meeting at 4 o'clock a. m.," screamed the little pledge who had so reluctantly answered the phone at the command of those cruel seniors.

Confusion and excitement reigned, floors wavered under the weight of discarded clothing possibilities as wardrobes were emptied.

The Aggieville cop was aroused from his slumbers as, "the speeding seven," passed his beat, but the vigilant guards of our campus detected the oncoming throng. "Halt! where to?" came the command.

"Why e-r, to the pep meeting; two Jayhawkers caught," cried the excited girls all out of breath.

"Someone's foolin' you," the guards ventured.

The girls sneaked back home with less speed and spirit than they exhibited on the outward trip.

Moral—Alice says, "believe nothing you hear and only half what you see."

East Wants College Men

Dr. R. K. Nabours, head of the department of zoology, in an address at the Y. M. C. A. one evening last week told of the great opportunities in the near east for the college trained man. Dr. Nabours has recently returned to the college from a world tour in which he visited the war torn districts of Europe, parts of India and Russia and the far east. One thing that impressed Dr. Nabours was the large number of college men that were receiving positions in the near east. The bankers, trust companies, Standard oil company, and practically every commercial and business enterprise are placing none but college trained men.

At a recent meeting of the American Association of Engineers, the local chapter here decided to give to all new members of A. A. E. one year's subscription to the K. S. A. C. Engineer. This magazine is to be issued four times each year and will contain interesting information concerning the engineering work of the college, as well as information concerning all important work that has been accomplished throughout the year.

Don't throw away your dull safety razor blades. Have them resharpened for less than half the cost of new blades. Leave blades at Cooper's Barber shop, in the Main hall. On the campus. 10-6

CALDERWOOD AND POTTER WRITE ENGINEERING BOOK

Text Adapted for Use by Michigan
and Pennsylvania Schools

J. P. Calderwood, professor of steam and gas engineering, and A. A. Potter, formerly dean of engineering are the authors of a text book which has just come off the press.

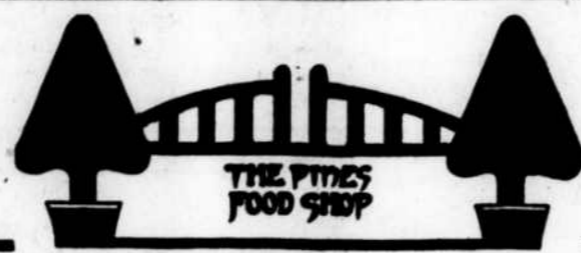

The book is entitled "Elements of Engineering Thermo-dynamics," and was adopted for use in their courses of study by the University of Michigan and Pennsylvania State college before its publication. Mr. Moyer,

who is the director of engineering extension in the state of Massachusetts, gave valuable assistance to the two Aggie men. The work is a revision of a former text written by Mr. Moyer and Professor Calderwood.

Must Be Soldier All Day

Major F. B. Terrill has made the request that from now on the rookies must act like real soldiers in every respect, from 8 o'clock in the morning until 5 o'clock in the evening on drill day.

KNOW HOW MUCH STUDENTS STUDY

HOME ECONOMICS GIRLS WORK AS MUCH AS ENGINEERS

General Science Students Average but 41 Hours Work for One Hour Credit

That student prejudices against certain subjects are founded on a substantial basis is demonstrated by the survey made in the spring semester of 1920 which was calculated to ascertain the number of hours spent by students on each subject taught on the hill. It was found that the subjects that are feared most by the average student are those that take the most time for one semester hour's credit.

The method of making the survey was to have each student report on blanks especially prepared for the survey the number of hours he spent on each subject in his assignment. The survey was made during the week ending March 20, which was an average week, there being no unusual demands made on the students in the different courses in the way of reports or quizzes.

From the data obtained in each class an average was struck of the time spent by the composite student in the class and a curve plotted placing the subjects in the order of the number of hours spent on a subject per semester hour credit. The curve had its highest points at 77 which was the average in piano and its lowest at 13, the average in ear training and musical appreciation. The musical department had the distinction of having the lowest and highest points on the curve.

The theoretical number of hours to be spent by a student for one semester hour credit is 54 according to the accepted system of two hours' preparation for each hour of class room work. Several classes exceeded this mark, but the number that exceeded was far below the number that fell short. The average of all classes in the chemistry department was 2 hours above the required 54 and the average of the classes in the history department was 1 point above the theoretical number. The average of the classes in the other departments ranged on down to 32 which was that of the Vet division.

The home economics and engineering divisions both averaged 48 hours for one credit. The boast of the engineers that theirs is the hardest course on the hill, requiring the greatest amount of work will have to be modified to include the statement, "except possibly the home economics division." The Ags spent only 46 hours on an average for each hour of credit obtained. The old basis for dispute between the Ags and engineers as to who does the most work is no more if the figures be accepted. The engineers are elected as the original sons of toil among the men students on the hill. The general science students averaged but 41 hours work in exchange for one semester hour's credit. The mystery as to why so many students start in other courses and finally are graduated from the division of general science is partially cleared up by the study of the figures contained in the table.

The median of all classes as plotted on the curve was almost ten hours below the 54 hours stated in the catalog as that required to do work of passing rank, being placed at 45.3 hours. Judging from the results of the survey, the belief that the Aggie students are a trifle more apt in their studies than those in the average college is well substantiated.

W. H. Olin Speaks at Assembly
Assembly program for this week will be held Wednesday, November 3 at the usual hour. The speaker for the day will be W. H. Olin, supervisor of agriculture for the Denver and Rio Grande railroad. His subject will be "On the Heights." In addition to the speech, Miss Florence Meyer and Miss Olivette Mitch of the music department will sing a duet entitled "May Morning" by Denzils.

Eleven To Ray Auto School
Eleven Federal board men of the automobile mechanics department were transferred Saturday to the Ray Auto school at Kansas City. The men who have been at K. S. A. C. for several months will continue their training at the Ray school under the board until ready for positions. They will then be sent out in placement training, still under the supervision of the board until it is evidenced that they are completely rehabilitated.

VETS REORGANIZE MEDICAL ASSOCIATION FOR THE YEAR

C. E. Sawyer to Head Organization—E. H. Barger Elected Vice President

The Veterinary Medical association of the college has reorganized for the year. The society is composed almost entirely of students in the veterinary division, and a few ag-

ricultural students. The purpose of the organization which meets every two weeks is to disseminate information of interest to veterinarians and animal husbandmen. Prominent veterinarians from various parts of the country, as well as members of the veterinary faculty frequently appear on the program.

The officers elected for this year are president, C. E. Sawyer; vice president, E. H. Barger; secretary, Kent R. Dudley; treasurer, Timothy Foley; marshal, Ray Weinheimer; assistant marshal, Glenn Kirkwood; critic, L. B. Bate.

Meetings for the college year will be held on the first and third Mondays of each month at 7:30 o'clock, in the Y. M. C. A.

KANSAS BOYS PLACE THIRD AT INTERNATIONAL CONTEST

Team Visited College for Week Before Making Trip to Georgia

Kansas won third place in the International Boys' club judging contest, held at Atlanta, Ga., October 19-20-21. The final summing up of the figures showed that Texas was first and Mississippi second.

Walter Atzenweiler of Huron, was third high scoring individual. The boys on the Kansas team were Atzenweiler, Raymond Davis of Emlingham, Clyde Smith of Oswakie, Dwight Williams of McLouth as alternate. Nevel Pearson, '20, state livestock club leader, is coach of the Kansas team.

The Kansas Boys' club stock judging team was given a week of intensive training in judging of the college stock here before leaving for the southern trip.

WALTER BURR RETURNS FROM MEETING IN MASSACHUSETTS

Is Kansas Delegate to Country Life Association of America

Walter Burr of the extension division has returned from Springfield, Mass., where he attended the meetings of the Country Life Association of America, as delegate from this state.

The delegates present were divided into committees which will spend the ensuing year investigating various phases of rural life, with the purpose of keeping the leaders informed on all up-to-date phases of the rural service movement. The results of the investigations will be reported at the meeting of the association next year.

Professor Burr was appointed a member of the committee on rural service organization, the duty of which is to find out what the national agricultural organizations are doing in social work, and what success they are having.

AGGIEVILLE NOW HAS MUSIC SHOP

OPENED LAST SATURDAY BY VERNON NOBLE

Expect to Carry a Complete Line of Musical Goods—Noble Is Former Aggie Student

Aggieville has a music shop. No longer will it be necessary to walk to town for those jazz records for your music machine. In fact, beginning tomorrow, you can purchase the machine itself or anything else in the musical line right here in our own little city. The first music store in the history of the baby metropolis was opened Saturday by C. Vernon Noble, a former student of the college.

Mr. Noble has remodeled the building formerly occupied by the Crowder cleaning and pressing plant, on the "main drag" through Aggieville and will be there ready to hand out to the public anything from a player piano to a jew's harp. The store expects to carry a complete line of musical goods and already has a fairly representative stock on its shelves and in its sales room.

Mr. J. B. Case of Kansas City, General and Mrs. McClaughlin and daughter of Camp Funston, and the members of the board of administration were guests of President and Mrs. W. M. Jardine at the Aggie-K. U. game Saturday.

R. G. Kloeffler, associate professor of electrical engineering, and Mrs. Kloeffler who teaches in the city schools, attended the State Teachers' association meeting at Topeka, Thursday.

R. A. Seaton, dean of the engineering division, returned Wednesday from a trip to Springfield, Mass., where he attended a meeting of the engineering section of the Association of Land Grant colleges.

The Kansas Architects society held its regular meeting at the college last Friday and Saturday. There were about 60 present. Among the Aggie graduates were C. W. Shaver and Miran Johnson, practicing architects at Salina.

SOCIETY

Pi Kappa Alpha has pledged Ray Randells of Anthony.

Miss Anna Sturmer expects to leave for Fairbury, Nebr., Tuesday.

Delta Zeta has pledged Miss Sarah Weide of Yates Center, senior in home economics.

Acacia held formal initiation services for Tom Sebring and Tom Allen Saturday evening, October 16.

Sigma Nu have held initiation services for Paul Manglesdorf, senior in agronomy.

Kappa Phi Alpha fraternity have pledged Clarence F. Agnew, senior in agronomy.

Prof. and Mrs. J. D. Walters left Saturday for Beloit for a visit at the home of their son, Dan Walters.

Miss Ruth Rathbone, '20, who is teaching in Perry, spent the week end at her home in Manhattan.

Miss Sarella Herrick, '19, of Topeka, came to Manhattan Saturday to attend the K. U.-Aggie game. She returned to Topeka Sunday evening.

Miss Francis Ewalt and Miss Nellie Yates, '19, teachers in Holton high school, spent the week end visiting friends here.

Miss Florence Helzer, Miss Bernice Fuller, Miss Annabel Garvey, and Mr. Charles Mathews, instructors in the English department, spent the week end in Topeka.

Miss Florence Bliss of K. U., assistant to Chancellor Lindley of K. U., spent the week end with Miss Katherine M. Bower of the English department.

Miss Henrietta Stiefel of Salina attended the Beta dance given Friday evening and the Aggie K. U. football game Saturday. Miss Margaret Lynch, also of Salina, who is attending K. U., was here for the game. They were guests at the Kappa house while in the city.

Theta Chi Gamma, honorary general science fraternity, met in F56 Wednesday afternoon for a business meeting.

Dr. A. A. Brecheisen, '17, is now engaged in practicing veterinary medicine at Eudora. In a letter received by the division of veterinary medicine, "Brecht" says practice is excellent; that he has more work than he can handle.

Miss Mina Harter and Mr. Paul Peach were married at the bride's home in Urbana, Ill., on October 14. Miss Harter has many friends in Manhattan and in the college. She attended K. S. A. C. in 1917. Mr. and Mrs. Peach will be at home on their ranch at Olathe, Col.

The following Delphos people visited friends and relatives at the college the last week end: Fay Hollis, Ethel Bridwell, Ruth Hockstetter, Dorothy Ballou, and Mrs. Emma Ballou; Ray Lazalere, Louis Ballou, Scotty Shultz, Bill Young, Miner and Kenneth Ballou.

The members of the Quill club met last week at the home of Miss Elizabeth Dickens, at 1230 Fremont. Miss Osceola Burr gave a talk on Pageantry. Refreshments of doughnuts and cider were served. The club will hold its next meeting November 9.

Klod and Kernel Klub was entertained last Tuesday evening at the home of Prof. R. I. Throckmorton, 825 Houston street. About 30 students and faculty members were present. After initiating 13 new members, the club spent the remainder of the evening playing cards. During the evening a lunch was served by Mrs. Throckmorton.

Miss Constance Lewin of Lindsborg and Mr. James Brady of Concordia, were married Wednesday at the Messiah Lutheran church in Lindsborg. Mrs. Brady was a student here in 1918. Mr. and Mrs. Brady will make their home at 712 West Sixth street, in Concordia, where Mr. Brady is assistant cashier of the Farmers and Merchants bank.

Every former Aggie student was asked to attend the K. S. A. C. reunion dinner at 6 o'clock Friday evening at the Presbyterian church in Topeka. President W. M. Jardine spoke on "The Future of the College." G. C. Wheeler, president of the Shawnee county alumni association, and Cliff Stratton, secretary of the alumni association, were on the program for brief talks. Mr. Wheeler acted as toastmaster. About 150 Aggies were at the dinner, most of them being teachers. This is the largest attendance on record for a K. S. A. C. reunion dinner.

Miss Wilma Davis and Mr. W. B. Seaman were married September 7, by the Reverend Hill of the First Methodist church of Kansas City, Mo. Mrs. Seaman, who is a former K. S. A. C. student is the daughter of Mr. and Mrs. W. J. Davis, 617 Leavenworth. After leaving college here she took a three year course in the University hospital in Kansas city. After graduating from the hospital she became dietitian for the Research hospital. Mr. Seaman is a business man in Kansas City, where they will make their home.

An old fashioned Hallowe'en party was given Saturday evening for a number of the faculty women at 1318 Fremont street. The hostesses were Miss Elsie Smith, Miss Mary McDonald, Miss Grace Hesse, Miss Mary Worcester, Miss Ruth Trail, and Miss Irene Huse. Stunts and old fashioned games were played. Refreshments of doughnuts and cider were served.

The marriage of Miss Margaret Schultz to Mr. George S. Clinton took place at 1:30 o'clock Sunday afternoon at the home of the bride's parents, 331 Osage street, with the Rev. Drury Hill Fisher of the First Presbyterian church officiating. Mrs. Clinton graduated from the home economics course of the Kansas State Agricultural college with the class of 1913. For the past four years she has had charge of the department of domestic science in the Manhattan high school. Mr. Clinton attended college here for several years. Mr. and Mrs. Clinton will be at home in Topeka where Mr. Clinton is employed in the architectural department of the Santa Fe.

Prof. and Mrs. A. M. Paterson entertained their card club Friday evening at dinner and cards. A three course dinner was served to 28 guests at quartet tables. The rooms were decorated appropriately to Hallowe'en. Prizes were won by Mrs. A. F. Piene, Mrs. Bessie Birdsall, and Captain Van Fleet.

New England club, composed of faculty women, was entertained Sunday morning at 1318 Fremont street with Miss Mary Worcester, Miss Irene Huse, and Miss Ruth Trail, as hostesses. A typical New England breakfast of brown bread, baked beans, codfish cakes, doughnuts, pumpkin pie, and coffee was served to 14 guests.

Announcement has been received of the marriage of Miss Caroline Ellen Nystrom of Scandia, and Mr. Aaron Johnson, Jr., of Manhattan, which took place October 20, in Belleville. The Reverend Stevens of the First M. E. church officiated. Mrs. Johnson took the short course here during the winter of '14 and '15, and Mr. Johnson attended summer school here this last summer. Mr. and Mrs. Johnson will be at home on the Johnson farm near Scandia after November 10.

W. W. Carlson, professor of shop practice, drove to Topeka Friday with several shop practice instructors to attend the meeting of the Kansas State Teachers' association.

SEATS 50c to \$2.00 - RESERVATIONS NOW

TO HAVE TORCH PARADE TONIGHT

ALL UNITS OF R. O. T. C. WILL PARTICIPATE

To Take Place Immediately Following Returns of Election—Will Be Led by College Band

All units of the R. O. T. C. will participate in a torchlight parade, on Tuesday evening after the returns of the presidential election are received. The parade will start at the Manhattan high school building and proceed through the business section of the city.

Immediately after the march the units will be dismissed, and plans are now in the making to entertain all the marchers at the theaters. The march will be made without arms. Led by the college band the scene will be most picturesque. Perfect order is assured after dismissal.

HAROLD T. BAKER SERIOUSLY INJURED BY SPEEDING TRUCK

Knocked from Bicycle Splitting Chin Open and Breaking Blood Vessel in Hand

Harold T. Baker, junior in agricultural engineering at K. S. A. C. was seriously injured at noon Saturday when he was thrown from the bicycle he was riding to the pavement at Twelfth and Fremont.

A Mid-Quinn truck turned north at a high rate of speed as Baker was attempting to turn east. The truck driver gave no signal of turning and as he was going so fast he did not keep on the right side, thus striking the rider who was knocked unconscious.

His chin was split open and a blood vessel in his right hand was broken. He received numerous bruises about the head and limbs. The truck driver took him to Doctor Colt's office for treatment.

KANSAS ARCHITECTS HOLD QUARTERLY MEETING HERE

President Jardine Gives Opening Address Friday Afternoon

The Kansas Society of Architects held their quarterly meeting here Friday and Saturday as guests of the department of architecture. The first session of the meeting was held in the rooms of the department Friday, at which time President W. M. Jardine gave the opening address.

Friday evening a banquet was held at the Pines cafeteria, at which time Miss Bess Curry sang. In the evening the members attended the Marshall theater as special guests to view the fire prevention films.

Saturday morning, with architectural students as guides, an inspection trip was made about the campus. Later in the forenoon the business meeting of the society was held in the engineering building. Saturday afternoon the members attended the football game. The society is composed of architects of Kansas and it is a representative body of the state.

Miss Holman Is Honored

Miss Araminta Holman, of K. S. A. C. was elected president of the Kansas Dinner club at a banquet held at the Elk's hall in Topeka Friday evening. Other officers elected were: Mrs. Kathryn Crawford, Topeka, vice president; Mrs. Willis Holmes Kerr, Kansas State Normal, second vice president; Miss Lottie Embleton, Topeka, secretary-treasurer. Miss Emma Hyde was toast mistress. Responses were made by Dr. Albert L. Corbin of K. U.; Dr. Helen B. Thomp-

son, K. S. A. C.; Mrs. Kerr, Miss Lucy McCoy, Kansas City; Miss Mabel Smith, Topeka.

Complete Election of Officers

The World Forum club met last week and completed its election of officers. Those elected are, reporter, Bess Hansen; marshal, Earnest Hartman; chairman of program committee, E. J. Jelden. The next meeting of the club will be December 13 in Recreational hall. Plans are being made for the World Forum that is to be held here February 18, 19, and 20. Some of the speakers that are to be here then are Fred B. Smith, who is one of America's best speakers, and Sherwood Eddy, for whom students that attended the convention at the Des Moines last year can speak.

Yea, Verily the Days of the High School Bluffer Are Numbered

The chronic and confirmed bluffer of high school used to hail with delight his advent into the new sphere of college life for one main and simple reason, that he would have at least two more years in which to practice his art before his bluffs would be called and he would have to study.

Alas and alack for him, those days are nearly past and gone forever. The high school and college authorities are beginning to anticipate the high school students' scheming and he will soon find himself caught up with his first attempt at hot air.

Comprehensive records of each student's scholastic achievements in high school are now being sent to the colleges on the advent of each student from the high school which he attended. Some remarks as to the student's ability, and character are also on the record.

This system is being developed more and more and soon the college freshman will find that the institution which he intends to "kid" knows more about his characteristics and ability than he does himself.

Have Barn Warming

An old fashioned "barn warming" will be held in the gymnasium Saturday night, to defray the expenses of the Stock Judging team to the International Live Stock show, which will be held in Chicago the week of November 15. Tickets may be secured from any member of the class in Form and Function. This "barn warming" will eventually become one of the features of the college program and no doubt will be cordially accepted by the students as a diversion as well as a means of supporting the Stock Judging team.

"Business Before Pleasure"

You have all seen and read about plays both good and bad, but when you read about "Business Before Pleasure" that comes to the Marshall theater on Thursday, November 9, you will have read about one of the best, if not the greatest. When Mr. A. H. Woods produced "Business Before Pleasure" he reached the last round of the ladder. On its initial performance at the Eltinge theater, New York, it was an overwhelming success, having met with the approval of all the critics, and proving to be the greatest laughing show of the twentieth century.

A. M. Paterson, professor in the animal husbandry department judged the Hereford cattle sold at the Henderson brothers sale at Alma last week.

Dr. C. W. McCampbell of the animal husbandry department, left for Lincoln, Neb., this week to act as judge in the "Little International," a students' stock judging contest to be held at the University of Nebraska Friday, November 5.

Dean Mary Van Zile spoke Wednesday at the Federation of Women's clubs on the subject, "In Service for the Girls of Kansas."

PURPLE MASQUE TRYOUTS OVER

ONE HUNDRED AND SEVENTY-FIVE SEEK PLACES

Committee Makes Complete Record of Each Student Trying for Cast—Considering Plays to be Used

One hundred and seventy-five persons tried out for the Purple Masque play in the preliminary tryouts which were held during the past two weeks. The Purple Masque had planned to close the tryouts a week ago Friday but on account of the great number of persons who wished to try out additional tryouts were held three days last week.

In accordance with the new system worked out by the Purple Masque committee a permanent record has been kept of each person who tried. The name appears in alphabetical order in a big ledger together with such points about each person as type, previous dramatic experience, and good or bad points which showed up in the tryout.

The play committee is now busy reading plays in order to select the best one of those available for amateurs. As soon as the play is picked, additional tryouts will be held for those persons who showed good possibilities in the tryout and are the type needed.

The first play will be given sometime in December under the direction of Miss Florence Helzer.

ASK CO-EDS TO LEND DRESSES

NEED MORE GIRLS TO ACT AS MODELS

Dresses of Wool Are Preferable—Low Heeled Shoes to Be Worn by Demonstrators

Miss Louise Glanton, professor of clothing and textiles, has issued an appeal for girls having suitable dresses to assist in the Clothes Congress to be held November 20. The girls will be requested to wear their dresses at the clothing demonstration given in Recreation hall in the afternoon.

Although managers of Cole's store have kindly offered use of any appropriate gowns which they have in stock, Miss Glanton would rather have at the demonstration dresses that have actually been worn. She would also like to have the girls wear their own dresses, as they are unlikely to appear to advantage on anyone else.

A number of girls have already volunteered their services and dresses, but more are needed. Any girl possessing a dress which she thinks might prove suitable, is asked to notify Miss Clara M. Smith at the Iota Psi house, or Miss Ruth Harrison, 698 Red.

It is preferable that the dresses be of wool, with long sleeves, and with the skirt of appropriate length. Low heeled shoes will be worn by all the girls taking part in the demonstration. Girls who are not subject to stage fright, are especially desired to act as models in the exhibit.

Alpha Tau Omega were guests of honor at the smoker held at Elk's hall Thursday evening. The affair was a get acquainted party given by the men's Pan Hellenic. The speakers of the evening were Prof. J. E. Kammerer, Prof. H. H. King, and Ray Watson.

HARD FOUGHT STRUGGLE TO K. U. 14-0

(Concluded from page one) ends time to go down under the boots.

Aggies Fight in First Quarter

After the K. U. fluke touchdown in the first quarter the Aggies started in to regain the points lost. They interchanged punts, with Kansas once, then tore off two first downs in succession by end runs and bucks, then were held and Huston dropped back to kick. A bad pass went out of his reach far over his head and Kansas recovered the leather on the Wildcat 30 yard line.

On the next down Little fumbled and Stauffer fell on the ball. Huston punted out of danger and K. U. made a first and ten by inches. Again a University man fumbled and an Aggie recovered and again the Aggies started down the field with a run around end for 16 yards by Brady Cowell. Huston dropped back to try for a drop kick, but missed. The ball went to K. U. on her 20 yard line and Lomborg immediately knicked out of danger. An interchange of punts filled the rest of the quarter.

K. U. Scores Touchdown

The second quarter started auspiciously for the Ags. Mandeville's fumble on the first down going to our warriors, but after two incomplete trials at passes Mandeville redeemed himself by intercepting another try. Another interchange of punts took place with no appreciable gain on either side, then Welch, University fullback, fumbled and Gatz fell on the ball.

The Wildcats gained but were penalized and forced to kick. Another punting struggle ensued, then came the sudden K. U. offensive and score after an intercepted Aggie pass. Huston kicked to the shadow of the K. U. goal and Welch returned 15 yards. On the next play Mandeville fumbled and Sebring retrieved the leather. K. U. drew a penalty of 5 yards and the Aggies made 9 yards on a fake kick in which Huston carried the ball. The whistle blew for the half with the oval on K. U.'s 20 yard line in the Aggies' possession. This was the closest the Aggies came to puncturing the enemy's goal line.

Third Quarter Aggies' Own

The third quarter was the Aggies' own. They outplayed K. U. in this period, but lacked the scoring punch when within the danger zone. The first part of the quarter was a repetition of the kicking duel that had featured the other periods. About the middle of the period Yandall dropped a pass that had been completed when he was thrown heavily by a University tackler and Reid fell on the leather.

On the next play Sears intercepted a pass, but Hinds was thrown for a loss on the next down and Huston kicked. K. U. was penalized 15 yards and the ball was punted out by Bunn on the first down. Another pass was intercepted by the University. On the second down after an incomplete pass, Huston intercepted a K. U. try at pass and made a 30 yard run down the field protected by some pretty interference. Again the Aggies lacked the power to work the pigskin across and kicked. Bunn punted on the first down, and the quarter ended with the ball in the Wildcat's hands on their own 45 yard line.

Huston Misses Drop

The opening of the fourth quarter saw an attempt by Huston to score a 55 yard drop. He missed by some 15 yards and Lomborg, University safety, scooped the ball in and returned it 30 yards to the original line of scrimmage. Another punting duel ensued in which the Aggies by virtue of fumbles were pushed back to their 15 yard line. Here Axline, who had gone in at quarter, instead of kicking called an end run

and carried the ball for a 35 yard gain.

The Aggie line seemed to go to pieces on the next two plays and almost as much as Axline had gained was lost and Huston kicked. The last minutes of the quarter found the Aggies with the ball on their 15 yard line. Huston fooled a punt and the enemy were on the Wildcat 30 yard line.

They completed a pass up and were well within our 20 yard line. Here the Wildcat team rose up and hurled the Jayhawk battlers back without a gain for three downs and frustrated an enemy attempt to pass over the line. The game ended with the ball in our possession on the 23 yard line.

From 80 to 100 men attended the second annual field superintendents' short course that was held by the dairy department last week. Those that attended are managers of creameries and field superintendents of cream buying stations.

Dr. Helen B. Thompson returned from Springfield, Mass., last week where she delivered a speech to the Association of Land Grant colleges October 19. Doctor Thompson is secretary of this organization and was a delegate from this college.

Take advantages of our 20 per cent shoe sale now. Watson's Shoe Store.

SENIOR ROYAL PURPLE FEE TO BE FIFTEEN DOLLARS

Class Has Set Goal for Selling at 80 Per Cent of Student Body

The window opposite the post office opened yesterday for the payment of the senior Royal Purple assessments which are to be \$15 per senior. Twenty five cents will be added to the senior fee for each day that the assessment remains unpaid after November 20.

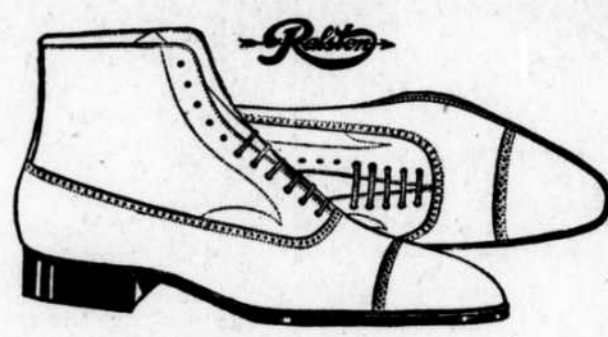

At the senior meeting Friday evening the officers were installed and the assessment was decided upon. The class voted to pay the editor and business manager of the Royal Purple a minimum salary of \$500 each. This is the same as the salaries of last year.

The class has set its sale goal at the 80 per cent mark. That is, they intend to sell class books to at least 80 per cent of the students.

The intention of the committee is to have all the photographs finished and in the engravers' hands shortly after Christmas. This is in order to give the publishers the needed time to do a first class job on the book.

Shoes at 20 per cent discount. Watson's Shoe Store.

Aggies get 20 per cent discount on shoes at Watson's Shoe Store.

BREEZY in style, graceful, but masculine in their sturdiness, RALSTONS will strengthen your conviction that to the man who cares for appearance there's no asset more valuable than a really good shoe.

Our employees are the best. If you don't trade with us we both lose money

THE KANSAS STATE COLLEGIAN

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, FRIDAY, NOVEMBER 5, 1920

NO. 16

AGGIES GO TO ANNUAL TIGER TAIL TWISTING

WARRIORS' CONDITION GOOD FOR MISSOURI BATTLE

BACHMAN'S BRAVES HIT STRIDE

Team Is Rounding Into Form—Old Fight and Support of Students Will Win

Oh, me! Oh, my!
Won't we black
That Tigers' eye!

The sentiment of the Aggie yell is prevalent among the Aggie gridders and the student body as the time for the annual contest between the Wildcat and the Tiger draws near. The Aggie studies are getting ready for a taste of the Tiger meat that they are confident the Bachman gladiators will bring back with them from Columbia.

While the succulent flesh of the Tiger is not such a rarity to the Wildcat as the meat of the Jayhawk, still it is very acceptable. The long deferred feast on Jayhawk steak will be all the more welcome when it finally comes, but in the meanwhile, Aggie football fans have to live on a carnivorous diet and as Tiger chops have come to be a staple with them they are whetting up for the annual feed.

Good Chance For Victory

The Wildcats have as good a chance as ever in their history to register in the win column against old Missouri next Saturday. The lopsided score rolled up against the Show-me lads by the Sooners last Saturday is proof that the Tiger line is not so impregnable as it was touted to be at the first of the season and the improved showing of our team last Saturday gives reason to believe that with another week to polish off the rough spots the Aggies will be at the top of their stride in the Missouri game, and the top of the stride of the 1920 Aggies will be quite an elevation, if followers of Aggie football can be believed.

The team found itself last Saturday, and although it was outkicked by the Kansas team, it fought as game a fight as has ever been seen on Ahearn field. Our backs and ends seemed not to be able to break up the few passes that K. U. tried and it was by virtue of this fact that K. U. made her only earned score of the game. Outside this one superiority of K. U. men over Bachman's braves, the Wildcats outplayed the visitors in every department of the game, lacking only the scoring punch. This week's practice should develop that punch. For that matter, the Aggies always seem to have the punch against Missouri if they do not against any other team they play during the season.

Improvement In Aggie Line

The most outstanding feature of the play Saturday was the great improvement in the Aggie line. Against the hard charging K. U. forward wall, touted as probably the best in the Valley, the Wildcats presented an impregnable front as is attested by the fact that the University made only four first downs during the game and that these first and tens were made on passes or end runs.

The playing of Stauffer at right tackle was particularly encouraging. The big fellow has found himself finally and time after time went through the K. U. line and downed a back for a loss. Bear in mind the fact that he was playing against Captain Nettles of K. U., the best they had to offer. The shifty work of Hinds and Brady Cowell in the backfield drew much praise from officials and visiting scouts. With good interference such as was shown at times Saturday these two are good for long runs in any man's game. The interference displayed in scrimmage this week is showing better at every practice.

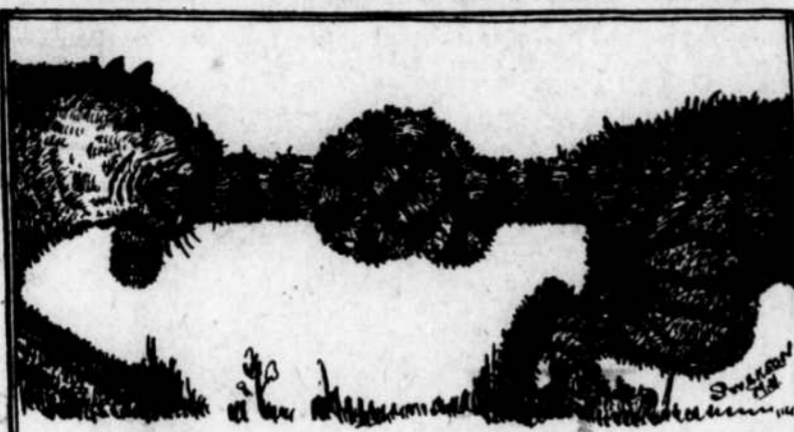

Dope Favors Missouri A Trifle

The dope favors Missouri a trifle as both the Tigers and the Jayhawks beat Ames and the Jayhawk cleaned the Wildcat by two touch downs. However, one of the touch downs was fluke and the other had a slight element of luck. The Aggies are being coached in breaking up aerial play which was what made the K. U. counter. Missouri is not particularly strong at this style of play, and the Aggies at this writing look as though they should outmatch the gold and black in any other phase of the game.

Have Hoodoo On Missouri

Besides, we're counting on the hoodoo that the Aggies seem to have on Missouri to prevail as the K.

NOVEMBER 6, 1920—THE FIFTH KNOT

1915—Wildcats 0; Tigers 0.
1916—Wildcats 7; Tigers 6.

1917—Wildcats 7; Tigers 6.
1919—Wildcats 6; Tigers 6.

U. jinx does against us. In the last five years we have played Missouri four times, the only year that a game was not played being the S. A. T. C. season of 1918 when the 'flu' epidemic caused a cancellation. In 1916 and 1917 we won by the narrow margin of a goal from touchdown, in 1915 we tied 0-0 and in 1919 we were tied 6-6 by virtue of two drop kicks by Dewey Huston and failure to kick goal from touchdown by Missouri.

Nearly 1,000 students promised at assembly on Wednesday to be at the 5:50 train Friday morning to see the warriors off with a cheer. It's pep like that that makes a team get down and fight to the last second of the last minute of play. That fact was demonstrated last Saturday. Missouri is going to see a real game Saturday.

SEAT SALE TO BEGIN MONDAY

RESERVES FOR AMES GAME TO BE HAD AT NICHOLS

No Seats To Be Held After Friday Night—Sale Closes Saturday Noon

The reserved seats for the homecoming game with Iowa State on November 13 will be on sale next Monday, November 8. The board for the seats will be in the athletic office in Nichols gymnasium.

The seats in the inclosure will be reserved for the alumni and all the rest of the seats on the north and the south sides of the field will be open to the students and public. The seats at the east and the west ends of the field will not be reserved. There will be 1,200 seats inside the inclosure as there were last Saturday.

The price of the reserves will be 50 cents each and all reserves must be paid for before Friday night at 6 o'clock. The athletic office will be closed at noon Saturday so all tickets must be purchased before that time.

ELECTION NEWS OVER WIRELESS

MESSAGES RECEIVED BY THREE AGGIE STUDENTS

Returns Reached Here Half Hour Before Official Telegram

The radio station at the K. S. A. C. physics laboratory got the first results of presidential election by wireless one half hour before the official telegram was received in Manhattan Tuesday evening. The first official electoral vote was received shortly after 12 o'clock. As soon as the messages reached Washington they were received from time to time from the station at Arlington, Va. Several messages were picked up from the big naval station at Annapolis, Md.

Operators at the station Tuesday evening were Carl Keller, who during the world war was chief operator on the U. S. S. Mississippi, Herbert Rose, and Herbert McClelland, operators in the United States Air service, all of whom are now students here.

At the week ending October 30 the total enrolment of K. S. A. C. was 2,536.

According to the amount of 5 pound boxes of candy sold after the K. U. football game, the girls of K. S. A. C. are the best at picking winners.

ELECT THREE TO AUTHORS' CLUB

COLLEGE CONTRIBUTES THREE NEW MEMBERS TO SOCIETY

President W. M. Jardine, Dr. R. K. Nabours and Miss Elizabeth Dickens Elected Recently

Manhattan, the "Athens of Kansas," as it is known among the literary folk of the Kansas Authors' club, has contributed three new members to the club this year. They are President W. M. Jardine, Dr. R. K. Nabours, professor of zoology, and Miss Elizabeth Dickens, junior in industrial journalism. Prof. J. W. Searson, head of the department of English, is president of the club.

The society was formed in 1904, and had at that time only a small membership in and around Topeka. Now there are more than 350 members, including the leaders in journalism and advanced English work, and those who have achieved commendable attainment in any line of literary activity.

Each Kansas district has a vice president; Prof. N. A. Crawford of the division of journalism and printing, represents the fifth district.

The big meeting of the year is held in Topeka sometime during the last of January, when the annual awards are made and a literary program is presented by Kansas authors and speakers. This year the meeting will be followed by a reunion and a banquet.

Besides the newly elected members, the following residents of Manhattan are members of the club: Prof. J. W. Searson, Prof. R. W. Conover, Prof. J. R. MacArthur, Prof. H. W. Davis, and Miss Ada Rice, of the department of English; Prof. N. A. Crawford and Prof. C. E. Rogers of the department of journalism; Walter Burr, director of rural service; E. L. Holton, dean of education; Miss Clementine Paddelford, editor of the Kansas State Collegian; Mrs. Mattie Toothaker Kimball, special feature writer; and Mrs. Sarah Ulrich, poet and feature writer.

MEN TO DRILL AND PLAY FOOTBALL IN R. O. T. C.

Part of Regular Periods Given for Practice Games Between Companies are Planned

All companies of the first and second battalion of the R. O. T. C. here are organizing football teams. Games between the teams are soon to be scheduled. Part of each drill period is to be set aside for the practice of those who try out for the teams. Quite a number of men have signed up for practice.

Football is not the only way in which the monotony of R. O. T. C. is to be broken, for all of the companies are arranging for social functions of one kind or another. Company F is planning to have a smoker on the night of Wednesday, November 10. All arrangements have not yet been completed.

ATHENIANS CHOOSE TEAMS FOR DEBATE TOURNAMENT

J. Wheeler Barger Is Coaching Squads—Says Men Are Working Hard

Athenian literary society will be represented in the debate tournament by Lee Parish, Frank Swanson, and V. V. Stambaugh, affirmative; and Hubert Collins, H. R. Priestly, and J. J. Seeright, negative.

"The squad has been working hard on the question and will no doubt show up well in the tournament," says J. Wheeler Barger who is coaching them.

SEVEN STUNTS SELECTED FOR POP PROGRAM

ALL ORGANIZATIONS START WORK AT ONCE

Y. W. AWARDS CUP TO WINNER

Two Literary Societies, Four Sororities, and Press Club Place—Expect Clever and Original Program This Year

From the 15 stunts presented at the Aggie Pop tryout Tuesday evening the seven best stunts have been chosen for presentation Pop night, December 3.

The organizations which placed in the tryouts are Alpha Delta Pi, Kappa Kappa Gamma, Eurodelphian, Ionia, Aggie Press club, Chi Omega, and Delta Delta Delta. The names of the stunts will be announced later.

Other organizations who presented stunt plans before the committee of selection were Pi Beta Phi, Delta Zeta, Iota Psi, Browning, Webster, Alpha Beta, Athenians, and Franklins.

This year all of the ideas were unusually original, clever, and well worked out. This fact made it exceedingly difficult for the committee to place the stunts.

The committee on selection were Dean Mary Pierce Van Zile, Miss Jessie Machir, Miss Florence Heizer, Miss Irene Dean, Dr. J. G. Emerson, and H. J. Hill.

Casts are being chosen for the respective stunts and material for the productions gathered together. To the winning organization will be awarded the silver loving cup which is presented by the Y. W. C. A. each year. Honorable mention will be given to two additional stunts which have merit.

Aggie Pop night is one of the biggest nights of the year for at that time students of this institution put on stunts which would make the lives of vaudeville managers much easier, if they were only a little more appreciative and knew a good thing when it is set before them. For cleverness, originality, and beauty stunts which have been shown since the introduction of "Pop" night into the life of this school are unsurpassed anywhere.

The silver loving cup was won by the Aggie Press club last year and this organization placed again this year in the tryouts. Needless to say the competition for recognition in this contest ranks with that shown in other collegiate contests.

TELLS OF TRIP AROUND WORLD

CENTRAL EUROPE IN NEED OF FOOD AND CLOTHES

France Is Recovering Rapidly—England Wants Germany to Gain Socially and Economically

"Do the people of the central empires know they have been defeated? They certainly do, and they show it in their hungry looks, lack of good clothing, and the prevalence of substitutes for food and clothing," declared Dr. Robert K. Nabours in speaking on "From Kansas to Peshawar and on to Kansas," before the Science club at a meeting held Monday, November 1, in the Domestic Science hall.

"Well dressed, apparently well fed, carrying the motto, 'forget the war,' cheerful and busy, the French are certainly recovering rapidly," continued Doctor Nabours. "Germany's best friends today are those who were her worst enemies during the war, the British. That Great Britain wants Germany to get back on her feet socially and economically, is one of the most outstanding features in international affairs today."

Besides telling of the conditions in western and central Europe, Doctor Nabours told of the conditions in eastern Europe and India as he found them.

Doctor Nabours has just returned from a trip around the world and he is perhaps better acquainted with the conditions of Europe and India than any one in the middle west.

K club sold magaphones at the K. U. Aggie game. The funds raised will be used to promote the best interests of the athletic men.

Second Grand Naval Ball

Ex sailors are giving their second grand naval ball in the Recreation hall November 11. Many readers of the November 2 edition of the Collegian received the wrong impression concerning this function. Therefore, we wish to correct it by saying, that no one will be admitted unless he is wearing the navy uniform which is dress blues.

Bryson Leads Contest

H. G. Bryson is leading the Collegian contest this term with 157 inches published, Milton Eisenhower follows with 153 and Luella Whan is third with 147. The winner of this contest receives a prize of \$10.

Industrialist contest gives first place up to date, to Josephine Hemphill, second to M. D. Laine, and third to H. C. Spencer.

LEGION ELECTS NEW OFFICERS

COMPLETE PLANS FOR RED CROSS MEMBERSHIP DRIVE

Town To Be Canvassed—May Excuse Workers from Classes Thursday Morning

At the regular meeting of the Pierce-Keller post of the American Legion, officers for the coming year were elected and plans completed for the Red Cross membership drive to take place Armistice day. Colonel Geo. C. Frank was elected commander to succeed Prof. H. B. Walker. Other officers elected were vice commanders, Merle Collins and A. A. Holtz, adjutant, F. M. Apitz, finance officer, E. C. Johnson. The five members of the executive board elected were all representatives of K. S. A. C. They are Dean R. A. Seaton, Arthur Brewer, O. W. Price, Captain Humphreys and Prof. H. B. Walker. N. L. De Armand was elected post historian.

The Red Cross membership drive is to be conducted by one hundred members who will volunteer for service the morning of the eleventh. The town is to be canvassed by streets, four men being assigned to each street. It is expected that the town will be covered by noon. Membership in the American Red Cross is open to anyone by the payment of such amount as he may see fit. There is no limit.

It is the desire of the Legion to secure as many college men as possible for this work and to that end efforts are being made to secure excuse from classes for all members willing to aid in the drive.

There will be a meeting next Monday night, November 8, from 7:30 o'clock to 8 at the Community house in which final preparations will be made for the drive. The commander urges that all members be present at this meeting.

NEWSPAPERS MOLD IDEALS OF COUNTRY, SAYS DILLON

K. U. Professor Tells Journalism Students of Fields for Service

"All college men must uphold the ideals of the American newspaper service since the clean newspapers mold the ideals of the nation," said F. W. Dillon, assistant professor of journalism at the University of Kansas, when addressing the students of journalism at the regular Monday seminar.

Professor Dillon has been in advertising service in England and on the continent, and for the past few years has been in the newspaper service in Erie, Pa.

Mr. Dillon confined his remarks for the most part to the newspaper profession and the field which the student finds open upon leaving school.

"An ideal is the outstanding qualification a student should have for his new job," said the professor.

Have First Faculty Recital

The first faculty recital was given Sunday afternoon at the college auditorium at 4 o'clock. Ten numbers were given by Miss Fanny Kellar as pianist and Miss Helen Hannan as violinist accompanied by Miss Mabel Leffler. The next faculty recital will be given by Miss Bess Curry and Miss Gladys Warren, Sunday afternoon, November 7, at 4 o'clock.

Edith Mueller of '20, home economics instructor at Stockton, spent the week end visiting student friends. A. C. Hancock of St. Francis, Charles Cloud of Douglas, J. F. Eggerman of Leoti, and Homer Willis of Cherokee were week end guests at the Kappa Sigma house.

COLLEGE WILL SHOW CATTLE AT THE ROYAL

WILL BE SENT TO KANSAS CITY NOVEMBER 11

STOCK TO COMPETE AT CHICAGO

Angus Steer Who Won Grand Championship at State Fairs to Be Entered—Most of Animals Are on Show for First Time

The animal husbandry department of the college will be represented at the Great American Royal stock show held at Kansas City November 13 to 20, by two carloads of feeder calves and 14 head of other show cattle as follows: Herefords, three senior yearlings, five junior yearlings, and one yearling calf; Shorthorns, one senior yearling and one junior yearling; Angus, one senior yearling; Galloway, one senior and one junior calf.

Angus Steer To Compete

The Angus steer who won the Grand Championship at the Topeka and Hutchinson State fairs will compete again, and so also will the first prize junior yearling Hereford at these two fairs. Most of the other animals entered have never before been shown. As the Royal is exclusively a cattle show, no other college live stock will be entered.

Rivalry Among Breeders

That the college show cattle will at the Royal meet the keenest competition ever experienced at any cattle show, is almost a certainty, according to Dr. C. W. McCampbell, head of the animal husbandry department. Never before has such rivalry among breeders been evidenced, especially on the fat steer class. If the stock entered by the college win honors, they will do so over the strongest competition and the largest number of entries ever faced by the college show offerings at any previous Royal.

The cattle will leave Manhattan November 11 in charge of Prof. C. E. Aubel, of the animal husbandry department, and A. D. Weber, college herdsman. Every member of the department is planning on spending at least one day at the show.

Cattle To Be Sent To Chicago

After the Kansas City event, the stock will be shipped to Chicago to compete in the International Livestock show held there November 27 to December 4. In addition to the cattle, 50 head of breeding sheep and three carloads of western fat lambs will be shown at Chicago. Last year at this exhibition, the college won the championship on a carload of western fat lambs.

AGGIE ALUMNUS GIVES ADDRESS

WALTER H. OWEN, '89, RETURNS TO ALMA MATER

"Have a Vision and Gain the Heights That Lead to Prominence," He Says

"Mike Ahearn doesn't know defeat," said Walter H. Owen, a K. S. A. C. alumnus, who spoke in chapel Wednesday morning.

Mr. Owen was one of the class of 25 seniors who graduated from the college in 1889. He has since been connected with the faculties of several prominent universities and colleges, Colorado Agricultural college, and Iowa college among them, and now holds a prominent position with the Rio Grande railroad. Several members of Mr. Owen's class were present and greeted him as he came to the platform.

The subject of the speaker's address was "On The Heights." "Get a good footing," he said, "and make haste slowly."

"We can be what we want to be," he continued, and mentioned several self-made men who had graduated here and elsewhere who are now prominent.

"Have a vision, and by that you may gain the heights that lead to prominence," were his closing words.

Other features of chapel were the duet by Florence Myers and Olivette Mitsch entitled "May Morning," and the two minute pep speech by Ray Watson.

Miss Schell and Miss Everhardy were Tuesday dinner guests at the Phi Gamma house.

FRIDAY, NOVEMBER 5, 1920

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Aggies at the top of conference athletics by 1922.
4. Clean politics.
5. Greater cooperation between alumni, students, and faculty in bringing athletes to K. S. A. C.
6. Remodeling of the auditorium stage.

"A PROPHET WITHOUT HONOR"

Why don't the papers play up a sport that is of such interest to the residents not only of Kansas but of many other states in the Union? Before the game with K. U. telegrams were received from Hawaii, Ohio, California, and Missouri, and letters from nearly every state in the union. Yet our esteemed newspapers give us a half column about half-way down the sheet and report the game in a half-hearted manner.

Perhaps the trouble may be traced to the desk of the sport editor and he or she may be able to explain. From the writeups of the games this fall, one is led to believe that the sport writers are graduates of a home economics course in some neighboring institution.

The social column is full of pep; the annual convention of the "League of Barbers" meeting to discuss ways and means of making two hairs grow where formerly there was but one, always gets a large headline and their dope is never shaved down to a half column. Let some politician come to the city who will perhaps draw an immense crowd of 40 or 50 to the court house and the Mercury and the Nationalist will strain their remaining suspender button to write long articles about the momentous occasion, but a great football game with a gathering of over 6,000 persons only requires passing comment and this comment is not entirely of a boosting nature.

Listen to the Nationalist with this doleful heading to its story of the annual classic; "Aggies Are Pushed Aside." Just like that—"pushed aside." Shades of "Dad" Croyle, Harvey Roots, Jake Holmes, Bunt Speer, Carl Rhoda and other famous Aggie heroes! What do you think of that? "Pushed Aside," how pregnant with football lore! "Piff" and the Aggies falter, "puff" and the game is over. But let us read farther—we will not have far to go for this paper, like the Mercury, has the same motto when it comes to reporting football games, and that is "Brevity is the soul of wit." "The game was a disappointment to local followers." Until reading this in the Nationalist congratulations on the splendid showing of the team was all that the athletic department had heard. Again we quote: "On forward passing K. U. outshone the home team and on Aggie attempts at the aerial game covered the men at will." Easy enough, wasn't it?

Like the Mercury—in fact there seems to be perfect harmony between the two—the Nationalist gives a part of its front page and a trifle larger type in announcing to its readers that the Aggies were pushed aside, "lights and slow music." On every hand the "disappointed local followers" are congratulating the team and Coach Bachman on their football knowledge and their never-say-die spirit and several have voiced in no uncertain terms their opinion of the way the Manhattan papers handled the story of the game.

The Kansas City Star gave three quarters of a column to the game but the home papers set aside nearly 12 inches of space, half of which was given over to the lineup and summaries. Again in the Kansas City Star of Tuesday, November 2, we find a half column devoted to a story of the game that gives the Aggie team some of the credit it so justly earned.

One more event that was never mentioned by either Fay or Ed and that was the cross country run that took place just prior to the game between teams representing the University of Kansas and the Kansas State Agricultural college. Over a five mile course the home speed merchants nosed out the flyers from the Kaw reservation 24-31. Watson of Olympic fame led the field in the fast time of 24.3, closely followed by Kuykendahl, a team mate. But why mention it? The Mercury of Monday night gave a report of a cross country event between Princeton and Yale but never a line about the Aggie-K. U. race. Thank heavens the citizens of Manhattan have shown that the team has their loyal support and backing for if the boys had to depend on the sport writers of the Nationalist and the Mercury to stir up enthusiasm the game would be dead and the burial ceremony would receive a half column, half way down the page in small black type.—M. F. Ahearn.

ANNOUNCEMENTS

Second number of the series of music recitals will be given at 4 o'clock Sunday afternoon in the auditorium by Miss Gladys Warren and Miss Bess Curry.

Division of agriculture will give a barn dance tonight at the gym.

Y. W. C. A. campaign for the sale of Artist series tickets lasts until Monday evening at 5 o'clock. All tickets which are bought within this time may be reserved by mail before next Monday, the special day for reservation at the Co-op.

Junior-senior—Freshman hockey game Monday at 5 o'clock.

All students interested in a Radio Science club meet this evening at 8 in C26.

Browning literary society will give their debate program tomorrow afternoon at 1:30 o'clock.

Company H will give a mixer this evening at 8 o'clock at the Women's League building.

Ten students are wanted this afternoon to work on the target range at 40 cents an hour.

The Rifle club schedule has been changed as follows: Monday, Tuesday, and Wednesday evenings from 5 to 6 o'clock, Thursday evening from 4 to 6 o'clock, Friday evening from 4:30 to 7:30, and Saturday evening from 4 to 10:30 o'clock. Rules for shooting are posted on the bulletin board.

Quill club meets Monday evening at the Sigma Phi Epsilon house.

Tomorrow is the day for inter-society debates. At 1:30 o'clock the Eurodelphian affirmative will debate the Alpha Beta negative in Web-Euro hall. At 3 o'clock the Ionian affirmative will debate the Euro negative in Hamp-Io hall. Winners of the afternoon debates will debate Saturday evening at 7:30.

Elva Price a former student at K. S. A. C., spent the week end visiting student friends. Miss Price is taking a special course in physical culture at the state normal.

Don't throw away your dull safety razor blades. Have them resharpened for less than half the cost of new blades. Leave blades at Cooper's Barber shop, in the Main hall. On the campus. 10-6

Lola Burger, kindergarden instructor in the Emporia city schools, spent the week end with her sisters Leslie, Emily and Christene who are in school here.

Miss Myrtle Zener, secretary for vice-president Willard, returned Tuesday after a months' vacation spent at her home in Kansas City and visiting relatives in Illinois and Indiana.

Miss Anna Sturmer, instructor in the department of English, went to her home in Beatrice, Neb., Tuesday to cast her vote.

Solicit Subscriptions

Block and Bridle club is soliciting subscriptions for the "Barn Warming" which is to be given in Nichols gymnasium Saturday evening, November 6. This method is taken to help defray the expenses of the Stock Judging team, which goes to Chicago on Thanksgiving to the International Fat Stock show. Music will be furnished for the dance by the best local organizations. Classes were visited during the week and subscriptions raised. Every one is invited to attend the dance and give the team the helping hand.

YOU know how prices have been; pretty high. When we saw there wasn't much chance of lower costs, we just decided we'd mark prices down anyway. We've done it; never mind whether we lose or not; you win.

SALMON WILL GO TO CHICAGO SHOW

WILL REPRESENT STATE AND CROP IMPROVEMENT GROUP

Ten Thousand Dollars to Be Given in Prizes for Grain Contests—Many Kansas Farmers to Exhibit

S. C. Salmon, professor of crops, will represent Kansas and the Kansas Crop Improvement association at the International Hay and Grain show to be held at Chicago in connection with the International Livestock show from November 27 to December 4.

While in Chicago Professor Salmon will also attend the meeting of the International Crop Improvement association to be held December 1. At that meeting the work of the different state grain growing associations will be discussed and plans made for more and better work in the future. The International Crop Improvement association includes all the important grain growing states in the United States as well as the prairie provinces of Canada.

This year the Chicago Board of Trade has \$10,000 in prizes for the grain contests. It was due to the efforts of Professor Salmon in emphasizing the importance of the grain sorghums that classes for kafir and milo maize were included in this year's show, for the first time. A total of \$250 is offered in prizes in these two classes. A large number of Kansas farmers and particularly members of the Kansas Crop Improvement association are expected to exhibit at the show.

Earl G. Clark of Harvey county will exhibit a sample of the black hull wheat which won some prizes at the International Wheat show at Wichita. The Colby branch station will exhibit some Kanred wheat which should place near the top of the list in its class. C. C. Cunningham, formerly of the agronomy department and now a farmer in Butler county, and Bruce Wilson also a former member of the agronomy department will be other Kansas exhibitors.

AMES DEBATE SQUAD TO TAKE UP NEW QUESTION

Debate Will Take Place First of February—Prospects Good for Double Victory

The Ames debate question has been changed from the Progressive tax to the Japanese exclusion. The squad of 12 members have been working on the new question for two weeks and now have it well under way. The debate will take place the first of February.

"Prospects look good for a double victory this year," says coach O. H. Burns. "We have plenty of good material out and I am sure the men will do the work that is necessary for winning teams."

BEYOND THE HILL

A religious life at Kansas university shows that nearly three-fourths of the students are church members in comparison with a membership of less than one third of the population of Kansas. The average student attendance at the ten Lawrence churches is over 1,100 at the morning church service and 1,130 at the Sunday school classes.

Edwin Booth dramatic club of the University of Wisconsin is planning a two reel varsity movie depicting some interesting story of student life, written, produced, and acted by students. The initial move is to offer a prize of \$25 for the best scenario submitted by a student. The picture will first be shown at the university and will then be turned over to a booking company for circulation throughout the country.

Among the newly created departments on the Scarlet and Black, student publication of Grinnell college, there is a movie department which will conduct a regular column covering the movies which will be shown in the local theaters.

The college of agriculture of the University of Missouri held the annual barn warming in Rothwell gymnasium Friday night, October 29, immediately following the pep meeting of the university students on the eve of the Oklahoma-Missouri football game.

An association of the unorganized students of the University of Indiana has been formed for the purpose of looking after the social affairs of the non-fraternity people of the school. A big mixer including games, talks, music and dancing was held at the beginning of the year at which no member of an organized group was allowed to be present.

A cooperative house for girls is being organized for the winter term at the University of Missouri. The

old Welch academy is being refurnished for the use of the girls. The room rent for each girl will be between \$7 and \$8 a month and the board will be apportioned among the members.

AG CLUBS WILL MEET TUESDAY

ORGANIZATIONS OF DIVISION BEHIND MOVEMENT

To Plan Functions for the Students of Agriculture—Prof. L. E. Call To Give Lecture on French Animal Husbandry

Tri-K has invited the Block and Bridle club and the Dairy association to meet with it in Ag 84, at 7:30 o'clock Tuesday evening.

The joint meeting is for the purpose of getting the agricultural division together with the idea of developing a greater unity among the agricultural students. L. E. Call, professor of agronomy, will give an illustrated lecture on "French Animal Husbandry."

The agricultural students believe they are not pulling together as well as they should and for this reason, they say, they do not have the pep that their division needs. With this idea of greater unity and more pep for their division, the organizations

will discuss the possibility of an all ag hike, an agricultural edition of the Collegian, an agricultural fair, and the possibility of an all ag mixer.

In some of the other big agricultural colleges of the country an annual fair is held by the agricultural division, for which all classes are dismissed and the students allowed to spend the day parading and making the event a success. The possibility of having such an event here will be given much discussion. Those in charge emphasize the importance of the meeting to the agricultural students and urge every member of the three organizations to be there.

TO SELL BROWN BULLS ON ANEARN FIELD HOMECOMING

Second Issue to Contain More Cartoons and Better Jokes Than First Issue

The second edition of the Brown Bull will be published by November 13, the day of the homecoming football game. The magazine will be sold at the gate on that day.

The second issue will be better than the initial issue as it will contain more cartoons, better jokes and better poetry. The Brown Bull has

established itself among the leading humorous magazines of the country and is worth the support of every Aggie on the hill. The price of the magazine will be 25 cents:

Junior—"We've had Lamb and now we're going to have Bacon."
Senior—"And I suppose if it Burns you'll get the Dickens."—Olathe H. S. Pep.

Ina Findley of '20, who is teaching mathematics at Grainfield spent the week end visiting her parents Mr. and Mrs. O. M. Findley.

"Divvy Up!"

"Butter-Kist" Pop Corn is so crisp, fresh and pure, it's almost too good to share.

The very choicest, seasoned pop corn, popped just right and the excess moisture dried out, then buttered with pure creamery butter—untouched by hands.

"Butter-Kist" Pop Corn

is popped in a new, automatic machine that does nearly everything but make change. We simply put the raw corn in at the top and the "Butter-Kist" Popper turns it out in big, snowy, tempting flakes, freshly salted and buttered—a delicious treat.

GIRLS MARRY TO AVOID THINKING

ARE GIRLS AVERSE TO INTELLECTUAL LIFE?

Dean Helen B. Thompson Discusses Question at Recent Meeting at Springfield, Mass.

Is marriage an escape from intellectual life?

Dr. Helen Bishop Thompson expressed the opinion that many college girls welcome matrimony for this reason. She voiced the belief in a meeting of the Association of Land Grant colleges and Experiment stations which was recently held in Springfield, Mass.

"How are we going to persuade our students to inhibit that domestic inclination to get all their own meals because they like their own cooking? I confess I do not know," commented Dean Thompson, "unless we convince them that the 'only one hour a day' devoted to this harmless pursuit would keep a research problem going at a slow but even pace."

"So long as we continue to turn out students who elect fine needlework and millinery as seniors, or who look upon marriage as an escape from intellectual life, there seems to be little hope for us. When women holding a college degree justify the job of housekeeping for two as a sufficient one for all their energies, and our advisors on curriculum-making hand back to us, in the name of education, courses long since discarded or relegated to high schools, it is time we took account of our methods," said Dean Thompson.

"We can seek truth for its own sake all the more readily if it applies to the advantages of human life," Doctor Thompson declared. "It is important to train our girls in such a manner as to make it possible for them to change environment rather than to leave its indecencies to the less fortunate, while they move on to something already improved."

In concluding these somewhat remarkable statements, Dean Thompson suggested a more logical sequence of courses in every line of work. She discussed the courses prerequisite for research in home economics, and urged the awakening of the spirit of investigation. Dr. Thompson also declared for the appointment of departmental heads on the basis of research ability as well as on the basis of teaching capacity.

Elected Member of Conference

E. L. Holton, head of the department of education, has been elected a member of the Cleveland conference. This conference is composed of heads of educational departments from various colleges and superintendents of schools from the larger cities. There are 60 members in all. Dean Kelley, head of the educational department at the University of Kansas, and Dean Holton are the only Kansas members. The next meeting of this conference will be in Chicago, December 10-11.

They Paddle at Emporia

Failure on the part of any freshman to wear his freshman cap according to regulations will be deemed a violation of the regulations and any freshman found guilty of any such violation shall be punished by paddling with paddles not more than eighteen inches in length, three inches in width, and one half

inch in thickness, material to be of soft pine for the first offense. Any freshman who shall have been found guilty of a second violation of these regulations shall be punished in a fitting manner, all excuses and entreaties notwithstanding.—Kansas State Normal Bulletin.

Harvard Man Has His Own Ideas of the Ideal Maiden

We know, at last, just what qualifications a girl must possess to meet the unqualified approbation of man, mere man, or, at least, a Harvard man. The members of the graduate school of that seat of learning have given to the world the requirements that will enable a girl to qualify. They are voluminous and varied, and well worth reading. The specifications run as follows:

She has a broad education, but not necessarily a college one.

She is attractive, graceful, and healthy, but not necessarily pretty. She can dress tastefully and entertain any one and make him feel at ease.

She is moderate and true and home-loving.

She has good social standing, is of a religious nature and is not too proud to pray.

She stands reverse without worry. She can make bread as well as fudge and cake as well as a rarebit.

She is appreciative of the dance and of the sports.

She is broadminded, sympathetic, tactful, unselfish, optimistic, thrifty, of good disposition and moderate in all things.

It would be worth traveling a long distance to be permitted to gaze on the young woman who could meet the requirements, says the Schneetady Union Star. So much perfection has never yet taken its abode in one human form. But, granting the impossible, what would she get in exchange? The average woman is so much better than the best of mankind that to add these perfections without a corresponding list of angelic requirements on the part of the man she weds would be profane sacrilege.—The Meadville Campus.

Dr. N. D. Harwood of the veterinary department, is in Erie this week to investigate a disease of hogs in that vicinity.

Dr. B. L. Taylor, '20, has accepted a position as experiment station veterinarian in Idaho university at Moscow, Idaho.

POLITICAL CLUBS HAVE SUCCESSFUL DEBATE AT Y

Experienced Students Argue on Either Side—Professor Kammeyer in Charge

In a debate between the Democratic and Republican clubs of the college, last Monday night at the Y. M. C. A., the Republican side of the question was supported by Albert Heuser, sophomore in general science; Milton Eisenhower, sophomore in industrial journalism, and editor

of the Collegian last year; and Christine Cool, senior in home economics, double K debater and woman's debate scholar this year.

The Democratic side was argued by Charles Howard, junior, in industrial journalism and K debater; Arnold Englund, junior in agronomy and double K debater; and Wheeler Barger, junior in agronomy, double K debater and men's debate scholar this year. Albert Heuser and Charles Howard each gave a seven minute rebuttal speech. Dr. Kammeyer presided over the meeting. No decision was rendered.

SOCIAL CALENDAR

Friday
Elkhart club dance in Recreation hall.
Tobacco dance at Harrisona.
Block and Bridge club dance in gym.
Saturday
Ag "Barn" dance in gym.
Monday
Social club reception, Recreation hall.

Phi Gamma fraternity entertained the Phi Kappa fraternity from Lawrence over the week end.

The Alpha Delta Pi sorority held open house for the Sigma Nu fraternity, Thursday from 6:30 to 8 o'clock.

Plans have been made for the second annual naval ball which will be given the evening of November 11, in Recreation hall.

College club held a dance in Recreation hall Monday evening. Hallway decorations were used. Fifty couples were present.

Mrs. Lou Roark entertained the 20 house mothers of the fraternities and sororities on the hill at the Phi Delta Tau house Thursday afternoon.

Iota Psi fraternity entertained with a dance in Recreation hall Friday evening. The music was furnished by a five piece orchestra. The chaperones were Dean Mary Pierce Van Zile, Mrs. Ned Kimball, and Miss Fuller.

Sigma Nu fraternity entertained a number of alumni for the K. U. Aggie game. They were William Pulver and Fred Miller both of Wamego, Russell P. Doderidge of Council Grove, A. L. Husted of Grainfield, Harry Gummess of Junction City and P. A. Russell of Kansas City, Mo.

The engagement was announced last Tuesday evening, October 26, of Miss Elva Price to Mr. David Capper at a party given at the home of Mr. and Mrs. Braucher in Emporia. Miss Price attended the Kansas State Agricultural college for three years. She is now a member of the senior class at the Kansas State Normal. Mr. Capper is a senior in agriculture in this college.

Miss Hazel Hulse entertained at a Halloween breakfast Sunday morning at her home 730 Moro street, in honor of Miss Elizabeth Harder and Miss Viva Palmer, both of Minneapolis. The guests were Miss Ruby Morgan, Miss Frances Dawley, Miss Viva Palmer, Miss Elizabeth Harder, Miss Hazel Hulse, Mr. F. W. Kitch, Mr. Dale Pierce, Mr. Harry Ratcliffe, Mr. Verne Uhlend, and Mr. Clarence Harder.

Sigma Phi Delta fraternity gave an informal dance in honor of the Phi Delta Theta fraternity of Lawrence, at Recreation hall Saturday, October 30. Out of town guests were Miss Ruby Taylor, Fort Scott, and Miss Lucy Taylor, Baldwin. Chaperones of the evening were Mrs. Raymond Taylor, Dean J. T. and Mrs. Willard, Professor and Mrs. Colver and Prof. and Mrs. Hugh Durham. Coon's orchestra from Kansas City furnished the music.

The senior members of Delta Zeta entertained Friday evening for the freshmen and house guests with a house dance. The decorations were in Halloween effect. Cider and doughnuts were served throughout the evening. Special guests, in addition to the house guests, were Mr. and Mrs. A. W. Kelley of Atwood, Mr. George Thompson of Stafford, Mr. Scott Markley of Salina, Mr. Howard Howawat of Osage, Mr. Arthur Hemphill of Lawrence, and Mrs. E. Parker of Paola.

Miss Grace Currie and Mr. Kenneth Howenstine were married Saturday night, October 30, at the home of the bride's parents, Mr. and Mrs. Charles Currie, 806 Osage street. The Rev. A. M. Reed of the United Presbyterian church officiated. A luncheon was served to 30 guests after the ceremony. Mrs. Howenstine was graduated from K. S. A. C. in 1916. Mr. Howenstine also attended school here. He is now manager of the Standard dairy. After a short wedding trip the couple will be at home at 1601 Humboldt street.

Week end guests at the Delta Zeta house were Miss Josephine Tredway of La Harpe, Mrs. Georgia McBroom Blosser of Malta Bend, Mo.; Mrs. Blanche Baird Hultgren of Russell, Miss Mary Hazel Phinney of Russell, Miss Hazel Wilson of Luray, Miss Edith Wakefield of Culver, Miss Berenice Clark of Lawrence, Miss Hilma Freeman of Courtland, Miss Madeline Locke of Erie, Miss Ada Robertson of Washington, Miss Lenore Edgerton of Randolph, Miss Vivian Babb of Douglass, Miss Norma West and Miss Marian Burns of Kansas City, Miss Edith Amesbury of Baldwin, Miss Ruth Hinchey of Salina, Miss Hazel Dugger of Lawrence, Miss Carolyn Lear, of Hutchinson, and Miss Kate Summers.

Mrs. Mary P. Van Zile, Mrs. Ned Kimball, and Mrs. L. R. Eakin entertained with a musical at Elks' hall,

Wednesday afternoon. The guests were met at the head of the stairs by Junior Eakin and Billy Kimball and led into the reception room. After a social time the guests were invited to the hall where the musical program was given by the faculty quartet, Miss Katherine Kimmel, Miss Bess Curry, Mr. A. L. Lovejoy, Mr. A. B. Williams accompanied by Miss Mabel Leffer. Doctor Hill of the public speaking department gave two groups of readings, the first humorous, and then three selections from British war poems. After the program refreshments were served in the reception room. The guest list included about 70 persons.

Week End Guests
Miss Ruth Eppler of Ellis, Miss Lois Hanna of the University of Kansas, Miss Julia Johnson of Herington, Miss Katherine Kinman of Nickerson, Miss Corrinne Smith of Topeka, Miss Ann Wilson of Towanda, Miss Betty Hamilton, Miss Norma Wood, Miss Polly Doer, Miss

Billy Doer, Miss Dorothy Gage, Miss Margaret Wallace, Miss Mary Torrence, Miss Katherine Smith, Miss Mayme Marcy, Miss Doris Collins, and Miss Alice Carney were week end guests at the Pi Beta Phi house. Miss Genevieve Mott spent Sunday at her home in Herington.

A White 3 1/2 ton truck was delivered Saturday to the military department from Fort Riley, for use by the Coast artillery unit. Minnie Dubbs of '19, instructor in home economics at Ransom, spent the week end visiting her sisters Margaret and Myrtle who are students here.

CONVENTION TO BE HELD HERE

NORTHERN DISTRICT CHRISTIAN ENDEAVORS MEET

Opening Session Is Tonight—To Be
Banquet Saturday Evening at
Christian Church

The members of the Northeastern District Christian Endeavor association are holding a convention this week at the Congregational church. The young people of Manhattan are at home to the Endeavorers from the northeastern part of the state, and all who are interested are urged to attend the meetings, which will be unusually interesting and instructive. At the opening session this evening C. C. Hamilton of the United Society will speak on "Christian Endeavor Up-to-date." Mr. Hamilton has just come from Boston and is an authority on Endeavor problems. At 9 o'clock there will be a get-acquainted social in the parlors of the church.

Saturday morning and afternoon there will be conferences on special problems confronting Christian Endeavor workers. There will be a banquet at the Christian church Saturday evening at 6 o'clock. Those interested are expected to be there and meet the guests from the different parts of the district. After the banquet a meeting will be held in the Congregational church, where Miss Ella Hoxie, who has recently returned from missionary work in India, will speak.

Sunday afternoon there will be another address by Miss Hoxie, and group conferences on special problems. At 6:30 o'clock there will be a union Christian Endeavor meeting at the Congregational church, at which all the young people will have an opportunity to meet each other.

College Sells Stock

Dr. C. W. McCampbell, head of the animal husbandry department of the college reports that a Duroc Jersey boar, bred and

owned by the college, has been sold to Armour and company and shipped to Spokane, Wash., to be used in hog breeding demonstrations carried on there by the Armour people. He also states that a Short-horn bull calf owned by the college, has been sold to a Tennessee firm and one to a Texas company.

Society Debates to Open

Saturday afternoon and evening are the opening dates for the debate tournament. From all indications this will be the most interesting inter-society debate that has ever been held.

"Society teams are all working hard and if it proves as it usually does 90 per cent of college squad will be chosen from members of these teams," says a prominent member of the inter-society council.

ATHLETIC TEAM MANAGERS MEET

INTRA-MURAL IDEA IS MEETING WITH FAVOR HERE

Teams Are in Two Divisions—Con-
tests Begin the Middle of
This Month

Indications that intramural athletics is going to be met with favor at K. S. A. C. are shown by the entering of 30 basket ball teams, the managers of which met the first of the week to formulate plans. The last day for entering teams in the intra-

mural contest is next Monday, November 8.

These teams are divided into two divisions, the first being composed of teams from organizations in the pan hellenic, and the second including teams from local fraternities, the military department, and independent teams.

The contests within the divisions will begin about the middle of this month. The only limitation for the selection of players is that "K" men are not eligible.

When these contests are over, the winning team of each division will play to decide the intramural championship. By means of these games the varsity coach will be able to get a line on new material.

The winning teams will be awarded loving cups and the members of the teams will receive the intra-mural "K."

Entries will be received by E. A. Knoth, director of intra-mural athletics.

Dr. B. B. White, '20, is now located at Weston, Mo., where he is engaged in the practice of veterinary medicine.

ELECT COLLEGIAN BOARD MEMBERS

FIVE NAMES TO APPEAR ON BALLOT

Subscribers of Paper May Vote—Elec-
tion Will Be Held Tuesday,
November 9

Election for Kansas State Collegian board will be held November 9 at the window opposite the postoffice. The nominees to be voted upon are V. R. Blackledge, Orville Bourassa, Susan Carmody, R. C. Nichols, and C. R. Smith.

Every subscriber of the Collegian is eligible to vote for four of the names listed. The head of the journalism department is always a member of the board. The Collegian board has charge of the governing of the Kansas State Collegian, checking up accounts of the business manager

and aiding in problems concerning the paper.

The board members for the past year are Floyd Hawkins, Chairman; N. A. Crawford, head of the journalism department, Clementine Paddock, Elizabeth Dickens, and M. A. Graham.

Will Give Second Recital

The second of the series of faculty recitals will be given by Miss Gladys Warren and Miss Bess Curry in the auditorium Sunday afternoon at 4 o'clock. These recitals are free and everybody is invited.

Bell Judges Livestock

F. W. Bell, professor of animal husbandry, spent several days last week at Harper judging several hundred head of livestock sold at the Harper County Breeders' association sale. Professor Bell also acted as judge and supervisor of a high school students' judging contest at that place.

For Rent—two half rooms for rent at Y. M. C. A. \$6.25 and \$8.75 respectively.

Hart Schaffner & Marx Suits and Over-
coats. **Buy Now!**

We've always been known as the greatest value-givers in the southwest. During the years just past, our prices were raised only when absolutely necessary. We sold, at all times, on a very close margin of profit. As markets have become easier, we have, without any "blowing of trumpets," kept pace by reducing prices to the lowest possible level. Now we are making still greater reductions in appreciation of the patronage and loyalty of our customers. Everything we sell is of well known, high-grade make—the kind we're glad to recommend and guarantee—and now we're offering this very merchandise at a saving of 20%, 25% and even 33 1/3% on our already LOW prices.

CROWDER'S CLEANING and DYE WORKS

THE KANSAS STATE COLLEGIAN

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, TUESDAY, NOVEMBER 9, 1920

NO. 17

VACATION ON THURSDAY SO SAYS PREXY

NOVEMBER 11 TO BE STATE HOLIDAY

WILL HAVE ASSEMBLY PROGRAM

Students Expected to Observe Day in Fitting Manner—American Legion Men to Stage Red Cross Drive

Classes will be dismissed on Armistice day, November 11, and the students will be given an opportunity to observe the day in a fitting manner, according to an order given out from the president's office. A special assembly will be held in the morning at which the Rev. E. J. Kulp of Topeka, and General E. H. McGahegan will give addresses.

The governor of the state has issued a proclamation setting aside Armistice day, November 11, as a Kansas holiday. In accordance with this President Jardine has directed that no classes shall be held on that day, which is this coming Thursday.

Cadets Will Parade

The military department are already making plans for a parade of the cadet corps on the morning of the eleventh. The men will meet at the gymnasium at 10 o'clock and from there will march to the city park. At the park the parade will start and from there it will go down Poyntz avenue and come back up Humboldt street.

All ex-service men in the city of Manhattan and in the college are asked to dress in uniform and march at the head of the parade, the cadet corps acting as honorary body guard. The band has offered its assistance and will lead the procession.

Legion Men To Be Busy

Armistice day will be a busy one for the American Legion men for on that day they will conduct a Red Cross membership drive. The city is to be thoroughly canvassed for members, but nevertheless the Legion men are urged to take part in the parade as it will only take about one hour away from their membership campaign.

As an inducement to get all the cadet corps out for the parade on that morning the military department has ordered that men who take part in the parade will be excused from drill the following Monday. As the parade will take only about an hour's time and the drill period is three hours long this arrangement will assure a large number of cadets taking part Thursday.

OVER 600 AT BARN WARMING

PROCEEDS TO SEND JUDGING TEAM TO CHICAGO

Barn Warming May Become Annual College Function—Given by Block and Bridle Club

Block and Bridle club of the college gave their first annual "Barn Warming" Saturday night in Nichols gymnasium. The proceeds of the dance are to be used in defraying the expenses of the stock judging team to Chicago where they will participate in the college students' judging contest at the International Livestock exposition on November 29.

The dance was attended by over 300 couples. The gymnasium was decorated with shock corn and pumpkins, and in the center of the floor a pen constructed of poles and corn stalks was built for the orchestra. A cider still was located in one corner and cider and doughnuts were sold. Seats were arranged for by the use of bales of straw. The lights were covered with corn shucks and the railing of the balcony was decorated with autumn leaves. Maupin's five piece orchestra furnished the music for the evening.

This is the first dance of this nature to be given by the Block and Bridle club. It is hoped that the "Barn Warming" dance can be made an annual college function and that the proceeds will go to the benefit of the stock judging team.

Hardly more than 50 out of nearly 300 seniors have paid their \$15 Royal Purple assessment.

Chemical Six Have Crowded Quarters For High Efficiency

"Crowded quarters."

That is the story profs tell legislators when a new building is wanted. But there is one case of crowded quarters at K. S. A. C. that heretofore has not received any publicity. And just like Postum, there's a reason.

In the chemistry annex building, where we all take our freshman chemistry, there is one tiny office of eight by eight proportions. This little cell is not the office of one person nor of two persons, but of 10! Yes, it really is a shame for such a condition to exist right here on our own campus, but the strangest thing about it is that those whom it affects most, act extremely independent and reactionary toward any change whatever. The explanation to the puzzle, like the thing that caused Adam so much grief, is woman.

To be frank about the matter, you see, out of the 10 profs that make this place their hangout, six are women. Wild women, tame ones, blackeyed vamps, blue eyed blondes, slim, and otherwise, and with ages ranging from the cradle to the grave, but all exactly alike in one respect—all single, unattached, and alone in the world. But that is only half of the story. Of the four men, only one is eligible for—but why be so evident? It makes a six to one ratio with three for spectators.

Cleopatra, with all her wiles and reputation, would have to take a back seat with the Chemical Six, for among them they have beauty, knowledge, cunning, and a variety of make up that would make any musical comedy turn green with envy.

In spite of the odds, number one is showing a wonderful fight and so far has flatly refused to be lured astray. But then, of course, you can never tell what may happen.

FORM RELIGIOUS FEDERATION HERE

DOCTOR FOSTER TELLS OF WORK AT OTHER SCHOOLS

Membership Granted Organizations Interested in Religious Work—Adopt Plan in Use at Cornell University

Representatives of the Y. W. C. A., Y. M. C. A., and the World Forum met with the Ministerial union Thursday evening and formed a Religious Federation of the Kansas State Agricultural college.

The constitution committee submitted their report and the constitution was adopted. It is the purpose of this federation to cooperate and "put across" a large religious movement either in the college or in the town.

Dr. D. A. Foster who has just returned from a trip to the University of Pennsylvania and Cornell, told of the plan of work of these two schools. The plan of cooperation that will be adopted at K. S. A. C., is an outgrowth of the plan used for 14 years at the University of Pennsylvania and is a modified form of the plan in use at Cornell university, University of Ohio, and more recently at the University of Nebraska.

Members of this federation will be the Y. W., Y. M., and the various churches of Manhattan, also any organizations interested in promoting religious work. Then students will be chosen from each organization and these 10 will elect a chairman who will make up the executive or promoting committee.

The Religious federation will have charge of the World Forum that will be held here February 18, 19, and 20. There will be 10 speakers at this conference.

ARE TO RESERVE SEATS TOMORROW

ARTIST COURSE OPENS NEXT MONDAY EVENING

Board for Reservations Will Be Up at Co-op Bookstore After 11 O'clock Wednesday

Tomorrow is the day when reservations for the Star Artist series can be made. After 11 o'clock Wednesday morning the seat reservation board will be up at the Co-op bookstore in Aggieville and persons desiring seats for the series should attend to this matter at once, as the mail order

reservations have limited the number of seats to be secured.

The Artist course will open next Monday night with the concert of Oscar Seagle. Reports from other towns where Mr. Seagle has appeared state that his work is most enjoyable and it is with considerable interest and pleasure that his appearance is being awaited here.

The Y. W. girls have been reasonably successful with the sale of tickets among the student body, but there are still a number of season tickets to be secured. These can be obtained by applying at the office of the music department.

The second concert of the series will be that of John Powell and will be given on February 21. Mabel Garrison will close the numbers with a concert on March 14.

TO GET STUDENT DIRECTORIES OUT

CONTAINS STUDENTS' ADDRESSES AND TELEPHONE NUMBERS

Chamber of Commerce To Be Furnished with 200 Copies—Will Be Sold for a Small Sum

The new student directories are expected to be out by the middle of next week. The committee, Miss Jessie M. Machir, Dean J. T. Willard, and Prof. E. T. Keith, planned to get the directories out a month after school opened but because of several unavoidable delays this was impossible.

The directory contains a revised list of the town addresses and telephone numbers. The home addresses of the students are not given because that would mean a larger edition, and a pocket size book is more easily used.

The chamber of commerce is to be furnished with 200 copies. Two thousand copies are to be printed. The books will be sold for a nominal sum.

Tri K Club Meets Tonight

The Tri K club will meet in the Agricultural hall at 7:30 o'clock Tuesday night. Dr. C. R. Ball, head of the office of cereal investigations of the U. S. Bureau of Plant Industries of the United States department of agriculture at Washington will speak to the club.

Mrs. W. E. Cramer to Speak

Faculty and students of K. S. A. C. will be honored by Mrs. W. E. Cramer, A. B., of Kansas City, Mo., who is to be the speaker for the assembly Wednesday, November 10. Mrs. Cramer is a graduate of Bryn Mawr and has had two and one-half years' work at Lausanne, Switzerland and Munich, Germany. At the present time Mrs. Cramer is director of the Women's Vocational bureau at Kansas City. She is a woman of unusual talent and a remarkable speaker, and will talk on lines relative to her present work.

Honorary Elects Members

Thursday afternoon Theta Chi Gamma, honorary general science fraternity elected to membership eight junior and senior girls from the division. The new members are Maude Lahr, senior; Geta Lund, senior; Anna Neal, senior; Elizabeth Dickens, junior; Orpha Maust; junior; Ruth Peck, junior; Rowena Thornburg, junior; and Lula May Zelllar, junior.

Pledge services will be held Wednesday afternoon at 5 o'clock.

To Harvest Corn Plots

N. E. Dale, of the department of cooperative experiments, left Monday for Carlisle, where he will spend the greater part of the week harvesting cooperative fertilizer plots of corn and variety tests of sorghums. These experiments are being conducted on what is known as an "out lying farm" in Allen county, which is managed by the college and worked by A. M. Dunlap. Various rotations and experiments are carried out there.

Prof. N. A. Crawford and Prof. J. W. Searson attended a meeting of the Kansas Authors' club in Pittsburg last week. While there Professor Searson spoke to the Extension Study club.

W. C. Wilson, junior in agronomy, left for Topeka today with a class of 600 Scottish Rite Masons.

Classes Saturday Morning
President W. M. Jardine announced today that classes will be held as usual Saturday morning. The afternoon classes will be dismissed for the Aggie-Ames game.

BROWN BULLS TO STAMPEDE ON SATURDAY

WILL HAVE 28 PAGES OF CLEAN HUMOR

PRINT TWO THOUSAND COPIES

Twenty five Cents Will Buy Bull—Prize Title Has Been Chosen for the Cartoon—Have Tri-Colored Cover Page

The Brown Bull, K. S. A. C.'s humorous magazine, will make its second appearance on the campus next Saturday when it is sold at the Homecoming game.

Two thousand copies of the magazine are being printed. Many of these will go to large newspapers, other college humorous publications, Life, and Judge. It is expected that at least 1,500 copies of the Bull will be sold to Aggie students.

Larger Than First Edition

This edition of the magazine will be larger than the first issue, which was published last March. It will have 23 pages, stuffed full of good clean jokes, short humorous stories, illogicals, and cartoons. The cover page is to be colored and since the magazine is to be the Homecoming number, the cover has something to do with the football team and Mike Ahearn. It is designed and drawn by Don Ballou.

Quarter Will Buy Bull

One quarter will buy a Brown Bull, and members of the Sigma Delta Chi, the journalism fraternity by which the magazine is published, say that it is the cheapest bull that can be brought any place.

The Aggie primer, written by Prof. N. A. Crawford, a questionnaire to the deans by H. W. Davis, several poems by Elizabeth Dickens, and one by Gertrude Ramsey are the main features of the books. The cartoon by Merton Swanson has been given an appropriate name.

Milton S. Eisenhower is the editor and Walter Karlovski the business manager. Other staff members are N. A. Crawford, E. T. Keith, H. W. Davis, J. W. Searson, R. L. Palmer, Morse Salisbury, Walter Law, R. C. Nichols, and C. E. Rogers. Theta Sigma Phi, women's journalistic fraternity, assisted in putting out the current issue.

AGGIES ANSWER TO CALL OF PEP

TEAM SENT AWAY AND MET BY LARGE DELEGATION

Band Members Were on Hand to Play for Team Coming and Going—Have Box Car Speeches

"Every Aggie out."

This was the call that echoed through the silent streets and back alleys of the town Friday morning at 4 o'clock. In response to the call the loyal Aggies came trooping out down through the main street of the town all headed for one goal—the Union Pacific station. The Wildcats, 800 strong, were out to see the beloved football team off for Mizou.

At the station there was but one thing to do and that was to yell and cheer for every member of the team, for Mike and for Charley Bachman. Such pep! Such noise! If ever there was a time when every student was glad to be an Aggie it was Friday morning.

Ray Watson mounted a box car and led the cheering with the assistance of Shorty Corby. Then came Mike's speech, and then Bachman's, Van Fleet's and Jensen's. But probably the words which were dearest to the hearts of the Aggies were those from big silent Ike Gatz who says little but acts mightily.

Shifty Cleland's declaration, "Love you all," made everybody's heart flutter. The Girls' Loyalty league expect to elect him an honorary member because of his "Oh Promise Me!" on top of the box car.

As its custom the college band was on hand, full of pep and good music. The leadership and support which that group of loyal Aggies gave to the ovation for the team should be remembered by those who seem to doubt the sincerity of the desire of the band to do its share of boosting of every activity undertaken by this school. It was a big day in the his-

tory of Aggie pep and no other school in the country can boast of a better spirit than that which prompts 800 students to go to a station at 5:45 o'clock in the morning to see a team off.

Nor was Aggie pep exhausted after returns came in from the game indicating that Aggie fight had met a little streak of hard luck. When the team returned home Sunday night about 500 Aggies with the faithful band were out in full force to show the team that the Aggies were just as strong for them as ever.

TO PICK STOCK JUDGING TEAM

HAVE LAST WORKOUTS THIS WEEK

Team to Have Judging Practice at American Royal—Will Visit Missouri University Farm and Iowa State College Herds

The stock judging team which will represent K. S. A. C. in the college students' judging contest to be held at the International Livestock exposition in Chicago on November 29 will be selected this week from the members of the class in form and function.

Prof. F. W. Bell, the stock judging coach, is putting forth every effort to develop a winning team. This week will see the last workouts for the team before they leave for the American Royal Livestock show, to be held in Kansas City from November 13 to 20. The team will have judging practice on cattle while at the American Royal. From Kansas City they will go to Columbia, Mo., for work on the stock of the Missouri university farm. From Columbia they will go into Iowa where workouts will be held on the stock of the Iowa state college and on herds of the noted breeders of the state. Before reaching Chicago the team will also visit several Illinois breeders. Judging will be done on all classes of stock.

The form and function class includes the members of the swine judging team who won the college judging contest at the National Swine show on October 4. A new team will be selected for the International contest. The men who are trying out for the team are Otto, McCall, Reyburn, Winkler, McCormick, Nitcher, Getty, Peterson, Crow, McCollum, Newell, Henney, Mather, Brown, Howarth, and Deniston. From this number six men will be selected to make the trip, five of whom will be chosen for the team, the other to be an alternate.

The Aggies placed third in the International contest last year, under Texas and Missouri. There were 18 teams competing, three of which were Canadian teams. The big prize of the contest is the Bronze Bull which is given to the winning team. This bull when won three times remains the property of the school. Texas has won the contest twice, and it is up to the Aggies to bring the trophy home this year.

TWO GIRLS ARE CHOSEN TO FILL NEW W. A. A. OFFICES

Association Votes to Print Constitution—Nine New Members Are Initiated

At a meeting of the Women's Athletic association Thursday, Helen Pristley was elected initiation director, and Helen Lucile Cooper was made field and track manager. A committee was appointed to see about printing the constitution so that the K. S. A. C. Women's Athletic association may meet the demands of the A. C. A. C. W., a national organization. It was also decided that pins should be ordered for all girls who have 175 points, and that the girls should pay for the pins.

New members of the association who were initiated are Faith Martin, Hazel Gardner, Ruth Wheatly, Mary Fitzgerald, Esther McStay, Bernice Hoke, Meta Baker, Ruth Kittell, and Margaret Reich. In order to become a member of the association a girl must have at least 50 points in athletics.

Prof. N. A. Crawford, head of the Industrial Journalism department, and Prof. J. W. Searson, head of the English department, left today for Pittsburg, to attend a meeting of the Kansas State Authors' club. Professor Crawford will go on to Parsons where he will deliver an address on Wednesday to a group of the parishioners of the Episcopal church.

Ivan Riley, student in architecture, spent the week end at his home in Newton.

AGGIES LOSE TO MISSOURI SCORE 10-7

FIRST WILDCAT DEFEAT IN FIVE YEARS

TEAMS USE SIMILAR SYSTEMS

Within Opponents Ten Yard Line Three Different Times—But Held for Downs

The Wildcats did not bring back the Tiger bacon they were sent after last Saturday, but it said that they fought for it and the Tiger is thanking his lucky stars at this writing that he won over the Aggies for the first time in five years. The thing that has always proved the Tiger jinx, proved this year to be his strength, namely, kicking. The M. U. win over K. S. A. C. was by the margin of a field goal, made in the third quarter of Saturday's game by Captain Chuck Lewis of Missouri.

Tiger Touchdown in Second Quarter

The Missouri touchdown came in the second quarter when Travis blocked one of Huston's punts. On the next down Fullbright passed 10 yards to Lewis and the Tiger captain ran 20 yards through a broken field, putting the ball on the Aggies' 20 yard line. On the next play Lewis tossed the oval 15 yards right over the center of the line of scrimmage to Williams who was uncovered. Williams caught the ball low, but managed to trot across the goal line before an Aggie could get to him. Lewis kicked goal.

Drop Kick Wins Game

The drop kick that won the game for Missouri came in the third quarter. The Missouri team staked a rally in this period that all but swept the Wildcats off their feet, but the old fight that Bachman has drilled into the team asserted itself and the Aggie held the Tigers on their 1 yard line. We went into the last quarter with a 10 point lead against us and proved our mettle by smashing out a touchdown against a team flushed with the prospects of victory. Taking the ball on one of Lewis' punts, Axline ran his team down the field for 60 yards across the goal line in five successive downs, end runs, and passes.

The first pass was touched by a Missouri player, but Cleland recovered it. Then three end runs worked the ball to the Missouri 10 yard line. A pass to the left side of the line was snagged by Brady Cowell and he went on across for the six of the Aggie counters. Huston added the seventh when he kicked goal.

Short Pass Is Aggies' Strength

Spectators state that the Wildcats would still have won the game had they received the kickoff after their touchdown, for Axline had discovered the strength of his team which was a short pass just over the end of the line. The Missourians could not seem to solve this play for the Aggies gained on it time after time. The Wildcats lost chances to score when they were within the Tiger 10 yard line three times during the game. They seemed to lack the necessary punch until the last quarter. However the Tiger team also lost many chances to score when they were in Aggie territory the Wildcats holding them once for downs on the one yard line.

Both Teams Use Same System

The two teams used the same system of football, Phelan, the Tiger mentor, and Bachman of the Wildcats, being teammates on the famous 1916 Notre Dame eleven. On this account, the game was more interesting than the usual football contest. The Aggies made an equal number of first downs with the Missourians, although the Tigers out-gained them from line of scrimmage. The passing game of the team has improved greatly and the most effective Aggie playing made use of the aerial attack.

Brady Cowell displayed rare form in broken field running as did Heinie Hinds who ran through the whole Missouri team to a touchdown in the second quarter. However the score was disallowed, as Cleland drew a penalty for tripping on the play. This was the only Aggie penalty with the exception of one for off side. Shifty Cleland, playing his first game of the season at center was the bright and shining star of the Aggie line.

Eight Hundred Boost Team

Eight hundred students gathered at the Union Pacific station Sunday

(Concluded on page six)

TUESDAY, NOVEMBER 9, 1920

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Aggies at the top of conference athletics by 1922.
4. Clean politics.
5. Greater cooperation between alumni, students, and faculty in bringing athletes to K. S. A. C.
6. Remodeling of the auditorium stage.

COORDINATION MEANS SUCCESS

Do you know the meaning of coordination? Well, it means bringing together of different parts into similarity of condition. In school life the technique is one part, and scholarship is the other. Why not bring the two together and make an irresistible force that will accomplish work that will be commendable. Why not put the most stress upon scholarship, because scholarship is the biggest motive that an educational institution has to accomplish. Scholarship is the right kind of training that gives men and women the right kind of ideals that will result in true courtesy, in breadth of vision, loyalty, and in those things that are worth while in our intercourse with humanity.

Can it be that just because this is an agricultural school the accent is on the ag instead of culture? The ags will be ags, the vets will be vets, and so it is with all divisions, until each one catches the spirit of coordination that will make the school one with an unconquerable fight. The reason K. U. beats us every year in football is because we do not work together. But we are learning, and one of these "next years" we are going to beat K. U. in football because we have caught the spirit of fighting together. We owe it to our alma mater to conduct ourselves so that we may truly honor her and when we go out from this institution we must be able to conduct ourselves so as to show the outward and visible sign of the inward spiritual grace of true scholarship.

CHEATER OR CHEATED—WHICH?

Far be it from us to take a "holier than thou" attitude on college life, but when from three to six students cheat in each quiz, it seems that cheating is a subject that we should at once consider.

In the light of our college rules, the person that gives help in a quiz is just as guilty as the one who obtains the dishonest help. The case is complicated indeed, when the person asking help is a new acquaintance or a good friend. However before we go any further we should ask ourselves this question, "Of what value is a friend who is willing to draw me into a situation that may endanger my whole college career, merely to help him cheat?"

What do we mean when we say "cheat?" Who is cheated? Is it the faculty, or the school? Certainly the school is the ultimate sufferer, its standards of scholarship are lowered, the value of its instruction is cheapened. Who wants to attend a school where a degree may be obtained dishonestly? This school would be indignant if it were accused of issuing bogus diplomas. Can we complacently countenance the cheapening of our degree in the educational market?

FRESHMEN ARE OBSERVING

Upperclassmen are prone to watch anxiously the growth of Aggie spirit and pep in the Freshman. The freshman year is one of intensive training in that phase of college life. But that the freshman himself may have ideas on the subject and that the upperclassman's attitude is not always blindly taken as a divine interpretation of the real thing is shown by the following pertinent observation, taken from a theme written in a freshman rhetoric class.

"He did not sit with the students, but with the older visitors and never once during the game did he open his mouth. He didn't stand up when the excited Aggies rooted for the team, but was as undisturbed as though he were sitting in church listening to a dull sermon.

"Toward the last of the game when the K. U. team came so near making their third touchdown, one enthusiastic rooter became suddenly excited and pounded the senior on the back, yelling hoarsely, 'The Aggies fight! The Aggies fight!' The senior student backed away quickly with a pained expression on his face.

"I know that he was thoroughly disgusted with the way he had been treated and when the man behind yelled suddenly through a megaphone, the senior made a mad dash for the gate and I lost sight of him.

"I was glad that this peepless student was not an example of the Aggie bunch."

WHO SAYS PEP IS DEAD?

Who says Aggie pep is dead?

One thing is sure, anyone who makes slurring references at Wildcat pep wasn't at the train Friday morning to see the team off for Missouri. For it was there that the supporters of the team

really displayed the stuff of which real rooters are made.

Whoever these folks are who are continually howling about the lack of cooperation on the part of the college band,—they should have been there Friday morning to see the part the band took in the demonstration. Out in full strength the bandsters proved themselves the best pep producers there when the chill of the morning and the lateness of the train threatened to create a falling of spirits.

Sure it was dark—and it was sorta cold too for the howling 600 who set their alarm clocks a couple of hours earlier for the sake of Aggie pep. But it was well worth it, and nobody who felt the wave of enthusiasm as it swept over the crowd, increasing right up until the time the train left, in spite of a tardy train schedule, can doubt that it was all worth while.

DODGE OR OWN A CAR

Will it become necessary to elevate the walks along the campus as they do in the wicked city? If the traffic in cars around the entrance to Anderson continues such a thing is entirely possible.

Not content with sailing majestically up to the class room in a big car with pitying glances for the poor unfortunate ped, they edge up to the steps so that it is merely a step from the door of the car to the last step of the building. The cars are parked as close to the class room as possible, for it is inconvenient to have to walk out a few yards to get in a car.

If a few more car devotees get in control it is probable that a bill will be introduced providing for a draw bridge or some other outlet for the inevitable pedestrian. For it has come to this—either dodge or own a car.

Things we think; things others think; and things we think of things others think.

Dear Editor:—There has been a lot of talk about changing the name of this institution. I am agin it. If our K.S.A.C. was good enough for our grandpas and mas why ain't it good enough for us? The name "college" or university always brings up to my mind patent leather shoes and white collars. Personally I think our state has enough to do to support one white collar school.

What do you think our live stock would say to being shoved into a college? Imagine, dear editor, the feeling of our dairy herd of self respecting cows upon being approached some morning by the student milkers arrayed in patent leathers, white collars and derbies. Do you think they would stand for it? Having spent the more eventful portion of my life studying the habits of the cow I doubt it. Upon fuller meditation, I repeat, I doubt it. I'd really hate

to say what an ordinarily gentle cow would do to a derby.

Do you think for a minute our hogs are going to put up with a society name like "college"? No, either they would refuse to eat and pine away to mere shadows, or they would become so chesty they wouldn't know you in the street. Our hogs have got to be kept in their place.

Then where would our friends of the white collar school down the Kaw go to show off their patent leathers and peg top pants? I've been told that in a State college you have to wear your Sunday clothes every day. How can you dress up for parties and such when you ain't got no change? It would ruin our social life. Absolutely. Look at other states and profit by their mistakes. There is Missouri, an agricultural state with her farmers' school camouflaged under the name university. How can you expect a farmer to thrive under that influence? Who ever heard of a college farmer that amounted to anything? Look what happened to Missouri the other day. Went Republican. That shows what it does for 'em. There's Cornell too. If they had called it Cornell Agricultural school it might have amounted to something. As it is, look at it.

My idea is that if K. S. A. C. ain't good enough for 'em let 'em go somewhere else. Like when the Articles of Confederation got too slow for a lot of our ancestors and they had to go and have a Constitution. If the engineers don't want to be called skilled farm hands; if the home economic girls elevate their noses at being termed hired girls, and if the jour-

nalists think they ain't small town devils, let 'em migrate to Missouri or Cornell or some other place where they have already insulted the farmer by makin' him go to a university.—Stand Pat.

ANNOUNCEMENTS

Mrs. W. E. Cramer of the Women's Vocational board will speak in chapel Wednesday morning at 10:15.

Theta Chi Gamma will hold pledge services Wednesday evening at 5 o'clock.

All men of the journalism department report Aggie Press club party dates to V. R. Blackledge, Box 463.

The annual election of members for

the Collegian board will be held today at the window opposite the post office.

National convention of Zeta Kappa Psi, women's honorary debating fraternity, is to be held here November 19 and 20.

The schedule for hockey games to be played this week is as follows: juniors and seniors—sophomores, Wednesday, 5 o'clock; freshmen—sophomores, Friday, 5 o'clock.

Girl's Loyalty club will have charge of Vespers at Y. W. this week.

Morris Evans, instructor in agricultural economics, who has been for several weeks in the Park View hospital recovering from an operation for appendicitis, is again back at his work.

BEAU BRUMMEL SHIRTS

A wonderful line, comprising shirtings in a great variety of beautifully colored and exclusive patterns. We are mighty proud of the Beau Brummel line and take great pleasure in showing you.

Each pattern is especially tailored and comes in soft collar with French cuffs and bands with French cuffs.

PLAN FOR 1,000 AT HOMECOMING

BIG MIXER IN GYMNASIUM AFTER PEP MEETING

Organizations Planning Programs for Benefit of Alumni—To Arrange For Housing Old Grads in Homes

Arrangements are being made by the college, the athletic board and the alumni association to take care of 1,000 alumni and former students at the Homecoming game, November 13.

Box seats will be constructed along the side lines and reserved for alumni and all college and Manhattan alumni and former students are asked to reserve their seats in this section.

Headquarters for the visiting alumni will be maintained in Recreation center Friday afternoon, November 12, and all day Saturday, November 13. A number of special events are being scheduled for homecoming day and homecoming evening. Following the pep meeting Friday evening at 7:30, will be the big mixer at which the alumni will be the guests of honor.

President and Mrs. Jardine, the deans, members of the athletic board and Pan Hellenic council, literary societies, and alumni association will be in the receiving line. After 10 o'clock the guests will be invited to the fraternities, sororities, and other organizations which are planning homecoming affairs.

Some of the literary societies are already planning to hold open house the evening after the game. The Websters and Euros have a program practically arranged which will include a debate on the "Necessity of Prohibiting Smoking by a National Amendment," and papers by members of the Websters from classes in the 80's, 90's, and the last two decades. Invitations have been sent to every alumnus of the college, of whom the general secretary has the present address, to return for the homecoming. The local alumni association is taking up the matter of finding necessary rooms for the visitors through the Chamber of Commerce.

W. S. WIEDORN OF CORNELL TO BE LANDSCAPE GARDENER

Formerly with Aolmstead Brothers, Brookline, Massachusetts

W. S. Wiedorn, who is to take the position in landscape gardening left vacant upon the resignation of A. M. Doerner, is expected to take over his duties, November 15.

Professor Wiedorn is well qualified for the position, having been graduated from Cornell university. While in college he was a conscientious worker in his preparation for land-

scape work. During the past year, Wiedorn has been employed by Aolmstead Brothers, the well known landscape architects of Brookline, Mass. As a result of his training at Cornell university and his experience with the Aolmstead firm, there is no doubt concerning the capability of Professor Wiedorn in his work here. He is expected to be active in the improvement and planning of homesteads and public parks.

Miss Olive Rude, '20, is teaching at Conway Springs, and Miss Josephine Meldrum, '20, is teaching home economics at Leone.

Mrs. E. Parker visited her son James at the Sigma Nu house last week end.

Mr. and Mrs. McLachlan visited their daughter Maurine at the Pi Beta Phi house last week.

Miss Elithe Kauli is ill at her home in Kansas City, Mo.

Miss Louise Newton of Independence, Mo., returned home, Thursday after spending the week with her sister, Gladys, at the Alpha Delta Pi house.

Miss Jamie Cameron of Abilene, spent the week end at the Alpha Delta Pi house.

Miss Grace Sullivan of Wamego spent the week end here as the guest of Miss Sue Carmody.

Prof. J. W. Searson spoke to the Manhattan high school at chapel last Wednesday morning. Last week was better speech week all over the country and Professor Searson used this topic as the subject of his talk.

Don't throw away your dull safety razor blades. Have them resharpened for less than half the cost of new blades. Leave blades at Cooper's Barber shop, in the Main hall. On the campus. 10-6

CADET OFFICERS ARE APPOINTED

C. C. McPHERSON AND W. D. SCULLY ARE MAJORS

Promotions To Be Made at Any Time During Year If Department Sees Fit

Appointments of the officers of R. O. T. C. were announced last week. The men appointed are as follows:

C. C. McPherson, Major of the first battalion and W. D. Scully, Major of the second battalion. Captains: S. D. Capper, company A; W. J. Buckley, company B; L. H. Reymann, company C; T. D. Hampson, company E; F. J. Maas, company F; A. B. Collom, company G; and Morton Stigers, machine gun company.

The lieutenants appointed are Ray Ferree, first battalion adjutant; R. D. Hilliard, second battalion adjutant; W. H. Koenig, company G; R. E. Marshall, company F; G. E. Gates, company E; P. M. McKown, company C; E. E. Hodgson, company E; K. C. Frank, company D; F. L. Longwell, company H; V. R. Blackledge, machine gun company; H. D. Finch, company A; E. S. Scott, company B; and H. E. Howard, company D.

Second lieutenants appointed were W. J. Clapp, company F; L. Byers, company H; P. J. Phillips, company H; B. E. Colburn, company C; W. J. Overton, machine gun company; E. E. Willis, company E; N. S. Barth, company A; L. L. Marsh, company F; O. H. Aydelotte, company D;

F. M. Ames, company D; L. C. Bliss, company G; W. J. Veale, company B; A. L. Austin, company G. The appointments were made by Major F. B. Terrill for the duration of the year. Promotions will be made at any time during the year if the department sees fit.

Purchase Steers For College

Dr. C. W. McCampbell, head of the animal husbandry department of the college, returned last week from Medicine Lodge, where he bought for the college, a select bunch of three year old steers bred on the famous A. J. ranch in Texas. The purchase was made from Mr. H. W. Skinner at Medicine Lodge where the steers have been pastured through the summer. They will be used by the animal husbandry department in experimental feeding studies.

FARRELL TAKES EXTENDED TRIP

ATTENDS DAIRY SHOW AND VISITS EASTERN SCHOOLS

Agricultural Problems Discussed at Meeting of Land Grant College Association

F. D. Farrell, dean of agriculture, has returned home from an extended visit in the eastern states. He visited the National Dairy show, at Chicago, the University of Kentucky, the Ohio State university, at Columbus, and attended the meeting of

the Land Grant College association which was held at Springfield, Mass. He also conferred with the officials of the U. S. D. A. at Washington, D. C., regarding agriculture in Kansas. While visiting the Ohio State university, Dean Farrell had the opportunity of making observations concerning the present campaign for the erecting of the million dollar athletic stadium.

The topics which were discussed at the Land Grant College convention included the problems of the method of securing financial support for experiment station work, and the methods of further improvement of the instruction in the curriculum of agriculture.

Miss Mildred Wright spent the week end at her home in Washington.

SELECT CLASS HOCKEY TEAMS

GREEN ELEVEN WINS FIRST HONORS IN TRYOUT

Game Schedule Is Posted—Girls
Must Have Good Grades In
Order to Place

The Green color team, with Meta Baker as captain, carried off first honors in the hockey color tournament, the last game of which was played Tuesday afternoon. Although the Purple team, with Anna Best as captain, came out with a score of 12 to the Green's 9, they lost the championship because they had to forfeit a number of their games. The Yellow team, Edna Hoke, captain, and the Red team, Duella Mail, captain, tied for third place.

The purpose of this color tournament was to introduce the game to many of the girls who had never played before and to give those who enjoyed it a chance to make the class teams. But more than pep and an ability to play hockey are needed before one may make her team, for she must have a passing grade in all the subjects in which she is enrolled before her name will be considered.

The following girls have been placed on the class teams: Freshman: Alice Marston, Mary Ellen Henderson, Dorothy Lukert, Ruby Saxton, Lenore Russell, Josephine Davis, Alberta Edelblute, Helen Van Gilder, Betty McCain, Laura Fayman, Alice Husted, Mary Brandley, Eleanor Davis, Mary Nuttles, Florence Barnhisel, Nellie Kneeland.

Sophomores: Mary Fitzgerald, Helen Priestly, Anna Best, Renna Rosenthal, Ruth Kittell, Lillian Rommel, Hattie Betz, Grace Schwandt, Ella Wilson, Ruth Whearty, Nellie Jorns, Zoe Workman, Katherine Horner, Meta Baker, Esther McStay, Lucille Anderson.

Juniors and seniors: Belle Hagan, Clara Evans, Dorothy Ryherd, Mabel Worster, Helen Cooper, Sue Unruh, Agnes Handlin, Irene Drake, Gail Roderick.

Seniors: Grace Turner, Clementine Paddleford, Jessie Evans, Edna Hoke, Corinne Thiele, Dorothy Mosely, Anna Neal, Alice Mustard, Ida Carr, Ruth Willis.

Because there were so few juniors and seniors enrolled on the color teams it was necessary to combine the two classes to make a varsity team.

The following games have been scheduled for this week: juniors and seniors-freshmen, Monday, 5 o'clock; juniors and seniors-sophomores, Wednesday, 5 o'clock; freshman-sophomores, Friday, 5 o'clock. Tuesday and Thursday evenings this week will be used for practice.

nesday, 5 o'clock; freshman-sophomores, Friday, 5 o'clock. Tuesday and Thursday evenings this week will be used for practice.

To Associate Professorship
Charles H. Scholer, for the past year testing engineer in the engineering experiment station, has become associate professor of applied mechanics and engineer of tests in the road materials laboratory. He was graduated from the college in 1914. Professor Scholer succeeds W. B. Wendt, now professor in the South Dakota School of Mines.

Bell In New Work
F. W. Bell, associate professor of animal husbandry, has taken charge of the work formerly done by Prof. E. F. Ferrin. The latter has gone to the University of Minnesota after carrying on work in swine husbandry here for two years. Professor Bell is a graduate of Cornell university and is widely known as a coach of stock judging teams as well as a teacher and experimenter in animal husbandry.

JAPANESE GIFTS AND CURIOS ON SALE AT Y. W. C. A.

Miss Berenice Fuller Secures Material Direct from Japan

Japanese letter paper and little Japanese curios which might be used as gifts are on sale at the Y. W. C. A. office in the home economics building.

Miss Berenice Fuller of the English department secures the material through a friend in Japan and gives it to the Y. W. C. A. to sell. Packages containing two dozen sheets of letter paper and envelopes with colored Japanese designs may be obtained for 25 cents. Students are invited to look over the display.

Make Essay Study Plans

Three members of the English department are working on plans for the study of the essay in the English literature classes. The committee consists of Miss Margaret Russell, chairman; Miss Anna Sturmer and H. W. Davis. The object of the outline is to coordinate the work so that students in all classes will be studying the same material.

Two New Flower Beds

The department of horticulture has made two flower beds, one on either side of the walk in front of Denison hall. Yellow orchid bulbs were arranged in straight rows forming semicircular plots. As these bulbs multiply rapidly, the beauty of the campus will be considerably added to a year or two from now. In the spring time, by the spots of brilliant yellow.

LECTURES, LABS QUIZZES-WHICH?

TO GET RESULTS OF METHODS OF INSTRUCTION

Department of Education Is Requesting
The Opinion of Upper
Classmen

In order to get better in touch with the results of the three methods of instruction now in use in the college, Dean E. L. Holton of the department of education is sending out letters to all juniors and seniors and requesting their reply to certain important questions.

There are in general use in the school three methods of presenting subject matter of a course to a class, and the members of the two upper classes are asked to tell from which method they derived the most benefit. The three methods follow:

The lecture method, in which the teacher does most of the talking and supplements his lectures by quizzes on the principles he presented; the discussion method, in which the

teacher presents problems or questions and the class discusses them; and the laboratory method, in which problems or questions are worked out by the students in the laboratories and libraries under supervision of the teacher.

In order that more weight will be attached to the questions and results will be more specific the names of the students answering are also requested. As the letters are being sent out in relays and there are several hundred to mail, the results will not be known for some time.

Appointed On Committee

Prof. O. W. Price has been appointed on a committee to observe the three hundredth anniversary of the coming of the Pilgrims on December 21. President Wilson has issued a proclamation to observe that day in patriotic services and study. The purpose of the committee is to encourage the study of democracy in the American government. Governor Allen is chairman of the committee.

The classes in embryology are using the second edition of "Laboratory Outlines for Embryology," by Mary T. Harman, associate professor of zoology. This text is being used in several other colleges.

PREPS LOSE TO ABILENE ELEVEN

TEAMS EVENLY MATCHED IN WEIGHT

Abilene Makes Two Touch Downs
First Quarter—Final Score
15-10

In an evenly matched game, the School of Ags lost to Abilene high school by a score of 15 to 10 at Abilene Friday afternoon.

The teams were practically the same weight and both showed good fight throughout the game. The first quarter was started off with a rush by the Abilene aggregation, when they took the ball across for two touch downs but failed to kick goal both times. In the second quarter the Ags seemed to tighten up and except for a field goal by Barber, Abilene was held scoreless the rest of the game. The School of Ag men garnered for themselves a touch down, kicked goal, and were within five yards of another at the end of the half.

After the intermission, "Hobe's" men came back strong, showing their growing desire for the long end of the score by having Stolley place a drop kick between the goal posts, bringing the total score to 15 to 10 where it remained when the last whistle sounded. The Ag team, however, still seemed to have the edge on their opponents for they were within 10 yards of the goal line at the end of the game.

Abilene was strong for end runs and tried a large number of them. The local team made several long passes, and one especially for 25 yards by Preine, when the yardage was badly needed. The team, accompanied by a few rooters made the trip in cars.

The lineup was as follows: Scholtz, r. e.; Hepworth, r. t.; Glover, r. g.; Olson, c.; B. Conroy, l. g.; Butler, l. t.; Miller, l. e.; Stolley, l. h.; Manley, q. b.; Preine, r. h.; I. Conroy, f. b.

PRIZES OFFERED TO AG STUDENTS

HONORARY FRAT TO GIVE \$100 FOR PRIZE ARTICLE

Subject of Paper to Be "Relation of Agriculture to Development of Nation"

Alpha Gamma Rho fraternity, Wisconsin chapter, has advised that the fraternity, in an endeavor to instill among students of agriculture a broader understanding of agriculture as an industry fundamental to the development of the country, is offering two prizes, one of \$100 and one of \$50, for articles on the subject, "The Relation of Agriculture to the Development of the Nation."

The contest is open to any bona-fide undergraduate students in the division of agriculture here. The article must not exceed 5,000 words and must be typewritten on clean white paper eight by 11 inches, with a 1½ inch margin on the left side of the page. When completed the articles are to be handed to the Dean of agriculture, unsigned, together with separate statements from the authors showing that the latter have received no personal outside assistance.

The dean will forward the manuscripts to a committee of the Alpha Gamma Rho fraternity which will arrange for the awarding of the prizes by a committee of agricultural authorities not connected with the fraternity. All manuscripts must be in the hands of the fraternity committee not later than March 1, 1921. The three best papers submitted will be published in the Alpha Gamma Rho fraternity magazine.

Dean F. D. Farrell believes that students in agriculture at K. S. A. C. should have an excellent opportunity to compete successfully for these prizes as from no other agricultural college of the country does a higher percentage of the graduates return to the farm.

Additional information regarding the contest can be secured at the office of the dean of agriculture.

NEW ASSISTANT PASTOR IS HERE

MRS. JULIA M. WAY IS CONGREGATIONALIST HELPER

Has Had Wide Experience in Social Work of Various Kinds

A Congregational assistant pastor, Mrs. Julie M. Way, who will share with the pastor, the Rev. William Franklin Slade, the college work, has been secured and will begin her work here immediately. Instead of hav-

ing a pastor to do nothing but care for the student work, the Congregational assistant pastor and pastor will share the college work, neither having entire charge of it. Both will spend a part of the time at the student pastor's office in Anderson hall.

Mrs. Way is well fitted for the work she takes up here. She has always been closely associated with church affairs, especially those phases connected with the social life of the church. Mrs. Way's father was a Presbyterian minister, and, for a number of years a missionary to Turkey.

Mrs. Way has had experience as pastor's assistant, as well as experience in child welfare work, work with a child placing agency, and Red Cross work. She has done special work of various natures in Maine, Illinois, and South Carolina.

AGRONOMY MEN PLAN MEETING

PROFESSORS OF DEPARTMENT TO MEET EACH MONTH

Purpose Is to Keep Members Acquainted with What Each Other Are Doing

At the suggestion of L. E. Call, professor of agronomy, the members of the Agronomy department held a meeting November 1 at which Professor Call told of his recent trip to Springfield, Mass., where he attended a meeting of the American Society of Agronomy. He also reviewed the paper which he presented at the Springfield meeting.

It is planned to hold these meetings regularly now once every month for the purpose of discussing matters of interest within the department. At the next of these meetings teaching standards and methods will be taken up.

The agronomy department has something over 12 members, many of whom are in charge of important experimental projects. Others of the department spend all their time teaching and are therefore unable to keep in touch with the experimental work being conducted by their own department. It is with the idea of keeping the members acquainted with what each other are doing, that these monthly meetings are being promoted. It is also believed that these conferences will help to keep the extension men familiar with the experimental station work.

SOCIETY

Professor and Mrs. L. E. Melchers entertained the instructors of the botany department at a tea Thursday afternoon. The occasion was a party in honor of a visit of Mrs. Melchers' mother.

Senior girls Pan-Hellenic were dinner guests at the Chi Omega house Thursday evening, November 4. A meeting was called after dinner by Miss Norine Weddle who is president of that organization this year.

Chi Omega fraternity held initiation Sunday for Agnes Handlin, Olive Mitchell, Florence Meyer, and Rowena Thornburg.

Delta Zeta will hold open house Thursday evening from 6:45 to 7:45 o'clock for the Kappa Sigma fraternity. Last Tuesday they were at home to the Alpha Tau Omegas.

Delta Zeta has pledged Miss Kathryn Hitch, of Manhattan and Miss Ruth Ely, of Kinsley.

The first Tobasco dance of the year was given at Harrison hall, Friday night. The music was furnished by a five piece orchestra. Mr. and Mrs. W. C. Skourup chaperoned 35 couples were present.

More than 40 couples attended the dance given Friday evening in Recreation hall for members and guests of the Elkhart club. Music was furnished by a four piece orchestra. The chaperones were Prof. and Mrs. E. S. West, Prof. Robert De Rose, Miss Miriam Spicer, and Mrs. L. M. Cropp.

Alpha Zeta, honorary agricultural fraternity, entertained Monday evening with a six o'clock dinner at the Pines. After the dinner a report from the national convocation was given by Prof. J. H. Parker. The fraternity decided that during this year they would have a dinner the first Monday of every month.

W. W. Fetrow, '20, and R. D. Nichols, '20, both research assistants in agricultural economics, who are stationed at Holton and McPherson respectively, will be in Manhattan from November 11 to 13 for a conference with the department on the cost of production work being done by them.

Sunday dinner guests at the Iota Psi house were Dean Mary Pierce Van Zile, Mrs. N. W. Kimball, Ned and Tom Kimball, and Ralph Van Zile.

STUDY COSTS OF FARM PRODUCTS

GRIMES TO ATTEND CONFERENCE IN CHICAGO

Investigators Will Try to Determine Expense of Producing Agricultural Commodities in All Parts of Country

W. E. Grimes, professor of agricultural economics, will leave November 29 for Chicago where he will attend a conference of investigators who are working in connection with the United States department of agriculture on the problem of cost of production of farm products.

The purpose of the meeting is to consider the different methods of determining the costs and to try to agree upon some of the disputed points. The conference hopes to handle the cost of production work so that the results will be not only of local value, but also of value nationally.

While in Chicago, Professor Grimes will attend the International Livestock exposition and the Hay and Grain show, as well as a meeting of the state marketing officials to be held there at that time.

AWARD FRENCH SCHOLARSHIPS

PURPOSE IS TO PERPETUATE FRATERNITY

Candidate Should Be Graduate of College or Professional School—Must Know French

Announcement of the American field service fellowship for French universities and a display notice of the award of fellowships to be made early in 1921 for the year 1921-22 has been made to some members of the faculty of K. S. A. C. The object of this announcement is to secure cooperation in securing publicity for this award among suitable candidates.

In brief, the American field service fellowship for French universities has been established in order to perpetuate among future generations of French and American youth the mutual understanding and fraternity of spirit which marked their relations during the war. This organization proposes to award fellowships for advanced study in France to students selected from American colleges, universities, and technical establishments with occasional fellowships for French students in American universities. It is also proposed to encourage the development of a body of university scholars who by personal acquaintance with the French achievements will be in a position to restore in all branches of American public opinion the just status of French science

and learning and a better appreciation of the place of France in the leadership of the world.

The fellowships for 1921-22, not to exceed twenty five in number, will be of the value of \$200 plus 10,000 francs, and are tenable for one year. They will be renewable for another year upon application, provided circumstances warrant it. The fellowships will be offered in many fields of study such as agriculture, chemistry, geology, and many others.

A candidate must be a graduate of a college of recognized standing or of a professional school requiring three years of study for a degree. If not qualified in either of these ways, the candidate must be 24 years of age and must have spent five years in work requiring like technical skill. The applicant must also have a practical ability to use French books. Candidates must also furnish statement of purpose in going to France and statement of college work and other minor details. Further information can be obtained from the American University union, 411 West Seventeenth street, New York.

OUR ALUMNI

A. D. Rice, '93, is taking his sabbatical year from preaching and is teaching history in the high school at Lamont, Okla.

Helen Gott, '19, is spending the year at her home in Arlington.

Miss Mary Ida Covert, '19, and Mr. Frank R. Rawson, '16, were married June 9 at Crawfordsville, Iowa. They are making their home at 20 S. Grant street, Denver, Col.

Miss Blanche Crandall, '18, is teaching domestic science and art in the high school at Tucson, Arizona.

Miss Hildegard Harlan, '16, is teaching domestic science at Miami, Arizona.

Miss Ruth Beggs, '16, is teaching in the high school at Casper, Wyoming.

CLASSES FINISH FAMILY BUDGET

GIRLS FIND THAT HOMEMADE GARMENTS WEAR BEST

Instructors Believe Students Should Become Acquainted With Conditions of the Poor

Clothing classes have finished their family budget and are now working on their family garments. Every group in working out their three year budget found that from \$5 to \$25 could be saved by careful planning. In some cases articles were found to be cheaper when bought ready made than when homemade,

although the homemade would last longer because of the better quality of material and the more careful sewing.

In the lecture classes of clothing the girls have begun reading such books as "Children of the Poor," "How the Other Half Live," "The Business of Being a Woman," "Women of Industry," "The Bitter Cry of the Children," and "Prisoners of Poverty."

By reading such books the instructors think the students will become more interested in conditions and will work for the betterment of the poorer people of the larger cities.

Alumni visitors of the veterinary department who were here for the K. U.-Aggie game were W. J. Scalton, '15, Solomon; C. H. Dean, '16, Arkansas City; R. R. Parker, '19, Douglass; R. R. Houser, '14, Greenfield; J. F. Erdley, '20, Holton.

WRITERS MEET IN OKLAHOMA

SIGMA DELTA CHI SENDS EISENHOWER TO CONVENTION

Will Present Invitation to Journalism Fraternity to Meet Here Next Year

The national convention of Sigma Delta Chi, men's journalistic fraternity, will be held in Norman, Okla., from November 18 to 20. Milton S. Eisenhower, president of the Kansas State chapter, has been chosen as a delegate from this college. Ralph Foster was the delegate last year.

Sigma Delta Chi is one of the largest professional fraternities. Its convention, which is held annually, is always an important affair. It is expected that 100 members of the fraternity will be at the convention at Norman.

Mr. Eisenhower will present an invitation at the banquet Saturday evening to bring the national convention here next year. This would be a big boost for the college for such a convention has never been held at this institution.

It is expected that Prof. J. W. Searson, Prof. N. A. Crawford, and Prof. C. E. Rogers will also attend the conference. They are alumni members of the fraternity. As the Aggie-Sooner game comes at the same time, the four Aggies at the convention will get to attend the game.

FROM CHILE TO LEARN MILLING

VALDES TAKES NOTHING BUT CHEMISTRY THIS TERM

Father of South American Student Supplies Flour to Whole Country—Chilean Schools Similar to Ours

One of the five men who are specializing in the course in milling in Kansas State Agricultural college is Fernando Valdes. To him it is the most important course on the hill, although he takes nothing but chemistry this semester. But then, Mr. Valdes has a very good reason to study this course so extensively, for his father, who lives in Chili, owns a large mill and has part owner-

ship of another mill with two brothers, in Sandiagio, Chile.

These mills, which have a capacity of five hundred barrels, supply all the people of Chili with flour, besides exporting flour to Bolivia and Ecuador in normal times. During the war they exported to European countries.

Valdes came to K. S. A. C. in the spring of 1919 and took up milling with the intention of going back to Sandiagio and working with his father. He says in the two years in which he worked in the mills, after having graduated from the schools, that he knew nothing of why things were done as they were, so of course he came here to find out why, and to see if he could not help to make them better.

The Chilean schools are similar to ours, but they are all national schools. At present the government is planning to establish a new agricultural college and a committee is to be sent to the United States to investigate the equipment needed, and Mr. Valdes, being a loyal Aggie, intends to write telling them of the fine equipment and grounds at the Kansas State Agricultural college and urge them to come here.

Mr. Valdes has a brother, Manuel Valdes, here. He is a freshman in engineering.—Kansas Industrialist.

SCHOOLS ASKED TO KEEP LANDING OF THE PILGRIMS

Suggestion Is That Celebration Be in Form of Play or Pageant

K. S. A. C. is asked by the community service cooperation of New York to observe President Wilson's proclamation and celebrate the Tercentenary of the landing of the Pilgrims, December 21. It is most appropriate that college people observe this day as they more fully than any one else enjoy the benefits of Pilgrim ideas.

The suggested nature of this celebration is that of a pageant or play depicting colonial days. There are several excellent plays of this nature that could be produced at a small cash outlay.

IS WHEAT CROP BEING HOARDED

KANSAS CITY'S RECEIPTS POSTED IN WATERS HALL

Department of Agricultural Economics to Determine Whether Grain is Being Hoarded

To determine whether or not this year's wheat crop is being held off the market, the department of agricultural economics is going to erect a bulletin board on the third floor of Waters hall on which daily receipts of wheat in car load lots on the Kansas City market will be plotted.

The receipts of this year, last year, and for 1916 will be posted from day to day. The year 1916 is considered nearly a normal year in this respect and for that reason is being used as a check on the last two years. In explaining the work, W. E. Grimes, professor of agricultural economics, said "The production of the three years being considered is nearly enough alike that it will affect the meaning of the plot but little."

Professor Grimes explained that if the farmers are holding their wheat off of the market the receipts will hold up anyway for a while, till the elevators over the country are emptied and then there will be a sudden drop in the receipts. Whether or not this is the case remains yet to be seen.

**FLOYD HONEYWELL WITH THE
GENERAL ELECTRIC COMPANY**

Enrolled in Senior Student Training Course at Lynn, Mass.

Floyd W. Honeywell, who was graduated from the course in electrical engineering here last year, writes that he is now employed by the General Electric company at their Lynn works in West Lynn, Mass. He

says that he is enrolled in what is called their senior student training course, has spent six weeks on small motor test, seven weeks on constant current transform and is now on the turbo-alternator test. He has the arc lights and meter tests yet to take. He shows much interest in the K. S. A. C. Engineer for which he has subscribed.

Paragraph Writing Popular

Twenty five persons in the journalism department have signed up for the course in column editing and humorous writing which is to be offered next term by Prof. H. W. Davis of the English department. All persons who are interested in the course should sign their names on the bulletin board in the journalism practice room.

For Rent—two half rooms for rent at Y. M. C. A. \$6.25 and \$6.75 respectively.

Mildred Barackman of '18, is teaching home economics at Ellsworth.

BATIK CLASSES OFFERED HERE

OLD ART MODERNIZED FOR USE ON FABRICS

Costume and Design Students to Receive Instruction From Miss Schell

Batik work is a new feature to be seen, under the instruction of Miss Mary Schell. Batik is an old art which is now the newest fad in hand decoration of fabrics, and is being used in exclusive shops, art exhibits, and in stage settings.

The word "batik" means painting with wax, but the process also includes dyeing. From a little copper cup with a curved funnel the molten wax is poured on goods in a fine stream. The wax is put over each

be colored with the dye in which the fabric is to be dipped. The process is repeated for each color and then the wax removed by boiling water. The class will take up only a simple process as the materials for more difficult work cannot be secured.

AGGIES LOSE TO

MISSOURI SCORE 10-7

(Concluded from page one)

night to welcome home the team. An equal number saw them off on Friday morning in the greatest demonstration of pep ever staged in Manhattan. The school is awakening to itself and supporting the team in the manner to which it is entitled. The students realize that the team has been playing in hard luck, but that it has been fighting every inch of the way in the last two games. A battle royal will be staged with Ames next Saturday on Ahearn field and every loyal Aggie, which means the whole school, will be out.

The Supply is Limited Don't Take the Chance

The Old Grads will be coming home next Saturday. The Brown Bull will welcome them.

Don't take the chance of not getting your copy by waiting until the last minute, as the supply is too small to meet the large demand on that day.

CROWDER'S CLEANING and DYE WORKS

THE KANSAS STATE COLLEGLIAN

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, FRIDAY, NOVEMBER 12, 1920

NO. 18

KEEP SCHOOL ALL MORNING ON SATURDAY

ALUMNI MUST NOT FIND CLASS ROOMS EMPTY

NO EXAMS TO BE GIVEN TOMORROW

Prexy Says No One is Expected to Learn Much—Mike Believes Students Should Be On Hill in Morning

No, gang, the classes aren't going to be broken up Saturday morning. At least prexy says so—and he ought to know. And Cliff Stratton thinks it's all right too, so it should go through.

"If Saturday is to be Homecoming day," says Cliff Stratton, secretary of the Alumni association, "our alumni should not find the class rooms empty, the shutters closed and all student activity dead. We want to show the old grads how we are doing things now. The alumni will appreciate seeing us in action Saturday."

Mike Says "Keep School"

Mike Ahearn is strongly in favor of school Saturday morning, declaring that it is better for the morale of the team to have the students begin the day with exhibitions of pep instead of spending the morning at home and perhaps getting too busy to go to the game.

"I frankly believe it will be wrong to declare a holiday Saturday," said President Jardine in conference. "No one is expected to learn a great deal Saturday but two holidays a week are entirely too much." He made it known that he thought the attendance at the game would be cut down if there were vacations on Thursday and Saturday. Many students would take advantage of the situation by going home over the week end, thereby missing the game.

No Exams Saturday

"Should a holiday be granted, the majority of the students would not appear on the campus," says William Knostman, president of the S. S. G. A. "We will have a big chance to show our pep in getting together between classes Saturday morning. Let's help the grads get into the spirit of Aggie fight."

The council has asked that no examinations be given Saturday morning and as the students have no classes in the afternoon they are urged to be on the hill as usual Saturday morning.

HOLD TRYOUTS FOR DEBATERS

WILL TAKE PLACE NOVEMBER 19, 22, AND 29

"Resolved: That Kansas Industrial Court Law Should Be Repealed" Is Subject for Debate

Annual fall debate tryouts for varsity debaters will be held in the afternoon of Friday, November 19, forenoon of Monday, November 22, and forenoon of Monday, November 29 in A-62. Judges of the tryout are O. H. Burns, Dr. J. G. Emerson, and Dr. H. T. Hill.

The subject for the tryout is the same as the inter-society question, "Resolved: that the Kansas Industrial Court Law Should Be Repealed." Each person trying out will give a five minute constructive speech and a three minute rebuttal, excepting those that have debated in the inter-society debates, who will be allowed to give their seven minute constructive speech.

This tryout is for the purpose of choosing debaters for the women's dual debate with the University of Kansas and men's dual debate with the Kansas State Normal. These are both dual debates that will require a large squad. Those wishing to try out should see Debate Coach O. H. Burns and arrange their schedule for the tryout.

STUDENTS PRESENT PAPERS AT ENGINEERING MEETING

Mechanicals Have Started Year with New System of Programs

At the program given last week by the student branch of the American Society of Mechanical Engineers, several papers were given by the stu-

dents in the division. Amos Payne's paper on "Current Events" was interesting to engineers in view of the fact that aviation and engineering are two big cogs in the wheel of advancement of the world's progress. H. C. Jennings paper on "Patents" was presented in an unusual but attractive manner. A. C. DePew gave a short talk on Robert's Rules of Order and on the conduct of the meetings.

Mechanical engineers have started the year with a new system of interesting programs. The program committee consists of men who are endeavoring to put new pep into the programs and each member of the society is made directly responsible for his part.

NORMAL PLAYER DIES OF INJURIES

DEATH OF J. REEVES OCCURRED SUNDAY MORNING

Star Full Back Fatally Injured in Normal-Washburn Game Saturday

Jack Reeves, star full back on the Kansas State Normal team, died Sunday morning, November 7, at 6 o'clock from injuries received in the game against Washburn Saturday.

Reeves, who was hurt early in the game, suffered a ruptured spinal cord. It was while carrying the ball that he was tackled by a Washburn player and when the two men went down, Reeves' neck was twisted.

Reeves was a member of the Phi Sigma Epsilon fraternity and prominent in school affairs. He was considered one of the star players on the team.

Harry Cole, a team mate, broke his shoulder and Boles, a Washburn player, broke two ribs in the same game. A muddy field coupled with hard playing was the cause of the several injuries.

AGGIE COURSES OF STUDY ARE UNDERGOING EVOLUTION

Last 20 Years Has Seen Curriculum Change from General to Specialized Courses

Courses of study in K. S. A. C. have undergone an interesting evolution since 1889. In that year only a general course, which differed slightly for men and women, was offered.

In 1886 the curriculum became specialized, and considerably more agriculture was offered, such as gardening and farm work for the men, and butter making for the women.

In 1896 definite courses in agriculture, mechanical engineering, and domestic science were adopted. These however, were offered only in the junior and senior years. Since then, the courses and departments have been rapidly extended until they cover a wide and varied field.

Attention Seniors

All seniors, upon payment of Royal Purple assessment should make an appointment for photograph, immediately, at Royal Studio, Eleventh and Moro streets. This is important because each class has a limited amount of time for having photographs taken. Appointment may be made by calling number 574. Take your receipt with you.

Music Recital Sunday

A music faculty recital will be given by Miss Mary Baker, pianist, and Miss Katherine Kimmel, contralto, in the auditorium Sunday afternoon, at 4 o'clock.

ALUMNI CALENDAR

Friday, November 12

Afternoon, registration and reservation of football tickets, alumni headquarters, Recreation Center, Anderson hall.

7:30 o'clock, pep meeting, auditorium.

8:30 o'clock, mixer, gymnasium.

10 o'clock, informal reunions and functions.

Saturday, November 13

Morning and until football game is called in the afternoon, alumni registration and general "get together," reservation of football tickets, alumni headquarters, Recreation Center, Anderson hall.

2:30 o'clock, football game, Kansas Aggies-Iowa Aggies, Ahearn field. Following the game, fraternities and sororities generally are giving dinners and informal affairs for their alumni and friends.

8 o'clock, Web-Euro reunion and alumni program, Web-Euro hall, Nichols gymnasium; Hamp-Io reunion and alumni program, Hamp-Io hall.

Two Jitney Drivers Make A Successful Grand Opera Debut

College students well remember when the Sonora Grand Opera company came to our fair city and presented "Il Trovatore." We remember well the lovely tenor with the smooth voice and the black hair, and we remember the brunette beauty who, confined in the dungeon, wailed and gnashed her teeth. Then the tenor-boy came and sang, "Lenore, ah, I have sighed to rest me." That was all very beautiful and romantic.

Well, do you remember the brave soldiers who came in shouting? My, how they flourished their battle axes and sang a song of exploitation. But here's the point of the story. Two of the soldiers were not Italian opera stars at all. Oh my no, why listen dear, they were jitney drivers from Manhattan. Impossible, you say? Certainly not. You see, it was this way. When Sonora and company came to Manhattan they were shy two choristers, Senors Spaghetti and Confetti, by name. Now Sonora could not bear the thought of presenting so majestic an opera as "Il Trovatore" without full cast and chorus so Impresario Ignacio Del Castillo scouted about a bit to learn what he could about local operatic possibilities.

Castillo found what he wanted at the Marshall theater. He didn't bushwhack any. He merely asked Taxidriver Colburn if he would not like to try his hand at grand opera as a matter of accommodation for which he would be paid a certain stipulated price. Colburn was willing to try anything once, so he fell. Then Castillo asked if he knew of any other aspirant for the footlights and Colburn immediately named a friend of his, Carl Fair, who was a member of his union. In this manner did two favorite sons make their debut in the realms of glorious opera.

Did they get by? Why, child, they played their parts so well that the majority of people there never did know but that the home heroes were really and truly silver tongued songsters from sunny Italy. As a matter of fact the people don't know yet.

FOUR LOCALS FORM COUNCIL

ASSOCIATION TO HANDLE INTER-LOCAL FRATERNITY MATTERS

Officers Elected at Meeting Monday Night—Howe is President

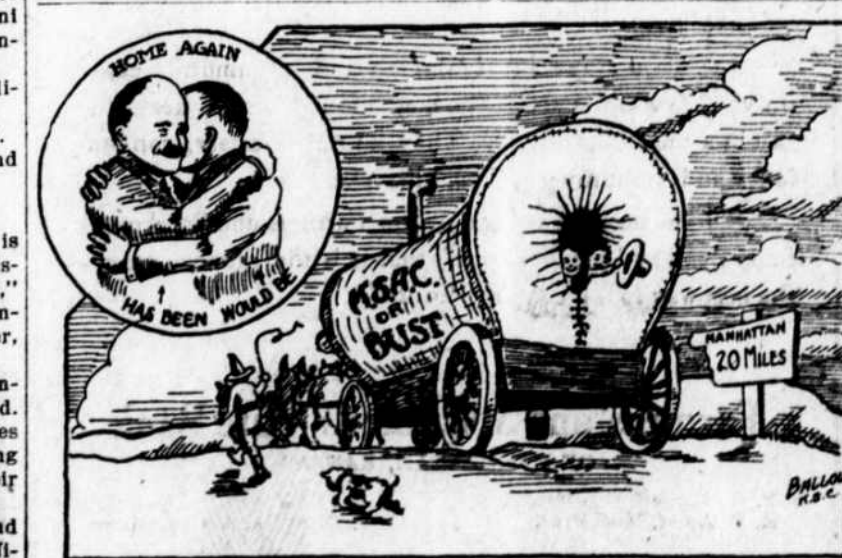

Four of the five local fraternities of the college have formed a local fraternity council.

The council is composed of two men from each local fraternity belonging to the association. The purpose of the council is to handle all inter-local fraternity matters and to secure representation on the executive committee of the S. S. G. A. The local fraternities represented on the council are: Phi Delta Tau, Phi Gamma, Kappa Phi Alpha, and Omega Tau Epsilon.

At the meeting of the council Monday evening the organization of the council was perfected and officers elected. Harold Howe was elected president; A. Lee, vice president; W. F. Law, secretary-treasurer. A committee was appointed to begin work on petitioning for representation on the executive council of the S. S. G. A.

Winter's Car Stolen

The Overland car of "Ship" Winter's, well known to Aggie football men, was stolen Tuesday evening about 7 o'clock from in front of the Sigma Phi Epsilon fraternity house, 221 North Delaware avenue. No trace of the car has been found as yet nor have the Riley county police any clue as to the identity of the thief.

You Tell 'Em, Schooner, You Know the Old Grads

FILM MOVIE SCENARIO OF LIFE ON HILL

COLLEGE PURCHASES \$3,500 MOVING PICTURE MACHINE

MIKE TO HAVE LEAD IN PICTURE

Films to Be Shown in Kansas Theaters as Publicity for Farm and Home Week

All ye would-be movie stars, hearken! K.S.A.C. is to have a moving picture scenario filmed and finished right here on the college campus, and every Aggie student will be given an opportunity to take a part in the picture.

Buy Moving Picture Machine

The new \$3,500 moving picture machine which the college has just purchased from the United States war department arrived here yesterday. The machine, which was owned by the war department, and which was sent to France but not used, was purchased by the college at a marked reduction. K. S. A. C. is the first institution in the state to own and operate a machine of this kind.

Mike To Be In Scenario

A scenario, which has in its make-up a number of college scenes, including a football game, has been written and the pictures for some of it will be taken at the homecoming game Saturday. The picture will show a lot of views of different college activities as well as "Mike" Ahearn in the role of a farmer with side burns and all the other traditional trimmings. When completed, it will be shown in all the theaters in Kansas as a part of the publicity for the Farm and Home week to be held at the college from February 7 to 12.

Those in charge of the work say Michael Francis Ahearn is to have the leading part, and that, in itself, should make the picture a success.

F. E. Colburn, college photographer, who has had considerable experience in photographic work of different kinds, will have full charge of taking and finishing the pictures, which will be taken at various times about the campus during the next two or three weeks.

HOLD SERVICES ARMISTICE DAY

SPEAKER IS THE REV. EDMUND J. KULP

Spoke on Courage of Humanity During Late War—R. O. T. C. and Silver Star Men Present

Impressive and inspiring services were held yesterday in the college auditorium in commemoration of the signing of the Armistice.

The Rev. Edmund J. Kulp, pastor of the First Methodist church of Topeka, addressed an audience of ex-service men, students, and townspeople. He spoke of the courage of humanity so vividly portrayed in the late war; of the desire for justice by the great masses of common people throughout the world; and of the need of American leadership in the world that is to be. He considered the theories advanced by pacifists, militarists, business economists, and diplomats, as betraying a shallow knowledge of humanity. He declared that no question is settled until it is settled right.

Invocation and benediction were

offered by Father Lucky of the Church of the Seven Dolors, of this city. Miss Katherine Kimmel sang "The Star Spangled Banner," with the accompaniment of the college orchestra. The program in the auditorium was concluded with the singing of America.

The silver star men of the city occupied the pit, and the two R. O. T. C. battalions were seated on either side of the pit. Five Civil war veterans occupied places of honor on the stage.

STAGE LAST PEP MEETING TONIGHT

FOUR OR FIVE HUNDRED ALUMNI EXPECTED OUT

Cliff Stratton Urges That Students Make Alumni Feel at Home

At 7:30 tonight in the auditorium will be held the last pep meeting of the season. Arrangements have been made to make this one of the liveliest of the season. President Jardine, Mike Emerson, and Cliff Stratton will talk, and the band will play some snappy selections.

The cold weather has spoiled the plans of many alumni who were expecting to be here tonight and tomorrow, so that only four or five hundred are now expected.

Cliff Stratton urges that since we will all soon be alumni we should "do unto others as we would be done by," and make the visitors feel at home at the mixer following the pep meeting.

No social affairs may start before 10 o'clock. Dancing will begin in the gym at that hour, and Recreation hall will be opened up if the gym overflows. The fraternities, sororities, and other organizations will also start their affairs at ten.

IT'S A SAD TIME SAY H. E. GIRLS

DINNER WORK BEGINS MONDAY

Faculty Members, Wives, and Young Men Desirous of Experience Are Eligible as Guests

The regular dinner work given each year by senior girls enrolled in the division of home economics will begin Monday, November 15, and meals will be served to a limited number of guests from November 15 to 20 inclusive. The work, which is in charge of Mrs. A. F. Polne, will be discontinued during Thanksgiving week, and will be resumed November 29. Dinners will be served in the dining room of the home economics hall at 12 o'clock every day except Sundays, until December 18.

The guest list usually includes members of the faculty who like an occasional change from the cafeteria style of meal service, professors and their wives who can enjoy a well cooked meal which the busy housewife has not had to prepare, and young men students who desire practice in proper table service, as well as a knowledge of correct usage.

At each of the six tables there will be two guests, critic teacher, and a home economics student. The meals, which will cost 35 cents, will vary in the degree of formality from family service to formal dinners.

Because of the number who take advantage of this opportunity to get their meals in the home economics hall, anyone especially interested should see Dr. L. J. Bogert, or call her office, phone 919.

F. F. KIMBALL IS NEW HEAD OF THE KANSAS CITY CLUB

Organization Plans to Form Nucleus for K. S. A. C. Alumni Association

At a recent meeting of the Kansas City club the following officers were elected for this semester: F. F. Kimball, president; Esther Curtis, vice president; Margaret Falconer, secretary-treasurer; Paul Kovar, sergeant-at-arms.

The purpose of the club, aside from fostering unity among the Kansas City students, is to form a nucleus for a K. S. A. C. alumni association in greater Kansas City, similar to the K. U. alumni association now in existence there. Until recently the organization has been but temporary, but at the last meeting it was perfected and is now ready to do some real work.

Meetings are to be held on the first Tuesday in every month, in A-73 at 4 o'clock.

GREEK MEETS GREEK IN THE AMES BATTLE

TUG OF WAR WILL BE THE RESULT

MIKE LOOKS FOR A VICTORY

The Dope Is Even and the Teams Appear to be Evenly Matched—Men in Good Shape

..... We feel that the team will deliver a win Saturday.—Mike Ahearn.

Tomorrow Greek meets Greek on Ahearn Field and the inevitable tug of war will result. The Ames Cyclones will tie up with the Wildcats for the third Valley game on the schedule of each team. Neither of the two teams has won a Missouri Valley contest this season and each will be out for blood and a victory. The Ames team has played in hard luck as has the Wildcat team, but neither has offered any alibis, merely kept on fighting.

Dope Is Even

The dope favors the Ames team on the showing made in the Creighton and K. U. games and the Aggies on the Missouri game. Ames defeated Creighton 17-0 while the best the Aggies could do with the Catholic eleven was a 3-0 win. The Cyclones were beaten by a 7-0 count by K. U. and the Aggies lost by two touchdowns to the Jayhawk gang. On the other hand, the Missouri eleven handed the Cyclones a 14-2 trouncing and managed to nose out the Wildcats by a score of 10-7.

So far as can be seen at present it is anybody's game, but whichever way it goes, the winning team will know they have played some football to stow away a win. The Iowans have a fighting team second to none in the Valley when it comes to the old scrap. Wallace, the Ames center would fill in very handily on any eleven in the country. He is the mainstay of the Ames defense and is worth traveling some distance to see. He will face Shifty Cleland Saturday. Shifty went great guns in the Missouri game, being the bright particular star of our line and can be depended upon to make the Iowan show all he has.

Each Has New Football System

The Ames team and the Wildcat gang are both in the same fix on the coaching staff. Each eleven has a new coach and is learning a new system of football. Each has manifested increased strength in every game over the preceding one. The Ames coach of this year is a Chicago veteran and is teaching the Cyclones something they have never used before—a shift. It is a line shift as well as a backfield shift, the guards being back of the line making six men to shift to the side of the line on which the play goes. It is merely an adaptation of the famous Minnesota shift and has been solved rather easily so far.

When seen Wednesday Mike said, "We feel that the team will deliver a win Saturday. They have been coming better and better in each game, and it's about time for the Wildcat to get some meat for the Aggie table."

Recoup Last Year's Loss

The Wildcat still remembers the 46-0 drubbing handed him by the Cyclone gang last year and will be out to avenge the sting of that trouncing. It is the big game of the year in Aggieville and the seats are going fast. Fully as large a crowd as saw the K. U. game is expected.

The team is in good shape for the contest. There were no serious injuries in the Missouri battle, although Captain Ike Gatz had an ankle wrenched and was not capable of playing his best game. The lineup will be substantially the same as that started against the Tigers last Saturday. Sebring and Randles will play ends, Stauffer and Gatz tackles, Hahn and Huston guards and Cleland center. In the backfield Axline will be at the helm, Hinds and Brady Cowell at half, and Sears at full-back.

Well Known Speaker Coming

Miss Leslie Blanchard, a Y. W. C. A. speaker of national reputation, will speak at the auditorium November 18, at 8 o'clock in the evening. She has recently returned from abroad where she has studied the student situation in Europe. It will be worth your time to hear her.

FRIDAY, NOVEMBER 12, 1920

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Aggies at the top of conference athletics by 1922.
4. Clean politics.
5. Greater cooperation between alumni, students, and faculty in bringing athletes to K. S. A. C.
6. Remodeling of the auditorium stage.

IT'S THE SAME OLD BUNCH

"Well, Bill, does it look the same?" asks Spud, class of '03. "Not exactly. There's been a lot of changes and improvements, but it's the same democratic bunch as in the old days," answers Bill of '05.

Spud and Bill and a lot of other former grads of K. S. A. C. are coming back next week to be present at the Homecoming game on Saturday, November 13. They are coming not only to see Mike's team in action, but also for a more important purpose, to renew acquaintances and associations of their student days here, and which have perhaps become somewhat rusty since commencement days.

Some of them have acquired both fame and fortune since receiving their degrees. Others perhaps, are not so famous, and some are just plain ordinary good citizens. But they will have in their hearts the same spirit of loyalty to K. S. A. C., unquenched through the years, and the same consuming interest in all things pertaining to their college. Because of this interest, and because they can not keep in as close touch with Aggie activities as they would like to, any information that we volunteer and any courtesy which we show to these former Aggies will be doubly appreciated.

The Aggie alumni have repeatedly demonstrated that they carry permanently in their hearts a warm regard for their alma mater. We will not cool this feeling by a thoughtless attitude of indifference and inhospitality when they return to renew their allegiance and to re-confirm their conviction that they are graduates of the most democratic, and altogether the best little old college in the world.

JOIN SAFETY FIRST DRIVE

Several accidents have recently resulted from reckless driving and speeding, on the streets of this city. These accidents have been serious and even fatal. Cars are driven in Manhattan noticeably faster and more carelessly than in most towns of like size in the state. This is not because the people here are more reckless than the people of other towns, but mainly because the laws are not enforced.

The city administration has been lax in this matter. The only way to bring about better conditions is to enforce the traffic laws and to prosecute speeders. Cities all over the country are conducting campaigns to reduce the number of accidents. Manhattan should join in this drive for "Safety First."

As intelligent men and women the students of this college should support the city administration in such an effort. Students can do this by being careful in their own driving, and by taking a sane attitude toward recklessness and speeding.

"TO HIM THAT HATH"

Many fraternities at K. U. have adopted the plan of compelling each member to answer the roll call for two college activities on the hill each week. Nowhere is the Biblical maxim, "to him that hath shall be given," more applicable than in college activities.

If you will look into the record of the student who has a long list of college activities to his credit in the Royal Purple you will find that perhaps the first one or two activities were voluntarily taken up by the student. The remainder come to him as a reward for faithful service.

Because they come to him he finds himself becoming more and more capable. He is receiving the benefits of good citizenship because he is a good citizen. He gains in increased proportion from his college life as he adds to it.

SHOULD BUMMING BE TOLERATED?

Bumming is certainly more than trespassing, which itself is of course a misdemeanor—but nevertheless to be tolerated to a certain extent. Transportation is supposed to represent a value. The K. U. bunch that bummed to Manhattan were personally no different, perhaps, than the rest of us—but I would like to ask: Was it fair to bum into the game? Was it fair to bum meals? Both of which a number did. If the former acts were not fair how do they differ from bumming on the train?

The "spirit of the law" was mentioned. The spirit of the law, as I understand it, is toward the attitude of obeying the law and not the organized effort to evade the law.—Campus Opinions, University Daily Kansan.

LASSIES OUTCLASS LADS IN GRADES, RECORDS SAY

Graph Made of Comparative Standings Shows Girls to Be Ahead From Start to Finish

V. L. Strickland, director of home study service, has been making some interesting studies of comparative grades received by the boys and girls attending K. S. A. C. A little graph, based on the records of those enrolled in regular collegiate courses during the second semester last year, shows the girls to be ahead from start to finish.

The boys show more improvement as they advance, but even in the senior year the girls have a good margin to their credit. More than 50 per cent of the grades issued to senior girls last semester were G's and E's, while only 45.2 per cent of the boys received these grades.

Publish Burr's Address

The year book of the Missouri State board of agriculture, recently issued, contains a verbatim report of the address of Walter Burr, delivered at the annual Farmers' Week of Missouri university at Columbia last winter. Soon after the address was given, Hon. Jewell Mayes, secretary of the Missouri board of agriculture, requested the privilege of publishing the address as a Missouri state bulletin. The request was refused, as Mr. Burr considered the subject matter more applicable to Kansas conditions.

Miss Jean Hanns spent the week end at her home in Clay Center.

SCABBARD AND BLADE HOLD INITIATIONS FOR SIX MEN

Only Officers Are Eligible to Membership in Organization

Scabbard and Blade, honorary military society, held formal initiation services Saturday and Sunday for the following men: Paul Phillips, H. E. Howard, E. Hodson, W. H. Koenig, Thomas Hampson, and H. O. Pinch. The initiation was held at the Scabbard and Blade camp two miles northwest of town. The camp lasted from 1:30 Saturday afternoon until 9:30 o'clock Sunday morning. Major F. B. Terrill, Captain L. C. Davidson, and Major Chapman were the honorary members present and Lieutenant Brower attended as a guest.

Scabbard and Blade is a national military society and only officers are eligible. The local chapter is company L of Scabbard and Blade.

What Is Your Town Doing?

Several students have expressed interest in the little monthly paper entitled "Rural Service," and have looked through it to find whether any mention is made of their communities. Walter Burr, director of the rural service department, states that he would be glad to receive from any student an account of progressive movements or activities that are being conducted in his home town.

Dean Mary Pierce Van Zile and Miss Taylor were dinner guests at the Pi Phi house Monday evening.

Dean and Mrs. J. T. Willard were dinner guests at the Pi Beta Phi house Sunday.

AGGIES REVIVE AN OLD SPORT

K. S. A. C. RIFLEMEN PLAN FOR MEET

Practice Starts This Week—Ammunition to Be Obtained from Military Department

Great revival of interest in shooting is shown this year by the results of the first meeting of the K. S. A. C. Rifle club.

The club, which was reorganized a few weeks ago under the leadership of Floyd Longwell, is a unit of the National Rifle association. As one of the oldest organizations on the hill, the club has a record to live up to, for shooting used to be a big event at K. S. A. C.

In 1902 the club won the Henderson-Ames cup and for several years held the indoor range championship. After the boys have had some constructive practice on the hill, a qualification meet will be held and teams will be picked to compete with other colleges where there are N. R. A. C. units.

The club of some 25 members starts practice this week. Each member is allotted a certain amount of ammunition free. When more is desired it may be obtained at the wholesale price from the military department.

All shooting will be done on the indoor range at present. Sergeant Coffee of the military department is head coach, but other members of the department will help the boys.

Members of the club can shoot from 5 to 6 o'clock every evening, Friday evening until 9:30 and Saturday after 10:30. All persons who are interested in shooting are urged to come to practice and become members of the club.

You May Get Thru Main Hall—But the Elbows Are Sharp

Hall—An entry in a building, hence a passage way.—Webster.

Noah may have been authority on lexicography but the word "passage-way" leads to the disturbing thought that he was entirely unfamiliar with Anderson hall.

The Unfortunate Individual has a class necessitating a trip through Anderson. After shrinking to alarming proportions, accomplished by much practice, he craftily watches for an opening and dashes up the steps. Halting at the fourth step, he allows a coterie of lovely coeds to descend, four abreast. A shrewd feint and he is through the door and headed down the straight away. A few

steps bring him directly behind four other fair ones who are moving sedately toward the recreation center. Suddenly he perceives a small opening to the left and darts through. For five yards his progress is unimpeded. Then he adheres to the wall while a squad of young infantry men pass in extended formation. By slipping along in diagonal maneuvers he achieves the south door of recreation center where the Young People's meeting is in session. After insulting each member twice he worms his way through to again encroach on the privacy of the North Door Chapter, also in session.

Next his serpentine progress is retarded by an affectionate young couple who are about to undergo the agony of another hour's separation. Falling behind them he succeeds in gaining the post office area. Three women look up in annoyance and four men look "hard" as he jostles their elbows, thus disturbing their leisurely digest of the news from home. After negotiating the post office jam the worst is over and barring an impromptu jury session at the North door he arrives at class only seven minutes late.

Next Saturday the Unfortunate Individual will become temporarily insane with joy when an Aggie half-back succeeds in making fifteen yards in a field forty yards wide and with only eleven men trying to stop him.

Miss Irene Graham spent the week end in Topeka.

Miss Arria Neal spent the week end at her home in Clay Center.

MILITARY TEAMS WILL COMPETE

First Intra-mural Event Is After Thanksgiving

Will Be About Eight Elimination Contests to Decide Championship of Military Department

The first intra-mural athletic event will be held on the Saturday following the close of the Thanksgiving vacation when the different teams representing the military department will meet for their first games. There will be about eight of the elimination contests, and the team winning the battalion championship will meet to decide the championship of the military department.

Major F. B. Terrill hopes to arouse the spirit of athletics at K. S. A. C. in such a way that it will not die as it has done heretofore. He believes also that by the intra-mural plan material will be developed which would not be, otherwise.

Discusses Types of Anchors

J. H. Montague of Kansas City spoke at the electrical engineering seminar last week on types of anchors, ranging from the standard "dead man" to all of the modern patent types. Mr. Montague discussed the holding strength of the

various types in soils ranging from the salt marshes of Louisiana, to the red lands of California, where as he expressed it, "one could hang the moon on a four inch washer."

FRESHMAN GIRLS ELECTED TO PAN-HELLENIC CIRCLE

Six Sororities Choose New Girls as Greek Representatives to Council

Freshman members of the six national sororities on the hill have been chosen to represent their respective groups in the freshman girls' Pan-hellenic council.

The elections are as follows: Pi Beta Phi, Julia Caton and Jean Hanna; Kappa Kappa Gamma, Margaret White and Jessie Lehman; Chi Omega, Louise Hanna and Margaret Currie; Delta Delta Delta, Ann Ratliff and Grace Baker; Alpha Delta Pi, Louise Mowry and Gladys Newton; Delta Zeta, Ruth Cleary and Elizabeth Hinchee.

Anthony Atkins made a business trip to Enid, Okla., last week.

NEW EDITION OF PRICE'S NOTEBOOK BEING ISSUED

To Include Complete Outline of the World's War and Recent Events

The American history notebook which Prof. R. R. Price compiled and uses in his classes is being issued in a new after-the-war edition.

The state text book commission adopted the notebook several years ago. The new edition is closely connected with the new American history text book used in high schools. The second edition greatly enlarges the material of the period since the Civil war and brings it up to date.

H. H. Laude of the department of cooperative experiments, spent the latter part of last week in Emporia where he helped harvest some corn and sorghum tests being conducted there. While there, Mr. Laude straightened up his records and checked up on the work being done there by his department. Gaylord Hancock, who has been county agent there is leaving the county.

Mrs. Daniel Bondurant of Ness City, was a guest at the Chi Omega house last week.

Sunday dinner guests at the Sigma Phi Epsilon house were Mr. and Mrs. E. H. Fielding of Manhattan.

Prof. H. W. Cave of the dairy department has gone to Wisconsin with a committee from Bourbon county to select a Holstein bull. They will visit some of the large herds in Wisconsin.

A yearling Holstein heifer from the K. S. A. C. herd won second place in a class of 13 in the National Dairy show last week.

Dinner guests at the Delta Zeta house Sunday were Dr. and Mrs. L. E. Downs, and Mr. and Mrs. A. A. Riddlebarger.

Holman Bunker and Will Blakely attended the Missouri-Aggie game at Columbia last Saturday.

Mrs. Mayme McCleod went to Falls City, Nebr., Saturday to attend the wedding of her son, George McCleod.

Miss Doris Riddel spent the week end at her home in Salina.

Miss Ila Knight spent the week end at her home in Jamestown.

IS INTERESTING AGGIE BOHEMIAN

M. M. HASTINGS, '06, IS VERSA-
TILE IN MANY LINES

Published New Book, "The City of
Endless Night"—Has Attracted
Considerable Attention

Milo M. Hastings, '06, free lance, free thinker, Bohemian, magazine writer, poultryman, poet, research worker, has written a book, "The City of Endless Night," that is attracting attention. Hastings has written of a Germany 150 years from now. His Germany, comprising a little more than the city of Berlin, is surrounded by the ultra-modern counterpart of the Great Wall of China, isolated, insulated, at bay. Overhead, Hastings's German never sees the sky. Instead is a huge concrete dome, affording protection from airplane raids. The hero is a chemist; the heroine, the superwoman toward which modern education and tendencies are hurtling. The book is interesting, cleverly written, and worth reading.

Hastings is one of the most versatile men the college ever turned out. While here he was known as "queer." He was, and is. But he left his impress. Hastings was the John the Baptist of K. S. A. C. track athletics. When he came to Manhattan, there was none. He organized one out of raw material, running the mile himself to prove it could be done.

No Gym in Those Days

There was no gymnasium, no shower bath. Hastings rigged up one shower in the basement of the dairy building. That was the "gymnasium" for Ahearn's football team in 1905 and the first few weeks of the 1906 season. He built the first chicken houses at the college, and organized the poultry department.

The chemistry of food, and particularly human nutrition, interested him. He tried out feeding experiments on himself.

"Hastings worked out a simple diet for himself," says Oley W. Weaver, '11, who also came from Effingham, Hastings's home town. "It consisted largely of cereals, lentils, and dairy products. A favorite supper was parched cowpeas rolled in butter and sugar. Macaroni and wheat, boiled and served with milk and sugar, was another. He bought his dinners at a restaurant to save time."

These weren't the limits of Hastings's work. He started the annual Hamp-lo egg roasts. He debated and wrote orations. He wrote a parody on Julius Caesar, which he read before the Hamilton society. The members thought it was Shakespeare and were frankly bored.

"I cast pearls before swine," Hastings remarked to a friend.

SUNFLOWERS
H. W. D.

We are willing to wager our last dollar to one of your old doughnuts that by the next election some women's club starts an agitation for a little more color harmony among the ballots.

The world is in sad need of a commercial club wise enough to see that its principal job is that of increasing the rural population served by its dear little postoffice.

—Some economist at a loss for a project to waste his diligence upon might turn his attention to the relation between twin beds and the house shortage.

Avaunt, Big Ben!

When Phoebus opens the golden gates of dawn
And milkmen rattle up and down the streets,
I love to stretch and heave a healthy yawn,
And drop to sleep again among the sheets.

Has fell forty-one
Per cents,
BUT
Nickle seegars
Still sells
Per eight.

—Lucius Spodium.

We have heard it said that every big newspaper in America knows who killed the Czar. But so far no artist has been found who can make the villain's picture look horrible enough to print. Hence the delay.

The greatest press agent the world never knew was the man who discovered the powder puff. And as for artistic printers, nobody has yet surpassed the fellow who set that rouge stick.—Kansas Industrialist.

Now that everybody else has taken credit for winning the war and the election is over, let us hear from the conscientious objectors.

If you don't think there is dynamite in the League of Nations, read Article 15, paragraph. Here it is:

Any member of the League represented on the Council may make public a statement of the facts of the dispute and of its conclusions regarding the same. This with women coming into control of things, too.—Kansas Industrialist.

Remodel Attic

The attic of Fairchild hall is now completely remodeled. A laboratory, four offices, and a store room have been built. The work was not entirely finished when school begun, but on account of the increase in enrolment in the course the laboratory was used. The laboratory and offices are equipped with new modern fixtures.

AGGIES SUCCEED IN PROFESSIONS

MANY LINES OF WORK CLAIM GRADUATES

Are Leaders in Public Service—
Hepe, Westover, and Aicher
In The Foreground

Success follows closely on the heels of Aggie graduates, as can be seen in the reports that come from every part of the United States where will be found men and women who have gone out from here into work in which they have made good in a big way. From directorship of marketing, to feminine activity in national politics, and too, specializing in dairying are but a few of the many lines of professional work which are realizing heavily because of the leadership of men and women who have been students at this school.

The latest news of K. S. A. C. alumni includes a report of the work of Waldo F. Hepe, '17, who has been appointed director of marketing work in Colorado, under the U. S. bureau of markets. Hepe, after being graduated from the animal husbandry course at K. S. A. C., took advanced work at Iowa State college. From Ames he went to Fremont, Col., where as a farmer he came in contact with marketing from the practical side.

Hepe, while in the direct employ of the federal government, also is connected with the Colorado State Agricultural college, which is co-operating with the U. S. bureau of markets. Western Farm Life recently carried a complimentary article about Hepe and his work.

E. L. Westover, '11, has resigned his position as dairy specialist in the Oregon Agricultural college to become field representative of the American Guernsey Cattle club. He will cover the Rocky Mountain and Pacific coast states.

Upon graduation from college, Mr. Westover pursued graduate work for a year in the University of Minnesota. He was for two years director of agricultural work at Milaca, Minn. He then became professor of dairy husbandry in the California Polytechnic institute, resigning after three years to enter upon his work in Oregon. He is widely known as a dairy specialist on the Pacific coast.

Another Aggie graduate, L. C. Aicher, '10 is making good, his job being the supervision of the Aberdeen Irrigation station in southern Idaho.

One of the first steps to fame which Aicher took after finishing his career as a student and as a Wildcat backstop for two seasons, was to travel to southern Idaho where he accepted a position in the Colver Irrigation station. Here he remained for a year and a half when he accepted the position as superintendent of the Aberdeen station.

Another big success which has come to Aicher is that which was resultant of his efforts to develop the Grimm alfalfa seed center which is the biggest in the United States. In addition to these things Aicher is flooding the Idaho homes with publications with regard to the science of irrigated agriculture.

PLAN BIG WEEK END FOR ALUMNI

EVERY ORGANIZATION COOPERATING ON HOMECOMING PLANS

"College Belongs to Alumni" Says
Prexy—Plans Complete for
Big Mixer

The alumni who come home Friday and Saturday this week can find plenty of places to go and plenty of things to do. Every organization on the hill is joining this year in the program to see that alumni have a good time. There are no formal affairs on the program. No one is going to insist that the returned grad

"Gifts That Last"

or old student attend any special function or formation, except possibly the pep meeting, and that will not require any urging.

The general spirit of homecoming day is to give the homecomer a chance to renew his youth. His fraternity house will be open to him. His literary society is putting on a special program for him after the game Saturday. The alumni association is keeping open house in the Recreation center for him.

"The college belongs to the alumni," says Pres. W. M. Jardine. "If there is anything they want, we will turn the institution upside down trying to get it for them this week."

At the mixer Friday night a reception committee of 50 will try to see that no alumnus escapes meeting everyone on the floor. Prof. Albert Dickens has located some cider, and Dean Mary Pierce Van Zile reports there are some doughnuts also available. Mike Ahearn fortunately remembered to arrange for electric lights. Carl Knaus, president of the Manhattan alumni, says there will be music, and denies that the committee forgot to arrange for this.

Letters and messages coming in indicate that there will be several hundred alumni and former students from all over the state for the Iowa-Aggie game and other homecoming events.

Dancing Class Gives Program

The advanced interpretive dancing class under the instruction of Miss Edith Bond, gave a program at the faculty reception Monday night. The girls in the class are Meta Baker, Mildred Baer, Josephine Bussey, Jessie Evans, Alice Rice, Garnett Westbrook, Zoe Westman, Helen Larson, and Ruth Willis.

NEW COLLEGIAN BOARD ELECTED

HAS CONTROL OF PAPER FOR THIS YEAR

Student Members Are Orville Bourassa,
Susan Carmody, R. C. Nichols,
and C. R. Smith

Election of the Collegian board for this year was held Tuesday. Four members were chosen from the five candidates. Those elected were Orville Bourassa, Susan Carmody, R. C. Nichols, and C. R. Smith.

The Collegian board with Prof. N. A. Crawford, head of the department of industrial journalism, who is a permanent member of the board, has control of the Collegian. The board also elects the editor and business manager of the paper.

Recognize Home Study Course

The home study service of K. S. A. C. was approved recently by the Rehabilitation service of the Federal Vocational board, as an agency to conduct courses for the soldiers in vocational training. This is the first department of any college in the United States to be given such recognition in correspondence courses.

WOMAN SPEAKS AT STUDENT ASSEMBLY

Urges Closer Cooperation Between Students and Instructors

"One of the principal reasons for the unrest in the industrial world today is the fact that everyone is wanting someone else's job," declared Mrs. W. E. Cramer, director of the women's vocational bureau at Kansas City, Mo., in an address at chapel Wednesday morning.

Mrs. Cramer, the first woman speaker on the assembly program this year, is a graduate of Bryn Mawr college for women, and spent several years following her graduation in post graduate work in universities of Switzerland and Germany. She was prominent in social work in France during the war.

"The purpose of maintaining a bureau of vocational training for women is to intelligently direct the energies and ambitions of young women into those vocational channels for which they are best fitted," said the speaker.

"Why did you come to K. S. A. C.? Was it because your Dad and Mother sent you, or because you had a vocation in view for which you wished to fit yourself," she asked the students. She urged closer cooperation between students and instructors, with a view to determining the work for which the student is peculiarly fitted.

"In making the decision don't make choice for the sake of dollars, but because you want to do this particular thing more than anything else in the world."

"The tendency among the larger industrial plants to give the employees a voice in the management, and often a financial interest in the business, offers greater opportunities for people in all vocations to personally help solve the industrial problems of the hour. The well being of the community depends upon the well being of the individual."

"The success or failure of yourself in your chosen vocation should be judged by the extent of your service to yourself and to your fellow men, with the dollar mark an incidental factor," concluded Mrs. Cramer.

SOCIETY

SOCIAL CALENDAR

Friday

Pop meeting and homecoming mixer in gym.

Sigma Nu "crumb" dance at Harrison.

Saturday

Beta dance in Elk's hall.

Kappa Sigma dance in Recreation hall.

Hamp-to party in girls' gym.

Web-Euro joint meeting.

Athenian-Browning joint meeting.

Sigma Phi Epsilon house dance.

Iota Psi was at home to the Kappa Sigma fraternity from 6:45 to 8 o'clock, Wednesday evening.

Omega Tau Epsilon fraternity has pledged G. T. Woodward of Franklin, Idaho, junior in veterinary medicine.

Alpha Delta Pi will hold open house for the Pi Kappa Alpha fraternity, Tuesday from 6:30 to 8 o'clock.

C. H. McCandless, G. L. Garloch, and M. H. Banks were initiated into Sigma Tau, the honorary engineering fraternity last Thursday.

Iota Psi have pledged Miss Fern Humphreys of Chicago, Ill., freshman in home economics. Miss Humphreys is a sister-in-law of Professor W. A. Lippincott.

Kappa Phi Alpha fraternity have held formal initiation services for Glenn Rucker of Burdette, Elmer Deshaizer of Olathe, and Fernando Valdes of Santiago, Chile.

Miss Betty Ann Cleland, who took the housekeepers' short course at the college last year, was married the latter part of August to Nelson E. Howard of Hammon, where the young people are making their home.

The MacDowell club has five new faculty members this year, Miss Ethel Robinson, Miss Ethel Hassinger, Miss Mary Baker, Miss Gladys Warren, and Miss Fanny Keller. The president of the club is Miss Florence Meyer.

Members of the Quill club met Monday evening in the office of Prof. N. A. Crawford. A short talk was given by Miss Clementine Paddleford on "Selling Feature Stories." The next meeting will be held November 14 at the home of Miss Paddleford at 1017 Poyntz.

Announcement has been received here of the approaching marriage of Miss Helen Virginia Sloan to Mr. F. Rains Crittenden which will take place November 16. Miss Sloan was a junior in home economics here last year and was well known for her athletic attainments.

The Social club entertained for the men of the faculty, at Recreation hall Monday evening. A reception was held from 8 until 10 o'clock and after the reception the remainder of the evening was spent in dancing. Mrs. J. O. Hamilton is chairman of the social committee of the club this year.

One of the biggest social events of the year took place last Thursday evening when a number of gobs took liberty and attended the second grand naval ball at the Recreation Center in Anderson hall. Ensign Hobart Fairman commanding. The hall was artistically decorated by signal flags and a Union Jack. In order to gain admittance all had to go up the gang-way plank. The dances were under special and general orders. Mr. and Mrs. C. W. Colver and Prof. and Mrs. M. F. Ahearn were chaperones.

SALON SINGERS GIVE CONCERT

PRESENT FIRST ENTERTAINMENT AT CHAPMAN

Three Aggie Students Are Scheduled for Series of Programs Over State

The Salon Singers, a trio from the music department, Miss Olivet Mitsch, Miss Florence Meyer, and John Elliott, gave a concert at Chapman last Saturday evening.

Late last week, the superintendent of schools at Chapman received word from the Redpath Lyceum bureau that the Great Lakes quartette would be unable to fill the engagement there Saturday evening. He thought of an attractive poster he had received a few days before, from the rural service department at the college advertising the Salon Singers, and he at once sent in an S. O. S. call for their services.

This is the first of a series of programs scheduled for these musicians in the state. Most of the engagements are near Manhattan, although there have been as many requests for their work at more distant points as they will be able to fill.

Hartzel Burton of the Sigma Nu chapter spent the week end at Lindsborg.

Miss Frances Baddorf was a dinner guest at the Alpha Delta Pi house, Monday.

Sunday dinner guests at the Sigma Nu house were Prof. H. H. Haymaker, Clifford Aubel and Richard Hardikan.

Miss Gladys Newton and Miss Lulu May Zellar spent the week end at the home of Miss Newton in Kansas City, Mo.

Home comers, the College Canteen will be open for your special benefit Friday and Saturday evenings.

For Sale: A restaurant, a bakery, and another good paying business in Manhattan. Suite 3, Farmers' Union Bldg. Kittell Realty company.

Howard Leadford of St. Joseph, Mo., visited the Sigma Nu fraternity Saturday.

Born to Mr. and Mrs. D. M. Keas of Princeton, a baby girl, Geneva Maxine, October 29, 1920. Mr. Keas attended college here in 1918-19.

For Rent: One 11-room modern house partly furnished, near college, good garage. 6-room house \$25 per month. Both houses ready for immediate possession. Suite 3, Farmers' Union building. Kittell Realty company.

ANNUAL OF '95ERS WILL BE SOLD HOMECOMING DAY

Was First Class to Issue College Annual at K. S. A. C.

Class books of the class of '95 are now ready for distribution. These books will be on sale to friends and visiting alumni Friday and Saturday of this week. They will be sold in Anderson hall for \$1.

The class of '95 are pioneers in

class book making, having published the first class book at K.S.A.C. They are also the first in getting out a supplement to their class book. The present book has been planned in celebration of the twenty-fifth anniversary of their graduation.

For Sale: Suburban tract near college, good house, new interior finish, modern except heat. Non-rental owner. Reduced \$750 for quick sale. Suite 3, Farmers' Union building. Kittell Realty company.

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, TUESDAY, NOVEMBER 16, 1926

NO. 19

DEBATE FRAT CONVENTION COMING HERE

LOCAL CHAPTER OF ZETA KAPPA PSI TO BE HOSTESS

IS FIRST NATIONAL CONFERENCE

Miss Rose Baker, '17, is Grand President—Delegates Coming from Iowa and Oregon

First national convention of Zeta Kappa Psi, women's forensic fraternity, of which the Alpha chapter of K. S. A. C. was organized as a charter chapter in 1914 with eight charter members, will be held at K. S. A. C. next Friday and Saturday.

Aggie Girl is National President

Miss Rose Baker, home economics, 1917, now of Washburn college at Topeka is national president; Miss Christine Cool, senior in home economics is president of the local chapter. Visiting delegates from Iowa Teachers' college at Cedar Falls, Iowa, and Oregon university at Eugene, Ore., are expected to be present at the convention.

Well Known Speakers to Talk

An inspiring program consisting of speakers of national reputation will talk at the convention. One of the important speakers is Mrs. Lee Monroe of Topeka.

The program of the convention will be as follows:

November 19, Friday morning, Eurodelphian hall, registration; welcome, Miss Christine Cool; greetings from Pi Kappa Delta, Doctor MacArthur; greetings from Miss Rose Baker; business meeting.

Afternoon meeting: "The Aims and Purposes of Zeta Kappa Psi," Mrs. Floyd Hawkins; address, Dr. J. G. Emerson; recess; general discussion of "Woman's Work Today and Our Duty as Zeta Kappa Psi Members;" business meeting.

Evening: Address, "The Apotheosis of Portia," Lee Monroe of Topeka; banquet.

November 20, morning, Eurodelphian hall, business meeting; recreation and campus trip.

Afternoon: visit to the college literary societies.

Evening: intersociety debate finals; reception and debate rally given by inter-society council.

Aggie Alumni Number 36

The Zeta Kappa Psi is a young organization but has had a marvelous growth. The following are the alumni of the Alpha chapter: Ethel Arnold, Rose Baker, Stella Blain (Woods), Ruth Blair, Mary Dakin (Arnold), Myrtle Gunselman, Gusie Johnson (Stratton), Margaret King (Sellen), Laura Mueller (Turner), Hazel Merillat (Whedon), Fern Roderick (Osterout), Mae Sweet (Hagan), Madge Thompson (Hawkins), Donna Fae Wilson, Lousia Ziller, Lola Sloop (Keyes), Ella Stinson, Elizabeth Circle, Dora Cate (Crabtree), Eloise Morrison, Jewell Sappenfield, Blanche Sappenfield (Bowman), Mary Polson, Lillian Lathrop (Bennet), Edna Barber (Rechel), Blanche Burt (Yea-ton), Valued Downing, Alma Hal-bower, Anna Steckelberg, Wilma Burtis (Bayer), Ina Bell Wilson (Mueller), Mary Johnson (Hull), Amy Gould (Irwin), Stella Gould (Harter), Lula Davis, and Emma Taylor.

and in particular to see the famous Irish Mike.

The day of his arrival at college the Homecoming game is in progress. He makes his way to the football grounds to find and pay homage to Mike, but on the field he finds a bewhiskered stranger coaching the team. Sadly he takes the picture of Mike from his pocket, and touching the stranger on the arm, begins to tell him his troubles. Suddenly the stranger's hands go to his face, the false whiskers fall off, and the real Mike stands revealed to the astonished and delighted lad.

The extension division desires to use every student of K. S. A. C. in the production if possible. To do this the full cooperation of the student body is asked by the producers. The selection of the cast of characters is to be handled by the public speaking department, and the results will soon be announced.

The first exposures for the picture were taken last Saturday at the Ames-Aggie football game, several views being reeled off of the players in action and of the spectators.

MISS BLANCHARD TO SPEAK HERE

HAS SPENT ENTIRE SUMMER IN EUROPEAN COUNTRIES

Is Head of Student Department of National Board of Y. W.—Will Conduct High School Y Conference Here

Miss Leslie Blanchard, head of student department of national board of Y. W. C. A., will speak at the college auditorium November 18, at 7:30 o'clock. Miss Blanchard will be here for the purpose of conducting the high school Y. W. conference, which will be held at the Community house November 19, 20, and 21. This conference will begin Friday at 7:30 o'clock and close at 10 o'clock Sunday morning.

Miss Blanchard spent the entire summer in Europe attending Y. W. C. A. conferences in Great Britain and Switzerland, and later traveling in Austria, Roumania, and the Balkans for the purpose of investigating the student situation as well as to inspect the Y. W. work being carried on in the European countries. Having twice heard her, Miss Irene Dean says, "Miss Blanchard is a clear and logical thinker, a forceful speaker, and possesses a fine personality."

The following program is worked out for this conference: Friday, evening the informal session, at which the college Y. W. octette will furnish the music, Marcia Seeber and several other college girls will give short talks, followed by Miss Amanda Nelson, head of work in secondary schools, who will be the main speaker of the evening.

Saturday morning beginning at 9 o'clock devotions by Irene Dean; "Europe," Miss Hena Redford, an English woman who has come to this country since the war and served in the girls' work in the western field; "The Orient," Mrs. Katherine Eddy; "Student Council Discussion Hours," Miss Blanchard. Saturday afternoon at 1:30 o'clock Miss Betzner on "Health Hour," "Technical Hour," "Clothes Demonstration," Miss Glanton. At 5 o'clock social hour will be held in Recreation hall. This will be in charge of the cabinet and social committee of the college Y. W. C. A. At 7 o'clock the Estes Park banquet will be held at the Christian church. Sunday the closing session will be held from 9 to 10 o'clock. Miss Nelson will be in charge of this meeting.

for the week of the campaign. He addressed a meeting of the men Sunday afternoon and talked to the women yesterday.

Lee Winter is in charge of the work for the women. Associated with her are 120 girls who will act as canvassers. They plan to put across their campaign in one day.

R. C. Nichols is chairman of the Y. M. C. A. financial committee. About 75 men will aid him in canvassing for finances among the men. This campaign will last until Friday noon. By that time practically everyone will have had a chance to contribute to the finances of the two organizations.

RECITAL PROVES PLEASING TO ALL

MISS KIMMEL AND MISS BAKER GIVE SUNDAY'S PROGRAM

Next Musicals Will be Given by Miss Leffler and Mr. Lovejoy

One of the most delightful and best attended of the series of Sunday afternoon musicals which has been held was that given by Miss Katherine Kimmel, contralto and Miss Mary Baker, pianist. Miss Kimmel is well known among Manhattan audiences, and is popular alike among those who have a so called musical education and those who have not. Miss Baker is a new teacher in the music department but, judging from her reception Sunday, her work is going to be very popular with college and town audiences. Following is the program given:

Gioconda Miss Kimmel Ponichelli
Improvisation Miss Kimmel MacDowell
Novellette Miss Baker MacDowell
Alger, le Soir Fourdrain
Le Miroir Le Miroir Ferrar
L'Heure d'azur Augustus Holmes
The Garden of Soul-Symphony Scott
Waltz in E Moszkowski
Turkey in the Straw
Concert transcription by David W. Guoin Miss Baker

In the Wood of Finvara Buriel
My Little House Pierce
Sonny Boy MacDowell
My Love is a Mulatree Di Nergero
Miss Kimmel

The next faculty recital will be given by Miss Mabel Leffler and Mr. Arnold Lovejoy Sunday afternoon, November 21, at 4 o'clock.

K. S. A. C. PROFESSORS TO ATTEND CONFERENCE

Miss Kneeland, Professor Burr, and Miss Leazenby To Speak at Meeting

The annual meeting of the Kansas conference of social work is being held in Topeka. The meetings started yesterday and will continue until tomorrow evening. Miss Hildegard Kneeland, professor of home economics, presided at the meeting Monday. She discussed "The Family and Community; Releasing the Social Forces of the Rural Community."

Walter Burr, director of the rural service work of the extension division of the college, was on the program of Monday also. His subject was "How We Did It." Today Miss Amy Jane Leazenby, assistant professor in the household economics department, will talk on Child Welfare Work.

The program for this conference is divided into the work on the family, the children, public health and institutional problems. Such institutions as the colleges, the state schools, and the various asylums will be topics for discussion.

OPERA MADAM BUTTERFLY TO BE GIVEN HERE

SAN CARLO COMPANY GIVES PRODUCTION DECEMBER 8

NOBUKO HARA PLAYS TITLE ROLE

Japanese Singer Is Making Debut in America—Supported by Strong Cast

One of the greatest treats of the year will be enjoyed by the student body on the night of December 8 when "Madame Butterfly" will be given here by the San Carlo Grand Opera company remembered by all because of their work in "Lucia" last winter. Madame Nobuko Hara will sing the ever appealing role of Madame Butterfly and will be supported by other famous singers who are with the San Carlo company this winter.

The appearance of the San Carlo people in Manhattan this year is of particular significance, due to the fact that they are just closing a short season at the Manhattan opera house, in New York City, where they were the first organization to restore operatic traditions to the house founded by Oscar Hammerstein. The company includes in addition to its regular members Gladys Axman, Deana D'Este, Alice Gentle, Anna Fitts, Nobuko Hara, Ernest Brenot, Frank Pollack, Marrie Rappold, Myrna Sharlow, Sylvia Tell, and Regina Vicarino.

It was not known generally that it would be possible to secure a second appearance of this famous operatic company in Manhattan but due to the earnest efforts of Prof. A. E. Westbrook the date for early in December has been assured.

Price of Tickets Nominal

Grand opera at popular prices is the aim of the San Carlo company this season, and Manhattan people will be able to take advantage of this, for the prices for the appearance of the production will be nominal. In addition to the nominal price the pleasure of witnessing a most creditable performance will be assured.

The company consists of 100 members and their work together is of a quality acceptable to large and critical audiences. The promise of "Madame Butterfly" for December 8 is taken as a gratifying prospect of good things to come.

Japanese Singer Plays Lead

In Madame Butterfly, Nobuko Hara, a new Japanese prima donna makes her debut in America. A member of the Imperial Theater of Japan and a niece of the prime minister of her native country she is a figure of importance. Nobuko Hara has been studying with American teachers for several years and her singing the leading role as Madame Butterfly is being viewed with great interest throughout all parts of the country where she has sung or will sing this season.

SHAWNEE TEACHERS ORGANIZE TO PROMOTE STUDENT HEALTH

Mrs. Ray Kiene, Former K. S. A. C. Student Is Leader in New Work

Mrs. Ray Kiene, a former student

of the Kansas State Agricultural college and a graduate of the Stout institute for extension workers at Menominee, Wis., has recently accepted the position as home demonstration agent for Shawnee county.

Working under the direction of the college and of the Shawnee county farm bureau, Mrs. Kiene has organized the teachers into an association for the promotion of student health by means of good food, properly cooked.

Meetings are held every Saturday morning at the Topeka high school, where the teachers discuss their plans and are taught how to prepare new dishes. Credit is given for the work to the agricultural college, the work by the agricultural college.

Mrs. Kiene was formerly Miss Julia E. Wolcott of Manhattan, and attended college in 1910-11 and 1912-13.

Y MAKING DRIVE FOR \$2,650 NOW

PROMINENT COLLEGE MEN ENDORSE Y. M. C. A.

Thirty Canvassers Will Carry on Work—Met in Y. M. C. A. Parlors Sunday Afternoon

"I heartily endorse the program of the 'Y' as it has been outlined to me," President Jardine.

"The Y. M. C. A. is a vital factor in raising the standards of good sportsmanship in collegiate athletics,"—Mike.

"I believe that the Y. M. C. A. is meeting the needs of the students in its particular field in good shape,"—Dean Seaton.

"Let us boost the 'Y'—Bill Knostman, president S.S. G. A."

"The Y program is fine. It deserves the support of all of us,"—Rev. Myron Collins.

At a meeting of 30 canvassers Sunday afternoon in the Y. M. C. A. parlors, final plans for the financial campaign for a budget of \$2,650 were made, and a subscription taken among the men who were present totaled \$203, making an average of \$7.25 for each man.

Dr. H. H. King, newly elected chairman of the Y. M. C. A. board who had charge of the meeting emphasized the work which the "Y" had done, and the necessity for meeting the financial needs of the association.

After short talks by Dr. A. A. Holtz, general secretary, and R. C. Nichols, who has charge of the campaign, B. M. Cherrington, former football coach at the University of California, and a graduate of the University of Nebraska, made an inspirational appeal for the continuance of the Y. M. C. A. work. He considers the college man with high ideals as one of the essentials for preserving and advancing the cause of civilization.

Special noonday luncheons will be served in the barracks each noon, for the canvassers of the campaign. Reports of the progress of the different teams will be made at this luncheon.

Among the features of the Y. M. C. A. activities last year were the Des Moines delegation, the all college mixer at the gymnasium at which over 1,000 were present, the Aggie men's mixer and watermelon feed at which 800 were present, and the short course men's mixer. In addition to these features, 33 students were granted educational service men's scholarships ranging from \$40 to \$125, 3,000 handbooks were given to students for their guidance, and 116 men were placed in permanent employment by the Y while 4,000 hours of odd jobs were assigned 287 men. Nineteen organizations use the Y. gymnasium, a boarding club has the use of the dining room and several college organizations meet in the parlors.

Jardine Gives Address

President W. M. Jardine delivered an address at Burlington Friday morning before the second section of the State Bankers' association at their annual convention. He talked on "The Wide Spread in Prices Between that Received by Producer and that Paid by Consumer."

Inspects Crop of Spuds

Prof. L. E. Melchers was called to Kansas City two weeks ago to inspect a field of sweet potatoes, near the National Zinc company factory. A farmer was making a claim for damages of plants caused by factory fumes. An examination of fields showed that the injury of crops was due to plant diseases and not to fume injuries.

CYCLONES HIT WILDCATS FOR SCORE 17-0

SWEEP GRIDIRON FOR TWO TOUCHDOWNS AND FIELD GOAL

AERIAL ATTACK GETS SCORES

Huston Outpunts Iowa Kickers—Cleland Plays Good Game Against Ames' Center

The Ames Cyclones from Iowa swept across Ahearn field for two touchdowns and a field goal Saturday, making a total of 17 points to the Aggies' none.

The invaders scored 10 of their points in the second quarter by a touchdown and a field goal and added another 7 points in the last quarter. The much heralded aerial attack of Ames was responsible for their scores as both their touchdowns were preceded by passes that placed them within striking distance of the Aggie goal line. The home boys played by flashes exhibiting a strenuous attack at the opening of the game, in the first of the second half, and again at the close of the game when they worked the leather down to the Ames 6-yard line but did not cross the enemy goal before the final whistle blew.

First Quarter to Aggies

The first quarter was the Aggies'. On an exchange of punts the Wildcats gained as the ends were down under Huston's long spirals tackling with deadly accuracy. Near the close of the quarter a recovered Ames fumble gave the Aggies their chance to score. The fumble was recovered on the Ames 35-yard line, and after two incomplete tries at passes, Hinds went through the line for nine yards. With one yard to go for a first down a pass was tried and failed and the ball went to Ames. Vanderloo punted out of danger on the first down.

Second Frame Cyclones Own

The second frame was undeniably the Cyclones'. They swept down the field from the Aggies' 55-yard line with a succession of bucks and passes and Currie squirmed 8-yards across for the first tally. Boyd kicked goal. Ames kicked off and Hinds returned 20 yards, but the Aggies were unable to gain, so Huston was forced to kick. Again the Iowans marched down the field aided by a 23 yard pass, but the Aggies rose up on their 15 yard line and hurled the visitors back allowing only 2 yards in three downs. On the fourth down Boyd made a place kick from the 25 yard line. Again Ames kicked off, and again Huston was called on to punt when no gains could be made. At the end of the period the oval was in Ames' possession on our 35 yard line.

Aggies Make Short Rally

At the opening of the second period the Wildcats received the kick. Heinie Hinds again ran back for a substantial gain, 25 yards, to be exact. The Aggies started down the field, Heinie making a 23 yard run, and Goerke a line buck which netted 9 yards. However, the rally was nipped in the bud, Vanderloo of the Hawkeyes eleven intercepting a pass on his own 40 yard line. In three successive plays the Aggies were penalized and the Iowans given a first down, but the Cyclones could not make further gains and were forced to kick. Another punting duel ensued with Huston having the edge on Vanderloo of the Ames team, both on length of punts and returns. The end of the quarter found the Aggies in possession of the leather on their own 28 yard line.

Huston fooled a punt at the beginning of the last stanza and Schooley returned it 5 yards to our 45 yard line. Two forward passes totaling 35 yards followed, then the Ames team rushed the ball over by bucks. On the fourth down the teams lined up on the Aggies' one yard line, the signals were called, the Ames quarter disappeared under a smother of pushing warriors and the referee's whistle blew. When the tangle was cleared away the ball was over the line by inches. Vanderloo kicked goal. Cowell returned Vanderloo's kick 28 yards by a pretty exhibition of broken field running. After a failure to complete a pass Huston dropped back to his place. In the familiar pugt formation, but instead of punting he passed 30 yards to Cowell. However, the Aggies were again forced to kick. A long pass put the ball in the Aggies' territory once more, but on the next play Bryan intercepted another pass.

Hard Fight in Last Quarter

The tables were turned on the Ag-

(Concluded on page six)

MIKE IS HERO OF AGGIE FILM

PLANS FOR COLLEGE SCENARIO NEARING COMPLETION

Want Every K. S. A. C. Student to be in Film if Possible—Ask Cooperation

Plans for the taking of the scenario of college life, written by Miss Mabel Caldwell of the extension department, are rapidly nearing completion, and much necessary work has been done.

Mike Ahearn is one of the main characters in the story, the theme of which is a farmer's dream. The boy, who is interested in K. S. A. C. and all of its achievements, has a picture of Mike, his idol. One afternoon he falls asleep and dreams of the Aggie campus with its activities, students, buildings—and Mike. When he wakes up he resolves to go to K. S. A. C. and really see all the things that he has dreamed about.

JOINT DRIVE FOR FUNDS ON TODAY

Y. W. AND Y. M. TO ASK CONTRIBUTIONS FROM ALL

Women's Campaign Lasts Only One Day—Men's Drive To Be On All Week

The joint drive for funds for the Y. M. C. A. and Y. W. C. A. will start today. The committees who are in charge of the work will start canvassing today. The Y. M. C. A. campaign will close Friday noon, but the Y. W. C. A. campaign will last but one day. It is the plan to ask every student to contribute. The window opposite the postoffice will be open part of the time during the campaign to allow any student missed to contribute to the Christian associations.

Mr. Cherrington, formerly football coach at the University of California and at present regional secretary of the International committee is here

TUESDAY, NOVEMBER 16, 1920.

COLLEGIAN'S POLICY FOR A BETTER K. S. A. C.

1. Make Students' Self Governing association a live success.
2. State appropriation for Freshman girls' dormitories.
3. Aggies at the top of conference athletics by 1922.
4. Clean politics.
5. Greater cooperation between alumni, students, and faculty in bringing athletes to K. S. A. C.
6. Remodeling of the auditorium stage.

MUST HAVE MORE MONEY

The Aggies have not a coach for basket ball at this late date, and have small prospects of getting a coach from one of the larger schools of the country. The unexpected departure of 'Cleve' early in the fall left the athletic department without a basketball coach and efforts on the part of Mike to secure a man for the place from one of the "Big Ten" or Missouri Valley schools have proved unavailing.

The main reason that the Aggies cannot get a man with college experience in coaching basket ball is that the athletic department cannot offer enough money to compete with other schools of the size of K. S. A. C. The appropriation allowed the athletic department is not enough to go all the way round. Of course a surplus will be on hand after the football season, but it will not be enough.

There seems to be small chance to remedy this condition this year, but what about next year? If the students all support athletics of every sort there will be funds to add to the salary offered a substantial amount. The way to guarantee student support for athletics is by the compulsory fee system whereby each student pays a stated amount for attendance at student affairs during the year at the same time and in the same manner as they pay their fees.

The Collegian favors the assessment of such a fee in order to distribute the support of the school's athletic program among the whole student body. When we obtain such a system K. S. A. C. will have advanced another step toward her goal of leadership among middle western colleges.

STEP ASIDE—DON'T SPOIL THE FILM

Help the camera man!

When he wants to snap you, let him snap, and when he doesn't want to, keep carefully out of the range of the camera. As Aggie students we should realize that it is an honor for K. S. A. C. to be the first school to own and operate a movie camera, and we should, individually and collectively do all in our power to cooperate with the producers.

This work that will be going on for some weeks to come is not mere experimentation or foolishness, but the filming of a real movie, and every student should willingly comply with requests to stand back or walk around the other way when he or she is requested. Each time these requests are disregarded just that much unnecessary expenditure of time and money will result.

That every one would like to be in a movie is a well known fact, but there will be plenty of proper times and places for them to pose, without butting into focus when they are not wanted, so stand back fellow students and don't spoil the film.

Things we think; things others think; and things we think of things others think.

Dear Editor:—Are the girls of the college lacking in spirit? Or are they just afraid to display the spirit they have?

The Saturday of the K. U. game when the boys of the college went around freeing the students from classes a number of teachers whose classes were composed exclusively of girls were heard to remark somewhat as follows:

"Oh no my classes didn't leave. Yes, attempts were made to break them up but the girls didn't want to go. They preferred to stay in class."

What was the matter with the girls? Surely such timidity and such clinging vine attributes are out of place in the modern college woman, and if it wasn't timidity what was it? Do the girls of the college be-

lieve that school spirit consists exclusively of devotion to books, rather than to the college at large? In either case we believe someone ought to set the girls right on the matter.—An Engineer.

Dear Editor:—Did you ever risk your life in an effort to gain an education?

A certain division of ambitious students endanger their lives as well as the pocketbooks of insurance companies each day in an effort to reach their destination.

I am speaking of the music students who have to make their daily journey from the campus south of the gymnasium to their "playhouse" across the street. In order to reach the "playhouse" the students have to go down a flight of steps that have been carved by a shovel or a hoe.

These steps are located 30 yards west of the cement steps south of the gymnasium. Ask any music student and he will gladly tell you all about the steps.

Are we going to let that condition exist? It is not only dangerous but it is a sore spot in our beautiful campus. Someone might gently hint to the building and repair department that good steps are made of concrete.—A Reformer.

Dear Editor:—Facts are facts, but the interpretation of the facts in the story "How Much Students Study" seems to me unfair. The statement

that the mystery of why so many students start in other courses and drift into the general science division, if they do, is not explained by the fact that general science students study only 41 hours for one credit hour while home economics, engineering and agricultural students study 46 and 48 hours respectively.

The three divisions which put in so many hours of study have twice as much required laboratory work as the general science division and since in the investigation class hours were included 54 hours would necessarily be spent upon all lab subjects.

Furthermore the fact that more time is spent upon a study by one group than by another, does not prove that it is the most difficult. But according to the concluding statement Aggie students who spend only 45.3 of the required 54 hours for one hour of credit are a "trifle more apt in their studies than those of the average college" it naturally follows that the general science group is the most apt of the various divisions.—General Science Booster.

Dear Editor:—It has recently been noted that the freshmen girls voted down the plan of wearing some form of insignia to designate them as freshmen.

Because of this action the girls are by all manner of means accountable to the boys. They must give a reasonable excuse for their actions if they do not wish to be branded as poor sports. It was thought when the movement for such action was launched that at last the feminine freshmen were to demonstrate in one more way the fact that they were the equals of their masculine friends, and the fact that they could be as good sports as the wearers of the purple caps. The freshman boys feel that they are justified in being disappointed in their class sisters.—H. H.

Dean and Mrs. F. D. Farrell and daughter Francis, Dean and Mrs. R. R. Dykstra, and Dr. and Mrs. C. W. McCampbell were Sunday dinner guests at the Delta Tau Delta house.

C. M. Freeland of Logan, New Mexico was a week end guest at the Delta Tau Delta house.

Miss Dorothy Knittle was a dinner guest Friday evening at the Alpha Delta Pi house.

Prof. J. W. Searson has been invited to speak before the New Mexico state teachers' association at Albuquerque, N. M., Thanksgiving week.

Prof. J. W. Searson will speak at the city library tomorrow afternoon at 3 o'clock on a program for children's book week. On Thursday afternoon at 5 o'clock Professor Searson will speak to the music students on the "Relation of Music and Literature."

Miss Annabel Garvey, instructor in the English department, spoke to the Women's club of Manhattan, last Thursday on the experiences of her trip while in Constantinople.

L. H. Fairchild was among the alumni who returned to K. S. A. C. for the Homecoming week. Mr. Fairchild was connected with the dairy department while in school here. He is now in charge of the dairy cattle work at the University of Purdue.

Hold Pledging Services

Theta Chi Gamma held formal pledge service, Wednesday evening at 5 o'clock for the following girls: Miss Ruth Peck, Miss Maude Lahr, Miss Geta Lund, Miss Rowena Thornburg, Miss Anna Neal, Miss Orpha Maust, Miss Elizabeth Dickens, and Miss Lulu May Zellar.

ANNOUNCEMENTS

Miss Leslie Blanchard, Y. W. C. A. speaker, will give a lecture on "The Student Situation in Europe," at the auditorium Thursday evening at 8 o'clock.

General science faculty will meet this evening at 4 o'clock to discuss "Institutional Loyalty and How to Secure It."

Prof. J. W. Searson will give a lecture to all students of the music department on Thursday of this week.

Girls' Loyalty league will give a matinee dance this evening from 4 to 6 o'clock. Admission is 15 cents.

Chapel is held this week on Thursday morning at 10:15 o'clock.

FASHION PARADE
MODELS CHOSEN

COSTUMES FOR CLOTHING CONGRESS NOW READY

Many Prominent Out of Town Persons to Attend—Clara Smith to Talk to High School Girls

Preparations are now well in order for the clothes congress to be held at the community house down town on Saturday, November 20, instead of November 19 as was previously announced. The congress which is for the benefit of the high school girls from the northern part of the state, will last from 3:30 until 4:30 Saturday afternoon. About 350 girls are expected. Most of the costumes are now ready and the following girls have been selected as models: Misses Ruth Norman, Margaret White, Maude Irene Whitehead, Mrs. Winter, Mary Fitzgerald, Martha Holl, Garnet Grover, Elizabeth Hinchee, Ella Wilson, Elsie Lear, Anne Ratliffe, Carol Knostman, Margaret Dubbs, Hortense Caton, Mildred Swensen, Nita Richardson, Irene Bradley, Margaret Ansdell, Marion Traynor, and Edith Wheatley. Chairmen of the different committees are Miss Mary Polson, artistic committee; Miss Bly Ewalt, ushering committee; Miss Margaret Ansdell, arrangement committee.

Some of the prominent out of town people who will attend are Miss Mabel Abbott of the Newspaper Enterprise association, who will cover the press association; Miss Helen Fay Fair, Miss Rena Redford, and Miss Mildred Inskip of Denver, who are prominent Y. W. C. A. officials in the west central field staff of that organization; Miss Blanchard, Miss Anna Nelson, Mrs. Edith Eddie, and Miss Betzner of New York City, who are members of the national board of the Y. W. C. A.

Miss Clara Mary Smith will deliver an address as a connecting link between the college and the high school girls. Pictures of the girls will be taken for the press.

R. E. Sears, a student here last year and a brother of the varsity full back, was here for the homecoming game Saturday.

TRIP FOR COEDS BEING PLANNED

GIRLS WILL GO TO KANSAS CITY
NOVEMBER 22

Free Lunch at Baking Company and
Mary Garden Concert Are Some
Bright Spots of Trip

Plans are now being made for the regular trip to Kansas City given once each semester for all upperclass Aggie coeds regularly enrolled in the college who are especially interested in the manufacture of food.

The girls will start early Monday morning on November 22, and will disband Wednesday noon, November 24. Among the firms which will be visited are the National Biscuit company, the Sunshine Biscuit company, the Ridenour-Baker company, the Wholesale Grocery company, the H. D. Lee Mercantile company, the Armour Packing company, and the Southwestern Milling company, which is one of the largest milling concerns in the southwest. The H. D. Lee and the Ridenour-Baker companies will entertain the girls at lunch.

There are several advantages to be gained by making the trip at the appointed time. The railroad fare will not be increased until after the excursion, the girls have planned to attend the concert given by Mary Garden and company on Tuesday afternoon and another good theatrical attraction. Those who live in or near Kansas City or who have friends there may stay over for the Thanksgiving vacation.

Accommodations can be made for 25 or 30 girls. Unless the number who sign up for the trip is usually large, the students will not be limited to members of the home economics department.

The next trip will be made the first week in March. Any inquiries concerning these trips may be referred to Dr. L. J. Bogert.

ARCHITECTURAL STUDENTS ARE COMPETING FOR PRIZE

Offer \$25 for Best Cover Page Design For Architects' Year Book

The students in the department of architecture are competing for a \$25 prize which is offered to the one submitting the best design for a cover for the architectural year book. The prize is offered by the Architectural club, which is composed of the students in the course above the freshman year. All architectural students are allowed to compete. The book will be called "The Kan-

sas Architectural Record," and will contain cuts from students' work in design, ink rendering, charcoal, pencil drawing, and probably water color. The club plans to make the book complete in every detail and under the supervision of Prof. Cecil F. Baker it is working out well.

Ralph Van Zile, '16, has returned to Kansas City after a week's visit in Manhattan. Van Zile has a position with the Columbia Mills in Kansas City, Mo.

Miss Fayne Bondurant who is teaching at Dighton this year spent the week end at the Chi Omega house.

Leland Woodward and Dale Schwartz spent the week end in Kansas City.

Louis Combs attended the Aggie-Missouri football game.

Mr. and Mrs. Arthur Newkirk of Geneseo, spent Saturday and Sunday with Miss Lella Belle Newkirk, a sophomore in college. Mr. Newkirk was graduated from K. S. A. C. in 1917.

Mr. and Mrs. Ray Newkirk, former students of K. S. A. C., spent the week end with relatives in Manhattan.

Dean Mary Pierce Van Zile entertained last Tuesday evening at her home, 800 Houston street with a buffet supper for the Big Sister chairman and their advisors.

C. R. Ball, in charge of cereal investigation of the U. S. D. A., visited here last week. Mr. Ball conferred with the instructors of the agronomy and botany departments regarding the investigations which are being carried on here and at the Hays station in cooperation with the Federal department of agriculture.

Charles Lawrence accompanied the football team to Columbia Missouri, and was a guest of the Delta Tau Delta fraternity while there.

HOBE'S WARRIORS SNATCH VICTORY

WIN FROM ST. MARY'S ACADEMY
—SCORE 7-6

Opponents Out Weigh Ags Seven or Eight Pounds Per Man—Stolley Runs 80 Yards for Score

"Hobe" Fairman's School of Ag football warriors staged one of those old fashioned come-backs Thursday when they won from St. Mary's academy by a score of 7 to 6.

After losing two games in a row to Wamego and Abilene, things were looking rather blue in the Ag camp, but the boys vindicated themselves Thursday when, playing against a team that out weighed them seven or eight pounds per man, they showed their superior knowledge of football by staying in their opponents end of the gridiron during three quarters of the game.

In the first quarter the St. Mary's aggregation got away with a pass for a touchdown but failed to kick goal. In the second quarter Stolley of the Ag team, succeeded in getting through a hole in the line and ran 80 yards for a touchdown. He also kicked goal, making the count 6 to 7 in the Ags' favor where it remained the rest of the game. At the close of the first half "Hobe's" men were within two feet of a touchdown.

The St. Marys team was sadly in need of a kicker as was shown every time they kicked off and also by the many times they used passes on their fourth downs, instead of taking a chance on a kick. During the last six minutes of play the academy ran in some of the sub-varsity college

men, but their addition did not affect the score.

The Ags next game will be with St. Benedict college at Atchison, November 20. The home team considers this the hardest game of the season.

The lineup: Olson, c.; Glover, r. s.; Debard, r. t.; Scholtz, r. e.; B. Conroy, l. g.; Butler, l. t.; Brooks, l. e.; Manley, q. b.; Premie, r. h.; Stolley, l. h.; I. Conroy, f. b.

BEYOND THE HILL

When a law student of the University of Missouri walked over the Quadrangle, a section of the campus over which the engineers claim to have jurisdiction, the engineers demanded that the law student run the gauntlet of engineers for committing the misdemeanor. The "law" refused to run. The engineers paddled the unwilling "law," extremely against his will. The "law" promptly swore out a warrant for the arrest of seven engineers on the charge of assault and battery. The engineers pleaded "not guilty." The result of this decision will determine to what extent the engineers of the university will rule the campus.

During the recent meeting of the Kansas State Teachers' association at Topeka the journalism students of Washburn college were given the privilege of an interview column in which they could find space for short snappy stories and a free scoop on all round table discussion of the association. The reporters met at one o'clock at the Capitol building where each was given an assignment of a meeting to cover, and a list of questions to fire at the teachers.

The University of Indiana plans to conduct a special industrial girls' night school for the benefit of the working girls of Bloomington. English, commercial courses and gymnasium work will be taught.

All student wives of Iowa State college have organized into a social group known as the Student Wives' Friendship Circle.

Sophomores at the Michigan Agricultural college have an annual barbecue for all members of the class and such members of the faculty as they deem fit to invite.

The Y. M. C. A. and the Y. W. C. A. at the University of Denver have an annual custom of distributing Thanksgiving baskets each year to the needy of the city. Each sorority is solicited for food, each fraternity for money, and the non-fraternity people are asked to give either food or money.

When it comes to support of its team the Ohio State university has a record which is hard to beat. In addition to trucks and motor cars which carried hundreds of students to the game between Chicago and Ohio, at Chicago, a distance of 343 miles, there was a special train for the rooters. Approximately 5,000 rooters from Ohio were at the game.

The university employment bureau of the University of Utah in cooperation with the United States employment bureau held a "help the other fellow" campaign to find part time work for the students in the university who are compelled to make all or a part of their expenses through school. Especial attention is paid to the selling opportunities offered to college students.

VISITS WORK OF CHAPMAN AGGIES

H. H. LAUDE INSPECTS SCHOOL FARM

A. E. Angle and H. S. Howard Are in Charge of Cooperative Experimental Work There

H. M. Laude, of the department of cooperative experiments, was in Chapman last week on Monday inspecting the cooperative experimental work being done there on the Dickinson county high school farm.

A. E. Angle, '11 and S. H. Howard, both instructors in agriculture in the high school, are in charge of the work on the little 6-acre farm. On the plot a permanent 4 year rotation of sorghum, corn, wheat, and oats is being conducted. With each of these crops a fertilizer test is being run while seed bed preparation tests are carried on in connection with the wheat and oats.

D. E. Stevens of the U. S. D. A., who is located at one of the large stations in eastern Oregon, visited acquaintances at Manhattan Tuesday. Mr. Stevens was formerly an associate professor in the department of agriculture at Washington, D.C., at the time when Pres. W. M. Jardine, and Prof. S. C. Salmon, Prof. J. H. Parker, and Dean F. D. Farrell were employed in that work.

J. C. McCollouck will go to Chicago, for the meeting of the Western Canners' association, which is to be held November 18. Mr. McCollouck will speak on "Corn Ear Worm."

Little Bits of Human Nature

When two friends came
Into the office yesterday
One wearing a brand new Stetson
And the other a new pair of
Brogues, we
Remarked that they looked
"Very becoming,"
They both replied in a
Very casual manner:
"Oh! I've had these a long
Time!"

DEBATE WINNER TO RECEIVE CUP

WILL BE PROPERTY OF SOCIETY
ONE YEAR

Inter-Society Council Will Present
Cup—Hold Final Debates
November 20

Intersociety council has decided to give the society winning the intersociety debate a silver loving cup. The loving cup will have the name of the society on it and will be the property of that society until next year's contest, and at that time the winning society will have its name put on the cup and it will become the society's property for a year. In case any one society wins the loving cup for three years in succession it becomes the society's permanent property.

The intersociety debate finals will be held in Recreation hall Saturday, November 20. This is to be the last program of the Zeta Kappa Psi and a debate rally and reception will follow. It is hoped that all society members and anyone else interested in debate will attend.

CADET OFFICERS LEARN TO HANDLE AUTOMATIC PISTOLS

Captain E. J. Maas, Company F, Is
High Man with Score of 47

Officers of the cadet corps are being instructed in the handling and firing of automatic pistols. The work is to consist of sighting and aiming exercises and range practice from time to time. Captain Van Fleet is the instructor of the class.

Last week when a cadet officer from each company was allowed to go on the firing range, Captain E. J. Maas of company F was high man with a score of 47 out of a possible 50. Major C. C. McPherson of the First Battalion and Lieutenant B. E. Colburn of company C were second with a score of 45.

BLUE RIBBON MEANS SUNDAY SCHOOL CLASS—NOT BEER

Professor Price's Methodist Class,
Largest in City, Wears Distinguishing Mark

What does the blue ribbon stand for?

This was what everyone was asking the first of last week. The inquisitive ones were told that the ribbon was a sign of recognition for the girls of Professor R. R. Price's Sunday School class of the Methodist church.

This class is the largest in town, having 290 members enrolled, practically all of them college students. They are studying the "Life, Mission, and Message of Paul."

The ribbons have disappeared now but from November 14 to November 21 they will appear again. This is to be "Win My Chum" week on the hill.

Several members of the engineering faculty attended a meeting of the Kansas and Nebraska section of the Society for the Promotion of Engineering Education which was held at Lawrence Saturday evening. Professor George R. Chatburn of the University of Nebraska, is chairman of the society in this section, and Dean R. A. Seaton of K. S. A. C. is secretary.

Don't throw away your dull safety razor blades. Have them sharpened for less than half the cost of new blades. Leave blades at Cooper's Barber shop, in the Main hall. On the campus. 10-6

Listen Folks, Have You Still Got Feet Instead of Hoofs?

Folks, listen!
"Future generations will have hoofs instead of feet."

Prof. Herbert Martin of the philosophy department of Drake university predicted this October 29.

"Small shoes are responsible," he said. "The little toe is becoming smaller with each succeeding generation." He predicted it would disappear entirely and then the other toes in succession, the last battle for survival to be made by the big toe.

"The weight of the body is forcing feet into their present casings," he said. "The result is the feet are losing their shape. Toes are compressed. Corns and callouses follow. Hoofs are the logical result."

So we may be shaking a "wicked hoof" literally speaking, in the near future. The only remedy or preventative that seems possible is for folks to adopt the moccasin.

Not in Kansas

Another carton of Fatima cigarettes will be raffled at Student Life office tomorrow at 12:30 o'clock. To get a chance on the winnings a student need only write his name across the face of the Fatima advertisement in today's paper and turn it in at Student Life office. A carton was similarly raffled two weeks ago and was won by Dick Kremer—Student Life, Washington University.

Elect Hockey Captains

Girls who made their class varsity team in hockey met last week before the games and nominated captains for the different teams. Alice Marston was chosen as freshman captain, Ruth Kittell as sophomore, and Clara Evans as captain of the junior-senior team.

Arrest 100 Students

One hundred students of the State Manual Training normal were arrested and placed in jail on a charge of disturbing the peace in conjunction with a "pep" celebration for the Ottawa-Pittsburg game at Pittsburg.

The gang was arrested after it had overpowered a street car crew and taken possession of the car. After a short lecture on the rights of public and private property, the police judge dismissed the students.

Mrs. J. G. Tew arrived Friday from Woonsocket, R. I. Mr. Tew is a new instructor in drawing in the department of applied mechanics and machine design. He was married just before starting for Kansas to take up his new duties in college.

Miss Ruth Robinson of Towanda, is a guest at the Chi Omega house.

Arthur Adams, '12, spent Homecoming day with friends of the Beta Theta Phi fraternity.

Miss Nora Dalbey, instructor in botany, was called to her home in Sterling, last week by the death of her mother.

Miss Jean Hanna spent the week end at her home in Clay Center.

Miss Mary Whittier went to Topeka Thursday to visit until Sunday with her parents.

Miss Edna Romick spent the week end at her home in Valencia.

Miss Beas Hoffman of Enterprise to spent the week end with friends at the Kappa Kappa Gamma house.

L. E. Conrad, professor of civil engineering, attended a conference on employment under the auspices of the American Association of Engineers at Chicago, Thursday. Professor Conrad is chairman of the engineering divisional committee which handles the placing of graduates in engineering and alumni in engineering work.

For Rent—two half rooms for rent at Y. M. C. A. \$6.25 and \$6.75 respectively.

Requests For Social Functions to Be
Sent to A-46—Knox to Select
Furniture

The executive council of the S. S. G. A. are carrying out plans for fixing up an office in room 46 in Alderson hall where the council may hold its meetings. Ray Knox is in charge of the committee which will select the furniture.

Requests for social functions can then be left in the new office to be approved by J. A. McKitterick, chairman of the social committee, and Miss Bly Ewalt, chairman of the calendar committee. At present all requests for social functions must be left at Dean Mary Pierce Van Zile's office to be approved by the council.

Miss Mabel Russell, Miss Doris Stoughton, and Miss Gladys McClintock have returned to Lyons after a visit with Miss Lanora Russell, a freshman in college.

Melchers Examines Potatoes
Prof. L. E. Melchers was called to Topeka recently to examine a car load of Irish potatoes bought for seed. A new disease was reported to be present. This car was the first part of a 35,000 bushel order, involving about \$70,000. The growers were anxious to find out if the disease would prove serious during the winter, while the potatoes were in storage. An examination showed that the disease was not due to an organism but a combination of climatic and soil conditions. After the final report the remainder of the order was shipped.

Robert Folck, who was graduated from the electrical engineering department last spring now holds a good position with the Empire Gas and Oil company at Bartlesville, Okla.

F. D. Farrell, dean of the division of agriculture, was in Colby last week, where he investigated the work of the experiment station at that place.

Ellithe Kaull returned to school Monday after an absence of a week on account of illness.

ABOUT 200 OLD GRADS ARE BACK

SHOULD HAVE HOMECOMING K. U. GAME STRATTON SAYS

Programs With Exception of Football Score Were Big Success—Stadium Sentiment Grows Among Alumni

Attendance of alumni for Homecoming day this fall was excellent as to quality, but the quantity was a disappointment to those who planned the day. There were about 200 alumni from outside Riley county who saw the game Saturday, according to Cliff Stratton, '11, secretary of the alumni association.

"On the years that K. U. plays here, the athletic board might just as well plan to hold Homecoming day for the K. U. game," Stratton declared this morning. "I find that is the general sentiment of the alumni who were here for the Homecoming week end this year."

The alumni visitors had only commendation for the way the students have taken hold of things this fall. Those who arrived in time for the pep meeting Friday night were all most enthusiastic in their praise.

"They have been telling me the old pep was dying out," said Ernest Wright, '06, of Great Bend. "This looks as if it were growing."

The programs arranged for the alumni, except the score of the football game, went through without any serious hitches. The mixer at the gymnasium following the pep meeting was well attended and apparently well enjoyed. The fraternity and sorority parties were enjoyed as usual.

The Web-Euro annual homecoming program took so well that the S. R. O. sign was hung out long before the evening performance was started. Gray hairs, bald heads, thinning locks, and exuberant hirsute growths verified the program announcement that every decade since 1880 was represented on the program. The Hamp-to program was equally successful.

The stadium sentiment is growing among the alumni. "The college needs a new stadium," says D. E. Lewis, '10. "I have \$50 ready for it the minute the drive goes over the top."

Cliff Stratton, general secretary of the alumni association, says that nearly a hundred of the alumni expressed a similar sentiment during homecoming.

"Give the team a decent place in which to play," added Lewis. "No up-to-date business concern expects its force to do efficient work in ramshackle surroundings."

"We haven't any kick coming on the football situation," said E. N. Rodell, '03, who gave up the K. U. game for Homecoming.

"We know it takes more than one season to develop a winning football team," added G. C. Wheeler, '95.

"Things are moving in the right direction, and the speed will come in a short time, I am convinced," was the way Harry L. Kent, '13, put it.

"The K. U. game probably will be homecoming game two years hence," Stratton predicted. "Bet any one we turn out more than 1,000 alumni for that."

Miss Irene Miller, who was a student at K. S. A. C. last year, visited in Manhattan last week end. Miss Miller is now teaching home economics in Fairmount college at Wichita.

W. E. Blackburn, editor of the Herington Sun, visited at the college this week end. He was formerly a member of the board of regents of this school.

The Rev. E. J. Kulp of Topeka, speaker of the Armistice day exercises, was a guest of President and Mrs. W. M. Jardine during his stay here.

J. H. Frandsen, head of the dairy department at the University of Nebraska, visited the dairy department of K. S. A. C. several days last week.

National Sigma Delta Chi convention is to be held at Norman, Okla., Friday and Saturday of next week. Prof. N. A. Crawford and Milton Eisenhower will go as delegates from this chapter.

South African Colony of Three Came Ten Thousand Miles to Attend College

From left to right—J. F. T. Mostert of Balfour, Transvaal, South Africa; A. R. Saunders of Bloemfontein, Orange Free State, South Africa; and M. G. Stahl of Capetown, South Africa.

"Ten thousand miles is a long way to go to college, but we don't get lonesome, not very often at least."

The speaker was J. F. T. Mostert, one of a trio of South African boys who are attending the Kansas State Agricultural college this year. The trio is made up of J. F. T. Mostert of Balfour, Transvaal; A. R. Saunders of Bloemfontein, Orange Free State; M. G. Stahl of Capetown. Stahl and Saunders have been sent here to school by the Union government of South Africa, but Mostert came because K. S. A. C. was his choice among all the colleges of the world.

Mostert is the son of A. M. Mostert, one of the wealthiest land owners and wholesale dealers on the eastern coast of Africa. Mr. Mostert believes in the policy of sending his children to the school of their choice. When his son had finished the high school in Transvaal he gave him the privilege of attending any college in the world.

Mostert sent for catalogues from all the nations, and for days he studied their contents trying to decide which school best suited his agricultural tastes. The catalogues from the North American continent looked good to the South African boy and knowing that America was a great agricultural land, he made his decision in favor of this country.

Whether he would attend college in Canada, the U. S. or Mexico never entered Mostert's mind until he reached New York City in the spring of 1919. Even then he did not give the matter any serious thought as he intended to tour the continent

before deciding. But seven yellow ears of Kansas corn in a Bronx museum in New York City hastened his decision in favor of the Kansas State Agricultural college.

The practicability of the courses in agriculture given in the Kansas State Agricultural college caused Mathew George Stahl to come from Capetown, South Africa, to attend school in Manhattan. He has a degree of bachelor of science in agriculture from the University of South Africa where he attended school after studying in the agricultural college of Pretoria, Transvaal.

The government of South Africa having recognized the importance of agriculture as its foremost industry is sending many students to different parts of America to specialize in various fields. Mr. Stahl was at first sent to Cornell but later decided to attend the Kansas college.

"I came to America to study agronomy and I came to Kansas State college because your theory is not only as good as any school in America but especially because you give so much recognition to the practical side of agronomy," Mr. Stahl said.

Saunders graduated from the Orange Free State high school, in 1918. He entered the Grey University college and was granted a scholarship by the Union government which provided for four years of graduate work in this country.

The South African colony of three take part in all the college activities of the season. They are enthusiastic over the American sports and amusements, and having plenty of spending money they have no trouble in keeping up with the other college men.

RED CROSS LIFE SAVING CLASS TO BE ORGANIZED

To Enter, Coed Must Be Expert Swimmer and Have Great Endurance

Miss Louise Tausche, instructor in swimming, is planning to organize a Red Cross life saving class as soon as a sufficient number of coeds become expert enough in swimming to pass the required test.

The girls who enter the class must be not only expert swimmers but must have great endurance. Entrance examinations will probably be given near the close of each semester, but those who wish to try for the class may begin work immediately. It is necessary that any coed who desires to become a Red Cross swimmer shall first pass the blue cap test.

Although no blue caps have been awarded so far this semester, the following have received red caps: Justine Mosse, Alberta Edelblute, Irene Bradley, Lucille Smith, Dorothy Churchward, Margaret Hamilton and Betty McColin.

Miss Jamie Cameron of Abilene, spent the week end at the Alpha Delta Pi house.

SEASHORE GROUP TESTS TO DETERMINE MUSICAL ABILITY

Future Success as Musician Decided by Accuracy in Tone Discrimination

"Seashore group tests of musical ability" were given last week by Dr. J. C. Peterson of the department of psychology to the 130 members of his general psychology classes. The first recitation they took the pitch discrimination test in which students are required to discriminate tones with differences as small as one-half vibration.

A Columbia phonograph is used and as the record plays the tones the student is asked to put on the test sheet which tone is the higher. Students' abilities in pitch discrimination will be arranged on score sheets so that each may know how he ranks in comparison with his fellow students.

Pitch discrimination is a very necessary criteria of one's possibility to succeed as a musician.

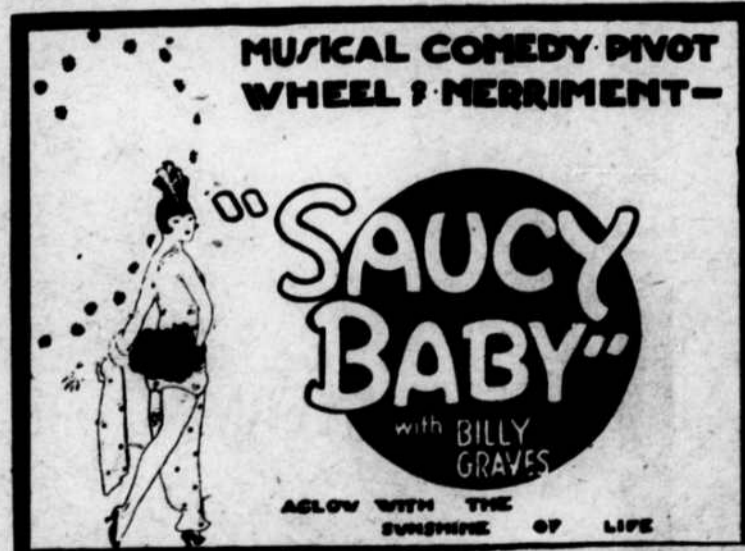

Miss Velma Meserve spent Thursday at the Alpha Delta Pi house. She is teaching home economics in the high school at Stockdale.

GIRLS WORK TO SOLVE PROBLEM

WILL DECIDE IF HOMEMADE GARMENTS ARE CHEAPEST

Work Is Carried on by Advanced Clothing Classes—First Experiment of This Kind To Be Tried

Which is cheaper, to buy your clothes ready made, or to make them at home? The majority of women would probably say that homemade garments are much less expensive than ready made, but as yet there is no data to prove their point.

The girls in the advanced clothing classes at the college are doing some experimental work this semester, the purpose of which is to find out by means of actual figures whether the prevailing idea as to the relative low cost of homemade clothing is correct.

From the stores in Manhattan the girls select articles of clothing which are as near like the garments they wish to make as possible, and choose material which matches the ready made in quality and price. The garment is examined carefully, and among the things which must be noted are the cost, the description for style; the material, its quality, width, amount required and cost per yard; the trimmings and findings; and the method of construction, whether the garment is hand or machine made. When the new garment is finished, the student must state any variation she has made from the original.

One important element which must be considered in this experiment is that of time; the girls value their time at 35 cents an hour, and they have already learned some interesting facts about the cost of simple garments. It took one girl, who made a fancy apron nine hours to make the garment, the original cost of which was \$1.77. An apron similar in style and quality could have been purchased for \$4.00.

Another girl made a pleated wool skirt, which cost her \$12.45. This sum included the total cost of the material and her time at 35 cents an hour. A similar skirt, made of an inferior grade of material, was sold at one of the stores here for \$14.98, and had been reduced to half price.

There are many things which enter into such a comparison, for instance, the occupation of the woman; if she is a housewife who has plenty of time for the work and likes to sew, it may be a material saving for her to do her own sewing; if she is a business woman, earning a good salary, her time may be worth much more in the work she is trained to do, and she probably needs her time outside of office hours for rest and recreation.

There are no statistics on this subject, and the printed results of the experiment made at the college will be of interest to a great many people who are interested in the economic side of the clothing problem.

SOCIETY

Alpha Delta Pi held open house for the Beta Theta Pi fraternity, Thursday evening from 6:30 to 8 o'clock.

Lester Means, sophomore engineer, and Earl Means, junior agriculturist, both of Everest have pledged to the Acacia fraternity.

Sigma Alpha Epsilon fraternity entertained with a dance at the chapter house Wednesday evening. Twenty couples were present. Mrs. Emma Pasmore chaperoned.

Homecoming mixer was held in the gymnasium after the pep meeting Friday night. The music was furnished by a four piece orchestra. Cider and doughnuts were served during the evening.

Miss Annie Isabel Knight and Thomas E. Clark, '10, were married Wednesday, November 10, at the Episcopal church in Medicine Lodge. Father Kain of Hutchinson officiated. Mr. Clark was graduated from the agriculture course in 1910. Mr. and Mrs. Clark will be at home at Conway Springs.

Miss Lillian Kienast and Mr. William Stanley Smith were married Wednesday morning by the Rev. J. M. McClelland at the Methodist parsonage. After the ceremony the guests were served a wedding breakfast at the Gillett. Mrs. Smith has been connected with the rural extension department at the college. Mr. and Mrs. Smith left Wednesday afternoon for Florida where they will spend the greater part of the winter with Mr. Smith's parents.

Announcement has been made of the approaching marriage of Miss Nina Ellen Scott of Pratt and Mr. Nile H. Nicholas of Wichita. Miss Scott is the daughter of Mr. and Mrs. Charles F. Scott of Pratt, and a former student of Fairmont college. At Fairmont she was one of the popular girls and a member of the Alpha Tau Sigma sorority. Mr. Nicholas is a former student of K. S. A. C. and a graduate of the Southwestern college at Winfield. The marriage will take place in a few days in Wichita, where Mr. and Mrs. Nicholas will make their home.

Miss Esther Smith and Mr. Henry E. Barfnet were married Thursday morning by Dr. J. M. McClelland at the Methodist parsonage. Miss Grace M. Smith, a sister of the bride, acted as bride's maid, and Mr. Elton Gard, a junior in college, acted as best man. Mrs. Barfnet has lived in Manhattan for five years and was a student in the home economics course at the college. Mr. Barfnet enlisted in the army from Milwaukee, Wis., and spent several months at Camp Funston. He spent a year in France and was a sergeant major at the time of his discharge. He is now assistant manager of the Milwaukee Brush Manufacturing company. Mr. and Mrs. Barfnet left Thursday afternoon and will make several visits en route to their new home in Milwaukee.

Kappa Sigma fraternity entertained with their annual Homecoming dance Saturday evening, November 13 in Recreational hall. The platform at the end of the hall was decorated to represent a garden. Lattice twined with vines, separated this part of the room from the dance floor. The lights in the hall were hung with streamers in the fraternity colors, green and white, and scarlet. At the end of the room over the fireplace the Kappa Sigma pin was hung. Refreshments of cider and doughnuts were served throughout the evening. The Kappa Sigma orchestra from Washburn furnished the music. The chaperones were Mrs. Jennie Bassler, the Kappa Sigma house mother, and Mr. and Mrs. R. P. Evans. Out of town guests were Mr. W. C. Hall, Jr., of Coffeyville, Mr. R. A. Lindsley of Kansas City, Mo., and Mr. George Davis of Clay Center.

Mrs. Lee Monroe of Topeka, will speak before the national convention of Zeta Kappa Psi to be held here November 19 and 20. Miss Rose T. Baker, a graduate of this college is national president.

Miss Marian Spicer, instructor in the chemistry department, spent the week end in Lawrence where she attended the K. U.-Nebraska football game.

Louis M. Knight returned Thursday from Medicine Lodge where he attended the wedding of his aunt Miss Isabel Knight to Thomas E. Clark.

KING ELECTED Y BOARD CHAIRMAN

HAVE FOUR FACULTY BOARD MEMBERS

S. D. Capper, C. C. McPherson, Earnest Hartman, E. J. Jelden, and Raymond White Represent Student Body

Dr. H. H. King, head of the department of chemistry, and voted last year by the students to be the most popular professor on the hill, has been chosen chairman of the Y. M. C. A. board for this year.

Other members of the board are Prof. L. A. Fitz, Hugh Durham, Dean R. A. Seaton, Prof. C. O. Swanson of the faculty; Rev. Jacobson, of the Ministerial union, Mr. Hayden of the chamber of commerce, S. D. Capper, C. C. McPherson, Earnest Hartman, E. J. Jelden, and Raymond White of the student body.

The Y. M. C. A. has been doing excellent work for the college, and under the leadership of Professor King the work will be continued. Mr. Durham, the retiring chairman of the board, has been an efficient leader in getting the college Y. M. C. A. back to a peace time basis.

The employment bureau of the Y. is one of the important departments of the organization. The handbooks of student information, which was published in cooperation with the Y. W. last fall was another important work in which the Y. cooperated. A small folder is being printed now to explain the work of the organization, and a copy of the pamphlet will be placed in the hands of every man in college.

DR. BALL TALKS TO AG STUDENTS

SPOKE ON OPPORTUNITIES OF AGRONOMISTS

Value of Training in Agriculture Is Being Recognized More and More Says Ball

At a meeting of the Tri-K in Waters hall last Tuesday evening, Dr. C. R. Ball of the United States department of agriculture, talked on the opportunities for students in agronomy at K. S. A. C.

Dr. Ball emphasized the fact that Kansas is favored by a central location and by favorable climatic and soil conditions, all of which tend to give its farm boys a broad experience before they go to college. He also complimented Kansas students on their heritage of independent thought and action on all questions.

VENUS PENCILS

FOR the student or prof., the superb VENUS out-rivals all for perfect pencil work. 17 black degrees and 3 copying.

American Lead Pencil Co.
250 Fifth Ave.,
New York

The largest selling quality pencil in the world

215 Fifth Ave., New York, Dept. D32

"The Mississippi Valley," Dr. Ball said, "is now and probably always will be the center of food production for America. The value of the trained man in agriculture is being recognized more and more as time goes on. Agronomy students going out from colleges will continue to command increasing respect and may expect to be better paid than ever before."

"The reason for this," he explained, "is that the total population of our country is increasing but the population on the farms of the country is decreasing, and therefore the problem of food production is becoming more important every year. If this tendency continues it will not be long before America will be an important nation."

President W. M. Jardine also talked at the meeting.

CYCLONES HIT WILDCATS FOR SCORE 17-0

(Concluded from page one)

gled on the next down when Hibbs intercepted a pass, and again Bryan staged a table-turning stunt by intercepting an Ames' pass. The last of the quarter saw a desperate effort to count on the Iowans by the Aggies. A recoverable fumble on the Cyclone 35 yard line offered a chance, Axline passed to Sebring for a 10 yard gain, and again to Randles for 20 yards. An incomplete pass, an abortive attempt at an end run, another incomplete pass, the referee's whistle—that tells the story of the final minutes of play. The battling Ags had the ball on the Iowa 6 yard line when the game closed.

Huston Outpunts Iowa Kickers
The feature of the game was the playing of Dewey Huston in the line and as a punter. He got through for several good tackles, and outpunted the Iowa kickers. Cowell and Hinds did some good work in running back punts and carrying the ball

through broken field. Cleland played a rattling good game against Wallace, the much advertised Ames center.

The Aggies had several chances to score on field goals, but did not make a try for a tally by this method. The Ames aerial attack was our undoing, but several pretty efforts were spoiled by the Wildcat backs. But 6 of 20 tries were completed by the Iowans.

A. E. Pearson, '14, and E. A. Billings, '20, were both in Manhattan Saturday for the homecoming game.

Mr. Pearson is now connected with a grocery company in Clinton, Okla. When here in school he was an Athenian and a member of Alpha Zeta. Mr. Billings is now at Maple Hill. Billings holds the college record for the discus throw.

Dr. and Mrs. Leo McGrath spent the week end in Manhattan. Doctor McGrath was graduated in veterinary medicine last year, and is now practicing at Syracuse, Nebr. Doctor McGrath is visiting at the Alpha Psi house. Mrs. McGrath, who was formerly Catherine Fox, visited with college friends.

Fine Silk Scarfs

In the new color combinations and designs

The Givin Clothing Co.
AGGIEVILLE

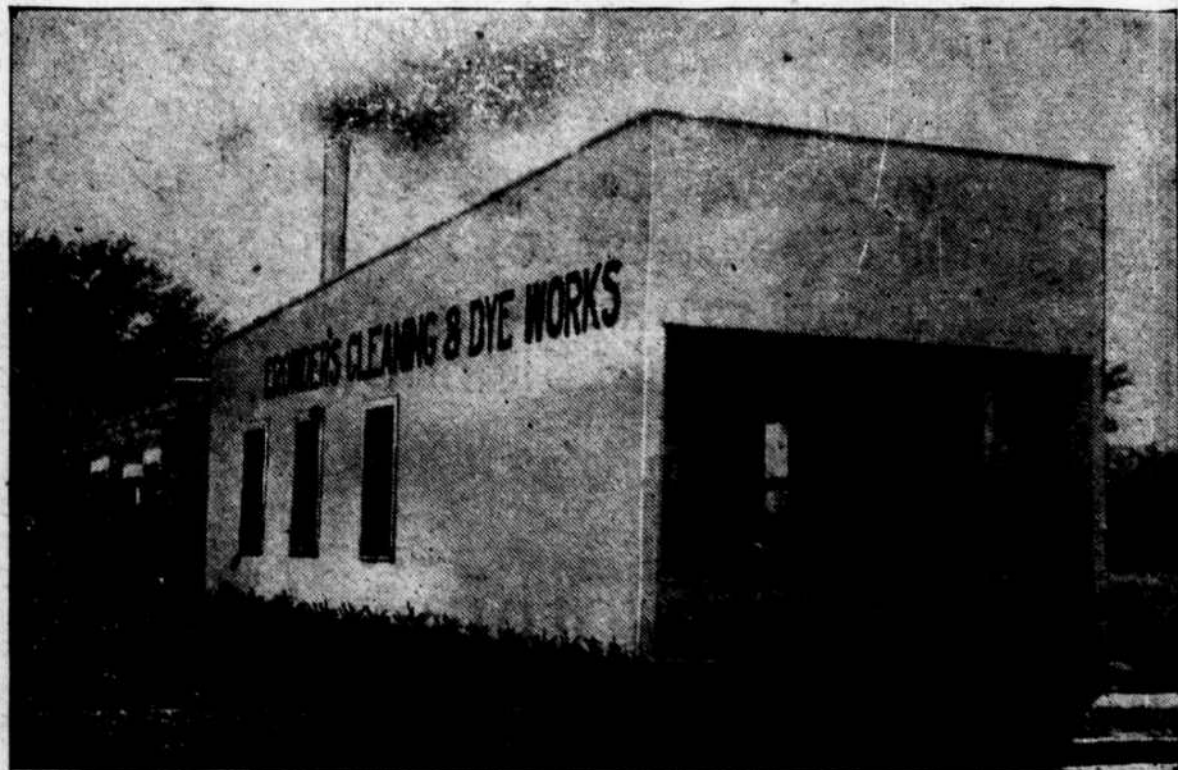

Short Order Department—Now Equipped

THE Pines Wishes to Announce that we are ready to serve short orders as per our announcement of last issue. Mr. Dale Hutto, a former Aggie student and member of American Legion has charge. Mr. Hutto comes to us with splendid recommendation and we are sure that students, citizens and members of the faculty can rest assured that we can render real service.

The Hours: We serve short orders from 9 to 11 A. M., and 2 to 5 P. M., and from 7:30 to 12 P. M. We propose to have everything in season. **Give us a Trial.**

THE KANSAS STATE COLLEGLIAN

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, FRIDAY, NOVEMBER 19, 1920

NO. 20

AGGIE-SOONER FRAY LAST OF M. V. SEASON

TEAM PREPARED FOR SATURDAY'S SCRAP

AERIAL PLAYS WILL FEATURE

Same Lineup as Started the Ames Game Will Take the Field at Soonerville

Mike, Bachman, and the Wildcats left for Norman Oklahoma Thursday night on the Rock Island. The game at Oklahoma is the last Missouri valley game of the season for the Wildcats. While the chances for a win do not appear any too good, the Wildcats are going to Soonerville with a determination to fight and may spring a surprise on the chesty proteges of Benney Owen who figure that they have the valley bunting by the halyards and need only to haul it to the top of the flag pole.

Team Same as Last Week

The team came out of the Ames game without serious injuries and will present the same lineup that started the game against the Cyclones when it takes the field at Norman Saturday. Randles and Sebring will guard the wing positions, Stauffer and Gatz will be at the tackle positions, Huston and Hahn will flank Shifty Cleland at center in the line. In the backfield Axline will be at the helm Hinds and Brady Cowell at halfback and Goerke at fullback.

Passes To Be Used

Couch Bachman has been training his warriors at the passing game this week, both on receiving and breaking up the aerial flaps. The Sooners are adepts at the aerial play, and have been since Bennie Owen first discovered the possibilities of that mode of attack back in 1910 or thereabouts. They are also superior in weight to the Aggie eleven. The combination of weight and passes overcame the Wildcat crew in the Ames game, and that contest was a sample of what the team will have to combat at Norman. Bachman has seen to it that his braves profited by the experience of the Ames game and will send a team into the Sooner fray that will know what it is facing.

It had been hoped that Ship Winter would be able to perform in the Oklahoma game and that his weight in the backfield would help in puncturing the forward wall of the Sooners which has not yielded to an opponent this season, but the big fellow will not be able to play. The Aggie backfield is much lighter than that of the Oklahomans with the exception of Goerke at fullback and it looks as though our play would have to follow the aerial style.

Team Will Fight

Reports from Norman indicate that a record crowd will be out as it is the last game of the season on the Oklahoman's home lot. A small delegation of Aggie rooters will be on hand to see their eleven make its last stand of the 1920 Missouri Valley season. It is not at all certain that they will see an Aggie win, but they will see a fight all the way.

PROFS DISCUSS HUMOROUS BOOK

"ITS BETTER THAN LIFE," SO SAYS PREXY

Dean Thompson Not Strong For It, But Glad Some Have Heard of Vitamines and Calories

What did you think of the Brown Bull? Well, it doesn't make any difference. Here is what others have to say about it.

Professor King—"I have a brother at Illinois university who sends me the Siren which is the corresponding magazine to our Brown Bull. I received it last Friday and after having read it I awaited anxiously the appearance of the Brown Bull. I was quite a little surprised at the superiority of the Brown Bull over the Siren."

Miss Heizer—"My snapshot version of the Brown Bull is that it was not exceptionally clever except in a few rare instances. What is the purpose of the Brown Bull anyway?"

"I judge the pasture must have been green for the past months."—Cliff Stratton.

President Jardine—"The Brown Bull is better than Life."

Dean Thompson—"I have read

only a few pages and while some of it is rather entertaining, I fear that there has been considerable paper and ink wasted. I am glad however that home economics education has become well known enough so that the editors have heard of vitamines and calories."

"There is an awful lot of 'dams' and 'hells' in it—Isn't there?"—Prof. Albert Dickens.

Prof. Iles—"The Brown Bull ought to be called a silo."

Dean Farrell—"It was very good. I liked it. A person when reading a magazine such as the Brown Bull should judge it as a comic magazine, not a serious one. In fact, I liked it very much."

Professor Baker—"I am for the Brown Bull; it is a symbol of school spirit, but if the Bull is to be a permanent magazine of success all the students must get behind it."

V. L. STRICKLAND TO CONFERENCE

AT CONSOLIDATION CAMPAIGN IN GRAY COUNTY

Is Representing College—Corner Stone of New \$75,000 Rural High School To Be Laid

V. L. Strickland, director of the home study service, left Wednesday for Gray county, where he is representing this institution in the consolidation campaign scheduled there November 18 and 19.

The visitation party consists of representatives from the state schools and state departments of education, and 12 interested local leaders from nearby counties.

The campaign is an exact reversal of the usual consolidation campaign. Instead of the state educational leaders presenting to the communities the advantages of the consolidated school, the educators themselves will be given a practical demonstration of consolidation possibilities as they have been worked out in the Gray county schools. It is the ambition of the county superintendent, Miss Earne Hildebrand, to make the entire occasion count toward raising Kansas from the 27th to the first place educationally.

The two days' tour of the county will culminate in the laying of the corner stone for the new \$75,000 rural high school at Ensign.

CALL ASKED TO APPOINT JUDGE

C. C. CUNNINGHAM RECOMMENDED TO REPRESENT KANSAS

S. C. Salmon Will Also Attend Hay and Grain Show To Be Held in Chicago

L. E. Call, head of the department of agronomy, has received a letter from G. I. Christie, superintendent of the International Hay and Grain show to be held in connection with the International Livestock exposition at Chicago from November 27 to December 4, asking him to nominate a man from Kansas to judge the exhibits of grain sorghums at the Chicago show. Professor Call has suggested the name of C. C. Cunningham who is now a farmer in Butler county but who was formerly a member of the agronomy department.

Mr. Cunningham was connected with the department of cooperative experiments with the farmers for about 10 years. He has notified Professor Call that he will be willing to serve as judge if appointed. Prizes are being awarded this year for the first time on exhibits of kafir and milo and it is significant that the officers of the show have recognized Kansas as one of the chief grain and sorghum states and the Kansas Agricultural college as having men on its staff who are familiar with these crops and competent to judge them.

Professor S. C. Salmon of the agronomy department will also attend the show as a representative of the Kansas Crop Improvement association and will look after the interests of the association and see that the samples sent in by the Kansas farmers are properly placed and returned if requested. While there he will attend a meeting of the International Crop Improvement association.

Miss Fern Jessup, a graduate of K. S. A. C., spent her homecoming day here, as the guest of Miss Frances L. Brown and Professor and Mrs. A. J. Mack. Miss Jessup has been employed by the extension division since last March, as county home demonstration agent for Nemaha county.

AGGIE STEERS RANK AMONG ROYAL'S BEST

PRIZE WINNING ANGUS REPEATS VICTORY

MEET MUCH STRONG COMPETITION

Will Ship Stock to International Livestock Show at Chicago Next Week

Competing with exhibitors from two other colleges, the University of Missouri and Oklahoma university, besides 20 of the largest livestock breeders in the United States, the show steers exhibited by the Kansas State Agricultural college won a championship, four firsts, one second, a third, and a fifth at the American Royal Livestock show at Kansas City.

These winnings were made from a total of 14 entries in six classes as follows: Herefords, senior yearling, second and third; junior yearling, first and fifth, and first for junior calf; Angus, first senior yearling and championship steer; Shorthorn, first senior yearling, and also first for the best steer herd consisting of three Herefords.

Angus Wins Again

The Angus who won the championship at the Topeka and Hutchinson fairs last fall, proved his right to the title by repeating again at the Royal. Four firsts out of entries in six classes is a rather remarkable showing, and is emphatically indicative of the class of cattle raised and developed by the animal husbandry department of K. S. A. C.

Strong competition was anticipated and these expectations were fully realized, the animals winning ribbons being compelled to show very unusual quality, according to Dr. C. W. McCampbell of the animal husbandry department. It was at first intended to exhibit two carloads of feeder steers raised at the Hays experiment station, but in view of the unusually strong competition which would be certain to exist in this class, the idea was abandoned.

Ship Steers to Chicago

The steers will be shipped to Chicago next week to compete in the International Livestock show, after which all of the animals except the highest ranking steer will be sold or otherwise disposed of. The steer placing highest at Chicago will be shown at the Western National Livestock show at Denver in January.

In addition to the steers from the Royal the college will have a large number of sheep entered at the International. These animals will leave Manhattan Saturday for Chicago and will consist of the following: one carload of fat Hampshire lambs at Heber, Utah; one carload of grade Shropshire lambs, 25 head of purebred grade or cross-bred wethers, seven wether lambs of various breeds, four Dorset ewe lambs, three Dorset ram lambs, two Hampshire ram lambs, three Hampshire ewe lambs, and two Shropshire ram lambs.

MIRTH FOLLOWS IN BULL'S TRAIL

SIGMA DELTA CHI MAGAZINE PROVES LAUGH PROVOKING

Current Issue Carries Good Original Material—Cartoons Add Value to Book

The Brown Bull broke through the confines of his pen of the Sigma Delta Chi corral, and roamed unhampered over the college campus and through the streets of Manhattan Saturday leaving a trail of mirth and better spirits in his wake.

Most of the students and town folks assisted the Bull in making his getaway, opening the gates of his pursues to enable the animal to range farther afield. The few matadores consisting of small bore moralists armed with puritanical-minded criticism, who attempted to stop the progress of the bellowing animal, were quickly routed, seeking safety in the refuge of the narrow-minded and intolerant.

The current issue of the Bull carries good original material with a real punch, the contributors evidently having carried in mind the idea of giving the readers what they want. Many snappy cartoons add

much to the value of the magazine. The cartoons were drawn by Don Ballou, Merton Swanson, and V. R. Blackledge.

In the Aggie Primer, N. A. C. paints in word pictures the various types and characters in the daily life of the college. The primer brings out the foibles and vanities of some of the hill folks in a manner that is all the more effective because it is presented in a childish primer form.

H. W. D. contributes a number of his humorous and pertinent philosophical observations on the life of the average human. His dissertation on "Kissing, A. M. and P. M." shows that he has given much time and research to this problem, and that his conclusions on the subject may well be regarded as absolute and final.

If the public opinion has any weight in judging merit, the first issue of the Brown Bull is a decided success.

The editorial staff was made up of the members of Sigma Delta Chi, professional journalistic fraternity. They were assisted by the members of Theta Sigma Phi, women's journalistic fraternity. Milton S. Eisenhower was editor in chief and Walter Karlofski was business manager.

Contributors to this issue were Jessie Adee, Geta Lund, Don Ballou, Victor Blackledge, Ione Leith, Elizabeth Dickens, Edward Shaffer, M. Jordan, H. Ernst, Blanche Lea, Clementine Paddelford, Orille Bourassa, Gertrude Ramsey, Susan Carmody, Lulu May Zeller, T. H. Boyer, Prof. H. W. Davis, Prof. C. E. Rogers, Prof. J. W. Searson, Prof. N. A. Crawford, Walter Law and Morse Salisbury.

ENGINEERS MEET ON NOVEMBER 13

EACH DEPARTMENT FROM K. S. A. C. REPRESENTED

Society for Promotion of Engineering Education Endorses High School Mathematics

The annual meeting of the Kansas-Nebraska branch of the Society for the Promotion of Engineering Education was held at the University of Kansas, Saturday, November 13. Each of the departments in the division of engineering of K. S. A. C. and the University of Nebraska are members of this branch of the national organization.

The meeting was better attended and the subjects were discussed more enthusiastically than in any previous meeting. If plans in accordance with the ideas presented are successful, all high school courses will contain the required amount of mathematics for college entrance.

The plans of the meeting were to impress the importance of mathematics as a high school subject upon the parent, the pupil, the high school principal and the various boards of education. No special recommendation was made as to the time when algebra should be given, but the representatives urged the teaching of solid geometry in the senior year.

Representatives from K. S. A. C. at the meeting, were R. A. Seaton, dean of engineering, L. E. Conrad, professor of civil engineering, J. P. Calderwood, professor of electrical engineering, C. E. Pearce, assistant professor of applied mechanics and machine design; D. E. Lynch, instructor in forging; and Arthur Lee, instructor in architecture.

TO HAVE DEBATE RALLY SATURDAY

WILL BE IN NATURE OF PEP MEETING

To Present Cup to Winner of Inter-Society Debate Series

The big debate rally which the inter-society council is giving for all college students interested in debate is to be staged in Recreation center Saturday evening, November 20, at 8 o'clock. The purpose of the rally is to put debate before the entire student body as an all college activity. High school debaters, anyone who has ever debated, and all interested in debate are urged to be present.

To use football language, the rally is a pep meeting with all the traditional characteristics attached thereto. The rally will begin at 7:15 o'clock Saturday evening with the final debate between the girl's and boy's literary societies victorious in the series of debates which have been

COLLEGE HAS SAVED STATE 139 MILLIONS

IS ESTIMATED VALUE OF SERVICE FOR TWO YEARS

PRESIDENT ISSUES REPORT

Increased Wealth Through Greater Efficiency and by Stimulated and Safeguarded Production—Per Capita Increase of Income \$41.67

The Kansas State Agricultural college added \$139,230,396 to the wealth of Kansas during the past two years, according to Pres. William M. Jardine in his biennial report to the state board of administration.

"These estimates are at best only approximate," President Jardine says in his report, "but are certainly suggestive of the very definite way in which the college has cooperated with the citizens of the state to increase the wealth of the state through increased efficiency and through stimulated and carefully safeguarded production."

"According to these careful estimates, the college produces in service which can be evaluated in terms of money a sufficient sum to give every man, woman, and child in the state an annual income of \$41.67, and this on a net investment of less than 52 cents a year each."

Here are a few estimates showing definite lines in which college service has increased the wealth of the state during the biennium:

Use of grasshopper poison developed at the experiment station	\$90,000,000
Increased economic wealth through increased vocational efficiency	22,880,000
(Based on the calculations of Irving Fisher, noted economist)	
Use of improved varieties of corn	5,000,000
Practice of improved methods of preparing seed bed for wheat, as developed at the experiment station	5,000,000
Use of Kanran wheat	4,000,000
(This estimate is for the past two years. On the basis of a 2,000,000 acreage for each year of the coming biennium a conservative estimate indicates that the increased returns to the farmers of Kansas alone will exceed \$30,000,000.)	
Use of improved varieties of kafir	2,500,000
Use of Kansas Orange sorghums	1,600,000
Inclusion of silage in rations fed to livestock	1,200,000
Use of blackleg vaccines	1,167,000
Use of hog cholera vaccines, at least	1,000,000
Use of Sudan grass	800,000
Practice of cultural methods and methods of control of scab and other diseases in potatoes	800,000
Use of Dwarf Yellow Milo	600,000
Application of methods of spraying and pruning of orchards	500,000
Treatment of cereals and sorghums for the prevention of smut	1,000,000
More intelligent use of commercial fertilizers as a result of fertilizer experiments	250,000
Road materials testing work, saved through lessened cost, decreased maintenance, and prolonged road life	695,000
Net profits in club work	232,396
Use of 613,000 doses of pocket gopher poison distributed from the institution	145,000
Use of 626,000 doses of prairie dog poison distributed from the institution	61,000
Total	\$139,230,396

Not One Defective Part Reported Since First One Was Completed

The machine shops of the agricultural college have been making on a factory scale a 1 1/2 h. p. single cylinder stationary gas engine since 1916. This is being made as a part of the regular class work of engineering students and others working in the pattern making shop, foundry, blacksmith shop, and machine shop.

A number of these machines are in use over the state for pumping water, running washing machines, cream separators, grind stones and other machinery, and to date not a single part has proved defective or has had to be replaced on any of the machines out in service.

Miss Inskeep Attends Conference

Miss Mildred Inskeep, who for three years was general secretary of the Young Women's Christian association at the Kansas State Agricultural college, arrived in Manhattan Wednesday evening. Miss Inskeep came to attend the high school "Y" conference held here this week. At present Miss Inskeep is field secretary for the state colleges and universities of the four states, Kansas, Colorado, Utah, and Wyoming. While in Manhattan she visited with her parents, Mr. and Mrs. I. L. Inskeep, 830 Bluemont.

Mr. Claude Owen of Eldorado was a week end guest at the Sigma Phi Epsilon house.

"WIN MY CHUM WEEK" IS OBSERVED BY M. E. LEAGUE

Meetings Held to Develop Interest in Welfare of Chums

Epworth League of the M. E. church is observing this week as its annual "Win My Chum Week." A meeting was held in Recreation center Tuesday evening from 7 to 8 o'clock. Thursday evening the league had a supper at the barracks with a short meeting following. The purpose of these meetings is to develop a greater interest in the welfare of chums.

The Epworth League has observed "Win My Chum Week" annually for the past seven years. This year for the first time some of the other leagues are taking up the movement.

To Edit Coed Paper

Theta Sigma Phi, the national women's journalistic fraternity, will hold initiation services the week after Thanksgiving for three pledges, Miss Jessie Adee, Miss Geta Lund, and Miss Susan Carmody.

The fraternity plans to put out a coed paper sometime in January, which, as the name suggests, will especially represent the women of the college. Plans for the paper are now being made.

OLD PREJUDICE COMES TO LIFE

The old time and erratic prejudice against girls' dormitories seems to be prevalent among many of the girls on the college campus. Until recent years there has existed among girls everywhere a certain horror of life in a girls' dormitory. The cause of this feeling, it has been found, has always been traced to the faculty administration of the dormitories. The matrons or heads, as a rule, have been women who have no interest in or feeling of companionship for the girls in their houses. They have been women who were placed over the girls as a matron might be placed over girls in a reformatory.

These old time prejudices, however, have been largely done away with by modern methods, a better atmosphere, more like the real home atmosphere, is created and the girls are self-governing, which gives them the responsibility of their standards of living, standards of social conduct, and standards of entertainment. The matron or house mother, as she is known to the girls, is a woman who has been carefully chosen and one who is particularly fitted for the place.

When dormitory life is contrasted with the living conditions found among college girls at the present time, it cannot be denied that it is an improvement. The congestion found in the boarding houses of the town forces girls to live under conditions which are neither conducive to good health or good scholarship. Life in the houses of the organized group can be very favorably compared with life in the dormitory. There are certain rules of discipline and of conduct toward other individuals in the house which must be observed, and it cannot be denied that such training is beneficial. The dormitory is a means of raising standards of health, habits of study, which means superior scholarship, and higher ideals of social conduct.

Aside from being a great improvement of the living conditions of girls who live in the average boarding house, the dormitories would be a great step taken forward for the college. They would tend to make the college more independent regarding the choice of rooming houses for students. As conditions are at present, practically every available room in the town, regardless of its desirability, is occupied by one or more students because of lack of more desirable quarters.

ROADS TO AHEARN FIELD

During the football, baseball, and track seasons of the year, all roads lead to Ahearn field, and no one will deny that the conditions of these roads at such times is anything but conducive to the safety of the pedestrian or the person lucky enough to be driving a car.

The jam is so dangerous at times that it is a wonder that there have not been many serious accidents. The congestion before and after the K. U. game, should stand as a warning to all concerned that something to better this condition should be done at once.

In view of the fact that the military department, as part of its year's work has to build a bridge, why not have one built just north of the tennis courts, connecting the gymnasium with the athletic field. A few tons of cinders now accumulating around the engineering building could be put to good use in constructing a cinder path to the field.

The teams, who do the work on the gridiron, the diamond, or the track, would give a vote of thanks if any effort in the direction of providing a new and better road was made.

DO YOU EVER FIND ANYTHING?

Did you ever lose anything? Did you ever find anything? Of course you have. Things are being lost and found every day right here on the hill, but a woefully small per cent of the finds are reported.

There is an unwritten law at K. S. A. C. which says, "turn in all found articles to the college post office." There they will be kept for a time for identification and then if they are not claimed they may be taken by the finder. The point is, too many of us have been ignoring this law.

Let's get the habit of turning things in when we find them. It is not very much trouble and we will not regret having helped some unlucky fellow who is human and forgetful just like us. And then besides, maybe it will be your note, book, your fountain pen,

your watch, or your frat pin that is lost next time, who knows? A lot of the things we find are of no value whatever to us but may have been invaluable to their owners. Fellows, after all it's merely a matter of honesty. Are we going to be honest or are we not?

IT'S THE LAST MINUTE—TIME OUT!

When did you get your notebook for mid semester?
When did you hand in the theme that had been assigned for three weeks?

When did you study for the quiz and do your reference reading at the library?

At the last minute of course, just like everybody else.

And what kind of a grade did you get? Not very good was it? And in all probability the explanation of the fact that your grade wasn't very good, lies in the late studying, the hurried scrambling for notes, and the headache you had for the quiz on account of studying so late the night before.

Waiting until the last minute is just a habit. It really is just as easy to go to the library as soon as you know what the outside reading is to be, and if there chances to be but one book on your subject in the library, you will stand a lot better show of getting it a week before than you will the night before, because the great majority of the student body have the last minute habit.

Your theme or quiz suffers too for the late work you put on it—and incidentally of course your grade suffers.

Get out of the last minute habit—it might shock your instructor if he knew that you studied before the last minute but maybe you can keep it from him.

Juniors Must Pay Assessment

Morse Salisbury is to have charge of the junior section of the Royal Purple. Each junior is to be assessed \$5 which must be paid within the next three weeks, after which time the junior pictures for the annual will be taken. At the junior meeting at which this matter was settled it was also decided to have a party sometime after Christmas.

Publish Joint Article

"Strongylosis in Cattle" is the title of a recent joint article by Dr. James E. Ackert of the zoology department, and Dr. William E. Muldoon of the department of medicine and surgery. This article which appears in the November issue of the journal of the American Veterinary association is illustrated, showing pictures of some of the affected cattle, a portion of a diseased stomach, and drawings of the parasites.

Poem Is Republished

"The Carrying of the Ghost," a poem written by Prof. N. A. Crawford of the journalism department has been republished in the 1920 "Anthology of Magazine Verse," which is supposed to comprise the 100 best poems written in the year 1920. The poem was originally published in "Poetry" and was printed in the January Anthology.

Miss Mary Haupt of Peabody spent the week end visiting former friends here. She was a freshman in home economics last year and intends to return to school the next semester.

A chapter of the Phi Kappa Delta debating fraternity was installed by Floyd Hawkins, '20, at the Wesleyan university last week. This is the seventh chapter to be organized in Kansas.

C. P. Close of the bureau of plant industry of the U. S. department of agriculture at Washington, D. C., was in Manhattan Monday, making a study of fruit growing activities that are being promoted by the extension division.

Mr. Clinton D. Guy, junior in the division of agriculture, is presenting the illustrated lecture "Practical Community Projects" on the community lecture courses of the rural service department. He is on a circuit this week including Auburn, Wakarusa, Hoyt, and Tecumseh. Mr. Guy's schedule for this season covers 21 engagements in various parts of the state.

Ship Winter visited in Superior, Neb., Saturday and Sunday.

Sunday dinner guests at the Sigma Phi Epsilon house were Miss Marie Kent, Miss Mildred Swenson, and Mr. and Mrs. Claude Owen, of Eldorado.

Mrs. H. E. Thornburg of Formosa, was a guest at the Chi Omega house Friday.

Dr. and Mrs. J. D. Riddel of Salina were guests at the Chi Omega house Saturday.

Miss Helen McCausland of Wichita was a week end guest at the Chi Omega house.

Miss Irene Graham went to Lawrence to the K. U.-N. U. game.

Prof. James B. Rogers of the zoology department spent the week end at Lawrence.

Paul Fetzer, '20, has gone to Pittsburgh, Pa., to accept a position with the Westinghouse Electric company. Mr. Fetzer was graduated from the course in mechanical engineering here.

Miss Mary Ellen Henderson was called to her home in Atwood Thursday, returning Monday.

Miss Billie MacKellar of Kansas City was the guest of Miss Ila Knight at the Delta Zeta house over the week end.

Mr. and Mrs. Vance Russell, of New Albany, both former students of the college, report the birth of a daughter, Marjorie Jean, Wednesday, November 3. Mrs. Russell was formerly Miss Bess Sloan of Salina.

Seibert Fairman, '19, who has been with the general Electric company at Lynn, Mass., has accepted the position of assistant to Dean Potter at Purdue university.

Dinner guests at the Delta Zeta house Sunday were Miss India Reinhold and Miss Elsie Fatzner.

K. U. MEN TELL WHAT THEY LIKE

PREFER GIRL HAVING RELIGION
—PLACE COOKING LOW

Men Are Unwilling to Marry on Less
than \$250 Per Month—Women
Are More Reckless

Answers to approximately 200 questionnaires show that the average University of Kansas man places religion as the most important characteristic of the woman he would marry, said the Rev. Evan A. Edwards at the Trinity Episcopal church at Lawrence recently. The subject of the sermon was, "The Woman the K. U. Man Would Marry." The church was filled.

He added that among other outstanding characteristics that would be required by the university men were good common sense, neatness and sociableness.

One of the big surprises was that the quality of being a good cook was placed very low on the scale. To offset this, however, the men said they were not willing to get married on less than \$250 a month. This figure was slightly higher than the amount given by the university women as the average showed that the women students would be willing to marry men with an average salary of \$175 a month.

Mr. Edwards said that on the whole the university students surprised him with their good common sense on serious matters. He did believe, however, that there was a dark period ahead for the students who classed the cooking characteristic so low down on the scale.

MAKE PHOTOGRAPHY SHOP OUT OF REPAIR BUILDING

Will Hold Open House for Students
When Remodeling Is
Complete

One of the most interesting and attractive places on the campus will be located in the old repair shops, which are now being redecorated for the new K. S. A. C. photography shop.

Pictures of the campus and buildings will be on exhibit and for sale. All the college work will be done as needed, for the bulletins and experiments. As soon as the building is furnished, open house will be held for all students. At the open house students will be shown through the building and explanation will be given of the different processes of photography.

The interior of the building is being repainted. The furnishing of a

reception hall, exhibit, and motion picture room will be a few of the attractive features in the building. It is hoped that this will be one of the most popular places on the campus.

ELEVEN HUNDRED DOLLARS PLEGGED WEDNESDAY NOON

Y. W. Finance Committee Putting on
Drive—264 Reports In.

Eleven hundred dollars in pledges was turned in to the Y. W. office by Wednesday noon. There were 264 student reports in with an average pledge of \$2.30 for each girl. There is no faculty or town women's report in at this time. Out of the 850 girls in college about 600 belong to the Y. W. C. A.

The girls of the finance committee are putting on the drive. The girls are Florence Henny, Belle Hagans, Gladys Ross, Vera McClelland, Esther Curtis, Rowena Turner, Alice Mustard, Esther McStay, Ila Knight, Margaret Ansdell, Myra Scott, and Marguerite Bondurant. The girls can choose as many helpers as are needed.

Mrs. J. V. Cortelyou is chairman of the campaign among the town women and the advisory board. Miss Mary MacDonald has charge of canvassing of the faculty members.

Faculty Recital Sunday

The next music faculty recital will be given by Miss Mabel Leffler, piano, and Mr. Raymond Williams, tenor, in the auditorium, Sunday afternoon at 4 o'clock.

Don't throw away your dull safety razor blades. Have them resharpener for less than half the cost of new blades. Leave blades at Cooper's Barber shop, in the Main hall. On the campus. 10-6

STATES OPINION ABOUT CHEATING

S. S. G. A. COMMENDS COLLEGIAN
FOR STAND TAKEN

Committee Publishes Misconduct List
—Recommends Expulsion for
Violation of Rules

Cheating as a practice has met with the disapproval of the majority of the students in this institution. In an editorial, the Collegian took a definite stand against cheating, and now the Students' Self Governing association answers this editorial declaring its opinions on the subject.

Dear Editor: In a recent issue of the Collegian you discussed, editorially, the consequences of cheating, among the students, with respect to the college. The discipline committee of the Students' Self Governing association wishes to commend you for what you stated in that editorial.

We have received several reports concerning attempts at cheating by students in their recitations even, but more particularly in their examinations. In addition, we have received a few reports which allege that cheating has actually occurred. The committee does not hesitate to class such practices among students as among the worst of offences. If in any case it can be reasonably shown that a student has cheated, in any form, the committee shall recommend the expulsion of such persons from this institution.

The committee is aware that cheating is but one of several types of misconduct. We believe that the following practices fall in the same category as the practice of cheating:

gambling in all its forms; petty larceny, such as filching of pockets, the taking of property not your own such as books, clothing, money, shop and class room instruments of all sorts; the forging of checks, notes; the "jumping", or nonpayment of debts.

Our present plan is to deal with all cases reported to us in such a manner as will stamp out any tendency any one may have to cheat, steal or defraud his or her way through this institution. Here are some reasons for this statement:

If a student does not see fit to strive for the upbuilding of an institution he should not by any means be permitted to lower the standards of that institution.

The institution along with its many honest and able friends suffers far more than the student does because of his misconduct.

This group which numbers so few as compared with the total student body can, during the course of a few weeks, do more damage than can be repaired during the course of one whole year by the real friends of the institution.

In other words we cannot afford to place the good name of our college in the hands of its enemies who have gained admission to its community.

Organize Rifle Club

The men of the faculty have organized a Rifle club with Professor Charles H. Kitzelman of the department of veterinary medicine as president. Any one of the faculty may become a member if he cares to. The club will have use of the indoor range on Tuesday and Thursday evenings.

ELEANOR BROWN DIES FROM FALL

DEATH OCCURS MONDAY NIGHT
—FELL FROM CAR

Miss Brown Was Sophomore in Home
Economics And A Member of
Alpha Delta Pi

Miss Eleanor Brown died Monday evening at 11:30 o'clock at the Charlotte Swift hospital, of concussion of the brain caused by a fall.

Monday afternoon Miss Brown was riding on the side of a car when it is thought that she fainted and fell, hitting her head on the pavement.

She was taken at once to the hospital but she never regained consciousness. Her brother, Shannon Brown came on the 8:18 train and her mother arrived on the 12:50.

Miss Brown was a sophomore in home economics and a member of the Alpha Delta Pi sorority.

Short funeral services were held at 11:30 Tuesday morning at the Southern funeral home. The body was taken to Holton for burial.

SALISBURY WILL REPORT OKLAHOMA-AGGIE GAME

Is Writing Sport News for Several
Metropolitan Papers

The Collegian will send Morse Salisbury, sport editor of the paper, to Oklahoma to cover the Oklahoma-

Aggie game at Norman Saturday.

This is the first time the Collegian has assigned a man to "cover" an out-of-town game this year. Salisbury is the man for the job, and Collegian readers may be assured of an accurate, snappy story of Saturday's game. Besides his work on the Collegian, Salisbury is writing sport news for several metropolitan newspapers.

While in Norman he will attend the national convention of Sigma Delta Chi, professional journalistic fraternity.

SERIES OF LECTURES GIVEN FROM PRACTICAL VIEWPOINT

Burr Secures Heads of State Institutions
to Address Social and
Economic Classes

While in Topeka this week, attending the meetings of the State conference on social work, Walter Burr, rural organization specialist, met the superintendents and directors of our state institutions for defectives, and arranged with them a series of lectures for his classes in social problems and current economic problems.

For the group in social problems, these men will deal with the institutional organization and management of the school represented, and for the class in economic problems the number of wards, percentages, significance and the economic principles underlying conditions as they will be discussed.

The schools for the blind, the deaf, the reformatories, and other charitable institutions will be included in this series.

RURAL CHURCHES DEPEND ON AGS

DEAN FARRELL EXPLAINS OPPORTUNITIES FOR STUDENTS

Successful Rural Pastor Must Appreciate Agricultural Conditions of His Community

"Agricultural students who are interested in rural church work can find many opportunities for service in this field," says F. D. Farrell, dean of agriculture.

"The feeling is growing that the rural pastor, if he is to render a maximum service needs to know something of the community in which he is working and also the principles relative to successful agriculture."

According to Dean Farrell, there are a number of leading churchmen throughout the country who are now engaged in an enterprise to interest agricultural college students in the opportunities offered by the rural church.

One of the fundamental requirements of the successful development of the rural community life is that the rural church exist in the community or the rural conditions will not improve, educators believe. The success of the method of procedure which this plan of adapting the preacher to the community makes necessary, lies in the fact that a committee must make a thorough search for a preacher who has been informed along agricultural lines and who understands the conditions which exist as well as the principles of the community.

Dean Farrell states that one of the church educational board members is expected to speak here sometime in January to agriculture students and other students who may be interested in this subject.

ZETA KAPPA PSI DELEGATES HERE

REGISTRATION AND MEETINGS HELD IN EURODELPHIAN HALL

Christine Cool President of Local Chapter—Gives Welcoming Address

This morning registration of Zeta Kappa Psi was held in Eurodelphian hall, followed by an address of welcome by Christine Cool, president of the local chapter. Greetings from Doctor MacArthur for the Pi Kappa Delta were read.

This afternoon in Eurodelphian hall, Dr. J. G. Emerson will give a general discussion of "Women's Work Today and Duties as Zeta Kappa Psi Members." Mrs. Floyd Hawkins will give "The Aims and Purpose of Zeta Kappa Psi."

Tonight at 8 o'clock, Mrs. Lee Monroe, a woman of state wide reputation as a club leader, will talk on "The Apotheosis of Portia," in the Eurodelphian hall. Saturday night the finals of the intersociety debates will be given, and at this time the intersociety loving cups will be awarded. Following this there will be a debate rally and reception given in honor of Zeta Kappa Psi by the intersociety council.

KANSANS HOLD REUNION AT TWIN FALLS IDAHO

Twelve Former Aggies Attended—Other Colleges of State Represented

A reunion of former Kansans was held Wednesday evening, November 3, at Twin Falls, Idaho. The dinner was attended by 43 former Kansans, of whom 12 were from the Kansas State Agricultural college. The University of Kansas had seven, Emporia normal nine and there were also graduates and former students from Pittsburg normal, Hays normal, Washburn, Baker, College of Emporia, Sterling, and McPherson college.

Those from K. S. A. C. included Miss Lola M. Chaffee, '18, now teaching science at Kimberly, Idaho; Miss Laura Denman, '20, now teaching English at Burley; H. E. Powers, attended college in '13, now county agent of Twin Falls county; Miss Elsie Swanson, attended college in '18, now teaching the second grade in Twin Falls; Miss Juanita Stuehl, '09, teaching home economics in Twin Falls; S. Beson, attended college in '84 and '85, teaching rural school at Gooding; E. H. Ikard, '19, now teaching chemistry in the high school and practicing veterinary surgery at Gooding; A. R. Denman, '20, now director of vocational agriculture at Burley; W. E. Crabtree, now director of vocational agriculture at Twin Falls; Mrs. Dora (Cate) Crabtree, '20; L. K. Saum, '18, director of vocational agriculture at Gooding; and Mrs. Effie (Witham) Saum, who attended college in '16 and '17.

Gym Class For Faculty Women

A physical training class for women of the faculty and the wives of the members of the faculty has been organized. The class will meet on Wednesday nights from 7:30 to 8:30 o'clock under the instruction of the teachers in the physical education department.

For Rent—two half rooms for rent at Y. M. C. A. \$6.25 and \$6.75 respectively.

DRY LAND MAN VISITS COLLEGE

D. E. STEPHENS CONFERS WITH AGRONOMISTS HERE

Mr. Stephens Is Superintendent of Dry Land Sub Station at Moro, Oregon

D. E. Stephens, superintendent of the eastern Oregon dry land sub-station at Moro, recently spent several days as the guest of President W. M. Jardine. While here Mr. Stephens also conferred with members of the agronomy department with reference to cooperative cereal work in progress at this station.

Although Moro is an exceptionally dry place, having an average rainfall of but 12 inches, by introducing proper methods of tillage and development of superior varieties of farm crops, Mr. Stephens has been able to secure favorable yields in nearly every season.

Mr. Stephens, in cooperation with the Oregon state experiment stations, has been working on the problem of producing varieties of wheat resistant to stinking smut. Mr. Stephens

said this disease is the most serious one in the Pacific northwest, and explained that it was being overcome by crossing resistant varieties with Club and other high yielding adapted varieties.

GET PRODUCTION COST OF ALL FARM PRODUCTS

Agricultural Economics Department Cooperates in Work With Farmers

R. D. Nichols of McPherson, and W. W. Fetrow of Holton, attended a conference with the department of agricultural economics last week end. Mr. Nichols and Mr. Fetrow both have charge of cost of production studies being conducted in their communities under the supervision of the agricultural economics department of the college.

In this work the department is co-operating with 25 farmers in each of these communities, getting complete cost of production of all farm products. The work is a part of a national program to get cost figures in farm products that are comparable for the entire United States.

The studies are being carried on in cooperation with the offices of farm management and farm economics of the United States department of agriculture.

Everybody Wants Fresh, Hot "Butter-Kist" Pop Corn

It's real pop corn at last! The best you ever tasted. Nothing but the big, fluffy, white flakes of the best corn grown; crisp, crackling, clean.

Popped in a wonderful machine that automatically removes all burnt grains or "bachelors," and that butters every kernel just right. All without a touch of the hand. Come in and see it work. Only best quality creamery butter used.

You'll like "Butter-Kist"—a big, generous bag for 5c.

PAUL G. ROOFE
PINES CAFETERIA

The Modern Way

You can't judge a man by the clothes he wears; nor by the amount of cash he carries. It's out-of-date to "flash" a roll of bills.

Successful men in Manhattan and community carry only a few dollars for "pocket money" and keep the rest in a checking account. They know the safety, convenience and economy of paying bills by check.

Start a checking account at the Farmers and Stockmens State Bank and see for yourself that it is the modern way—the best way to handle your money.

PLAN FRESHMAN GIRL'S WARDROBE

CLASSES WORK OUT IDEAL COLLEGE OUTFIT

List Will Be Explained at Clothing Congress To Be Held Here Saturday Afternoon

What should a freshman girl include in her wardrobe when she enters school in September?

The sophomore girls enrolled in the home economics classes have worked out an answer to this perplexing problem in the form of a list of desirable articles of clothing. Explanations of this list will be given at the clothing congress which is being held Saturday afternoon as a part of the program for the high school girls who are attending the Y. W. C. A. conference here.

This list, which has been revised and corrected by Dean Mary P. Van Zile, Dean Helen B. Thompson, and Prof. L. P. Glanton, is as follows: one bath robe, one pair slippers, one light weight kimono, four thin and three heavy night dresses or equivalent pajamas, two white petticoats, one colored petticoat, two colored bloomers to be worn in place of petticoats, six combinations of any desired cut, camisoles to harmonize with blouses—no heavy lace or colored decorations—two pair dark silk stockings, six pair guaranteed stockings, lisle or cotton, 1 pair light silk stockings to match slippers, two pair white lisle stockings if white shoes are worn, one pair dressy dark pumps with low heels, one pair light colored slippers for dancing, one pair low-heeled oxfords, one pair low-heeled boots, one pair dress boots or spats, one medium colored silk dress for afternoon parties, one evening party dress, one wool dress—second wool dress to be bought at Christmas time—four light weight dresses for warm weather, one heavy coat, one sweater, one campus hat for summer and one for winter, one dress hat for summer and one for winter, one pair campus gloves, one pair dress gloves, one separate skirt, two separate blouses, silk or cotton, one suit, one suit blouse, one light weight coat, one umbrella, one pair rubbers, one raincoat and 24 handkerchiefs.

The list for the minimum wardrobe includes one umbrella, one warm bathrobe, one pair slippers, one light weight kimono, three thin and three thick night dresses, or equivalent pajamas, two white petticoats, one colored petticoat, one or two colored bloomers to be worn in place of petticoats, in winter, four combinations of any cut, camisoles to harmonize with blouses, no heavy lace or colored decorations, one pair black silk stocking, six guaranteed stockings, lisle or cotton, two pair white stockings, if white shoes are worn, one pair dress pumps with low heels, one pair oxfords with low heels, one pair low heeled dress boots or spats, one pair rubbers, one light dress for parties, four light weight dresses for warm days, one wool dress-skirt and blouse separate, one wool dress to be bought at Christmas, one dark silk dress, two separate blouses, silk or cotton, one heavy coat, one sweater, one campus hat, one dress hat for summer and one for winter, one pair campus gloves, one pair dress gloves, 12 handkerchiefs, one raincoat.

Lawrence Wheatley, junior in civil engineering but at present assistant county engineer of Lyons county was back for the homecoming game Saturday.

Miss Ruth Floyd and Miss Jean Hanna attended the Emporia-Washington game at Emporia, Saturday.

Washington county club met Tuesday evening for the purpose of voting on the constitution which has been prepared for the club.

Professor and Mrs. A. M. Patterson arrived in Manhattan Tuesday evening from Kansas City where they attended the Royal Livestock show.

Miss Kneeland, professor of home economics, was in Topeka three days this week attending the annual Conference of Social Workers which was held there Tuesday, Wednesday, and Thursday of this week.

Visitors from the U. S. department of agriculture in the extension division this week were Ivan L. Hobson, assistant north central states of the supervisory staff for boys' and girls' clubs, and Miss Agnes Harris, of the advisory staff for home demonstration agents.

Miss Phyllis Burt of Turner, Miss Florence Garvin of Columbia, Mo., Miss Bess Hoffman of Enterprise, and Miss Mildred Waring of Newton attended the homecoming game Saturday and were guests at the Kappa house over the week end.

President Thomas N. Butcher of the Kansas State Normal at Emporia, was a guest of President and Mrs. W. M. Jardine during his stay in Manhattan.

W. E. Blackburn of Herington and J. D. Rickman of the State printing plant at Topeka, were visitors at the college Saturday.

President W. M. Jardine is in Kansas City today to attend the Royal Stock show.

SOCIETY

SOCIAL CALENDAR

Friday
Enchanted dance in Elk's hall.
Summer county club party in H. E. rest room.
Boomerang club dance in Recreation hall.
Mrs. H. F. Leinhardt entertains with card party.
Delta Delta Delta tea from 4 to 5 o'clock.

Saturday
Osage county association dance in Elk's hall.
Kansas City club hay rack ride to Rocky Ford.
Zeta Kappa Psi party in Recreation hall.
Military R. O. T. C. dance in H. E. hall.
Reception for high school Y. W. C. A. delegates given by cabinet in Recreation hall.
Estes Park banquet for high school girls and Y. W. C. A. officers at Christian church.

Sigma Nu fraternity gave a five course dinner at Hotel Gillett Saturday, November 12, at 8:30 o'clock for the alumni members. There were 56 present.

Sigma Phi Epsilon entertained with a house dance Saturday evening. Punch and wafers were served to the 30 couples who were present. Mrs. Graham, house mother of Sigma Phi Epsilon, acted as chaperone.

Rotary club, of which a great many of the faculty are members will give a dinner at 6:30 o'clock Tuesday evening at the Presbyterian church. The principal speaker is to be W. S. Heuser, Rotarian and superintendent of schools at Salina.

The engagement has been announced of Miss Marian Clarke to Mr. John Grady, '20. Mr. Grady is now in road construction work at Neodesha. Miss Clarke is a senior in the division of general science. The announcement was made Saturday evening at the Delta Zeta house.

Saturday evening, November 13, was homecoming night for the Web-Euro literary societies. The program was the best that has been put on in the hall in years. It was prepared by a committee of the alumni association, the chairman of which was chosen last year, and every number was put on by an alumni member. Refreshments were served after the program.

Mrs. Alice Marcotte, house mother of the Kappa Phi Alpha fraternity, entertained the members of the fraternity Monday evening with a dinner party in honor of her birthday. The tables were lighted by candles in the fraternity colors of gold and brown. The center table was decorated by a bouquet of yellow chrysanthemums presented to Mrs. Marcotte by the fraternity.

Miss Helen Jane Lason, Cornell, '20, of Homer, New York, and Mr. Lawrence Paul Wehrle, K. S. A. C., '14, of Ithaca, New York, were married Saturday, October 9, in Sage Chapel at Cornell university, Ithaca, New York. Mr. Wehrle is an investigator in entomology at Cornell. Mr. and Mrs. Wehrle will make their home at Renwick Heights, Ithaca.

Sigma Tau, honorary engineering fraternity, held initiation services for the following men on Thursday evening, November 4: M. H. Banks, G. L. Garloch, and C. L. McCandless. The pledges of this fraternity are P. L. Sites, E. S. Elcock, W. T. Rolfe, Tracy Johnz, and C. L. Bower. The fraternity is composed of junior and senior students in engineering.

Miss Frances Harrop and Mr. Paul Mann of Columbus, Mo., were married Tuesday afternoon at St. Paul's Episcopal church. The service was read by the Reverend Father Cox. Mrs. Mann is the oldest daughter of Mrs. G. B. Harrop of 501 Pierre street. Mr. Mann is a graduate of K. S. A. C. and a member of the Sigma Nu fraternity. He is now taking a special course in milling at the college.

Sigma Nu fraternity entertained with their annual homecoming crum dance Friday at Harrison's hall. The chaperones for the evening were Mrs. F. W. Morris, the house mother of the fraternity, and Mrs. Clifford Aubel. Refreshments of cider and pumpkin pie were served during intermission. Out of town guests were Mr. and Mrs. E. W. Wright of Great Bend, Grant W. Herrington and Grant W. Herrington, Jr., of Kansas City, Mo.; A. P. Immenchuh of Holton, P. L. Neaun of Columbus, Mo.; Harry Guinness of Junction City, E. S. Parnell of Lawrence, John E. Dubois, Paul Goises, and Arthur Kelly of Wichita, Sam Sherwood of Excelsior Springs, Mo.; Mr. and Mrs. Van Buck, Alex Hubbard and Nell Anderson of Topeka, Russell Doderidge of Council Grove, William Pulver, Fred Miller and Dick Logan of Kansas City, A. L. Husted of Grainfield, H. B. Dudley of Kansas City, and Luzane Fairchild of LaFayette, Ind.

Miss Christine Cool, senior in home economics is substituting as a clothing teacher at Garrison this week.

Harry C. Turner, '01, was a visitor here Tuesday. Mr. Turner was a graduate student in '06, in horticulture, botany, and forestry. He is now employed in the U. S. forestry service.

C. E. Beckett, '20, a former Aggie track star, who is now a civil engineer at Coffeyville, spent the week end at the Sigma Phi Epsilon house.

R. E. Sears of Eureka was a week end guest of his brothers Tom and Maurice at the Sigma Phi Epsilon house.

Mrs. Laurence Woods of Newton, and Miss Nellyn Newell of Wichita spent the week end at the Iota Psi house.

W. S. Blakely spent the week end in Belleville.

Miss Frances Batdorf was a dinner guest at the Iota Psi house Friday evening.

Clyde Beckett of Coffeyville was a dinner guest at the Iota Psi house Friday night.

Walter Horlacher and Ray Watson were dinner guests at the Iota Psi house Thursday evening.

Miss Florence Evans, Miss Hudson, and Miss Mildred Swenson were dinner guests at the Pi Beta Phi house Monday.

Mr. C. P. Close of Washington, D. C., visited at the college Tuesday. He is on a trip studying lines and methods of fruit extension work in Kansas, Nebraska, and Iowa. He will attend the mid-west fruit exhibit at Council Bluffs, Iowa.

Miss Mabel Trautetter of Colby, spent the week end at the Pi Beta Phi house.

Miss Helen Smith was a dinner guest at the Kappa Sigma house Sunday.

Joe M. Goodwin, '13, county agent of Jefferson county was one of the homecomers. Goodwin reports that the county organizations are booming.

H. W. Marston attended the American Royal show in Kansas City Monday and Tuesday of this week.

Charles Dubbs, Donald Blocksome, and William Douglas spent Wednesday at the Kappa Sigma house.

Allan Green, Claude White, Dudley Bentley, Harry Newton, and Lysle Leach left Monday for Kansas City to attend the Royal Stock show.

Miss Izil Polson, instructor in industrial journalism, addressed the students in news writing and printing in the Manhattan high school Thursday afternoon.

Charles Dillon, formerly head of the journalism department here, is now manager of the American Press association in New York City.

Prof. C. E. Rogers, Milton Eisenhower and Morse Salisbury are attending the annual convention of Sigma Delta Chi at Norman, Okla., this week. Professor Rogers is a charter member of the Oklahoma university chapter.

Prof. A. M. Patterson, of the animal husbandry department will go to Riley next week, to conduct a demonstration on the killing and curing of meat. This will be a feature of other educational work staged by the rural service department of the extension division at that place.

Prof. W. L. Blizzard, '10, head of the animal husbandry department of the Oklahoma Agricultural college is stopping at the college today and tomorrow with his stock judging team, to do judging work on the college herds. This work is in preparation for the stock judging contest to be held in conjunction with the International Livestock show at Chicago.

J. S. Lantow, '16, now assistant in the animal husbandry department of the agricultural college of New Mexico, arrived here this week with a stock judging team from that institution, to spend some time judging college herds before going to the International.

Professor and Mrs. Maxey, M. F. Ahearn, and Dr. W. E. Muldoon were Sunday dinner guests at the Phi Gamma house.

Dean and Mrs. F. D. Farrell and Mrs. O. H. Halstead were Tuesday evening dinner guests at the Phi Gamma house.

John Grady, '20, now located at Neodesha spent the week end visiting friends at the college.

Mrs. J. P. Calderwood returned last week from an extended visit with relatives in Ohio. She was accompanied home by Mr. Calderwood's father, A. Calderwood, of Middleport, Ohio, who visited here for a short time.

Athenian and Browning literary societies held a joint program last Saturday night that consisted of stunts, current events, music and the reading of their respective newspapers, The Messenger and The Bluebird.

Miss Imogene Chase, assistant to Dean Willard has returned to work after a three weeks vacation which she spent visiting relatives in Kansas City.

Jack Hill spent the week end at his home in Leocompton.

Franklin literary society held its regular meeting last Saturday night at the usual meeting place. The program for the evening consisted of music, stunts and parliamentary practice. It was voted that the society would change from the three semester plan to the two semester plan. The organization will not meet next Saturday night on account of the inter-society debate rally.

Saturday dinner guests at the Kappa Phi Alpha house were E. E. Hodson, George Merrill, and Fred Marsh.

SUNFLOWERS

H. W. D.

The war made 20,000 millionaires in America. It also resulted in the death of about 50,000 boys on the field of battle. We sometimes wonder if any of these millionaires has ever stopped to figure that they cashed in at the rate of \$400,000 for each death.

When he retires, Vice-President Marshall should receive some kind of medal for having served his time with at least a keen sense of the humor of his position. No other vice-president has ever regarded himself and his job with such acumen.

Before the public mind forgets the term, we should like to have some sort of solemn referendum on the subject of bare knees.

Almost any debutante can get a couple good skirts out of brother Willie's cast-off knee trousers nowadays.

THE LIFE CONTENT
Why do we kid ourselves
Into believing
That when we boast so loud
We are deceiving?

Why not admit at once
We are but human.
Quite full of chaff and straw
Both man and woman?

Then we can sail along
Even though married,
And bid 'em do their worst
When we are buried.

There's always something new over the skin.

The humor published in the college magazines over the country is considerably above the average. But look at the college professors and other good raw material that they have to work on.

So far as is known, Dame Experience has never wasted a minute giving an intelligence test.

We have the profoundest respect for the nerve of the advertiser who expects us to do anything but cuss

OSCAR SEAGLE PLEASES AGAIN

HAS INTERESTING PERSONALITY AND INFORMAL MANNER

Harmony Between Singer and Accompanist Could Not Be Excelled

The second Oscar Seagle concert which was given Monday evening was as well appreciated as at his first appearance here several years ago.

Oscar Seagle is an authoritative artist in the classical field and is well versed on modern songs. One of the most interesting things about Mr. Seagle is his personality, and his personality had a great influence on the success of the concert. His sincerity was manifested in the way he sang, and the few words of explanation he gave to his pieces added a personal touch to his concert.

He is one of the best interpreters of negro spirituals and he showed the love and reference for religious meanings that are so essential to the songs of the negro race. He was very generous with his music, giving an encore after each group.

Mr. Seagle's accompanist, Mr. Hector Dansereau, was greatly appreciated. The striking way in which he submerged his personality, the delicacy and intimacy of his work, the beautiful tone quality and rhythm were outstanding. His accompaniments were perfect and the harmony between the singer and accompanist could not be excelled.

ANNOUNCEMENTS

All college debate rally will be staged tomorrow evening in Recreation hall. Final inter-society debates begin at 7:15 o'clock. Mixer and rally follow.

Quill club meets at the home of Miss Clementine Paddieford, Monday evening, November 21. Prof. N. A. Crawford will address the club on "Radical Magazines."

A. L. Shutz, political writer of the Topeka State Journal will be the speaker at Journalism seminar, Monday, November 29.

Take Senior Pictures

The senior pictures for the Royal Purple are being taken at the Royal studio this week. Ray Watson reports 55 per cent of the seniors as having paid their assessment. He is urging that all seniors pay up before Saturday. The juniors will be photographed next week. A decision will be reached this week as to the amount of the assessment for juniors.

Miss Berenice Fuller, instructor in the English department, had as guests over the week end, her mother, Mrs. A. M. Fuller, and her sister, Miss Gussie Fuller of Topeka.

Lost—A brown striped sash on campus. Reward offered. Finder notify Box 224, college post office.

Fragrant with the sweetness of dear memories, delicate and forgotten, comes once again "The Old Homestead," Denman Thompson's imperishable idyl of country life in New Hampshire. This play met instant favor when first produced nearly 40 years ago and yet, today, it retains its perennial sweetness and charm. Why? Because human interest colors its every line and its theme is love-noble, unselfish love, the love of parent for wandering child. William Lawrence will be seen here as "Uncle Josh," which part he has played over 3,000 times. Lovers of wholesome, sunny drama should not miss the opportunity of seeing this old play as presented by Augustus Pitou, Inc., at the Marshall theater Friday night only.

Things we think; things others think; and things we think of things others think.

Dear Editor: All of us respect the athletes who work so hard for the school and do so much to spread far and wide the name of the Kansas Aggies. I say "all of us" because there is no man or woman going to this college who is so small that he or she does not honor the man who gives his best to his Alma Mater.

Still there are several in the school who do not show due respect to the men and women who have won their "K's." The way in which this neglect or lack of honor is shown is in the wearing of white sweaters by those other than varsity athletes or members of the Women's Athletic association who have won their letters.

I grant that a plain white sweater has no service stripe or purple "K" on it, but when viewed so that the left sleeve or front does not show, the majority of the sweaters cannot be distinguished from those worn by varsity men or women.

The big objection I wish to make is that any white sweater, because of the fact that it is white, greatly resembles the varsity sweaters when viewed from a distance, and when viewed from the right side or rear at near range unless the left sleeve shows. In some schools the wearing of a sweater that in any way approaches the appearance of the varsity sweater would not be tolerated. It should be, here. White sweaters can be dyed any color and merchants in Aggieville are able to do the work.

Each Aggie student, ask yourself, "What are my ideas on the subject? Should white sweaters other than varsity sweaters be tolerated?"

Ray. B. Watson.

Tit For Tat

My poor arms are chilly, my back is cold,
I simply am freezing to death.
If you don't believe me just feel my neck,
Or list to my gasping breath.

The reason? Don't ask me such foolish things,
You certainly ought to know better.
I've nothing that's snug to wear on my frame
If Watson rules out the white sweater.

I ain't made the var'sty, I ain't got a K,
I've been wearing a plain white wool sweater.
It seems quite the wrong thing to do
That I should have known very much better.

All right for you, Ray, for behaving this way,
I'll meet you some night in the dark
And I'll scare you to death for I'll cut off your breath
And I'll leave you to freeze, stiff, and stark!

Take it down to the dyers? Well, indeed 'n I willn't,
But I'll send it to its R. I. P.
In lavender sweet to a quiet retreat.

The sweater that ain't varsity.
And if after that I should die of T. B.

Please write my grand-uncle a letter

And tell him the reason was simply because

You soft-pedaled on non-K white sweaters.—S. C.

Dear Editor: Not long ago I read an editorial in your paper dealing with a new stadium for Ahearn field. We seem to be pretty well agreed that a stadium at K. S. A. C. would be a great thing, but as stadiums go these days they cost money, and the big question with us seems to be "How are we going to get this necessary money?"

One way is to go to a good friend and ask him for a contribution. That is both possible and practical. Why not go to some of our wealthy Aggie boosters and explain the proposition to them and then ask them for a donation. If these persons are worthy of the name "Aggie supporter" it is only reasonable that they show it by supporting.

Another source of revenue would be the alumni. Every alumni member would like to see a good stadium at his alma mater. Why not ask them for small contributions? That is the way eastern colleges do when they want anything of this kind. Then too there are the pros. Of course we know they get rather slim salaries but perhaps we could prevail upon them to give us a few dollars. Next is the student body itself. An athletic carnival with a slight charge attached would help.

The thing I wish to bring out is that it is time we were doing something about this stadium besides talking. I think the fund should be started at once. The sooner we do something, the sooner we will have a stadium on Ahearn field. Let's get together on this thing and put it across.—A. Stude.

Lost—Black cameo ring, antique gold mounting. Take to post office and receive reward.

MISS CAMERON QUARANTINED AT ALPHA DELTA PI HOUSE

Girls Stay Temporarily in Sigma Nu Annex—All Are Innoculated

Miss Jamie Cameron, who is teaching this winter at Abilene, came to Manhattan to attend the homecoming game and while here took the diphtheria. She was quarantined at the Alpha Delta Pi house.

The Alpha Delta Pi girls have all

been inoculated and for the last three days have been in quarantine at the Sigma Nu annex. The quarantine was lifted today and the girls are now hunting rooms where they may stay until they can again move into their chapter home at 821 Osage.

Week end guests at the Pi Phi house were Miss Mildred Robinson of Salina, Miss Josephine Kennedy and Miss Helen Randolph of St. Joe, Mo., and Miss Katherine Smith of Lindsborg.

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, TUESDAY, NOVEMBER 23, 1920

NO. 21

STUDENT CAST SELECTED FOR WORK IN FILM

MIKE NOT TO PLAY LEAD THIS TIME

SCENARIO IS ALMOST COMPLETE

Ahearn to Appear in Future Production with Colonel Brady—Have Clever Art Titles

Mike is not to play the leading part in the movie scenario which is being worked out by the extension division. The original plan was abandoned because of the prevailing opinion that Farm and Home week could best be advertised by an all student cast. However the Irishman is slated to appear in a future production with Colonel Brady and other Aggie favorites.

Fourteen In Cast

The student cast for the film was chosen last week by Dr. J. G. Emerson and Miss Florence Heizer. The cast of 14 characters are as follows: Andy Tavish, prominent cattle breeder; Herbert McClelland; James Garvin, in love with Mary, Neal Bruce; Mary Anderson, a good fuser, Julia Caton; Miss Matilda, Andy's housekeeper; Pearl Hoots; Tom McTavish, Andy's only son, James Kelly; Clara McTavish, Andy's only daughter, Eliza Lear; Dick Sharp, student from home town, Vorin Whan; James' mother, Mrs. Sargent; Olympic distance runner, Ray Watson; senior animal husbandry student; Hobart Fairman; freshman student, James Albright; guide, Leslie Curtis; president of college, President Jardine; dean of agricultural division, Dean Farrell; head of animal husbandry department, Dr. C. W. McCampbell.

Have Artistic Art Titles

A high grade of artistic workmanship is displayed in the art titles which have been worked out. Each one will be made up of white letters with a campus view as a background. Where the Pathe rooster usually appears will be K. S. A. C.'s own stamp, a Kansas sunflower with Waters hall as a center.

The management hopes that they will be able to publish in the next Collegian the scenario, along with instructions to the student body on how to play their parts, as the success of the film depends largely upon the student body's ability to perform.

Need Wood Pile Now

At present the most perplexing problem is where to find a real old fashioned wood pile. Handsome young men, seedy young men, baby vamps, and even old maids are abundant among the student body, but an old fashioned wood pile simply can't be found. The management is discussing the advisability of going to St. George or Junction City where modern ideas are less prevalent, as it is hoped that at one of these places they may find a wood pile like grandpa used to have. Just what is wanted of a wood pile no one seems to know, but likely a wood chopping scene is going to be staged with Neal Bruce or Vorin Whan as chief actors.

Sigma Tau Initiate Five

Thursday evening Sigma Tau, honorary engineering fraternity, held initiation for P. L. Sites, Phillipsburg; E. S. Elcock, Wichita; C. L. Bowers, Mound City; W. T. Rolfe, Wetmore; and T. E. Johtz, Abilene.

Watson To Organize Pep
Ray Watson met with Mike Ahearn and Coach Bachman late yesterday afternoon to discuss plans for an Aggie rooting corps to accompany the Wildcats to Topeka Thursday to meet Washburn, champion of the Kansas conference. Watson will have charge of organizing the pep. If you're interested, see him. If not, avoid him, for you're liable to take it from him unless you're vaccinated.

The Aggies are going to have a hard game. The Ica-bods are from 10 to 15 pounds per man heavier than the Aggies. Their aerial game is perhaps not equal to the Sooners, but the Kansas conference champs played K. U. a closer game than the Aggies did, and they held Bill Hargiss's Emporia Normal team to the same score as Bachman's eleven—a 7-7 tie. The Aggies will need you on the sidelines Thursday. See Watson.

Bryson Leads Contest

H. G. Bryson is still far in the lead in the Collegian space contest, with 244 1/2 inches to his credit. The 10 highest in the contest are H. G. Bryson, 244 1/2; Lucile Whan, 201; M. S. Eisenhower, 150; S. C. Swenson, 145 3/4; Louis Childers, 142; A. E. Goodwin, 115 1/4; Josephine Hemphill, 93 1/4; M. Barth, 90 1/4; C. W. Howard, 77 3/4; Harold Hobbs, 70.

M. D. Laine leads the Industrialist contest, with 15 inches. Miss Lula May Zeller is a close second, with 14 1/4 inches.

ENGINEERS AGAIN PRINT MAGAZINE

ARTICLES CONTRIBUTED BY FACULTY MEMBERS AND STUDENTS

This Issue Contains Alumni Directory Also—Stigers Is Editor

The K. S. A. C. Engineer made its appearance on the campus last week for the first time since it was discontinued during the war. The magazine is published by the engineering division for the purpose of establishing better relations between the alumni and the student body, and also to let the people of the state know something of the course this division offers.

This number contains articles of interest to the alumni, faculty, and the student body. The articles were contributed by the faculty and students. They range all the way from technical papers down to humor. This issue contains a directory with the present address and occupation of each alumna.

Present indications point to a circulation of about 1,500, with a good showing of alumni subscriptions. The magazine is published quarterly. The second issue will come out before the Christmas holidays. The subscription price is \$1.00 per year.

The staff for this year is Morton Stigers, editor; Franz Maas, associate editor; Kenneth Shelder, business manager; Lloyd Zimmerman, circulation manager; Dean R. A. Seaton, advisory editor; and Guy Shelly, alumni editor.

LARGE AUDIENCE HEARS RECITAL

STORMY WEATHER DOES NOT AFFECT SUCCESS OF CONCERT

Miss Mabel Leffler and Mr. Raymond Williams Make Many New Friends and Admirers

A large audience in spite of prevailing weather conditions enjoyed the faculty recital given by Miss Mabel Leffler, pianist, and Mr. Raymond Williams, tenor, accompanied by Miss Helen Colburn, at the college auditorium Sunday.

Miss Leffler sustained her reputation as a delightful pianist with the unmistakable touch of a real musician. Miss Leffler's interpretations arouse a keener sense of delight than is sometimes gained by more pedantic and strictly cold exponents of the classics.

Mr. Williams in his debut before the people of K. S. A. C. and Manhattan made many new friends and admirers by his extraordinary singing. He is magnetic in personality and art, possesses a remarkable versatility and sings with a spontaneity that is refreshing.

The next faculty recital will be given by Mr. Boyd Ringo and Mr. Arnold Lovejoy Sunday afternoon, December 5, at 4 o'clock.

Jack Lantow Visits College

Jack Lantow, '17, who is now an instructor in the animal husbandry department of the agricultural college in New Mexico was in Manhattan Thursday and Friday en route home from the Royal Stock show in Kansas City. Mr. Lantow brought a stock judging team to the show and they stopped here that the men might inspect the stock at the college.

Class For Business Men

Prof. H. W. Davis of the department of English is teaching a class in retail advertising for the benefit of the business men of the city of Manhattan. The class is held every Wednesday evening in Chamber of Commerce rooms. Practical work of advertising and discussion of the every day problems that confront the merchant, and some constructing of ads is the general outline of the work.

Gobs of Turkey and Cider a Tankful Every Aggie Feels Mighty Thankful

With your best bib and tucker packed in your perfectly good-looking bag, and with a smile that is worth one million at least, you're "sittin' on the world" today, 'cause tomorrow at this time you'll be well on your way to the little gray home in the west or the east or somewhere to spend Thanksgiving day with the dear ones.

Pretty nice. Everybody's glad for you. Nobody wants you to stay here if you've a chance to get home. But if there are any little scraps of turkey left or any plum pudding or anything Thanksgiving-ey, just tuck it in a little package and mail it to some of us here, and see if we care?

Most of the mid-semester troubles are over and you probably all know where you stand by this time. In any event try and tuck in a few hours studying on the side. The two weeks vacation is only a little way off, you know, and you can all have a big playtime then, so it won't hurt to concentrate a wee bit on that trig or calc or Spanish.

Nobody likes a preachy Thanksgiving story, but even at that you'll have to admit that you're likely to forget all your college education has done for you if you aren't given a few don'ts and gentle reminders. Anybody likes efficiency so here are a few things to think of while you're gone, all enumerated for you.

1. That old Aggie team that tied Oklahoma! Hurray!
2. That the Aggie team is fighting a hard game for you on Thanksgiving day. If you can't be there to root, think hard and have faith in 'em. Be thankful!
3. That you can live down and

work off mid-term flunk slips if you'll come back from your Thanksgiving vacation determined to dig in hard and dig your way out. Be thankful!

4. That whether we stay K. S. A. C. or change to Kansas State our ideals should be the same and that we should pull together. Be thankful!

5. That K. S. A. C. should come first, grades second, letters home third, laundry bills fourth, and dates last. Be thankful!

6. That nobody ever got killed for smiling and that if you're lucky enough to be getting a real Thanksgiving vacation with the home folks, it's up to you to come back with a homemade grin to greet the less fortunate ones who stayed behind. Be thankful!

7. That classes will begin promptly on Monday morning after the holiday, whether you are there to help create a quorum or not. Be thankful!

8. That you will stop for a moment at least on the day of gratitude and realize that you are a pretty lucky mortal after all, especially to be able to attend a school as fine as this one. Be thankful!

The editor is yelling for copy. It's press time in the Collegian office. All the good staff members have started on their vacation, and right here is where this story is going to end.

P. S. We forgot to say that the Collegian Staff all wish you whatever you should be wished when you're starting off on your Thanksgiving vacation.

P. S. S. We're awfully glad you like our Thanksgiving edition. G'by!

DEBATE RALLY STIRS UP PEPS OF STUDENTS

DEBATE SPIRIT RIVALS THAT OF ATHLETICS

ATHENIANS ARE LINGUAL VICTORS

Two Girls' Societies, Eurodelphians and Ionians, Reach Semi-final Stage in Inter-Society Contests

That the Aggies who have so zealously supported "Mike" and the football team this year with the same pep and fight will stand behind the debate teams was shown by the large number of students and faculty who attended the all college debate rally Saturday evening in Recreation hall.

Have Debate Finals

The first part of the evening was given over to the final inter-society

debate between the two winning Athenian teams. Herbert Moyer, president of the inter-society council, presided at the debate. The question for discussion was: "Resolved that the Kansas Industrial Court Law Should be Repealed."

The right to debate Saturday evening was earned by the two Athenian teams only after having come out victorious in contests between the eight literary societies on the hill, each of whom was represented with an affirmative and a negative team. In the semi-finals which were held this week, two girls' societies were represented, the negative teams of the Ionian and Eurodelphian literary societies. Friday evening the Athenian affirmative team, who are Lee Parish, Frank Swanson, and Verne Stambaugh defeated the girls of the Ionian team who are Barbara Campbell, Queenie Hart, and Dora Dean Dakin, by a decision of 2-1.

Saturday afternoon the same Athenian affirmative defeated the Eurodelphian negative team who are Mabel Vincent, Roxie Meyer, and Orpha Russel with a decision of 3-2. Therefore it was made necessary for the Athenian affirmative team to meet five teams before it went down to defeat before its brother negative team Saturday evening.

The judges who were Miss Rose

PREXY SAYS WE HAVE MUCH TO BE THANKFUL FOR.

WE ARE THANKFUL THAT

1. Dewey Kicked That Field Goal at Brighton.
2. The Grasshopper didn't eat up all the Kansas Turkey Crop.
3. The Election turned out so well.
4. Railway fare hasn't increased in Kansas.
5. Mid-Term Exams don't come every week.
6. Mike Ahearn is back where he belongs; feeding the Aggies lots of raw meat.
7. The Brown Bull was on time again.
8. Bill Knottman is President of the S.S.G.A.
9. Lucy Winder Survived the Flu.
10. Raggy Woodster has some friends left.
11. Ray Watson Didn't Get Sea Sick.
12. Greashmay Behaves Himself So Well.
13. The Football Team Does the Stock Team Wrong.
14. The Saw That Saw You To Outback's Bottom H.O.

16. All the Students Don't Sign the Anderson.
17. Amateurs Salaries are No Smaller.
18. Wildcats Have Scored One Touchdown with V.
19. Henri Delany Created the K.S.A.C.
20. The H.C.R. has been Wounded.
21. The U.S. is satisfied with Home Brew.
22. St. Only Three Weeks Ago Brigham.
23. Thanksgiving Comes But Once a Year.

AGGIES PLAY SOONERS TO HARD FOUGHT TIE

BACHMAN'S MACHINE FUNCTIONS WITHOUT SINGLE FLAW

EVERY AGGIE IS A STAR

Wildcat Touchdown Comes in First Quarter—Nimble Ends and Backs Break Down Oklahoma's Famous Aerial Game

Mike Ahearn proved he was something of a prophet when a few weeks ago he spoke to the effect that the Aggies would look as good as the valley champions if they improved as steadily as they had during the fore part of the season. Last Saturday these same Aggies played the University of Oklahoma team, considered the best in the valley, to a hard fought close tie. The score was 7-7.

Every Aggie a Star

A story of each individual player on the Kansas eleven would fall short of a faithful account of the game from the K. S. A. C. point of view, although every Aggie was a star. The Kansans won this moral victory over their opponents who weighed 15 pounds more per man because Bachman's machine was perfectly organized and functioned without a single flaw.

With their ponderous steam roller the Sooners were able to roll up nearly three times as much yardage from scrimmage and almost twice as many first downs, but the little Aggies always held when the Oklahoma's threatened their own goal too closely. Twice the Sooners were held for downs within the Aggie 5-yard zone.

Oklahoma's famous aerial game broke down against the nimble Aggie ends and backs. One forward pass of the Sooners earned them a total of nearly 40 yards, and resulted in a touchdown, but it was the only pass of any consequence that the Sooners put over.

Axline's generalship which resulted in the Aggie counter was without flaw. Hinds, Goerke, and Brady Cowell skirted the ends, worked through gaps in the line, slipped over pretty little passes.

Randels and Sebring watched the Aggie wings against attack from Oklahoma's swift backs so effectively, while Cleland, Stauffer, Gatz, Huston, and Hahn made it impossible to gain consistently through the line, that the Sooners were obliged to try the aerial game and kicking. But Huston outplayed the Sooner kicker and the Aggie ends stopped the Oklahoma backs from effectively returning the ball.

Touchdown in First Quarter

The Aggie touchdown came in the first quarter, toward the close of the period. The Sooners kicked off into a stiff wind, but the Aggies were unable to gain and were forced to kick, Huston punting 50 yards with the wind at his back. The Sooners made a first down, but could not repeat through the line, and kicked into the wind. The Aggies gained by passes but were again forced to kick. Another interchange of punts placed the ball on the Oklahoma 20-yard line, and the Sooners, unable to gain consistently had to kick to Hinds who signaled for a fair catch on the enemy's 48-yard line. From here the Aggies started the march that resulted in their touchdown.

A pass, Cowell to Sebring netted 14 yards, Goerke and Hinds bucked the line for a first and 10 in three downs, then followed a 10-yard pass, Cowell to Randels, placing the oval on the Sooner 16 yard line. Goerke bucked the line for a first and 10 in two plays placing the leather on the Oklahoma 3 yard line. On the next play Swatek, O. U. full, was off side and his team drew a penalty of half the distance to the goal. On the next try the Aggie line was off side and the ball went back 5 yards. At this juncture Axline called the pass, Hinds to Cowell, over the right end, that the Oklahoma's were unable to solve during the whole game, and Cowell, catching a perfect pass eased over the line with no one near him. Huston kicked goal adding the seventh counter.

Sooners Score Second Quarter

The Sooners started the second quarter with the ball in their possession on their own 37 yard line. They never relinquished the oval, but in 8 plays, including a 38-yard pass, White to Marsh put the ball on the Aggies' one yard line. On the next play, Swatek, Oklahoma fullback, followed Johnson through left tackle

for a foot—then he disappeared under a welter of bodies. When the pile untangled the ball was found to be over the line by a fraction of an inch. Davis kicked goal, knotting the score. During the remainder of the quarter the Sooners played their best brand of football, keeping the leather well within the Ags' 40 yard line for the whole period as Dewey Huston was forced to punt into the gale that was blowing from the south. Twice during the period the battling Aggie line presented a stonewall to the beefy Oklahoma's, and held for downs on the 10 yard line, and once the local warriors held Hill, Swatek, and Davis in succession to a total gain of 2 feet from our 1 yard line.

Wildcats Hold 'Em

During the third quarter, Bachman's Braves again had to face the wind, but held the Sooners, and even worked the ball into the Oklahoma 30 yard zone at one time. Toward the end of the period the Norman team in a last desperate effort, knowing that they were doomed to a tie and possible defeat if they could not score in that frame with the wind at their backs, started a desperate drive for the Aggie goal from the 31 yard line where the ball was placed on a pass that was incomplete, but that was allowed by the referee on the charge of interference with the receiver of the pass. The driving Hill, probably the best plunger in the Valley alternated with Swatek in plunges that went for an average of 3 yards apiece before the Ags could stop them and worked the leather to the Aggie 1 yard line once more. And once more the Aggie line, backed up by Goerke, held the desperate rushes of the Sooners, allowing them 1 yard in three downs.

Despairing of a touchdown, the Sooner quarter tried a place kick from the 27 yard line, but it went wide by feet, and the Aggies worked the ball out of danger, making two first downs before Huston was forced to kick.

Huston Tries Dropkicks

At the start of the final frame, Davis tried another place kick from the 28 yard line, but missed by feet again. In this period Huston tried three dropkicks, one from the 53 yard line, one from the 28 yard mark, and one from 33 yard line. The first two were hurried and one never rose above 10 feet from the ground, but the last try from the 33 yard line appeared from the stands to have been over. As the crowd groaned, the referee shook his head, and gave the ball to the Sooners on their 20 yard line. The play was in Oklahoma territory all the period, but the Aggies could not gain consistently. As the end drew near with the Sooner rooters praying frantically for a score the quarterback of the Oklahoma eleven called four forward passes in as many plays. Three of them were knocked down by Aggies and the last was intercepted. The last two minutes of play saw the leather on the Aggies' 10 yard line, put there by a punt that took a mean bounce. However, Dewey Huston made a great punt, 75 yards high and far down the field, and Randels nailed the Sooner safety as he caught the ball. The game ended with the ball in the Sooners' possession on their own 26 yard line.

CHEER UP CLUB PROMOTES FRIENDLY SPIRIT IN BIG CITY

Such an Organization Might Be a Benefit to the Students Here

Scores of recruits are being added to the "Cheer Up Club" in Philadelphia. The organizer of the club is Rev. Dr. T. W. Davis, chaplain of the Pennsylvania state senate.

The purpose of the club is to promote the spirit of happiness and friendliness throughout the city.

The following seven "commandments" are strictly observed and abided by in the Philadelphia club: cheer up others and yourself; don't worry others or yourself; live and let others live; scatter sunshine wherever you go; don't fuss or get angry—it hurts you; greet everyone with a pleasant smile; laugh out loud three times a day.

If such a club were to be formed here at K. S. A. C. possibly some of the rules adopted by the Philadelphia club would be useful.

LIFE AIN'T SO BAD AFTER ALL—IS IT?

Thanksgiving is a state of mind. If we get more than we think we deserve we are thankful; if we get less than we think should be our share we are not, says Dr. Frank Crane.

Politicians, reformers, editorial writers, and a legion of others have spent much printer's ink and oratorical energy trying to convince us during the year that our rights and privileges have been woefully trampled by profiteers, corrupt public officials, bolshevists, and other crooks. To show that we deserve this they have pointed to our indifference and lack of public spirit. The Collegian editorial writers have also pointed out a few of our shortcomings, as students, to prove that we are getting more than we deserve. We believe they are doing this, not so much because we are that way, but instead so that we may not 'get that way'. They are motivated, not by a spirit of criticism; but by a spirit of helpfulness. Deservedly or not, we have a number of things to rejoice over Thursday. We held the Missouri Valley champions to a tie. Sweet potatoes, pumpkins, cranberries, and other essentials for the Thanksgiving menu are still obtainable. Turkey is almost prohibitive, but chicken can be substituted without most of us detecting the difference. Fords are cheaper, ear-bobs are going out, we are still out of the League of Nations, the pros have received a raise and the quizzes are easier. Mike is at the helm of athletics, the Flu is absent, and despite the "serious" situation which the alarmists tell us exists in all circles, we are fairly happy, contented, and convinced that this is a pleasant old world to live in after all. Considering that we don't really deserve all this, we need to put in full time Thursday making up our back work in appreciation and thankfulness.

PLAY FOR LOCAL CHAMPIONSHIPS

THIRTY-THREE TEAMS HAVE ENTERED AS CONTESTANTS

Pan-Hellenic and Divisions A and B
Tournament Started This Week

Intra-mural basketball tournament started yesterday, November 22, when the following teams entered into battle for their respective divisional championships.

Pan-Hellenic division: Sigma Phi Epsilon vs. Acacia; Kappa Sigma vs. Pi Kappa Alpha.

Division A, independents: Parman independents vs. Erwin independents; Elkhart club vs. Lonwell independents.

Division B, independents: Boomarang club vs. Messenheimer independents; Veterinary Medical association vs. Miami county club; Marshall county club vs. Reed independents; Omega Tau Epsilon vs. Phi Delta Tau.

Today's games in the intra-mural athletics are Beta Theta Pi vs. Alpha Psi, court 1, 8 o'clock; Sigma Nu vs. Alpha Tau Omega, court 2, 8 o'clock; Phi Gamma vs. Eureka club, court 1, 6 o'clock; H. L. Brown independents vs. N. P. Larson independents, court 2, 6 o'clock; Second Battalion military vs. Y. M. C. A. court 1, 5 o'clock; First Battalion military vs. Sigma Phi Delta, court 2, 5 o'clock.

Thirty-three teams have entered the tournament. The director of intra-mural athletics asks that anyone who has a little officiating ability to see him in regard to officiating at some of these games. This will give them the experience which is necessary to development along this line.

The last game of the divisional games will be played on January 27, and the final intra-mural championship game will be immediately after registration next semester.

Bulletin Written On Cooperation
"Cooperation Applied to Marketing by Kansas Farmers" is the title of bulletin 224 which has been published recently by the Kansas experiment station. The author is Dr. Theodore Macklin, in charge of agricultural economics at K. S. A. C., 1915-1919. The bulletin not only deals with the origin, the history, and the extent of cooperation in Kansas, but it includes the principles of successful cooperation. Practical suggestions are given for the organization of cooperative enterprises as well as the improvement of those already existing. The publication contains needed and usable information for all cooperative organizations.

Y CAMPAIGN IS CLOSING TODAY

REPORT MORE THAN \$1,200 SATURDAY NOON

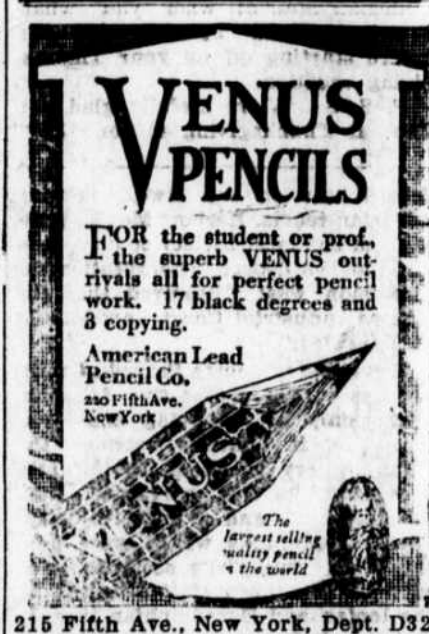

Aggregate Subscriptions Will Be Reported at Barracks Today—Ninety Per Cent Contributing

The Y. M. C. A. finance campaign which was launched last Tuesday is progressing well, although because of the busy week, there has been a great deal of trouble in seeing the students. At noon Saturday more than \$1,200 had been reported by the canvassers from half of the men that had been seen.

An effort is being made to see every man by noon today and report the aggregate subscriptions at a luncheon that is to be held at the barracks. The campaign will continue however, until every man has been asked to contribute. The men in general are endorsing the work of the Y, as about 90 per cent of those seen are giving.

About 75 men are working with the finance committee of which R. C. Nichols is chairman. The canvassers are divided into 12 teams. The captains of the teams are C. C. Bost, H. D. Finch, H. D. Capper, T. A. Constable, Earnest Hartman, Phil Heartburg, M. J. Lucas, B. W. Hixon, Arnold Englund, A. D. Mueller, and C. H. Howe.

F. L. Williamson of Kansas City, visited his son, Maurice Williamson, at the Sigma Alpha Epsilon house Thursday evening.

PREPARES FOR SHORT COURSE

SIXTEEN LECTURES ON AGRICULTURE TO BE GIVEN

Twenty Per Cent of Those Enrolled Last Year Own Their Own Homes

"Farmer shortcourse boys who are expected to arrive in Manhattan during the second week of January will find ample preparation made by the agricultural division for their benefit" is the opinion of F. D. Farrell, dean of the agricultural division.

One of the features of the coming term is a special course of sixteen lectures to be given by the heads of the different departments, and by agricultural authorities such as Henry J. Waters.

There will be eighteen courses offered. The average number of subjects carried by the short course boys is from three to five.

Last year there were 125 men enrolled in the short course, and of these men 20 per cent owned their own farms, 50 per cent were still working for their parents, 18 per cent were tenants, 6 per cent were farm managers, and 6 per cent were hired farm laborers.

AT HOMECOMING GAMES GOOD TIME TO SELL MAGAZINES

Sour Owl Sold at K. U.-Nebraska Game Saturday

The homecoming games of the football season seem to be the best time to put out college humorous magazines. The Owl society of the University of Kansas chose the homecoming game with Nebraska as the time to sell the Sour Owl.

The Sour Owl this year has no specific scandal section as it has had in times past but at the same time there is a limited amount of scandal sprinkled through the pages to make the magazine a good seller. A story in the Daily Kansan stated that the whole staff was preparing to leave town immediately after the Owl came out.

The Owl society at K. U. is not a journalistic organization but is the sophomore class society, and hence is not handicapped by the ethical standards which govern a humorous publication of Sigma Delta Chi.

DAVIS TALKS TO ENGINEERS ON LETTERS OF APPLICATION

Matters of Practical Value Discussed in Meeting of Mechanical Seminar

In accordance with their plan of conducting programs which will present information of practical value to engineers, the mechanicals were addressed at seminar Thursday afternoon by Prof. H. W. Davis. The subject of the talk was "Let-

ters of Application." Professor Davis said that letters of application are simply a type of sales letter in which you sell yourself and your services. During the course of the program each mechanical engineer present was asked to write a short summary of his experiences during the past summer.

This material will be used in making out the seminar program in the future. Men who have had some practical work in mechanical engineering during the last summer will be placed on the seminar programs for a short talk regarding their engineering experience.

You Can Leave Now

Trotting sedately into Prof. King's chemistry class "Sig," the Sigma Nu's bull terrier seated himself calmly beside one of his frat brothers and awaited recitation to begin. "You can leave now," said one Sigma Nu to another, "and they'll think you're still here."

Have Model of Gopher Run

A plaster paris model of a gopher run is to be a new addition to the museum. This model represents the two ways of destroying the gopher, on one side the traps and on the other the poisoning method. It was made by Percy L. DePuy, biological assistant of the U. S. survey, who is working with the extension department. This model was taken to the Topeka, Hutchinson, and Wichita fairs and is now to be permanently fixed in the department here.

Is Stewardess At Lindley Hall

Miss Hattie Gesner, a home economics graduate from the Kansas State Agricultural college, has recently become stewardess at Lindley hall in the University of Idaho. Miss Gesner has charge of a new dormitory which she furnished, and in which she serves 150 boys each meal, besides two tables for boys in football training. Miss Gesner has been manager of large restaurants in Independence, and Salt Lake City, Utah, and is well qualified for her new work.

Stetson Hats Appear Again

Senior animal husbandrymen have again reverted to their old custom of wearing Stetson hats. The hats were donned last week and will continue to be worn throughout the rest of the school year. Hickory canes will not be carried this year.

R. W. Morrish was in Leavenworth last week on state club work. Mr. Morrish is state leader of Boys' and Girls' clubs.

Miss Nan Edwards of Sterling was the guest of Miss Marguerite Currie at the Chi Omega house last week end.

R. B. Becker of the dairy department was in Independence and Parsons on business last week end.

Dr. W. E. Muldoon and Dr. Lienhardt of the veterinary staff, were called to Riley Tuesday to investigate an outbreak of some corn stalk disease. The doctors pronounced the disease Hemorrhagia Septacomia.

CLASSES WORK WITH CHILDREN

GIRLS PLAN DIET FOR KIDDIES

Mother Brings Child to Classes for Advice—Students Put in Over-time on Subject

Dietetics classes are at present studying the feeding of children and infants. In order to be able to make the best of the subject, they are studying and working with real children, who are in need of this care in their diet. Many of the girls are working out their problems with small children near their homes or with someone they know.

Just at present there is a mother here in Manhattan who is so interested in the project that she brings her own child here for advice and help in its care. Some of the students have small nephews and nieces at home whom they are working with. They advise what food shall be given and just what quantity at certain ages.

Miss Rothermel has charge of this work, and she says the course is so interesting that she has trouble keeping the students from putting in more time on this subject than they should.

Plan Wolf Hunt

One of the events of the school year is to be the big wolf hunt put on by the military department sometime between Thanksgiving and Christmas. All plans are not yet completed, but it is known that all who wish may take part in it.

Doing Religious Work

month at the college and in Manhattan in the interest of religious education. Miss Bowman who is a graduate of Holyoak college and has her doctor's degree at Bryn Mawr college, has had wide experience in educational work. She will confer with students at the student pastor's office in Anderson hall. Few churches with the exception of the Episcopal church have a state secretary of education.

Overhaul Greenhouse

The entire botany greenhouse has been overhauled, and new benches built. Plants have been purchased and started for use in the classes. Tomato plants are to be grown for experimental work, in developing resistance to the wilting disease. This work will be carried on this winter.

ENGINEERS STUDY DRILLS THROUGH MOTION PICTURES

Films Illustrate Good and Bad Use of Twist Drills

Engineering students have recently been receiving instructions in the proper use of twist drills through a motion picture study. The films were loaned to the engineering division through the courtesy of the Cleveland Twist Drill company, and illustrated good and bad practice in the use of drills.

Record runs with the use of properly prepared drills passing through four inches of steel in 21 seconds, and through four inches of cast iron in three seconds were some of the impressive features.

The films clearly showed that so simple and common a tool as a twist drill must be in scientific hands if its proper function is to be secured.

To Exhibit Oriental Shawls

Mrs. W. B. Thayer, donor of the Thayer Art collection to the University, will exhibit some of the Persian and East Indian shawls from this collection in the applied art rooms A-67 and A-68. Mrs. Thayer will be here to lecture before the design classes. Definite dates will be announced later. If those living in Manhattan who have Persian or East Indian art objects will lend them to supplement this exhibit the applied art department will appreciate the favor. The best of care will be given to each article loaned.

The exhibit and lecture will be open to the public.

Subject of Essay to Be "Five Ways of
Earning Money at
College"

Eight prizes to the amount of \$75 are being offered by Arthur Murray of New York City, for the best essay on "Five Ways of Earning Money at College."

According to a recent article in Forbes magazine, Arthur Murray worked his way through Georgia Technical school and made \$15,000 a year by giving dancing lessons. While at Georgia Technical he taught a class of 660 children, the largest dancing class in the world.

Any student may enter the contest, which lasts until December 1. The first prize will be \$25, the second prize \$15, and the third \$10, and the next five prizes will be \$5 each. The essay should contain not more than 500 words. At least two of the methods of earning money should be original, the other three may be based upon experience. The winning essays will be published in a leading magazine. All manuscripts must be sent to Arthur Murray, 143 East 39th street, New York City, N. Y.

STUDENT ENTERS DESIGN CONTEST

RUTH WILSON SUBMITS WORK
TO ART ALLIANCE

Material Must Be Created Especially
For Contest—Small Commission
Charged If Sale Is Made

Ruth Wilson, an Aggie student, has entered an art contest given by the Art Alliance of America.

The Art Alliance holds these contests annually for the purpose of getting new designs for different kinds of material. The conditions under which these designs may be submitted are:

Designs must be created especially for this contest. No design previously shown will be accepted. Designs should show either a full repeat or at least an adequate indication of repeat. It must be suitable for reproduction with only technical modifications. They may be executed in any medium that is entirely a hand process but preference will be given to designs executed with pigment and paper.

All designs remain the properties of the designers. The Art Alliance charges a small commission, 10 per cent, to cover expenses in case a sale is made. Designs may be sold at the price authorized by the designer. Liberal prizes are offered for these designs.

Miss Wilson's design was taken from a Japanese motif and is suitable for dress silks or cretonne.

The dairy department has sold a herd of 12 Ayrshires to the Northward farm at Topeka.

The Holstein cow, Maid Henry Pontiac, of the K. S. A. C. herd is one of the largest cows in the state. For the last few weeks she has been averaging more than a ton in weight.

Bells and Whistle— But That Don't Keep 'Em From Breakfast

Whistle and morning bell
Shriek one last call for me!
Oh, may there be no waiting line
When I go for my coffee.

But the Aggie who waits for his breakfast until the morning bell peals forth its warning note is sure to be disappointed, if he thinks there is going to be no waiting line at the college cafeteria. For of the 1,028 students and professors who eat there each day, 999 of those said students and professors wait until they smell the tantalizing odor of those "six cakes" before they decide they just couldn't cut a meal.

And he who can pass by that long counter of tempting goodies and come out with a check calling for less than 25 cents is indeed a temperate Aggie. To be exact the average amount of the checks, according to Miss Evalene Kramer's record for October was 25 1/2 cents.

SEARSON SPEAKS TO MUSIC STUDENTS THURSDAY EVENING

Shows Relation Between Twin-Born
Studies, Poetry and Music

The first of a series of lectures which deal with the relation which other courses have to the music course, was given to the students of the department of music by J. W. Searson, head of the English department, Thursday evening between 5 and 6 o'clock, in the auditorium.

Professor Searson chose for his subject, "The Relation Between Literature and Music." He made plain why one should study both of the twin-born studies, poetry and music; and gave the advantages of a cultural education, in so far that such skill urges one to escape into a higher realm.

Is Not An Excuse

Students seem to misunderstand the meaning of the pink card. This card is not an excuse, it is a certificate of health, permitting the bearer to enter classes. It is compulsory that every student, after an absence after sickness have one of these cards, but it does not excuse him from the classes missed. An instructor may call Dr. Siever's office and find out whether or not a student has been ill, as a record is kept for reference of all students who have received treatment there.

The dairy department recently sold an Ayrshire bull to the University of Nebraska. The bull will be used in the university herd.

Weber Responsible for Fine Showing of College Fat Steers at the Royal

A D. Weber, a Kansas Aggie, won distinction for himself and for his alma mater when a week ago last Monday, at the Royal Livestock show at Kansas City, the college cattle which he had prepared won two first and steer herd prizes in the Hereford section and one champion in the Angus steer section, a record not equaled by any breeder or college exhibitor in the Royal show this year.

Weber, who comes from Muscotah, entered K. S. A. C. in 1917 following an agreement between him and his uncle whereby upon graduation from college Weber was to be given a half interest in the profits of his uncle's registered herd of cattle. He attended all of the year 1917-18 and all of the next year when he was in the S. A. T. C. He was out the fall semester of 1919-20, but came back for the second semester. Believing it better to work full time and go to school full time rather than try to do both at once and do neither well, Weber is out of school this year, but is working as herdsman for the college. When he saves up enough money to complete his course he plans to do so and then take up his uncle's offer.

The remarkable work of fitting the college stock for the Royal was recognized by the Daily Drivers Tele-

gram which ran a half column article in its issue for November 16, telling of Weber and his work.

While in college the young herdsman has distinguished himself in a number of ways. Last year he created quite a sensation when he, an animal husbandry student, won first place in the student dairy judging contest held at the college. He also took first place in a contest conducted by F. D. Farrell, head of the division of agriculture, in which his students were requested to write an article on "What Can an Agricultural College Man Do in His Own Community?" In spite of all his other work Weber has found time for his work in the Athenian literary society, and has done his class work well.

In conclusion the Telegram says: "Naturally Dr. C. W. McCampbell, head of the animal husbandry department at K. S. A. C. is very proud of the college with its fat steers at the Royal, but he credits all the honor to the care and the individual attention that Weber gave the steer herds. No such a record has been made by a student at the college at Manhattan, and Weber's record goes to show what a farm boy student can do when he sets himself to accomplish something."

The Mikado

The Brightest
of all Comic
Operas whose
Tuneful,
Haunting
Melodies will
never grow old

An All-Star Cast of recognized American Operatic Celebrities—A Wonderful Chorus—Beautiful Scenic Vesture—Gorgeous Oriental Costumes—Remarkable Lighting Effects and with an Orchestra of Symphony Players.

Personnel of this Excellent Cast:

KARL STALL, "The Mikado," with Mme. Schumann-Heink in "Love's Letters" and various seasons with Savage's "Sari," "May Time," and "Princess Pat."

RALPH BRAINARD, "Nanki-Poo"—A tenor of recognized ability. He is well and favorably known from coast to coast.

ED ANDREWS, "Ko-Ko," THE GRAND OLD MAN OF OPERA, LATE STAR OF THE FAMOUS ANDREWS' OPERA COMPANY AND LAST SEASON IN "ROBIN HOOD."

BRUCE WEBSTER, "Pooh-Bah," American born but for the last twenty years a resident of England, leading basso with the Carl Rosa Opera company. He was with Adelina Patti in concerts.

MISS PATRICIA BAKER, "Yum Yum," late prima donna with "The Girl Behind the Counter," star with the Aborn Opera company and nine months abroad singing to the soldier boys of Divisions 1, 2, 3, and 4.

MISS ANN McCASHIN, "Pittie Sing," is a well known star of operatic skits, a headliner in vaudeville and was an entertainer in the "Red Circle" tents at the various camps during the war.

MISS MARY LAMBERT, "Peep-Bo," a graduate from the vaudeville and concert stage and a vocalist of rare ability.

MISS MEDORA GAROFALO, "Katisha," a comedienne of recognized worth and a Dunbar star for years.

SPECIAL TO OUR PATRONS:

Owing to the guarantee necessary to bring this attraction here there is small chance for profit to the management, yet we are well repaid in the knowledge that we are going to give our friends the very best musical production of the present season.

To Out-of-Town Patrons:—A special block of seats are being held for out-of-town subscribers and mail orders will be filled in the order received. "THE MIKADO" will really be a notable musical event.

Prices: \$2.50, \$2.00, \$1.50, \$1.00 and 50c

STOCK JUDGING MEN TO CHICAGO

ATTEND AMERICAN ROYAL AT
KANSAS CITY

Nitcher, McCollum, Henney, Otto,
Mather, Peterson, and Crow
Make Trip

The stock judging team left last week to attend the American Royal at Kansas City, and the Chicago International live stock shows.

The team members are Charles Nitcher, E. D. McCollum, Homer J. Henney, Merton Otto, H. E. Mather, O. R. Peterson, and K. R. Crow. Of these men, five will be chosen to work on the regular team.

The team attended the American Royal show at Kansas City last week, and have since been visiting live stock farms in Iowa and Illinois.

The K. S. A. C. team won second last year in a contest with 17 other teams. Professor Bell, of the live stock judging board, believes the team to be unusually good this year.

T. W. BUTCHER GIVES ADDRESS

SAYS WORLD MUST MEET PROBLEMS OF DEVELOPMENT

United States Must Create New Frontier within Itself by Intensive System of Agriculture

"Every individual must find an outlet for his energies, a place where he can accomplish his life's work. We must be able to meet the problems of development or we shall perish from the earth." This is the greatest problem which is facing America today according to Pres. Thomas W. Butcher of the Kansas State normal in his chapel speech last Thursday morning.

"Out west," is a state of mind which has existed among the pioneer spirits of the American people, according to President Butcher. Each decade has shown an increase in the population, both from natural increase and the overflow from foreign countries. The frontier line pushed westward step by step until the country was all taken up and today there is no frontier. The present movement in the population is toward the south where there has been the greatest progress of recent years.

Those who fear for the future of the United States have only to look at Holland for an example. Holland has developed an out west within itself by draining the land and establishing an intensive system of agriculture. The future of this country will not depend upon the opening of new country for our population but

rather the more intensive development of our whole area.

President Butcher deplored the lawless tendency of many citizens of this country who still cling to the idea of the pioneer who found it necessary to take the law into his own hands by means of vigilance committees. Those days have passed, however, and the law should be allowed to take its course. England with one third of the population of the United States has between 300 and 400 murders a year while the United States has 12,000 a year.

"Many have the mistaken idea that society owes them a living. In reality society owes them nothing but the opportunity for working out their life's destiny as they see fit," said President Butcher. "Each must learn to give dollar for dollar in service."

SCRIBES HOLD BIG CONVENTION

SIGMA DELTA CHI CONFERENCE
MEETS AT NORMAN

C. E. Rogers and Milton Eisenhower
Represent Local Chapter—May
Meet Here in Two Years

With the Oklahoma chapter at Norman as host, the national organization of Sigma Delta Chi held its most successful convention from November 18 to 20 inclusive. All of the 35 chapters, with the exception of the Montana chapter, were represented.

Following the business session Thursday, a seven course banquet was held in Teepee hall. Friday night Theta Sigma Phi entertained with a reading by E. Marie Anderson and open house at the Delta Gamma residence. Saturday afternoon the delegates attended the Sooner-Aggie football game.

Lee A. White, a member of the editorial staff of the Detroit News, was elected national president.

C. E. Rogers and Milton S. Eisenhower represented the Kansas State chapter. While the convention goes to Ames next year, the local chapter is practically assured of its coming to K. S. A. C. the following year.

Form Texas Club

Students from Texas met in F-2 last Thursday evening for the purpose of organizing a Texas club. There was a good crowd out and the organization was perfected in good shape. The following officers were elected for the semester: B. A. Campbell, president; Mrs. Elizabeth Winters, vice president; L. B. Swaney, secretary; Gertrude Conn, treasurer.

Junior Preps Organize

The third year class of the School of Agriculture recently met and elected the following officers for this semester: B. A. Campbell, president; Ernest Kohler, vice president; Avis Wickham, secretary; Rosie Schaefer, treasurer; C. O. Nelson, marshal.

SOCIETY

Delta Zeta held open house Thursday evening for the Beta Theta Pi fraternity. This evening they will be at home to the Sigma Phi Delta fraternity.

Miss Margaret Russell, instructor in the department of English, has been pledged to Zeta Kappa Psi, the women's national forensic fraternity.

Miss Lois Hall, of Eugene, Oregon, and Miss Mary Stone, of Cedar Falls, Iowa, delegates to the Zeta Kappa Psi convention, were dinner guests at the Delta Zeta house Saturday evening.

Tri-K will hike to Wildcat this evening at 5 o'clock. Those in charge of the hike say the trip will be educational as well as recreational. A program has been arranged which will be given around the camp fire.

Enchiladas entertained with a dance at Elk's hall Friday night. The music was furnished by a four piece orchestra. Mr. Arthur Westbrook and Mr. A. L. Lovejoy chaperoned. Thirty-five couples were present.

The girls in Prof. R. R. Price's Sunday school class took Sunday dinner in the banquet room at the Pines cafeteria. This closed the week of wearing blue ribbons and the girls feel much better acquainted.

Zeta Kappa Psi, in convention here last week, held formal initiation services Friday evening for Miss Margaret Russell, of the English department, Dr. Helen B. Thompson, dean of home economics, Miss Mildred Inskip, former Y. W. C. A. secretary, and Mrs. Lee Monroe, of Topeka.

Miss Frances E. Ford and Mr. Harold Woodward were married Friday at the Presbyterian church in Topeka. They will live in Kansas City where Mr. Woodward is working for the Kansas State Grain association. Mrs. Woodward attended school here and was a member of the Chi Omega fraternity.

Mr. Woodward was graduated with the class of '20, and was a member of the Pi Kappa Alpha fraternity.

One of the most important events of the Zeta Kappa Psi convention was the banquet held at the Pines Friday evening in honor of the visiting delegates and the four honorary initiates. Toasts were given by Miss Christine Cool, Miss Lois Hall, of Beta chapter, Miss Mary Stone, of Delta chapter, Miss Rose Baker, of Topeka, grand president of the fraternity, Miss Grace Derby, Mrs. Mary P. Van Zile, and Mrs. Lee Monroe. Miss Mary Polson acted as toastmistress.

WIN MY CHUM WEEK ENDS WITH SUPPER IN BARRACKS

Events Are Planned by Epworth League and Sunday School Classes

Over 200 Methodist Sunday School students attended a "get-together"

meeting held at the barracks Thursday evening. The entertainment for the evening consisted of a supper which was followed by a regular meeting.

Tuesday evening the Methodist students met at the Recreation hall for the purpose of becoming better acquainted. One of the outstanding functions of the "Win My Chum" campaign was worked out successfully by having each one of Prof. R. R. Price's girls wear a blue ribbon. Whenever ribbon met ribbon, a smile or a few pleasant words were exchanged.

Thursday's meeting was the last of the events for the seventh annual "Win My Chum" week which has been worked out by the Methodist Epworth league, assisted by the classes which are taught by the Rev. M. S. Collins, George Clammer, Prof. R. R. Price, and Dean E. L. Holton.

Mrs. Josephine Wilder McCollough, '98, left last week for her home at Van Nuys, Cal., after an extended visit here.

STUDENTS ATTEND COLLEGE IN RAGS

MISS BLANCHARD TELLS OF EUROPEAN SCHOOL CONDITIONS

Says Often Five and Six Live in One Room—Cannot Work Way Through

"In Europe all educational systems have ceased, although there are a few students attending college in what we would term rags," said Miss Leslie Blanchard, who gave an address on the student situation in Europe, Thursday evening in the college auditorium. "Most all of the students are supporting an aged father, mother, or an aged relative. The men students are wearing their old uniforms, and the women are wearing dresses given to them through some relief organization."

Miss Blanchard said that the rooming conditions are most serious; that in most cases there are five or six students in one room. It is almost impossible for a student to work his way through college, since there are so many men who have families and are out of work.

Hospitals have been broken down, and thousands of children have just enough food to be kept alive. In December Austria will be out of food stock and so far there has been no plan whereby food can be taken into the country. As a result of such conditions education in the old world is being neglected.

Since returning home, after spending the entire summer traveling through Europe inspecting the student situation, and the Y. W. work there, Miss Blanchard has with the aid of Mr. Herbert Hoover, organized the "European Student Relief Fund."

Before Miss Blanchard's address B. W. Cherrington, who had been talking to the Y. M. at the noon luncheon, gave a short lecture in which he advised the students to heed the counsel of their better selves, to get away from the selfishness of the average person of today, and to follow the example of the Carpenter of Galilee.

Bessie Lyman, '20, who is head of the English and home economics departments in the Baldwin high school, spent last week end in Manhattan as chaperon to a group of six girls who are attending the state Y. W. C. A. convention held here.

The Store Which Sells Gifts that Last

December Eleventh Mystifies Girls Who Turn Down Dates

This sign on the campus bulletin boards has mystified the Aggie students for the past week, and coeds who have been turning down dates in order to hold this date open will be relieved to know that they can now take on a man, provided, of course, he is young enough.

But ssh!—this is a secret, the Y. M. and Y. W. Christmas Kid Party is to be held December 11 and that's what you have been holding the date for, so there!

The Christmas party which is to be an all college mixer, is to be given in the big gym and will begin at 8 o'clock. The affair is under the direction of the Y. W. and Y. M. social committees of which Luella Morris and Herbert Moyer are chairmen.

So the boarding house lady's niece and the next door neighbor's nephew are coming into their full share of importance. For everybody in hunting some clothes that will make him look as though he had partaken of the Fountain of Youth, and it's not too early, you know, to get an option at least on some kid clothes for the party, so be looking ahead and don't forget December 11.

Dr. and Mrs. R. K. Nabours were dinner guests at the Phi Delta Tau house Thursday evening.

Ralph Muir, Belmont Rising, and Bruce Johnson drove to Salina Friday to attend the football game between Salina and St. John.

DEBATE RALLY STIRS UP PEP OF STUDENTS

(Concluded from page one)

Baker, Miss Margaret Russel, Dr. Helen Thompson, Dean J. T. Willard, and Professor O. H. Burns, gave the decision of 4-1 in favor of the negative team. The men on the team are H. R. Priestly, H. C. Collins, and J. J. Seeright.

Winners Given Cups

Herbert Moyer presented to the winning team the cup which is to be held by the Athenian team for one year and to be given permanently to the team that wins the inter-society debate for three consecutive years. Ray Watson then led the "gang" of some 500 persons in yells for the debate team and the football team.

Have Community Sing

After a little over an hour of play time the crowd were called together for a community sing and a few short speeches. Wheeler Barger who as student debate scholar coached the winning Athenian team, presided at the meeting.

Dr. A. A. Holtz, secretary of the Y. M. C. A., spoke first upon the subject "What Debate Has Meant to Me." Miss Grace Derby, of the library staff, spoke on the subject "Women's Part in Forensics." Doctor Hill, who is a member of the public speaking department this year, showed through "Reminiscences" what debate means in the friendship it fosters. Miss Christine Cool, president of Zeta Kappa Psi, honorary women's forensics, explained the purposes of the

three honorary forensic societies on the hill, Forum, Zeta Kappa Psi, and Pi Kappa Delta.

"The Athenian debate tonight which I understand was given by men who have never made a squad, could compete favorably with some of our inter-collegiate debaters," said Prof. W. E. Grimes who was a K debater while in college. What the squads are doing this year and something about the debate schedule were then told by Prof. O. H. Burns, college debate coach.

New Sigma Delta Chi Chapter

The Associated Journalists of the Oregon Agricultural college have been granted a charter in Sigma Delta Chi, national honorary journalistic fraternity, according to word received from Kenneth C. Hogate of the Detroit News, national secretary. K. S. A. C. and many other leading institutions of the country have chapters of Sigma Delta Chi. Prof. F. L. Snow, formerly assistant professor of industrial journalism at K. S. A. C., is head of the department of industrial journalism in the Oregon Agricultural college.

THE KANSAS STATE COLLEGLIAN

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, TUESDAY, NOVEMBER 30, 1920

NO. 22

ANNOUNCE POP STUNT NAMES FOR BIG NIGHT

SEVEN ORGANIZATIONS VIE FOR LOVING CUP

FRIDAY, DECEMBER 3 IS DATE

Proceeds of Evening Go to Y. W. C. A. —Mystery Enshrouds the Features of the Evening

Mystery being the elixir of life to the struggling journalist, needless to say the deep, dark secrecy wrapped around the preparation for Aggie Popularity night is causing the Kansas State Collegian no little anxiety.

Aggies Pop night, which is the great revel occasion of the year, takes place Friday, December 3. At that time seven organizations, chosen from a number who presented stunts to be given as part of this entertainment, will be shown. It is obvious then in view of the fact that the rivalry in the matter of placing was keener this year than it has been in a long time, that whoever wins the silver loving cup donated by the Y. W. will have worked hard for the award.

May Serve Lolly Pops

If lolly-pops are any relation to "Aggie-Pops" the Eurodelphian literary society will have all the freshman boys sitting on the front row, without a doubt for "Aggie Pops" is the name under which Eurodelphian historic ability will display itself on Friday night.

Just like a gypsy the Tri Deltas are wandering next Friday night under the picturesque name of "Gohela." It sounds funny, as if it might be one of those catchy things on which the unwary bite, but doubtless the Delta Delta Delta girls will charm their audience when they appear in "Gohela."

To Show House of Fame

In true Ionian fashion and because they have enough members of their society in the Aggie Who's Who to justify such an undertaking, the "House of Fame" will be opened to all who witness the Aggie Pop program. The Ionian stunt of this year will likely be a panoramic view of all the good Aggies who have gone to heaven. There is no more that is sayable at this time, due to the fact that too much information divulged might spoil the appreciation of the stunt.

The Chi Omegas, famous for their minstrelsy, will give a party on the stage for Cinderella and the infant in the forest, and Lord Fauntleroy. At any rate their stunt is scheduled as the "Story Book Ball." Of course it may mean some other kind of ball, like football or basket ball. Perhaps in justice to athletics the inhabitants of storybook-land are going to have a Missouri valley conference. Do you s'pose?

Press Club to Try Again

Members of the Press club have evidently all turned themselves into carpenters for the night for they are going to try their luck at cup-winning again this year, appearing in a stunt entitled "Nailing a Lie." According to a late dispatch from the headquarters of the Newsprint Distributors an issue of the Scandal Collegian is forbidden, due to newsprint shortages.

"The Aggie Girl" will be portrayed in all her glory by the Kappa Kappa Gamma sorority. It is hard to say whether she is going to be represented as May Fete queen or the ruler of an athletic throne. Without a doubt the "Aggie Girl" will be charming, interesting, effective and worthwhile. Isn't that enough adjectives to cover the "Aggie Girl" qualities whether she is really a girl or something entirely different, the name being used to throw us off the track?

Hold Railroad Convention

The railroad convention seems to be the theme around which the Alpha Delta PIs have worked out their act and it is pretty generally rumored about town that at least four would-be rulers will be in Manhattan Friday night. "When the Big Four Sup" will surely be an arrangement of entertainment which will have in it "sugar and spice and all things nice" for that's what the Alpha Deltas are made of.

December 11 which is a date covered with mystery hasn't a thing on the night of December 3, Aggie Pop night when the Main Walk, Cinder Circle and all the campus highways and byways will be jammed with folks hurrying to get a good seat to

REPORTER
Question asked: "What do you think of rolled hose?"
Person asked: Vic Blackledge, sophomore, industrial journalism.
Answer: "Rolled hose? Well, we have to have something Scotch since we can't have whiskey. My only objection is that they don't wear kilts!"
Dean Mary Pierce Van Zile: Turned her back on the Inquiring Reporter, went into her private office for five minutes. Returned. Looked us straight in the eye and said: "They are neither artistic nor comfortable."
Prof. H. W. Davis: "What I can see of them, they're all right!"

see an evening of snappy entertainment.

Given under the direction of the Y. W. C. A. the proceeds of the evening's entertainment go to that organization, which in turn awards to the winners a silver loving cup as recognition of their ability in presenting the cleverest stunt.

DECEMBER 8 IS IMPORTANT DATE

NOBUKA HARA TO HAVE LEAD IN "MADAME BUTTERFLY"

To Have Cast of More Than 100 Persons—Artists' Abilities Recognized Internationally

December 8, next week, will be red letter day in the "side life" of the student body of the Kansas State Agricultural college for that day will make possible the hearing of one of the finest opera companies of the modern stage.

The coming weeks will be filled with important college events but it is of particular importance that December 8 will be the date when the San Carlo company will appear at the college auditorium, giving "Madame Butterfly." All of the artists who will be here at that time are musicians of distinction whose ability is recognized internationally.

Nobuko Hara who will sing the leading role in the opera is a singer whose coming to Manhattan will be a rare treat. The large and discriminating audiences before which she has appeared all over the country and in Europe declare her to be a leading artist in the realm of art. "Madame Butterfly" has never been given in Manhattan before so the action of Professor Westbrook, head of the music department, who with the management of the Star Artists series has made possible the second engagement of the San Carlo company is one that should be appreciated by the student body.

Students and followers of music at this school and in this locality know from last year's experience that the San Carlo opera company is more than worth hearing. In addition to the leading artists who will sing in "Madame Butterfly" there will be a worthy body of musicians in the orchestra and there will be a chorus of well trained voices, making in all a cast of more than 100 persons.

SCENARIO READY FOR PRODUCTION

HAS STRICTLY MODERN FARM ENVIRONMENTS

To Have Special Chapel to Instruct Student Body on Camera Manners

Kansas Aggies' motion picture scenario, which is now completed and ready for production, has a strictly modern farm environment, mixed with college life and seasoned with "love's young dream." Although the play is designed to stimulate interest among farmers to attend Farm and Home week, it has a plot that for any purpose would make a charming scenario, as the following outline will show.

James Garvin, a country boy, receives a letter from his best girl telling him that she intends to visit K. S. A. C. during Farm and Home week, with her uncle and Miss Matilda. Miss Matilda is a prim old spinster with decided ideas, who keeps house for uncle Andy. Two mischievous cousins are to accompany the trio on their trip.

James then reads in the newspaper accounts of Farm and Home

week. These accounts awaken hideous dreams for James, dreams in which he sees his girl Mary surrounded by an admiring host at the college.

The real action of the show starts when Miss Matilda tries to hold Mary to the straight and narrow, and when the two kid cousins inject a little life into the entire crowd.

The management plans to call a special chapel this week at which the student body will be instructed just how to keep from looking at the camera or appearing flustered when the camera is pointed their way.

"DOING THINGS" IN ENGINEERING

REPUTATION FOR BEING ACTIVE TO BE SUSTAINED

Smoker To Be Given on December 9—Annual Hop Will Be Held Next Semester

On December 9 the engineers will have a smoker. The smoker will take the form of an engineering pep meeting and several stunts will be given. Speeches will be given and a program of interest to members of every division is being worked up. Although the smoker is to be given by the engineers all other students of the college are welcome and are urged to be present.

Plans for the affair have not yet been completed but a committee will be appointed to arrange for the program and refreshments and other things necessary for the occasion. In all probability the smoker will be given at the Community house.

The engineers have the reputation of "doing things" and believe in living up to their reputation. This event is not the only social affair which they will have during the school year, although it is the big event for this semester. Next semester the annual engineers' dance will be given which is one of the main social events of the year.

CLASSES LEARN TO KNOW APPLES OF OTHER STATES

Have Received 58 Varieties This Season—Four Boxes Arrive Last Week

The laboratory classes in systematic pomology in the horticulture department, are identifying the varieties of apples not only from Kansas but other states. The purpose is to make a study of the effect of climate and soil conditions on given varieties.

This past week boxes were received from four states: Illinois, Ohio, New Jersey, and Michigan. Boxes will come later from Washington, Massachusetts, and North Carolina.

These boxes are made up by the students in practical pomology. Each box contains five or six apples from each of 12 to 15 varieties. The apples are usually grown by the agricultural college of the state from which they are sent. K. S. A. C. used varieties from Doniphan and Leavenworth counties in making up their boxes to send out.

The students here have received 58 varieties so far this season. Reports show that 97 varieties were received last year and facts indicate that there will be that many before the season closes this fall.

Is State Golf Champion

Arthur L. Kahl, '11, recently won the Idaho state championship in golf, receiving a beautiful large loving cup. He also carried off honors of low score for the links, receiving a medal and a golf club.

Mr. Kahl is a successful civil engineer of Boise, Idaho. Mrs. Goldie (Eagles) Kahl, '11, spent the past summer visiting in the east, returning by way of Manhattan where she spent a week visiting the college and her many old friends. Their mail address is 1015 North Twenty-first street, Boise.

Aggie to Legislature

M. W. Sanderson, '98, of Cedarvale, was among the successful Republican candidates for the house of representatives at the last election. He will represent the 49th district, Chautauqua county Sanderson is a farmer and stock raiser and has been living at the present address since March, 1909. In a recent letter he reiterates his interest in the college and probably will pay K. S. A. C. a visit before the legislature opens.

Prof. L. E. Melchers and Prof. F. C. Gates will attend the meeting of the American association of advancement of science which is to be held in Chicago December 27 to January 1. Professor Melchers, and Professor Gates will give papers before the botanical sections.

FOURTH PLACE TO AGGIES AT CHICAGO

PURDUE UNIVERSITY WINS STOCK JUDGING CONTEST

COMPETITION FOR HONORS KEEN

Nebraska Finished Second—Twenty-Two Teams Took Part—Show Cattle Competition Held Monday

Chicago, Ill., Nov. 28.—Twenty-two teams in contest. Purdue first, Nebraska second, Iowa third, Kansas fourth. Will show cattle tomorrow. Competition never so keen. Wonderful show. Weather fine.—Telegram received from Dr. C. W. McCampbell.

The Kansas Aggie Stock Judging team finished fourth in the International Livestock show at Chicago Saturday evening. Competition for the honors was keener than ever before, according to a telegram which was received from Dr. C. W. McCampbell.

Purdue Wins Contest

Purdue university won the college stock judging contest at the show it was announced Saturday after the judges had tabulated the results. The Purdue team scored 3,796 points, which was 90 more than Nebraska, which finished second. Iowa finished third in the contest.

Oklahoma university took first place in individual judging, Forrester scoring 831 points against 816 for Mitchell of Purdue who was second.

Missouri Is Fourteenth

Texas Agricultural and Mechanical which finished first last year was ninth this year and Missouri finished in the fourteenth place.

Twenty-two teams took part in the stock judging contest this year which accounts for the keen competition. Show cattle competition took place on Monday.

ROYAL PURPLE IN GOOD SHAPE

NINETY PER CENT OF SENIORS PAY ASSESSMENT

Time Limit for Seniors Is December 4—Juniors Have Until the Eleventh

Work on the Royal Purple is coming on in good shape according to the information given out by the editor. There were 90 per cent of the seniors who had paid their assessments last Wednesday. Football pictures have been taken, and prints will be on display on the Royal Purple bulletin board to the left of the window opposite the post office.

The editor requests that the following points be carefully noted by all: Seniors must have their pictures in by the end of this week, December 4. Appointments can be made by calling Brown at 574.

Juniors started paying assessments Monday, November 29, and have until December 11 to get them paid, and one week longer in which to have their pictures taken.

Sophomores will start paying assessments December 6, and will have two weeks in which to pay.

TO ENCOURAGE FORENSIC ART

ORGANIZE MANY NEW ZETA KAPPA PSI CHAPTERS

National Officers Are Elected at Zeta Kappa Psi Convention Held Here November 19-20

The first biennial national convention of Zeta Kappa Psi, women's honorary forensic fraternity was held at the college, November 19 and 20, at which time plans were made whereby a greater interest in forensic work among the colleges and universities may be encouraged and attained to a higher degree. The main address was given by Lilla Day Monroe, president of the Women Lawyer's as-

sociation, on "The Apotheosis of Portia," dedicated to Zeta Kappa Psi, typifying the college-bred woman of the hour.

The growth of Zeta Kappa Psi is encouraging and it is thought that there will be many new chapters organized, as there are many petitions coming from the various colleges and universities. The Epsilon chapter of the Kansas State Normal was admitted. One other measure that was adopted by the convention was the establishment of interforensic relations with Pi Kappa Delta and Delta Sigma Rho.

National officers were elected at this time and are: grand president, Lilla Silvergard, Iowa State Teachers' college; grand secretary, Christine Cool, local president; grand treasurer, Ethel Wakefield, Oregon university; grand historian, Mary Stone, Iowa State Teachers' college; grand editor, Mary Polson, K. S. A. C.

Initiation services were held for Margaret Russell, Lilla Monroe, Dr. Helen B. Thompson, and Mildred Inskip. Delegates to this convention were Mary Stone, Cedar Falls, Iowa; Lois Hall, Eugene, Ore.; Iva Adams and Grace Owens, Emporia.

AGGIES HAVE A RIGHT TO BOAST

THEIR ALMA MATER HAS ACHIEVEMENTS IN MANY LINES

A List of Some of the Things K. S. A. C. Has Done Has Been Prepared by Journalism Department

Being a modest and conservative school the Kansas State Agricultural college seldom boasts. For this reason many Aggie students are not acquainted with the real achievements of their Alma Mater. The Journalism department has prepared a list of a few of the worth while things to remember about K. S. A. C.

The blackleg vaccine which has saved millions of dollars to the livestock interests of the United States was developed by the veterinary division of K. S. A. C.

Kansas wheat, developed here yields from three to five bushels to the acre more than any other winter variety.

The largest experimental farm in the world is maintained by the K. S. A. C. in the experimental station at Hays, where 4,000 acres are devoted to the study of various phases of agriculture under great plains conditions. Many scientists from foreign countries make pilgrimages to this station.

The exhibits which have won for Kansas four out of five contests (annually) opened by the International Soil Products exposition to all states and foreign countries and provinces, were prepared at this school.

Here the poisoned bait was developed which is used in destroying grasshoppers and other insects. It is now in use throughout the United States and also in Europe, and South America.

The winner of the all around athletic contest in the A. E. F. games was a graduate of the K. S. A. C.

General Pershing's chief of staff was a graduate from this college.

Weather reports by wireless directly from the station to the farmer, were first sent daily from K. S. A. C. All hard surface road materials for state roads are required by law to pass a test in laboratories of the engineering division.

Printing has been taught continuously since 1875.

Mechanical engineering has been taught for 56 years.

K. S. A. C. has the only experimental flour mill in the United States that is used for demonstration and experimental purposes.

K. S. A. C. has the only football team in the Missouri valley that has been able to hold Oklahoma, the title holders, to a tie.

NEWS OF "YOUR BOOK-1921" IS ALWAYS POSTED IN MAIN

Watson Hits on Clever Plan to Inform Seniors of Latest Royal Purple Dope

Atten-shun honorable seniors, get your chin out of the air long enough to read the bulletin board that your "annual" editor has placed in main hall to inform you of the latest news regarding "your book-1921."

Ray Watson decided that the seniors needed some place to get information about the class publication and hit on the bulletin board plan. Each day any news regarding Royal Purple Volume 12 is posted on this board. Watson is the first annual editor who has used the bulletin board to keep the seniors informed of the latest happenings.

ICHABODS TIE TURKEY GAME WITH AGGIES

OLD MAN DOPE IS BADLY UPSET THIS SEASON

SCORELESS TIE ENDS SEASON

Home Boys Play Hard Clean Game—Lack Scoring Punch Within Enemy's Twenty Yard Zone

Old man dope, who has suffered several bad spills during the last few weeks for the 1920 football season, was again upset in the Aggie-Washburn game on Thanksgiving day when the Ichabods played the home boys to a scoreless tie.

No dishonor attaches to the tie score for the Aggie team, for they played hard, clean football, but seemed to lack the scoring punch when within the enemy's 20 yard zone. Dewey Huston's educated toe, usually to be depended upon for points when other resources fail could not prevail against the Washburn gang. Dewey missed five tries at dropkicks, any one of which would have provided the necessary margin for a victory over the hard-fighting Ichabods, but none of which came close to the crossbar.

Numerous Injuries Inflicted

Several injuries were inflicted upon Aggie players in the first half, but none were forced to go out with the exception of Brady Cowell who received his first injury of the season when he made a flying tackle of Stevens, Washburn quarterback and captain. In the last half came the Washburn turn for hard knocks and several of the enemy warriors suffered injuries. The mighty Wycoff, hard plunging fullback who was the author of the majority of Washburn's gains in the first period was thrown heavily when clipped by an Aggie player running interference early in the second half, and was injured so that he was unable to do effective work in the remainder of the game, although the Washburn coach did not take him from the lineup.

Threaten Aggie Goal

The Ichabods threatened the Aggie goal early in the first quarter when Goerke fumbled and Cossman recovered on our 23 yard line. From here Wycoff bucked the ball to the Aggies' 5 yard line where the Ichabods were held for downs. They play was in the Aggie territory for the rest of the period but our goal was not seriously threatened, the play surging back and forth between the 20 and 40 yard line. Toward the end of the period Goerke intercepted a pass on the 37 yard line and the Aggies bucked through for a first down, but Goerke fumbled and lost the ball to Washburn in the middle of the field where it was at the end of the quarter.

In the second quarter came Huston's first try at a goal from the field after the Aggies had taken the ball on their own 29 yard line on a punt and Hinds had made a brilliant 20 yard dash to the middle of the field. On the fourth down with 7 yards to go for a first down Dewey dropped back to the 57 yard line and kicked a drop that lacked but a few feet of reaching the cross bar and that was his best effort of the day at drop kicking.

The ball was in Ichabod territory the rest of the period, and Dewey tried two more goals, one from the 41 yard line and one from the 49 yard line. One netted the Aggies a gain, as it went low and was touched by the Washburn safety and recovered by an Aggie.

Ichabods Open Aerial Game

In the third quarter the Ichabods opened up an aerial game. After Jemison's dash of 18 yards thru the Aggie team to the 30 yard line of the Wildcats, Stevens passed 13 yards to Jemison, placing the ball within the 20 yard zone. However, the Washburn backs were thrown for two losses in succession. On the fourth down Palmatier tried a drop kick from the 34 yard line that went wide by feet. During the remainder of the period the ball was never within either team's 30 yard line.

In the last frame both teams opened up with all they had, trying to score. It was a hectic 15 minutes of playing that resulted. The Ichabods seemingly tried every pass they had in their repertoire, and the Aggies tried out a line shift that Bachman has been working on, but that had never been used in a game before. At the start of the quarter Cowell passed 8 yards to Hinds from the Washburn 46 yard line, and Hinds ran the ball down to the Washburn

(Concluded on page six)

ARE AGGIES POOR SPORTS!

The football season is over and the basketball season will soon be upon us. It behooves us to watch ourselves that we may not lose our reputation for good sportsmanship in the Missouri valley.

Much unfavorable comment has been made of late because of the attitude taken by many Aggie rooters when the opposing team is penalized. A true sportsman never exhibits his glee over the fact that his opponent has been penalized or rejoices at the injury of a player. At the K. U. game it was especially noticeable that many rooters, led by the freshman yell leader, yelled when the Jayhawkers were penalized. We should all unite to stamp out this sort of spirit before the basketball season begins.

HONOR SYSTEM IS NEXT STEP

Cribbing at this institution has become a practice of alarming proportions. It has become so common that it gets no more consideration from the average student than an occasional "damn," would, coming from the mouth of a teamster.

One professor reports that fully 80 per cent of his students were cribbing during a recent examination. We all know that this condition exists even if it is not as bad as that particular case. Some students have but recently been expelled from school for this dishonest but nevertheless common practice.

There has been some adverse criticism for expelling these students who were caught when it is known that others have been "getting by" with the same thing. It was ever thus. Some get by and some do not. The greater the number that get caught the fewer that try to "get by."

If a student who is caught with the absolute proof is allowed to remain in school, how long would the standing of this college be upheld among other colleges in this country which absolutely refuse to permit cribbing. The man who is caught must go.

In the meantime it is well that we should be thinking about an honor system in which the instructor gives out the questions and leaves the room, leaving all up to the personal honor of the student. Only in this way is it possible to get an awakened public opinion among the students which will automatically wipe out this evil.

BEYOND THE HILL

Many of the colleges of the country have an annual sneak day of some kind on which all or most of the students cut classes for a good time. About the most unusual tradition of this kind, however, is the annual funk day of the faculty of Grinnell college. On this day all of the pedagogs of the college take a day off without the consent of the students.

The low class of work which is being done by the students of Ottawa university this semester has led the student council, by unanimous vote, to set aside Wednesday, Thursday, and Friday nights as closed nights from 6:30 o'clock on. Under this ruling no society of the college may have a meeting of any nature on these nights.

Men's student council, the Women's student council, and the Women's Varsity association of Ohio State university, have all passed resolutions condemning the practice of bumming to football games which are held away from the home school. Several university women as well as hundreds of men bummed their way to the recent Chicago-Ohio game at Chicago. Railroad officials have refused to grant any more special trains for the benefit of the students unless the practice of bumming is stopped.

Approximately 115 delegates from the high school papers of the state attended the conference for high school editors which was held at Lawrence under the direction of the journalism department. Governor Allen of the Wichita Beacon and Harry J. Haskell of the Kansas City Star were the guests of honor at the an-

nual fall dinner given during the conference.

Final tryouts for the Women's debate with Manhattan were held at the State Normal last week, according to the State Normal Bulletin. The question for the debate is, "That the United States should by appropriate legislation, exclude from immigration all persons who are ineligible for naturalization."

According to a recent ruling at Ottawa university, which is a Baptist school, there will be no student dances on the campus and no student may be allowed to attend dances of any sort without the written consent of parents or guardians. Failure to abide with the ruling automatically severs all connections between the student and the university.

The financial goal set by the Y. W. C. A. at Indiana university was \$3,200, or an average of \$3 a person for every one on the campus, men and women included.

The Scoop, annual dance of the school of journalism in the University of Missouri, will be held on the night of December 3, the night before the annual Press club dance which is to be given by the journalism students at this college, in recreation center.

Following the singing of the Alma Mater by the 700 students of Washington, who were attending the Piker-Tiger football game at Columbia, the Missouri band played the tune of Washington's Alma Mater in a wrong key and ended the piece in discord, and later in the afternoon repeated the performance. In contrast to this attitude the Washington students

stood with uncovered heads during the playing of Mizzou's Alma Mater.

All midshipmen in the naval academy at Annapolis who are found guilty of hazing will be expelled, regardless of the number implicated, according to a statement given out by Secretary Daniels. He said the United States was spending too much money on the naval academy to have the midshipmen disobeying the rules of the school.

Kimball Heads Club

Ferris G. Kimball is president of the college Wyandotte county club, just organized. The other officers are Esther Curtis, vice president, Margaret Falconer, secretary-treasurer, and H. J. Kapka, reporter. The club meets the first Tuesday in each month, has already had two hikes this fall and gave a line party at one of the local theaters last week. The members are: Agnes Aldridge, Neal D. Alleman, Randolph Anderson, Esther Curtis, Josephine Davis, Carl C. Dethloff, Margaret Falconer, Terrence O. Hendrick, Merle R. Henre, H. J. Kapka, Ferris G. Kimball, Thomas M. Larsew, L. Lauritson, A. E. Mathey, Reid Machir, L. E. Means, Norton C. Payne, Jeannette Pardee, G. S. Redman, C. R. Stout, Louise Schneider, W. C. Thruston, Tyra Thruston, John C. Wilkine, Frank Walbridge, Louisa Hanna, Elizabeth Mabie, Laura Fayman.

Coeds Ride The Rods

Few things seem to have a limit in this day and age, much less the extent to which the women try to carry feminine equality. But, wonder of wonders, the student council of the Ohio State university has at last discovered a place to top, and has recently put an energetic foot on feminine train bumming, by temporarily suspending five coeds for riding the rods to Chicago on a university special. Women may be able to do everything, but perhaps, just perhaps, there will eventually be some things that nobody will let them do.

Prof. E. C. Miller of the botany department has been ill for the last few weeks with a severe cold. He is improving and will continue his work this week.

The Willard Chemical society held its regular meeting Tuesday, November 23. Professor Tague of the experiment station gave a very interesting talk on "The Chemistry of Casein." A short discussion and business meeting followed. The next meeting will be December 21.

Prof. Albert Dickens and W. S. Wiedorn of the horticulture department made a trip to western Kansas last week in the investigation of landscape gardening conditions there. They will make more intensive studies in the vicinity of Hutchinson, and also in Pawnee Rock locality.

Miss Hildegard Kneeland, head of the food economics and nutrition department, left last Tuesday for Brooklyn, N. Y., where she was called by the death of her father. Miss Kneeland will return December 2.

The display of chrysanthemums at the greenhouse has been unusually good this year. But the season is passing, and the carnations are now taking their place.

W. S. Wiedorn has arrived to take up his work as instructor in landscape gardening. He is successor to A. M. Doerner, who was instructor here last year. Mr. Wiedorn finished his course at Cornell university and comes here from a commercial landscaping firm in Boston.

Leon Taylor of the class of 1915, visited at the Sigma Alpha Epsilon house Thursday evening.

George Maxey of the dairy department attended the Kansas Creamery Men's association at Kansas City last week.

Lost:—On evening of November 22, a raincoat in Marshall theater. Return to W. C. Wilson, Box 526, postoffice, phone 657. pd.

ANNOUNCEMENTS

Student directories are now on sale at the college postoffice for 10 cents a copy.

Women's Athletic association will hold its regular monthly meeting Thursday evening at 5 o'clock.

Junior class dues and Royal Purple assessments should be paid this week at the window opposite the postoffice.

Intramural basket ball games are played each evening at the gymnasium between the hours of 6 and 7:30 o'clock.

World Fellowship committee of the Y. W. C. A. will meet in the home economics rest room Thursday evening after Vespers.

"You and Your Father and Mother" is the subject of the discussion which is to be led by Effie Hendricks at Vespers Thursday evening at 5 o'clock.

H. H. Laude, in charge of the work in cooperative experiments with farmers, returned the first of last week from Cherokee county where he was harvesting corn plots and checking up on the experiments with tile drainage and fertility being conducted on the farm of O. A. Rhoads near Columbus. Mr. Laude says the work there this year was very successful.

ORIENTAL SINGER IS A CELEBRITY

**NOBUKO HARA IS FAMILIAR
WITH COURT LIFE**

**Japanese Prima Donna of San Carlo
Company Wears Unusual Cos-
tumes in Madame Butterfly**

Nobuko Hara, the little Japanese prima donna who will sing the part of Madame Butterfly when that opera is given here by the San Carlo Grand Opera company on December 8, is a real celebrity in her home country as well as in the United States and throughout Europe.

A niece of the prime minister of Japan, she is perfectly at home in the royal court and has belonged to the Imperial theatre for the past four years. For the past eight months she has been studying in New York with American instructors and her work before the New York and eastern audiences has been particularly successful.

The wonderful kimono which Nobuko Hara wears when she appears in Madame Butterfly is a creation of handsome brocaded silk crepe, royal purple in shade, hand embroidered in an intricate design of silk and gold threads, beautifully wrought. The crest of the Hara family, two diamond-shaped designs within a circle are embroidered in white silk in front and back of the garment and on the sleeves.

An ivory fan, inlaid in gold with attached cord in the court colors is carried by Nobuko Hara as she sings in Madame Butterfly. It is one of three such fans in existence, the second being owned by the wife of the lord mayor of London, and the third by the wife of the Japanese ambassador to the United States. They are made by the Japanese emperor's artist and a year's work is required to make a fan.

What is known to American girls as a vanity case is called an "hakoseko" in Japan, and the one worn by Nobuko Hara is of red silk, tucked in the bodice of her garments. Within it is a silver, two-pointed weapon, resembling a large hairpin, an article which was once carried by all Japanese girls as a weapon for safety.

"Madame Butterfly" was presented at the coliseum of the Texas Cotton Palace, Waco, Tex., on the night of November 6 before an audience of 11,000 persons, said to be the largest crowd that has ever gathered anywhere in the United States to hear grand opera. Such an attendance record can never be claimed by Manhattan but it is not unlikely that the college auditorium will be jammed on the night of December 8 to hear this great singer in one of the greatest operas of the day.

WILL STUDY IN NEW YORK SOON

**MISS GLANTON TO TAKE RETAIL
SALESMANSHIP COURSE**

**Course in Subject Will Be Introduced
at K. S. A. C. the Second
Semester**

"Women dominate in business" says Miss Glanton of the Clothing and Textiles department who will go to New York City December 3 to take a course in retail salesmanship at the New York university. Miss Glanton also plans to get some practical experience at Stern brothers on Forty Second street and Fifth avenue, one

of the biggest and best department stores in New York City.

"Women buy food, clothing—practically everything for the different members of the family and for the home. They not only buy, but sell; consequently they should take some training along this line," believes Miss Glanton.

"Several large institutions of learning have established training courses which lead to college degrees. In Harvard Graduate School of Business, a young woman with her bachelor's degree may secure a master's degree from Harvard university in retail selling. Similar courses have been established at Columbia, New York university, and the Carnegie Institute of Technology."

Miss Glanton believes that there is a wonderful field for clever western women, with their initiative and native ability, to make great strides in the business world. "The girls should not think they are losing out on social work if they are in business. It is as high a form of social work as preaching, teaching, or mission work from a social and Christian point of view."

Miss Glanton intends to return about the first of January and will give a course in retail salesmanship here the second semester.

WILL PROVE BEST METHOD OF FEEDING GROWING PIGS

**Several Experiments in Charge of H.
B. Winchester Are Being Worked
Out**

Several experiments in feeding investigations are being worked out by the animal husbandry department under the supervision of Prof. H. B. Winchester. One of the experiments is to determine whether the hand-feeding or self-feeding method is most desirable in feeding growing pigs for market.

The pigs in one pen are full hand fed and then allowed to run to self-feeders, while those in another pen are fed half rations and then given access to self-feeders. The results of the experiments up to date seem to indicate that from the standpoint of economy the pigs fed light rations from weaning time until eight months old, and given alfalfa pasture, make cheaper gains than if allowed free access to self-feeders.

A herd of 40 high grade Herfords is being used in feeding experiments to determine the effect of feeding a heavy ration of silage through the winter, on the next season's pasture gains.

Miss Mildred Wright spent Thanksgiving vacation at her home in Washington.

Miss Jane Reinhart of Ottawa spent Thanksgiving holidays the guest of her uncle, George Harkins at the Sigma Alpha Epsilon house.

Miss Katherine Gun, student secretary of the Y. W. C. A. at the University of Kansas attended a meeting of the Y. W. secretaries of the state held here November 20.

KAPPA SIGS AND SIG EPS WIN

**DEFEAT ACACIAS AND PI KAP'S
IN PAN-HELLENIC SERIES**

**Kappa Sig-Pi Kap Score Is 32-4—
Acacia-Sig Ep score Totals
18-12**

The Sig Eps and Kappa Sigs were victors in the first two games in the annual Pan-Hellenic basketball series that was staged at the Nichols gymnasium Monday evening, November 22. The two losing quintettes were the Acacias and the Pi Kaps.

The Kappa Sigma and Pi Kap game was more interesting than the score of 32-4 indicates. The Pi Kaps played a good floor game but were wild when it came to shooting for the basket. Chappell played a good game for the losers. Kykendall and Bradley played a stellar game for the Kappa Sigs, the latter giving a good exhibition of his scoring ability.

The Acacias lost to the Sig Eps by a score of 18-12. The victors had good team work but could not hit the basket consistently. The Acacias made a larger percentage of their tries for the basket good. At no time in the game was the result in doubt except at the beginning of the second half when the Acacias stung by the 12-4 lead that the "Cliff Dwellers" had gained during the first half, came back strong and scored eight points before the Sig Eps awakened to the fact that the

second half was in progress. Wol-gast and McWilliams were the stars for the losers while Webber and Field played well for the winners.

95 PERCENT OF COEDS ARE PARTLY SELF SUPPORTING

**Now 141 Girls Make All School Ex-
penses—Y. W. C. A. Supplies
Much of Work**

Girls of K. S. A. C. are to be commended for the spirit they show in seeking an education. Out of the 801 girls now enrolled in school, 141 are entirely self supporting and 95 are partially so. This makes a total of more than one fourth of the girls enrolled who are working to go to school.

The Y. W. C. A. supplies much of the work through the office. A list of girls wanting work, with the number of hours and the kind of work, is filed at the office and when a call comes for that particular kind of work, the girl is notified. This bureau is maintained through the summer, and girls may write and secure a place to work before school opens.

City Pan-Hellenic Meets

City Pan-Hellenic held the first meeting of the year in the home economics rest room Monday evening of this week. Dean Mary P. Van Zile gave a short talk, and Miss Katherine Kimmel sang. City Pan-Hellenic is composed of all women of the faculty, and all women in town who are members of a national fraternity. Mrs. R. R. Cave is president this year.

GIRLS TAKE TRIP TO KANSAS CITY

FOODS CLASSES VISIT PACKING HOUSE AND FACTORIES

Attend Schubert to Hear Mary Garden
—Trip is Annual Affair for Home Economics Girls

Foods II classes left Monday, November 22 for their annual trip to Kansas City. They have been studying packing house methods and their main purpose in going was to visit the packing house there. However they also visited many other interesting places.

The class began the series of visits on Monday at 10 o'clock, the National Biscuit company being their first stopping place. At 1 o'clock they went to H. D. Lee's Mercantile company. On Tuesday morning the girls went to the S. W. Milling company and to the factory of the Ridenour Baking company. Wednesday morning they visited the Armour company.

During their stay in Kansas City the girls attended the Schubert theatre where they heard Mary Garden.

Girls who made the trip were Ruth Gillis, Garnet Grover, Hazel Graves, Esther Curtis, Belle Hyde, Clara Howard, Mary Volle, Grace Lyness, Hazel Lyness, Orpha O'Neil, Gertrude Flowers, Edna Beckman, Jeanette Pardee, Marie Lomax, Florence Banker, Nellie Hord, Ruby Thomas, and Marian Clarke.

PEST HOUSE IS THING OF PAST

BUILDING IS REMODELED INTO MODERN HOSPITAL

By Keeping Cases of Contagion at Hospital Long Quarantines May Be Avoided

During the past summer the building which is occupied by the contagious disease hospital of the college was worked over and rebuilt. The building can no longer be termed "pest house." Everything except the walls of the building are now entirely new.

The building was repainted and refinished and rebuilt on the inside and ten new rooms added. The building now contains 16 rooms. Ten rooms have been refitted with hospital furnishings and the building is now equipped as well as any and better than some of the so called modern hospitals. The building is to be used as a hospital for all contagious disease cases.

The upper floor will be used for the girls and the lower floor will be used for the boys. Besides the five rooms on each floor which have been equipped for modern hospital rooms each floor has a room which contains all modern bathroom equipment. All the hospital fixtures are finished in white enamel.

If present plans materialize the hospital will be surrounded by a large porch. On the west of the building the porch will be two stories high and will be accessible from both the first and second floors.

In the future any student who is taken sick with a contagious disease may be taken to the hospital and there receive medical attention, the services of a trained nurse, and

board, at a minimum cost. In addition to this the student may if he so desires employ any physician he may choose and also the services of a special nurse, the same to be at his own expense.

As conditions now are when any contagious diseases breaks out in a sorority, fraternity or large rooming house it becomes necessary for other persons living in the house either to move out or miss considerable school while they are in quarantine. If the patient were removed to a hospital the quarantine would be lifted in short length of time.

ISSUE BULLETIN ON COOPERATION

DR. THEODORE MACKLIN FORMERLY OF K. S. A. C. IS AUTHOR

Can Get Bulletin Free from Director of Experiment Stations or Agricultural Economics Department

A bulletin which has just come from the press and which is proving unusually popular with everyone who has seen it is one issued by the department of agricultural economics entitled "Cooperation Applied to Marketing by Kansas Farmers."

The bulletin, which was written by Dr. Theodore Macklin formerly head of the department of agricultural economics at K. S. A. C., contains some 60 pages of information invaluable to anyone interested in the subject of cooperation as applied to marketing by farmers of Kansas.

Regarding the subject covered in the booklet, W. E. Grimes, present head of the department says, "There is no subject attracting more attention among farmers just now than is the marketing problem, and cooperation is one way of effecting the marketing of farm products. Most of the suggestions for improving marketing practices have involved the use of cooperative endeavor."

Anyone desiring a copy of the bulletin may secure one free by calling or writing the director of the experiment station or the department of agricultural economics.

Tubbs With Westinghouse

L. G. Tubbs, electrical engineer, '17, is directing his attention to the solution of special design problems with the engineering department of the Westinghouse Electric and Manufacturing company at East Pittsburgh. After being released from the service Tubbs entered the graduate student course at Westinghouse and after that had been completed was assigned to further mathematical training under the guidance of the chief engineer of the company. Tubbs has now completed this work and has been assigned to the industrial and railway motor engineering department.

GRIMES HONORED BY APPOINTMENT

IS MADE CHAIRMAN OF TEACHING COMMITTEE

Report of Work Will Be Given at an Association Meeting to Be Held at Washington

W. E. Grimes, head of the department of agricultural economics, has been appointed chairman of the teaching committee of the American Farm Economic association.

This association is composed of the men in teaching and investigation of an agricultural economic nature throughout the United States and Canada. The committee on teaching is appointed by the president of the association and serves for one year. Its duties are to assemble data pertaining to the teaching of agricultural economics, farm management, and other allied subjects in the various institutions throughout the United States.

The report of the committee will be made at the annual meeting of the association which will be held at Washington, D. C., from December 30 to January 1. Dr. Theodore Macklin, formerly head of the department of agricultural economics at K. S. A. C. is chairman of the committee on investigation of the organization.

ARE RECEIVING RESULTS OF TESTS CONDUCTED IN STATE

Corn and Sorghum Experiments Show Which Varieties Best Adapted to Various Soils

The department of cooperative experiments is receiving reports every day from the different counties in the state telling of the results of the department's corn and sorghum experiments. The department hopes to have the general results of these tests for this year available within a few weeks.

This kind of work has been carried on for several years. This year there were 91 cooperative corn experiments and 74 experiments with sorghums. From these tests it is determined which varieties are best adapted in the different counties. The varieties doing best over a period of years are then recommended to the farmers. On the basis of these continued variety tests the state has been divided into nine different corn growing sections and certain varieties are recommended for each of these localities.

Mr. and Mrs. E. H. Grandfield of Wichita spent Thanksgiving with Mrs. Grandfield's parents, Mr. and Mrs. G. H. Kiser. Mr. Grandfield was graduated from K. S. A. C. in 1911.

Post Office Boxes Add Mystery to the Lives of Students

There are thousands of mysteries, hair raising and otherwise, constantly in progress all over the world, but few of them have anything on the mysteries of the combinations to the college post office boxes. A student may think he has a clue to the mystery one day, but the next time he goes back he inevitably finds that every trace of the clue has vanished. The postal authorities themselves are powerless to aid him.

The student, in a hurry for his mail, usually walks jauntily up to his box, confident that having worked an hour on his combination the day before he can easily open it this time. He resurrects from somewhere a slip of paper containing the figures that he last concluded to be the combination, and sets to work. After 15 minutes of hard labor his enthusiasm begins to wane, and after the first half hour he comes to the conclusion that he must have last week's figures instead of the results of yesterday's investigations.

He accordingly starts to work on a new set of calculations, for he must have his mail. Perhaps after an hour's diligent and careful work he is able to pry open the door, and then, just as he is about to reach for the coveted letters, 10 chances to one he will discover that he has been working on the wrong box. He hasn't the heart to try again on his own, so he slinks off down the hall imagining that a hundred people are looking after him and branding him as a cheap crook.

G. W. Hamilton, who was graduated from mechanical engineering in '19, and has been engaged since graduation in the installation of heating and ventilating systems at Fort Worth, Tex., has accepted a position in the mechanical engineering department of the Santa Fe railroad. He will be located at Topeka.

Lulu May Zeller spent Thanksgiving holidays as the guest of Gladys Newton at her home in Kansas City, Mo.

Miss Evelyn Glenn is teaching in the grade schools at Medford, Okla.

Miss Nina Burgess, Miss Dale Backman, and Miss Ruth Lambertson spent Thanksgiving vacation in Topeka the guests of Miss Marion Benton.

Miss Sue Carmody spent Thanksgiving with her uncle, Patrick Carmody at his home in Junction City.

Miss Alice Marston spent the holiday vacation the guest of Miss Ruth Robinson, of Towanda.

Mrs. A. B. Lewis of Toledo, Ohio, who has been visiting Professor and Mrs. L. E. Melchers, 1801 Leavenworth, left last week for her home.

Miss Nita Richardson spent Thanksgiving holidays with Miss Berenice Spence at her home in Hanover.

Miss Elsie Knox spent Thanksgiving at her home in Leon.

CHART EXHIBITS WHEAT RECEIPTS

FARMERS SELL CROPS TO MEET DEBTS

Poor Credit System Forces Many to Dispose of Grain Sooner Than Is Necessary

The chart showing the car lot receipts of wheat in Kansas City which is being maintained by the department of agricultural economics on the second floor of Waters hall does not indicate that the farmers have been able to hold their wheat up to the present time.

October 25 was set as the date on which the farmers would begin to hold their wheat. The receipts of wheat in Kansas City since October 25 are approximately the same in amount as those received a year ago. It was expected that receipts would stay up for a short time though the farmers succeeded in keeping their wheat off of the market.

It is known that many farmers throughout the wheat belt are obliged to sell their wheat to meet their debts. Due to the car shortage, farmers have been unable to market a great deal of it.

The tightening of the credit situation has made it necessary for farmers to pay their notes at banks, and that as many of the store bills as possible be paid. To do this it has been necessary to sell wheat. This feature of the wheat situation alone may be sufficient to prevent wheat from accomplishing the desired results.

This emphasizes the need of adequate credit for farmers if they are to attempt anything of this magnitude. The present credit facilities are not adapted to such undertakings.

HONORARY FOR ALL DIVISIONS

ELECT PHI KAPPA PHI MEMBERS EVERY YEAR

Choose Upper Ten Per-Cent from Each Division—Highest Honor

There is but one honorary fraternity at K. S. A. C. that embraces all divisions. It is the national fraternity of Phi Kappa Phi. This fraternity's membership is elected each year from the upper 10 per cent of honor students in each division of the school.

To be elected to this is the highest honor an Aggie student may gain. Freshmen should know of this in order that they may look forward to gaining these honors with the same longing that the prospect of gaining an athletic "K" inspires. The character of this body is well shown by such faculty members as president W. M. Jardine and Dean R. A. Seaton.

The best part of it is that any student who is reasonably intelligent and willing to apply himself stands a 90 per cent chance of winning Phi Kappa Phi honors.

MAKE CHRISTMAS CARDS TO SEND HOME TO FOLKS

Advanced Design Class Will Exhibit Cards in Miss Everhardy's Room This Week

Christmas will soon be here. Only a month away now. So Miss Ever-

San Carlo Grand Opera Company presents

"Madam Butterfly"

December 8
8:30 p. m. in the

College Auditorium

Mail orders will be received up to Saturday, December 4. Ticket board will open 7:00 a. m. Saturday, December 4, at the Co-op Book Store in Aggieville and the Chamber of Commerce in Manhattan.

hardy has given her class in advanced design the problem of making Christmas cards to send to friends or the folks at home. Some very dainty cards have been made by the girls in this class.

The problem is one of proportion and spacing of original design, and of color harmony. The motif of the design is first worked out, then it is traced off on battleship linoleum. All the board is carved away leaving the design in relief.

A proof is then taken on bogus paper by means of a printing press. If it is satisfactory a print is made on brown paper and the design is painted in opaque paint. The envelopes for these cards are also made by the girls. These cards are on exhibit in Miss Everhardy's room.

HIGH HEELS ARE IN POOR TASTE

MARY PICKFORD AIRS VIEWS ON SUBJECT

At University of Wisconsin 98 Per Cent of Girls Wear Low Heels on Campus and Street

Do high heeled shoes belong in the college girl's wardrobe? Here's what Mary Pickford says about the subject:

"High heels are as artificial as the age which produced them. They had their origin during the reign of Louis XV, whose shoemakers took the idea from the popular conception of a Chinese lady's bound up foot. With the high heels came immense panned skirts, frightfully small waists, great towering powdered and stuffed coiffures, 'beauty patches,' paint and all the other follies of that day; of these, only the high heels have remained in respectable society, not forgetting the paint. There is no excuse for such heels forming part of the everyday costume of school girls, or of young women in the offices, shops, stores, or factories. High heels are as appropriate to the school room as full dress would be."

F. Marian Warner, of the University of Wisconsin, says that 98 per cent of the girls in the university wear low heels on the campus and street.

From the University of Chicago comes the statement that "the woman who wears French heels for business or schools displays a general lack of good taste throughout her appearance. Her hair is likely to be frizzy, her shirtwaist and stockings too thin, and her clothes too conspicuously colored. The women of the university who are elegantly dressed wear street shoes with moderately low, straight lined heels, without the Cuban slant. Their shoes are plain and well made, and fit in quietly and smartly with the general tone of their appearance."

Have Membership Campaign

The American Association of Engineers are making a campaign to secure additional members. The fees for membership are \$3 but \$2 of the fees are used by the local chapter and the other dollar goes to headquarters. The \$3 not only covers the fees to the association but also secures subscription to the K. S. A. C. Engineer for the remainder of the year.

MAY JUDGE AND PLAY TOGETHER

AGS PLAN EVENTS FOR SAME DATE

Stock Judging Contest for High Schools May Be at Time of Athletic Meet

Plans are being made by the division of agriculture to hold an annual stock judging contest here for high school teams at the time when the high school athletic meets are held at K. S. A. C.

The plans which are now being formulated will include stock judging, and grain judging. A committee including C. W. McCampbell, head of the animal husbandry department, J. B. Fitch, head of the dairy department, and L. E. Call, head of the agronomy department, has been appointed by Dean F. D. Farrell, to help C. V. Williams, state director of vocational education, in developing the necessary plans for this contest.

There are now about 50 high schools in Kansas teaching vocational agriculture under the supervision of Mr. Williams, and in addition to these there are a large number of other high schools teaching agriculture which have not yet come under the direction of the state board of vocational education.

KAPPA DELTA TO INSTALL CHAPTER

IOTA PSI GRANTED NATIONAL CHARTER

Fraternity Was Founded in Virginia State College 1897—Has 29 Active Groups

Iota Psi local sorority has been granted a charter of Kappa Delta national women's fraternity and are to be installed December 2, 3, and 4.

Kappa Delta was founded at Virginia State college in 1897 and has been strictly a southern fraternity until the last few years. There are 29 active chapters, ten inactive, and 18 alumnae chapters.

Mrs. J. B. Fitch is a Kappa Delta from Wyoming, and Miss Emily Anderson is a member from the Wyoming university.

Iota Psi members are Irene Graham, Pearl Hoots, Luella Morris, Marian Brookover, Marian Chandler, Kathleen Knittle, Orpha Maust, Vera McClelland, Katharine McQuillen, Esther Waugh, Claramary Smith, Dora Dakin, Amy Lemert, Margaret Shrader, Mary Fitzgerald, Marie Kent, Maurine Ames, Helen Bentley, Carol Knostman, Edith Miller.

Pledges are Betty Coulter, Alyce Carter, Gladys Gritz, Bertha Falconer, Ruby Pruitt, Fern Humphrey. Faculty members are Mrs. Vera McCoy Holtz, Miss Berenice Fuller, Miss Grace Hesse, Mrs. C. W. McCampbell, Mrs. J. B. Fitch, and Miss Emily Anderson.

Miss Winifred Neusbaum is employed this winter as an instructor in the department of home economics in the University of Wisconsin.

SOCIETY

Boys of the Phi Delta Tau fraternity who spent the Thanksgiving holidays in Manhattan gave a dance at the chapter house Friday evening.

Members of the Delta Zeta sorority in town for Thanksgiving entertained with a dancing party Friday evening at the chapter house. Twelve couples were present. Mrs. David Bice chaperoned.

An informal dancing party was given Friday night at the Phi Delta Tau house by the members of the fraternity who spent Thanksgiving week end in Manhattan. During the evening 20 couples danced.

Foreign students of the college gave a Thanksgiving dinner at the home of Mrs. M. S. Taylor, 1019 Osage street. The dinner was served in two courses, with special dish of rice cooked by the Chinese boys. The evening was spent in telling of customs in South Africa and the Orient.

Thanksgiving dinner at the Delta Tau Delta house was enjoyed on Friday evening instead of on Thanksgiving evening due to the fact that several of the men who were spending the holiday week end in town played in the Washburn game. At 7 o'clock 10 guests sat down at a beautifully decorated table at which Mrs. Bessie Birdsall, Delta Tau house mother, presided.

Miss Ruth Eppler and Mr. Reiner Kegie were married Thursday night, November 18 at the home of the bride at Ellis. Last year Mrs. Kegie taught the sixth grade at the Blumont school in Manhattan. She is a member of the Pi Beta Phi sorority. Mr. Kegie was a freshman in college last year and a pledge of the Sigma Alpha Epsilon fraternity. Mr. and Mrs. Kegie will make their home at Ellis.

Kappa Sigma members who remained in Manhattan during the vacation were entertained with a turkey dinner Thanksgiving day. Those present were Mrs. Jennie Bassler, Miss Velma Meserve, Miss Maurine Ames, Miss Helen Kuykendall, Miss Clementine Paddelford, Mr. Louis

Combs, Mr. Dudley Bentley, Mr. Charles Kuykendall, Mr. Lloyd Zimmerman, Mr. Leland Woodward, Mr. Harry E. Newton, and Mr. Ralph W. White. The afternoon was spent in dancing.

Miss Ruth Murphey and Mr. Walter Emch were married Thanksgiving day, at the home of the bride, by Rev. J. M. McClelland. The bride is the youngest daughter of Mr. and Mrs. Thomas Murphey, and the groom is the son of Dr. Emch, professor of mathematics at the University of Illinois, and grandson of J. D. Walters of K. S. A. C. After the ceremony, a Thanksgiving dinner was served by Mrs. Murphey. Mr. and Mrs. Emch left for Bartlesville, Okla., where Mr. Emch, who was graduated from the Illinois university as a civil engineer, will be employed with the Empire Oil and Gas company.

Iota Psi sorority gave a formal dinner at the Gillett hotel November 22. The tables were arranged in the form of a delta, and were decorated in green and white, with center pieces of white roses and smilax. Miss Claramary Smith was toastmistress, and after the introduction, a dance

was given by two little girls. One was representing a rose and the other a freesia. During the dance the freesia uncovered a Kappa Delta pin and then disappeared, leaving the rose, the Kappa Delta flower. Miss Luella Morris gave, Farewell to Iota Psi; Mrs. J. B. Fitch, Welcome to Kappa Delta; Vera McClelland, Welcome Kappa Delta; Hortense Caton, Greeting from the Sororites; Clifford Knisley, Greetings from the Fraternities; and Dean Van Zile gave a toast. Guests were Pres. and Mrs. W. M. Jardine, Dean Mary P. Van Zile, Prof. and Mrs. J. B. Fitch, Dr. and Mrs. A. A. Holtz, Prof. and Mrs. C. W. McCampbell, Mrs. Ned Kimball, Mrs. Baldwin, Mrs. L. E. Conrad, and Miss Emily Anderson. The presidents of all the sororities and fraternities were there.

Mr. William Reynolds spent the vacation at his home in St. Louis, Mo. The student health department would be glad to have the students visit the college hospital while it is now empty. The hospital was entirely rebuilt this summer and is now equipped as well as most modern hospitals.

ELECT FRESHIES TO COMMISSION

WILL BEGIN SIX WEEKS COURSE OF STUDY

Girls Are Chosen on Faculty Recommendation—Must Show Superior Qualities

A mixer was given Tuesday evening, November 23, for the freshman girls who were chosen recently as members of the Y. W. commission. Miss Marla Seiber gave the welcome to the girls, Miss Agnes Ayres spoke on "What the Freshman Commission Meant to Me Last Year," Miss Irene Dean on "What the Y. W. Expects of Me," and Dean Van Zile on "What the Faculty Expects of Me."

Miss Mildred Lauder of the home economics department was chosen faculty advisor, and Miss Clara Evans, a junior in home economics, assistant. Miss Irene Graham is in charge of the Y. W. freshman commission. The girls will begin at once a six weeks' course in Y. W. work.

Through this commission the girls are brought more closely together, and are encouraged to take an interest in college activities. They are chosen on faculty recommendation, and must show superior qualities of initiative and leadership, and must have a high scholastic standing.

The new members of the Freshman commission are, Marle Correll, Frances Dawley, Polly Hedges, Florence Barnhisel, Betty McColin, Sarah Morris, Mary Ellen Henderson, Margaret Raffington, Alice Updegraff, Lenore Berry, Susan Carmody, Mabel Cooper, Helen Van Gilder, Leota John, Penelope Burtis, Inez Drake, Marguerite Brooks, Laura Fayman, Marjorie Uhley, Lucille Kinnaman, Dorothy Lukert, Alma Hollowell, Lois Clark, June Harter, Gretchen Bolland, Alvareta Heaton, Helen VanQuist, Louise Hannah, Julia Caton, Melba Stratton, Tyra Thurston, Geraldine Hull, Louise Snyder, Roxie Meyer, Zoe O'Leary, Dora Riddell, Alice Marston, Nina Uglow, Gladys James, Grace Steininger, Mildred Bobb, Gladys Walters, Emma Wagner, Bernice Jarvis, Meryl Divilbiss, Frances Lonnburg, Helen Hutchins, Gladys Gritz, Lois Holderbaum, Florence True, Fern Humphreys, Mildred Wright, Dorothy Knittle, Louise Mowry, Elsa Lear, Isla Falkenstein, Vida Zabel, Florence McKinney, Edna Romick, and Maude Irene Whitehead.

KNOW HUMANICS WITH MECHANICS

F. H. RINDGE, JR., TALKS TO ENGINEERS

Technical Knowledge Alone Is Not Enough Backing to Bring Success

A special engineering seminar was called on Monday, November 22, in order that the engineers might have an opportunity to hear Fred R. Rindge, Jr., of the industrial department of the Young Men's Christian association. His address was upon "Human Engineering."

He emphasized the fact that an essential part of an engineering education was a knowledge of the humanics as well as the mechanics of engineering. He said "The success of an engineer will depend not only upon the technical knowledge acquired in the classroom but also upon the knowledge of the handling of men. The real test in industry today is to get the working men educated and to get the educated men to work."

"This knowledge of humanics may

be partially acquired while in college by talking with men of real practical experience and by getting into personal contact with working men and trying to help them in the way of education and citizenship, and at the same time trying to learn their viewpoint and their opinions."

Mr. Rindge gave the engineers a new vision of the possibilities in the social as well as the industrial side of engineering. His viewpoint was given with an idea as to the conditions as they exist in the city of Manhattan, for although he had been in town only a few hours he had interviewed a section foreman, several section hands and other laborers.

WHO WANTS TO MAKE W. A. A.?

PEP AND 50 POINTS ARE NECESSARY FOR MEMBERSHIP

Apply to Grace Turner, Secretary of Organization If Interested in Work

Coeds, do you know that 50 points and a little pep make you eligible to membership in the Women's Athletic association? If you make a class team in hockey, basketball, baseball or track, those 50 points are yours, and if you make the varsity team you have 25 more points to your credit. Perfect attendance gives you 15 points, a red cap in swimming 25 points and a blue cap 50 points. Every 30 mile hike adds 10 points to your list, and if you like dancing, either folk or interpretive, you may make 15 more by passing a dancing test before judges.

Any girl who has 50 points, and desires to become a member of the association may write to Grace Turner, secretary of W. A. A. for an application blank. This blank must be filled out by the applicant and returned before the first Thursday in the month, when the name will be submitted to the association to be voted upon.

Only 175 points means a K pin, and the ambitious coed who has 400 points is awarded a K sweater.

The association is now planning to give an all W. A. A. party in honor of the girls who played on the hockey teams this fall.

ANIMAL HUSBANDRY MEN OFF TO INTERNATIONAL

Paterson to Have Charge of Sheep Exhibits—Aubel in Charge of Cattle

Among the members of the animal husbandry department who left the first part of the week for Chicago to attend the International Livestock show are Dr. C. W. McCampbell, head of the department, Prof. A. M. Paterson, Prof. C. E. Aubel, Prof. F. W. Bell and Prof. H. B. Winchester.

Professor Paterson will have charge of the cattle exhibits at the show. Doctor McCampbell and Professor Winchester will attend the annual meeting of the American Society of Animal Production which will be in session on Friday and Saturday preceding the International. Both are on the program. Doctor McCampbell will address the society on "The Effects of Early Calving on Subsequent Calf Crops" based on experiments carried out at the Hays Experiment station. Professor Winchester will speak on "The Value of Grain Sorghums as a Substitute for Corn in Meat Production."

On Saturday evening, Doctor McCampbell will preside at the annual banquet of the National Association of State Livestock Registry Boards, of which he has been president for the last five years. Members from 36 states are included in the association.

QUILL ELECTS NEW MEMBERS

SEVEN STUDENTS VOTED INTO CLUB

Initiation to be Held Second Monday in December—Next Contest in Spring

Quill club announces the names of the winners in the contest that closed November 1. Those selected by the judges as having shown sufficient literary talent to warrant membership in this society are Morse Salisbury, sophomore in journalism; Edward Shaffer, and Victor Blackledge, sophomores in journalism; Paul Barber, senior in general science; George Gemmell of the extension department, Marvin Jordan, freshman in journalism, and Josephine Hemphill, sophomore in journalism.

The Quill club is open to every student at K. S. A. C. Some seem to think that the only ones eligible are those of the journalism department, but there are many members of the club who are not professional pushers of the pen in the monacle department.

This year for some reason or other there was not as much interest shown as usual. There were only about 12 manuscripts turned in to the judges. Quill contest opens again the first part of next term and every one who is interested is urged to try. Initiation will be held at the next regular meeting night, the second Monday in December.

TO HOLD FARM AND HOME WEEK

SIX ASSOCIATIONS WILL MEET AT THAT TIME

Extension Department Planning to Secure Lower Rates—Several Special Days Arranged for

The extension department is planning to secure special rates of 1-3 cent fare for the Farm and Home week to be held at the Kansas State

Agricultural college February 7-12.

At this time there will be six associations holding their annual meetings here. These are Kansas Crop Improvement, Kansas State Dairy, Duro Jersey Breeders, Kansas Horse Breeders, Kansas Shorthorn Breeders, and Kansas Sheep Breeders.

Aside from these association meetings, special short courses in horticulture, potato growing, entomology, rural organization, home economics, rural engineering, cream station operators and beekeeping will be given, thus assuring the farmer of hearing the best in his or her line.

The program has arranged for several special days. Tuesday, February 8, has been designated as Engineering day; Wednesday, February 9, Farm Bureau day; and Thursday, February 10 as Newspaper day.

A new plan for "Newspaper day" which has proved successful in other states, will be carried out at this time. A prize of \$25 has been offered by the division of college extension, under whose auspices the Farm and Home week is conducted, to the Kansas newspaper which has the best front page make-up. One story must be of Farm and Home week. Judges from outside of the state are to render the decision.

Among the prominent speakers who will be here are Herbert Hoover; Prof. Briston Adams, professor of journalism and editor of publications at Cornell university; J. B. Davidson, head of the department of agricultural engineering, Ames, Iowa; A. A. Elmore, president of farmers' union for Washington and Oregon; Pres. W. R. Howard of the National Farm bureau; E. R. Root, vice president of A. I. Root Company, and editor of "Gleanings in Bee Culture"; F. M. Paddock, professor of apiculture, Ames, Iowa; C. R. Dandant, Hamilton, Ill., editor of the American Bee Journal; E. G. Le Sturgeon, San Antonio, Tex., president of the American Honey Producers' league; W. A. Bittenbender, professor of poultry, Ames, Iowa.

The annual banquet will be held Thursday of that week. A large crowd is expected since counties are competing to raise the attendance. Programs containing detailed information are now in the press. As soon as they are finished they will be sent out over the state.

ICHABODS TIE TURKEY GAME WITH AGGIES

(Concluded from page one)

17 yard line in a dash that had the crowd on its feet. After a try at an end run that had no results, Hinds passed a short one 5 yards to Cowell, but the Blacksmith fumbled and an Ichabod recovered.

Dewey Huston again tried a goal from the 50 yard line and again missed. Then the Ichabods opened up with passes, completing 2 out of 4 attempts for substantial gains. However, Blacksmith Cowell intercepted a pass on his 20 yard line and ran it back 33 yards for the longest dash of the game. Once more Dewey Huston tried a drop but it never passed the line of scrimmage, hurtling into the line and being recovered by an Aggie man for a first down. For the few remaining minutes of the game the leather was up and down between the 40 yard lines of the opposing teams.

Despite the unexpected result of the contest the players and coaches were rather jovial over the end of the grind and could be seen breaking training by putting on a stogie or a fag in the hotel lobby or waiting for the train that carried them back to Manhattan Thursday night. And thus endeth the 1920 football season.

San Carlo Grand Opera Company presents

"Madam Butterfly"

December 8 8:30 p. m., in the

College Auditorium

Mail orders will be received up to Saturday December 4. Ticket board will open 7:00 a. m. Saturday, December 4, at the Co-op Book Store in Aggieville and the Chamber of Commerce in Manhattan.

In order that they may be of greater service to the students and faculty of the college

The Art Craft

announces that

CHAS. C. McPHERSON

Has been appointed special representative to handle all college work.

He will call at any time, show samples, take orders, submit proof and deliver the work when completed. This additional service is at no extra cost to you.

THE KANSAS STATE COLLEGIAN

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, TUESDAY, DECEMBER 3, 1920

NO. 23

U. S. FREEDOM OF DRESS HAS JAP'S PRAISE

NOBUKA HARA SPENDS WEEK IN MANHATTAN

COUSIN IS WITH HER ON TOUR

Resents California's Attitude Toward Japanese Question—Wants to Attend Aggie Pop

"I like the United States. I like New York but I do not like touring. It is too hard. I have to do everything myself!" said Miss Nobuko Hara, Japanese prima donna who will sing the leading role in "Madam Butterfly" next Wednesday night when that opera will be given at the college auditorium. Miss Hara reached Manhattan Monday, several days before she was expected.

Gracious and charming and far more approachable than most American celebrities Miss Hara talked to visitors Thursday afternoon and expressed the keenest interest in the Kansas State Agricultural college. Having gone to what is known as a coed school in Japan, Miss Hara said that boys and girls recite their lessons in the same rooms but sit in different parts of the room. They cannot converse with each other.

Like American Freedom

"I like American freedom," Miss Hara said. "I do not wish to return to Japan. Here you can do as you like. You can wear what you wish. There one must be dressed up."

Questioned concerning the California land law bill Miss Hara would make no statement except that it is her opinion that American sentiment is not expressed by California's action. Miss Hara believes that the "real United States knows that the California Jap represents in nearly all cases, the lower class of Japanese, and that he cannot in fairness be considered as typical of the Japanese citizen."

"We do not associate with them here," Miss Hara said. "We do not associate with them at home. They are uneducated and all they come to the United States for is to make money. The United States is regarded as the land of freedom. That is why they come."

Miss Hara wore an American costume of brown duvetyne embroidered in brown-orange braid. When asked concerning her native costume she declared that she likes American clothing best. In every way Miss Hara seems to be proud of her American "adoption."

Likes Newspapers Here

In manner she is shy and retiring, declaring that she "speaks English poorly." She enjoys American newspapers but "sometimes the jumble of them bothers her." The recent attacks against her native country by the Pacific press made a very deep hurt but she is generous to remember it is not the expression of the "real United States."

Miss Hara came to this country to visit her cousin, Yasu Kiyosumi, a ballet dancer who accompanies her on this western tour. It happened that she was heard singing one of the selections from "Madam Butterfly" and was immediately secured by the San Carlo company.

She likes American girls and with her cousin expressed the hope that she would meet some college girls. That the natural qualities of every American are kindness and ability to do things is Miss Hara's opinion. She says that of late Japanese women have become more energetic and are in a small way coming to take part in public life but that the great number of gentlemen stay within the home.

When told about the Aggie Pop night performance which is given annually at this school the two Japanese girls exclaimed:

"That sounds so interesting! Like Vaudeville! I would like so much to see it!"

Proof is given that the truly great folks are always the easiest to approach and they will talk without having to have things coaxed out of them.

Kansas Author's Club Elects

Four more Aggie people, Miss Izil Poison, Miss Sue Carmody, Prof. E. T. Keith, and Milton Eisenhower have been recently elected to the Kansas Author's club. There are more members belonging to the club from the Kansas State Agricultural college than from any other school in the state.

Symbol Thief Leaves Giant Footprint on Sorority Porch Roof

Where did it go, and how did they get it?

That is the question every member of the Delta Zeta sorority is asking herself and each of her sisters. For Saturday night the Zeta symbol was taken from the chapter house, the thief leaving nothing but a footprint and a large portion of the Delta Zeta lawn on the porch roof. And the girls say that although they can get another symbol, it is late in the year to plant a lawn, and there will doubtless be large grassless spaces in the turf next spring, marking the spots where the thief stepped.

There is seemingly no clue as to the identity of the symbol seekers, but now all the Delta Zetas are going around with their eyes to the ground. And it is not merely because of their bereavement—they are looking closely at the feet of the folks they meet. When they see what they are sure are the largest feet in college they will know that they have the thief spotted.

FRESHIES MAKE GOOD SHOWING

TWENTY FOUR YEARLINGS PLAY WHOLE SEASON

Reward Men With Trip to Topeka Thanksgiving Day—Good Material for 1921 Varsity

With the closing of the 1920 football season, attention is directed to the freshman team, that band of yearling athletes that goes out all football season to be mauled by the varsity in preparation for the big games and leaves the field at the last practice of the season without a word of praise or glory from anyone besides the coach of the freshman squad. This year there were some 24 freshman that stuck the whole season through, getting as a final reward a trip to Topeka to see the Washburn game.

Of the number there are several that showed stuff that will place them on the varsity before they are through school. At end positions Hopper and Kollar displayed ability of more than ordinary caliber. In the tackle to tackle lineup, Patterson and Nichols and Webber at center all played sterling games. Webber is a trifle light for varsity center, but should make good end material, as he is rangy and tall. Nichols at tackle was the outstanding player in the freshman line.

In the backfield Stark played quarter and left half, Swartz at half, and Jenkins and Marsh at fullback. Swartz played with Emporia Normal last year and made a good record with the teachers. He is light, but slippery as the proverbial eel. Jenkins is a man who can kick, pass, or run and will make an admirable "triple threat" addition to the varsity backs.

PROFESSOR CALL IS NAMED ON AGRONOMIC COMMITTEE

Plan is to Improve Instruction—Illinois and Cornell Cooperate With Call

L. E. Call, professor of agronomy, has just been named by the president of the American Society of Agronomy as chairman of a committee on teaching agronomy subjects. The other members of the committee are Prof. W. L. Burlison, head of the agronomy department at the University of Illinois, and Prof. H. O. Buckman, professor of soils at Cornell university.

This committee plans to continue the work along the line of improving the methods of teaching agronomic subjects and will present a report at the next annual meeting of the American Society of Agronomy to be held at New Orleans in November, 1921.

Professor Call read a paper on the subject "Teaching Agronomic Subjects" at the last annual meeting held at Springfield, Mass.

COEDS CARRY CHRISTMAS CHEER TO OLD AND YOUNG

Gifts to Be Given to Every Member of Odd Fellows Home

The social service committee of the Y. W. C. A. cooperating with the Dorcas class of the Presbyterian Sunday school will give a Christmas party for all the members of the Odd Fellows home some time during the week before the holidays.

There are 63 old people and 55

children at the Home now, and the girls are planning to have gifts for everyone. Each member of the Sunday school class, which is composed of college girls, is expected to furnish a practical gift, costing not less than 50 cents nor more than \$1, and also to have a friend provide one gift.

There will be either a Christmas tree or a fireplace, and Santa Claus will arrive in time to distribute the presents and the treats. After a program which will be entertaining for both old and young, there will be a play hour for the children.

PRESS CLUB WILL GIVE PARTY SATURDAY EVENING

Upper Classmen to Entertain New Journalism Students—First Party to Be Given by Organization

The Aggie Press club party will be held Saturday evening, December 4, in Recreation center. It is given by the upperclassmen of the club for the new students in the journalism department. Considerable secrecy surrounds the "feature" of the party.

The special invited guests are Pres. and Mrs. W. M. Jardine, the deans and their wives, members of the faculty who have shown especial interest in the journalism department and representatives from the classes in college.

This is the first party ever given by the Aggie Press club and consequently great interest is shown by all the students.

TO CHOOSE MEN FOR AMES DEBATING SQUAD THIS WEEK

Date for Contest Is Set Ahead to January 15—Twelve Men on Squad

The Ames debating team is to be picked this week end according to O. H. Burns, debate coach. During the past week the squad has met every day with a few private interviews for good measure in order that Coach Burns may be able to determine who the best men are in the squad.

Professor Burns did not intend to pick the team until just before Christmas vacation but the Ames debate has been set ahead, and will take place January 15.

"There are 12 men working on the squad now which makes competition keen and gives a good chance to pick two winning teams," said Coach Burns this morning.

Give Studio Recital

Miss Smith's piano students gave a studio recital Saturday afternoon, November 20. Those playing were Miss Berenice Hedge, Miss Helen Wagenseller, Miss Mildred Halstead, Miss Alice Rice, Miss Mabel Murphy, Miss Elizabeth Fraser, Miss Mildred Thornburn, and John Elliot.

Mr. E. J. Guilbert of Wallace, visited his son H. R. Guilbert, at the Sigma Alpha Epsilon house, Sunday.

TALBERT TO HAVE CHARGE OF FARM AND HOME WEEK

The man immediately responsible for the added pep and dash in Farm and Home week this year is its new superintendent, T. J. Talbert. Mr. Talbert is a new man in the extension division, who came to K. S. A. C. last year from the University of California where he held the position of associate professor of pomology.

Mr. Talbert has a long list of successfully conducted agriculture enterprises to his credit. Among these are associate professor of horticulture, University of Missouri, assistant observer U. S. weather bureau, Memphis, Tenn., extension entomologist, Kansas State Agricultural college, executive secretary of Missouri division U. S. food administration.

T. J. TALBERT

WEDNESDAY IS TAG DAY FOR HOUSE FUNDS

EFFIE HENDRICKS CHAIRMAN K. S. A. C. COMMITTEE

EXPLAIN PURPOSE AT CHAPEL

Seven Teams Work Under Captains—Sell Tags for Ten Cents—Will Canvass All Buildings

Wednesday, December 8, will be tag day for the housing campaign which is being supported by the girl students of this school, in connection with the program instituted by the Kansas Council of Women. The tag day is to secure funds for a publicity campaign to get legislative appropriations for the construction of girls' dormitories at the various state institutions.

Miss Effie Hendricks, who is the chairman of the committee of K. S. A. C. girls working for this cause, has named the committee in charge of the tag day sales.

Explain Work at Chapel

The general assembly next Wednesday morning will be turned over to the local committee. The purpose of the tag day, and why the local student body is being called upon to help will be explained at this time.

Tags will cost but 10 cents and it is not believed that any student will turn down the appeal to help a movement which means better living quarters for girl students of this school. The establishment of this housing program means better homes for freshmen girls at least. With the securing of additional appropriations more dormitories will be added to the local campus and at other schools.

Team Chairmen Chosen

Team chairmen for the tag day are Jeanne Evans, Ruth Peck, Bly Ewalt, Susan Carmody, Bertha Butler, Gladys Bushong, and Faith Martin. They will appoint their teams who will work with them on Wednesday selling the tags to the students.

The main hall will be the center of the tag sales but girls will be assigned to department buildings to sell tickets for the cause. The sale of tags will begin immediately after the general assembly program Wednesday morning and will continue until the campus has been thoroughly canvassed.

FOUR FRAT'S AT TOP IN CONTEST

DELTA TAUS HOLDING THEIR OWN AGAIN

Kappa Sigma, Sigma Phi Epsilon, Delta Tau Delta, and Alpha Tau Omega Undefeated

Pan-Hellenic basketball games are in progress and several interesting contests have been staged. The dopesters are beginning to get some line on the teams and some of the more radical ones have already picked the winner. Four fraternities, as yet, remain undefeated. They are Kappa Sigma, Sigma Phi Epsilon, Delta Tau Delta, and Alpha Tau Omega.

The Delta Taus, winners of last year's inter-fraternity series, captured the long end of a 24-6 score from the Sig Alpha Monday evening. The S. A. E. held the Deltas to a 5-2 score the first half but weakened in the last period and let last year's champions frolic away with their first game of the season.

The Sig Eps won their second victory of the season Monday evening from the Pi Kaps. The Sig Eps played listlessly during the first half and let the Pi Kaps gain an 8-6 lead. The addition of "Susie" Sears to the Sig Eps lineup seemed to put the pep in their team and they were able to finish the game with a score of 16-9 in their favor.

The Betas lost a hard fought game to the A. T. Os. Tuesday evening by a 17-10 count. The Betas were outplayed during the game except at the beginning of the second half when they staged a wonderful comeback and for several minutes it looked as if the new-comers in the Pan-Hellenic were going to be beaten.

The Kappa Sig team won a contest from the Alpha Psis Tuesday evening that was especially interesting during the first half when the Vets rang up a two point lead. Bradley and Kuykendall found themselves during the last half however and en-

abled their team to win the game 16-7.

In the games that were played Wednesday evening Sigma Nu won from Sigma Alpha Epsilon 31-12 and Delta Tau Delta took a 19-14 count from Acacia.

Two games that were scheduled in intramural athletics for Monday night failed to materialize. Kappa Phi Alpha forfeited to Phi Beta Sigma. The Y. M. C. A. Boarding club was also "dressed up and no place to go" for the Veterinary Medical association failed to appear for their scheduled game.

Games scheduled for Tuesday were also forfeited. The Reed independent team forfeited to the First battalion. The Second battalion also won because of the failures of the other contestants to appear. Kappa Phi Alpha lost to the Erwin independent team 26-8. Phi Delta Tau defeated the Marshall County club 13-10.

POPULAR COEDS TO BE VOTED ON

START TAKING ORDERS FOR ROYAL PURPLE

Receive 25 Votes if Full Price of Book Is Paid Down—Contest to Last Until January 15

Aggie Girl popularity contest opens Thursday, December 9. Orders for Royal Purple will be received at the window opposite the post office and votes registered for the popular coeds selected at next week's meeting.

The editorial staff for this year has been able to hold the price to \$5 in spite of a 23 per cent raise in printing, and an 18 per cent raise in engravings. They have not accomplished this at the expense of the book but on the contrary the Royal Purple for this year is bound in leather, contains a new group of college views taken by Coburn, and what amounts to a new feature in the way the college calendar is handled.

In order to vote it is not necessary that the full price be paid down, but 10 votes will be allowed to subscribers paying \$3 down, those paying the full price having 25 votes. Ample time for every one to vote will be allowed as the contest starts Thursday, December 9 and lasts until January 15.

AMERICAN MEN ARE CHIVALROUS

MISS BAIN MAKES STATEMENT IN CHAPEL SPEECH

Believes Splendid Spirit of American Men Aided Women in War Work

"We are all boys and girls," said Miss Elizabeth Bain of The American Society of Social Hygiene in her address, "Democratic Living" at chapel Thursday morning.

Miss Bain has spent a good many years working with the young people of the country along social lines. During the war she spent four months in London and nine months in France, and did much helpful work among the soldiers and sailors of all the allies, especially the Americans.

Miss Bain stated that the great activity of the American women engaged in helpful work among the soldiers during the war was due to the attitude and chivalry of the American men in general toward women.

She said in closing that the four great institutions of America were the family, the home, the school, and the church, and that it was through these agencies that the young men and women of the country, upon whom the future of the nation depended, would have to receive their preliminary training in all phases of good citizenship.

Miss Hadden and Miss Kellar are holding a class in musical appreciation and notation on alternate Saturdays for high school students.

- Make Reservations Saturday
- Reservation of seats for "Madam Butterfly" which will be given Wednesday night, December 8, will begin Saturday morning at 7 o'clock at the Co-op bookstore in Aggieville and at the Chamber of Commerce downtown.
- Mail orders have been coming in for several weeks and these have been given first attention as it is expected that the seats will go like "hot cakes" on Saturday morning.

SEASON'S END FINDS AGGIES BACKING TEAM

SHOW SPIRIT UNEQUALLED FOR MANY YEARS

WILDCATS DEVELOP REAL FIGHT

Aggies Have Team Work Rather Than Individual Brilliance—Accounts for Few All Valley Berths

The 1920 football season is ended. The Aggies did not win a Valley championship, nor did they win a Missouri Valley game, the best showing of the campaign being made against Oklahoma, the Valley champs who were played to a 7-7 tie by the Wildcats. However, the Aggies are not discouraged by the showing of the season. The students are backing the team as they have not for the last four years. Their faith in the team and their support are due to the belief that under the leadership of Coach Bachman the Wildcats have developed the fighting spirit in the highest degree.

Few Experienced Men

The poor showing of the team may be laid in large part to the fact that so few experienced men were on the squad. In the majority of the games six men who had had no varsity experience outside the present season were playing. Sebring at end, Stauffer at guard, Schmitz at guard, Hahn at center and guard, Axline at quarterback and Goerke at fullback were regulars who were playing their first Missouri Valley ball. Besides these regulars, Randall at half, Sears at full, Linn at end, Bryan at half and Marshall at guard who were called on to replace the regulars many times were receiving their baptism of fire. Playing against teams composed almost wholly of veterans and using a new system of attack it is small wonder that the Wildcat crew were not victorious.

The play improved from week to week all during the season with the exception of the Ames game. However, any eleven that can come back after a relatively severe defeat such as was administered to the Aggies by Ames and play the best team in the conference to a tie is one for any school to be proud of.

Few Individual Stars

There were few outstanding players on the Aggie eleven, but Bachman perfected a team play that offset the lack of individual stars. Because of the lack of personal brilliancy in the Aggie lineup the Wildcats did not draw a large number of berths on the All Missouri Valley selections as given out by the Kansas City Post in its Sunday, November 25 issue. The Post did not compile an eleven, merely printed the selections of five conference coaches for the mythical team. The coaches picking teams were Allen of Kansas, Miller of Missouri, Banks of Drake, Owen of Oklahoma, and Aeneas of K. S. A. C.

Two Make First Eleven

Dewey Huston received three votes for a guard position, placing him on the first eleven. Prock Randles was the only other Aggie chosen for a first team berth by any of the coaches submitting lists. Prock was nominated by Ben Owen for an end position. Ike Gatz received three votes for the tackle position on the second eleven. Hahn and Cislani each received a choice for center on the second team, and Sebring was chosen for a wing position by one of the mentors.

There are only four seniors, Cleland, Gatz, Hinds, and Shorty Cowell on this year's eleven, so Bachman should have the makings of a championship crew next year when his veterans get the Notre Dame system to working.

It seems impossible to believe that there was a time in the history of the college when there were only 2 in the graduating class. But this happened in 1873 and was repeated in 1875. The largest graduating class was in 1917 when 357 out of 401 received their degree. Two hundred and eighty-nine were graduated in 1914.

Dr. J. C. Peterson of the department of education, went to Lawrence a short time ago to address the class in general psychology on the "Value of General Intelligence Tests." He took with him the charts which have been worked out from the results of last year's tests upon college freshmen. The University of Kansas is interested in the results of the tests as it is planning to give similar tests in the future.

Be your own self
Answer your own prayers
Mind your own business

IT ISN'T TRUE—BUT IT MIGHT BE

There was once a young freshman that wanted—oh so badly—to become a pledge of a certain fraternity of a rather high reputation. So said freshman equipped himself with his dad's car, a fine wardrobe, a set of cosmetics, and an aristocratic mien and began to court the fraternity of his choice.

He augmented these measures by a set of smutty stories, a great assortment of "hells" and "dams" and showed his "devil may care" character by smoking in front of main hall. He was fairly broken hearted when he failed to make the fraternity. He wondered, and may still be wondering why he did not become a pledge. Some old, wise seniors know the reason, though.

"Sit down Oswald, this isn't a true story—but it might be."

TREAT 'EM LIKE THEY'RE HUMAN

At our student social functions given during the school year we find it necessary or rather, perhaps, customary to assign to some popular couple the doubtful privilege of acting as chaperons. These folks whom we so honor, besides acting as our social guardians, accepting the responsibility for our conduct and imparting an air of propriety to the occasion, are often required to do a lot of things that should ordinarily fall to the duties of the butler and the maid.

Now of course, none of us would think of dancing with the servants, of discussing home brew recipes with the butler, or of whispering to the maid that Angelina Highbrow's new hand painted blouse was bought at the Dollar day sale. But then these social officials receive a monetary return to compensate them for the humiliation of being ignored by everyone and regarded as part of the decorations and fixtures. As the servants' convention says 'ignore them.'

The chaperones, on the other hand, receive no compensation and mighty little in the way of thanks. There is no conventional barrier which prohibits our being more attentive to them. Suppose we exchange dances with them, 'kid' them occasionally, and in general treat them as if they were just regular ordinary goodfellows. We are offering ten to one that they will like it.

NEWS UNDERDONE—SLANG OVERDONE

In the November 13 issue of the Saturday Evening Post was an article "What a Man Misses by Going to College." It was an indictment, in a mild degree, of the American college system as a whole, and was aimed more particularly at the more academic institutions rather than at the vocational institution of K. S. A. C.'s type, but it contained a number of things that give food for serious reflection by students of Kansas State.

The most serious charge against the colleges of the land contained in the article was that the students are living a life apart from that of the workaday world and that these students have therefore acquired a wrong perspective upon the affairs of that same workaday world in which they have to make their living after graduation. To remedy this condition the author, who is a college professor, by the way, suggests that the student be given a year's actual business experience before he reaches his junior year.

The specification of aloofness from the affairs of life does not, in the Collegian's opinion, apply closely to the students of this college, except in that they are not well acquainted with news of a national and international aspect. How many Aggie students read the daily papers, outside the sport pages, regularly? It is safe to say that not more than 25 per cent at the outside are well informed on current news.

The other indictment that is especially applicable to Aggie students is that of the excessive use of slang. The author of the article makes the point that intelligent slang is not a detriment to any person's conversation, but that the usual college jargon is so stereotyped and overworked that it deadens the capacity of the user for intelligent and interesting conversation. The epidemic of "you tell 'em" sayings that is raging on the campus at present is proof enough of the truth of his charge.

K. S. A. C. is a school of such a practical turn and of such wide ramifications in the affairs of the people in general that she may deny the applicability of several of the charges of the Saturday Evening Post writer, but on the few that are pertinent to us it would be well to take thought.

Prof. N. A. Crawford, head of the journalism department, spent Saturday in Kansas City on business. Three new analytical balances have been installed in the milling laboratory for the use of students.

Things we think things others think and things we think of things others think.

Dear Editor:—A library containing 67,000 volumes is certainly one to be proud of and the fact that it is open at all times to the students makes it doubly valuable. But with open stacks such as we have and which is a privilege that is denied in most college libraries, there is often the danger of losing some books or periodicals or having some torn or otherwise mutilated.

Not long ago the writer had occasion to look up a certain reference in the class reserve room and in looking through the book, found that the particular article which he desired had been torn out. Upon inquiry it was learned that the article had been there the day before. Now instances like this, however deplorable, are not uncommon.

The student who did this should stop and think of just how the library would be if everyone did this sort of thing. Many books have been in the library a long time and are yet in as good condition as they were the day they were placed there. Aggies, why not make this another tradition of K. S. A. C.—to pass on the books and periodicals as we find them to the ones who follow us?—A Senior.

Dear Editor: I am a simple stude. I have no superior virtues or accomplishments. As an athlete I would make a good soda jerker. I seem to be in bad.

Sometime ago in looking over the conventional colors of sweaters offered by the sweater salesman I chose white as the color which would set off my features to the best advantage. But in so doing I had reckoned without Mr. Watson. I neglected to inquire whether or not he had annexed a portion of the rainbow for the benefit of athletics.

As I said before, my mind runs in simple channels and as the athlete already had a large purple K and a purple arm band as the distinguishing characteristic I supposed that the K sweater was sufficient. I did not take time to reason that a loud purple K cannot be distinguished more than four blocks away, or that perchance the athlete might have his back turned in my presence.

I have sent my sweater to the dye works. I have no desire to share in the glory of the K man. He has earned the right to possess a monopoly on the color market. I shall humor his whimsical fancies. But I am still a simple stude. I remain unconvinced.—C. S.

Dear Editor: College students often sneer at advice when they should swallow it, and often let a good thing lie when they ought to pick it up. But there are some things that, it seems to me, a college student should have the privilege of doing for himself without having the rod of a faculty committee or the S. S. G. A. council pointing him in the face.

Someone has said that our dancing is indecent, immoral, and must be abolished. That would be an excellent thing to tell to a high school youngster or to someone who doesn't know the way in which to conduct himself.

But it occurs to me that persons who are eligible to enter college are old enough and are capable enough to care for themselves morally, spiritually and any other way that the S. S. G. A. council and the faculty think they can't.

Cheek to cheek dancing is not dig-

nified, I admit. It does not look well nor does it show any educational development on the part of the dancer. But it is not immoral. It occurs to me that the thing to do is to let the students know—as they already should—that cheek dancing is not dignified and shows anything but culture and refinement. But when it comes to having someone watching me for some chance or happening that he or she might report to the faculty committee—then please let me out, and I won't dance at all.

Chaperones are all right—for etiquette demands that they be present. Students should be courteous to them. But to have a so-called tattle tale present who is nosing about for something to report to the S. S. G. A.—bah!

I am no fatalist, spiritualist, or tattler. I want a square deal and to be treated as if I were a man with a judgment that every college person possesses. I don't want to be treated like a high school kid who needs some one to tell him how to tip his hat and to wash his neck. I believe that most of the students agree with me.—Sophomore.

Horace Dauchey, of the Minnesota chapter, spent the first part of last week as guest at the Kappa Sigma house.

Miss Jamie Cameron who has been quarantined at the Alpha Delta house has been taken to the college hospital, and the members of the sorority have moved back into the house.

Mr. and Mrs. Rabe of Axtell, who had been visiting their daughter, Helen Rabe, who is attending college, left for their home Saturday.

Dr. Marie A. Greene, assistant college physician 1914-17, visited friends at K. S. A. C. Thanksgiving vacation.

Prof. J. B. Fitch of the dairy department is attending the meeting of Holstein breeders in Wichita this week.

ENGINEERS HAVE OPEN HOUSE DAY

WILL SHOW STUDENTS THROUGH
BUILDING DECEMBER 16

Every Person On Campus To Be Given
Chance To Visit The Division—
Machinery To Be On Display
In Shops

The engineering division will hold open house for all other divisions of the college on December 16. In order to let the students of the various other divisions of the school become better acquainted with the engineering division and incidentally as a part of a well organized advertising campaign the engineering division has planned an open house day.

On this day every machine in the shops and building will be running. Excursions of students will be conducted through the division by guides who are seniors in engineering and who are capable of explaining how each piece of machinery works, what it does, and its application in engineering.

There will be a period set off in which the home economics students will be conducted through the buildings, one for general science, one for the arts and one for each of the other divisions.

Many freshmen and also many K. S. A. C. students who are seniors have never been through the entire engineering division and do not know what the building and shops contain. The engineers want every person on the hill to have the opportunity of making a tour through the buildings with someone who knows where the interesting things are and can explain how they work.

N. E. Dale Talks To Club

The tri-K hike which was to have been held Tuesday evening was called off and the regular meeting in Prof. L. E. Call's office was held instead.

N. E. Dale, '18, formerly with Swift and Company and now with the department of cooperative experiments at the college, talked to the club on "Commercial Fertilizers." After the program a light lunch was served. W. E. Turner was initiated into the club.

Valdez Home To Chile

Ferdinand Valdez, one of the students taking the milling curriculum here, and whose home is in Chile, is leaving this institution for his native country December 21. Valdez is taking a complete set of laboratory equipment with him which will be installed in his father's mill.

The classes in grain sorghums, which include milo, maize and kafir, are to be judged by C. C. Cunningham of Eldorado, formerly a member of the agronomy department.

Can Visit Tropical Jungles on Campus Almost Any Season

Some of these days when the mercury is hovering around zero and the wind is whistling across the campus, how would you like to step into a tropical jungle, peel off overcoat and coat, and get a taste of what South America must be like?

Where is this spot towards which nature seems so kindly disposed? Beg your pardon, but this is one of those rare examples where man has "put one over" on nature. It is the college greenhouse south of the horticulture building.

Entering the greenhouse from the north door you find yourself face to face with a banana tree. Tall and green, with its huge leaves touching the top pane of the greenhouse, it stands there, the very emblem of the south seas themselves. It is flanked on either side with palms. Arranged on benches around the walls are plants ranging all the way from the rattlesnake plant of our western plains and the Spanish bayonet of Mexico to the rubber plant of Brazil.

After seeing all of these, if you are still tired of commonplace things, you might take a peep into the little alcove on the east side and observe the bougainvillea sandariana.

A visit to this greenhouse is an interesting diversion and an hour can be profitably spent among the plants that are far away from their native haunts.

Hold Commandment Meeting

"You and Your Father and Mother" was the subject for discussion at the fourth of the series of commandment meetings held yesterday in Recreation hall at the regular Vesper service hour. Miss Effie Hendricks had charge of the meeting, which was also the regular monthly meeting for the big and little sisters. There was special music, and a speech by Miss Jessie Machir. Tea was served by the girls of the big sister committee.

Field Gun Arrives

A large motorized six-inch field piece was unloaded Saturday from the Rock Island tracks from where it was taken to the college to be used by the heavy artillery unit. The gun was made and tested at the Erie proving grounds in Ohio. This is the first of the equipment to arrive for the use of the military department of the college.

FRESHMAN FOLLIES OF 1920

The Embryo Bolshevik

I'm a sadder but wiser, a man with a past.

My dignity's had a great fall.
I was chased up the steps by the cold wintry blast
And knocked down by the doors of main hall.

Those swinging doors of main hall.

A menace to health they stand in the way.

Swinging a challenge to all.

Any student who doesn't watch closely, they say,

Gets felled by these doors of main hall.

Those swinging doors of main hall.

I'm still just a freshman, but wait till I grow.

I'll nail the darn things to the wall.

I'm a man of free spirit and I don't propose

To bow down to mere doors in main hall.

Just swinging doors in main hall.

What Is Air?

BEFORE 1894 every chemist thought he knew what air is. "A mechanical mixture of moisture, nitrogen and oxygen, with traces of hydrogen and carbon dioxide," he would explain. There was so much oxygen and nitrogen in a given sample that he simply determined the amount of oxygen present and assumed the rest to be nitrogen.

One great English chemist, Lord Rayleigh, found that the nitrogen obtained from the air was never so pure as that obtained from some compound like ammonia. What was the "impurity"? In co-operation with another prominent chemist, Sir William Ramsay, it was discovered in an entirely new gas—"argon." Later came the discovery of other rare gases in the atmosphere. The air we breathe contains about a dozen gases and gaseous compounds.

This study of the air is an example of research in pure science. Rayleigh and Ramsay had no practical end in view—merely the discovery of new facts.

A few years ago the Research Laboratories of the General Electric Company began to study the destruction of filaments in exhausted lamps in order to ascertain how this happened. It was a purely scientific undertaking. It was found that the filament evaporated—boiled away, like so much water.

Pressure will check boiling or evaporation. If the pressure within a boiler is very high, it will take more heat than ordinarily to boil the water. Would a gas under pressure prevent filaments from boiling away? If so, what gas? It must be a gas that will not combine chemically with the filament. The filament would burn in oxygen; hydrogen would conduct the heat away too rapidly. Nitrogen is a useful gas in this case. It does form a few compounds, however. Better still is argon. It forms no compounds at all.

Thus the modern, efficient, gas-filled lamp appeared, and so argon, which seemed the most useless gas in the world, found a practical application.

Discover new facts, and their practical application will take care of itself.

And the discovery of new facts is the primary purpose of the Research Laboratories of the General Electric Company.

Sometimes years must elapse before the practical application of a discovery becomes apparent, as in the case of argon; sometimes a practical application follows from the mere answering of a "theoretical" question, as in the case of a gas-filled lamp. But no substantial progress can be made unless research is conducted for the purpose of discovering new facts.

B. L. ANDERSON TO COME HERE

TO BE ASSOCIATE PROFESSOR OF
ANIMAL HUSBANDRY

Has Charge of Largest Hereford Establishment in America—Is K. S. A. C. Graduate

B. L. Anderson, who was graduated from the college in 1916, has been secured by the animal husbandry department as associate professor of animal husbandry to take the place of Prof. F. W. Bell, who has taken charge of the work in swine investigations, formerly in charge of Prof. E. H. Ferrin. Professor Ferrin recently left for Minnesota to accept a professorship in the swine department of the University of Minnesota.

Mr. Anderson was a member of the students' stock judging team which went to the International Livestock show in '16. He was the highest ranking man that has ever represented the Kansas State Agricultural college at any International judging contest. Some time after his graduation he was placed in charge of one of the largest purebred Hereford establishments in America, at Comiskey, Kan., where he has handled from 1,000 to 1,500 purebred Herefords annually.

Dr. C. W. McCampbell, head of the animal husbandry department, states that he is particularly pleased to have secured a man of Mr. Anderson's ability. "His unusual experience in handling purebred cattle and his wide reputation with livestock men throughout the country, make him a very valuable acquisition to the animal husbandry department of K. S. A. C.," says Dr. McCampbell.

Mr. Anderson will assume his new duties here about December 1. His parents are residents of Manhattan, having resided here for a number of years.

Paul To Be Butler Even Though It Is Below His Dignity

"How can I ever learn to buttle?" is the question that confronts Paul Daingerfield, the youngest of the four Daingerfields of Virginia, when sister Olive declares that he'll have to be the butler. "And besides it wouldn't be dignified," insists Betty. "Not dignified to save your sick father and our home?" says Olive haughtily. Dignity or no dignity Paul is prevailed upon to play the part. And Paul isn't the only Daingerfield who is obliged to be what he isn't. But Betty and Olive and Charles will explain themselves later. What they did and how they did it will be told fully in "Come out of the Kitchen."

"Come out of the Kitchen" is the play which the Purple Masque dramatic fraternity has chosen to present sometime in January.

"I can't talk to you just now," Miss Florence Heizer will say if you attempt to find out your English literature grade one of these afternoons. "I'm having special tryouts this afternoon. Oh, the play's coming along just fine but tryouts in the afternoon and play practice at night keep me pretty busy."

"Watch for the date," says the president of the Purple Masque. "It's going to be some play because Miss Heizer's coaching it, and everybody knows Miss Heizer."

Royce Crimmen spent the holidays with Mac Short at his home in Salina.

DATA CONCERNING K. S. A. C. TEACHERS SENT OVER STATE

Small Pamphlet Prepared By Dean Holton Contains Helpful Information

"Teacher Training in the Kansas State Agricultural College" is the name of a little pamphlet which the department of education is distributing to high school superintendents throughout the state.

In it the statement is made that teachers who have been trained in K. S. A. C. are drawing an aggregate salary of \$750,000 this year, and are receiving an average of about \$200 more per annum than the graduates of other colleges in the state.

The pamphlet answers questions as to the types of teachers turned out by K. S. A. C., the special features offered here, and the extent to which the normal training work is taught.

To Give Christmas Entertainment
The Dorcas class of the United Presbyterian Sunday school are planning a Christmas entertainment for the old people and children at the Odd Fellows home at Eureka Lake. The social service committee of the Y. W. C. A. will assist in the entertainment. Full plans will be given later.

Barber Work

at 1204 Moro, at 30 per cent discount. Why pay more?

Didjever?

Didjever read an ad in a paper About a play or a musical comedy That was supposed to be Rare as the boys says,
And look at the big pictures of the actresses
On the bulletin boards?
Then tell your date you had to study
When you knowed you ought but also
Knowed darned well you wouldn't,
And then borrowed 55 cents from your room mate
And sneaked off down town to the theater
Where the show is to be put on,
Or took off as the case may be
And then when you slunk in a corner
In nigger heaven and thought you was hid
And then sorta peered around to see
What class of coons inhabited them parts
And all of a sudden right behind you
Saw your date—Boy Howdy! Didjever?

—H. G. B.

Have 526 Farmers

Five hundred and twenty-six of the 3,400 men and women students at the University of Kansas come from farm homes, according to figures recently announced by George E. Foster, registrar. Of the remaining students, 313 are sons and daughters of widows, while the parents of 119 are merchants, of 174 retired, 104 doctors, and on down the line, including railroad men, teachers and stockmen. Thirty occupations are represented.

ROAD BUILDING SNAGS CLEARED

COUNTY ENGINEERS TO SOLVE OUR PROBLEMS

College Offers Ten Courses in Highway Construction—Each Student May Choose Two

One of the many intensive courses to be offered in the short course department will be opened February 8 and run to the 18th. The course will be one for county engineers who are especially interested in road building. Kansas county engineers will be given a chance to study engineering and road building problems under the direction of the engineering department of the Kansas State Agricultural college.

Prof. L. E. Conrad, head of the civil engineering department, says: "It is not our purpose to make engineers out of men who are not already engineers but it is our intention to help the county engineer to solve some of his problems or to give him some specialized work."

In accordance with the request of the state highway commission the college proposes to offer, free of charge, 10 different courses from which each engineer may choose two. The courses will include work in surveying, the study of concrete materials and their management, the retaining of walls and foundations, study of steel and reinforced concrete highway bridge construction, the preparation of federal aid plans, the testing of bituminous and non-bituminous materials, construction and maintenance of road surfaces and economics of highway design.

In connection with this work there will be eight lectures on economics. An opportunity will also be given to hear lectures on related engineering subjects, particularly lectures on tractors and trucks. This will be the first road school of this kind to be offered in this part of the country.

JAYHAWK ELEVEN FACE HARD LUCK

EIGHT REGULAR PLAYERS GRADUATE THIS YEAR

Allen's 1921 Team Will Lack Valley Experience—Freshman Squad Shows Good Promise

The first hard luck story of the year concerning football prospects for next year comes from Mount Oread down the Kaw when eight of the eleven Kansas regulars who started against Missouri Thanksgiving played their last game for the Blue and Crimson.

Lonborg, Mandeville, Bunn, Simon, and Welch of the Kansas backfield and Reid, Woody, Bell, Hart, and Captain Nettles of the line are scheduled for graduation. This leaves "Pete" Jones at guard, "Farmer" Sandefur at tackle, Andy McDonald and "Red" Ivy on the ends, and "Hungry" Hale at center of the regular in the line with only Allison and McAdams, both fullbacks, in the backfield.

"Phog" Allen's Jayhawk eleven next year will be lacking in valley experience, for the other 20 members of the squad have been given several chances in games and have failed to show up well. The freshman squad this year has shown great promise and decisively defeated the second string varsity a week ago in a match game by a score of 14 to 0.

The yearling players that have gained the most fame around McCook field this fall are Don Sawyer, an "open center" and dangerous on defensive work; Goodell and Black, state high school stars of a year ago, at end; Griffin, crack quarter miler, McGuire a "find" of Coach Adrian Lindsey, at quarter; and Welty, a fast Oklahoma boy, and Max Krueger, line plunger, in the backfield. Besides this backfield, Coach Allen will also have "Young Dutch" Lonborg, a brother of this year's quarter, who is just as fast as his brother, and Mifflin, who has shown up well this season at booting the pigskin.

Plans Complete for Smoker

Arrangements have been completed for the smoker which the Engineering students are giving for the rest of the student body at the Community house Thursday, December 9. All of the students of the college as well as the chamber of commerce are invited. A number of speakers have been arranged for and they are now trying to get a prominent engineer from Kansas City. There will also be a novelty act or so during the evening.

Miss Ora McMillian, '15, is teaching home economics in the Topeka high school.

Miss Laura Ramsey, '15, is doing extension work from the University of Wyoming and at present is located at Basin, Wyo.

Hero Now Wondering Whether Kisses Take Nerve or Merely Art

"Every one a type, everyone a fair chance" sounded pretty good to an aspiring young Aggie, so he decided to try out for the Purple Masque plays.

After anxiously waiting several afternoons to show his talent, the young man was assigned his part. Upon looking it over, he found that he had landed that of the hero. And when the heroine was chosen, thrills of joy and happiness swept over and engulfed his romantic heart, for she had dark hair, dark eyes, a soft velvety complexion and the most inviting lips imaginable. Her smile to him seemed to be a challenge, so he determined to make the most of it.

All became quiet and the tryout started. It was not so hard to become an actor after all, he thought. Events progressed rapidly, the plot thickened until it reached the point where the man takes the woman in his arms and kisses her.

He took, a second look at the note, and then his eyes met the sparkling brown eyes that were raised to meet his. He realized that there was a tide in the affairs of an actor, which was at the flood point. He hesitated, looked at the judges and the crowd, then suddenly felt that the tide had gone out.

To his friends he simply says, "I didn't have the nerve to do it before all those people."

DR. MARIE A. GREEN OF KANSAS CITY TO SPEAK

Will Talk on Friendship at Congregational Church Sunday

Dr. Marie A. Greene of Kansas City is to address college men and women on the subject of "Friendship" Sunday afternoon, December 5, at the Congregational church. Doctor Greene will speak to the men at 2 o'clock and to the women at 4.

This is the first of a series of 10 lectures that Dr. Greene will give in Manhattan, for the benefit of college people. She is also giving these same lectures in Lawrence and in Topeka.

The lectures will be given on Sundays and will be announced separately as they occur. They will deal with intimate subjects and should be of great interest and value to college men and women.

There will be no admittance charged for the lecture on Sunday, December 5.

Miss Ruth Huff, '19, is teaching at Portis this year.

Among the alumni high school teachers who accompanied girls to the Y. W. C. A. convention last week were Miss Ethel Switzer, '20, of Wakefield and Miss Virgie McCray, '11, of Herington.

Mr. Ralph Challenger, '08, and wife Julia (Bayles) Challenger, '07, are residing at 1313 Carlton street, Berkeley, California. Mr. Challenger is taking graduate work at the University of California.

Miss Mary Ellen Henderson has withdrawn from college, as she has been called to her home in Atwood. Miss Henderson expects to return next semester.

Miss Ruth Garvin is reported to be improving and will soon return to her home in Lawrence.

Prof. R. W. Conover and Prof. N. A. Crawford spoke Thursday at a conference of the Episcopal church held at Junction City.

SOCIETY

SOCIAL CALENDAR

Friday
Aggie Pop Stunts in the auditorium.

Saturday
Aggie Press party in Recreation hall. Kappa Delta at home in Elk's hall. Scabbard and Blade dance in Gym.

Sunday
Miss Elizabeth Rothermel gives tea at 1027 Houston.

Sigma Alpha Epsilon have pledged Mr. Joe Slatten of Gallatin, Mo.

Delta Zeta held open house yesterday evening from 6:45 to 7:45 o'clock for the Sigma Alpha Epsilon fraternity.

Miss Elizabeth Rothermel will be at home to all her students Sunday afternoon at the home of Mrs. O. H. Halstead, 1027 Houston.

College club entertained Wednesday evening with a dance in Recreation center. A four piece orchestra furnished music for the dancing. Twenty-five couples were present.

Dinner guests at the Alpha Tau Omega house last Wednesday evening were Miss Florence Windus of Protection, Miss Iona McKinney, Miss Esther Moore, Miss Nellie Moore, and Miss Ethel Benfield.

Members of the Kappa Sigma fraternity who were in Manhattan during Thanksgiving vacation entertained with an informal dancing party at the chapter house at 514 North Eleventh street Friday evening, November 26. Mrs. Jennie Bassler chaperoned.

Horace Randals, William Haney, Paul Evans, Elmer Bates, Sherman Bell, Leo Cavanaugh, and Emmett Graham were guests at the home of Ralph Jenkins at Perry during Thanksgiving vacation. They entertained with a dance Friday evening at Elks hall in Perry. A two piece orchestra from Topeka furnished the music.

Fred Emerson of Ottawa, senior in veterinary medicine and Miss Florence Jackson of Alvin, Tex., were married in Ottawa, November 27. Mr. and Mrs. Emerson came to Manhattan immediately after the ceremony where Mr. Emerson has resumed his studies. Mr. Emerson is a member of the Alpha Psi fraternity.

Miss Elizabeth Fleming and Mr. R. D. MacGregor were married in Chicago Thursday, November 25. They will make their home in Chicago, where Mr. MacGregor is employed with the Western Electric company. Mr. MacGregor is a graduate of K. S. A. C. with the class of 1919. He is a member of the Sigma Phi Epsilon fraternity.

Miss Elizabeth Circle and Mr. Harold Garver were married at the home of the bride's parents at Kiowa, November 23. Miss Circle, '20, was last year's president of the Y. W. and was a member of the Ionia literary society, Prix, XIX, and Zeta Kappa Psi. Mr. Garver was a junior in agriculture and member of the Block and Bridle. After December 1 they will be at home at 123 Arter street, Topeka.

The marriage of Miss Wilma Seigel Roark of Junction City, and Mr. Henry Hinds of Bowling Green, Ky., took place Monday at 4 o'clock in St. Paul's Episcopal church in Kansas City, Mo. The bride was unattended, the ceremony being performed in the

presence of the members of the two families. Mrs. Hinds attended school here in 1918 and 1919 and is a member of the Pi Beta Phi sorority. Mr. Hinds was graduated from Kentucky State college in 1917 and is a member of the chapter of Kappa Alpha fraternity there.

The Pi Beta Phi sorority entertained the football team and coaches with a three course dinner Wednesday evening, December 1, at their chapter house at 1409 Fairchild avenue. In the center of the table a football field was arranged with miniature football men in action. The place cards were little football men. Places were laid for Mr. and Mrs. "Mike" Ahearn, Coach Charles Bachman, Captain and Mrs. J. A. Van Fleet, Mr. Isaac Gatz, Mr. Marian Stauffer, Mr. Dewey Huston, Mr. R. E. Cleland, Mr. Ray Hahn, Mr. Horace Randels, Mr. Brady Cowell, Mr. Dewey Goerke, Mr. George Hinds, Mr. Andrew Axline, and Mr. Harold Sebring.

Announcement is made of the marriage of Miss Helen Lawrence of Tulsa, Okla., and Lieutenant John Holt of Fort Douglas, Ariz., which took place Monday afternoon in the Episcopal church at Junction City. Attending the bride was Miss Elithe Kaull, and Lieutenant Algernon Jay Perry who is stationed at Camp Funston attended the groom. Little Annette Lawrence, cousin of the bride, acted as flower girl. Miss Bernice Spence sang "O Promise Me." Mrs. Holt was graduated from K. S. A. C. with the class of 1920 and is a member of the Alpha Delta Pi sorority, and Enchiladas. Lieutenant Holt was graduated from Washington State university in 1915 and is a member of the chapter of Sigma Alpha Epsilon at that school. Lieutenant and Mrs. Holt left Monday night for a short wedding trip through the west after which they will return to Fort Douglas, Ariz.

Leo C. Moser and Miss Laura Lee Barrus were married November 24, at St. Louis, Mo. Mr. Moser graduated from the industrial journalism department in 1918, and is now associate editor of the Iowa Homestead, at Des Moines, Iowa.

Miss Frances Stall, daughter of Mrs. Louise Stall of this city was married Wednesday, November 24,

to Captain James B. Wise, Jr., at the home of the officiating pastor, Reverend Fisher of the Presbyterian church. Mrs. Wise was graduated from the Kansas State Agricultural college with the class of '19. She was a member of XIX, Ionia literary society, Phi Kappa Phi, and Omicron Nu. She took post graduate work in 1919. Mrs. Wise was very prominent in college musical circles having played three years in the college orchestra. Captain Wise is a graduate of the Virginia Military Institute and has been stationed at Fort Riley. Captain and Mrs. Wise are now at home in Brownsville, Tex.

S. C. Salmon, professor of crops, left Monday for Chicago where he will represent the Kansas Crop Improvement association and the Kansas experiment station at a meeting of secretaries of crop improvement associations of other states. While in Chicago Professor Salmon will look after the exhibits of Kansas farmers at the International Hay and Grain show.

Prof. J. W. Searson officiated at the Forum initiation which was held at five o'clock yesterday afternoon.

Prof. George A. Dean went to Topeka Thursday in the interest of the Congregational church work.

Miss Ruth Helen Bret and Miss Miriam Rasmussen of Washburn, will be guests this week end of Miss Ardis Atkins.

ANNOUNCEMENTS

Ionia literary meets at 3 o'clock tomorrow afternoon.

Franklin literary society meets as usual tomorrow evening.

Aggie Pop stunts begin tonight at 8 o'clock. Seats are not reserved.

Quill initiation will be held Monday evening in the office of Prof. N. A. Crawford.

Athenian literary society will give a debate program tomorrow evening at 8 o'clock.

Eurodelphian literary society gives a Thanksgiving program tomorrow afternoon at 3 o'clock.

A letter from F. E. Fuller of the class '11 to the alumni editor, states that he is greatly enjoying his work as county advisor for the Marshall-Putnam Farm bureau at Henry, Ill. He reports 1,400 members in their bureau. Mrs. Fuller, known in the old days as Bertha Plumb, '11, and the two kiddies are well and happy. The Fullers are planning to visit "dear old K. S. A. C." next June.

Miss Florence Helzer spent last week end with friends in Kansas City.

FINANCIAL AID IS OFFERED BY "Y"

COMMITTEE AWARDS 14 SCHOLARSHIPS THIS YEAR

Help Goes to Ex-Service Men Who Are Trying to Get a College Education

Nine Y scholarships were awarded last Tuesday by the local committee on W scholarships. This brings the total awards for this year to 19, scholarships ranging from \$75 to \$150, or about \$2,000 in cash has been given to Aggie students already this year. Last year 38 scholarships were awarded, of the total cash value of \$4,000.

So quietly has this work been done that few people outside of the circle immediately benefited knew of the existence of the Y activity, and perhaps for this reason alone the work has not extended to the greatest number possible.

These Y scholarships are a scheme to extend aid to ex-service men not reached by the federal board, in securing education either by correspondence, short course, or a regular collegiate course.

The local committee on granting these scholarships is composed of the following members: Dean E. L. Holton, representing the college, President S. J. Pratt of the Citizens State bank; J. E. Jelden and C. C. McPherson of the American legion; and Dr. A. A. Holtz, secretary of the Y. M. C. A.

MIKE, BACHMAN, AND KING ATTEND M. V. CONFERENCE

Arrange Schedules for Next Year—Nebraska May Reenter Valley

Mike Ahearn, Coach Bachman, and Prof. H. H. King have gone to Kansas City to attend the Missouri valley conference which meets Friday and Saturday. At this meeting the basketball schedule for this season will be completed. Arrangements for next year's football schedule will also be taken up at the meeting.

The governors of the Missouri valley, who are the presidents of the institutions in the conference, have agreed to let Nebraska back in the Missouri valley conference as soon as she complies with the valley rules. Nebraska will probably enter as soon as she completes this season's football schedule.

OUR ALUMNI

Carl D. Irwin, '10, is farming 160 acres in Twin Falls County, Idaho, and has one of the best pure bred Jersey herds in the state. Irwin also is supplying most of southern Idaho with Dicklow seed wheat. Last season he supplied seed wheat for 250 farms.

L. C. Aicher, '10, who is at the head of the Aberdeen Irrigation station, Idaho, visited the first of the week at the home of M. F. Ahearn. "Lou" says things at K. S. A. C. look mighty large to what they did 10 years ago.

Dr. Frank Haire, '20, is now experiment station veterinarian in the College of Agriculture, of the San Domingo Republic. He writes that he is enjoying a good practice there, and that there is need of more veterinarians. His address is Calageo De Agricultura Haina, Republic Dominicana.

Dr. W. P. Shuler, '10, has accepted a position as assistant veterinarian, with Dr. C. V. Wilder of Wichita.

Miss Helen Haines, '13, is in Boulder, Col., where she has accepted a position with the Boulder News-Herald.

Mr. Rex Guipre withdrew from college Tuesday, November 23, and has returned to his home at Simpson.

Now the Noses Shine For There Isn't Time To Put the Powder On

Boy Howdy, ain't it awful. This is the expression of a large number of the Aggie Students this week. It seems that everything has arrived at the same time—Aggie Pop, Mikado, Quizzes, Frivolities of 1920, Bills, n'everything. Gosh, but this college is getting to be an awful place. One don't have time to curl hair, powder or use Elite Pomade.

A quizz every day and about four meetings, dates, and other necessary happenings in a college curriculum, each evening. Why, good, night, it's worse than living on a farm and getting up at 4 o'clock in the morning to milk old Red. Just about the time you get ready to take a breath of air somebody wants you to do something.

Notice how hard-boiled everyone is? Why it's worse than the army. Every prof. snaps you off as quick as you speak to him. You know it would really be better if we didn't have any school between Thanksgiving and Christmas. By the time we get settled down to work after the feed of turkey and cranberry sauce down at Grandmother's it is Christmas and we haven't accomplished a thing. Let's put it up to the S. S. G. A. to abolish school between Thanksgiving and Christmas. What do you say, will you stand behind such a move?

W. R. SHULTZ DISCUSSES PROBLEMS OF REPORTERS

Has Charge of Political Run for Topeka State Journal—Has Worked with Cliff Stratton

"By working with a newspaper reporter on an assignment is the best way to test his ability," declared Arthur L. Shultz of the Topeka State Journal, in speaking on "Newspaper Reporting," before the members of the journalism department last Monday afternoon.

Mr. Shultz discussed the every-day problems that the average reporter encounters in newspaper work. He fully explained the work of a reporter in covering a state legislature and political assignments.

Mr. Shultz has charge of the State house political run for the Topeka State Journal. He has also worked a number of years with Cliff Stratton who is alumni secretary at the college.

Miss Loena Hoag, '18, is teaching in the high school in Osborne.

Miss Ruth Martin spent the week end in Wichita the guest of Miss Grace Hibarger.

Miss Marion Trayner will spend the week end in Lawrence at the Alpha Delta Pi house.

KNOTH COACHES VARSITY CAGERS

BUNGER URGES BASKETBALL PLAYERS TO COME OUT

Good Material Among Freshmen—Team Practices Under Direction of Hinds

The sport calendar now says "basketball practice." The Varsity practice has already started under the direction of Professor Knoth of the physical education department. "Ham" Bunger, captain of the team, and Professor Knoth are anxious to have as many as possible out for the varsity immediately. The longer time the men have to get into condition, the better will be their play when the season opens. Practice is held every evening in the gymnasium, commencing at 4:30 o'clock.

Freshman basketball practice under the direction of Heinle Hinds, captain of last year's varsity team and a three letter man in basketball and football, will start Monday, December 7 at 4:30 o'clock. There is a wealth of material in the freshman class this year and the coaches are expecting every man that even suspects he can play basketball to come out.

Mike Ahearn stated that he had two applications for the position of coach of the basketball team, and that probably a selection would be made within a week. "If we could afford to offer more money we would be able to secure a cracking good coach this late in the season," said Mike. "However, we cannot offer much more than a medium sized high school pays."

AGGIE MOVIE DELAYED BY POOR WEATHER CONDITION

Purpose of Scenario to Be Explained to Student Body in Special Chapel

Work on the Aggie movie has been delayed recently on account of the cloudy and rainy weather. As soon as possible however this work will be resumed, principal parts having been assigned and the cast announced.

A special chapel period is being planned for the near future, and in this chapel the plan and purpose of the movie will be explained to the students.

As soon as the weather clears up students may expect to see certain of their talented colleagues doing wonderful and terrible things for the benefit of the camera.

At the latest report no wood piles had volunteered their services.

"If" (An "Owed" to Landladies)
If you can keep your tongue while your landlady
Is trying hard to find out your affairs;
If you can trust yourself when her fair daughters
Come and take possession of your only decent chairs;
If you can wait, and not be tired by waiting
For those clean sheets she promised weeks ago,
Or being famished, can yet appease your hunger,
When your erstwhile Sunday diners into hash and pudding grow;

If you can dream—and rest in peaceful slumber,
While the porch swing by your window gently creaks;
If you can listen to that mushy conversation
And refrain from throwing shoes at those two geeks;
If you can bear to have your sweetheart's letters
Inspected by some stony hearted fool,
Or have his picture finger-marked and broken
While you labor hard for that degree in school;

If you can manage by some deft maneuver
To get one morsel of that cherished box from home,
Or failing, watch the others eating,
And stifle all your sighs, nor make a moan;
If you can force a smile and look so happy
While you sweep the crumbs up from the barren floor,
And not depart too far from genteel language
Until your self-invited guests have banged the door;

If you can take a bath in ice-cold water,
Nor raise a fuss because your toothpaste disappears;
If you can find that last thin piece of Ivory
And the Turkish towel that once you held so dear;
If you can do all this with loving spirit,
And not resent the evil toward you done,
Yours is the earth, and everything that's in it,
But, sad to say, it can't be did, my son.

—H. M.

Harley Barry spent the week end at the Kappa Sigma house.

B. A. Campbell has returned from Idaho where he was visiting John Meek, a former student here.

Born to Mr. Walter T. Swingle, '90, and wife, Mrs. Maude Kellarman Swingle, Washington, D. C., on November 10, twins, Stella and John William. Mr. and Mrs. Swingle returned last spring from an extended trip to the Orient, where Mr. Swingle went on a mission for the department of agriculture.

Miss Elizabeth Bain, representative of the United States social service, spoke at a mass meeting of women after Y. W. vesper service last evening.

Prof. J. W. Searson spent Tuesday in Abilene where he spoke before the high school, a business men's association, and the Woman's club.

E. G. Kelly of the extension department of entomology, returned Tuesday from Rice county where he organized 300 hundred farmers of that county for the burning of chinch bugs.

Miss Pauline Clarke manager of the college canteen, spent the week end in Kansas City.

Miss Ada Rice and Miss Florence Helzer were dinner guests at the Phi Phi house Monday evening.

IONIANS WIN FIRST PLACE ON POP NIGHT

ALPHA DELTA PI PLACES THIRD IN CONTEST

EURO'S AND CHI OMEGAS TIE

Judge on Originality and Presentation—Over 500 Turned Away Because of Lack of Standing Room

Friday evening, before a crowd of people that literally jammed the auditorium, Miss Frances Whitmore, president of the Ionian literary society, received the silver loving cup which is awarded each year by the Y. W. C. A. to the organization which presents the cleverest stunt for Aggie Pop night. The Chi Omega sorority and the Eurodelphian literary society tied for second place, and third place was won by the Alpha Delta Pi sorority.

The stunts were judged 50 per cent on originality, and 50 per cent on presentation. The judges were Miss Nannon Herron of Topeka, a prominent newspaper woman, Miss Elizabeth Maglier, instructor in the department of home economics at K. U., and Prof. Eldrich Davis of Washburn.

"Romance of Ads" Wins Cup
The "Romance of the Ads" was the title of the winning stunt, and the romance of Aunt Jemima and the Cream of Wheat man proved beyond a doubt that the way to a man's heart is through his stomach, particularly via the pancake route. The little fairy soap girl, the Wrigley kids, the Gold Dust Twins, the Uneda biscuit boy and the Old Dutch Cleanser girl all came to life for Aggie Pop.

Euro's and Chio's Tie
The "Story-Book Ball" given by the Chi Omega was one of the most pleasing of the stunts and was especially well presented. Jack and Jill, Simple Simon, and Humpty Dumpty were some of the old familiar characters who stepped out of a huge Mother Goose book to attend the ball.

The Eurodelphians had some real Aggie "pops" for their stunt, many brightly colored toy balloons which disclosed something witty whenever they burst.

"Big Four" Win Third
The "Big Four" who supped with the Alpha Delta Pi sorority were the Missouri Tiger, the Nebraska Cornhusker, the K. U. Jayhawk, and the Aggie Wildcat, who was crowned by the little football fairy Good Luck.

The stunts were all original and clever, and it was not easy for the judges to decide which were the winning ones. The entire program was as follows: selection by the orchestra; "Go-Hela," by the Delta Delta Delta sorority; burlesque dance by Josephine Bussey and Ruth Kittell; "Aggie Pops" by the Eurodelphian literary society; a lecture by Prof. X. Y. Z., (William Giles); "The Aggie Girl," by the Kappa Kappa Gamma sorority; vaudeville stunt by Renna Rosenthal and Elizabeth Hinchey; "When the Big Four Sup," by the Alpha Delta Pi sorority; selection by the orchestra; "Nailing a Lie," by the Aggie Press club; quartet, by the Phi Delta Tau fraternity; "The Story-Book Ball," by the Chi Omega sorority; two readings by Prof. Howard T. Hill; the "Romance of the Ads," by the Ionian literary society; "As You Appear to Us," by the Hash-Slingers' union; decision of the judges, and awarding of the cup by Miss Irene Dean, secretary of the Y. W. C. A.

About 500 Turned Away
The silver loving cup has been in the possession of the Aggie Press club for the past year. Other organizations which have had the cup are the Eurodelphian literary society, the Kappa Kappa Gamma sorority, and the Pi Beta Phi sorority. So far no organization has won the cup three years in succession, and thereby earned the right to keep the trophy permanently.

In order to avoid confusion, the doors were locked during the presentation of the stunts Friday night. Approximately 500 people were turned away for lack of standing room.

JOURNALISM FRATERNITIES COMBINE ON BROWN BULL

Writing Increases Staff—Publication May Become Permanent College Organ

At a recent meeting of Sigma Delta Chi, men's journalistic fraternity, and publishers of the Brown Bull

magazine, it was decided to form a Brown Bull board with Theta Sigma Phi, women's journalistic fraternity, working jointly with Sigma Delta Chi.

A Sigma Delta Chi will be editor, and the other offices may be filled by either. This uniting will increase the Brown Bull staff to 18 or 24 persons. The publication will probably become a permanent organ of the college with the two journalism organizations behind it.

The next issue will come out the latter part of January, probably at the opening of the second semester.

BETTER HOUSING COMMITTEE BUSY

EIGHT GIRLS WORKING WITH DEAN VAN ZILE

Plans Carried On Under Direction of Effie Hendricks—Coed Workers Represent Various College Organizations

After years of difficulty suffered both by the faculty committee in charge of student housing, and by the student body, a program has been organized by which it is hoped that legislation will be effected in the January legislature which will create a fund for housing operations at all state schools in Kansas. Sponsoring this undertaking is the Kansas Council of Women, the Federation of Women's clubs and the respective student bodies at Kansas state schools.

Mary Pierce Van Zile, dean of women, together with the deans of women at the other state schools, has gone into this proposition determined to get some action which would bring dormitory housing for girls, freshman girls at least. As a result of her efforts, places on the programs of eight district meetings of the Federation of Women's clubs were secured at which places Mrs. Van Zile or one of the other women's deans have presented the matter of better housing for girl students.

Inaction on the part of girl students at this school cannot be accused, for under the direction of Miss Effie Hendricks a committee of girls is working with Dean Van Zile to do everything possible to circulate information concerning this movement for better student housing. The committee consists of girls who are members of girls' organizations, or mixed organizations whose interest and backing will make more nearly possible concerted action in support of the housing program. With Miss Hendricks are working Jesse Evans, representing the Women's Athletic association and the Girl's Loyalty league; Ruth Peck, representing the Y. W. cabinet and the Eurodelphian literary society; Bly Ewalt, the Girl's Loyalty league and the Ionian literary society; Bertha Butler, representing the Browning literary society; Gladys Bushong, the Y. W. cabinet, Alpha Delta Pi; Faith Martin, Girls' Loyalty League and Pi Beta Phi and Sue Carmody, press club, the Collegian staff, and publicity to the state papers.

With these girls rests the responsibility of getting the need for better housing squarely before the people of the state, who can say something about legislation, the members of which are expected, in turn, to write back to their home counties concerning it.

It is suggested that this matter be discussed by every meeting of college organizations who in any way can preach the doctrine of "Better Housing for Freshmen Girls" in such a way that it will reach the hearts as well as the ears of the legislators of Kansas.

PRINT STORY OF ITALIAN OPERA

WILL ENABLE STUDENTS TO UNDERSTAND "BUTTERFLY"

Is Japanese Story Written in Italian by Puccini—Presented by San Carlo

The "book" of the Puccini opera, "Madame Butterfly" which is to be given by the San Carlo Opera company at the auditorium Wednesday evening is written in Italian and in order that the students attending the performance may have a better conception of the action, the Collegian is printing a synopsis of the story.

The curtain rises upon Goro, a Japanese agent showing Pinkerton, the American captain of the warship, "Abraham Lincoln," a home in a hillside in Nagasaki. Sharpless, the American consul is present, and Pinkerton sings to him of the easy-going gospel of the American rover and explains that he has contracted a marriage with Butterfly which is to be

for 999 years, but which may be terminated by either party giving notice a specified time in advance.

The coming of Butterfly and her friends is announced by Goro and Butterfly (off stage) sings of her happiness and love. At the end of the song the party appears on the stage and Pinkerton is introduced. Butterfly's relatives now come in and the contract is signed. Butterfly announces that she has renounced her gods and swears allegiance to Christianity. Priests and relatives curse Butterfly for renouncing her religion in a song of curses. Pinkerton chases them from the house. The act closes with a love scene between Pinkerton and Butterfly.

An interval of three years, during which time Pinkerton's ship has been called to other waters, follows.

The second act opens with Suzuki and Butterfly in their home, which is evidently poverty-stricken. Suzuki urges Butterfly to remarry, but Butterfly insists that Pinkerton will return and sings the most celebrated song of the opera, "One Fine Day" telling of the time when Pinkerton will come back.

Sharpless and Goro call on Butterfly. Sharpless has a letter from Pinkerton and endeavors to read it to Butterfly, but cannot bear to break the news which the letter contains that Pinkerton will never return. Butterfly interrupts him and refuses to listen until Sharpless asks her what she would do if Pinkerton should not return. Sharpless urges her to marry Yamadori who is suing for her hand. She almost collapses, then brings out her baby boy asking Sharpless to write Pinkerton telling him of the wonderful infant whom she praises in a beautiful song.

Suzuki and Butterfly see the "Abraham Lincoln" in the harbor. Butterfly exults and orders the house decorated. She prepares herself and her boy for the coming of Pinkerton.

The last scene of the play is the morning following. It has the same setting as the preceding scene. Sharpless and Pinkerton enter the garden cautiously. They beg Suzuki to break the news to Butterfly. Suzuki sees Pinkerton's American wife, Kate, and almost collapses, but goes down the garden to meet her.

Butterfly comes down stairs as Kate and Suzuki enter. She asks Suzuki if he lives or no. Suzuki answers "yes." Then she asks if he will come again and Suzuki says "no more." Butterfly then asks who Kate is and Kate starts to tell her, asking forgiveness. She also asks to be given the child to rear. Butterfly is, of course, stupefied, but rouses herself and sends word to Pinkerton that peace will come to her and tells Kate to call for the child in half an hour.

Butterfly forces Suzuki out of the room after the others have gone and lights the lamp in front of the image of Buddha, taking a dagger from its sheath and kissing the blade. Suzuki pushes the child in the door. Butterfly, in an intense mother love scene explains to the child that she is dying for him, and begs him to take one last look at his mother's face. She then retires behind the screen after bandaging the child's eyes and giving him an American flag and a Japanese doll. Her groans and the falling of the dagger tell what has happened. As she struggles from the protection of the screen in a last effort to reach her child, Pinkerton and Sharpless rush in and Butterfly dies, pointing to the child.

Sedate Cultural Professors Quarrel Over Dance With Little Prima Donna

"It is a nice place, this Manhattan and the college. It is like the rest of America, the bustle, the energy, the what do you call it?—Oh, yes, the pep. The people are very, very nice." Mile. Hara, the Japanese prima donna of the San Carlo Opera company who is to appear in the leading role of the Puccini opera "Madame Butterfly" at the auditorium, Wednesday night and who has been in Manhattan since last Thursday, was speaking. Mile. Hara and her cousin, Mile. Kotsuyama have completely captivated the students and townspeople who have had the good fortune to be present at any of the many social functions at which the two have been present during their stay. The quaint charm and delightfully sincere appreciation of things American in general and Kansas in particular evinced by the pair of artists have taken the town by storm.

On Friday night Mile. Hara and Mile. Kotsuyama were the guests of Mr. Williams of the music department at the college club. Saturday the prima donna and her companion took a taxi drive over the campus by themselves, going over to the animal husbandry and dairy barns and viewing the herds of the college. When asked concerning her impressions of the college herds and farms Mile. Hara said, "It is very interesting because it is so different from the Japanese farms. At home the farms are so tiny, but so neat. Here they are so big—and not always so neat. Oh,

PAY MORE TO TEACHERS OR SUFFER LOSS

PRESIDENT JARDINE CARRIES MESSAGE TO LEGISLATURE

MUST HAVE 40 PERCENT INCREASE

Standards Will Be Lowered by Faculty Resignations if Larger Appropriations Are Not Made

"The drift of educators from Kansas to other states where better salaries are being offered must stop or Kansas will soon become simply a training ground for teachers for higher educational institutions in other states," President W. M. Jardine of the agricultural college said in discussing the appropriation to be asked of the legislature by the board of administration.

"This appropriation must pass if the Kansas State Agricultural college is to be placed on an equal competitive basis with agricultural colleges in other states which, during the past two years, have been able to offer our trained specialists much larger salaries than our own funds provided," President Jardine added.

Big Loss In Two Years

In the last two years 93 members of the faculty and 78 employees of the college have resigned. A large percentage of these highly trained specialists went to agricultural colleges in other states at increased salaries. A few resigned to enter the much more remunerative field of commercial work for which their specialized training fitted them.

"The board of administration is simply asking the minimum appropriation that will place this college on an equal competitive basis with similar colleges in other states," President Jardine said. "It does not hope to place the college on a competitive basis with commercial enterprises. The educator who would give up his profession simply for more money is not the type of a man we wish to retain. The type we wish to keep is the trained specialist who offers his talent for teaching and investigation where it is most highly appreciated."

"Besides those who already have resigned to accept more remunerative positions, some of our best faculty members have received flattering offers. These men and women have been held on the promise that the next legislature will give us enough money to meet this outside competition."

Young People Will Suffer

"There is no occasion to pity the educator. He is able to take care of himself. The ones who will suffer are the sons and daughters of Kansas unless something is done to retain these valuable men."

"The proposed budget calls for an increased salary appropriation of 40 per cent. From 25 to 30 per cent of this is to be used to increase salaries of the present staff. The rest

is to be spent in bringing much needed additional instructors.

Progress Follows Good Salaries

"In some cases the agricultural college has been obliged to lower its standards in order to fill gaps caused by resignations. Many high schools are paying more for specialists than we are paying for the specialists who train them. How can we maintain present standards, much less go ahead, when our turnover is from 25 to 75 per cent each year, as it has been in the last two years?"

"Only one way. We must have appropriations that will give our present staff salary increases, that will provide for additional instructors for our already overcrowded classes, and that will increase our class room capacity by building for our present overgrowth and for our future expansion."

CHAMPIONSHIP TO GALLOWAY CALF

LIVESTOCK WIN TWO FIRST AT INTERNATIONAL

Sixteen Institutions and 91 Breeders Compete—Is Greatest Exhibition of Kind in the World

Competing against 16 other institutions and 91 breeders from the chief livestock producing regions of America, the show cattle entered by the Kansas State Agricultural college at the International Livestock show at Chicago equalled their previous enviable records made at the Kansas City Royal and at the state fairs by winning a championship, two firsts, three seconds, a fourth and a fifth at what was probably the greatest livestock exhibition in the world held at the greatest livestock center in the world.

Only one other institution, and none of the breeders, ranked higher in their winnings than did the Kansas State Agricultural college. In the classes in which the college showed, seven championships were awarded and one of these went to K. S. A. C. on the Junior Galloway calf which was declared by the judges to be the champion Galloway steer at the show in addition to being first in his class.

The senior yearling Hereford entered by the college placed first in a class of 27; the junior yearling Hereford second in a class of 36; the junior Hereford calf second in a class of 30; the senior yearling Shorthorn steer placed fourth in a class of 26; the grade Hereford fifth among 41 entries; and the steer herd of three Herefords placed second in competition with 15 and 20 herds entered in this class. The champion Galloway had never been shown before, there being two more head shown at the International than at the Royal, or a total of 16 head entered by the college at Chicago.

Dr. C. W. McCampbell, head of the animal husbandry department, who attended the show, reports that although it was known that keen competition would be encountered, yet the competition among institutions, and especially among breeders, far surpassed expectations. The animal husbandry department is more than pleased with the excellent showing made by the college steers, and in particular with the triumph of their favorite Galloway, which is described as "some steer."

Inasmuch as Prof. A. M. Paterson who has charge of the sheep entries has not yet returned, the individual winnings of the sheep were not available, but K. S. A. C. was the only institution competing in the carlot class, in which the college won a first and a second on the two carlots shown, in competition with 27 breeders.

L. J. Brosmyer, associate editor of the Dairy Farmer of Waterloo, Iowa, was a visitor of the K. S. A. C. dairy department last Wednesday.

"Butterfly" Selections at Chapel

To familiarize the students with the better known selections from "Madame Butterfly" the music faculty of the college is taking the chapel period Wednesday, December 8, to give some of the music of Puccini's opera which is to be presented at the auditorium by the San Carlo company Wednesday night.

The college orchestra will play the best known airs from the score of the opera, taking about half the assembly period. The remainder of the period will be used by a chorus in doing some ensemble work with the choruses of the opera. Some of the solos will also be sung by members of the faculty.

AGGIE CAGERS PREPARE FOR COURT SPORT

EXIT KING FOOTBALL ENTER PRINCE BASKETBALL

SEVEN LETTER MEN ARE BACK

Team Has No Coach—Knoth May Take Place—Good Outlook for Championship

King Football has just made his exit at the left side of the stage of sport after making his final bow in the Thanksgiving game. Enter from the right Prince Basketball, attired in his abbreviated costume of the approved cut for the indoor sports season of 1920-21.

Wildcats Prepare for Reception

The Aggie Wildcats are prepared to give the Prince the royal reception that is his due. On the committee are Captain "Ham" Burger of the Aggie five, Shorty and Brady Cowell, guards, Jennings, center, and Knothman and Williams forwards, and general utility men who have campaigned before with the Prince.

In the crowd may be seen any number of new faces, most of them from the freshman squad of 1920. Among the newcomers are Smith, Eradley, and many others who took punishment from the varsity last winter. Only one of the old familiar faces is missing, that of Heinie Hinds who played his last basketball game for the Aggies against Missouri in the finale of the 1920 schedule. And Heinie's just off to one side, for he's going to coach the freshmen this year in an effort to develop pointgetters for the 1922 Wildcats.

Team Lacks Coach

The only thing lacking on the reception committee for His Royal Highness, Basketball, is a coach. Mike Ahearn has looked the country, or at least that part of it adjacent to the Missouri Valley, pretty thoroughly over and has not been able to find a good coach who would be tempted to come to K. S. A. C. for the small salary the athletic board is able to offer this year. He has two applications on file now from men who seem to have the stuff for coaching a Missouri Valley five. Should neither of these men prove acceptable the coaching will be done by E. A. Knoth of the physical education department. Mr. Knoth has had basketball experience and studied the theory of the game at the physical training normal he attended, but does not have sufficient time to devote to coaching unless he can be relieved from some of his duties in the physical education department.

Good Prospects for Championship

The outlook for a championship team was never better than it is this year with seven letter men back and a wealth of good material from last year's freshman squad. The Aggies put up a tough scrap for high honors in the Missouri Valley last year, and with the same gang back that were the only ones to beat the Valley champs in 1920 they should make the conventional "strong bid" for the conference hunting.

COEDS PAINT POP POSTERS

CLEVER DRAWINGS ADVERTISE POPULARITY NIGHT

Mildred Coucher, Ethel Binfield, Frances Kahle, Contributed Majority of the Bill Board Features

How many different "Aggie Pop" posters did you see? Every time you turned around on the campus you were confronted by even a more amusing one and never did you see the same one in the same place twice. Surely some good fairy spent a good deal of the night moving posters from one building to another and adding a few touches that only fairies can give.

Miss Mildred Coucher, senior in home economics, made many of the posters. She has had a good deal of design work and her posters are clever and interesting. Miss Ethel Binfield and Miss Frances Kahle, first semester girls in design contributed also. Many of the effective posters were made on black paper with colored letters and pictures while others were made on white paper with black letters.

NO REST FOR CHEER LEADERS

Woman's work is never done, and neither is the work of the cheer leaders and pep generators. All that these distributors of enthusiasm have to do is to bring to a head, to make active the pep and loyalty to school athletics that exists in every student—though often times in a dormant state—to get the students to manifest this enthusiasm in active support of the teams, and then to keep the said pep from going down with the thermometer.

The football season already belongs to the past, and no one can gainsay that a very high voltage of pep was generated during the season, which crystallized into staunch support that any team such as ours can be proud of. The basketball season is at hand and with six of last year's veterans already out for regular berths on the team, besides a wealth of likely looking material among last year's freshmen court athletes, we should get off to a running start for the valley championship.

It is said that optimism is the mother of pep. If this be true then the pepsters should have little trouble in arousing enthusiastic support through the basketball, track, and baseball seasons. Its only right to give these athletes the same brand of backing that we gave our fightin' football warriors.

MUSIC OR ROAD SHOWS FOR US?

K. S. A. C. is facing a crisis in its development along musical and general cultural lines this concert and opera season. The standing of K. S. A. C. in musical circles has taken great strides since Prof. Arthur Westbrook came to the school as head of the music department five years ago and has advanced to a position unique among agricultural colleges of the country. A close examination of the musical standing of the agricultural colleges of the United States fails to disclose one that can compare with K. S. A. C. in general excellence of courses offered and interest of the student body.

This record has been made in the last few years, but unless the students of the college this year manifest a greater interest in the shape of financial support of the Artist Series and the San Carlo Grand Opera company than has been shown thus far the standing of the college will take a decided slump.

The San Carlo Grand Opera Company and the Artist Series people are brought here on a personal guarantee by members of the music department, and if the seat sale does not cover expenses the deficit must be made up from the pockets of those bringing the artists to Manhattan. Professor Westbrook was able to secure the San Carlo company for one of its two stops in the state solely because of his musical acquaintances and connections and had to guarantee a staggering sum for one man to oblige himself to pay to get the Manhattan performance.

It is necessary for the students to support Professor Westbrook in his grand opera venture by purchase of seats in order that K. S. A. C.'s musical standing may not suffer and also that they may have the opportunity of hearing such high class artists again in the future.

SHINE UP YOUR HONOR

"Watch your hat and overcoat" screams a pertinent and conspicuously placed sign in most any little old hash house. "Well, what's that to us?" complacently snorts dear old K. S. A. C. Just this, if the epidemic of petty thievery continues in this renowned institution of the cow, "steps will have to be took" to bring some of the offenders to justice.

Books, clothing, gym towels, chemistry equipment, all are easily lost, and as easily stolen. Carelessness is undoubtedly a greater factor in this evil than is actual criminal intent. Watch your hat and overcoat and shine up your honor a bit if you find it getting tarnished.

ANNOUNCEMENTS

Kansas City club meets tonight in F2.

Special chapel is held Thursday at 4 o'clock.

All college mixer will be given in the gym December 11.

W. A. A. executive council meets again Wednesday at 5 o'clock.

Chapel program is given by the music department at 10:15 tomorrow morning.

World Fellowship committee of Y. W. C. A. meets Thursday evening at 5 o'clock.

Third year class of the School of Agriculture will meet this evening at 4 o'clock in G51.

Y. W. C. A. is holding tag day tomorrow for the publicity fund for K. S. A. C. dormitories. Ten cents buys a tag.

W. A. A. holds its regular meeting Thursday evening at 5 o'clock. This meeting takes the place of the meeting which should have been held last week.

Engineer's smoker will be held at the community house, Thursday. All students of the college are urged to be present. Plans for the open house to be held next week will be announced.

Kappa Delta Officers Here
Miss Sarah Blue of Union Springs, Ala., and Mrs. D. Shaw of Denver, Col., are the national officers of the Kappa Delta fraternity here to install Iota Psi as the Sigma Gamma chapter. Pi chapter, at Nebraska university, Sigma Sigma chapter at Ames, Iowa, will send delegates to the installation.

Prof. J. B. Fitch attended the Holstein sale, and the meeting of the Holstein association which were held in Wichita during the first part of this week.

Prof. H. W. Cave is attending a dairy show at Paola.

WILL NOMINATE POPULAR COEDS

ALL CLASSES TO AUDITORIUM
WEDNESDAY AFTERNOON

Number of Nominees Unlimited—Is
Popularity Not Beauty
Contest

In accordance with established custom, the Royal Purple will again put on the Aggie Girl Popularity contest. Nominations will be accepted at a joint meeting of all in the auditorium. They will be based on class representation, and everyone will have an equal chance to nominate whom he or she pleases.

"There will be no limit to the number of girls who can be nominated," says Miss Irene Graham, who is in charge of the contest, "but it is the desire of the Royal Purple staff to have a total of between 12 and 15 girls, with approximately this proportion: seniors five, juniors four, and sophomores and freshmen three each."

The six most popular girls last year were chosen in the following order: Irene Graham, Mildred Arends, Elizabeth Circle, Ernestine Biby, Gladys Bushong, and Marguerite Bonduant. Perhaps there is a misconception that the contest is based largely on beauty, but this is not the case, as the promoters of the contest expect the winners to be the girls that are regarded by the majority of the students as the best known and best liked on the campus.

PREPS WIN LAST GAME OF SEASON

HOLD AXTELL HIGH TO 13-8
SCORE

Ag Men Handicapped This Year—All
Games on Foreign Ground—Lack
Financial Support

The School of Ags, playing against a team with a record of 12 victories and but one defeat, put a whirlwind finish to their football schedule when they won from Axtell high school by a score of 13 to 8, Thanksgiving day. The teams were evenly matched as regards weight and both played a clean game all the way through. No substitutions were made by either team, and Glover, right half for the Ags, was the only man hurt during the tussle.

In the first quarter, I. Conroy playing full back for "Hobe's" aggregation, went through for a touch down and Stolley kicked goal. In the second quarter Butler closed the scoring for the Ags by taking the leather across again, but that time Stolley failed to kick, leaving the final count for the

Ags at 13. Following the intermission, Stolley intercepted one of Axtell's passes about one yard from the Ag goal line. There the high school boys pushed their visitors back over the line for a safety. It was also in the third period that Axtell made their only touch down which brought their score to eight and also put the final to their scoring for that Thanksgiving day.

The Ag lineup: Olson, c; Hepworth, r. g.; DeBard, r. t.; Elley, r. e.; B. Conroy, l. g.; Butler, l. t.; Miller, l. e.; Brooks, q.; Stolley, l. h.; I. Conroy, l. b.; Glover, r. h.

The Thanksgiving game closed the season for the local team. Its record for the season stands at 4 defeats and 3 victories. Hobe's men have been handicapped in a number of ways all season. All the games have been played on foreign ground, due to lack of financial support. During the first part of the season A. P. Davidson, dean of the School of Agriculture, was searching high and low for a coach and it was not until after several games had been played that he finally secured "Hobe" Fairman, a former Aggie star to coach the team. Dean Davidson says the prospects for getting more games at home next year are no brighter than they were this season because of the lack of money in the School of Agriculture for athletics.

Will Present "The Messiah"

The churches of Manhattan have announced a union service at the college auditorium on Sunday evening, December 19. At this time the oratorio, "The Messiah," will be given. Under the auspices of the Ministerial union the combined choirs of the churches were organized into a chorus. They elected Professor A. E. Westbrook director, and have been working for several weeks on the oratorio which will be presented December 19.

Mrs. J. S. Thurston of Payette, Idaho, mother of Mrs. P. P. Brainard, is a guest at the Brainard home this week.

Prof. Albert Dickens and W. S. Weidorn are on a trip this week to Wellington, Winfield, and Ottawa. The purpose of the trip is to design and plan farmsteads for local farmers.

LOVEJOY AND RINGO GIVE FACULTY RECITAL SUNDAY

Band to Give Concert December 12—
Will Take Silver Offering

A recital, delightful in every detail was given by Mr. Boyd Ringo, pianist and Mr. Arnold L. Lovejoy, baritone, accompanied by Miss Helen Colburn last Sunday afternoon at the College auditorium.

Mr. Ringo, a new member of the department of music, in his initial appearance before the people of Manhattan made many new friends and admirers. His program, catholic in its appeal, was executed with a mastery of technique. The facile and delightful interpretation of Beethoven and Chopin was played with artistic conception.

Mr. Lovejoy's singing was a genuine treat. He possesses a voice of wonderful range and remarkable smoothness. Those who hear him are sure to look forward to another program because he combines the beauty of a fine lyric voice with those arts of cultivation that insure enjoyment to his listeners.

Miss Colburn is a commendable accompanist because she is blessed with both taste and skill.

Sunday afternoon, December 12, at 4 o'clock, the college band under the direction of Mr. Wheeler, Miss Kimmel assisting, will give a concert. A silver offering will be taken, the money to be used in sending the band out into the state on a concert tour.

SOPHS AND FRESHIES TIE FOR HOCKEY CHAMPIONSHIP

Series of Three Games Played to Determine Victorious Team

The hockey game last Friday evening between the freshmen and the sophomore girls to decide the championship of the three class teams resulted in a tie score of 0-0.

Since the first series of class games resulted in a tie for the freshmen and sophomores, another series of three games was played to decide the championship. The score of the first game, which was between the fresh-

men and the junior-senior teams favored the freshmen with a 1-0 score. The victorious freshmen then played the sophomores, the games resulting in a tie score of 1-1. The third game which was played last Friday with a score of 0-0, leaves the class championship to stand as a tie between the freshmen and sophomores.

DR. E. MEAD OF CALIFORNIA TO ADDRESS SCIENCE CLUB

Will Speak on "California Community Building and Land Settlement"

Dr. Elwood Mead, head of the department of rural institutions, University of California, and chairman of the Land Settlement board of California, will speak Monday evening at 7:30 o'clock, December 13, under the auspices of the Science club. His subject will be, "California Community Building and Land Settlement."

Students and citizens of Manhattan as well as members of the faculty are cordially invited. The meeting will be in the chemistry building, room 26. Those in charge are very desirous of having a large crowd out.

P. P. Brainard, specialist in home study service, spent Saturday showing his uncle, Mr. E. C. S. Brainard, the buildings and equipment on the campus. Mr. Brainard came from Gooding college in southern Idaho, where he has been acting president for the past year. He has heard much of our institution from his daughter-in-law, formerly Miss Bessie Greer, a student of K. S. A. C.

Diamond Solitaires

NO other stone possesses the attractive qualities of the diamond. Its wonderful color is matchless.

Compared with other items that could be bought with the same outlay of money, the diamond is the best investment because it can be worn forever without deteriorating.

We can show you a variety of beautiful stones set in plain styles as shown above or in fancy platinum mountings that are also popular.

ANNOUNCE 1921 GAME SCHEDULE

AGGIES TO PLAY FIVE TITLE FOOTBALL CONTESTS

To Stage Three Valley Battles on
Ahearn Field—Two Dates
Open

The Wildcats of 1921 will have one more chance at Missouri Valley teams than the 1920 gang was allowed. This year's team played but four Valley games, but the 1921 schedule as brought back from the Valley meeting by Mike Ahearn and Coach Bachman has five title contests.

The schools to be played are October 8, Washington university at Manhattan; October 22, Missouri at Manhattan; October 29, Kansas at Lawrence; November 12, Ames Aggies at Ames; November 19, Oklahoma at Manhattan. The new team on the list is that of Washington university which did not play the Aggies this year. The other dates on the schedule are open and will probably be filled with state conference teams on October 1, and October 15. The open date on November 5 may be filled with some school from outside the state, possibly Creighton.

The schedule is much better arranged this year than last, as the title contests with Missouri Valley schools are not in a bunch as they were arranged for the 1920 season. The contests are bracketed in groups of two with a week between each pair with the exception of the Washington university battle which comes in the second week of the season with an open date between it and the next Valley game. Three of the five games will be at Manhattan.

The schedule follows:
October 1—Open.
October 8—Washington at Manhattan.
October 15—Open.
October 22—Missouri at Manhattan.
October 29—Kansas at Lawrence.
November 5—Open.
November 12—Ames at Ames.
November 19—Oklahoma at Manhattan.

INSTALL KAPPA DELTA CHAPTER

LOCAL GROUP IOTA PSI GRANTED
NATIONAL CHARTER

Initiation Conducted December 2, 3,
4—Sorority Has 80 Active Chap-
ters—Founded in Virginia
1897

Installation services of the Iota Psi local sorority of K. S. A. C. as Sigma chapter of Kappa Delta sorority were conducted December 2, 3, 4, at the chapter house, 1301 Poyntz avenue, by two national council members, Miss Sarah Blue of Union Springs, Ala., chapterian, and Mrs. D. Shaw Duncan of Denver, Col., registrar; assisted by Mrs. J. B. Fitch, of Illinois Wesleyan chapter, who is the wife of Prof. J. B. Fitch of this college; Miss Emily Anderson from the University of Wyoming chapter, Laramie, Wyo.; Miss Winifred Sinnard and Miss Ethel Elk from Iowa State college, Ames, Ia.; Miss Buella Royer, University of Denver chapter, Denver, Col.; and Miss Mary McCoy, Mary Leslie, and Lois Margaret Hartman, from University of Nebraska chapter, Lincoln, Neb.

The installation group was composed of the following alumnae members: Mrs. Vera Holtz, Mrs. Jessie McCampbell, who are wives of faculty members; Ella Belle Stinson, Kansas City; Julia Keeler, Osborne; Anne Lorimer, Olathe; Marie Thomas, West Branch, Mich.; active members: Luella Morris, Wichita; Orpha Maust, Garden City; Pearl Hoots, Winfield; Marian Brookover, Eureka; Irene Graham, Manhattan; Katharin McQuillen, Clay Center; Esther Waugh, Amherst, Mass.; Vera McClelland, Manhattan; Claramary

Smith, Mound City, Mo.; Kathleen Knittle, Manhattan; Marian Chandler, Tulsa, Okla.; Dora D. Dakin, Ashland; Marie C. Kent, Franklin, Nebr.; Maurine Ames, Moline; Edith Miller, Council Grove; Carol Knostman, Wamego; Helen Bentley, Sterling; Mary Fitzgerald, Waterville; Elsie Johnson, Colorado Springs, Colo.; Amy Lemert, Cedarvale; Margaret Shrader, Cedarvale; faculty members: Miss Grace Hesse, Ann Arbor, Mich.; Miss Berenice Fuller, Topeka; (chaperon at the chapter house); pledges: Betty Coulter, Wichita; Gladys Gritz, Fall River; Bertha Faulconer, El Dorado; Alyce Carter, Mound City, Mo.; Ruby Pruitt, Wichita; Fern Humphreys, Chicago, Ill.

Kappa Delta sorority was founded October 23, 1897, at Virginia State Normal, Farmville, Va. For the first decade, Kappa Delta chapters were restricted to the south. But in 1907 the chapter at Northwestern university, Evanston, Ill., was founded. From that time on extension has not been restricted to one section of the country but is nation wide. Kappa Delta has 30 active chapters, 10 inactive chapters, and 18 alumnae associations which are scattered throughout the United States.

The first degree pledge pin is a Norman shield of white enamel, divided into four sections by a green equilateral triangle, bearing in the triangle three gold stars. The second degree pledge pin is an open equilateral triangle of gold superimposed

upon a dagger, straight lines connecting the center of the base of the triangle with the center of each side, forming the letters Kappa Delta. The official badge is diamond shaped, of black enamel, with plain or jeweled border. In the center are the Greek letters Kappa Delta in gold, above is a vertical dagger and below the letters A. O. T. The recognition pin is a quarter of an inch gold dagger.

McClelland Back From London

Rev. J. M. McClelland of Manhattan has received word from his son, Lieut. H. M. McClelland, '16, that he has arrived in the United States from

London and goes to Washington for further orders. Lieutenant McClelland has been in London for more than 18 months in connection with the air service office there and assisting in the work of adjusting claims between the United States and England. He recently made trips in Ireland, visiting from Dublin to Belfast. He also made a trip to Glasco. He is expected to arrive in Manhattan soon.

The dairy department has just received the loving cups won by the K. S. A. C. teams in the Chicago National Dairy show contest this fall.

THE KANSAS STATE COLLEGIAN

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, FRIDAY, DECEMBER 10, 1920

NO. 25

NOMINATE 19 TO POPULAR CO-ED RACE

SEVEN SENIORS AND FIVE JUNIORS NAMED AS NOMINEES

ANNOUNCE WINNERS JANUARY 14

Royal Purple Sales Start This Week—Each Purchaser of Book Entitled to 25 Votes If Entire Amount Is Paid Down

Nineteen popular coeds were nominated as candidates for the annual popularity contest at the joint class meeting in the auditorium Wednesday afternoon.

Of this number seven were seniors: Gertrude Ramsey, Delta Zeta, Eurodelphian and Quill; Bly Ewalt, Ionia, Forum, Girls' Loyalty club; Effie Hendricks, Tri Delta, Omicron Nu, chairman of K. S. A. C. Housing committee; Ruth Willis, Tri Delta, W. A. A.; Luella Morris, Kappa Delta; Marcia Seiber, Eurodelphian, Theta Chi Gamma; Hortense Caton, Pi Beta Phi, Eurodelphian.

Five Juniors In Race

The five junior girls nominated were: Rowena Thornburg, Chi Omega, Purple Masque, Ionia, Theta Chi Gamma; Ruth Peck, Eurodelphian, Theta Chi Gamma, junior class president; Louise Mangelsdorf, Tri Delta, Ionia; Rowena Turner, Tri Delta; Elizabeth Dickens, Delta Zeta, Quill, Eurodelphian, Theta Chi Gamma, associate editor of Collegian, Theta Sigma Phi, Aggie Press club.

Three sophomores nominated were: Ella Wilson, Delta Zeta; Ramona Abrams, Browning, Aggie Press club; Frances Johnstone, Chi Omega, Aggie Press club.

Four freshmen girls were Sue Carmody, president of Aggie Press club, Alpha Delta Pi, Ionia, Theta Sigma Phi, feature editor of Collegian, Collegian board, freshmen commission; Margaret White, Kappa Kappa Gamma, freshman commission; Geraldine Hull, Pi Beta Phi, freshman commission; Ruth Norman, Kappa Kappa Gamma, Aggie Press club.

Book Sale Starting

The sale of the Royal Purple started Thursday morning. Each purchaser is entitled to 25 votes if he pays the entire sum at once or to 10 votes if he pays only part. For every 10 books any one sells, he may have 20 votes, and for every book after that two votes are given.

Voting is to be held January 14, and the receipt for the book must be presented at the time of voting. The result of the contest will be announced at the Popularity ball which is to be given at Harrison's hall the night of January 14.

Announce Winners January 14

Special interest is attached to the Popularity ball which will be held the evening of January 14, the day on which the votes will be counted. Some novel method of announcing the successful candidates is always used, and although the method to be used this year has not yet been announced it is rumored that it is to be of the same quality as that of previous years. Last year cartoons of the successful candidates were shown and year before last pictures of the winners were flashed on the screen at the ball.

COEDS TO PUSH DORM CAMPAIGN

EFFIE HENDRICKS HEADS PROMOTION COMMITTEE

Halls of Residence Necessary to Relieve Acute Rooming Situation in Manhattan

Campaigning for the halls of residence for girls at state schools is steadily going forward at this college under the management of Miss Effie Hendricks, chairman of the promotion committee.

Dean Van Zile when talking about the dormitories said, "It is hoped that K. S. A. C. will get one dormitory that will house 150 girls. Even though this will care for only a limited number of students it will relieve the acute situation in regard to rooms. Freshmen girls will be given preference in assigning rooms in the dormitory, but they will not be required to live there unless they choose to do so. Since the home life in the cooperative clubs and the sororities is highly satisfactory, such organizations will be encouraged."

"I sincerely hope that the next legislature will find a way to provide sufficient credit for the erection of one building on the campus of this college to be used as a hall of residence for girls," said President Jardine.

"All first class institutions, co-educational and others are coming to realize as the enrolment of students grows larger each year that dormitories are an essential part of the physical lay-out of the whole educational plan. Those institutions that have dormitories are very enthusiastic over their value in furnishing a suitable environment and social advantages."

Miss Izil Polson, instructor in journalism, suggests these ways by which students can help in this campaign.

"Talk dormitories here so as to get the idea plainly before the entire student body and the faculty. Write home to your families, friends, and neighbors in favor of the project."

"County clubs have a field to cover in this work. Writing to the county papers and to the congressmen from one's own district are distinct aids. Representatives should know how students feel on the question, and an understanding of student and home community feeling in favor of the plan will go far towards votes in its favor when the matter comes before the legislature."

ACKERT TO GO ON EXPEDITION

CONDUCT RESEARCH OF PARASITIC DISEASE IN TRINIDAD

Workes Under Direction of International Health Board—Will Start in April and Return in August

Dr. J. E. Ackert, of the department of zoology, has accepted an invitation to become a member of an expedition to the island of Trinidad for research of parasitic diseases, during the coming year.

This expedition is under the auspices of the International Health board, the director being Dr. W. W. Cort, parasitologist in John Hopkins medical school. The board of administration has granted Doctor Ackert leave of absence from February 1 to September 1, 1921. From February 1 to the close of the expedition Doctor Ackert will be a member of the department of medical zoology of John Hopkins university.

Doctor Ackert has carried on investigations in parasitology in the Kansas experiment station for some years, and has published several papers describing his discoveries. The invitation to join this expedition was due to his training and accomplishments in this special line of research.

After two months preparation in Baltimore, the expedition will sail for the island of Trinidad in April. The expedition will return to this country in August. Doctor Ackert will resume his work at the College September 1, 1921. Mrs. Ackert will accompany her husband on the expedition.

TO GIVE FIRST OF SERIES OF BAND CONCERTS SUNDAY

Miss Katherine Kimmel to Assist—Plan Tour of State

Following the lead of the musical department in providing entertainments for the college and townspeople the band under the direction of Mr. Wheeler is going to give a series of concerts beginning December 12. The concerts which were missed at the first of the year are to be given now.

Miss Katherine Kimmel will assist in this concert. This is an added attraction as her singing is esteemed highly by all who have heard her.

A silver offering will be taken Sunday for the purpose of sending the band out into the state on a concert tour.

Miss Annabel Garvey attended the wedding of Jessie Isabelle, daughter of Margaret Hill McCarter, at Topeka Saturday afternoon.

THE BUSY BODY

Question asked: "What do you think of cheek to cheek dancing?"
Miss Machir: "Well! You know what I think of it without asking me!"
Miss Pauline Clark, College Canteen director: "Well, I really—your see, I'm so short I've never tried it so I'm not in a position to say."
Prof. C. E. Rogers: "I'd think they'd be ashamed to do it in public."

"Baker Kids" to Go To the Y. W.—Y. M. Party December 11

Have you heard about all the jolly, fun-loving kids who are to help make the Y. W.—Y. M. party a success? This, the annual kid party, is to be held in the big gym next Saturday night, and is to be the best ever.

Chief among the participants of the evening's fun will be the "Baker Kids." Come and see who they are—it will surprise you. They are such naughty children that it is necessary for their father, Mr. Le Barge, of Camp Funston to come along to look after them. Of course lots of other children will be there, but not all youngsters are such scrape-graces that their guardians have to accompany them to parties.

Miss Mildred Inskip is to have charge of the amusements for the evening—if anything more amusing than the appearance of the guests is necessary.

Editor's Note: It is rumored that the "Baker Kids" have been so naughty the past week that they are not to be allowed to come to the party, but Mr. and Mrs. Santa Santa Claus have promised to take their place on the program, which will be all right, won't it?

FORUM HOLDS INITIATION FOR TEN NEW MEMBERS

J. W. Searson Conducts Services—To Join Students Must Pass Debate Tryouts

Formal initiation services were held at 5 o'clock, Thursday, December 2, for the 10 students who were eligible for the Forum. Initiation services were conducted by Prof. J. W. Searson. Those initiated were Theodore L. Bayer, William Knostman, W. W. Weaver, E. J. Jelden, F. L. Haggard, C. R. George, Carol Knostman, Lucille Whan, Marjorie Annette Kauser.

Requirement for membership is that all members must have made themselves eligible to work on the debating squad by passing the debate tryouts.

Sophs Install Officers

Installation of officers of the sophomore class was held Thursday evening at which time the following officers were installed: president, H. L. Sebring; vice president, Norman Planter; treasurer, Joe Magner; secretary, Lorna Troup; women's athletic director, Renna Rosenthal; men's athletic director, Paul Tharp; S. S. A. G., Robert C. Spratt and Franklin Miller; marshal, Donald Corby.

It was voted that the Royal Purple assessment will be \$4 for the sophomore class. Robert Spratt will have charge of the assessment.

Prof. Robert W. Conover recently returned from visiting Fred Blatchly of the Oklahoma university at Norman.

REDUCE STATE FUNDS ASKED FOR COLLEGE

JARDINE THINKS THERE IS NO CAUSE FOR WORRY

K. U. AND K. S. A. C. HIT HARD

Approve 25 Per Cent Salary Increase—Agricultural Building and Auditorium Are Favored Here

Of the reduction of \$6,250,000 recommended by Fred W. Knapp, state auditor, in the total appropriations asked by all departments of the state government, K. S. A. C. comes in for her share of blue penciling with a reduction of \$1,366,550 on the total of \$3,517,800 that she requested.

The appropriations asked for by all departments of the government totaled \$21,531,344, and of these requests the auditor recommends but \$15,245,649.

"Don't Worry," Says Jardine

President Jardine of K. S. A. C., however, thinks that there is not a great deal of cause for worry, and when interviewed by a Collegian reporter concerning the recommendations of Mr. Knapp he said: "I would rather not discuss the matter because I do not take his recommendations seriously. Mr. Knapp has not visited the institution since I have been president and I consider that no man is competent to make recommendations who has not visited the institution in recent years so that he might know the actual conditions in the college."

"While I have reduced the requests \$6,250,000 for the next biennial period," said Mr. Knapp, "I am prepared to give to the legislature a reason for every reduction made. I have allowed liberally for general repairs and upkeep of state property and have allowed 25 per cent increase in the salaries and wages and also in the general maintenance appropriations for the institutions with which to provide for their growth. I have recommended just what buildings seemed to be absolutely necessary at the state hospitals for the insane and at the educational and other institutions. While many other buildings are no doubt needed I question whether this is the opportune time to erect them."

Aggies Hit Hard

University of Kansas and K. S. A. C. have been hit the hardest of any of the other institutions of the state. K. U.'s request of \$4,024,018 is reduced to \$2,380,750, and the requests of K. S. A. C. from \$3,517,800 to

\$2,151,250. These reductions upset the building plan of both these schools most disconcertingly, although Mr. Knapp has approved a 25 per cent increase in salaries. The auditor disapproves entirely the request of the University for \$400,000 to build additions to the medical school hospital at Rosedale. He approves, however, \$100,000 for the university heating plant, \$30,000 for equipping the cafeteria, \$100,000 for additions to the library, and \$30,000 for additions to the Engineering hall.

K. S. A. C.'s reductions have been handled in something of the same manner. \$200,000 for building the west wing of the agricultural building, \$50,000 for the auditorium, and \$100,000 for the home economics building and the cafeteria. The college had planned a much more extensive building program, such as additions to the Veterinary hall, but the auditor put a deep blue check on practically all of them. Other institutions, as well as state departments, all over the state have suffered in just the same way.

SCHOOL OF AGS TO HOLD DEBATE

LINCOLN MEMBERS DEBATE "OUTSIDERS" JANUARY 15

Plan to Challenge High Schools this Year—Cannot Join Debating League

Interest in debate is running high among the men in the School of Agriculture. Two teams are now being recruited—one from the men in the Lincoln literary society, and one from the men outside the society.

The "outside" squad will hold its tryouts December 11. The men who win out at that time will debate the Lincoln team immediately after Christmas vacation, probably January 15, on the subject, "Resolved: That the United States establish a mandate over Armenia."

Those who are planning the work have the pep, and the students are already getting behind the proposition in a way that assures a School of Ag debating team for next semester. The last several years the Ag school has not been having any debates with outside schools. This year it is planned to choose a team from those debating which will represent the School of Ag against high schools and other secondary schools which they hope to challenge. Being connected with the college as it is, the prep school is barred from all high school debating leagues, and is therefore forced to debate independently with the various high schools and secondary schools with which it can schedule an argument.

CHOOSE HOCKEY VARSITY TEAM

NAMES WERE READ AT W. A. A. PARTY

Five Freshmen, Five Sophomores, One Junior and One Senior Elected

The names of the girls who have been chosen for the varsity hockey team were announced at a party given by the Women's Athletic association in honor of the hockey teams Monday evening.

The program, which was most informal, consisted mainly of stunts.

The senior stunt, "Gee, Ain't it Fierce?" caused a great deal of amusement despite the fact that it portrayed a serious moment in history, the making of our country's flag.

"How to Make Waffles Out of Old Shoes" was the miraculous invention demonstrated by the juniors. The sophomores could have given pointers to the R. O. T. C. in military tactics. Their alertness in response to the commands "dress right" and "dress wrong" was most astounding.

"The Hockey Tournament as We Saw It" was cleverly presented by the freshmen. Something entirely new and economical in stage scenery was successfully introduced.

After the stunts, Miss Belle Hagan read the names of the girls who have been chosen for the varsity hockey team. They are, freshmen: Mary Knittle, Laura Fayman, Dorothy Lukert, Ruby Saxton, Alice Marston; sophomores, Lillian Rommel, Katherine Horner, Helen Priestly, Hattie Betz, Nellie Jorns; juniors, Dorothy Ryherd, seniors, Corinne Thiele.

Miss Ruth Brett was a dinner guest at the Pi Beta Phi house Friday.

FIFTEEN MEN GET FOOTBALL K WEDNESDAY

SMALLER NUMBER OF LETTERS THAN USUAL

MANHATTAN C. OF C. FEELS TEAM

Ike Gatz Is Entitled to Wear Six Stripes—Few Substitutions in Games

The final reward to the Aggie football warriors of 1920 was given when the athletic board announced the awards of letters to 15 of the first string players on Wednesday. This is the smallest number of letters that has been awarded at K. S. A. C. for the last three football campaigns. However, but few substitutions were made in the games of the season just closed, and the players who substituted, almost without exception, were in for but a few minutes and then in not more than two Missouri Valley contests.

Nine Linemen Rewarded

Nine linemen were given the purple K that marks the wearer as one to whom homage is due from the fans. Randles and Sebring who played the whole season through at the wing positions, Gatz and Stauffer, tackles, Huston, Marshall, Hahn, and Schmitz, all four of whom flanked the center, and Cleland, center, were the athletes comprising the forward wall of the Wildcats that were awarded letters. In the backfield six men drew the insignia. Axline at quarter back, Hinds, Warren, Cowell, Everett Cowell at halfback, and Sears and Goerke at fullback comprise the backfield roll of honor.

Ike Wears Six Stripes

Stauffer, Marshall, Schmitz, Axline, Sears, and Goerke are all receiving their first letters. The other men who were awarded K's are two or three stripe men. Gatz is entitled to wear six stripes, probably a record at K. S. A. C. "Ike" was captain this year and the S. A. T. C. year of 1918 when he took the place of Johnny Clark who was called to officers' training camp before the season opened. That gives him two red stripes for his captaincies, and he wears four purple stripes for his four years of campaigning with the Wildcats. Huston and Hinds are three letter men, but Dewey has one more year of football as one of his stripes represents the S. A. T. C. year of 1918 which does not count in Missouri Valley eligibility standings. Hahn, Cleland, Randles, Warren, Cowell, and Everett Cowell are all two letter men in football.

C. of C. Feeds Team

The entire football squad is to be entertained by the Manhattan Chamber of Commerce at a banquet next Wednesday or Thursday. At this time the letter men will elect the captain for 1921.

SELL TAGS FOR DORMITORY FUND

MONEY WILL BE USED FOR PUBLICITY CAMPAIGN

Miss Effie Hendricks Gave Talk in Assembly Concerning Need for Halls of Residence

Tags were sold Wednesday after chapel for the purpose of raising funds for a publicity campaign to get the legislature to appropriate funds for the construction of girls' dormitories at state institutions.

The sale was conducted by team chairmen who appointed their helpers. The team leaders were Jessie Evans, Bly Ewalt, Susan Carmody, Ruth Peck, Bertha Butler, Gladys Bushong and Faith Martin. The amount of the sales is not yet ready to be reported.

Miss Effie Hendricks, who is the chairman of the committee at K. S. A. C., gave a talk in chapel in which she pointed out the need for dormitories. Some of the needs as she gave them are to provide more rooms for students, to standardize prices and reduce expenses, to create correct standards as regards to health, habits of study, expenditures of time and money, to further a democratic spirit among students, and to make and preserve a home atmosphere.

Mrs. Patricia Abernathy Jenkins, who was an instructor in the music department here for three years, is visiting with Miss Florence Helzer this week.

SIX DORMITORY REASONS

Dormitories are needed at K. S. A. C. They are needed to provide more rooms for students; to standardize prices and reduce expenses; to create correct standards as regards,

Health,
Habits of study,
Expenditures of time and money,
Social life; to make and preserve a home atmosphere.

To further a democratic spirit among students. The women of Kansas have come to recognize the need and are declaring that the time is at hand when Dormitories at the state institutions are an essential part of the equipment. They have organized into the Kansas Council of Women and will ask the legislature to pass a bill which will make it possible for a Dormitory to be erected on our campus.

The bill will provide that the project be put upon a basis of investment by the state, the funds to be raised by the issuing of bonds by the state; that the state will pay interest on the bonds and provide for a fund which in time will redeem them; that the students who live in the Dormitories be required to pay a rental which will cover all cost of maintenance.

It is hoped that K. S. A. C. will get one dormitory that will house 150 girls. Even though this will care for only a limited number of students it will very materially relieve the acute situation in regard to rooms. Freshmen girls will be given preference in assigning rooms in the dormitory, but they will not be required to live there unless they choose to do so. Since the home life in the cooperative clubs and in the sororities is highly satisfactory, such organizations will be encouraged. It is not intended that the dormitory will in any way interfere with them.

Student support of the movement is desired by the women of the state. It is therefore strongly urged that every K. S. A. C. student take an active interest in the legislative campaign for dormitories.

MARY P. VAN ZILE,
Dean of Women.

NOW'S THE TIME TO TALK

Aggie students will have a chance to do some real lobbying in the next few weeks before the opening of the state legislature. They will have a chance to use their influence toward securing the appropriation of a sum sufficient to build the housing apartment for freshmen girls.

It is the desire of the Kansas Council of Women, composed largely of the mothers of Kansas and the deans of the state institutions that there be provided for the girls just entering college a suitable place to live. No one acquainted with the facts can say that such a house is not needed. No one who has not tried to secure rooms for girls in a crowded college town has any right to an unfavorable opinion on the subject. People with rooms to rent are everywhere noted for their aversion to girls. There are many girls in K. S. A. C. this year living in uncomfortable quarters for the reason that more comfortable ones can not be found.

There is an idea current that living in the apartment will be compulsory for the first year girls. It is an absurd misconception. The house will be provided, after which it will be up to the girls. There will be, however, no difficulty in filling the apartment which will accommodate 100.

It is probable that the usual opposition of the legislature to spending money will be encountered. And it is up to the students of K. S. A. C., who know the situation and who should be interested, to cooperate with the Kansas mothers in the effort to secure a living place for the girls.

This is your chance, Aggie student, to do something really worth while, and to exercise your rights as a citizen. Get in touch with your representative and your state senator. Find out where they stand on the proposition and why. If they seem to be non-committal pin them down to a statement one way or the other.

"GETTING BY"—NOT ALWAYS SO EASY

We as college people are intolerant of advice and lectures. We are only too well aware of the important part we play in our own world, the relative importance of which we overestimate. Yet even in our own world we are notably indifferent. To be honest the talk about cherishing the ideals of our institution has very little influence upon us. In so far as it is not especially inconvenient for us we will help. Nor is there anything particularly abnormal in such a state.

We are no different from the rest of the world, which is interested in ideals that promise to advance the personal interests. Abstract principles of justice and humanity are wonderful things to philosophize on after dinner, but getting down to actualities, a thing has to clearly appeal to our personal welfare to command anything but a passive interest on our part. When we run across an individual who is sacrificing himself to an abstract principle we think, "Poor nut" and pass on. His reward will come in the honor of a future generation that will be able, while commiserating over a poor nut of their own, to see the deeds of the departed one in their true significance.

As a part of this perfectly natural outlook the gentle art of "getting by" has flourished until it has attained a prominence in college life enjoyed by few other "institutions." It has indeed become an institution. We do what work will not inconvenience us and trust to our "line" to get us safely past the profs and deans and on the right side of the class book. As far as it goes, which is quite a ways it is a fine thing. But it is possible, even probable, that we are kidding ourselves along, or what would be worse for our dignity, being kidded. Maybe they haven't the heart and so just let us suffer.

But sometime, somewhere we will have to buck the world and it will probably take more than a fertile line and a winning smile to insure our three squares and movies. The world is unfortunately composed of hard headed future bosses and patrons who are unable to appreciate a good line unaccompanied by delivery of goods as advertised. We will be up against the real thing in "getting by" and it will probably require a little more than the gift of bull. We ought to think it over occasionally.

"SORRY, BUT I DON'T KNOW THE GAME"

For 20 years two chess players met daily at Brown's Chop house, took their places silently, silently played their game, and silently departed. For 20 years a third party sat by and silently looked on.

Then one of the players failed to show up—for the first time in 20 years. After waiting a few minutes, his partner said to the onlooker, "I guess he isn't coming to-day. Will you play his men?" "Sorry," was the answer, "but I don't know the game."

He had followed every move for 20 years but he didn't know the game. He had watched the drama of king and castle for two decades without sensing a single undercurrent of strategy, speculating on a single motive, or anticipating a single coup.

He had displayed infinite patience in looking at the game, but he couldn't be bothered looking into it. He showed every symptom of life except its first symptom—curiosity.

He belonged to that listless army of passive observers who clutter up the side lines of business—men who look without seeing, listen without hearing, do without understanding.

Placed in an office, at a bench, he would remain 20 years

ignorant of his neighbor's job, his superior's problems, his own significance. When the opportunity for advancement came, he would have to say, "Sorry, but I don't know the game."—The Better Way.

DO YOU HAVE YOUR RUBBERS ON?

Do you have your rubbers on? No of course you don't, not even when Aggieville is flooded and the water is up to your ankles. The Aggie girl thinks rubbers are a back number. Yes she wore them to country school, but she is in college now. "Shoes are perfectly good, One doesn't need rubbers" believes the fashionable coed.

She would rather soak her shoes that father paid \$15 for, and sit all day in the class room with cold feet, than to look "jakey" or like a "back number." The college girl of the west goes rubberless, for in college slang she thinks she "knows her groceries" when it comes to style.

In Eastern cities the girls of the most exclusive circles are wearing overshoes, under the assumed name of galoshes or arctics. Under this protective shoe they wear the daintiest of slippers and shoes. They wouldn't appear on the street in snowy or rainy weather without their arctics. They contend that galoshes are one of the most comfortable and sensible styles that has been originated in the last ten years.

Now that corn has dropped to 35 cents a bushel and shoes are still a fabulous sum the college girl of the west might at least consider the subject of wearing rubbers. Just think girls they are really the latest thing in footwear too.

Things we think; things others think; and things we think of things others think.

Dear Editor: Wouldn't you like to know that every freshman girl was going home to a nicely warmed and lighted room? I would.

There are about 150 freshmen girls who had no rooms this fall when school opened and when they did get their rooms, many of them were not cosy and comfortable, and some of them were too far away from the college. A dormitory is the only thing for a school the size of K. S. A. C. This would do away with the scramble for rooms. A dormitory would help to bring more girls here to school. Mothers and fathers are strong for dormitories.

I do hope we can get the bill providing for "Halls of Residence" through the legislature. I think a dormitory would be a success and that the freshmen girls would appreciate it.—Hortense Caton.

Dear Editor:—Now that Aggie Pop night is over let's all get behind

the dormitory movement, and make it as big a success as the other things the K. S. A. C. students boast for.

The need for at least one dormitory for women is great here, because of the fact that the school has grown so much faster than the town, and it nearly impossible to secure desirable rooms if one enters school a little late. If anyone is the least bit in doubt of this statement, start out today and try to find a room, and before the end of two weary days of tramping you will decide, as do many girls, that K. S. A. C. is not the school for you.

Every year there are a great many girls who come to Manhattan to attend K. S. A. C. who are unable to secure a desirable place to live and so go to some other school. Can we afford to have this happen many more years?

The way to remedy this is to first talk it up in your home town Christmas vacation. Second, to ask your representative to the state legislature to vote for the bill providing for "Halls of Residence in State Schools" which is to be presented at the next session.

Come on, Aggies, let's get this bill through the legislature.—Bly Ewalt.

The road material laboratory has recently received brick samples from commissioners of Cottonwood Falls where paving work is being done. Cement samples were also received from project number 15 at Hutchinson.

Miss Susan Carmody has been absent from classes since Monday on account of illness.

ANNOUNCEMENTS

Junior assessments of \$5 are due December 11.

Browning literary society will meet tomorrow afternoon at 3 o'clock.

Ionian literary society will give its regular program tomorrow afternoon at 3 o'clock.

College band will give a concert in the auditorium Sunday afternoon at 4 o'clock. A silver offering will be taken.

Science club will meet Monday evening at 7:30 o'clock. Dr. Elwood Mead will speak on "California Community and Land Problems."

Next week's assembly program which is to be given by Hamilton and Ionian literary societies will be Thursday morning at 10:15 o'clock.

The Shawnee county club which was organized Tuesday, December 7, will hold an important meeting Monday, December 13, at 5 o'clock.

Every student from this county is urged to attend. Watch the bulletin boards for the place.

Sophs Must Pay This Week

Sophomores, have you noticed that the window just across from the post office window is open? It is ready for business and you must supply the demand. You have only a few more days in which to pay your Royal Purple dues. Saturday, December 18, will be the last day for the sophomores to come across with the coin. The class will have, however, until the Christmas holidays to have their pictures taken for the Royal Purple.

Melchers Lectures to Ags

Prof. L. E. Melchers gave a lecture to the students of the agricultural division, Thursday on the general importance of botany to all agricultural branches. Professor Melchers illustrated his lecture with charts.

Mrs. David Bice of the Delta Zeta house, and Mrs. Miller of the Kappa Gamma, spent Wednesday in Junction City, returning to Manhattan late in the afternoon.

MILLING COURSE PROMINENT HERE

ONLY TWO SCHOOLS ATTEMPT
TO TEACH SUBJECT

Commercial as Well as Experimental
Methods Are Used in Labora-
tories

Flour mill engineering is one branch of engineering, as taught at K. S. A. C., which leads the country in the extensiveness of instruction. Penn State and K. S. A. C. are the only two schools attempting this course. Several schools have a milling elective course on a small scale but these two schools are the only two where it is given in a full four years' course.

Kansas State, being located as it is in the wheat belt, is an ideal place for the instruction of this subject. The course is backed by the millers in this part of the country. The Kansas Flour Mills company offers a scholarship each year to men of the junior and senior class of this course. This scholarship is awarded by a board picked from the faculty of the school.

The mill and laboratories are of commercial size and commercial methods are used. The mill has a capacity of 75 barrels and there are storage bins in connection for the storing of the wheat used. This is bought on the market the same as the wheat for any commercial mill. The different products of the mill are sold in and around Manhattan, and it is one of the self supporting departments of the school.

Besides the milling proper, wheat and flour testing and experimental baking are taught thus giving a graduate a choice of the production or laboratory side of the business.

K. S. A. C. is the only school equipped with a commercial as well as an experimental mill. This is of great value to the student, as it is upon this plan that the actual workings of a mill are learned. Besides the instruction offered as outlined, a course is also offered for the construction and design of mills.

ALMOST 2,000 HEAR BUTTERFLY

OPERA A FINANCIAL AND ARTIS-
TIC SUCCESS

Large Crowd Shows Appreciation of
the Unusual Work of
Mlle. Hara

Puccini's opera "Madame Butterfly" which was staged at the auditorium by the San Carlo company Wednesday, December 8, was better attended than any other of the entertainments sponsored by the music department this year and was a decided success in an artistic way. The guarantors of the performance were assured of an "even break" on the finances by the size of the crowd, which numbered about 1,800.

The audience was an appreciative one and accorded the principals the conventional "storms of applause" for their singing of the better known arias of the opera. The crowd appreciated especially the singing and acting of Nobuko Hara, the Japanese prima donna who sang Butterfly. She has been the guest of Manhattan for

the past week and many in the audience felt a personal interest in her on account of their acquaintance with her.

The acting of the whole company was above that usually expected of a grand opera company. The principals were excellent in both singing and acting and the chorus and minor roles were just as good in their way. Gaetano Merola, conductor of the orchestra and maestro of the chorus has developed a well balanced support for the leading roles that makes the performance of the company especially pleasing.

The rich, full contralto of Stella De Mette who played the part of Suzuki, Butterfly's maid, provided a perfect complement for the soprano of the prima donna. The duos of Butterfly and Suzuki were well received by the crowd as was the solo work of Pinkerton, which role was played by Giuseppe Agostini.

To Improve Teaching Efficiency

F. D. Farrell, dean of agriculture, and the different heads of the departments of the division held a meeting Tuesday evening, at which they discussed the question of improving the instructional efficiency of the division.

One of the plans which was formulated at the meeting, is to make an inquiry of selected graduates of K. S. A. C. for the purpose of securing the ideas of the graduates, as to features of instructional work which should be amplified, which should be changed, which should be eliminated and any new features which might be added. These suggestions were considered to apply both to subject matter, and to method of recitation.

A committee, consisting of R. I. Throckmorton, R. J. Barnett, and H. W. Cave, has been selected to make an attentive draft of these questions, and of the replies.

Exhibit Pictures This Week

A portfolio of pictures that is sent out by the American Federation of Arts is being shown by the Applied Arts department this week in A68. There are twenty pictures in the portfolio. It was sent out with the purpose of giving persons remote from art centers the opportunity of not only seeing but procuring good pictures for the home. These pictures are only samples, but duplicates can be secured by ordering them from the American Federation of Arts, 1741 New York avenue, Washington, D. C. Everyone is invited to come and look at the pictures.

ELECT OFFICERS OF COMMISSION

FLORENCE BARNHEISEL HEADS
ORGANIZATION

Marie Correll Is Treasurer—Work
Will Train Freshman Coeds in
Standards of Y. W.

The freshman commission is composed of 60 girls this year instead of 40 as in previous years. They are divided into two divisions, but with only one president and treasurer. Miss Florence Barnheisel has been elected president and Miss Marie Correll treasurer. There are to be two vice presidents, one elected from each group. These will be elected at the first meeting this week.

The purpose of the freshman commission is to train the girls according to the standards of the Y. W. C.

A. and to make them all around college girls in their sophomore, junior, and senior years.

The intensive six weeks training begins this week. Miss Irene Graham is in charge of the work and will meet with the separate groups.

Doctor Mead to Speak

Dr. Elwood Mead, head of the department of rural institutions of the University of California will speak on Monday, December 13 in C26 on "California Community Building and Land Settlement." All students are cordially invited and as the subject is an interesting one the lecture should be well attended.

Y. W. to Present Pageant

The world fellowship committee of the Y. W. C. A. is planning to present a pageant at the regular vesper services Thursday. The pageant will be an adaptation of "Through the Blue Triangle." At the last meeting before the Christmas holidays there will be a special musical service by the music committee.

DO YOUR XMAS RUSHING EARLY

COUNTY CLUBS PLAN HOLIDAY CAMPAIGN

Every Student Urged to Pledge His Neighbor to Come to K. S. A. C.

"Do your Christmas rushing early," urges Cliff Stratton, '11, secretary of the alumni association. "First rush your neighbors and get them into a county Aggie Booster club, then set aside a rush week during the Christmas holidays for the high school seniors back home. Pledge the best of them to come to K. S. A. C."

"One county club, that of Barber county has already mapped out plans for this Christmas drive. This county club will put on an assembly program at the high schools in Barber county. Perhaps it would not be possible for all county clubs to put on this kind of a stunt but they could work out some plan for boosting the college while they are home."

"Aside from this, every student should be planning to interest some worth while friend in coming to K. S. A. C. Get in your work on him during the holidays. Tell him why you came here and what you are getting here. Then tell him why he should come."

Mr. Stratton suggests that to do this effectively the Aggie Booster will need to be well informed in order to cover whatever subject the prospective student may ask about.

"Is he an athlete? Tell him that the members of this year's freshman team who make the first team next year will play on a Missouri Valley championship team before they are through college."

"Does he want to be an engineer? The K. S. A. C. school of engineering has come into its own. Its graduates are getting jobs as fast as they leave school."

"Is he interested in agriculture leadership? Graduates of K. S. A. C. are county agents in nearly every state in the union. Does he expect to be a farmer? Aggie graduates are leading their communities in production, and are going to lead the movement that will guarantee that the farmer will get paid for his work."

"Is he interested in journalism? Tell him that an Aggie graduate is editor of all the farm papers published by the Capper Farm Press. A Kansas Aggie is city editor of the Kansas City Star."

"And just for good measure, and to be sure that he is well informed, tell him a few other things. The president of the Kansas State Farm bureau is a graduate of K. S. A. C. A higher percentage of students are working their way through this college than in any other educational institution in the state. K. S. A. C. is returning to the State of Kansas in dollars and cents, many times the amount the state invests in the college. Do you believe in this college yourself? Then tell your friends about it when you go home for the holidays."

The horticultural department are removing the chrysanthemums from the college greenhouse and planting lettuce and radishes for the purpose of comparing varieties under forced

Ames Debate Squad Chosen
O. H. Burns, debate coach, has picked the following men for the Ames debate: J. Wheeler Barger, V. V. Cool, Ellis Kimble, Arnold Englund, H. I. Richards, and Charles Howard, alternates William Knostman and Junius Farmer. The six men on the team are all letter men and members of Pi Kappa Delta honorary debating fraternity.

ENGINEERING BUILDING WILL NOT BE FINISHED THIS YEAR

Roof on West Wing—Delay Due to Scarcity of Skilled Workmen

Although it was expected that the new engineering building would be ready for occupancy by the second semester, no part of it will be ready before late spring. J. M. Leeper, contractor from Topeka, promises to have the building completely finished by next fall.

The delay is due to the scarcity of skilled workmen, especially stone cutters and masons, and to the difficulty in securing suitable materials aside from the stone which is taken from the college quarries.

The stone work up to the third story has been completed, and also the roof on the west wing. The forms for constructing the roof of the central wing have been raised, and most of the window frames put in.

The roof of the west wing is of gray asbestos shingles to match that of the old building, while that of the central wing, which will be flat, is to be of tar composition.

Must Pay Y. W. Pledges

Tuesday, December 14, the girls who have not paid their Y. W. pledges will be given a chance, according to Miss Lee Winter, head of the finance committee. These pledges will be paid opposite the post office. Y. W. girls will be there all day to take the payments. Nearly \$2,500 has been pledged, making \$500 more than the girls had expected.

Major C. H. Mueller, cavalry, inspected the military department on December 8 and 9.

IO'S AND HAMPS TO GIVE STUNT

NINE MEMBERS OF SOCIETIES MAKE UP CAST

Readings and Musical Selections to Be Added Attractions—Farce Worked Out by Committee

The Ionians and their brother Hamiltons will have charge of the student assembly December 16, at which time they will present an original humorous stunt. These two societies have charge of the assembly once each year and will undoubtedly have, as in former years, a treat for those who attend.

Nine members of the two societies make up the cast. Added attractions will be readings and musical selections given by some of the other members.

The committee that is in charge of the farce is composed of the following people: Rowena Thornburg, chairman; Peggy Hart, Eleanor Watson, Harvey Howard, William Koenig, and C. B. Roberts.

The farce was written by the members of the committee. The main theme of the farce is the attempt of an artistic wife to influence her husband, who is a business man, to regard art in the same way that she does. She finally accomplishes what she sets out to do.

CALDERWOOD APPOINTED MAGAZINE CORRESPONDENT

Engineering World Recognizes Exceptional Ability of Aggie Professor

J. P. Calderwood, professor of mechanical engineering, has recently been appointed correspondent to

Mechanical Engineering, the monthly periodical of the American Society of Mechanical Engineers. While this publication is devoted mainly to the interests of the engineering fraternity, it also keeps its members in touch with engineering achievements throughout the United States.

This is only one of the several ways in which Professor Calderwood has recently been honored in the engineering world. He is recognized as an authority and a man of exceptional ability.

The territory assigned Professor Calderwood includes Kansas, Oklahoma, and northern Texas.

Under the direction of Miss Margaret Russell, of the English department, definite plans are being made to improve the teaching of English literature in college.

ONE IDEA OF SERVICE

Our idea is to sell the most suitable goods for the purpose required at as reasonable a price as we can afford.

No permanent business was ever built that did not feel under obligation to render its patrons a service. A worthy article at a fair price sums up our idea of service to our customers.

Shide & Riddlebarger
JEWELERS
Gifts that Last

Kappa Delta sorority gave a reception, Saturday evening at Elk's hall for the faculty, townspeople, and students. After the reception the installation dance was given. The hall was decorated in the sorority colors, green and white, palms and flowers were used in the decorations. The music was furnished by a four piece orchestra.

Athenian literary society held its regular meeting last Saturday evening. A program consisting of reading of papers, jokes, stunts, and a debate was given. The debate was: "Resolved: That the name K. S. A. C. should be changed to Kansas State college." The negative won. Next Saturday the society will have a business meeting between 7 and 8 o'clock.

Mrs. Charles Lantz entertained at tea Saturday afternoon in honor of Doctor Ballard. Those present were Mrs. Elizabeth Warner, Miss Faith Martin, Miss Ada Dykes, Miss Mae B. Seifkin, Miss Lillis Harkey, Miss Thelma Dobson, Miss Beulah Helstrom, Miss Jean Hanna, Miss Julia Caton, Miss Jean Moore, and Miss Edith Fairchild. Doctor Ballard gave a short talk on the subject "Religious Responsibilities of the College Girl."

Aggie Press club entertained with a party in Recreation hall Saturday evening, December 4. It was given by the upperclassmen of the club for the new students in the Journalism department. The evening was spent in dancing. "Brick" English's three piece orchestra furnished the music. During intermission "Scandal Sheets" were distributed by news boys. Punch was served throughout the evening. The chaperones were: Miss Izil Polson, Prof. N. A. Crawford, Dean and Mrs. J. T. Willard, Dean Mary Pierce Van Zile, and Prof. and Mrs. H. W. Davis.

Miss Lois Edmundson and Mr. Herbert S. Wise were married November 27 in Wichita by Rev. A. B. Hestwood. Miss Gladys Gilbreath was bridesmaid and Mr. Torby Fletcher was best man. After the wedding a 6 o'clock dinner was served at the home of Mr. Wise. Mrs. Wise attended school here last year and is a member of the Chi Omega fraternity. Mr. Wise was graduated in the class of '20, and is now employed as the county agricultural agent of Osage county. He is a member of the Sigma Phi Delta fraternity.

The faculty and members of the Junior class of the architecture department entertained Tuesday afternoon in the department's quarters, members of the faculty and representative students, at a "know your own college" social. The point of immediate interest was perspectives submitted by members of the junior class in a recent contest.

for a new college club building to be erected on Seventeenth street between Fairchild and Leavenworth.

On Saturday evening, December 4, the regular bi-weekly luncheon was held by the members of the agricultural experiment station staff. Following the dinner L. E. Melchers, professor of botany, presented plans for, and the purpose of the investigations which are made by the department of botany. This speech was followed by a talk given by E. C. Miller, professor of plant physiology, regarding the experiments he has made in the past six years, along the line of plant physiology. Among those present other than the members of the station staff were H. J. Penney, and E. L. Barrier of the state board of administration.

Miss Fannie Nichols, who has been employed in the college printing office for the past year, entertained a group of her girl friends with an announcement party at her home on North Fifteenth street, Wednesday evening, December 1. At the close of the evening a two course dinner was served by the hostess. While the guests were seated around the table, the clapper of a huge tissue paper bell, which hung directly over the table, burst and a shower of tiny envelopes and colored confetti fell to the table. The envelopes contained cards which bore the inscription "Fannie G. Nichols—Arthur D. Weber, December, 1920." The wedding will take place during the holidays. The guests were, Mrs. Henry Schmitz, Mrs. J. A. Sellers, Miss Marcella Seeb, Miss Connie Foote, Miss Ruth Harrison, Miss Charlotte Ayers, Miss Elsie Dent, Miss Rosa Hatfield, Miss Zoe Wertman, and Miss Abbie Swoford.

The meeting of the Kansas Engineers' society will be held at Topeka on December 16 and 17. A number of the members of the engineering faculty at K. S. A. C. are planning to attend.

What is a Fair Price
for Good Clothes?

THERE are so many reasons given for various clothing sales that most men aren't exactly sure what a fair price should be. We say it should be based on present replacement prices, regardless of what we paid. Aren't we right about it?

GANGS CLASHING IN INTRA-MURAL

DELTA TAUS AND A. T. O.'S LEAD
PAN-HEL

Elkharts, Y. M. C. A., and Phi Delta
Taus Lead Two Divisions of
Independents

Intramural basketball has taken a good hold on the students at K. S. A. C., judging from the enthusiasm being shown in the games. The teams are divided into three divisions: Pan Hellenic, which is composed of the fraternities holding national charters, and Divisions A and B, which are composed of independent organizations. The faculty is represented by the College club team, which, though it is made up of men who have been out of practice for some time, is doing some snappy playing.

The Race for the Pan Hellenic championship is tightening up more each day. Delta Tau Delta and Alpha Tau Omega are still leading with all games played won, and none lost, but they are being hard pressed by Sigma Phi Epsilon, the Kappa Sig, and Beta Theta Pi. At this time of the season a single game either won or lost may shift a team's standing considerably.

In Division B of the Independents, the Y. M. C. A., and Phi Delta Tau fives are locked in a tie for the leadership, each having a clean slate. The First Battalion military also has a clean slate, but has only played one game, whereas the other two leaders have played four. The Boomerang and Miami county clubs are the runners up in this division.

Division A has a similar situation but the percentage column does not correctly show the strength of the teams, as some games have been forfeited. The Elkharts at this time are the real leaders with a record of four victories and no defeats.

The winners of Divisions A and B will play each other at the end of the tournament. The intra-mural championship will then be determined by the outcome of the game between the Pan Hellenic winner and that of the Independent.

FOREIGN STUDENTS TALK AT Y. W. VESPER ON THURSDAY

Tell Conditions Affecting Girls and
Women in Their Countries

The regular Y. W. vesper services were held yesterday afternoon in Recreation hall. The program consisted of 10 minute talks given by four of the foreign students who are attending college. Mr. Matthew G. Stahl of South Africa, Mr. C. S. Lo and Mr. W. K. Lau, who come from different provinces in China, and Mr. Fernando Valdez of Chile.

The subject of the talks was the general conditions affecting girls and women in the foreign countries, and their opportunities for education. A duet sung in Spanish by Fernando and Manuel Valdez was one of the interesting numbers on the program.

At the next regular vesper service meeting, December 16, there will be a musical program presented by the music committee of the Y. W. C. A.

WISCONSIN COLLEGE GIRLS LIKE LIFE IN DORMITORIES

Have Broader Circle of Friends—
Better Health Because of Regular
Meals

Contrary to opinion and boarding school stories college girls do like to live in dormitories. Many of the large schools do have dormitories, and have found them successful. Wisconsin university has dormitories, and the following are some quotations from girls who are living there.

"Before I came to Chadbourne Hall I lived with a private family where there were only two students, both of whom were freshmen. My circle of friends was limited. I did not meet girls of every type, talk with them and get their ideas. Since this is one of the foremost essentials of

a college education, I feel that just being able to live with many girls in a place of a refined atmosphere is a great privilege."

"The matron of a dormitory has an individual interest in each pupil and will assist them when difficulties arise."

"My general health is better since I live at Chadbourne hall for I now have my meals at regular hours, and the food value of each meal is more carefully considered than when I followed my own inclination in food selection at the cafeterias."

"There is a spirit of unity that prevails in the dormitory which cannot exist in a boarding house."

INVITED AUDIENCE HEARS CHILDREN'S MUSIC RECITAL

Pupils of Miss Colburn and Miss Has-
singer Play for Parents

A piano and violin recital was given to an invited audience Saturday afternoon, December 4, by the children's department. The children pupils of Miss Helen Colburn and Miss Ethel Hassinger played with excellent tone and rhythm and showed a good understanding of their work. Miss Colburn preceded the recital with a short explanation of the aim and work of the children's department.

The children who played were Catherine Colver, Margaret Colver, Marion Jardine, Helen Louise Davis, Mildred Anderson, Vuran Canary, Eleanor Otto, Virginia Peterson, Margery Loofborow, Esther Smiley, Mary Ellen Springer, Marie Wilson, Barbara Brubaker, Max Burk, Martha Burr, Helen Durham, Virginia Forrester, Ruth Parker, Elma Leaman, Gahrista Slevier, Juliana Amos, Bernard Miller, and Faith Dawley.

Student Suffers Severe Hemorrhage

While on the rifle range last Monday afternoon, Lorin McCarty, freshman in agriculture, was suddenly stricken with a severe hemorrhage. He was taken to his room, and as his recovery was doubtful, his father was summoned. Wednesday he suffered a second hemorrhage and death seemed almost certain. His condition is improved now, however, and as soon as he is able he will be moved to his home at Clyde.

Lost: A black pocket book containing a gold Elgin wrist watch and several dollars. Finder please return to Frances Mardis, box 215, and receive reward.

Mr. Ralph Nixon spent the week end at the Pi Kappa Alpha house.

JARDINE ATTENDS CITIZENS EDUCATIONAL CONFERENCE

Every One Interested in Improvement
of Schools and Promotion of Learning
Urged to be Present

President W. M. Jardine was appointed by Governor Allen as a delegate to attend the Citizens Conference on Education, Friday, December 10, at assembly hall in the public library at Kansas City, Mo.

This conference is to be held for the states of Missouri, Kansas, Nebraska, Oklahoma, and Texas. To these conferences are invited governors and chief school officers of the states, members of legislatures, members of state boards of education, county and city superintendents of schools, county and city boards of education, representatives of universities, colleges, and normal schools, mayors of cities, members of chambers of commerce, women's clubs, members of farmers' and labor unions, ministers, lawyers, and all who are interested as citizens in the improvement of the schools.

Give Musical Chapel Program

Chapel exercises held Wednesday morning consisted in musical numbers by the Girls' Glee club and by the orchestra. The Glee club sang the cantata "Hesperus," Prof. A. E. Westbrook and Miss China Rogers taking the solo parts. The orchestra played several selections from the opera "Madame Butterfly."

Class Gives Recital

Miss Mabel Leffler's class gave a recital Tuesday, December 7, at 4 o'clock. The following students took part: Roy Case, Margaret Rochford, Hazel Burdette, Margaret Hawbaker, Neola Barrows, Adalia Bachman, Elsie Knox, Eugenia Harris, Abbie Dennen, Allice DeWitt, Leone Bower, Sue Unruh, and Eunice Anderson.

W. W. Trego, former student in civil engineering is doing testing work for the college in the cement plants of Independence.

S. E. Croyle, former student, is now in the employ of the road material department of the college. He is stationed at the cement plant in Bonner Springs. He tests cement before it is sent out to be used in different road building projects in the state.

Board—20 meals per week for \$6.50. Also special Sunday dinner, for others, by arrangement. 353 North Fifteenth street.

Two promotions have recently taken effect in the military department. Captain L. E. Davidson and Captain J. A. Van Fleet have just recently been promoted to the rank of major. The orders for the promotions were issued last July.

Miss Ada Rice has been unable to meet several classes this week on account of the serious illness of her mother.

The Link Belt company is constructing a coal conveyor over the new coal pit back of the engineering building. This conveyor is an interesting piece of structural steel work. Along this conveyor coal will be carried to an elevator which in turn will carry the coal to the big hoppers over the furnaces.

J. A. Kimball, business manager of the board of administration for the college, accompanied by senator-elect Charles E. Snyder, visited the college Wednesday.

William S. Wiedorn, state landscape architect, returned Tuesday from a trip over the state where he went in the interests of the state and private parks. He is at present working on plans for improving the state park at Hays.

L. C. Williams of the horticulture extension department, held a series of demonstration meetings in several of the counties in the state during the past week. Different sprays and other work pertaining to the orchard were demonstrated.

Dean E. L. Holton of the department of education is attending the national conference on education in Chicago.

Dinner guests at the Sigma Phi Delta house Sunday were Prof. and Mrs. P. L. Gafney, Miss Mae Seifkin, and Miss Dorothy Fairchild.

Saturday afternoon, December 4, Miss Fannie Kellar, Miss Bess Curry, and Miss Helen Hennen, held a class in appreciation for their students. The time was spent in a discussion of "Madame Butterfly."

Sunday afternoon, December 5, Miss Bess Curry, Miss Katharine Kimmel, and Miss Mabel Leffler sang at the Elk's hall.

Miss Florence Banker and Miss Hazel Williamson were Sunday dinner guests at the Pi Kappa Alpha house.

Miss Elsie Ortman was a week end guest of Miss Laura Fayman at the Chi Omega house.

H. L. Kent, director of the Hays experiment station, was in Manhattan last week for the purpose of attending a conference held with a Moline Plow representative.

NAMES OF SPRING DEBATE SQUADS ARE ANNOUNCED

Men Are To Meet State Normal—
Girls to Debate K. U.

The following persons were successful in making places on the spring debate squads. The men's squad to debate Kansas State normal in dual debate are R. W. McCall, Earnest Hartman, T. L. Bayer, Donald Iback, Paul M. Root, Edgar Madison, J. J. Seeright, H. L. Collins, V. W. Stambaugh, Frank Swanson, Lee Parish, and C. H. Howe.

The women's squad to debate the University of Kansas in dual debate are Gail Roderick, Penelope Burtis, Orpha Russel, Iness Straight, Leona Throw, Opal Seebler, Christine Cool, Gladys Addy, and Ruby Ricklefs.

Chicago Alumni Hold Reunion

Fifty Aggies, alumni and former students of K. S. A. C., attended the Aggie reunion dinner in Chicago last week, according to a letter just received from Leland G. Alford, '18, and Mrs. Helen (Dawley) Alford, '20, who attended. They report an excellent program, a good dinner, and an interesting time. The Chicago alumni had planned to have a dinner for the Aggie stock judging team, but missed connections. They are planning another reunion the last of this month. Mr. and Mrs. Alford are living at 2106 Montrose, Chicago.

G. E. Taylor, who was in school last semester is now working for the road material testing department of the college. Mr. Taylor is stationed at the cement plants in Iowa. He expects to return to school next semester.

Lena (Finley) Mason, '05, has joined her husband Capt. K. P. Mason, '04, who is stationed at Camp Pike.

Albert Dickens, professor of horticulture, and W. S. Wiedorn, instructor on landscape work, spent last week at Wellington, Winfield, and Ottawa, working out some landscape problems.

Prof. N. A. Crawford will deliver an address before the 7th district Kansas Authors' club, Dodge City, December 13.

L. E. Melchers, professor of botany and plant pathology, and C. F. Gates, assistant professor of botany are to present papers at the meeting of the American associations held in Chicago the week following Christmas.

W. E. Grimes, head of the department of agricultural economics, has just returned from Chicago where he attended a conference of the men working on the cost of production.

Prof. H. W. Davis outlined the story of "Madame Butterfly" in the auditorium last Friday afternoon. He also gave the same explanation to the faculty Monday afternoon.

Miss Annabell Garvey, instructor in English, spent the week end at her home in Topeka.

Miss Anna Sturmer spent Thanksgiving vacation at her home in Fairbury, Nebr., and also visited at the University at Lincoln.

Miss Catherine Bower, instructor in English, spent Saturday in Lawrence.

Miss Ruth Garvin, who has been ill with scarlet fever in Columbia, Mo., is now at her home in Lawrence but will not be able to return to school until second semester.

Miss Jamie Cameron who has just recovered from a long siege of illness left Sunday for Wamego.

Miss Velma Meserve, '20, spent the week end at the Alpha Delta Pi house.

Miss Ruth Brett and Miss Miriam Rumsel of Washburn were week end guests of Miss Helen Thayer.

Pres. W. M. Jardine spent Tuesday in Topeka with the Text Book commission.

Pres. W. M. Jardine will spend Saturday in Topeka at a meeting of the State Board of Education.

Mr. and Mrs. Myron Collins were luncheon guests at the Eureka club Sunday.

Mrs. Fred Howard of Cotton Wood Falls, was a guest at the Chi Omega house this week.

Mrs. H. L. Strong of Wichita, Mrs. B. Strong, Miss Faye Strong, Dr. L. D. Blanchard, and Mr. E. A. Knott were Sunday guests at the Delta Tau house.

Pres. W. M. Jardine spent Thursday in Kansas City attending the session of the International Farm congress.

TUESDAY, DECEMBER 14, 1920

Do your own thinking
Fight your own battles
Pay your own debts
Correct your own mistakes
Keep your own secrets
Follow your own ideals
Be your own self
Answer your own prayers
Mind your own business

ACTION IS IN ORDER

Make a noise and let the world know where you stand. If you have an idea express it. Don't fear that your idea may be wrong, because if it is you will soon enough hear about it. If we would all drag our grievances and our suggestions out in view of the public gaze for a while we would find out in short order whether or not we are approved by the rest of the gang. When you have an opinion which you are compelled to defend in public, your knees become less wobbly, and your spine a little more rigid.

Thinking people on the hill have been discussing the establishment of an honor system to take the place of the present catch-as-catch-can system, in an effort to get an expression of public opinion on the subject. Other questions such as the stadium, the memorial building, and bigger appropriations for the college are all issues which need to be talked up. What we need is a college that is conscious of the fact that it is a college. We need a student body instead of a mob of students.

Make a noise. Start something. You may start the wrong thing and get into trouble. At any rate you have done something. We need action.

TIGHT WADD—WELL NOT EXACTLY

Perhaps a few words might be said in defense of the alleged "tightwad" who doesn't always support every worthy cause with a substantial cash contribution. Campaigners and solicitors oft times become a trifle personal in their remarks when their pet project or charity is turned down by some liberal young disciple of the 66th Congress, who would like to contribute to every worthy cause so as to maintain his reputation as being a liberal, but whose landlady has informed him the night preceding that his check for the room rent came back marked "no funds," and who has just received a direct appeal in a letter from Dad that morning to "try to reduce expenses as much as possible because money is 'tightening up something fierce.'" It happens that way in many cases, Dad is right and both he and Mother are doing without a lot of necessities until "William gets through at Manhattan," and at that, William's allowance isn't very elastic.

And then again, two-thirds of the students here are wholly, or in part, self-supporting. They are generous, they like good music, and they are loyal. They would like to support all school projects and charities. But for strictly economic reasons, some of them turn down 10 cent desserts at meals and forego the pleasure of hearing great musical artists. Instead of contributing to all activities, they are forced to choose those few which they think they can do the most good by supporting.

Generosity is a characteristic quality of the American, and the support given all college activities and charity campaigns sponsored by the college prove that it is especially characteristic of the Aggies. We believe that Aggie students are supporting all worthy projects to the limit in proportion to their means.

GOING TO THE VODVIL—BOY HOWDY

Going to the Vodvil?
"Boy Howdy! Of course we are."

That's the way the Aggie students feel about K. S. A. C.'s Vodvil season. Operas, which are all very well in their place, may come and go just about as they please. But when it gets to be about time for the Vodvil, K. S. A. C.'s own—Well, that is a matter for the S. R. O. sign painter to handle.

Although the first Aggie Vodvil was given last year, the one performance was sufficient to put the vodvil in the list of Aggie traditions-to-be. The fact that last year the crowd in the auditorium and the crowd turned away almost equaled each other in proportions, made it seem advisable to have two performances this year, one on Friday, December 17, and the second on Saturday, December 18.

We're not going to say "Go to the Vodvil. It is your duty to support college activities." The Vodvil "ain't that kind of a show." But for the consideration of the your poor tired feet, do for pity's sake get your ticket early.

ANNOUNCEMENTS

Members of the machine gun company! Don't forget the company dance, December 17, at Recreation hall.

All junior and senior agriculture students are requested to be present at the meeting to be held in Ag. 6 at 7 o'clock Tuesday, December 14. Dean Farrell has something of interest to tell you.

The United Presbyterian Young people's party will be held Wednesday evening instead of Thursday evening.

Junior and senior agriculture students will meet this evening at 7:30 o'clock in Ag. 6.

Girls' Loyalty club will have an important meeting this evening at 4 o'clock in C36.

Ionian and Hamilton literary societies will give the chapel program Thursday morning at 10:15 o'clock.

Freshman and sophomore announcements are due this week.

Arthur Weber, formerly an animal husbandry student here, who is now the herdsman in charge of the K. S. A. C. cattle which was prize at both the American Royal and the International Livestock shows, returned to Manhattan last Wednesday. J. J. Hickey, a junior in animal husbandry accompanied Mr. Weber as assistant herdsman. The winnings of the college cattle this year would seem to prove that Aggie students can feed and take care of show cattle just as well as any "Scotch herdsman" can.

FRED VALDEZ TO ADDRESS AGGIE WORLD FORUM CLUB

Will Talk on Educational, Social, Industrial and Religious Conditions in Chile

Tonight at 7:30 o'clock, Fred Valdez will talk to the World Forum club, at the Y. W. C. A. building. Mr. Valdez will speak on general educational, social, industrial, and religious conditions in Chile. Since Mr. Valdez has traveled throughout Chile he will speak from first hand information. In giving his talk, pictures and curios will be used.

Mr. Valdez comes from one of the most representative families of Chile, one uncle being the Chilean ambassador to Belgium, and another uncle a recent candidate for the presidency of Chile. Mr. Valdez's father at one time was Chilean ambassador to Rome.

This is the first monthly meeting of the World Forum club this year and it is hoped that as many students and faculty members as possible will be present. Throughout the year these meetings will be held and world conditions will be discussed.

Willard Welsh, senior in animal husbandry, returned Wednesday from a trip which included both the American Royal Cattle show at Kansas City, Mo., and the International Livestock exposition at Chicago. He was working at the shows for various exhibitors washing and curling the hair of the cattle before they went into the show or sale ring.

W. E. Blakely visited in Belleville over the week end.

Theta Sigma Phi, women's journalism fraternity, met Friday evening and voted to give \$5 to the Aggie Press club to help cover the expenses of the Aggie Press club dance. They also decided to enter a special edition of the Kansas State Collegian in the Best Newspaper in Kansas contest which is being conducted by the extension division of the college.

A new grocery store in Aggieville has opened for business. The store is located at 704 Manhattan avenue and is called the Aggieville Cash Grocery. C. H. Piper, Mrs. James Dougherty, W. H. Burley, and J. B. Piper are the organizers of the concern.

P. L. Depew, rodent control specialist of the extension division, left Monday for Meade, to do some demonstration work on rodent extermination.

R. M. Green, associate professor of agricultural economics, was at Columbus last week where he did some work in connection with the wheat studies being conducted cooperatively with B. F. Barnes, '18, who is county agent there.

L. E. Call, professor of agronomy, spent Friday at Kansas City where he attended the International Farm congress. Professor Call spent Saturday in Leavenworth county judging corn at a show being held there.

R. I. Throckmorton, professor of soils, spent Saturday in Kansas City on business for the agronomy department.

Miss Ruth Garvin of Lawrence, is a guest at the Alpha Delta Pi house. She plans to reenter school next semester.

Tom Neely of Abilene, spent the week end at the Sigma Nu house.

Correct Addresses and Add Unlisted Students in Directory Supplement

Due to the delay in the printing of the student directory many of the students' addresses have been changed. The names of several new students who have entered college since that time do not appear in the directory. A list of the new names and changes of addresses has been prepared by Miss Jessie Machir, registrar.

Miss Machir advises each student to clip the following list and paste it in the back of the student directory.

THE KANSAS STATE COLLEGIAN

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, TUESDAY, DECEMBER 14, 1920

NO. 26

ENGINEERS TO BE HOSTS AT OPEN HOUSE

SHOW COLLEGE AND PUBLIC THROUGH DIVISION THURSDAY

TO HAVE EVERY MACHINE RUNNING

Will Conduct Visitors Over Regular Route—Machinery To Be in Charge of Seniors

In keeping with the unusual program for advertising and publicity which has been adopted for the engineering division, the engineers of Kansas State Agricultural college have set Thursday, December 16, for Open House Day.

The day should be full of interest not only to students and residents of Manhattan, but to the entire state as well, as this is the first time any school of engineering in this section of the country has attempted so important an undertaking.

From 1 to 5 o'clock in the afternoon, all departments, shops, and laboratories of the division will be open for inspection, with every machine and engine running.

Have Regular Route Planned

Visitors will be conducted through the display over a regular route, and although everyone must keep moving in the same direction, it will be possible to break in at any point of the route. The various types of farm implements and machinery in use and being experimented with, will be placed along the road between Anderson hall and Denison hall.

Passing into Denison hall, the visitor may see the entire electrical engineering laboratory in thorough display. Throughout the entire exhibition the running machinery will be in charge of seniors who understand and can explain their working and purpose. Between Denison hall and the shops the surveying and orienting instruments will be exhibited under the direction of civil engineering students.

Make Castings While You Wait

The great 155 millimeter gun, which has a range of 10 miles and throws a projectile weighing over 100 pounds, will be placed out in the road together with its tractor. In the foundry castings will be made while the sightseer waits, and he will also have an opportunity to see quite an amount of new machinery that has been manufactured in the shops.

The carpenter shops, mechanical engineering laboratories, road materials laboratories, and automobile mechanics laboratories all will be going full blast. Such an opportunity to see practical results and achievements of engineering has never before been presented to the people of Kansas.

Architects To Show Work

Drawings, paintings, plans, and plaster casts will be effectively arranged in the architects' division, and students may be seen doing actual work.

It is impossible for any one to realize what great things are being accomplished in the engineering division of K. S. A. C. without seeing the division while it is running full force, and with men on hand who know their business to explain the work.

The students and faculty of engineering are anxious that residents of the state be more conversant with the activities of the engineer, and are taking this means of introducing the public to their division.

AG ENGINEERS MUCH SOUGHT

ELECTRICAL REPRESENTATIVES TO VISIT HERE

Come Three Months Early—Have Unusual Opportunities for Seniors

The high standing of K. S. A. C. as an engineering school has again been recognized. Graduates from the electrical department have always been in demand, but this year two of the largest electrical manufacturing concerns have started out extremely early in the year to secure Aggie electricals for positions in their plants.

The Western Electric company's representative was here last week, and he had unusual opportunities to place before the seniors. The Westinghouse company's man will be un-

able to reach here before late December or early January, but he also promises striking propositions.

The visits of these men are coming practically three months earlier than in any year preceding, which would seem to indicate that the demand for K. S. A. C. graduates is increasing, and in no way diminishing.

A letter was also received from W. C. McGraw, a former student in the department, and whose studies were interrupted by the war. The letter said that Gordon Hamilton, mechanical engineering 1919, now in the employ of the Westinghouse company, will also come in January to interview the seniors.

McGraw completed the instructor's course with the Western Electric company a short time ago, and is now working for that company in its Kansas City office. He will probably accompany Mr. Hamilton.

SILVER OFFERING EIGHTY DOLLARS

BAND CONCERT IS GIVEN SUNDAY AFTERNOON

Miss Katherine Kimmel, Contralto Assisted with Concert—Band Showed Hard Work

A total of about \$80 was realized from the silver offering taken at the band concert given Sunday afternoon by the college band with H. P. Wheeler as conductor, and Miss Katherine Kimmel, contralto. Mr. Wheeler proved himself to be a magnetic and inspiring conductor. He played a comparatively limited number of heavy instruments and with the lighter pieces he played with delicacy and a sure conception. Such playing as was displayed by the band can only be accomplished by hard and earnest work on the part of both the conductor and players.

Miss Kimmel sang "Know'st Thou Not That Fair Land—Mignon" by Thomas. Her voice, full of power and expression, showed up to wonderful advantage.

The xylophone solo given by Clayton Sauer won the crowd immediately, because he played with a vivacity and animation that is pleasing to any American audience.

USE 740 YARDS RIBBON IN CHART

EXTENSION DIVISION DISPLAYS WORK

Map Prepared by A. F. Turner May Be Seen in Main Hall

The extension division of the college has an interesting map on display in main hall. The map is of Kansas, which by means of an explanatory chart, and the aid of ribbons, explains the work done by the United States relations service through the extension division.

The map is the work of A. F. Turner, assistant county agent leader and it has been exhibited at the Topeka and Hutchinson fairs and at the Wheat show. The preparation of the map took a great deal of time on the part of Mr. Turner and other members of the staff. The counties of the state are connected by ribbons to the chart which shows the work done by the department. There are 740 yards of ribbon on the chart.

The work of the relations service is carried on through the county farm bureau under the supervision of the extension department. The service is provided for by the Smith-Lever act of 1914 which provides that \$600,000 should be set apart the first year and increasing \$500,000 every year until 1923 for the use of each state.

SALES REPORTS COMING IN NOW

MAKE REPORTS MONDAYS, WEDNESDAYS AND FRIDAYS

Elizabeth Dickens, Frances Johnstone and Ruth Norman Withdraw From Contest

The first report of the selling campaign for the Royal Purple was given Monday evening at 4 o'clock by the leaders in the different organizations who have charge of the sales.

The standing of the candidates in

the popularity contest will be posted in front of the office of the Royal Purple staff as often as the reports are obtained. All leaders are to make their reports at the office on Mondays, Wednesdays, and Fridays, at 4 o'clock in the afternoon.

This year the Royal Purple staff has decided that in order to keep the popularity contest above censure that people voting must present their own receipts at the window.

The number of books sold by each sorority and women's organization will be posted under the organization name, it being assumed that all the votes of that particular organization will go to its candidate. The number of books sold by the fraternities will be listed as a whole and of the other organizations of men students as well, because of the great diversity of their voting.

Miss Elizabeth Dickens, Miss Frances Johnstone, and Miss Ruth Norman have withdrawn from the contest.

MEET TONIGHT TO PLAN ALL AGRICULTURAL ORGANIZATION

F. D. Farrell to Be Principal Speaker—Honorary Ag Frats to Be Present

Tonight the different agricultural organizations are meeting in Ag. 6, at 7:30 o'clock for the purpose of drawing up plans for an all-Ag organization. Senior, junior, freshman and sophomore representatives are requested to attend the meeting.

Alpha Zeta, the honorary agricultural fraternity, is sponsoring the meeting, while the Block and Bridle, Kiod and Kernel and Dairy clubs are cooperating by a union meeting. F. D. Farrell, dean of the division of agriculture is to be the principal speaker. He will explain his plans for an all-Ag association, which, when perfected, will include all students who are taking a course in agriculture.

The purpose of this meeting and of the proposed organization is to stimulate interest in the agricultural field and to deal with the division's student activities.

W. E. GRIMES RETURNS FROM CHICAGO MEETING

Discuss Methods of Making Cost of Production Data in Various States Comparable

W. E. Grimes, professor of agricultural economics, recently returned from Chicago where he attended a meeting of representatives of state institutions which are cooperating with the office of farm management and farm economics in the cost of production studies.

Representatives were present from nine different states. Methods of obtaining cost of production data were discussed with the idea of making the results in the various states as nearly comparable as possible.

Professor Grimes says that the office of farm management wishes to increase the amount of work being done in this state, and that it will do so next year if sufficient funds are available to enable the Kansas experiment station to carry on its share in the cooperative work.

JOHN HITTALL LECTURES AT ENGINEERS' SEMINAR

Explains Composition and Refining of Asphalt by Use of Slides and Charts

Thursday afternoon, December 9, John E. Hittall lectured to the civil engineers' seminar on the subject of the composition and refining of asphalt.

The lecture was accompanied by slides which illustrated in detail Mr. Hittall's subject. Diagrams and charts were used to advantage to show all steps in the process, from materials used, their refining and composition, to the state in which they were usable for road building.

Mr. Hittall, who is from Chicago, is district engineer for the Asphalt association, and a member of the American Society of Engineers.

Muldoon, Bate, and Farley Talk

The regular meeting of the Veterinary Medical association was held Monday evening, December 6, at the Y. M. C. A. Dr. William E. Muldoon, professor of surgery and medicine, gave an interesting talk on "Horsemen's Nomenclature," giving the terms used by horsemen in designating certain defects and diseases. L. B. Bate gave a review of the bulletin recently published by the department of pathology on the subject, "Preparation of Specimens for Laboratory Diagnosis." The subject of K. C. Farley's talk was, "Texas Fever and Tick Eradication in the South." The next meeting will be held following the Christmas vacation. The exact date has not been decided upon.

VODVIL HAS THREE ACTS AND A REVUE

TO FEATURE COSTUMES, A RUNWAY, AND NEW SONGS

WILL GIVE TWO PERFORMANCES

Apollo, St. Cecilia, and Mendelssohn Clubs Unite for Vodvil—100 in Chorus

A diamond runway' out over the audience, all the latest hits from the musical comedy successes of the season, \$5,000 worth of costumes, a 15 piece orchestra playing original orchestrations for all the songs, and specially constructed scenery and props—all this in the staid and sedate old K. S. A. C. auditorium! The stage that creaked under the tread of grand opera artists this week will groan under the strain put on it by the 100 members of the combined Apollo, St. Cecilia, and Mendelssohn clubs of the college when they put on their annual vodvil, Friday and Saturday, December 17 and 18.

Give Vodvil Two Nights

Last year's Vodvil was so well attended and made such a success that the management is giving two nights of mirth instead of one this year. The program is much more extensive than the one given last year. The different clubs represented in the gloom-destroying performance have been practicing on their acts since they were organized at the beginning of the school year and have the numbers ready for the final rehearsal and the staging of the program. The songs used are either the old favorites among the classics or the latest sensations from such musical shows as "Irene," "The Charm School," "The Sweetheart Shop," "Honey Girl," "Buddies," and the "Ziegfeld Follies." A complete orchestra for 15 pieces is used with all the solos and the ensemble work.

Have Three Acts and Revue

The Vodvil will be presented in three acts and a revue, the latter billed as the 1925 Winter Garden revue. The first act is that of the Saloon Singers, and operatic quartette. This organization starts the show off in a decorous manner, with the sextette from "Lucia," but even before they get through with their act, which is said to be the section of the program which sticks closest to convention, they are ragging Verdi's quartette from "Rigoletto."

Following the Saloon Singers come the 3-4 Jack Sailors, who accelerate the pace of the show quite a little. In the 3-4 Jack company are 10 sailors at an American port in France during the "late unpleasantness," and six naval nurses who console the sailors during their recreation hour. And, say! that consolation! The acts end on an ensemble song, "Hello Home" from "Buddies," a musical comedy which has been running four months in New York and is still going strong.

Melody Kings in Third Act

The third act of Vodvil is put on by Maupin's Black and White Melody Kings. This is a regular Ted Lewis Jazz band of five pieces, and every one of the players can double on some instrument other than his specialty. It is rumored that Rex Maupin who leads the Black section of the troupe is importing a gentleman of color who "lays 'em out daid" on the sax. The feature of the White section is the xylophone and drum playing of Clayton Sauers.

The final riot is the 1925 Winter Garden Revue. The revue has a plot that is no more difficult than that of the ordinary revue and that will not make the action hard to follow. In the plot of the revue the Apollo club spends the week end with an alumnus of the college and has some high jinks for his benefit. The girls from the Follies come to add enthusiasm to the party. They succeed quite well in their missionary efforts. The next morning the manager of the Apollo club and the K. S. A. C. alumnus sneak into town to view a special performance of the "Follies." The acts include a dozen solos and numerous ensemble songs and dances. Finally all the acts combine in a grand finale which closes the Vodvil in a last burst of music.

W. A. LIPPINCOTT ATTENDS CHICAGO POULTRY MEETING

Poultry Judged on Basis of Usefulness, Not Beauty

Prof. William A. Lippincott, head of the department of poultry

husbandry, attended a meeting last week in Chicago of a national committee of which he is a member, which is to revise the standard by which all poultry is bred and judged.

The purpose of the revision is to incorporate in the standard the results of recent investigational work on the relation between form and function, bringing it about that birds are judged in the show room on the basis of their usefulness as well as their beauty.

ARTILLERY UNIT EQUIPMENT HERE

BATTERY OUTFIT IS COMPLETE FOR FIELD WORK

Gun Arrives with Range of 10 Miles—Fire Control Equipment Nearly Complete

Nearly the entire allowance of artillery equipment has arrived at the college. The coast artillery unit can now go ahead with its practical work, and no longer needs to depend upon blackboard work and words.

The mobile battery equipment which consists of the 155 millimeter gun, its 10-ton tractor, complete orienting and range finding equipment, communications and artillery repair truck, is complete for field work.

The gun with its tractor is stored in the college tractor shed. Combined they weigh over 20 tons. The gun has an extreme range of 10 miles and the projectile fired weighs over 100 pounds.

For the work as done in the fixed coast defenses, the fire control equipment is nearly complete. It includes observation instruments, a permanent telephone system, electric signals, and a complete plotting room outfit of instruments for mechanically computing all the data that is necessary for firing the guns of the major caliber.

AGGIES PREFER TO DO TALKING

CHOOSE DISCUSSION PLAN OF INSTRUCTION

Laboratory Method Ranks Second with Lectures Lagging Along Behind

One hundred and ninety nine juniors and seniors have answered the questionnaire mailed out to them, by the department of education, asking them for their opinion and preference of the three methods of teaching, the lecture method, the discussion method, and the laboratory method.

The choice of the students was expressed in the following manner: 71 per cent of the students gave first place to the discussion method, 20 per cent gave first place to the laboratory method, and 9 per cent gave first place to the lecture method. Twenty per cent of the upperclassmen gave second place to the discussion method, 26 per cent gave second place to the lecture method, and 54 per cent gave second place to the laboratory method. Nine per cent of the upperclassmen gave third place to the discussion method, 54 per cent gave third place to the lecture method and 37 per cent gave third place to the laboratory method.

"The results of the questionnaire plan simply verified and strengthened the ideas held by the leading educators today, and furthermore the results indicate that the students gave the questionnaire consideration," is the belief expressed by Dean E. L. Holton, who was in charge of the investigation.

Address Authors' Club

Prof. N. A. Crawford, head of the Journalism department, and Prof. J. W. Pearson, head of the English department, delivered addresses before the Kansas Authors' club, which met Monday, December 13, at Dodge City.

Thursday evening dinner guests at the Kappa Delta house were Claude White, Wright Turner, and E. D. McCullum.

There's A Reason

Due to the fact that the linotype machine in the printing department has been broken for the past two weeks the last four editions of the Collegian have been unavoidably late. The machine cannot be repaired until the Christmas holidays.

KNOTH TO BE 1920 BASKET BALL COACH

MAY INTRODUCE JONES BASKET BALL SYSTEM HERE

SIX LETTER MEN ARE OUT

Only Twelve Valley Games on Schedule—Must Win Practically Every Game to Insure Championship

Kansas Aggie basketball will be coached this year by Erwin A. Knoth, it was decided at a meeting of the college athletic board the latter part of last week. Coach Knoth will continue as gym instructor, but will be relieved of most of his gym classes. Sergeant Frank Comisky and "Heinie" Hinds will take the largest part of the work in physical education, leaving Knoth practically free of all duties not connected with basketball. Hinds will coach the freshman basketball team.

Inexperienced as Coach

Coach Knoth is inexperienced as a basketball coach, but he has played on championship teams of college standing and he worked with Ralph Jones, most successful basketball man in the Big Ten, who turned out three championship teams and two runners up in the eight years he coached the court game at Illinois university.

The new Aggie coach played forward on his high school team four years and held down the same position on the five which represented the Normal School of Physical Training, Indianapolis. This team was undefeated one year, playing such teams as Purdue and other leading colleges in Indiana. Knoth also played forward on a championship amateur team of an Indianapolis city conference.

May Use Jones Basketball System

It is expected that he will introduce the Jones basketball system here. It will not be a radical departure from that which has been played by the Aggies the last few years, and the men will fall into the style of playing naturally. Knoth has an exceptionally pleasing personality and already has won the student body by the introduction into athletics of interorganization athletics which has become very popular under his management.

Six Letter Men Out

Six of the eight basketball letter men now enrolled in school are out for their positions. "Heinie" Hinds, last year's captain, is not eligible, having played his three years. Knostman, center and guard, who has played two years on the team, is unable to compete for a position this year on account of defective eyesight.

This leaves Bunker, Williams, Jennings, the Cowell brothers, and Winters. Ham Bunker is captain of this year's team and plays as one of the best forwards in the valley. The Cowell brothers, "Brady" and "Shorty," were regular guards last season. Jennings is out for his regular place at center, while Williams hopes to get regular at forward, having served a year as a cub.

Wilhoite and Thorpe are out to contest the place with him. These men are eligible for varsity this year. Other promising freshmen are Fovol as guard and Kuykendall as center.

Winters made his letter two years ago playing guard, but was not out last year. He is still handicapped by an injury which prevented his finishing the football season, but he is showing up for basketball practice and hopes to get back into shape by the close of the season. Hahn, another football man and a freshman last year, is working out for guard with the varsity cagers.

Have Light Schedule

The Aggies to date have a light schedule, with only 12 valley games on the schedule. Practically every game will have to be won in order to insure a championship, placing the Aggies under a decided handicap. Mike Ahearn, athletic director, is making every effort to schedule other valley contests. At present, he has Ames, Kansas university, Oklahoma university, and Missouri university on the Aggie schedule. Washington cancelled her two games with the Aggies, but Drake and the Kansans are trying to get together on a date and Ahearn hopes to improve the schedule by the beginning of the playing season. The opening series of the Aggies is with Oklahoma at Manhattan, January 14-15. There is an open date however, January 7-8.

PREP CAGERS TO START PRACTICE

BILL MARTIN CHOSEN AS COACH

Eighteen Men Try for Team—Arrangements Made for 15 Games

The School of Ags are to have a basketball team. Already some 18 men are on the Y.M.C.A. court each evening familiarizing themselves with the feel of the old basket ball.

A. P. Davidson, who is dean of the youngsters, is an enthusiastic supporter, and the student body at a recent meeting expressed its sentiments at 100 per cent in favor of the indoor sport. Dean Davidson already has 15 games on his list and hopes to add a few more. Naturally, the dates for all the games are not definitely fixed this early in the season, but it is pretty well agreed that the opening game will be with Riley high school, January 7.

Bill Martin, a college man and a former member of the Aggie squad, has been chosen as coach, and judging from the material out, he has every chance to develop a winning team. H. Summers is the only old man out, but the other 17 members of the squad include such men as Stolley of School of Ag football fame, Glover, and a number of others who will doubtless make a pretty favorable showing when the coach begins to pick out a quintette to represent the prep school.

SUNFLOWERS

H. W. D.

The following directions in etiquette for gentlemen are taken from a handbook printed in 1848. Aside from this bit of information they tell their own story.

TRUE POLITENESS FOR GENTLEMEN

If you speak for a short time to a lady in the open air, intending to leave her directly, remain uncovered, unless she twice desires you to put on your hat.

Keep your finger nails scrupulously clean, particularly in ladies' company; and avoid the disagreeable habit of allowing them to grow to an unnatural length.

At all times avoid a loud tone of voice, but particularly in addressing ladies. Observe men of the world, and you will perceive that, however mild their ordinary address, their voice assumes an increased softness in addressing the sex.

Avoid repeating at one house any gossip respecting people's characters or affairs which you have heard in another.

In making morning calls a certain discretion is necessary; if acquainted with any of those old-fashioned persons who dine at 1 o'clock, you would not call at that time; you may pay your morning visit at 3, but we should rather advise it to be made at 12.

Go quietly through the dance; let the gracefulness of your deportment be more obvious than the complexity of your steps.

If you are singing a second, do not as it were, drag on, or tread on the heels of your prima; people seldom attribute this to superior knowledge, but usually to want of judgment.

It is usual to commence with soup, which never refuse; if you do not eat it, you can toy with it until it is followed by fish; of either of which you never take more than once.

If what you are eating before the

dessert has any liquid, sop the bread and then raise it to the mouth. For articles of dessert having liquid, a spoon is usually provided.

When a man marries, all acquaintance with his former companions ceases; and unless it is renewed by sending them the cards of the new married couple, they are no longer on visiting terms.

When any of your acquaintance are deceased, be at the house at not quit an hour after the time specified, as the procession moves exactly one hour after the time announced.

If walking with a lady in the country and she should sit upon the ground, remain standing, unless requested to be seated.—The Kansas Industrialist.

Y. W. Advisory Board Meets

Last week the Y. W. advisory board held their monthly business meeting at the home of Mrs. Melchers. Dean Mary Pierce Van Zile gave a talk on "Health Programs," and also a report on the first International Congress of Women Physicians which was held in New York. This is the first of the series of talks that will be given at the meetings of the advisory board. These talks will be on various phases of national association work.

Miss Irene Dean and Marcia Seiber gave reports of the Y. W. work for the past month.

Elect Research Council Members

The Kansas State Agricultural college section of the Kansas Research council has been reorganized for 1930-31. The following are members of the council: F. D. Farrell, chairman; J. T. Willard, R. A. Seaton, G. A. Dean, L. E. Call, W. A. Lippincott, Helen B. Thompson, H. H. King, L. E. Melchers, R. K. Nabours, J. G. Peterson, C. W. McCampbell, L. D. Bushnell, J. P. Caldwell, and E. C. Miller.

Re-elected For Sixth Time

While attending the International Livestock show at Chicago, Dr. C. W. McCampbell, head of the animal husbandry department, presided over a banquet given by the National Association of State Livestock Registry boards at which 21 states were represented. Doctor McCampbell was re-elected president of the organization, having had this honor conferred on him six times in succession in as many years. Dr. J. Judson of Michigan, was elected first vice president; W. W. Wright of Springfield, Ill., second vice president; and Prof. D. A. Cooley of Purdue university, secretary.

ASK ADMITTANCE INTO A. S. A. E.

AG ENGINEERS MAY ENTER NATIONAL ORGANIZATION

Course Has Thirty Members—To Consider Aggie Application in December

At a meeting of the agricultural engineers last week, a constitution was drafted and it was decided finally to apply for membership in the American Society of Agricultural Engineers. The application blanks have been filled out and together with the constitution have been sent to the national society for its approval.

The course in agricultural engineering at K. S. A. C. is a comparatively new one, being started only three years ago. For this reason the enrolment, until now, has been insufficient to warrant having a separate seminar and for that reason the agricultural engineering men have been meeting with the American Society of Mechanical Engineers for their seminar work. However, the new course is becoming more popular and the enrolment has been steadily increasing each year, until now there are nearly 30 members.

Special effort has been made by the men in the course to hasten the work of getting their application for membership before the national society, for the national organization expects to hold a meeting some time in December at which the K. S. A. C. application will be considered.

Old Grads Into Politics

Aggie graduates are leaders in politics as well as in many other fields. The following grads have been elected to the state house of representatives: M. W. Sanderson, '98, Jefferson, Chautauqua county, 49th district; Ralph Snyder, '90, Oskaloosa, Jefferson county, 4th district; L. H. Neiswender, '84, Topeka, Shawnee county, 33rd district; Charles F. Johnson, '05, Leonardville, Riley county, 42nd district.

Two More Foreign Students

The Brazilian government has sent two students to K. S. A. C. to enrol in the tractor short course offered by the school. Both students are from Pelotas, Brazil, and are graduates of an agricultural school in that country. Mr. Alvaro des Essarts graduated in 1914, in agriculture. Mr. Adolph de Sousa also graduated in 1914 in agriculture and veterinary medicine. They are staying at the Gillett hotel at present.

TWENTY-SIX AGGIE MEN ARE MEMBERS OF DE MOLAY ORDER

Have To Be Sons of Masons and Must Be Between Age 16 and 24

Twenty six young men of K. S. A. C. are listed with the 50 charter members of the De Molay, a masonic order which was installed in Manhattan several weeks ago. Charter members of the order, which was founded in Kansas City, Mo., must be sons of masons and must be between the ages of 16 and 21.

Aggies who were initiated into the order are W. R. Alexander, F. E. Bangs, J. E. Beyer, J. R. Bostwick, E. A. Briscoe, R. E. Bridge, C. C. Button, L. C. Curtis, J. A. Deardorf, A. B. Edwards, F. D. Gay, C. L. Harder, C. A. Harkness, H. W. Hoffines, W. H. Jury, L. M. Knight, L. E. Means, R. H. Peters, P. J. Phillips, William Rankin, F. E. Walbridge, J. W. Wasson, S. H. Wilkinson, and A. M. Wright.

What is a Fair Price for Good Clothes?

THERE are so many reasons given for various clothing sales that most men aren't exactly sure what a fair price should be. We say it should be based on present replacement prices, regardless of what we paid. Aren't we right about it?

FOUR DECISIVE GAMES PLAYED

DELTA TAUS STRONGEST CON-
TENDERS FOR CHAMPIONSHIP

Sig Alphas, Kappa Phi Alphas, Delta
Tau Deltas, and "Y" Are Win-
ners This Week

The intramural basketball games played Thursday night resulted in the Delta Tau Deltas winning from the Sigma Phi Epsilons by a score of 13 to 10. The Sig Alphas defeated the Pi Kaps 18 to 14. The Kappa Phi Alpha fraternity were victorious in a game with the Parman club by a score of 26 to 24. The Y. M. C. A. defeated the Boomerang club 27 to 20.

In the Sig Alpha-Pi Kap game the teams were evenly matched during the first half. The score at the end of the first period was 9 to 8 in favor of Sigma Alpha Epsilon. The Pi Kappa Alpha team did not hold the Sig Alpha so well during the second half, the final score being 18 to 14.

The Delta Tau-Sig Ep game was one of the important games in the pan hellenic division. Both of the teams were exceptionally strong. During the first half of the game there was only one field goal made. The score at the end of the first period was 5 to 4 in favor of the Delta Taus. During the second half the game was fast and close. Both teams showed good teamwork. The final score gave the Delta Taus another victory by a score of 13 to 10. The Delta Taus have not yet been defeated and their victory over the Sig Eps makes them probably the strongest contender for the pan hellenic championship.

The most interesting game of the evening was the game between the Parman club and the Kappa Phi Alpha fraternity. The Parmans were leading at the end of the first half by a score of 14 to 12. The Kappa Phi Alphas could not overcome the lead until the last two minutes of the game. The Parmans were four points ahead within two minutes of the end of the last period but could not stop the rush the Kappa Phi Alphas put up, so the game ended in a tie 22 to 22.

They played an extra five minutes to play off the tie. Both teams fought hard and each made a field goal so it was necessary to play another five minutes to again play off the tie. During the last five minute period the Kappa Phi Alphas succeeded in throwing a field goal and holding the Parmans. The Kappa Phi Alphas were ahead at the end of the period by a score of 26 to 24.

The Y. M. C. A. team outplayed the Boomerang club and showed good teamwork. The first half ended with a score of 17 to 7 in favor of the Y. M. C. A. The Boomerang team, true to its name, came back in the second half showing much improvement but it could not overcome the lead and hold the Y. M. C. A. team. The final score gave the Y. M. C. A. the game, 27 to 20.

CHLORINATOR TO KEEP BUGS AND GERMS OUT OF WATER

Connect Pumps With City Mains to
Use When Pressure in College
Wells Is Low

There is no longer any danger of there being little bugs and germs in the college drinking water, as a chlorinator has been installed in the pump house at the east end of the campus. Liquid chlorine, which renders the water absolutely free from bacteria, is injected into the water as it is pumped.

Until recently the college has had to depend upon its own water supply alone. This at times had scarcely

enough pressure behind it to be forced into the upper stories of the buildings. However the pumps have now been connected to the city mains so that in case water from the college wells fails, the city supply will be available.

COEDS PRACTICE FOR BASKETBALL

TO HAVE COLOR TOURNAMENT
FOR TEAMS

Those Wanting to Try Out Must Sign
Placard in Women's Gym—Work
Starts this Week

Girls' basketball practice starts this week according to Miss Edith Bond, physical education director. The practice schedule is arranged for the various classes as follows: freshmen, Tuesday and Friday at 5 o'clock; sophomores, Monday and Thursday; juniors and seniors, Wednesday.

All girls wishing to try for class teams must sign the basket ball placard in the women's gym. This year a color tournament will be played similar to this fall's hockey tournament. The girls for these teams will be picked at random from the different classes. Each team will be given a color and the game will be played between the various squads.

The girls for the class teams will be chosen from the best players in the color tournament. These teams will be picked soon after the holidays.

RELIGIOUS FEDERATION IS ORGANIZED AT K. S. A. C.

Earl Teagarden Is Elected Chairman
of Federation—J. W. Barger
Vice Chairman

Organization of the Religious Federation of K. S. A. C. was completed Monday, December 6. Following the organization, officers were elected as follows: chairman, Earl Teagarden; vice chairman, J. Wheeler Barger; secretary and treasurer, Frances Whitmire. The federation has a three fold purpose: to promote cooperative religious effort, to promote cooperative religious and social programs, and to provide training for religious leadership. The nucleus of the organization is the executive committee composed of the chairmen of the various promotion committees of the cooperating organizations.

TREAT GUNMEN TO JAZZ PARTY

MACHINE GUN COMPANY TO
DANCE DECEMBER 17

Will Invite Non-Coms and Regular
Army Who Are Stationed
Here

At nine o'clock, December 17, in Recreation center, the machine gun company of the cadet corps will give an informal dance for its members and a limited number of their friends.

The room will be fittingly decorated with machine guns and other military equipment, although everyone except regular non-coms and regularly commissioned officers will appear in civilian dress. Music will be furnished by the Beta orchestra.

Non-coms of the regular army who are stationed here are to be specially invited guests to the dance.

The following persons will act as chaperones: Major F. B. Terrill, Major C. A. Chapman, Major E. L. Claeren, Major L. C. Davidson, Captain J. A. Van Fleet, and Lieutenant G. W. Brower.

Officers of the company are: captain, Morton Stiggers; first lieutenant, Victor Blackledge; second lieutenant, W. G. Overton.

Organize Collegian Board

The Collegian board met Tuesday and elected officers. Susan Carmody, freshman in industrial journalism

was elected president, R. C. Smith, sophomore in industrial journalism, was elected vice president, and Orilla Bourassa, special in general science, was elected secretary.

Willard Chemical Society to Meet

The Willard Chemical Society will hold its regular meeting this evening in C26 at 7:30 o'clock. The meeting will be given over to the discussion of hydrocyanic acid and its occurrence in plants. Prof. C. O. Swanson will tell of the work along this line being done here. A number of articles on the subject will be reviewed by the members of the society.

SOCIETY

Delta Delta Delta sorority held open house Tuesday evening from 7 to 8 o'clock for the Sigma Nu fraternity.

Dr. Bowerman and Mrs. Charles Lantz were dinner guests at the Alpha Delta Pi house Thursday evening.

Monday evening, December 20, the Browning literary society will give their annual Christmas party for the Athenian literary society in the Browning-Athenian hall.

Newman club gave a dance Friday evening in Recreation hall with Miss Elizabeth Rothermel as chaperon. Sixteen couples danced. Music was furnished by Daquet's orchestra.

Pi Beta Phi entertained at tea Monday afternoon from 4 to 5:30 o'clock at their chapter house, 1409 Fairchild, in honor of their national grand president, Mrs. Anna Lytle Tannahill.

Phi Delta Tau held initiation services Saturday evening for H. B. Winchester, assistant professor of animal husbandry, Lieutenant J. Robinson of Camp Funston, and Mr. Joe Bellamy of Manhattan.

Alpha Delta Pi fraternity entertained the Sigma Nu fraternity with a dancing party Saturday between 2 and 5 o'clock. During the afternoon two original favor dances were given. A two course luncheon was served.

The alumnae of the Pi Beta Phi fraternity entertained their grand president, Mrs. Anna Lytle Tannahill, and the chapter with a "cookey shine" Monday night, December 13, at the home of Mrs. E. L. Holton, 217 North Fourteenth street.

Miss Ethel Varner and Mr. Wesley Williams were married at Wichita November 12. Mrs. Williams is a member of the Delta Delta Delta sorority and is a former student of this college. Mr. and Mrs. Williams are now at home at Augusta.

Mrs. Ned Kimball, 800 Houston street, entertained Thursday evening in honor of the birthday of her little son Ned. The guests were Mr. and Mrs. M. F. Ahearn and son Jimmie, Dean Mary Pierce Van Zile, Dr. and Mrs. J. P. Colt, and Mr. and Mrs. L. R. Eakin and son Junior.

Kappa Phi Alpha fraternity enter-

tained with a house dance Saturday in honor of Mr. Fred Valdez. The house was decorated in Christmas colors. A two piece orchestra furnished the music. Mrs. Alice Marquette, house mother, chaperoned. Twenty couples were present.

Miss Irene Broughton and Mr. Robin Swallow were married on Thanksgiving day, in Abilene. Mrs. Swallow is a former student of K. S. A. C. She is a member of the Delta Delta Delta sorority. Mr. Swallow is a graduate of K. U. and is a member of the Beta Theta Pi fraternity there. They will be at home in Tulsa, Okla.

Thursday afternoon, December 9, at a meeting of the D. A. R. in the public library, Miss Thelma Dobson, Miss Lucile Smith, Miss Velva Radner, Miss Marguerite Miller, Miss Edith Fairchild, Miss Lillian O'Brien, and Mrs. Lillian Bressler assisted in the entertainment by singing four popular songs. Miss Julia Caton gave a butterfly dance.

Mr. and Mrs. Robert Spillman and Mr. and Mrs. J. C. Hessin entertained in honor of the Kappa Kappa Gamma sorority Saturday evening with a Christmas dancing party at the Country club. The rooms were decorated in red and green crepe paper, and Mr. and Mrs. Santa Claus gave favors from a Christmas tree for a favor dance. A four piece orchestra furnished the music.

Pi Kappa Delta entertained Zeta Kappa Psi with a line party to the show Friday evening after which Zeta Kappa Psi gave a fudge party for Pi Kappa Delta at the home of Miss Christine Cool. Those present were Miss Florence Mather, Miss Dorothy Mosley, Miss Gladys Addy, Miss Marcia Seiber, Miss Maude Lahr, Miss Christine Cool, Mr. J. Wheeler Barger, Mr. Arnold England, Mr. H. I. Richards, Mr. Ellis Kimble, Mr. V. V. Cool and Mr. Charles Howard. Miss Grace Derby and Mrs. C. F. Cool chaperoned.

Theta Sigma Phi, woman's honorary journalistic fraternity, will hold initiation services at 5 o'clock this evening, at the home of Miss Clementine Paddelford, for Miss Jessie Ade, junior in home economics and Miss Geta Lund, senior in industrial journalism. After the initiation services a buffet supper will be served.

Members of the Pi Beta Phi fraternity entertained Sunday evening, December 12, at the Gillett hotel with a dinner in honor of their na-

tional grand president, Mrs. Anna Lytle Tannahill.

Freshman girls' pan-hellenic met Thursday evening at the Kappa Kappa Gamma house. The meeting was called to order by the president senior pan-hellenic, Miss Norinne Weddle, and officers for the year were chosen. The officers are: president, Miss Margaret Curry; vice president, Miss Louise Mowry; and secretary-treasurer, Miss Jessie Lehman. This was the first meeting of the recently chosen first year group. Plans for the freshman girls' pan-hellenic party, to be held soon after the first of the year, were discussed.

Miss Nobuko Hara was the guest of honor at a dinner given Wednesday evening at the college club. American Beauty roses were used as decorations. The guests were Miss Nobuko Hara, Mme. Yasu Kiyosumia, Miss Josephine Proctor, Mrs. Fishback, Miss Florence Heiser, Miss Katherine Bower, Mrs. Roguet Leslie Jenkins, of New York City, Mr. and Mrs. Hal Davis, Mr. Matthews, Prof. R. W. Conover, Mr. Roberts, Prof. A. E. Westbrook, Prof. H. P. Wheeler, Prof. J. C. Emerson, and Dr. E. J. Frick. Mme. Yasu Kiyosumia, the traveling companion of Miss Hara, gave two solo dances after the dinner.

The members of the Kappa Sigma fraternity entertained Friday evening, December 10, with their annual Founders' day banquet at their chapter house, 519 North Eleventh street. The dining room was decorated in streamers of the fraternity colors, scarlet, green, and white. The dinner was served in five courses. Mr. Ed. Cooper was toast-master. Lloyd Zimmerman spoke representing the seniors, Dudley Bentley spoke representing the freshmen, Mr. Hurst Majors spoke from the alumni point of view. The freshmen of the fraternity entertained with a composition of their own originality. The dinner was followed by a dance. "Brick" English's three piece orchestra furnished the music. Punch was served throughout the evening. Mrs. Jennie Bassler, the Kappa Sigma house mother, chaperoned.

Prof. J. B. Fitch of the dairy department will attend a Jersey sale at Topeka, December 15.

Miss Mildred Alford and Miss Goldie Watts were Sunday dinner guests at the Pi Kappa Alpha house.

Sunday dinner guests at the Sigma Phi Epsilon house were Prof. and Mrs. M. W. Furr.

Miss Edith Kaul and Miss Bernice Spence were guests of Miss Jamie Cameron in Wamego, Saturday.

Miss Louise Ausherman was a dinner guest at the Alpha Delta Pi house Sunday.

Mr. Patrick Carmody of Junction City, visited his niece, Miss Sue Carmody, Sunday.

Capt. and Mrs. L. H. Bixby landed at Hoboken, December 10. Mrs. Bixby who was formerly Miss Sarah Marty was graduated from K. S. A. C. in 1915 and Captain Bixby has attended school here. Since the signing of the armistice Captain Bixby has been with the army of occupation stationed near Berlin. Mrs. Bixby joined him there immediately at the close of the war.

Dinner guests at the Delta Zeta house Sunday were Mrs. Hitch of Manhattan, and Miss Agnes Aldridge.

Miss Mary Polson, of the clothing and textiles department, and Miss Izell Polson, of the journalism department, spent Saturday in Junction City.

Sigma Phi Epsilon held open house Monday evening for the Alpha Delta Pi sorority from 6:30 to 7:30 o'clock.

Ship Winter and Phil Platt spent part of last week in Leocompton.

W. E. Turner has returned from his home in Kansas City where he was called by the serious illness of his mother.

President and Mrs. W. M. Jardine were dinner guests at the Kappa Kappa Gamma house Sunday.

Miss Mary Baker and Miss Helen Hannap were Sunday dinner guests at the Chi Omega house.

Reed Williams spent the week end at his home at Florence.

Miss Alice Brown spent Saturday in Topeka.

Ensign Richard Cruzen visited Thursday and Friday with his sister, Miss Mary Cruzen, and stayed at the Sigma Alpha Epsilon house with Joe Slagten. Mr. Cruzen is stationed on the destroyer "Klaxon" at San Diego, Cal. He has a 30-day leave of absence and is on his way to his home at Gallatin, Mo.

SEVEN HUNDRED ATTEND SMOKER

ENTERTAIN STUDENTS, PROFESSORS AND BUSINESS MEN

Seaton, Farrell, Clammer, Reid, Baker, H. B. Walker, Calderwood, and Hill on Program

Over 700 students, professors, and business men attended the engineers' mixer and smoker at the Community house Thursday evening.

The mixer was out of the ordinary in that it was the first given by any division to which the Chamber of Commerce of the city and men from all divisions of the college were invited.

After an hour of general good time Kenneth Shideler, head of the seminar, introduced the first speaker, R. A. Seaton, dean of engineering, who spoke of things done by the division of engineering at the Kansas State Agricultural college. Instances of experiments and works accomplished for the good of the people were cited, and also forceful arguments for the necessity of coming to college were presented.

F. D. Farrell Compliments Engineers

F. D. Farrell, dean of agriculture, followed with a short talk highly complimentary to engineers. "I think of engineers as men of order," he said. "Group loyalty among engineers stands for order, and from the midst of chaos and unsettled conditions the engineers rise serene and confident. There results the constructing of roads, highways, and canals, and the erecting of buildings. However, there is one shortcoming that engineers must guard against, and that is the ignoring of the human factor. They easily become interested only in their own work, neglect associating with others, and so come to regard themselves as detached from other human beings."

"The engineer has a chance to step higher in life than any man in any other profession," declared George Clammer, president of the Manhattan Chamber of Commerce.

"Some people seem content with whatever goods and riches they can get hold of," he said, "without any feeling of the need to repay. That is wrong, for every one owes more to society than he can possibly return."

Pictures Future of Division

In the place of Prof. H. H. King, who was unable to be present on account of illness, C. E. Reid, professor of electrical engineering, told of some of the workings of his own imagination, through which he could see the brilliant future of K. S. A. C. as an engineering school.

Prof. C. F. Baker, head of the department of architecture, then presented the architectural view of engineering. He said that it was not an architect's business merely to make pretty pictures, as some people seem to think, but also to plan buildings so that they would be safe, beautiful, and full of the helpful element.

Engineer and Farmer Work Together

L. E. Conrad, professor of civil engineering, was on the program of speakers, but as he was sick, H. B. Walker, associate professor of irrigation and drainage engineering, took his place. Professor Walker said that since engineers and farmers work with much the same end in view, except that they use different methods, they should stick closely together.

J. P. Calderwood, professor of mechanical engineering, and publicity man for the entire division of engineering, retold a definition of an agriculturist, which is "A man who can make two blades of grass grow where only one grew before." He then defined an engineer as "One who can make one Ford run where two Fords would not run before."

The mixer was fittingly brought to an end by several humorous stories by Professor H. T. Hill, of the department of public speaking, and by a few numbers played by the all-engineer orchestra made up of: Scrub Fisher, cornet; George Fisher, violin; H. Bergwinn, saxophone; and Hubert English, piano.

FEDERAL BOARD MIXER TO BE HELD BEFORE HOLIDAYS

Social Event To Be Given That Ex-service Men May Become Better Acquainted

At a meeting of the Federal board men of the college Wednesday evening it was decided to give a mixer some time before the holidays.

There are over 250 men scattered throughout the various departments who never meet in a social way. It is the desire of Mr. Price, supervisor of the board, that the men get acquainted and to this end it was decided to give the mixer.

Committees were appointed to complete the plans and the mixer will be held in the Community house a few days before the close of school for the Christmas holidays.

SIGMA DELTA CHI PLEDGES SIX JOURNALISM STUDENTS

Two Men Take Special Work In Department—Four Are Juniors

Six men in Journalism were pledged by Sigma Delta Chi Thursday evening. One man, Don Ballou, is taking up Journalism work entirely from the art standpoint, one other intends to go into the business side of Journalism and the other four expect to take up Journalism from the editorial side.

The men who were pledged are Donald C. Ballou, special in Journalism; Edward Shaffer, special in Journalism; V. R. Blackledge, junior; C. W. Howard, junior; Morris Laine, junior; Albert Meade, junior.

Is It Our Duty?

Mr. Bentley, a Kappa Sig from a nearby college visited at our Kappa Sig house one day last week.

"Well boys, I guess I'll go over and see my brother, Herb."

"Your brother? Where?"

"Phi Delta house."

Where have we heard; "A house divided against itself cannot stand."

—Washburn Review.

R. I. Throckmorton, professor of soils, spent Saturday at Kansas City on business for the agronomy department.

SHORT SKIRTS IN VOGUE SATURDAY

OVER ONE THOUSAND ATTEND KID PARTY

LeBarge Entertains Audience—Mr. and Mrs. Santa Claus Distribute Treats to Kiddies

Fully 1,000 sedate and dignified college students forsook the conventional garb of early manhood and womanhood for the abbreviated costumes of their schooldays, at the Kid party given by the Y. M. C. A. and Y. W. C. A. in the college gymnasium Saturday night.

This all college mixer was in the nature of a Christmas party for the kiddies, with Prof. and Mrs. C. F. Baker taking the parts of Mr. and Mrs. Santa Claus. A large Christmas tree which reached nearly to the roof of the gymnasium served to bear out the spirit of the occasion.

The program started with a general get acquainted mixer, followed by group games under the supervision of Miss Irene Dean and Miss Grace Heise. Le Barge of Camp Funston gave an entertainment for the audience which was received fully as well as his chapel entertainment of a few weeks ago. Next came a series of stunts by individuals and folk dancing by girls enrolled in the playground educational department.

The grand march was featured by the distribution of bags of popcorn, peanuts, candy, and chewing gum, by Mr. and Mrs. Santa Claus. Ray Watson had charge of a burlesque ball game. After much careful consideration Bill Knostman was awarded the boy's prize and Clara Larson was awarded the girl's prize, for being the most cleverly dressed children in the party. The program ended with a suit case relay.

E. L. Holton, head of the department of education, returned yesterday from Chicago where he spent the week end attending the Cleveland conference.

They All Fall For It

LAST year I had a pal

AND I wanted him to

COME to college with me

SO when I went home

LAST Christmas

I asked him

IF he had ever

THOUGHT about

COMING here to school

AND learning all about the

HIGHER things in life

SUCH AS sneak dates

CUTS, excuse blanks

ETC.

BUT he seemed

UNROMANTIC

AND didn't want to

COME back with me

UNTIL I thought of a way

TO GET him interested

IN college life

SO when I got back

I sent him

A SECOND Christmas present

WHICH was better than

THE first one that

I HAD given to him and

OH, BOY!

IT SURE DID THE WORK.

AND it will do the same

WITH your pal or

SWEETHEART or friend.

COLLEGE PAYS THE STATE IN REAL SERVICE

K. S. A. C. IS REACHING EVERY KANSAS HOME

ADDS 139 MILLION IN WEALTH

President Jardine's Biennial Report Reveals Vast Return School Makes on Tax Payers' Investment

In point of numbers, the 3,376 students enrolled at the Kansas State Agricultural college in one year are only a small proportion of the number of Kansans who obtain instruction and worthwhile information from the college.

They comprise actually only a little more than 10 per cent of the entire student body of the institution. President Jardine points out, in his biennial report, that last year there were more than 28,000 men, women, and children, who took correspondence courses at the state agricultural college. The state of Kansas has become the college campus.

Contact With Three Million

Primarily organized to give instruction in agriculture and mechanic arts, the agricultural college, through extension and other departments, now reaches and teaches in practically every farm home, and a considerable proportion of the city homes, of Kansas.

In addition to its courses of regular instruction, the college in the last two years, President Jardine states, has answered 3,212,760 inquiries. The extension department established 1,441,993 personal contacts with citizens of Kansas. Nearly 1,000 persons too old, or too busy, or otherwise barred from taking a regular college course, were given instruction in the summer schools and short courses.

Add 139 Million In Wealth Incidentally, through experiments and demonstrations, farming and stockraising, and getting right out and taking part in the everyday life of the people of Kansas, the "People's College" of Kansas added \$139,330,396 to the wealth of the state in the two years ending June 30, 1920, according to conservative estimates based on official reports to President Jardine.

"The Kansas State Agricultural college more than pays its way through the services it renders the state of Kansas," President Jardine declares. "Measuring services entirely on a dollar and cents basis, its actual saving of wealth in the past two years has reached nearly \$140,000,000—equivalent to an annual income of \$41.67 for every man, woman and child in the state. This return is on a net investment of less than 52 cents a year each."

Gives Distinct Services

Here are fifty distinct services performed by the Kansas State Agricultural college during the past two years:

Graduated 171 students in 1919; 371 in 1920.

Gave instruction to 2,991 students enrolled at the college in Manhattan in 1918-19; 3,376 in 1919-20.

Gave instruction through correspondence courses to more than 28,000 students.

Answered 3,212,760 inquiries, giving helpful and definite information in each case.

Through the extension division, dealing direct with the homes and arms of Kansas, established 1,441,993 contacts with Kansas citizens.

Gave summer school and short course instruction to 852 men and women too busy, too old, or lacking the preparatory education necessary to take a collegiate course. Included among these were 354 students in engineering short courses.

Not least, the college lost 93 members of the teaching faculty—a turnover of approximately 35 per cent—because other institutions offered better pay.

Readers Community Service

Distributed 50,000 trees and shrubs to western Kansas communities and farm homes from the Ft. Hays experiment station.

Demonstrated the feasibility of

winter irrigation at the Garden City experiment station.

Gave definite information and assistance to farmers through county agents in 54 counties (1920).

Extended rural service work (rural organizations, community projects, etc.), in 58 counties.

Organized boys and girls clubs in 55 counties.

Held institutes and extension schools in 103 counties.

Conducted home economics services (school lunch demonstration and installation of systems, child feeding meetings, household management lectures and meetings, home nursing meetings, and organization of homemakers' clubs in 98 counties.

Personal and Farm Service

Assisted in planning and executing 131 farm drainage projects.

Assisted in planning and executing 30 farm irrigation projects.

Gave technical and organization assistance in 39 drainage districts.

7 water supply projects, 19 farm building projects and 28 miscellaneous farm projects.

The drainage and irrigation service of the extension division and engineering division functioned in 103 counties.

Supplied farmers with 8,943 financial record books, with instructions for installing a farm cost accounting system.

Supplied 8,868 farm inventory blanks.

Helped in the organization and installation of accounting systems of cooperative organizations with a total membership of more than 8,000 persons.

JARDINE WILL CONDUCT TWO LAND SETTLEMENT MEETINGS

Leaders in Kansas Legislature Look to President for Much Valuable Information

Pres. W. M. Jardine will conduct two conference periods dealing with the Land Settlement plan, both as applied to California and to Kansas, during the rural organization conference section of Farm and Home Week, February 7 to 12.

Last summer President Jardine spent a large part of his vacation time making personal investigations of the California Land Settlement plan. Leaders in the Kansas legislature are looking to Doctor Jardine to give much valuable information, during the coming session, as to application of phases of this plan to our recently passed farm homes amendment.

Class Drive To Topeka

The flour milling class drove to Topeka Wednesday morning to hear the industrial court's investigation of the curtailment of flour production by the Kansas mills. Those in the party who made the trip to Topeka were L. A. Fitz, head of the flour milling department and chief inspector of grains of Kansas; C. W. Oakes, miller; Tarby Fletcher, Floyd Phleger, Captain Truehardt, E. L. Comfort, and Walter J. Rogers.

Prof. Albert Dickens went to Topeka Tuesday on a business trip.

Miss Mary Barker was a dinner guest at the Alpha Delta Pi house Tuesday evening.

William A. Lippincott, professor of poultry husbandry, is planning on a trip this week end to Topeka and Hutchinson.

The Busy Bee

What do you think of the Stetsons worn by the men of the music department?

J. W. Searson, head of the department of English—

"Slouchy enough to be worn by bright men, and they give me some consolation for my own old hats. I wish every man that wears as poor a hat had as much under it and could get as much out from under it."

Louise Glanton, head of the department of clothing and textiles—"I think hats should be comfortable and express one's personal importance, they should also have a certain aesthetic value. However when men as clever as the members of the music department wear this hat I should take it for granted it is a nice hat."

Ray Watson, editor of the Royal Purple—"When I see a man wearing one of those 'flop me down' hats, it makes me think of an expression of my father's 'like a whipped dog that has had his liver beat out of him.'"

LUKE AND SULLY ENTER THE HOME TOWN POLITICAL CIRCLE

Luke Guilfoyle and Giles Sullivan, that well known pair of Aggie athletes, who by the way have put Wamego on the map, have made their mark in the home town political circle.

Sullivan, former player on the Aggie football and baseball teams, was elected justice of the peace of the city of Wamego at the recent election. Now Guilfoyle, who is Sully's side kick and captain of next spring's baseball nine was elected constable at the same election. Of course, you understand that one of the famous pair could not enter politics without the other.

It is said that the Law and Order league of Wamego backed these men to the limit and after an intensive and exciting campaign succeeded in electing them. This League was for Luke and "Sully" because of the training they received while attending the Kansas State school of culture.

Justice of the Peace Sullivan is well qualified for his office, because it's said that Sully has had experience. Now just what type of experience he has had with the justice of peace—well, we are not here to say. It is rumored that Sully is cutting rates on marriage ceremonies, sort of running the preachers out of business you know.

Constable Guilfoyle registers 100 per cent when it comes to a keen eye for observation. Why Luke always dates the classiest girls in school. Couldn't fool Luke, the sly Old Fox, as his frat brothers call him, he knows a good thing when he sees it. And so Wamego is figuring on Luke's weather eye to keep the town running smooth. The constable will be in school next semester. He thinks he will be able to leave his office during the baseball season at any rate.

The Aggies take off their hats to Judge Sullivan and Constable Guilfoyle, the pair who make Wamego famous. Just how they got the upper hand of their little town we can't say—but one thing sure is that women's votes had more to do with their election than the Law and Order league.

Fifteen rahs for the ladies.

MEAD DISCUSSES CALIFORNIA PLAN

IS EXPERT ON LAND SETTLEMENT PROBLEMS

Speaker at Science Club Meeting Will Confer on Washington Land Problems Soon

"The land problem is one of the biggest problems that face the states at the present time, and Kansas must solve that problem as thoroughly as any state of the union," said Pres. W. M. Jardine in an introduction speech at the Science club Monday evening.

"Perhaps it is not realized that even now, fully half the land of Kansas is farmed by non-owners," he continued. "That is something which must be remedied, and the only way to remedy it is to be guided by successful ventures of other sections of the nation. I myself visited the settlements in California where the community plan was being carried out, and believe that to be a good plan to follow. There will always be much dissatisfaction and very little success as long as so many of our people have to live and work as our renters do."

"Since the voters of Kansas have become interested, and voted so strongly in favor of the Farm Homes amendment, we may expect better things. The proposal is already before the legislature to produce state funds in order to provide farms and homes for the aged."

Dr. Elwood Mead spoke at the meeting on "California Community Building and Land Settlement." Doctor Mead, rightly called "the father of the California movement," is head of the department of rural institutions, University of California, as well as chairman of the Land Settlement board of that state. He was formerly professor of agriculture in the Colorado Agricultural college, and promoted early irrigation in the west.

Doctor Mead will soon go to the state of Washington for a conference with officials on the land problem there. He is accepted as the best informed man, anywhere, on the subject of settling people on land.

AGS FORM NEW STUDENT CLUB

DEAN FARRELL POINTS OUT NEED OF ORGANIZATION

Aim to Develop Loyalty and Keep up the Ethical Standard of Members

Tuesday evening the junior and senior agricultural students held a meeting in the Agriculture building. The purpose of the meeting was to talk over and to start the ball rolling toward the foundation of a general agricultural student organization here which would bring all the students of agriculture together. In his talk the dean mentioned several main objects which an agricultural association would have in view. The organization could speak for the agricultural students as a group when inquiries came regarding their opinion.

Second, the association would be expected to foster the welfare of the agricultural students as a group. This would be brought about in a number of ways, by holding open house in the agricultural division, by holding fairs and livestock shows, and by starting up an agricultural students' publication similar to those published by other agricultural colleges.

Last, the aim of the organization would be to develop the spirit and loyalty of the agricultural division both to the school and to their own division, and to watch over and keep

up the ethical standards of the agricultural students at K. S. A. C. I. K. Landon, who was acting chairman, then took the chair, and a business meeting was called to order. Mr. Landon was elected president and was authorized to inform the various agricultural organizations here to select two men at their next meeting to represent them on a committee to draw up a constitution for the new General Agricultural Students' association.

KNAUS ATTENDS MEETINGS OF FARM BUREAU IN EAST

All Farmers Show Desire for Improved Agricultural Conditions

Karl Knaus, state leader of county agents, attended the second annual meeting of the American Farm bureau federation at Indianapolis, December 6, 7, and 8.

"The meeting was characterized by the sane, practical attitude that the organization has stood for from the beginning," says Mr. Knaus. "There were no radical elements present, every farmer showing a desire to better the agricultural conditions of the country through improved marketing and credit facilities."

Mr. Knaus represented the county organization unit of the farm bureau. The county farm bureau has been a permanent factor in the agricultural development of the nation since Smith-Lever funds became available in 1914. It is the local organization through which the county agent, who is largely supported by government funds, does his work.

Union Meeting in Auditorium

Sunday evening, December 19, at 7:30 o'clock in the college auditorium, the churches of Manhattan will meet in union services. After the Christmas services under direction of the Rev. Lewis Jacobson, the pastor of the Baptist church and president of the local ministerial union, excerpts from the Messiah will be sung by the united choirs of all the churches with the orchestra accompanying. This is the first union meeting to be held this year, and as the singing of the Messiah is indeed an added attraction, a good attendance is expected.

COEDS SHOP FOR ORPHAN KIDDIES

WILL PLAY SANTA CLAUS AT ODD FELLOWS' HOME

Social Service Committee of Y. W. and Dorcas Sunday School Class Are Originators of Idea

Fifty-two college girls, members of the social service committee of the Y. W. C. A. and of the Dorcas class of the Presbyterian Sunday school, are very busy this week buying toys and dressing dolls for the children at the Odd Fellows' Home. Horns and popguns are the only gifts on which a ban has been placed.

Miss Hazel Olson, Miss Helen Parker, and Miss Effie Hendricks are directing the entertainment for the members of the Home. Saturday afternoon from 2:30 till 5:30 o'clock the following program will be given: song for all, "Joy to the World;" greetings, Miss Irene Dean; Christmas story from Ben Hur, Miss Clara M. Smith; violin and clarinet duet, Dorothy Knittle and Joe Haines; reading, Miss Helen Parker; vocal solo, Miss Marjorie O'Neill; reading, Miss Ione Leith; reading, Miss Osceola Burr; vocal solo, "Holy Night," Miss Barrows; reading, Miss Queenie Hart; pianologue, Miss Rowena Thornburg; special musical number, accompanist, Miss Elsie Johnson.

The gifts, and the gay little stockings filled with treats, are to be hung on a big Christmas tree and will be distributed by the "fore-runners" of Santa Claus. The girls in charge of the room programs are Queenie Hart, Ione Leith, Marjorie O'Neill, and Margaret Rafington.

The members of Prof. W. H. Andrews' class of the Presbyterian Sunday school will provide a means of transportation for the entertainers. If the weather is favorable the girls will be taken out to the Home in cars, otherwise there will be a special interurban.

K. U. LEADS IN "ANNUAL" SALES

ONLY 200 ROYAL PURPLES SOLD
TO DATE

Over 1,000 "Jayhawkers" Spoken
For—All Class Pictures In by
Holidays

"Are we going to let the Jayhawk bird pull the whiskers out of the Wildcat's nose?" asks E. D. McCollum, president of the senior class. "Fifteen hundred Jayhawkers have already been sold at K. U.," he states further, "while only about 200 Royal Purples are sold and only a total of 900 were sold last year."

McCollum admits that the annual is expensive, but he states that the price of engraving has gone up 18 per cent, the price of photography 15 per cent, and printing 23 per cent, and all other expenses in proportion.

The Royal Purple staff wishes all class pictures taken by the holidays, and the business manager says that if the students of each class turn out to the photographers at least 90 per cent strong, the financial burden will be much less for every one concerned.

HOLSTEIN COW BREAKS RECORD

GEORGE DRUMM IN CHARGE OF
TEST

Animal Produces 31.5 Pounds of
Butter Fat in Seven Days—
Previous Record 30.2 Pounds

The Holstein cow, Maid Henry Pontiac, bred and owned by the college dairy department, has just finished a seven day test under the direction of George Drumm, senior in dairy husbandry, in which she broke the state record by producing 31.5 pounds of butter fat in seven days. Her previous record was 30.2 pounds of butter fat for the same period.

Maid Henry Pontiac is nine years old and bears the distinction of being the largest cow in Kansas. She has an annual record of 695 pounds of butter fat and 18,430 pounds of milk. When she was five years old she made a seven day record of 28 pounds of butter fat. Because of her age and apparent lack of condition it was generally thought that her day was over as a record breaker.

George Drumm offered to take Maid Henry Pontiac in charge, and due to his skilled care and feeding, she has given a wonderful comeback.

Drumm is a senior in dairy husbandry, a member of the Sigma Phi Epsilon fraternity, and Alpha Zeta honorary fraternity. He is president of the Student Dairy association and was on the 1920 dairy judging team which won first place at the National Dairy show at Chicago. He was also awarded a \$400 scholarship as the best judge of Jerseys at the National show.

Besides being prominent in college affairs, Drumm is a practical dairyman. Most of his knowledge was gathered during three years of milking and feeding test cows in Minnesota. During those three years he made five seven day records over 30 pounds of butter fat. Six records show 1,000 pounds of butter fat in a year, one of the last being a world's record cow. This is a wonderful reputation for a man to gain as there are no 1,000 pound butter cows in Kansas, consequently his services are constantly in demand here and elsewhere.

Drumm is continuing Maid Henry Pontiac on test in the hope that she will make 33 or 34 pounds in the next few days.

Miss Sarah Blue left for her home in Union Springs, Ala., Thursday. Miss Blue was here for the installation of Kappa Delta.

Miss Maurine Aspey will spend the week end at the Chi Omega house.

Miss Arabella Livingston of the University of Nebraska, will be a guest of Miss Mary Worcester this week end.

Prof. H. W. Davis has for the past six weeks been conducting a series of lectures before the business men of Manhattan. He is working in connection with the Chamber of Commerce. The meetings are held each week on Wednesday evening. The lectures cover the important points in the art of effective retail advertising. The business men show a keen interest in the work.

Ray Watson, editor of the Royal Purple, announces that all group and organization pictures must be in by Christmas vacation. Group pictures, including snapshots, must also be turned in to the editor by the holidays unless special arrangements are made for a later date.

LIEUTENANT MCCLELLAND RETURNS FROM ENGLAND

Has Been With U. S. Army Liquidation Mission in London

Lieutenant Harold M. McClelland, '16, of the United States army air service, arrived Friday night for a month's visit with his parents, Dr. and Mrs. J. M. McClelland, 612 Poyntz avenue.

Lieutenant McClelland has just returned from overseas, where he had been sent about 18 months ago with the U. S. army liquidation mission. It was the duty of the mission to dispose of property of the U. S. army air service which had been used overseas and to adjust bills incurred by this branch of the army while in France. Lieutenant McClelland's headquarters were in London. He made several trips to France and was in other countries during his absence abroad.

Lieutenant McClelland, after his vacation, will return to Washington for further assignment.

MORE PRACTICE WRITING IS ADVICE OF CAPPER EDITOR

S. O. Rice Had Wide Experience on Various Dailies and Magazines

"If you want to learn to be a writer, spend one hour each day alone with your typewriter," advised S. O. Rice, editor of the Farmer, in speaking on feature writing at the journalism seminar Monday afternoon. "Never miss a single day, just concentrate and write."

Mr. Rice also brought out the fact that a feature story could get cross, because it was written in such an interesting way as to hold the attention of the readers, while the same story written by a specialist just giving the facts, would be dry and dead because it would not interest the average reader.

"Feature writing cannot exist on trite overworked expressions," concluded Mr. Rice. "they must express originality and must be interesting."

THEY TURN 'EM OUT ROUGH BACK EAST

A prominent eastern educator who recently visited K. U., severely rapped the "white-collar" girls and boys of the university—and other western schools.

Admitting that a few Beau Brummels and fashion-plate girls, who run to extremes in the matter of school apparel, will be found at any school, still, we do not believe the number sufficiently large, at least not at K. S. A. C., to constitute a serious cause for alarm. Our critical friend says that in the east the men students wear "rougher" clothes such as O. D. shirts and corduroy coats—he didn't describe the rest of their raiment, but we take it that nothing short of asbestos trousers, hob-nailed shoes, and steel helmets would meet the approval of this advocate of rough and ready dress.

Truly, clothes do not make the man and yet the wearing of quality clothes is not generally an indication of vanity, but it is an indication of pride in personal appearance. Many students have found that buying expensive clothes is the most economical in the long run. They have no quarrel with unionalls and "rough" clothes, wearing them when at work and feeling perfectly at home in them, but during the school year they prefer to dress a bit better. Others prefer flannel shirts and hightops; it's merely a matter of personal opinion.

As for wearing white collars and shining one's shoes occasionally, we do not think that is should be held against anyone. This is a democratic school with democratic ideas. As long as a man is a man, we don't care a hang whether he comes to classes in a "formal" or in Scotch kilties. We believe the eastern educator is needlessly alarmed.

ENGINEERS ORIGINATE CUSTOM

The engineers, in holding open house last Wednesday, originated a custom in K. S. A. C. that it would do well for the other departments of the college to follow. Students and faculty members of the division devoted the entire afternoon to an exhibition and explanation of the working of the department.

It is a deplorable fact that the students of one department have about as much first hand information regarding the other departments on the hill as they have of K. U.'s or some other school. To aid in overcoming this attitude of self sufficiency among the departments the engineers displayed and illustrated the operation of their plant and endeavored to acquaint the rest of the school with what they are doing.

To further the growth of K. S. A. C. it is necessary that no student lose an opportunity to convince prospective students of the merit of the school. And to do this it is necessary that he be able to talk K. S. A. C.; it is necessary that he know not only his own department but the others as well. Other divisions will no doubt follow the example of the engineers and it is up to the student to take advantage of the opportunity to learn about his school.

LET'S ALL GO HOME TOGETHER

"But you see, dean, the only train that stops at my home town leaves here Monday morning and if I don't go then I won't get home till Christmas evening," says a pretty young coed in a tearful voice. The Christmas rush is on at the offices of the deans. Already waiting lines have been formed and the secretaries to the deans and the deans themselves are beginning to look tired and care worn.

Why not adopt the slogan of the tradespeople and "get your Christmas excuses early?" Besides saving time for yourself this would also prevent a lot of trouble and confusion at your dean's office. But better than all, why not stay until school is dismissed? You will profit by it and go on your vacation with that satisfied feeling that all your work is up. So stick 'er out folks, and we'll all go home together.

COLLEGE VERSION OF AN OLD PARABLE

A certain freshman went down from home to college and he fell among critics, who said his clothes fitted badly, and his manners were awkward, and that he had an unattractive personality; and they stripped him of his self-confidence, his enthusiasm, and his courage, and departed, leaving him hurt and lonely and half dead.

And when the seniors saw it they were amused, saying, what a good job the sophomores are doing on that freshman, and they passed by on the other side.

And in like manner the juniors also, when they saw it, smiled and said, yea verily, for he has not the making of a good fraternity man, and they passed by on the other side.

But a certain special student, as he went about, came where he was, and when he saw him, he was moved with compassion, and came to him and bound up his wounds, pouring in sympathy and understanding. And he took him to his room and sat him on his feet again, and brought him into his own circle, and was a friend to him.

Which of these, thinkest thou, proved neighbor to him that fell amongst the critics? Go, and do likewise.

DO DIVISIONS BOOST EACH OTHER?

Which are you attending, K. S. A. C. or your own particular division? Which are you boosting for? Which do you talk up among your friends?

If you think of K. S. A. C. as a whole, it's all right. If you don't—well you ought to be ashamed, that's all.

There is too much inter-departmental strife at K. S. A. C. As one prominent member of a rather neutral college department has said: "The ags hate the engineers, the engineers hate the ags, and the journalists hate everybody but themselves."

Until the engineers realize that a cow may possibly have as much potential value as a steam engine; until the ags agree that the engineer is human; and the journalists realize that their stories are not necessarily superior to the subjects thereof, just so long will K. S. A. C. students be unable to get together and get what they want.

L. C. Williams of the K. S. A. C. extension division returned Tuesday from Belle Plaine where he has been conducting orchard pruning demonstration work. He reports that there were 12 or more orchardists present at the meetings held and that there is a great deal of enthusiasm down in that region on the subject of orcharding. Mr. Williams says that the Belle Plaine district ranks as high or even higher than any other orchard district in Kansas. Several thousands acres of young orchards will commence bearing in that region this next year.

Robert M. McAuliffe, who is a student at Notre Dame university, South Bend, Ind., will spend a part of the Christmas vacation as the guest of Miss Sue Carmody, 1124 Laramie.

Printing has been taught continuously since 1875 in the Kansas State Agricultural college.

Miss Mathilda Stratmann of Holyrood and Mr. W. C. Janssen of Lyons were married at Holyrood December 1. They will make their home at Lyons. Mr. Janssen was graduated from K. S. A. C. in 1919 and is a member of the Alpha Zeta agricultural fraternity and of the Sigma Phi Epsilon fraternity.

Miss Lucille Woulfe, freshman in general science, has been confined to her room for several days because of illness. She is reported to be improving.

Thursday afternoon, December 9, at a reception given by Mrs. Lathrop Fielding, Miss Warren and Mr. Williams of the music department furnished musical numbers.

Frank Roark will arrive Friday from Lawrence to spend the Christmas holidays.

The winner of the all around athletic contest in the A. E. F. games was a graduate from K. S. A. C.

SIX INTRA-MU GAMES A NIGHT

TWENTY-TWO QUINTETTES
WORKING FOR CHAMPIONSHIP

Kappa Sigs Defeat Acacias—Sig Eps
Win from Alpha Psis—Elkharts
Lead Section A

Judging from the interest being shown, intermural basketball at K. S. A. C. has come to stay. Both the short courts are being used this year, and six games a night must be played in order to accommodate the 22 contending quintettes in sections A and B before summer comes on.

Panhellenic games played Monday night resulted in victories for Kappa Sigma and Sigma Phi Epsilon. Both games were rather onesided.

Kappa Sigs played the Acacias and at no time were in danger of being defeated. The score ended with the Kappa Sigs in the lead by a score of 24 to 6. The other panhellenic game was between the Sig Eps and the Alpha Psis. The Sig Eps outplayed their opponents in every respect. The Sig Eps won with a score of 26 to 4.

Panhellenic games played on Tuesday night were more interesting. The victors of Tuesday's games were the Betas and the Sigma Nus. The Sigma Nu-Alpha Psi game was fast and interesting. The Alpha Psis showed much improvement over Monday's playing but they did not have the team work necessary to beat the Sigma Nus. The game resulted in a victory for the Sigma Nus by a score of 32 to 21.

One of the hardest fought panhellenic games played this season was the one between the Betas and the Pi Kaps. The Betas led during the first period and the half ended with them leading 17 to 11. The Pi Kaps came back in the second half and held the Betas remarkably well. During the last few minutes of the game the score was more nearly even. The Pi Kaps were in the lead at one time but were unable to hold the lead. The Betas won 31 to 28.

Tuesday the Elkharts were leading section A with a percentage of 1,000. Glenwood was second with 800. Phi Beta Sigma third with 750, while Lester Erwin independent and the Phi Gammas were tied for fourth with a percentage of 666.

In division B there were three teams in the first rank position. The Y. M. C. A., Phi Delta Tau, and the first battalion teams all stand at 1,000 per cent as shown by the records. However, the first battalion had reported but one game and as they won it their percentage was perfect. The second battalion came in for second place with a percentage of 666, and the Boomerang and Miami county clubs were tied for third with percentages of 600 each. Some of the teams are a bit lax about turning in their scores. The scores of the games lost are just as important as the scores of the games won, and should be handed to the athletic office as soon as possible after the game.

Dean E. L. Holton returned from Chicago Monday where he attended the Cleveland conference. This is an organization consisting of 50 members who are among the leading educational men of the country. The purpose of this meeting was to discuss better educational methods for the schools of the United States. A sum of \$1,000,000 a year has been given the Cleveland conference to spend in research work in education.

Open for your convenience all through the holidays—Cooper's Barber Shop, in the Main hall on the campus.

Pi Beta Phi Christmas party at chapter house.

Tuesday
Tabasco club dance at Harrison's.

Kappa Delta sorority was at home to the Sigma Nu fraternity Monday evening from 6:45 to 7:45 o'clock.

Members of the Phi Delta Tau fraternity will have their Christmas dinner at the chapter house next Sunday.

Delta Zeta held open house Tuesday evening from 6:45 to 7:45 o'clock for the Sigma Phi Epsilon fraternity.

Sigma Alpha Epsilon will entertain Friday evening, January 7, with a New Year's party at the chapter house.

Mrs. W. M. Jardine entertained the Houston street card club, Wednesday afternoon at her home, 1020 Houston. There were four tables. The rooms were decorated with Christmas decorations.

Miss Grace Hesse entertained with a card party in honor of Miss Sarah Blue of Union Springs, Ala., Monday evening. A two course luncheon was served. The guests were 16 of Miss Hesse's faculty friends.

Miss Lela Adams of Wichita and Mr. Claude B. Owen of El Dorado were married at Wichita November 1. Mr. Owen attended K. S. A. C. in '16 and '17, and is a member of the Sigma Phi Epsilon fraternity.

A home economics staff meeting was held Tuesday afternoon. The department of food economics served an informal tea to the other members and in this way presented their own work for discussion and criticism.

Theta Sigma Phi held initiation services Tuesday evening between 5 and 7 o'clock, at the home of the president, Miss Clementine Paddelford. The initiates were Miss Geta Lund and Miss Jessie Adee. A short business meeting was held after initiation, and following the business meeting Mrs. Paddelford served a two course buffet supper.

Alpha Zeta, honorary agricultural fraternity, held a banquet Tuesday evening at the Pines in honor of the secretary of the grand council of the organization, Mr. Harry B. Potter, who is visiting the Kansas chapter of Alpha Zeta. He is making a tour of the various chapters of the fraternity over the United States.

Mrs. Miller, Kappa Kappa Gamma house mother, was hostess on Wednesday afternoon to the house mothers of the various sororities and fraternities. The affair was in keeping with the Christmas season, the guests each bringing gifts which were given late in the afternoon. A luncheon was served to 18 guests.

Omicron Nu, honorary home economics sorority, held formal pledge services Tuesday noon in the Y. W. C. A. office for Miss Gladys Ross, of Oklahoma City, Okla., senior in home economics. Following the pledging the members had luncheon at the cafeteria. Initiation was held Thursday evening in the Y. W. C. A. office.

The members of the Franklin literary society held their regular meeting Saturday evening in the Franklin hall. Miss Duella Mall had charge of devotions. The program consisted of special musical numbers, a

story by Paul Barber and Lendre Doll, reading of the Spectator by Paul Roote, and Current Events, by P. O. Vohs. A special Christmas program is being prepared for the next meeting.

Theta Chi Gamma, honorary general science sorority initiation services were held Wednesday evening at Miss Margaret Russell's apartment, 1212 Fremont, for the following girls: Geta Lund, senior; Maude Lahr, senior; Anna Neal, senior; Ruth Peck, junior; Rowena Thornburg, junior; Orpha Maust, junior; Elizabeth Dickens, junior; and Lulu Mae Zeller, junior. Refreshments of ice cream and wafers were served after the initiation.

One of the parties of the early Christmas season will be the annual Christmas tree party of the Alpha Delta Pi sorority. On Sunday evening, December 19, the members of the chapter will have their tree party. On Monday afternoon the tree will be hung with gifts for a number of little children who enjoy this occasion each year. On Monday night a dancing party will be given at the chapter house at which members of the various fraternities will be given their share of the Alpha Delta Pi Christmas tree.

Informal announcement has been

ONE IDEA OF SERVICE

Our idea is to sell the most suitable goods for the purpose required at as reasonable a price as we can afford.

Nopermanent business was ever built that did not feel under obligation to render its patrons a service. A worthy article at a fair price sums up our idea of service to our customers.

Shide & Riddlebarger
JEWELERS
Gifts that Last

made in New York City of the engagement of J. E. Tillotson, former student of the college, and a brother of Mrs. Ray Pollock, of Manhattan, to Miss Clara Staads, of Sioux City, Iowa. Miss Staads is in New York City this winter in editorial work, and Mr. Tillotson has a position on the staff of Farm Power, an Orange Judd publication, with headquarters in New York. The marriage has been set for late in January. Mr. Tillotson was a student in the journalism department of the college. He went to New York last winter to do special work in New York university. He is a former Aggie track star, a member of the Sigma Phi Epsilon fraternity, Sigma Delta Chi, Aggie Press club and the K fraternity.

Women of the faculty entertained with a formal leap year Christmas party in recreation hall Thursday evening. The receiving line was composed of President and Mrs. W. M. Jardine, Dean and Mrs. J. T. Willard, Mrs. Edward Fishback, Dr. T. A. Case, Miss Elsie Smith, Dr. N. D. Harwood, Miss Edwards, and Prof. J. H. Robert. The hall was decorated with Christmas trees and smilax. Mrs. H. W. Davis, Miss Florence Helzer, Miss Katherine Kimmel, and Miss Grace Hesse sang several Christmas songs. Santa Claus appeared in time to give gifts to the guests before the 12 o'clock Christmas

chimes were heard. After the dance a two course supper was served in the Canteen. More than 60 couples were there. The music was furnished by a five piece orchestra.

Mr. Ringo will present his pupils in a studio recital Saturday, December 18, at 4 o'clock.

Lewis J. Bryan will leave for his home in Golden, Col., Saturday. He will not return here to school next semester but will attend the University of Colorado.

H. B. Muggleston, superintendent of the poultry farm, was in Leavenworth Sunday.

During the past few weeks F. E. Fox, of the poultry department, has been giving his classes practical problems which the poultry man has to contend with.

Miss Elizabeth Chalmers of Chicago and Mr. R. D. MacGregor of Topeka were married at Chicago November 25. They will make their home in Chicago where Mr. MacGregor is connected with the Flom-home in Chicago where Mr. MacGregor is connected with the Flom-A. C. in 1919 and is a member of Scarab and of the Sigma Phi Epsilon fraternity.

TO GIVE COEDS TIPS ON MEAT

A. H. DEPARTMENT DEMONSTRATED CUTTING OF BEEF

Professor Fox Showed How Chickens Should be Killed, Picked and Cleaned

Dr. L. G. Bogert's classes in foods II as well as the house keepers' short course went to the Livestock judging pavilion yesterday afternoon at 4 o'clock to see a double demonstration.

The first part of the demonstration consisted of an exhibition of meat cutting which was put on by the senior animal husbandry students who are taking meats under the direction of Prof. A. M. Paterson of the animal husbandry department. A whole side of beef was cut up into familiar cuts which the housekeeper usually buys at the meat market. Professor Paterson showed the girls how easy it is for the tricky butcher to disguise cheap cuts for the more expensive ones.

As second part of the demonstration, Professor Fox of the poultry department gave a practical demonstration of killing and dry picking a chicken, showing also proper ways of dressing the bird. Professor Fox also showed how to bone a chicken.

STUDENTS MAKE FILM DOM DEBUT

MOVIE INSTRUCTIONS GIVEN AT SPECIAL CHAPEL

Watson Leads Wampus Cats in Demonstration Yells—Film to Be Sent all Over State

Nearly 2,000 K. S. A. C. students made their debut into filmdom last Wednesday morning, when under the direction of Prof. J. G. Emerson and Ray Watson, they thronged out of the auditorium in simulation of a howling student mob after a basketball victory over K. U.

In the assembly just previous to the demonstration Professor Emerson and Ray explained the fine points of movie technique by admonitions such as, "Don't look at the camera or its operator," "act natural and you'll be funny enough," and other helpful bits of advice. When the word was given the students ganged out the three front doors, the camera clicking constantly, and formed a semi-circle in front of the auditorium. There the mob and the Wampus cats were led through a

number of demonstrative yells in front of the camera and the temporary stars went back to their ham-drum classes.

After a few finishing touches the completed film was sent to Chicago Wednesday night where it is to be developed and prepared for the theaters. It is expected that it will be back by the holidays and that the students may view their actions soon after vacation. Duplicates of the film are to be sent all over the state as an advertisement for the college and for Farm and Home week.

NAMES OF AGGIE DEBATE TEAMS ARE ANNOUNCED NOW

Schedule Opens January 14 With Women's Debate With Emporia—Men Debate Ames January 15

The debate schedule for the year will open Friday evening, January 14, with the women's debate with Emporia, followed Saturday evening with the men's debate with Ames. The question for both of these debates is: "Resolved, that the United States by appropriate legislation should prohibit all further immigration of Japanese to this country."

The women chosen for the Emporia debate team are Marie Correll, Clementine Paddelford, Luella Sherman, Lucile Whan, Adah Songer, and Elizabeth Winter, alternates, Louise Clark and Grace Turner.

The men on the affirmative Ames' team are H. I. Richards, Charles Howard, and J. Wheeler Barger. Negative V. V. Cool, Arnold Englund, and Ellis Kimble, J. W. Farmer and W. H. Knostman, alternates.

R. C. Nichols, junior in animal husbandry, has withdrawn from college for the remainder of the semester. He will return the middle of the spring term and again take up his work. Mr. Nichols is now doing publicity work for the college.

Mr. and Mrs. Chester Brewer, who attended college the spring semester of 1918, are now living in Chicago where Mr. Brewer is manager of four Electric shoe shops. Mr. Brewer is a member of the Sigma Nu fraternity and Mrs. Brewer is a member of the Pi Beta Phi fraternity.

D. B. Levi, junior in engineering, was taken down with the scarlet fever Friday. He lives at 915 Kearney with his wife. They will be quarantined for more than a month, according to Doctor Siever, the college physician.

C. E. Rogers went to Topeka Monday on business.

Mrs. E. J. Ewing and little son Max have come from their home in Canada to spend the winter here with Mrs. Ewing's parents, Mr. and Mrs. George Wilcox. Mrs. Ewing was graduated from K. S. A. C. in 1914 and was a member of the Ionian literary society.

BILL KNOTSMAN OUT FOR SQUAD

AGGIE SCHEDULE STILL UNCERTAIN IN SPOTS

Two Dates Still Open—May Have Only Twelve Championship Contests

Prospects for a championship basketball five at K. S. A. C. took a boom Tuesday evening when Bill Knostman, big rangy substitute forward of the 1930 team came out for the squad. Knostman had not been out before because of his poor eyesight which proved a handicap to him last year, but the call of the court was too much for him to resist so he is out trying the game once more. Should Knostman be able to overcome the disadvantage imposed on him by his poor eyesight, he will be an asset to the Aggie quintet. He is tall and fast

and a good man at caging the ball when points are needed.

There is a record breaking assortment of embryo guards, forwards, and centers on the floor in Nichols gymnasium every evening now. Mike Ahearn says, "I counted 54 on the floor at one time Tuesday night. It will be a hard job to select the best from among the candidates. Coach Knost is teaching his men the fundamentals of basketball in a thorough fashion and will have a well drilled team."

The Aggie schedule is still problematical in spots. As it stands at present, two dates, January 7 and 8, are open, and Washington university is trying to cancel its dates on February 25 and 26. Should the open date not be filled with a valley team and should the Washington dates also be cancelled only 12 championship contests would be left on the Aggie list. Mike Ahearn is trying to fill the January 7 and 8 dates with Nebraska or Grinnell, but has not heard from either school as yet. Phillips university has been scheduled for January 29, leaving January 28 open. The schedule as it now stands:

January 7-8—open.

January 14-15—Oklahoma university at Manhattan.

January 21-22—Iowa State at Ames.

January 29—Phillips university at Manhattan.

February 4-5—Kansas university at Lawrence.

February 11-12—Missouri university at Manhattan.

February 18-19—Kansas university at Manhattan.

February 25-26—Washington university at Manhattan.

March 4-5—Missouri university at Columbia.

LOYALTY CLUB GIRLS PLAN PARTY FOR FRESHIE GIRLS

To Be Given in Recreation Hall in Honor of Freshman Girls

At the meeting of the Girls' Loyalty club held Tuesday afternoon, plans were discussed for the party to be given for the freshman girls of the college by the sophomores, juniors and seniors, January 8. The party is to be given in the recreation hall.

Other business of the meeting in-

cluded the acceptance of the constitution of the organization. The girls decided to talk up the dormitory question while at home, during the holidays, and to do all that they could to interest their parents and friends in the subject.

The cheating which has been going on at K. S. A. C. was denounced by the girls, who were urged to discuss the matter in their separate organizations.

Pres. W. M. Jardine and Dr. Elwood Meade left Tuesday morning for Topeka, where Doctor Mead will talk before the members of the legislature. Doctor Mead has come to Kansas on the request of Governor Allen and is giving lectures through the state. President Jardine is to introduce Doctor Mead and to have charge of the meeting.

William E. Nickson, Nevada, Mo., and Joseph Wolfe, Sedalia, Mo., have entered college as vocational men.

Students who desire to be considered for employment in the college cafeteria next semester call at the office K28 before January 19th to fill out an application blank. 2t.

SALMON BACK FROM CHICAGO

GRAIN SHOW AND IMPROVEMENT ASSOCIATION MEETING

Manhattan Experiment Station Sends no Exhibits—State Represented by Colby and Hays

S. C. Salmon, professor of crops, returned December 8 from Chicago where he attended the International Hay and Grain show and also a meeting of the International Crop Improvement association. Professor Salmon represented the Kansas Crop Improvement association at the meeting.

At the grain show this year the exhibits of grain sorghums were not so large as was expected, although those that were presented were of excellent quality. The experiment station at Manhattan did not send any exhibits this year, but the state was represented at the show by the branch stations at Colby, and Hays, as well as by farmers.

The Hays branch station was awarded first place for its milo. In a closely contested class of hard winter wheat the Colby station took ninth place with a sample of Kan-red. First place in the class went to John Howell of Mondrose, who exhibited a sample of Clark's Black Hull, a strain developed by Earl G. Clark of Sedgwick, and which has done very well in the state the last two years. First prize in kafir went to an Oklahoma farmer.

The corn prizes went to Indiana and the other corn belt states. Spring wheat prizes were awarded to Montana and Canada. Iowa took most of the money on oats.

Several years ago student grain judging contests were held at the Grain show and K. S. A. C. used to place well among the leaders, but the last several years these contests have been discontinued.

GRIMES GOING TO ECONOMICS MEETING AT ATLANTIC CITY

Will Also Attend Conference in Washington, D. C., Between December 30 and January 1

The last week of December W. E. Grimes will leave for Atlantic City where he will attend the annual meeting of the American Economic association to be held from December 27 to 30. From there Professor Grimes will go to Washington, D. C., where he will attend a meeting of the American Farm Economic association to be held from December 30 to January 1.

At its meeting, the American Economic association, which is composed of persons interested in economics in this county, will discuss transportation problems, the economic problems of the coal industry as well as many other economic problems which are of vital impor-

tance to the country at this time. Some of the most eminent economists in America are on the program. The American Farm Economic association is composed of men interested in economics, particularly as applied to agriculture. At its meeting Professor Grimes, who is chairman of the committee on teaching, will make the annual report for his committee.

PRESENT "TULLY FOR ART'S SAKE"

IS GIVEN BY HAMILTONS AND IONIANS

Harold Batchelor Plays Leading Role—Nine in Cast—Farce Given at Chapel

"Tully for Art's Sake," a clever one act farce, was presented in Thursday's assembly by the Hamilton and Ionian literary societies. Tully Wolfe, a prosperous young business man, is crowded out of his three bathrooms by the talented guests that his artistic wife has invited in for Christmas eve. He is forced to dress in the music room. Finally he is dressed, and the guests are brought in. After the introductions are made the various artists entertain their host, who appears rather bored.

The cast is as follows: Tully Wolfe—(a young business man), Harold Batchelor; Margaret Wolfe—(his artistic wife), Eleanor Watson; Mrs. Reginald Van Zant—(the mother-in-law), Clara Mary Smith; Percival Bebbington—(a perfumed Englishman, who writes poetry), Volney Chase; Elsie Falkland—(a dramatic reader), Osceola Burr; Sybil Avalonski—(Russian violinist), Dorothy Knittle; Betty Burke—(an impersonator), Rowena Thornburg; Carmen de la Castillio—(prima donna), Olivette Mitsch; James—(the butler), F. L. Haggard.

Mrs. Elizabeth Ctrele Garver, '20, of Topeka spent last week end in Manhattan.

M. D. Laine and Bloyce Bate will spend the week end in Lawrence on business.

Miss Marjorie Shaffer of Beloit will be the week end guest of Miss Mildred Wright.

F. W. Bell, associate professor of animal husbandry, spent Wednesday and Thursday, December 16 and 17, at Stafford where he was judging stock for the Stafford county pure bred association.

Miss Hetty Carris, '20, returned to Manhattan Friday because of her father's illness. She has been doing dietitian work at the Barnes hospital at St. Louis, Mo.

Open for your convenience all through the holidays—Cooper's Barber Shop, in the Main hall on the campus.

CLASS TRAINING IN LEADERSHIP

WALTER BURR WILL SUPERVISE COURSE

To Be Part of Rural Organization Section of Farm and Home Week

One feature of the rural organization section of Farm and Home week, February 7 to 12, will be a regular school in rural organization, conducted by Walter Burr. There will be two sessions each day.

Several local leaders from Kansas communities have already enrolled for this course of instruction. They will return to their own communities and conduct classes there during the rest of the season.

Walter Burr, who will supervise this course, is a member of the Rural Organization committee of the American County Life association. For the past seven years he has been state rural organization specialist, and in addition to this work is at present acting instructor in sociology, rural sociology, rural organizations, and related subjects at K. S. A. C.

Time To Hunt Those Red Flannels? Ask Physics Department

Rain, snow, and cold. Cold, snow, and rain. Sounds bad, doesn't it? But wait, this is no threatened weather report which would cause grandmothers to get out granddaddy's old red flannels to see if they need mending.

Would you like to know what kind of weather we have been having during the month of December since Bryan first ran for president? Twenty-two years is a long time and in that time old mother nature can dispense from products from nearly all her warehouses. The physics department has kept a record of the weather for a great many years. A comparison of the records of the department shows that nearly every year in which we have had December weather it comes sometime in the few days just preceding or just after the 21st.

Will we have a white Christmas? Many of the men who were in the coal fields remember what kind of weather we were having at this time last year but very few of them will remember what kind of weather we had in December two years ago. We did not have a white Christmas last year nor the year before. The last honest to goodness white Christmas we had was in 1914. So say the weather records kept by the physics department.

Do you know that K. S. A. C. was one of the first places in the state where weather records were kept? Weather records were first kept at the college in 1858 and from that time up until 1891, records were kept more or less accurately. In 1891 the work of the weather bu-

reau was taken over by the department of agriculture and since that time accurate records have been kept.

ANNOUNCEMENTS

Quill club will not meet Monday evening.

Regular meeting of the Sigma Delta Chi will be held Monday at 5 o'clock.

Eurodelphian literary society will have a Christmas program Saturday at 3 o'clock.

Hamilton literary society announces a program "a la Xmas" for Saturday night, December 18.

Saturday, December 18, is the last day for Freshmen and Sophomores to pay their Royal Purple assessments.

The K. S. A. C. vocational students will hold a mixer and dance Friday evening in the college Recreation hall.

Judging from the bulletin announcement the Franklins are to have a Christmas tree at their regular meeting Saturday.

The Lincoln and Philomathian week after Christmas. Watch the Topeka Daily Capital for further announcements.

Browning literary society will hold no meeting Saturday afternoon but everyone is urged to attend the Christmas party Monday, December 20, at 8 o'clock.

Shr'vee club will have a dinner and mixer for all students and alumni in the county at Topeka the societies will have a joint meeting Saturday, December 18. They will share their Christmas tree at that time.

Dr. Helen Thompson, dean of the home economics division, and Dr. L. Jean Bogert, head of the food economics and nutrition department, will attend the bio-chemist and physiologist national meeting to be held in Chicago December 28, 29, and 30. Doctor Thompson and Doctor Bogert will attend the K. S. A. C. alumni dinner, January 21, that

is being given by the Chicago alumni. Arrangements for the dinner have been made through Dean J. T. Willard.

Dr. Helen Thompson is speaking this week to the freshman girls enrolled in the home economics division through the design lecture classes, on the opportunities in college life for preparation for definite vocations, the standards of scholarship, and the various aids which the college offers students in consultation and advice.

Miss Florence Bingham, who is attending school at the University of Wisconsin, will be the week end guest of Miss Marion Traynor at the Alpha Delta Pi house.

Miss Blanche Traynor of Dodge City, who is attending school at Lindenwood college, will be the week end guest of her sister, Miss Marion Traynor, at the Alpha Delta Pi house.

Miss Gladys Newton and Miss Mildred Wright shopped Tuesday in Topeka.

Eugene Charles, sophomore, was called home Sunday on account of the unexpected death of his sister, Ethel, who attended K. S. A. C. last year.

The Best Evidence of Efficient Service

During 1919 the representatives of the Massachusetts Mutual delivered policies aggregating \$131,103,768—an increase of more than 100 per cent over the amount delivered in 1918. Of this over 35 per cent was upon the lives of persons already insured in the Company. Less than 1 per cent of the total premium-paying insurance in force was surrendered and only slightly more than 1 per cent was allowed to lapse. There could be no better evidence that the faithful and efficient service of the Massachusetts Mutual is appreciated by its policy holders, who are its staunchest friends and most enthusiastic advertisers.

THE KANSAS STATE COLLEGIAN

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, FRIDAY, JANUARY 7, 1921

NO. 28

FEBRUARY 26 IS ORATORICAL CONTEST DATE

LITERARY SOCIETIES STARTED
CUSTOM 21 YEARS AGO

ALPHA BETAS WIN FIRST VICTORY

Five Women Give Winning Orations
—Oscar Brown, '20, Given
First Place Last
Spring

The twenty-first annual inter-society oratorical contest, between contestants from each of the eight literary societies of the college, will be held in the auditorium Saturday evening, February 26.

Twenty-one years ago the first oratorical contest of the college was staged in the old chapel in Anderson hall. There were only four literary societies on the hill at that time. It was due to the efforts of these four societies that the custom of an annual inter-society oratorical contest was started. T. J. Woodworth of the Alpha Beta society, won the first contest with his oration entitled, "The Two Greatest Perils of American Labor."

Women Win Five Contests
Five contests out of the 20 have been won by women, of which four were members of the Ionia literary society, and one of the Franklin literary society. Miss Clara Pancake won first place in the second contest with an oration on the subject "The Need of Social Unification." She was graduated in 1903 and is now at the Girls' Normal, Philadelphia.

The third and fourth contests were also won by the Ionians. Miss Alice Ross, '05, now Alice Ross Cunningham was the winner of the third contest. The subject of her oration was "The American." The Ionia representative in the fourth contest was Miss Wilma Cross. Her oration was entitled "Citizenship as a Factor of Government." She was graduated in 1904.

The fourth Ionia victory came in the thirteenth contest, being won by Miss Lucille Berry, now Mrs. Max Wolf, of Manhattan. The subject of Miss Berry's oration was "Woman's Work." She was graduated with the class of 1915. Miss Clara B. Shields, '08, now Mrs. A. R. Fehn, won the eighth contest for the Franklin literary society with an oration entitled "Let Us Have Peace."

Alpha Betas Are First Winners
Since the first contest the Alpha Betas have won first place three times. Wallace Hutchinson won for them in the fourteenth and Walter Ott in the fifteenth contest. Mr. Ott's oration was on the subject of agriculture. He was graduated in 1916 and is now in Fort Morgan, Col. Last year J. Oscar Brown won the twentieth contest for the society with an oration entitled "The Consumer's League." Mr. Brown was graduated in 1920 and is teaching vocational agriculture this year.

The Websters carried away the highest honors for the first time in the eleventh contest when Edwin McDonald was the winner. Mr. McDonald was graduated in the class of '12, and is now in Berkeley, Cal. Roy Davis, '12, won again for the Websters in the twelfth contest with his oration entitled "The Industrial Crisis."

Hamiltons Win Most Contests
The Hamiltons have won five contests. Their first victory was in the fifth contest and was won by Frank E. Balmer, '05. His oration was entitled "Political Conservatism." Mr. Balmer is now with the extension division of university farm, St. Paul, Minn. The sixth and seventh contests were also won by the Hamiltons giving them three consecutive victories. C. E. Davis, '05, won the sixth with his oration "The Divine Direction of History," and Raymond Brink, '08, won the seventh with his oration "Lucifer, Son of the Morning."

John Martin, '09, won the ninth contest with an oration entitled "Mind the Master of Matter." Arthur Boyer won the seventeenth contest for the Hamiltons, which was their latest victory, with an oration entitled "The American Japanese Question." Mr. Boyer was graduated in 1918 and his present address is Wichita.

Athenians Have Good Record
The Athenian society, which is the youngest men's society on the hill, has won four contests. Their first victory was in the tenth contest, when L. G. Folsom won the gold medal with an oration entitled "Truth and Her Companions." Leo

C. Moser, '17, won for them in the sixteenth contest with his oration entitled "Our Real Foreign Foe."

Three years ago Earl Taylor, '18, won first place, his oration being on the Japanese question. C. J. Medlin, '20, gave the winning oration two years ago. He spoke on "The New Menace." Mr. Medlin is in the employ of Montgomery Ward and Company.

No one is eligible to enter the contest except under-graduate students, who have been members of the societies that they represent for at least one full college year. The orations must not exceed 1,200 words in length and shall not contain over 150 words of quotation. Each orator is requested to present four typewritten copies of his oration, to the member of the inter-society council representing his society, not later than 30 days before the contest.

DR. HOWARD HILL TO REMAIN HERE

PUBLIC SPEAKING DEPARTMENT
TO OFFER NEW COURSES

Work Will Include Two Interpretation Classes and a Study in Lecture Recital

Dr. Howard T. Hill, who was engaged as assistant professor of public speaking for the fall period ending January first, will remain with the department and will hold the rank of associate professor.

Doctor Hill came to the department on October first. He is a graduate

DR. HOWARD T. HILL

of the Iowa State college, and holds the degree of Juris Doctor from the University Law school of Chicago. He also spent two years in residence at the Harvard Law school. During the war Mr. Hill was an ensign in the navy. He has had wide experience as a platform lecturer and manager in chautauqua work, principally on the western and Canadian circuits.

"The college is most fortunate in being able to retain Dr. Hill with the department," stated Prof. J. G. Emerson, head of the department of public speaking. "It will now be able to proceed with a full complement of courses for the first time since before the war. Sheer numbers in the required course in extempore speech have heretofore made it impossible to offer the other elective courses set forth in the catalog. The retention of Dr. Hill on a full time basis will enable us to take care of this need."

The new courses to be offered by the department during the second semester include two courses in oral interpretation under the heading of public speaking I and public speaking II, and a lecture recital course under the head of advanced public speaking. The last named course is a one hour course devoted to the presentation of lecture recitals, lectures, or addresses. It may be had under either Professor Emerson or Doctor Hill.

All the other courses in the department are two hour courses. Professor Hill will teach the classes in oral interpretation and extempore speech II. He will also teach a class in extempore speech I.

ORGANIZE ILLUSTRATION AND CARTOONING CLASS

William Giles To Act As Instructor
—Students to Criticize Each
Other's Work

A class in illustrations and cartooning has been organized for the purpose of improving the art work used on the hill in posters and other advertising, and for illustrations for the Collegian, Brown Bull and other publications. The class meets every Tuesday evening at 4 o'clock.

The class, acting as a club, will criticize each other's work and help each other in every possible way. William Giles will act as instructor. Mr. Giles is well fitted for his position as he has had practical experience on the art staff of several publications. Everyone interested in this work is invited to join the class.

It's Not a Joking Matter Boys—I's Real Serious Stuff

Recreation center is a great place. Did-j-a-ever stop to think about that? How many people you have gotten acquainted with there? How thrilling it is to meet a date there and with her march proudly down main hall. Dates generally look awfully keen when you meet them in that room. Noses never shine and the bandoline always is well distributed. Gee, ain't it glorious.

Sometime in the future there will be a club composed of the married couples who met for the first time in recreational center. Wonder how many would qualify for the organization? Perhaps not very many, now. But in a few years—well—they will be real numerous.

All joking aside, don't you realize that the old chapel as it is furnished now is doing a great deal to influence the lives of the future Aggie alumni? Just think boys, you may meet your better half there. What could be sweeter?

SIXTEEN PROFESSORS ATTEND SCIENCE MEETING IN CHICAGO

G. A. Dean Elected President of
American Association of Economic
Entomologists

Sixteen deans and professors of the college attended meetings of the American Association for the Advancement of Science and Associated Societies, at Chicago, which met December 27 to January 1. At this meeting there were in attendance more than 1,000 professors from colleges all over the United States.

Prof. George A. Dean, head of the entomology department of this school, was elected president of the American Association of Economic Entomologists, one of the associated societies. This organization is one of the most important ones of its kind in the country and in a large measure directs the entomological activities in the United States.

The deans and professors of this college who attended the meetings are as follows: Dr. J. T. Willard, Dr. Helen B. Thompson, Prof. George A. Dean, Prof. E. G. Kelly, Prof. J. W. McCulloch, Prof. R. C. Smith, Dr. R. K. Nabours, Prof. R. J. Barnett, Prof. L. E. Melchers, Miss Mary T. Harman, Prof. H. L. Ibsen, Miss Mildred R. Tackaberry, Dr. L. Jean Bogert, Prof. F. C. Gates, Prof. W. A. Lippincott, and Prof. J. C. Peterson.

WILL STAGE WOLF DRIVE ON MONDAY, JANUARY 10

Men to Meet at Tabor Valley School
Between 9 and 10 O'clock

A wolf drive will be held Monday, January 10, in the area south of Zeandale and Waubesa. Those from the college who are interested in this should be at the Tabor Valley school between 9 and 10 o'clock in the morning in order that they may be assigned to places in the line.

Students in the military department may get particulars from Major F. B. Terrell. If sufficient students who have no classes, express a desire to attend this drive, arrangements will be made for a truck to take them to the Tabor school.

New Honor To Professor Crawford

At the convention of the American Association of Teachers of Journalism held in St. Louis, Mo., last week, Prof. N. A. Crawford, head of the journalism department here, was elected secretary of the association. He will have charge of the publishing of the association bulletins and news letter. Professors from all parts of the country attended this convention. Professor Crawford gave a talk at the meeting on "Agricultural Publicity."

Attends Two Eastern Meetings

W. E. Grimes, head of the department of agricultural economics, attended a meeting of the American Economic association held at Atlantic City from December 27-30. From there Professor Grimes went to Washington, D. C., where he attended a meeting of the American Farm Economic association from December 30 to January 1. At the latter meeting Professor Grimes gave the report of the committee on teaching agricultural economics and farm management.

Mrs. D. C. Bice, matron at the Delta Zeta house, spent the holidays with friends in Denver, Col.

FOOTBALL MEN

All football men who will be candidates for the 1921 eleven, report to the handball room at the gym for wrestling and handball each evening from 4 to 5:15.

RECORD AGGIE JUDGES HAVE IS ENVIABLE

TEAMS RANK HIGH AMONG
OTHER INSTITUTIONS

ENTER NEW CONTESTS LAST YEAR

For Year K. S. A. C.'s Stock Judging
Team is Second in U. S. and
Canada

That the judging teams of the Kansas State Agricultural college rank high among the judging teams of other institutions of the United States is shown by the record of the past two years. Both the stock judging teams and the dairy judging teams have placed high in every contest entered.

First in Denver Contest

During the school year 1919-1920 the stock judging team won first place at the National Western contest at Denver, second at the National Swine contest at Des Moines, and third at the International contest at Chicago. Twenty-six teams were entered in the three contests, two of which were Canadian teams. For the year the team ranked second of all teams in the United States and Canada.

The men on the team were K. D. Thompson of Densmore, Nevels Pearson of Maphattan, H. R. Guilbert of Wallace, F. G. Welch of Hartford, J. D. Montague of Anthony, W. R. Horlacher of Colby, and D. M. Howard of Hutchinson. In the National Western contest at Denver, Thompson of the Kansas team was high individual, while four of the team were above the first 10 places. At the National Swine contest Montague was second individual.

The men on the dairy judging team of the same year were Raymond Campbell of Parsons, Edmund E. Gottman of Kansas City, Kans., and G. C. Anderson of Bronson. They won first place at the National Dairy show contest at Chicago, and fourth place at the National Cattle congress at Waterloo, Iowa. Twenty-one teams competed in the two contests. Cups were offered for the high team by the National Dairy show and by the Hoard's Dairyman magazine. The Holstein-Friesian association also offered a cup for the high team in judging Holstein cattle. All three of these trophies were won by the Kansas team.

Present Records Equal Previous

While the judging contests of the school year are not over the two teams have kept up their records of the previous year. The stock judging team won first at the National Swine contest at Des Moines and fourth at the International contest at Chicago. In the first contest with 25 men entered, three of the Kansas team ranked above the first 10 individuals, and in the second contest with 105 men entered, two were above the first 15 individuals. Twenty-six teams were entered in the two contests, three of which were from Canadian institutions. The men on this year's team are Charles Nitcher of Hardy, Nebr., Elmer D. McCollum of Bogard, Mo., Merton L. Otto of Riley, H. E. Mather of Manhattan, O. R. Peterson of Caney, Homer J. Henney of Horton, and C. A. Newell of Matfield Green.

The dairy judging team repeated its work of the previous year with exactly the same success, winning first at the National Dairy show contest at Chicago and fourth at the National Dairy congress at Waterloo. The competition this year, though, was greater than that of the preceding year. Several team and individual prizes were also won. In the National Dairy show contest Young of the Kansas team was high individual, while Drumm was high on Jerseys. The men on the team were George Drumm of Iola, Clement Young of Manhattan, and Robert H. Lush of Altamont.

In New Shows This Year

Last year marks the first entrance of the Kansas team in the National Swine and the National Western contests, yet they have placed first and second in the former and first in the latter. The stock judging team is working at the present time for the National Western contest which will be held at Denver on January 15.

The stock judging team of both years has been coached by Prof. F. W. Bell of the animal husbandry department of the college. He is a graduate of Cornell university and came to Manhattan from the Texas College of Agriculture and Mechanical Arts. H. W. Cave, associate pro-

fessor of dairy husbandry, coached the dairy judging team. He is a graduate of Iowa State college and began his work with the dairy judging teams after completing his graduate work at K. S. A. C.

Move Weather Vane

The department of physics has changed the location of the weather vane from west of the engineering building to the roof of the chemistry building. The vane is equipped with an electrical self-recording device which registers the direction of the wind at all times. The recording apparatus has been installed in what was formerly the old wireless room. Since the weather vane has been moved all the weather apparatus, the rain gauge, the wind gauge, and the weather vane are located in Denison hall. Prof. E. G. Converse of the physics department is in charge of the weather records.

ROYAL PURPLE CAMPAIGN ON

FIRST VOTE CAST BY MRS. MOL-
LIE SMITH MOSER

Winners' Names to Be Announced in
Unique Way at Popularity Ball
January 14

The first vote of the Popularity contest was cast today when Mrs. Mollie (Smith) Moser, an alumnus of this college bought her Royal Purple and left her vote for her candidate in a sealed envelope to be cast at the time of the final count.

The sales campaign of the class books starts in earnest, this week, with all of the organizations out working for their candidates. The number of sales made by each organization is to be posted on the bulletin board in front of the Royal Purple office the latter part of next week.

The culmination of the contest will be reached when the winners of the contest are announced at the Popularity ball which is to be held in Harrison's hall immediately following the basketball game with Oklahoma, January 14.

The method of announcing the winners of the contest to the assembled gathering will be unique, and altogether different from any other Popularity ball which has been held here.

Who will be the most popular coeds?

SHOW AMATEURS HOW IT IS DONE

MOUNTAIN ASH CHOIR TO GIVE
SUPER SERENADE

Claim Welsh Singers Will Make
Moonlight Prowlers Blush
for Shame

Those male choruses that now and again break forth in Manhattan on moonlight nights with a tenor, a bass, and lots of men to carry the "air" will have an opportunity to hear how the thing should be done next Tuesday, January 11, when the Mountain Ash male choir gives its concert at the college auditorium under the auspices of the De Koven club.

The Mountain Ash choir is composed of 14 male voices from Mountain Ash province in Wales. They are directed by Glyndwr Richards, considered one of the best conductors in the British Empire. The director obtains wonderful effects from his chorus which has been singing together for 10 years. Each man is a soloist of ability, but in the ensemble work of the choir individual ability is suppressed for choral effect.

Prof. A. L. Lovejoy and Prof. A. E. Westbrook of the music department are enthusiastic over the visit of the Mountain Ash choir to Manhattan. They say, "The Mountain Ash Choir is the best male chorus we have ever heard."

The program includes a variety of numbers ranging from the famous Welsh war song "Harlech" to such humorous numbers as "Italian Salad." The choir has sung in the larger towns in the northwest and west and has scored a decided success everywhere. Frank E. White, the dramatic critic of the Denver Post, in the December 17 issue says, "Nothing that I have heard in years has given me the complete satisfaction that did the singing of these Welsh coal miners."

M. D. Laine and L. B. Bate attended the Phi Delta Theta convention in Atlanta, Ga., December 29 to January 1.

NORMALCY IS HERE--TICKET PRICES DROP

SEASON TICKETS \$2.50—RE-
SERVES \$1.50

GAME WITH OTTAWA U. JAN. 8

Only 13 Valley Games on Basketball
Schedule—Many Candidates for
Varsity Places

The drop in the price of necessities that Attorney General Palmer of the U. S. A. has been predicting for so long a time has finally arrived at K. S. A. C. Nope, the cafeteria has not reduced its prices on food, nor have registration fees been lowered. The necessity to lead the way in the price slump at Kansas State is basketball tickets, both season and reserve. The season tickets have been reduced to \$2.50 each and the season reserves to \$1.50 from their previous eminence of \$3.00 and \$1.70 respectively.

Lead Way In Price Cutting

"The athletic department has decided to lead the way in getting conditions back to the normalcy which President-elect Harding has prophesied," said Mike Ahearn Wednesday. "The hard times and the financial stringency which seem to be upon us temporarily, at least, had a part in determining the reduction policy, and the necessity for substituting a state conference school in the place of Washington university which cancelled its February 25-26 dates, also helped in bringing about the drop in price of the tickets."

Play Ottawa University Tomorrow

The open date on January 8 has been filled with a state conference school, Ottawa university. It had been thought that perhaps Nebraska university could be obtained to open the season, but no dates could be agreed upon. The schedule as it now stands has but 13 Valley games, necessitating an all-victorious season if the Wildcats are to win a Valley title. Four games each with Missouri and Kansas universities, two with Ames and Oklahoma, and one with Drake university comprises the list of battles on the 1921 schedule.

Large Squad Out

The large squad trying out for places on the Varsity has returned from the holidays in tip top shape except for a slight layer of adipose tissue in the meridional region, caused by too much home cooking. However, this disappeared after the first practice under the strenuous workout by Coach Knott at the first practice session of the week last Tuesday.

The large number of candidates for the Varsity positions will make selection of a team difficult, and it is probable that several players will be allowed a tryout in the Ottawa game Saturday evening. Captain Ham Bunker, Bill Knostman, Fred Williams, at forward, the Cowell brothers and Favel Foval at guard, and Jennings and Kuykendall at center all look as if they should be Varsity players and will get a chance to show their speed Saturday evening.

SNAPSHOT DRIVE BEGINS MONDAY

SHOULD LOOK PLEASANT, FOIL-
ING ENEMY ATTEMPTS

To Catch Awkward Postures as Well
as Graceful for Royal
Purple

Watch your step. And also watch the step of the camera man because he is going to be out and after 'em this next week. The big drive for snapshots for the Royal Purple, college annual, takes place during the entire week which has been set aside by powers that be, as official Royal Purple week.

If you have a wicked desire to get even with some enemy of long standing then drag out your own little vest pocket face recorder and spot your enemy when he is in the most unbecoming posture for exposure to the public eye.

Or if you have a craving for notoriety then it behooves you to keep dolled up for the entire week so that when the camera man does get you it will be in the most correct attire of the up-to-now gentleman or lady of the fashion sheet. The time of reckoning is at hand. "Be sure your sins will find you out." The camera does not lie.

THE KANSAS STATE COLLEGIAN

The Student Newspaper of the Kansas State Agricultural College
Published Every Tuesday and Friday of the College Year.
Entered at the Postoffice of Manhattan for transmission through the mails as second class matter.

Address all communications regarding stories, etc., to the editor of the Collegian and all letters in regard to advertising and subscription rates to the business manager.

"EVERYBODY'S BOOK" SEASON COMING

Got your Royal Purple?

"No," you say, "I have too many other things to pay out my money for."

Well that may all be true, Mr. Aggie, but did you happen to think that around about the last of May, when the Royal Purple season is on, you will be wishing you had one of those good looking books to read?

Just because the Royal Purple is a class book does not mean that it doesn't publish any interesting dope on all your friends. The class book is the one place that you can find the latest jokes out.

Then, too, did you ever happen to think that every annual sold means that much better looking book? Why? That's easy, it's just this way. If 90 per cent of the students will pay their assessments and buy a book it is possible to publish one that will be on a par with the class books of Yale, Harvard, and the large eastern universities.

Last year there were about 50 per cent of the student body who bought annuals and a much smaller per cent who paid their assessments. The staff is inclined to believe that if the people know the facts 90 per cent would support the Royal Purple so that there can be the best book ever put out.

Sample covers of books put out by Yale, the Army and the Navy, have been received at the office for the inspection of the staff. If the support is all that is desired the Royal Purple will be made of the same class of material.

Proof sheets of the view scenes of the campus and the dividing pages have come back from the Burgher Engraving company. They are accurate as to detail and bring out the artistic points without any of the slam bang, knock down and drag out effects.

Sure we know you want a Royal Purple. No, not because it is your duty to support the annual but—oh, just because it makes good reading in the spring time. The Royal Purple is "Everybody's book."

THAT NEW YEAR RESOLUTION

Did you take a lot of books home vacation?

Well it doesn't make much difference whether you did or not—of course, you never looked at them anyway. But now's your chance. The year is new now—and no matter if you have already broken all your New Year's resolutions—make another. And keep it.

Keep up! That's the only way to be fair with either yourself or your teachers. Don't get behind like you did last year. And when the new semester begins, keep up more than ever.

Don't neglect the student activities that you are interested in either. By neglecting to do your part you make somebody else do more than his share, and that is hard on everybody concerned.

Take an interest in the S. S. G. A. Keep it the live growing concern that it is getting to be. Support it and make it your organization.

Have a good time, of course. But don't think the college is just one jazz party after another. And perhaps if you wouldn't pride yourself on being able to completely lay aside on Friday night the thought of your Saturday's classes your grades might not cause such a sinking feeling at the end of the semester.

You've got a big chance to make up for a lot of things before the second semester begins. Make it your business to do so. Make one New Year's resolution—and keep it.

TICKETS AT NORMAL PRICE

The decline in prices has arrived at K. S. A. C. The athletic department in order to insure better student support of the basketball team has reduced the price of season tickets and season reserves as is announced on another page of the Collegian. This move was taken because the department believed that more students would buy the tickets at the lower prices, and if more students do not purchase, the department's accounts will show on the red side of the ledger at the end of the season.

The Wildcat five have splendid chances of winning the Valley flag this year as there are six of the 13 championship contests on the 1921 schedule played at Manhattan. Let's put the ticket campaign over with a rush—by the end of this week, then bend all our energies to pulling for the 1921 Missouri Valley champions.

Things we think; things others think; and things we think of things others think.

Dear Editor: "Pop Night" is spoken of as the one event on the

campus which shows best the ingenuity and ability of the students. It should continue the excellence of its performance for years to come. But this high standard will not be maintained unless it is certain that there can be no bias or prejudice in the decision of the judges. Of course there will always be difference of opinion among the judges and among the individuals of the audience. Considering the cleverness and perfection of each of the stunts given this year, it would be very hard to give a decision. Nor is it likely that any judge would consciously be unfair. But there might be an unconscious bias where matters which concern a judge personally are brought in, as for in-

stance the idea of a contest between various institutions concerning which some prejudices exist.

Under the circumstances it seems desirable that judges should be secured who are not associated in any way with any educational institution, but who are otherwise qualified.

The difficulty of securing such judges, however, brings up the question as to whether after all, the audience should not be the final judge. Coupons could be attached to the programs to be collected at the door as is often done at the close of chautauquas and the cup could be presented at the next assembly period. This would have the advantage of shortening the program and saving expense of the judges. It would be an expression of popular opinion and individual prejudice would be lost in the general vote. The people would enjoy their part in the performance and best of all, no decision would be given under emotional strain of the contest. For the time being all would be equally successful, awaiting award of final honors by popular decision.—P. P. Brainard.

Dear Editor: The Aggie spirit in true sportsmanship is an Aggie characteristic which has established a reputation for K. S. A. C. throughout the Missouri valley. It is of prime importance that we foster this spirit as we have fostered it in the past. This is especially true as we enter upon the basketball season.

It has been inferred that there was a slight departure from practice at the K. U.-Aggie game of October 30. No one would wish that such a condition should exist and in explanation for an article in a recent issue of the Collegian, it may be said that no deviation from precedent was intended. It is hardly believable that, at any time, was cheering encouraged because of K. U. penalties and, if such was the attitude of any individual, we trust that it shall not recur.—R. L. S.

Dear Editor: Maybe the name of K. S. A. C. should be changed to K. S. C., but that question is not the purpose of this discussion. One thing is certain—that as yet the name has not been changed and no student has the right to drop the "cow" until it has been taken out by official action.

The Royal Purple staff has been especially guilty in this matter. That body of individuals should try to get the support of all the students at K. S. A. C., but instead will get the animosity of a very large group if it persists in trying to champion the name K. S. C.—An Engineer.

Move Spotlight To Dome

The spotlight in the auditorium has been changed from the railing in the balcony to the dome. In this way a more direct light is thrown upon the stage. The spotlight throws two lights upon the stage with more effect than has been in the past.

Miss Ramsey Undergoes Operation

Miss Gertrude Ramsey, of St. Francis, senior in home economics, spent the two weeks' Christmas vacation in the Park View hospital, where she underwent an operation December 20 for appendicitis. The case proved to be a complicated one, and Miss Ramsey was unable to leave the hospital until this week. She is now at the Smith home, at 930 Fremont, and is improving steadily. She expects to be in school in a short time.

Kansas City Club Busy

The Kansas City club which is composed of the Kansas City students in the college held a banquet and theatre party December 28 for the senior classes of the high schools in greater Kansas City. The merits of the college were set forth and all of the courses explained. Emphasis was laid upon athletics and the special courses which are offered here. The Kansas City chamber of commerce cooperated with the club in its vacation campaign.

Prof. R. J. Barnett attended the general meetings of the American Society of Horticultural Science at Chicago last week. More than 2,000 members attended the general meeting and 65 horticulturists were present, representing the schools of the United States and Canada. Professor Barnett presented a paper at one of the meetings.

The department of entomology was represented at the annual meeting of the State Horticultural society held in Topeka, December 21-23 by Prof. G. A. Dean, and Associate Prof. E. G. Kelly.

Mr. F. A. Derby, father of Miss Grace Derby, associate librarian, died at his home in Manhattan January 2. Funeral services were held at the home, Tuesday, January 4, conducted by the Rev. D. H. Fisher, pastor of the Presbyterian church. Interment was made at Lawrence.

A questionnaire is being given to all of the students of the English department concerning the amount of home reading that is being done. The data that will be obtained from the questionnaires will be sent to the Capper publications.

Prof. J. B. Fitch of the dairy department, is attending the farm and home week at Ames this week. He will probably return this evening. Miss Nina Burgess and Miss Gladys Newton will attend the Delta Tau Delta formal party at Lawrence tonight.

FRESHMEN TO GIVE CHAPEL PROGRAM FEBRUARY 15

Elect Committee to Make Plans—Penelope Burtis Is S. S. G. A. Representative

At a freshman class meeting held December 13 it was decided to put on an extensively planned chapel program February 15.

A committee of 11 is to make plans for the program. Six members of the committee: J. L. Schmutz, chairman; Ray C. Smith, George Humphrey, Miss Ruth E. Cleary, Dorothy Knittle, and Betty McCain were elected and they are to appoint the other five members.

As one of the freshman S. S. G. A. representatives first elected is now unable to serve Miss Penelope Burtis was elected to fill the vacant position.

Reveals Opportunities To Aggie "Vocational Guidance" is the address delivered by E. L. Holton, dean of summer school, at the regular freshman agricultural seminar, December 16. Professor Holton revealed

ed the opportunities open to agricultural graduates as well as the requirements which lead to success in that field. He also explained how teaching vocational work may lead to higher administrative positions in agriculture, such as that of farm manager, farm owner, or some

of the better positions in agricultural extension work.

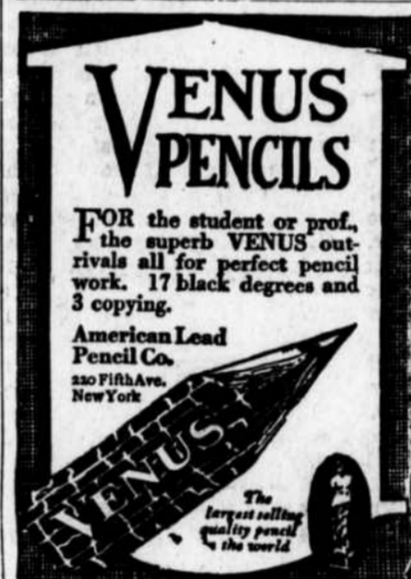

Dan Blanchard, former student, who is now attending college in Wooster, Ohio, spent the holidays here with his parents, Mr. and Mrs. A. D. Blanchard.

FIRST GAME SATURDAY

January 8

7:30 p. m.

Ottawa University
vs. Aggies

TO PICK STOCK JUDGING TEAM

LIVESTOCK SHOW WILL OPEN AT
DENVER JANUARY 15

Aggies Must Place First Two More
Successive Years to Keep
Cup

The team which is to present K. S. A. C. at the Western Livestock show at Denver will be chosen about January 15, according to Prof. F. W. Bell, coach. Last year the team placed first in the Denver show and thereby won the \$300 trophy which is on display in the trophy case in Waters hall. To gain permanent possession of the trophy the Aggies will have to place first in more successive years.

This year indications point to another victory for the Kansas team. At the International and the National Swine show this year the team placed in about the same position that they placed last year.

According to Professor Bell, the Aggie team did things at the International which have not received any publicity. The trophy awarded to the highest placing team in judging Percherons, by J. O. Sigmester, the leading Percheron man in Iowa, was won by Kansas and may be seen in the trophy case. The placings of the teams in this contest were Kansas, Missouri, Minnesota, Oklahoma, and Iowa.

An investigation of the individual records made by the 10 men, representing the 21 teams that contested at the International shows that Merton Otto placed first in hog judging; H. E. Mather, his man at the International and the National Swine show, placed fifth in hog judging; while E. D. McCollum, who is one of the most consistent members of the team, and who was second in the National Swine show, had the highest number of correct placings on the Kansas team in swine placings at Chicago.

AGGIE COED ACCEPTS NEW CIVIC DUTY AS TREASURER

Ethel Robinson Leaves College to
Take Up Fresh Responsibilities
At Home

Civic duty called and although Miss Ethel May Robinson, a graduate

student in clothing and textiles in the Kansas State Agricultural college, had refused to be a candidate for county treasurer in Rawlins county, when her friends wrote her name in on the ballot, she answered the call.

Miss Robinson, who was graduated from the agricultural college in 1918, was back at her alma mater taking special work when the news of her election came. She did not want the county office and she did not want to learn more about clothing and textiles, the subject in which she was majoring. But she realized that with the vote new responsibilities are coming to women, and she did not want to shirk those responsibilities.

After her term is up and she has seen to it that all of the Rawlins county citizens have paid their taxes, Miss Robinson, so she says, is coming back to college.

SMALL ARMS FIRING POPULAR WITH FACULTY AND STUDENTS

Rifle Club to Take Part in Inter-Collegiate Target Practice

Much interest is being shown by the students and faculty of K. S. A. C. in small arms firing. The rifle club which the students of the military department have organized is practicing several times a week and will soon take part in inter-collegiate target practice with a number of other colleges over the United States under the auspices of the National Rifle association.

The students of the advanced military course are practicing regularly on revolver fire and will be given instruction in record firing in a few weeks.

The members of the faculty have organized a rifle club under Prof. C. H. Kittelman and practice is now in progress.

Engineering Vacancy Filled

R. E. Dawley has been appointed assistant professor of applied mechanics and assistant engineer of tests in the road materials laboratory. He is a graduate of the University of Illinois and has had practical experience in highway design, estimating, and construction of reinforced concrete buildings. Professor Dawley takes the place made vacant by the recent promotion of Prof. C. H. Scholer.

Heads State Librarians

Miss Mary Cornelia Lee, '89, was elected president of the Kansas Librarians' association at its meeting in Salina recently. Miss Lee is librarian of the Manhattan public library.

SEE OLD AGGIES AT STOCK SHOW

GARDNER, MEDLIN, AND WENTWORTH IN CHICAGO

Medlin Doing Advertising for Montgomery Ward, 1921 Catalog

The K. S. A. C. students who attended the International at Chicago saw several of the old Aggie "grads" at the show.

W. D. "Mike" Gardner, who graduated last spring, is now located permanently at Chicago. He has a position in the Bureau of Markets, United States department of agriculture, and his work deals with a daily study of the livestock market and reporting the same to the public through the United States department of agriculture publications.

J. W. Crumbacker, '17, is now doing investigational work at Purdue university in the animal husbandry department. He is working with Professor Vestal who was formerly at K. S. A. C.

Calvin Medlin, '20, is now located at Chicago with the firm of Montgomery Ward and company. He stated that he was doing advertising work on the ladies' shoe and wearing apparel section of their 1921 catalog. He said that he enjoyed living in Chicago and also sends best regards to all Aggie friends.

Edward N. Wentworth, formerly a professor in the animal husbandry department of K. S. A. C., was recently seen at Chicago by the students who attended the stock show. He is now working in the farm bureau department of Armour and company and is doing research work in agricultural economics. He has recently completed a pamphlet on "Progressive Beef Cattle Raising" which may be secured on request from Armour and company at Chicago. He has been honored by being elected vice-president of the Saddle and Sirloln club of that city.

TEAGARDEN TEACHES CLASSES IN MANHATTAN HIGH SCHOOL

Will Continue Courses on Hill Rest of this Semester—Is Graduate Student

Earl H. Teagarden, '20, who has been assisting in teaching classes in farm crops in the department of agronomy has accepted a position as

instructor of agriculture and botany in the Manhattan high school. Teagarden took up his new duties December 13.

Mr. Teagarden is registered at the college as a graduate student and will continue his courses on the hill the rest of this semester. He has done exceptionally well in his teaching work and the agronomy department has expressed itself as being sorry to see Mr. Teagarden leave its staff.

R. J. Barnett is moving into the house vacated by Dr. J. E. Ackert at 1605 Humboldt.

OFFER IKE GATZ PLACE AS COACH

McPHERSON COLLEGE CONSIDERS K. U. AND AGGIE MAN

President Kurtz Thinks Team Will Rank High Next Year With Aid of Good Leader

"Ike" Gatz, captain of the football team, is being considered as football coach for McPherson college next season. "Ike" lives in McPherson and his brother plays on the team. It is said in McPherson that Gatz has expressed himself as willing to coach the team for next season. Mr. Gatz will be graduated from the college in the spring.

Lonborg, quarterback of the K. U. team this year has also been asked to take the position. He has not yet made an answer.

Dr. D. W. Kurtz, president of McPherson college, is very enthusiastic over the showing the team made this year. He thinks that with the aid of a good coach next season the team should rank high in the Kansas inter-collegiate conference.

JOURNALISM FRATERNITIES ELECT BROWN BULL STAFF

Eisenhower Re-elected Editor-in-Chief—Work Has Already Begun on Next Edition

Sigma Delta Chi, men's honorary journalism fraternity, and Theta Sigma Phi, women's honorary journalism fraternity, held a joint business meeting Monday evening and elected the Brown Bull staff for the next edition.

Milton Eisenhower was re-elected editor-in-chief. The other officers elected were Clementine Paddleford, associate editor; Randolph Palmer, business manager; Ione Leith, assistant business manager.

It was decided to have a meeting of the Brown Bull staff every two weeks to discuss questions concerning the editing of the Brown Bull. Work has already started on the next edition which will be off the press at the beginning of the spring semester.

Sig Alphas Hold Convention

The national convention of the Sigma Alpha Epsilon fraternity was held at St. Louis, Mo., during the Christmas vacation, December 27 to 30. Several members of the local chapter attended the convention. Milton Eisenhower was the delegate of the chapter here. William E. Reynolds, Paul Tupper, and Jack Ellis of the local group attended. More than a thousand members of the fraternity met in St. Louis for the three-day gathering.

Alumni in Minnesota Organize

Formal organization of the K. S. A. C. alumni of Minnesota will be perfected the first week in January according to a letter just received from Harry H. Amos, '16, Smith-Hughes agricultural instructor, Sandstone, Minn. The following attended the preliminary dinner at the University farm cafeteria last week: John S. Jones, '08, better known as Seneca—University farm, St. Paul, assistant county agent leader; Mrs. Jones; Joe S. Montgomery, '07, captain of the '07 football team, now live stock specialist at the University farm, St. Paul; Mrs. Montgomery, formerly Grace Leuzler, '09; John Biddison, '05, news editor on the Minneapolis Journal; Lola Richards, in charge of the University farm cafeteria.

BEYOND THE HILL

The "Junior Jam" is the name which has been given to a class meeting and mixer of the junior class of the University of Indiana.

The freshman class of Ohio State are planning to put out a class magazine which will serve to hold the class together and at the same time give ample opportunity for the de-

velopment of literary prodigies among the neophytes.

The Y. M. C. A. at the University of Wyoming has started a series of shop meetings for the purpose of bringing about a better feeling between the employee and the employer. The Comedy Four, a musical organization of the university gave an original comedy at the meeting which was the feature of the day. The plan met with the hearty endorsement of the men in the Midwest Refinery of Laramie, Wyoming, who were the first to be visited by the team from the Y. M. C. A.

Michigan university has planned to ask the state legislature for appropriations of over \$8,000,000 for new buildings, additions, and equipment and also to ask the legislature of 1923 and 1924 for \$5,000,000 each for completion of the building program.

Men representatives from 16 societies of the Michigan Agricultural college have petitioned for the abolition of the ban against national fraternities which exists at the present time in that institution. The men pointed out the fact that M. A. C. is the only land grant college in the west which has a ban against national fraternities.

Harvard university has adopted a new policy in giving examinations for graduation which requires all candidates for degrees to take an examination in the general subject of their course in which they have done their work, without reference to the actual courses they have taken to complete this work.

All conventions were thrown aside recently at the University of Kansas when the students celebrated their first annual "Hello Day." Introductions were out of order and the "rough" engineer exchanged greetings with the pretty

co-ed of the fine arts school without the usual formalities.

A census of 453 students in political science at Michigan university for the purpose of showing what magazines were read by the university men and women, gave the following results. The women averaged six hours a week reading current literature, and the men six and one half hours. Over 30 per cent of the people read the American and 30 per cent of them read the Literary Digest. Nineteen men and thirteen women read the Atlantic Monthly. Seven men read the Popular Mechanics and eleven read the Scientific American. Twenty-one women read the Woman's Home Companion, seven the Ladies' Home Journal, four the Red Book, and 51 the Saturday Evening Post. The most popular magazine among the students is the Saturday Evening Post which is read by over 50 per cent of the students who were canvassed.

A budget which will include all of the expenses of graduation, such as cap and gown, senior breakfast, and alumni association dues seems to be favored by a large number of the senior class of the University of Kansas.

The Columbia Evening Missourian, student newspaper of Missouri university, is an example of a student newspaper which brings the daily news to the town in which the university is located. The paper is exclusively a student publication, the only salaried man being the manager chosen from the student body. The Evening Missourian is the only daily paper which is published in Columbia, a town of about 15,000.

Within three months after adoption of an honor system at the University of Utah, the students decided to discontinue the system by a vote of 572 to 76. The failure of the sys-

tem is due largely to the professors, many of whom absolutely refused to leave the room while the examination was in progress, according to student opinion.

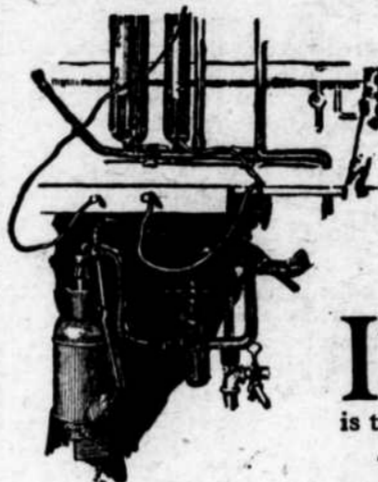

The appearance of the university directory of Ohio State shows the Smiths have a 39 majority over the Jones family which consists of 53 members. Next to the Smiths the Millers claim the largest number with 61 representatives. Following in the order of their numerical superiority are the Browns, the Williams, the

Davis bunch, the Taylors, and the Evans.

Over a year ago the Iowa State college started to give movies on the campus for the benefit of the student body. Every Friday and Saturday night a movie of the best type that is obtainable is shown for the college men and women. Fifteen cents is the admission price that has been charged for such shows as Les Miserables, The Tale of Two Cities, and Twenty Three and a Half Hours Leave. Over 1,100 students

attended the presentation of the picture, Les Miserables.

Seventy-five per cent of the men at M. U. are disinterested, according to some of the girls at the University. The girls at the University when spoken to by a girl, and one girl complains of being "jostled off the walk in every street." The girls find various explanations for this lack of chivalry on the part of the men, ranging all the way from the co-educational system, to the nineteenth amendment.

What Is Vacuum?

IF THE traffic policeman did not hold up his hand to control the automobiles and wagons and people there would be collisions, confusion, and but little progress in any direction. His business is to direct.

The physicist who tries to obtain a vacuum that is nearly perfect has a problem somewhat like that of the traffic policeman. Air is composed of molecules—billions and billions of them flying about in all directions and often colliding. The physicist's pump is designed to make the molecules travel in one direction—out through the exhaust. The molecules are much too small to be seen even with a microscope, but the pump jogs them along and at least starts them in the right direction.

A perfect vacuum would be one in which there is not a single free molecule.

For over forty years scientists have been trying to pump and jog and herd more molecules out of vessels. There are still in the best vacuum obtainable more molecules per cubic centimeter than there are people in the world, in other words, about two billion. Whenever a new jogging device is invented, it becomes possible to eject a few million more molecules.

The Research Laboratories of the General Electric Company have spent years in trying to drive more and more molecules of air from containers. The chief purpose has been to study the effects obtained, as, for example, the boiling away of metals in a vacuum.

This investigation of high vacua had unexpected results. It became possible to make better X-ray tubes—better because the X-rays could be controlled; to make the electron tubes now so essential in long-range wireless communication more efficient and trustworthy; and to develop an entirely new type of incandescent lamp, one which is filled with a gas and which gives more light than any of the older lamps.

No one can foretell what will be the outcome of research in pure science. New knowledge, new ideas inevitably are gained. And sooner or later this new knowledge, these new ideas find a practical application. For this reason the primary purpose of the Research Laboratories of the General Electric Company is the broadening of human knowledge.

OFFER \$30 TO BEST SPEAKERS

EXTEMPORANEOUS CLASSES TO HAVE CONTEST

Fifteen Dollars Goes to Person Making Best Speech Between Now and End of Semester

In order to make the work in public speaking more interesting, the department is offering \$30 in prizes to the classes in extemporaneous speaking for the three persons who make the best speeches for the remainder of the term.

Each of the classes is divided into three divisions, A, B and C. The two persons whose talks come up to the standards of good speaking will be chosen from each group and then the four best will be picked from these six. In each case the classes will act as the judges with the aid of the instructor.

First prize will be \$15, second prize \$10, and third prize \$5. It is believed that the contest plan will stir up a great deal of interest in extemporaneous speaking.

Engagement Announced

The engagement of Miss Mildred Lauder to Mr. Richard H. Coombs of Boston, Mass., has been announced. Miss Lauder is an instructor in the division of home economics here. Mr. Coombs is a member of the class of 1919, of the Massachusetts Institute of Technology and is now doing research work for the sanitary district of Chicago.

Roy N. Young, '14, is now the associate chemical engineer of the bureau of standards at Washington, D. C. He has recently written a technologic paper No. 174 of the bureau of standards on "Effects of Calcium as an Accelerator on the Hardening of Portland Cement Mixtures."

Miss Esther Andrews who has spent the past week at Cleveland, Okla., returned to her home in Manhattan Tuesday morning.

R. J. Barnett, professor of horticulture, presented a paper, "Some of the New Apple Wrinkles" at the Kansas State Horticultural association held at Topeka, December 23.

Lieutenant and Mrs. Harold Bixby visited at the college during vacation. Mrs. Bixby was formerly Miss Sara Marty. She was graduated from the Kansas State Agricultural college in 1916. Lieutenant Bixby is now stationed at Fort Sill, Okla.

Dean J. T. Willard was among those from the college to attend the A. A. S. at their meeting in Chicago during the holidays.

The zoology department was represented at the meeting of the American Association for the Advancement of Science, December 27-31, at Chicago, by Dr. R. G. Nabours, and Dr. Mary T. Harman. Doctor Harman presented a paper, "The Relative Size of Pig Embryos."

SOCIETY

Pi Kappa Alpha has pledged Mr. Wesley Roberts and Mr. Ralph Nicholas of Oskaloosa.

Alpha Delta Pi sorority will hold open house for the Acacia fraternity this evening between 6:30 and 8 o'clock.

Miss Grace M. Norvell and Mr. Guy L. Jolley were married by Judge E. E. Morris, December 24. Mr. Jolley is stage carpenter at the college auditorium. Mr. and Mrs. Jolley will live in Manhattan.

Mr. William Janssen and Miss Tillie Stratmann were married at Holyrood, December 1. Mr. Janssen was graduated from K. S. A. C. in 1919. He is a member of the Sigma Phi Epsilon and Alpha Zeta fraternities. Mr. and Mrs. Janssen are now at home on their farm near Lorraine.

Miss Fannie Nichols and Mr. Arthur D. Weber were married December 23, at the bride's home, by Rev. J. M. McClelland. After the ceremony a two course luncheon was served. Mrs. Weber has been employed for the past year in the college printing office. Mr. Weber is a special in the animal husbandry course.

Miss Faith Hull and Mr. Cecil Allison were married at Ottawa, on December 22. Rev. E. L. Hull, father of the bride performed the ceremony. Following the ceremony a three course dinner was served. After January 1, Mr. and Mrs. Allison will be at home at Whitney, Iowa. Mrs. Allison attended college here last year.

Miss Blanche M. Platt of Manhattan and Mr. Edwin Ade of Minneapolis, were married in Omaha, December 25. Mr. and Mrs. Ade are both former students of K. S. A. C. Mr. Ade was graduated with the class of 1919 and was a member of

the Civil Engineer's society. Mr. and Mrs. Ade will make their home in Minneapolis.

The wedding of Miss Laura Ramsey and Mr. Otto Earl Frisbie took place on December 22 at Basin, Wyo. Miss Ramsey was graduated from the Kansas State Agricultural college in 1917. She is a member of the Alpha Delta Pi sorority. Mr. Frisbie is a graduate of the University of Wyoming, and is a member of the Sigma Nu fraternity.

Miss Elizabeth Heath and Mr. Franklin Boone were married December 23 at Peabody. Miss Gladys Scott of Topeka was maid of honor and Mr. Fred Boone, Jr., was best man. Mrs. Boone was in school here last year and is a member of the Delta Delta Delta sorority. Mr. Boone attended the University of Kansas where he is a member of Delta Tau Delta fraternity.

The marriage of Miss Lorna Boyce of Minneapolis and Mr. Merrill A. Durland of Manhattan, took place at the home of the bride's parents, Mr. and Mrs. F. D. Boyce of Minneapolis, Wednesday, December 22. The Rev. J. M. Mahaffy of the Presbyterian church performed the ceremony. Mrs. Durland attended K. S. A. C. for one year and Mr. Durland was graduated from the college and is now an instructor in the electrical engineering department. Miss Helen Miller and F. R. Beaudette, both of Manhattan, attended the wedding.

ANNOUNCEMENTS

All varsity track candidates are requested to report to Coach Bachman at four o'clock for their workouts.

Eurodelphian Literary society will hold its regular meeting January 8 at 3 o'clock.

WRESTLERS TO START PRACTICE

WIEDORN TO COACH THREE AFTERNOONS A WEEK

Sport May Become Inter-Collegiate Athletic Event of Valley Conference

"K. S. A. C. must have a team of grapplers to represent her on the mats in order to put the school on a par with the other members of the Missouri Valley conference," is the statement given out by W. S. Wiedorn, professor of landscape gardening, who has consented to coach the men who are interested in the wrestling game, from 4 to 6 o'clock on Monday, Wednesday, and Friday afternoons.

Every other school in the conference has put wrestling on its regular athletic program, while K. S. A. C. has made very little effort to adopt wrestling as one of the necessary sports. Professor Wiedorn stated that wrestling might become one of the intercollegiate athletic events of the conference. The sport would then be recognized on an equal basis with basketball, football, track, and baseball.

Every man, regardless of his weight, will have a chance in this sport as a result of the seven different weights of classifications. These classifications are as follows: 115 pounds, 125 pounds, 145 pounds, 155 pounds, 175 pounds, and heavy weight unlimited.

Wiedorn is a graduate of the University of Cornell where he was the middleweight title holder.

CONOVER DISCUSSES LIFE AND WORK OF MARK TWAIN

Writer Is Not Literary Disciple of East—Portrays Broad Democratic Spirit of West

"After Mark Twain, literature was no longer confined to Boston," said R. W. Conover, professor of English in a recent lecture given on Mark Twain. The purpose of the consideration of Mark Twain's work was to question his permanence in the realm of literature.

"Mark Twain was always a romanticist, and his life may be divided into five romantic periods," explained Professor Conover. "The first period, the romance of youth, was a period of inspiration, coupled with the untamed genius of a fun loving lad. The second period, the romance of young manhood, is best described in his book 'Roughing It.' The next great period of romance was that of success. 'Innocents Abroad' is his expression of this period."

"Then came the romance of love and respectability. The fifth and last period was the romance of the past, which came when Twain was tired of the conventionalities of life and longed for freedom."

Mark Twain was never a literary disciple of the east, which he consid-

ered narrow, but he portrayed in his books the broad democratic feeling of the west. It is upon the humorous strain found in these western stories that Mark Twain's fame has rested.

R. C. RANKIN TO GIVE TALK HERE ON RURAL LEADERSHIP

Has Worked Among People of Cumberland Mountain District of Tennessee

On the invitation of President W. M. Jardine, Raymond C. Rankin, a young man whose recent work in rural leadership in Tennessee has attracted wide attention, will come to the college January 16 and 17 to deliver an address on better rural leadership and service.

Mr. Rankin is a graduate of the Tusculum college, Greenville, Tenn., and of the McCormick Theological seminary of Chicago. He is a native of Tennessee and since the completion of his college work he has made use of his talent and training in the Cumberland mountain district of his native state.

Dr. Warren H. Wilson of the Presbyterian educational board, knowing his accomplishments in this rural field, secured him to carry the story of better rural leadership and service to the centers of training for rural life and prosperity in this country. Rankin will come to K. S. A. C. direct from Ohio State university and Purdue.

SERUM ADMINISTERED FREE TO ALL COLLEGE STUDENTS

Doctor Siever Advises Vaccination and Inoculation to Prevent Contagious Diseases

The medical department of the college wish to have it brought to the attention of the student body that the smallpox vaccination and the inoculation against typhoid fever are given free to all students.

These precautionary measures should be taken by all K. S. A. C. students, for living together as they are in crowded rooming houses and in the class rooms on the hill they are constantly in contact with any contagious diseases which may be carried by one of their number.

Dr. C. M. Siever wishes to warn the student body against any chances of exposing themselves to contagious diseases which may be prevalent in their home towns. Contagious diseases are carried easily and any student who exposes himself may carry that disease back to college.

Shawnee County Club Organized

The Shawnee county club has joined the ranks of the county clubs of K. S. A. C. Lester Haggard was elected temporary chairman, Elma Stewart chairman of the social committee, and Stella G. Nash chairman of the publicity committee. Another meeting will be held Monday, December 13. Watch the bulletin boards for further notice.

Professor Burr Writes Bulletin

Prof. Walter Burr, director of the rural service department, is the author of a bulletin just off the press entitled, "Harvest Service Project in Kansas," which is published and sent out by the extension division of the college. The bulletin gives a review of the work done by the college in maintaining service

centers for the harvest hands in the larger harvest labor distributing cities, and also in the local harvest centers. Professor Burr has received a large number of letters from public officials such as the state labor or commissioners, city mayors, and clergymen, commending the work done by the extension division of the college during last summer's harvest season.

R. J. Barnett, professor of horticulture, attended the meeting of the American Society of Horticultural Science held at Chicago, December 29-31.

Arthur Quinlan who has been attending the University of Colorado this fall, expects to reenter K. S. A. C. next semester. Quinlan is a Sigma Nu and won honors in football at this school last year.

The Best Evidence of Efficient Service

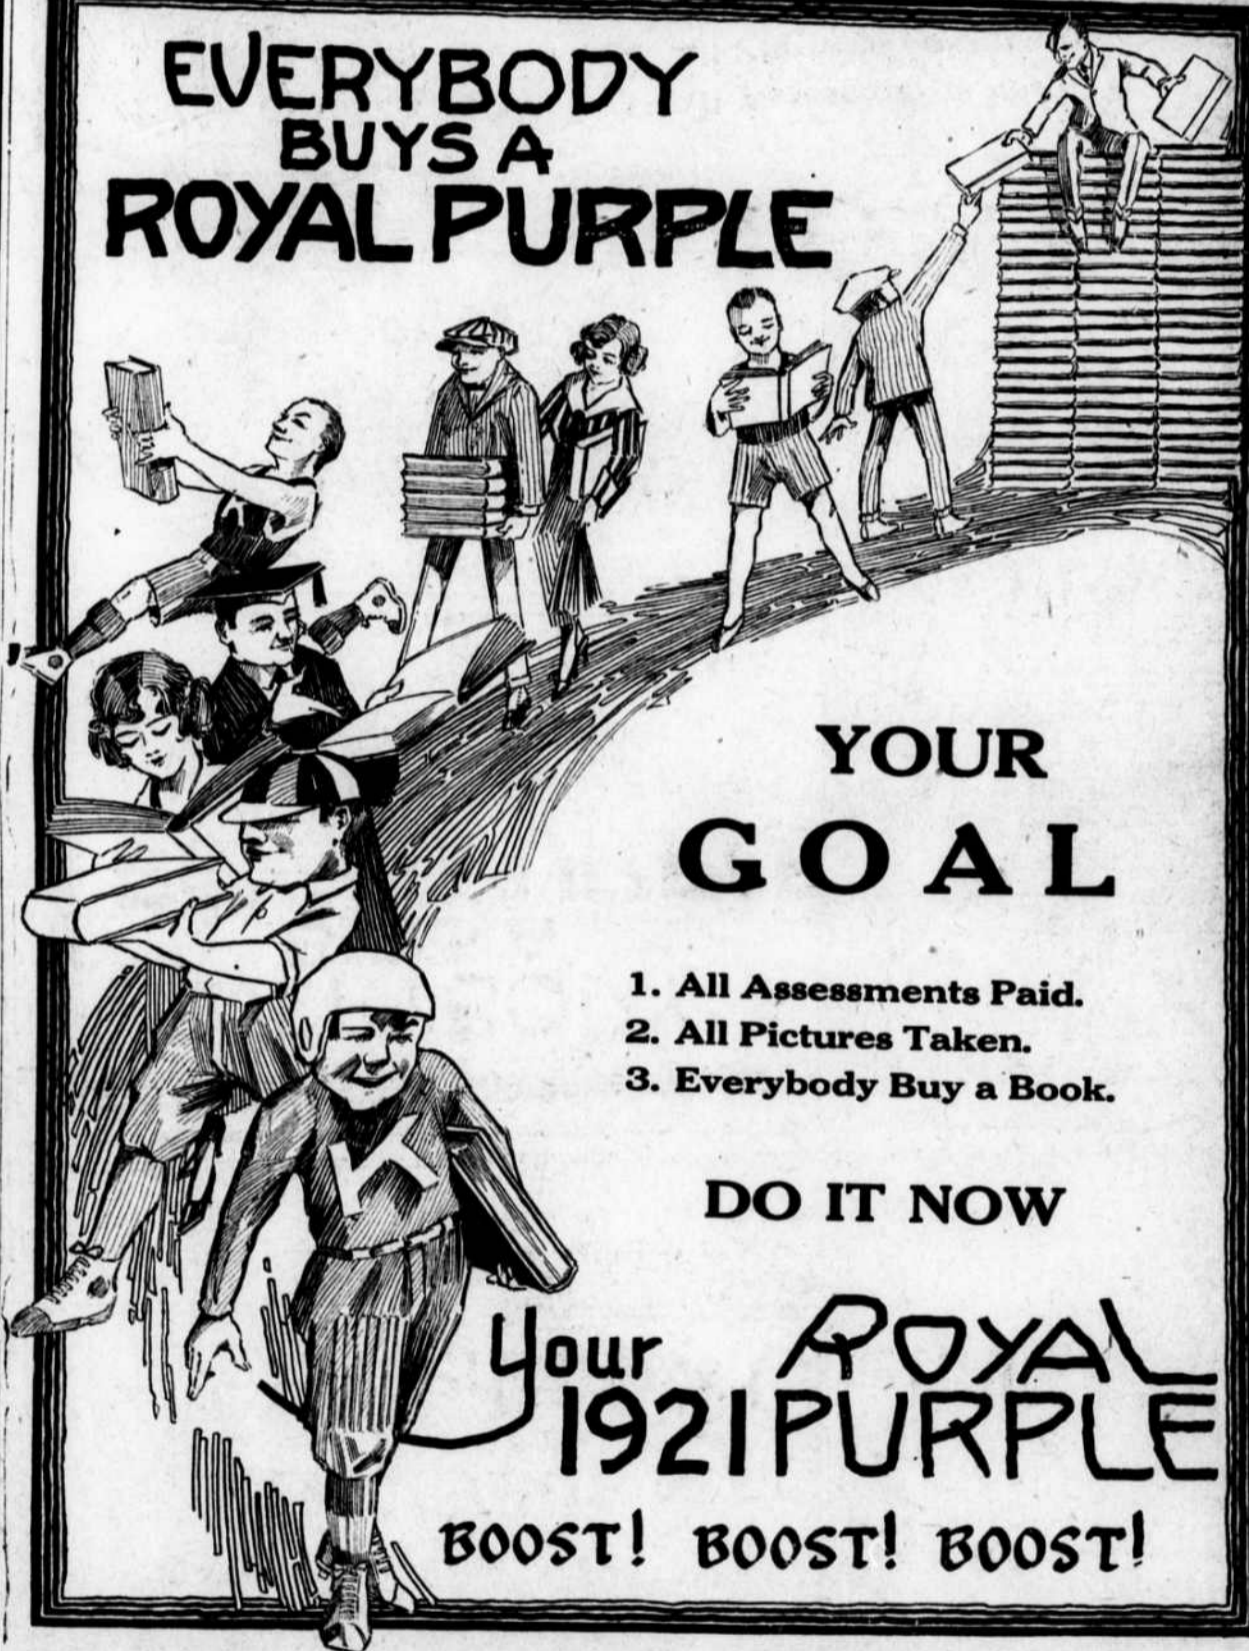

During 1919 the representatives of the Massachusetts Mutual delivered policies aggregating \$131,103,768—an increase of more than 100 per cent over the amount delivered in 1918. Of this over 35 per cent was upon the lives of persons already insured in the Company. Less than 1 per cent of the total premium-paying insurance in force was surrendered and only slightly more than 1 per cent was allowed to lapse. There could be no better evidence that the faithful and efficient service of the Massachusetts Mutual is appreciated by its policy holders, who are its staunchest friends and most enthusiastic advertisers.

THE KANSAS STATE COLLEGIAN

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, TUESDAY, JANUARY 11, 1921

NO. 29

JANUARY 21 IS DATE SET FOR COLLEGE PLAY

TO PRESENT "COME OUT OF THE KITCHEN"

CAST IS NEARLY ALL FRESHMAN

Play Scored Big Hit with Ruth Chatterton Starring—Marguerite Clark Played in Film Version

"Come Out of the Kitchen" is the name of the three act comedy which is to be presented by the Purple Masque Dramatic fraternity on Friday, January 21.

The story of this play and that of "The Charm School" were both written by Alice Duer Miller with the conviction that the average audience has grown weary of too much of the spectacular and grotesque, and that the problem play is little desired. Both stories were later dramatized by A. E. Thomas, who is now commanding large royalties on their presentation. For the one night's appearance here of "Come out of the Kitchen" a royalty of \$80 must be paid.

Play Full of Human Charm

The comedy's theme is not one of the usual divorce or murder, that seems to be so generally accepted as being necessary to the success of a play, but is one of wholesomeness and simplicity and is full of human charm.

Although a play may be largely a gamble on the part of the audience, Miss Florence Heizer, who is coaching the Purple Masque, feels that this one decidedly will not be.

"The last four plays given by the Purple Masque have ranked with those of the University of Wisconsin, and above those of the Universities of Kansas and Missouri," says Miss Heizer.

"Come Out of the Kitchen" quite recently featured in Kansas City. As played on the legitimate stage with Ruth Chatterton starring, it has been much more successful than as a motion picture. This is due largely to the fact that the filmed version is noticeably different from that of the legitimate stage, being weaker, especially in the way the comedy ends. Marguerite Clark, however, playing the part of leading lady, does justice to it.

"I wish to emphasize," says Miss Heizer, the fact that although Purple Masque is not professional, it does endeavor to do the play consistently with some aim of professionalism. I take great pleasure in introducing a cast made up almost entirely of freshmen."

The scene of the play is laid in the Daingerfield mansion in Virginia. The plot centers about the four young Daingerfields who decide to rent their home to a Yankee millionaire in order to relieve their financial condition. When servants fail to arrive they are forced to take their places. What happens to Olivia, Elizabeth, Paul, and Charles while in this plight will be told in "Come Out of the Kitchen."

Announce Names of Cast

The players, whose names together with the characters they represent follow, have entered into their work with a great deal of enthusiasm, and a treat from the Purple Masque is assured to the student body of K. S. A. C. The cast is as follows:

Burton Crane, from the north, Earl Bruce; Solon Tucker, his attorney and guest, N. D. Alleman; Paul Daingerfield, alias Smithfield, H. Riggs; Charles Daingerfield alias Brindlebury, Vernon Carrier; Randolph Weeks, agent of the Daingerfields, H. Sebring; Thomas Lefferts, statistical poet, Donald Elbert; Olivia Daingerfield, alias Jane Ellen, (leading lady), Ruth Martin; Elizabeth Daingerfield, alias Araminta, Curtis Watts; Mrs. Falkener, Tucker's sister, Gladys Newton; Cora Falkener, her daughter, Alice Carter; Amanda, Olivia's black mammy, Dorothy Settle.

Graduates To San Domingo

There are now two graduates of the Kansas State Agricultural college in the department of agriculture of the Dominican Republic, San Domingo. Dr. Frank Hare, '20, has just accepted a position in the Colegio de Agricultura, veterinary department. John Calvin, '08, who has been professor of chemistry in the University of Nebraska, is chemist for the experiment station of the Dominican Republic.

Welshmen Harmony Kings Will Bring Old Time Memories

Remember when the old quartette used to meet in the barber shop and render "Sweet Adeline"? What harmony they got from the minors and off-keys!

"You have thought of it since and wondered if there was ever any more beautiful music than that quartette could put out when they felt 'right proper.' You have heard famous artists and great concert companies, but none of them equaled those concerts of the old days.

Well, when the Mountain Ash Male Choir comes to the college auditorium tonight under the auspices of the De Koven club of the college, you will have an opportunity of comparing what Prof. A. L. Lovejoy and Prof. A. E. Westbrook of the music department of the college term "the best male chorus we have ever heard."

The choir is composed of Welshmen from Mountain Ash province all of whom have the famous Welsh gift for harmony. Each man is a soloist, but in the ensemble work of the chorus the soloist is lost completely in the blending of the fourteen voices of the chorus under the direction of T. Glyndwr Richards. Mr. Richards is considered by many British authorities one of the best conductors in the British Empire.

The concert is scheduled to start at 8:15 o'clock and no seats are reserved.

FEW ENROL IN SHORT COURSE

THIRTY TWO NEW MEN IN TRACTOR WORK

Lack of Ready Money Given as Reason for Small Enrollment—One Hundred Thirty Enrolled Last Year

Although the equipment in the tractor short course department is much more complete than before, the enrollment falls far below that of last year. The men began enrolling Monday, January 3, and there are registered at present, 13 students who did not complete their work last year and 32 new students, as compared to 130 taking the course at this time last winter.

The small number enrolled is believed to be due partly to some misunderstanding as to the registration days. A considerable number of prospective students over the state were under the impression that since college proper would not reopen after the holidays until January 4, and that since the catalog advises that the various short courses shall begin on the first of the month, that the tractor short course would not open until the first of February.

However, the greatest cause for the light enrollment is undoubtedly the difficulty of securing ready money in rural communities. This induces the students who can spend only a short time in college to wait until a later date when conditions will perhaps be improved.

The tractor department offers its instructions in eight consecutive steps, each lasting one week, and given under a different instructor.

While the department does not claim to turn out tractor experts in eight weeks time as some trade schools claim to do, it does aver that the course will be of great benefit to the mechanically inclined student.

HELPS COLLEGE MEN GET JOBS

AMERICAN ASSOCIATION OF ENGINEERING HAS 60 MEMBERS

Local Chapter Establishes Employment Bureau to Benefit Firms Needing Technically Trained Men

To raise the standard of ethics of the engineering profession and to promote the economic and social welfare of engineers, is the object of the American Association of Engineering, which has a chapter at this school.

During last year most of the members were upper classmen and professors of civil engineering although membership is open to all men engaged in engineering work. At the opening of school in September of this year the chapter had nine certified members and 26 student members. Since then the membership has increased and at the present time there

are 12 certified members and 60 student members.

Through the local chapter an employment bureau is carried on. Engineering and contracting firms which are in need of technically trained men report their requirements to the national headquarters of the American Association of Engineering and bulletins listing these positions are sent each week to every active chapter. Near the close of the school year special interest is given to list the needs that will be of interest to students. Several students of the college obtained positions through this bureau during the summer vacations.

TRY FOR 90 PER CENT ROYAL PURPLE SUBSCRIPTION GOAL

Collect Material for Book from Organizations—Snapshots Asked For

The big effort to reach the 90 per cent goal in subscription to the Royal Purple is being made this week, which is the final week of the Popularity contest. All of those who have not paid their assessments may still do so or make arrangements at the office to do so in the near future.

The staff is now collecting material from the different college organizations which wish to have space in the class book. Any organization which has not been seen may communicate with Miss Marcella Seebor who has charge of the organization section.

Anyone with snapshots which they wish to have in the annual may leave them in a box which will be provided at the Royal Purple office.

"We are always open to suggestion. The Royal Purple is your book." This is the statement of Ray Watson, editor-in-chief.

PEARCE AND RAYBURN GIVE PROGRAM AT SCIENCE CLUB

History of Yachting and Einstein Theory Are Discussed

A model of the American yacht "Resolute," winner of the International Yacht race last fall, was shown by Prof. C. E. Pearce to the Science club at its regular meeting Monday night. The model of the "Resolute" was built by Professor Pearce and is drawn to the scale of one inch to three feet.

Professor Pearce gave an interesting talk on the different types of yachts and their development since the first race in 1851. He also told something of the history of yachting. Prof. G. E. Raburn gave a short talk on the "Fourth Dimension of the Einstein Theory."

SHOW COLLEGE PHOTOPLAY AT CHAPEL FRIDAY MORNING

Film Portrays the Adventures of a Family Visiting College

"James Wakes Up," the college photoplay, was given in chapel last Friday morning. The picture, a story of a family that visits the college during Farm and Home week, shows numerous college views, including a genuine pep meeting.

The play, college authorities believe, will prove to be a good advertising scheme because it shows the treatment that Farm and Home visitors receive while here, and excites interest concerning K. S. A. C.

The Royal Purple staff also took a hand in the chapel exercises. The second issue of the Royal Purple news was given out at the door, and Ray Watson made a talk in which he told of plans for the Royal Purple campaign to be held this week. Watson also announced that the popularity ball will be held in Harrison's hall Friday evening. During the evening the winners of the popularity contest will be announced.

M. W. Sanderson, '98, visited at the college Saturday. He is a member of the legislature from Chautauqua county.

Prevailing Slump Has An Unfortunate Effect on Morals of Aggie Faculty

The falling prices are apparently dragging down with them the high moral standards of Aggie faculty members. Whether the lowering of the pedagogic morals is due to the expected drop in the prices of cigarettes, rouge, jazz records, and other deplorable agents of Satan himself is not known, but the first hint of the moral decline was given to a Collegian reporter when he casually inquired among various faculty members as to the nature of their New Year resolutions.

The faculty made no resolutions. At least few of them did, and the resolutions made were practically all broken by New Year's night. That is the appalling fact that faces the student body. Whether the matter is one for the S. S. G. A. or the city Welfare board is one for them to decide.

GROWN FOLKS HAVE SCHOOL IN FEBRUARY

STUDY COMMON PROBLEMS FARM AND HOME WEEK

PROMINENT SPEAKERS COMING

Plans Complete for Conference—Newspaper Day Is New Feature—Farm Engineering Assembly Scheduled

Grown folks living all over the nation in agricultural communities, go back to school every year for a week. In each state where there is a land grant college, a week is set aside for the people to assemble and discuss their common problems, hear national leaders of agriculture present the latest movements and discoveries in that field, and select one or two intensive short courses in subjects of greatest interest to them.

The central themes of Farm and Home week, to be held at the Kansas State Agricultural college February 7 to 12, will be rural organization, home-keeping, boys' and girls' work, agricultural journalism, and farm engineering.

Doctor Vogt First Speaker

The opening address of the conference will be presented by Dr. Paul L. Vogt, author of a widely used text book on rural sociology. Doctor Vogt was formerly professor of rural economics and sociology in the Ohio State university, and is now national director of rural work for the Methodist church. During the past two years, he has placed departments of rural leadership in 26 college and universities. He will give a series of lectures, one each day of the conference, for those especially interested in the problems of rural leadership.

Other authorities on rural organization problems, who will present lectures at the general assemblies and sectional meetings, are Dr. E. L. Morgan, national director of rural organization work for the American Red Cross; J. R. Howard, president of the American Farm Bureau federation, an organization two years old, having a membership of 1,500,000 bona fide farmers; and C. H. Gustafson, chairman of the national Farmers' Marketing committee of 17, which represents the American Farm Bureau federation, Farmers' union, Equity, Grange, cooperative grain dealers, and other agricultural institutions and organizations.

Have Farm Engineering Assembly

The general assembly on Tuesday morning, February 8, will be devoted to farm engineering. J. B. Davidson, professor of agricultural engineering at Ames, Iowa, will give an address entitled "Modern Farm Machinery and the Farmers' Problems," and Prof. Daniel Scoates of the department of agricultural engineering of the Texas Agricultural and Mechanical college, will present the subject, "The Engineer's Contribution to Agriculture."

Tuesday evening addresses will be given by Ruth A. Wardall, professor of home economics of the University of Iowa, and Ivan L. Hobson, assistant in Boys' and Girls' club work, Washington, D. C.

Newspaper Day New Feature

A new feature has been introduced in the week's schedule.—Newspaper day. More than 50 Kansas newspapers are now competing for the prize offered for the paper containing the best articles about Farm and Home week, and more are being added to the list daily. The papers will be on

exhibit in Kedzie hall on Newspaper day—Thursday, February 10. The speaker of the day, Bristow Adams, professor of journalism and editor of publications, Cornell university, Ithaca, N. Y., will judge them, and the prize will be awarded.

Journalists To Have Vacation

On Newspaper day the college students in the course in industrial journalism, will be released from their classes, and will act as guides to visitors. They will also provide special entertainment at the annual banquet for Farm and Home week visitors which will be held in the evening.

The music department of the college will furnish selections by the college band, orchestra, and special groups of singers, and on the last evening special motion pictures will be shown.

In addition to the program for general assemblies, there will be sectional meetings of rural organization specialists, boys' and girls' clubs, Kansas Crop Improvement association, Dairymen's association, Sheep-breeders' and Horse-breeders' associations. Short courses will be given in home economics, various branches of agricultural engineering, and technical subjects in agriculture, such as poultry husbandry, bee-keeping, horticulture, and cream station operation. Able instructors have been secured in each of these departments, with the purpose of making the week of intensive training in the course selected of real value.

FRESHMEN GIRLS ARE THE GUESTS

PARTY GIVEN BY LOYALTY CLUB

Banquet and Dance Are Features of the Evening—Miss Florence Heizer Is Toastmistress

The sophomore, junior and senior girls entertained the freshmen girls with a banquet and dance Saturday evening, January 8, in Recreation hall. The sophomore girls were hostesses at the party.

Miss Agnes Ayers introduced Miss Florence Heizer who was the toastmistress at the banquet. The freshman toast on "Dance" was given by Miss Julia Caton. The sophomore toast on "Fashion" was given by Miss Lorna Troop. The junior toast on "Romance" was given by Miss Alice Mitchell. The senior toast on "Books" was given by Miss Effie Hendricks. Miss Hesse, representing the faculty, gave a toast on "School Spirit."

The banquet was followed by a duet dance given by Miss Joe Bussey and Miss Ruth Kittell, vocal solo by Miss Ramona Rosenthal, a Gypsy frolic by a chorus of girls, and instrumental music by Miss Alice Dewitt.

The rest of the evening was spent in dancing. The music was furnished by the Beta orchestra.

SEND OATS TO KANSAS FARMS

USE SIX HUNDRED BUSHELS FOR SEED INCREASE PURPOSES

New High Yielding Variety Developed by Department of Agronomy

The department of agronomy of K. S. A. C. is distributing 600 bushels of Kansas Fulghum oats among the farmers of the state to be planted for seed increase purposes.

This oats, which is a new high yielding variety recently developed by the agronomy department, is being sent out in lots of from five to 10 bushels each to over 100 members of the Kansas Crop Improvement association who are located in various sections of the state. In most cases the new variety will be planted on the same farm with the local variety of oats, and in that way will serve as a further test of the varieties' respective yielding qualities.

In cooperative tests with Kansas farmers during the last two years Kansas Fulghum has on the average out yielded all other varieties with which it has been compared. The members of the Crop Improvement association, which is made up of farmers interested in the betterment of Kansas crops will grow their allotment of the seed on their farms and endeavor to keep the seed as pure as possible so that it may be used in increasing the amount of seed available in the state generally.

AGGIE QUINTET IS VICTORIOUS SCORE 34-26

BAPTISTS SHOW SPEED IN OPENER

BUNGER LEADS IN SCORING

Aggies Lack Team Work—Cochran Stars for Ottawa Five

The Wildcat basketball team and the Wildcat rooters had a scare that lasted through a goodly portion of the game with Ottawa university Saturday evening, but the fightin' Aggies came from behind in the last half of a hard fought contest and finished in possession of the long end of a 34-26 count. Aggie team work which made the Wildcats famous throughout the Valley in the 1920 season was not evident in the Saturday fray, and some of the players lacked the wind necessary to carry on at top speed through two halves of fast basketball. The Baptist five fought every inch of the way and made the going exceedingly rough for Captain Bunger's athletes, especially in the initial period.

Ottawa Scores First

At the onset of the game neither five could locate the hoop from the field, but Wynne, the Ottawa center scored first for his team with a free throw. The lanky Ottawa was an artist at tossing the gift counters and scored 10 of his team's points by that method in the 14 tries allowed him by Aggie violations of the rules.

After the first few minutes of play the Wildcats started a spurt, getting a free throw and three baskets, but Ottawa soon followed the Aggie example, dropping the ball through the hoop with disconcerting regularity. The feature of the half was the work of Cochran, Ottawa forward, who scored 5 baskets, three of them within less than a minute. The half ended with the Baptists leading by one point, 16-15. Ham Bunger tossed a basket just at the close of the period and before the whistle blew, but the score was disallowed as the time was up before he shot. The timer's gun failed to work and he was forced to blow a whistle.

Close Scoring Second Half

The start of the second half saw the Aggies forging ahead, but the Baptist goal shooter hung close on the heels of the Wildcat five, matching field goal with field goal, and keeping the large crowd out for the season opener in an uproar. Near the middle of the period Bill Knostman went in for Fred Williams at right forward. His addition seemed to revive the Aggie pep and the team forged steadily away from Ottawa from that time on. Bill tossed three counters from scrimmages under the basket during his stay in the contest.

Captain Ham Bunger led the Aggie five in scoring with five field goals and six free throws. The main cogs in the Baptist scoring machine were Cochran with five field goals and Wynne who rolled up 10 points on free throws.

INTRAMURAL BASKETBALL TEAMS FINISHING SCHEDULE

Contesting Teams For Finals In Divisions A and B Will Soon Be Decided

Last week the intra-mural basketball teams started on the second lap of their schedule. Most of the preliminary club games have been played so it will not be long until it will be known what teams will represent divisions A and B in the finals.

December 15 Marshall county won from Omega Tau Epsilon 20 to 7. College club won from Veterinary Medical association 2 to 0, and the first battalion won from the College club 16 to 12. The record for December 16, just before vacation, shows Elkhardt club 1, Larson Independent 0, Phi Beta Sigma 1, Phi Gamma 0, Phi Delta Tau 17, first battalion 11, second battalion 8, Miami county 33, Sigma Phi Delta 6, Boomerang club 34.

Meets Two Old Grads

While in Washington D. C., where he attended a meeting of the American Farm Economic association, Prof. W. E. Grimes, head of the department of agricultural economics had a pleasant chat with Wood Bass and Lester Brooks. Both these men were graduated from the Kansas State Agricultural college and are now connected with the United States geological survey.

THE KANSAS STATE COLLEGIAN

The Student Newspaper of the Kansas State Agricultural College
Published Every Tuesday and Friday of the College Year.
Entered at the Postoffice of Manhattan for transmission through the mails as second class matter.

Address all communications regarding stories, etc., to the editor of the Collegian and all letters in regard to advertising and subscription rates to the business manager.

Be your own self
Answer your own prayers
Mind your own business

THERE'S NO TEN WORD LIMIT, SON

How many Aggies have taken the time to send the "folks" more than a brief "Arrived O. K." since returning to college?

Of course that was a glorious two weeks you spent at home wasn't it? The Christmas and New Year's dinners that mother prepared were alone worth the price of the trip. The whole family treated you as a guest, so that you might have time to recover from the strenuous efforts put forth in finding out what happens when H₂S and CuSO₄ unite, and gain enough strength to push your way through Anderson hall when the mad between class rush is on. Even little brother and sister were on their company behavior, and willing to tire themselves out running errands for you. Your gratitude hasn't left you so early in the new year, has it?

Didn't Dad lay aside his newspaper when you began to tell about Aggie Pop and the Vodvil, and how you got your picture in the movies? You realized then how interested he was in all that you are doing. Don't forget him now.

After the old suit case was packed and mother had seen that the "heavy ones" were really inside, and loaded you with a big box of her best cookies and all kinds of advice, you started back to K. S. A. C. with a mighty tender feeling toward the home folks, didn't you?

There's one way you can repay them now. Write that long letter you promised, and don't mention how much you're in need of a "little extra" this month. They'll be surprised, but the surprise will be an exceedingly pleasant one.

SUPER-CYNICS! THE VERY IDEAR

We have it from a column in the Industrialist that college journalism is, as usual, developing a class of super-cynics. Oh crool satire! Oh biting cynicism!

We are accused of cynicism. We who have done our bit to further research among the type lice, who have crusaded faithfully in the realm of round squares, square tape and other more or less elusive implements of the industrial world.

We are super cynics! We who accept our flunk slips in the same kindly spirit in which they are sent and take them at what they are worth and not at any discounted cynical estimate. Do we discredit the statement of the sign boards that the down town theaters are about to display the most dazzling exhibition of etc., etc.? We do not. We are there on the front row in all the innocent credulity of youth, right next to the seasoned cynic, who knew the show would be a frost, and has come down well in front to verify his judgment.

Cynics! Super-cynics! The very idear.

LET'S HAVE A FEW IN THE AUDIENCE

Next Friday and Saturday the Aggie debating teams, for whom there lies in store neither honor nor glory—merely work—will meet the State Normal and Ames. Will the sole college representation at this affair be on the platform?

Debating has not been given much support in the past few years. The generally accepted conception of a debate seems to be that it is a place to go—to sleep. It seems a little strange that any form of entertainment that smacks of instruction should receive the hearty "go by" that has been accorded this form of inter-collegiate competition.

Most of us are athletic fans and we become deeply incensed at any one who does not support the various teams. Yet the persons who give their time to debate are representing K. S. A. C. equally with those who wear the K. They deserve our support just as much, and debating as a college activity is entitled to the same loyal support that is accorded any other form of Aggie activity. Why not acknowledge their right of support by attending the debates? We can probably learn something.

PAY RENT—SLEEP IN PEACE

The average citizen regards two things as reasonably sure in this world—death and taxes. The average student finds two things that are equally sure and inevitable—quizzes and room rent. The prof. is the autocrat absolute as regards the quizzes, and the student, having no control over them, can not postpone the unwelcome event, but in the matter of room rent it is so easy to put it off indefinitely.

The ever present optimism of the average student—the belief that, a few days hence, he will hold a full house some night when the sky is the limit, or that some vaguely imagined wind-fall or financial miracle will put his finances in a better state, leads him to grant himself an extension of time on rent that is already overdue. But the day of reckoning will come, and the longer it is delayed the larger will be the account against him. In the meantime he suffers from shell shock every time that he inadvertently meets the landlady. Instead of the motherly, considerate person whom he found her to be last fall, she takes on the aspect of a formidable, gum-shoeing extortionist who is tirelessly camping on his trail, and whose every footfall gives him nervous prostration.

And because the landlady doesn't like to do it, or because she wears heavy soled shoes, as the case may be, she doesn't dun Mr. Delinquent Roomer. But her desire to please him wanes, she develops a suspicious attitude towards him, and he develops colds from insufficient covers. A state of perfect discord and unrest exists and everyone suffers. The remedy is in the hands of the student. It entails no inconvenience or hardship to himself. Pay your room rent when it falls due and sleep warm and peacefully these winter nights.

SCHOOL OF AG
WINS VICTORYSCORE OVER LEONARDVILLE BY
15 POINTS

Quintet Loses First Contest with
Riley High—Play Manhattan
Saturday

The School of Ag's 1921 basketball quintet scored its first victory when it won from Leonardville high school by a score of 26 to 11 on the college court last Saturday afternoon at 4 o'clock.

The Ags met hard luck in their first game played with Riley high last Friday and lost, but came into their own in Saturday's tussle in which they took their lead in the beginning and held it throughout the game. Bill Martin, who is coaching the team this year, started the game with Perignat and Quinn at forward, Schultz at center, and Glover and Captain Summers at the guard positions. In the last half Brooks was substituted for Quinn and Rasmussen went in in place of Glover. Jack Evans did the refereeing.

Coach Martin has an abundance of material out which with proper training and support from the prep students will no doubt give the School of Agriculture a prominent place on the basketball map this season. The next game will be with Manhattan high school next Saturday afternoon.

WILL OUT TALK
SISTER SCHOOLSTO DEBATE WITH EMPORIA NOR-
MAL AND AMES

Japanese Question Under Discussion
— Men's and Women's Affirm-
ative Teams to Debate
at Home

The ags, the journalists, and the general science division with three representatives each are tied for the number placed on the debating teams this season, while the home economics division comes second with two and the electrical engineers last with one representative.

On January 14 the girls' debating teams will have a dual debate with Emporia and on January 15 the men's team will debate away from home and the affirmative team will debate at home.

The question, which is one that is being very widely discussed in the public press of today and especially in the Pacific coast papers and the Japanese papers, is, Resolved: That the United States, by appropriate legislation, should prohibit all further immigration of Japanese to this country.

Both the girls' team and the men's team will debate the same question and both have a negative as well as an affirmative team so that the teams as a whole have had ample opportunity to hear both sides of the case. Each night the budding Ciceros have a workout even as the Aggie athlete has in preparation for some big athletic event because it takes the same hard consistent practice to make a debating team that it does to make a football team even though the strain is mental rather than physical. And the Aggies are preparing to "bring home the bacon."

Nettie Pfaff, sophomore in home economics, has withdrawn from school because of illness.

Mr. W. L. Smith of El Dorado, is visiting this week with his wife and his daughters, Misses Thelma and Verna Smith.

Lost: Ladies' watch attached to black ribbon. Between high school building and 810 Poyntz. Phone 1204.

Watt is New Herdsman

Aleck Watt has recently accepted the position of herdsman in the animal husbandry department. Watt takes the place vacated by the resignation of Arthur Weber who intends to continue his course in animal husbandry next semester. Mr. Watt is a typical Scotch herdsman of wide experience. He has worked with many of the most prominent herds of cattle in this country and has been on the live stock show circuit for several years. He was last employed with the Velle herd of Hereford cattle at Blue Springs, Mo.

Word from Dr. John R. Macarthur tells of his enjoying himself at the flower parade at Pasadena on New Year's day.

Miss Elsie Smith attended several sessions of the National Music Teachers association in Chicago from December 28 to December 31.

W. B. Honska, civil engineer, '11, has just visited for a few days at the college and about town. Since his graduation, Honska has been almost continuously employed in district engineering work in the Philippine Islands.

M. E. Hartzler, civil engineer, '14, now living at Flagler, Col., is at present visiting relatives in Riley county. Since graduation he has served in the army and has been in the employ of the Texas company, an oil producing concern.

Prof. C. D. Christoph, who was in the English department here last year and who is now in the English department in the New Mexico Military institute, has a group of poems in the January number of Poetry entitled "Reflections."

Miss Gladys Taylor spent the week end at Lawrence, where she attended the Delta Tau Delta formal.

Miss Ruth Garvin of Lawrence, is spending the week at the Alpha Delta Pi house.

Miss Velma Meserve was a dinner guest at the Alpha Delta Pi house Wednesday.

Miss Alice Marston was a dinner guest at the Alpha Delta Pi house Thursday evening.

Tom Neely of Abilene, will spend the week end at the Sigma Nu house.

Women's pan-hellenic met at the Kappa house Thursday evening.

Miss Mildred Inskeep, field secretary of the Y. W. C. A., is here this week to help in the special educational campaign that the Y. W. C. A. is holding.

ANNOUNCEMENTS

Purple Masque will give a one act play in Friday's assembly.

Remaining Inter-mural basketball games have been postponed indefinitely.

Mountain Ash Male choir will sing tonight in the auditorium at 8:00 o'clock.

Miss Gertrude Ramsey, who was operated on for appendicitis at the Park View hospital during the Christmas holidays, expects to attend a few of her classes this week. Miss Ramsey has not yet fully recovered from her illness, but is improving.

Paul Younce of Anthony, and Arnold Hart of Harper, were week end guests at the Pi Kappa Alpha house.

Prof. R. W. Conover conducted the Sunday evening service of the Episcopal church in Wamego.

ENGINEERING AND COLDS RELATED

J. P. CALDERWOOD SUGGESTS PREVENTIONS

III Heated, Improperly Ventilated Rooms Most Common Cause for Sneezes

Colds and their prevention is a new phase of learning recently taken up by the engineering division.

The relation of engineering to catching cold seems especially remote, yet the medical profession has convinced itself that there is a connection. It holds that the causes of colds are numerous, but that there is one common cause—that of dwelling in ill heated and improperly ventilated rooms.

J. P. Calderwood, professor of mechanical engineering, suggests, in the following, means of safeguarding against colds:

"In the attempt to produce a healthful atmosphere in the heating of a home, the greatest tendency is to neglect the moisture content of the air. Cold outside air upon being admitted to a heated room for ventilation is so rarefied as to its moisture content, that unless provision is made for an additional amount of moisture, the air in the room may be as dry as the Sahara desert. To counteract this tendency, evaporation pans in a warm air furnace should be regularly filled with water, a point that is usually overlooked. In the case of other systems of heating, moisture providing appliances may be attached.

"While the engineer cannot offer these suggestions as positive methods for prevention of colds, he can at any rate advocate them for economical reasons. A room supplied with dry air requires a higher temperature to maintain a reasonable degree of comfort than when the air is moist. Consequently moist air and a lower temperature means a saving of fuel."

MANY TRY FOR PICTURE PRIZE

ANNOUNCE WINNER IN NEXT BROWN BULL

Editor Wants Contributions from Every Division and Department —To Be All College Magazine

Over 100 names have been suggested for the prize picture in the last issue of the Brown Bull. A committee has been appointed to judge the names and the winner will be announced in the next issue of the magazine.

Any person who wishes to contribute material to the magazine is at liberty to do so. In fact the editor wants material from every division and every department on the hill in order that the magazine may appeal to everyone in the college.

The last issue, the homecoming number, has received a great deal of praise from a number of papers, notably, the Kansas City Star. With Theta Sigma Phi and Sigma Delta Chi working together, it is expected that the Brown Bull will be among the best of the humorous magazines in American colleges.

Place Patch On Ear Drum

Harry B. Merner, a former K. S. A. C. student, who is now studying osteopathy in New York City, recently witnessed an unusual operation in which a patch was placed on the ear drum of a student in the school suffering with ear trouble. The operation was performed by Dr. R. E. Hamilton, physician in charge of the American school of Osteopathy. The operation has seldom been done because of the difficulty presented in the field of operation, as the drum is so far inside of the head.

Misplaced Eyebrow Causes Ag Student To Be Real Martyr

He was an Ag skilled in the art of cultivation. No, not of soil but of the misplaced eyebrow. Starting with only a bit of fuz he determined to grow that delicate bit of personal adornment which real men hate, sisters adore. Soon his efforts began to show signs of success.

Slowly yet surely that bit of down grew into a full sized brush. How proud he was of it. To him it represented weeks of waiting, delicate cultivation, months of expectation. Yet hold, at this juncture his fellow Ags took a try at cultivation. Six of them pounced upon him and forthwith he was dragged from his classroom and deposited upon the turf in front of Waters hall.

From the pocket of one of the assailants was produced an instrument with an edge such as only a blacksmith can produce. The wielder of the weapon showed a skill which few barbers attain, none excel. Slowly yet precisely the operation was performed. Again the Ag's source of supplies (his pocket) was resorted to and a bottle of "Imperial Black" was supplied. Presently the victim was released. What a work of art! One side of that delicate crop of down which had formerly adorned his physiognomy was missing and the other side was stained a coal black. Another Ag had fallen a victim to a bad cause, a martyr to the cause of "Misplaced eyebrows."

Prof. J. W. Searson spent the week end in Topeka on business.

FAITHFUL FROSH TO GET AWARD

NUMERALS WILL BE AWARDED STICKERS THROUGH SEASON

Custom of Awarding Anything but Hard Knocks to Yearling Squad New Here

The athletic board has started a new custom this year in the awarding of class numerals to the members of the freshman football squad who stick through the long grind of the season with nothing but hard knocks from the varsity as their reward. The numerals are placed on a lightweight V-neck sweater and are given to those members of the freshmen squad who have played on the first string of the yearling warriors at least part of the season.

The frosh athletes to receive their numerals for the 1920 season are Hopper, Koehler, Ziegler, Couch, and Quinn, ends; Patterson, and Nichols, tackles; Ewing and Dougherty, guards; Webber and Clements, centers; Currie, quarterback; Swartz and Stark, halfbacks; Jenkins and Marsh, fullbacks.

The custom of awarding numerals to the freshmen football men is a new one at K. S. A. C., but it has been tried in other schools and found to be a stimulant of interest in the work of the yearling squad. Dr. A. A. Holtz, coach of the frosh this season, developed an eleven that did good work in preparing the varsity

for their tangles with other teams, and it is very gratifying to him that the men who stuck through the long pull through to the end were rewarded by the awarding of the numerals.

Students in Boycott

Forty one fraternities and sororities of the University of Nebraska, whose membership includes 1,000 students have agreed to boycott all soda fountains, theatres, cafes and banquet halls which do not reduce prices to a scale fixed by a student fair price commission.

Morgan To Give Addresses

Dr. E. L. Morgan, national rural community organizer for the American Red Cross, will give a series of addresses at the Rural Organization conference of Farm and Home week, February 7 to 12. Doctor Morgan is a Kansas man. For several years before taking his present position, he was community organizer for the state of Massachusetts, working through the agricultural college at Amherst. He is also chairman of the rural organization section of the American Country Life association.

Colored Plates Show Disease

The botany department has secured a set of colored plates showing the most common diseases attacking fruits and vegetables. These plates were procured by Prof. L. E. Melchers through the permission of the United States department of agriculture. They are the first set of this kind in existence, and the 250 plates are valued at about \$500. The plates will be used in the plant pathology classes in connection with the study of these diseases.

ARE YOU A "WISHER"?

Many people go through life "wishing" while others start saving and then get the good things that the other people "wish" for.

In which class are you? Get in the saving class. It's easy. A dollar starts you at this bank. We will pay interest on your savings no matter how small they may be. Before long you'll have enough to be really proud of.

Life is cruel. It hasn't much time for the "wisher." But to the person who is backed by a little capital the world opens the doors of opportunity.

Start saving now. That one thing takes you out of the "wishing" class and puts you in the "having" class.

"Stands Up" The World Over

CLETRAC carries power farming to the four corners of the earth. Its ground-gripping tracks, its heavy-duty motor and its sturdy, stand-the-gaff construction are helping to modernize the farming customs of sixty-five countries.

In the far North where the short, intense season makes speed the first consideration, Cletrac's "more work per day" ability has won prompt popularity among the farmers. And it is equally in demand in tropical countries where man and beast so quickly succumb under the burning southern sun.

Cletrac's ability to stand up under constant use—to keep steadily on the go—counts most in the far places where broken or worn parts may mean weeks of idleness. And, of course, that's just as big a factor in Cletrac's year-round dependability here at home.

Agricultural students will find real information on power farming the Cletrac-way in the booklet "Selecting Your Tractor." Copies gladly sent on request.

PREP SCHOOL TO HAVE DEBATERS

FIVE TEAMS CHOSEN IN TRY-OUTS

Lincoln and Philomathian Literary Societies Are Represented—Teams to Meet This Month

At the School of Agriculture debate tryouts held just before the Christmas vacation five teams of three each were chosen. The six men forming the affirmative and negative teams for the Lincoln literary society are J. W. Briggs, C. Rowe, Charles R. Fitch, Paul J. Briggs, A. V. Ritts, and B. J. Miller. The six men picked to form the affirmative and negative teams outside of the Lincoln literary society are Cecil Ryan, A. S. DeBard, K. D. Davidson, Allen Downey, Hamilton Riggs, and Claude Yaple. The Philomathian literary society team is Lilly Johnson, Mona Vogelmann, and Wilma Hartley.

The Lincoln literary society teams and non-society teams will meet in dual debate sometime in January and in case this debate results in divided honors the winning team will meet in a final clash to determine the winners. The Philomathian literary society team will meet a Lincoln literary society team, the personnel of which has not yet been chosen. The question for debate in all the debates is, "Resolved: That the United States establish a mandate over Armenia."

Debate is active in the prep school this year, according to Wilma Orem, instructor of history and civics and sponsor for the school of agriculture. M. E. Ramsey, sophomore in general science is coaching the Lincoln and W. W. Weaver, junior in general science, is coaching the non-society men. The Philomathian team has not chosen its coach as yet.

INSTALL SCOOP TO SAVE WORK

USE MECHANICAL COAL SHOVEL AT HEATING PLANT

Build Concrete Pit to Store Fuel—Will Hold 30 Carloads

One of the favorite pastimes of the college, shoveling coal into the furnaces at the heating plant, will be largely eliminated with the completion of the installation of the new coal handling apparatus now being installed by the engineering division. This new system is calculated to save much time and labor. At present there are about 10 men in the employ of the heating department and probably but half of these will be required as soon as the new mechanical scoop is installed.

The system is known as the "link-belt" system conveyor. The coal will be hauled to the college in trucks and instead of being dumped onto the ground, as was formerly done, it will be dumped into an elevator pit such as are used in grain elevators. Here the coal is crushed after which it is hoisted by a "clam-shell" scoop shovel, a ton at a time, to an overhead tramway and then is carried into the furnace room where it is dumped into seven bunkers having a total capacity of about 200 tons. These bunkers are suspended directly over the furnace hoppers and can be used for temporary store rooms from which the fuel can be obtained when needed.

On the grounds back of the engineering building where formerly were piled hundreds of tons of coal of which much was lost, a new concrete pit has been built. It is 80 feet long, 20 feet wide, and 10 feet deep, and has a capacity of 30 carloads. This is used as a storage room, and is in reach of the traveling crane which will scoop up the coal without extra handling. On the traveling crane is a cage on which the operator rides who directs the movement of the machinery. The clinders from the furnaces will be handled with the same machinery, and will be carried out and dumped into trucks for disposal.

VETERINARY MUSEUM IS READY FOR INSPECTION

Believed To Be One of Best Collections in the United States

The long talked of veterinary museum has at last become a reality. The museum is now completed, and the room invites the investigation of anyone interested.

The collection is believed to be one of the best in the United States. It was collected by the Kansas City Veterinary college, which closed about two years ago. Several years were taken to make the collection of the specimens. Many specimens are mounted while others which are in the egg or embryonic stage are well preserved in containers.

Dean R. R. Dykstra is responsible for the bringing of this collection to K. S. A. C. While the collection will be of great value to the division of veterinary medicine in their investigations and research work, it should prove also to be a great attraction to visiting live stock owners and farmers, as it will help them to recognize more easily many animal diseases.

Find Pre-Historic Elephant Bones

A strange petrified bone taken from the bed of the Smoky Hill river near Junction City recently by the crew operating the Ziegler-Dalton sand pump, was sent to Manhattan for college experts to pass on. The bone, which is in five layers, looks like the jaw of a pre-historic monster, each of the five layers being tipped with claws. The examination by experts proved the bones to be a set of teeth of a mastodon, a species of pre-historic elephant. The examination also revealed the fact that the animal was not fully mature when it died, as the teeth are smaller than those exhibited in the museum here. The Ziegler-Dalton sand company have pumped up several bones at the place where the company is operating and these will each be examined.

Miss Kaull Teaches in Nebraska

Miss Erba Kaull, '17, has resigned her position in the Manhattan high school as teacher of journalism and has accepted a position in Superior, Nebr., as teacher of history. Miss Kaull was graduated in industrial journalism in 1917 and while in college was quite prominent in that department. Since graduation she has taught two years in the Meade high school. Miss Kaull was forced to give up her position at Manhattan because of the heavy work.

Prof. F. C. Gates has taken charge of the botany laboratory classes of Prof. C. E. Miller, for the rest of the semester. Professor Miller is doing some special research work.

Timely Topics

We are showing Ice and Roller Skates for boys and girls.

Tools of all kinds for Auto and Tractor Mechanics.

Guns, Rifles, Hunting Coats and Shells for the rabbit hunters.

Paints, Shellac, Varnishes, Wax and Floor Waxing Brushes for the home.

Ranges and Heating Stoves at very low prices.

If you don't see in this list that which you need, come in and ask for it.

HORTICULTURAL CLUB ORGANIZED

JERRY QUINN ELECTED TEMPORARY PRESIDENT

Have Twenty Charter Members—F. Jennings, Secretary for Remainder of Semester

The new horticultural club which has recently been organized has the honor of being the only club of its kind in the horticulture department. This new organization has been started in order that the hort students may work together in proving to K. S. A. C. that they have as much life and pep as the Block and Bridge, Klod and Kernel, Dairy association, or any of the other professional organizations on the hill.

Jerry Quinn was elected temporary president and is to serve the rest

of this semester, with F. Jennings as secretary. The membership is not limited to students majoring in horticulture but is open to all college men who are interested in fruit growing.

Interesting programs are to be put on at the meetings and it will be well worth any student's time to attend. There are 20 charter members of the club and they are all enthusiastic to make the club an unbounded success.

Instructors Most Numerous

There are 427 faculty members on the college list now. Seven deans, 65 professors, and 61 assistant professors head the list. There are 102 instructors, and 76 assistant instructors. Agricultural agents number 60, with eight demonstration agents, six boy and girl club leaders, and five who have received fellowships. The instructors seem to be the most numerous, composing about one fourth of the entire faculty.

Mrs. H. W. Davis was ill last week with tonsillitis.

TEST FLOUR BY BAKING BREAD

MILLING DEPARTMENT EXAMINE
76 SAMPLES

Kanred Is Inferior to Common Varieties in Bread Baking Qualities

The milling department of the college has just completed a baking test of wheat flours in which the baking qualities of flour made from Kanred were compared with those made from Turkey and Kharkof. The results show that Kanred for 1920 is a bit inferior to the common varieties in its bread making qualities, having a lower expansion of dough, lower loaf volume, and being one point lower in the color score, and one and one half points lower in the texture score.

There were 76 samples sent in to the milling department from members of the Kansas Crop Improvement association located in 30 different counties in various parts of Kansas. The samples were milled in the college mill and baked into bread by the milling department. The scoring of the bread was done by laboratory men from the Kansas Milling company, of Wichita, and from the Southwest Milling company and the Ismert-Hincke Milling company, both of Kansas City, Mo.

Although the main tests were completed January 4, the milling department expects to conduct further tests with combinations of the flours.

COLLEGE GIRLS PLAY TEACHER

DO PRACTICE TEACHING IN RURAL HIGH SCHOOLS

Cora Akers Giving Instruction at Keats—K. S. A. C. First School To Take Up Work

Cora Akers, senior in home economics, is doing practical teaching in the consolidated rural high school at Keats under the supervision of Miss Edwards of the home economics department. The Kansas State Agricultural college is the only school in this part of the country that is sending out their students to nearby high schools by means of motor cars to do practice teaching.

The problem of making their own clothes and renovating their old ones is now demanding the interest of the girls who are taking this course in the high school. So much interest is being shown that new classes will be formed the second semester.

Miss Akers makes the trip every Tuesday and Thursday afternoon and is not only becoming a master in the teaching profession but an expert mechanic as well. This far, she has had all kinds of trouble with the car, which is rented by the school. The girls who intend to take up this work the next semester are hoping that someone will come to their aid with a new car.

The next term, vocational courses in home making will be formed at the Keats high school. Similar courses are also being offered in the Manhattan junior and senior high schools. At least 20 girls will be doing this work the spring term.

JAZZ DANCES SO DEAD THEY CAN NEVER RETURN TO LIFE

Steps No Longer Tolerated in Places of Good Reputation—Fox Trot One-Step, and Waltz Popular

According to Mrs. G. E. Hartman of Wichita, jazz dances are dead—so dead that they will never return to life. Mrs. Hartman comes to this conclusion after attending several dancing conventions in the east. This is the sentiment of dancing instructors all over the country.

"The public simply wouldn't stand for the jazz steps," Mrs. Hartman asserted. "It is no longer tolerated in places that are at all particular about their reputation. It is considered almost 'Bowery.'"

Mrs. Harman thinks that the fox trot, one step and the waltz are the most popular dances today.

O. D. Gardner, senior electrical, who for the past six months has been working for the Chicago Edison Electric company and the Burlington railroad in Chicago, has returned to college to resume his studies.

The social service committee of the Y. W. C. A. is supervising the organization of a younger colored girls' club, which is to be directly in charge of the colored girls of the college. Sewing classes are to be one part of the work.

Miss Enola Miller, who was a student in industrial journalism here last year, is now in charge of circulation for her father's paper in Republican county.

SOCIETY

Hush, listen! Have you heard the latest? Well, pass on the word gently. Earbobs are booked for a return to the archives and something new is coming. They're all doing it! Big girls and little girls. Doing what? Well, that's the latest. They're bobbing their hair and bobbing it short. The fad is simply raging over the country. Pink ears are seen once more.

"My dear," remarked one bobbed head to another, "this is the only road to happiness and more sleep. No more hours spent on marcel waves. A minute with the comb now accomplishes more than an hour did before."

Sigma Alpha Epsilon fraternity has pledged Mr. Lyle Ernst of Clay Center, freshman in general science.

Omega Tau Epsilon fraternity has pledged Mr. Ed Harnden of Stillwater, Okla., sophomore in veterinary medicine.

Kappa Delta sorority entertained the Sigma Phi Epsilon fraternity with a buffet luncheon and dance Friday evening from 5:30 to 8 o'clock, in honor of Mr. and Mrs. Wright Turner.

Phi Gamma fraternity entertained with a formal dinner dance at the chapter house Saturday evening. Twenty couples were present. Miss Elizabeth Rothermel chaperoned. The music was furnished by a two piece orchestra.

Mrs. Martin Demsey and Mrs. S. N. Higenbotham entertained with a dancing party at the country club in honor of the Delta Delta Delta sorority Saturday evening, January 8. The rooms were decorated in the colors of the sorority, silver, gold, and blue. Dacquet's orchestra furnished the music. A two course luncheon was served after the dance.

Miss Elizabeth Powell and Mr. Claud Marshall were married December 28 in Wichita. Miss Powell is a special in home economics and a member of the Delta Delta Delta sorority. Mr. Marshall is a special in agriculture and is a member of the Acacia fraternity. They will make their home in Tucson, Ariz., where Mr. Marshall will attend the University of Arizona.

Miss Laura May, daughter of Mr. and Mrs. James A. Ramsey of Topeka, was married December 22 to Mr. Otto Earl Frisbie at Basin, Wyo. Mrs. Frisbie was graduated from the division of home economics at K. S. A. C. in 1917, and for two years was instructor in domestic science and art in the Clay County high school. She resigned her position at Clay Center to take up Y. W. C. A. work in the west.

Miss Betty Powell announced her marriage to Mr. Claud Marshall with a dinner party at the Delta Delta Delta sorority house Friday evening, January 7. The table was decorated with forget-me-nots and golden butternuts. On each side of the bouquet was a miniature bride and groom. The announcement cards were tied with ribbons of silver and gold and blue. Streamers in the sorority colors extended from the center piece to each guest's plate. During the dinner toasts and congratulations were given to the bride.

Mrs. J. E. Dewey entertained last Wednesday evening at her home, 335 North Fifteenth street, for Miss Ruth Peck of Berryton, who is a junior in general science, and president of the junior class. Twenty-five friends of Miss Peck were present. The time was spent in games and conversation. The surprise of the evening came in the form of an extra edition of the Possum Hollow paper. It announced the engagement of Miss Peck to Mr. William Knostman of Wamego, senior in general science. Mr. Knostman is a member of the Delta Tau Delta fraternity and is the president of the Students' Self Governing association.

Miss Ruth Wolfenbarger and Mr. John C. Wilson were married at 11 o'clock January 1 at the home of the bride's parents, Mr. and Mrs. J. H. Wolfenbarger, 909 Moro street. The marriage service was read by the Rev. Lewis Jacobsen of the First Baptist church. Following the ceremony a four course dinner was served. In the evening Mr. and Mrs. Wilson left for Leonardville, where they spent a few days visiting friends. Mrs. Wilson is a graduate nurse from Charlotte Swift hospital and also has had training at University hospital in Kansas City. Mr. Wilson is a student at the college, taking special work in science. Mr. and Mrs. Wilson will make their home at 1001 Laramie street.

Doubles Enrolment in Six Years

According to an article in the Engineering News-Record for December 16, K. S. A. C. ranks twelfth in a list of schools reporting their enrolment. There are 916 enrolled at the present time. This is an increase of 629 since 1914. K. U. ranks eighteenth in this same list with an enrolment of 742.

A few of the larger engineering schools have doubled their enrolment during the last six years, K. S. A. C. being one of them.

Praise Home Study Service

One of the specialists in the home study service received a letter this week from M. M. Culver, a prominent educator in McClure, Ohio, containing this statement:

"I have done considerable extra-mural studying, the most of which has been with the University of Chicago. Your courses are as well, if not better, worked out than theirs. I think you require considerably more work per semester hour than they do."

V. L. Strickland, director of the home study service here, says that he values this statement highly, inasmuch as Chicago university was the first school in the country to offer correspondence courses and has a high rating in that field.

Teach Ex-Soldiers By Correspondence

This college, the first school in the country to qualify for giving correspondence courses to ex-service men under the rehabilitation service, has 40 men enrolled and is planning a conference of students for the second week in February. Courses are offered in poultry production, fruit growing and mechanical work.

Walking in the Rain

Plaintive music
From the Muse's harp
Of ten million strings,
Free!
If you walk in the rain.

If your eyes were made for seeing,
Then walk in the rain
Through the garden,
And see
The white chrysanthemums
Nodding
By the roadside.
And the blurred scenery
Of the hills
And the sky.

Melancholy,
One walks
Alone

In the rain,
He becomes
Unconscious
Of his cares
Or sorrows,
Of the world
And its futility.—Foley Kiang.

Morse Salisbury has been elected by the members of the Collegian board to fill the vacancy caused by the resignation of R. C. Nichols.

FRAT MEETING SPEECH GIVES MARTIN A JOB

EXPLAINS SITUATION TO STUDENTS

PREXY PUTS "BILL" IN CHARGE

Delta Taus Give \$135 as a Starter—
May Contribute Friday and Saturday

This is the story of how "Bill" Martin drew a worthwhile job.

Martin belongs to one class where in he has to make a public speech every so often. He reads the Literary Digest, admires Herbert Hoover immensely, and has a good deal of human sympathy. Also he is something or other in the Delta Tau Delta fraternity.

The time is almost at hand for Bill to make another one of those carefully prepared extemporaneous speeches. He decided several days ago to make a speech on the pitiful condition of more than 3,000,000 starving children in the desolate parts of Europe. Hoover and the Digest are trying to raise \$23,000,000 to save these from actually starving and freezing to death. The fund now is \$2,000,000. With this amount 200,000 lives have been saved.

Gives Frat Meeting Speech

The Delta Taus held their regular meeting last week. Martin made a speech—or rather, he practiced on his fraternity brothers the extemporaneous speech he is to give in class this week. Only he forgot to tell the boys he was practicing a speech. Probably he forgot it himself in telling of the sufferings of millions of helpless orphans.

At any rate, when Bill finished his speech there was a dead silence. Then there was a reaching of hands into pockets already suffering from Christmas holidays.

"Two five dollar bills will save a kid's life," Bill had said.

Thirty good right hands—except one that belonged to a left handed man—reached eloquently toward a rather embarrassed Bill.

Delta Taus Give \$135

When he counted up, Martin had \$135 for the kids over there. An alumnus who heard about the speech added five. Bill's practice speech had saved fourteen lives, according to Herbert Hoover's figures.

Martin confided his feelings to a friend on the hill.

"It seems to me," he said, "that there are some other fellows that would like to save a few kids' lives." The friend led Martin to President Jardine.

Martin in Charge of Contributions

"I am pretty busy," Prexy said slowly, after hearing the tale. "You just go ahead and put it up to the college. You are authorized to take contributions and forward them

to Mr. Hoover's Relief Administration."

That is where Martin balked. He didn't feel like making any more speeches except in class. Prof. J. E. Kammeyer was pressed into service, and will make a four minute talk at chapel Friday morning, explaining the situation. Martin will see that there is a box in Main hall Friday and Saturday in which those who are willing to give up a few luxuries to save a kid's life can contribute. President Jardine is sending an open letter to members of the faculty, asking them to state the case of the millions of starving children to their classes Friday. There will be no drive, just a plain statement of facts, and an opportunity to do an unselfish act and perhaps save a human life.

"Think of it," said Martin. "Those poor kids actually starving to death when a ten dollar bill will carry one through the winter."

"Y" EDUCATIONAL CAMPAIGN IS ON

WILL DECIDE THIS WEEK ON
MEMBERSHIP BASIS

Miss Inskeep Outlines New Plan—
Committee and Freshman Commission Meet Tonight

This is the week for the special educational campaign in the local Y. W. C. A. regarding the new membership basis. At the national convention at Cleveland last year an amendment was adopted allowing college girls who are not members of any church, but who are in sympathy with the work of the organization to be active members of the organization. It was left to each local association whether they would continue under the old basis or adopt the new amendment.

At the Vesper meeting last Thursday Miss Marcia Seeber gave the history of the new amendment and the summarized arguments for and against. Miss Mildred Inskeep, field secretary, spoke to the cabinet Monday evening on the new plan.

Tonight there will be a meeting of the committees of the association and freshman commission. Thursday at the regular meeting the vote will be taken to decide whether the local association will adopt the new amendment or continue under the old form. Folders explaining the old and the new basis and the purpose of the organization are to be published to help in the campaign.

Dairy production is a topic of interest at institutes and extension schools being held over the state, reports W. T. Crandall, extension specialist in dairying. Three subjects have been stressed especially. They are "Building up the Herd," "Demonstration of the Dairy Type," and "Management of the Dairy Herd."

L. A. Tilton, '11, has recently accepted a position in the mechanical engineering department of the federal aid roadwork. He is now located at Pittsburg.

PRONINENT MEN TO SPEAK HERE

DATE OF WORLD FORUM FEBRUARY 18 TO 20

Organization Was Formed Last Year As Outgrowth of Des Moines Convention

February 18 to 20 has been definitely fixed as the time for this year's session of the World Forum.

The World Forum was organized last year as an outgrowth of the Des Moines convention, by students of this college who were actively interested in work of a religious or missionary nature. Its purpose was originally to give those students who were unable to attend the convention the opportunity to hear prominent speakers of the same type as were on the program at Des Moines.

There are five people of national importance arranged for who will speak here during the three days, and no student interested in missionary work should miss the chance of hearing them.

Bishop Linn Ernest Waldorf, LL. B., of Wichita, will deliver the first address, and then will follow Mrs. Clara Pinkham, president of the Chicago Missionary Training school; Knox Montgomery, president of Muskegon university; David R. Porter, head of the students' work, International Y. M. C. A.; and Fred B. Smith, a leading business man of America, and vice president of the Johns-Manville company.

Doctor Vogt to Lecture

"A man who in a two years' period has added new departments to 26 colleges, may be looked upon as a modern genius and diplomat," says Walter Burr, in announcing Dr. Paul Vogt as one of the principal lecturers on the program of the rural organization conference. The confer-

ence is an annual meeting, held at the Kansas State Agricultural college during Farm and Home week, February 7 to 12. Doctor Vogt is the author of the text book used in the course in rural sociology at K. S. A. C. He was formerly professor of rural economics and rural sociology at Ohio State university. Doctor Vogt is now in charge of the national rural work of the Methodist Episcopal church.

Y. W. Vesper services were held Thursday at 4 o'clock in the recreation hall. Miss Mable Ginter had charge of devotions. The program consisted of a vocal solo by Miss Hoots, accompanied by Miss Elsie Johnson, and talks by Miss Marcia Seeber and Miss Irene Dean, who explained to the girls the new basis for membership which was discussed at the Y. W. C. A. at the college, will speak at the next regular vesper service meeting.

Miss Bess Curry spent the holiday vacation in Chicago where she studied under Professor Radonovitz.

Miss Helen Hennen spent the Christmas holidays at her home in Detroit.

Prof. H. P. Wheeler spent part of his vacation in Chicago hearing opera and concerts.

Miss Katharine Kimmel spent the holidays at her home in Battle Creek, Mich., where she assisted the choir of the First Presbyterian church with their Christmas music. She also sang at an orchestra concert at the Battle Creek sanitarium.

Miss Dolly Browning, former student in K. S. A. C., visited here Thursday. Miss Browning is now attending business college at Topeka.

"Feeding for Winter Egg Production" and "Avoid Poultry Diseases," two timely articles written by Norton L. Harris, specialist in poultry, are perhaps two of the most popular circulars being sent out by the extension division.

Miss Hunt in California

Miss Florence Hunt who has taught costume design at K. S. A. C. since 1914 is in North Pomona, Cal., this winter. Miss Hunt is working with her mother who has a tailoring and dress making shop. In Miss Hunt's letters she says that Miss Grace Averill will return to her work in another month, but at present Miss Averill is with her sister in Los Angeles, Cal.

Davis Prepares Booklet

All the English teachers have been asked to send to Prof. H. W. Davis of the English department a list of the ten most common errors that their students make in grammar and composition. He is preparing a booklet to be sent out to the English teachers over the state to aid them in conducting "better speech" week. Many of the teachers are asking cooperation of the students in preparing this list.

Prof. A. E. Westbrook and Prof. A. L. Lovejoy spent a week of the holidays in Chicago. Professor Westbrook attended the National Music Teachers association which was in session there from December 23 to December 31.

THE KANSAS STATE COLLEGLIAN

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, FRIDAY, JANUARY 14, 1921

NO. 80

KIDDIES' CAUSE PRESENTED BY J. KAMMEYER

STUDENTS WILL AID SUFFERING
LITTLE CHILDREN

AGGIES PUSH FEEDING FUND

Contribution Box Placed in Main Hall
—Literary Digest Guarantees
Every Dollar Well Spent—
Business Office Handles
Money

Prof. J. E. Kammeyer, in a short talk this morning presented to the students the cause of the little children of central Europe, the little children who are victims of the devastated conditions prevailing in the war wrecked countries. He explained the conditions in these countries and showed the great need for immediate aid from America. He told what the American Relief committee has been doing to care for the starving children who could receive help from no other source.

"Mr. Hoover and his colleagues," said Professor Kammeyer, "have been carrying on this relief work since 1918, part of that time with government help but some of the time without. In 1920 the committee cared for some 6,000,000 waifs, undernourished, sick, and orphaned children. Early in 1920 conditions were improved and the committee was able to leave some of the countries after the harvest of that year. There still remained more than 3,500,000 children so pitifully in need that America could not desert them. Mr. Hoover and his colleagues continued their work and prepared to tide the children over the coming winter.

Magazine Asks Help

"But," said Professor Kammeyer, "they found that if they were successfully to carry on this work; if they were to save the lives of three and a half millions of children, a greatly increased fund must be forthcoming from some source. This is why the Literary Digest started its feeding fund and made an appeal to its readers and to all Americans to have a part in this work of saving the lives of the innocents."

Professor Kammeyer went on to explain the Child-feeding fund of the Literary Digest. He said: "The Literary Digest has set out to raise a fund of \$23,000,000. It is appealing to every American to do all he can toward this object. We can all do something and is there anyone of us who does not want to do all he can? The Literary Digest states that \$10 will keep a child supplied with enough food and clothing during the winter to save it from starving. For \$10 you can save that precious and priceless thing the life of a little child."

Chapel Collection Taken

"College students I know," continued Professor Kammeyer, "are not able to give much to any charity but there are none of us who cannot give something. This is to be a voluntary contribution, it is not a drive. You are simply being given an opportunity. For instance, suppose that we sacrifice one street car ride, let 1,000 students do this and give the money saved toward this fund. That would be \$80, enough to save the lives of eight children. Suppose 2,000 students sacrifice two rides each. The result would be a contribution of \$320, enough to save 32 children. We can save the lives of these children and many more with a small sacrifice that no one will even notice. We cannot afford to miss such an opportunity."

A collection was taken at the doors after chapel was dismissed. A box for contributions is to be placed in Anderson hall and any contributions will be properly taken care of. The work here is in charge of W. L. Martin, Dr. A. A. Holtz, and Miss Irene Dean. The money will be handled through the business office and will be sent to the Literary Digest fund. The Literary Digest guarantees that 100 cents of every dollar will be used for the immediate relief of the starving children in Europe.

Prof. A. M. Paterson gave a talk last week before the Sheep Breeders' Association of America at Lincoln, Neb., on "Better Methods of Flock Management," and on January 7 he addressed a meeting of the Kansas Veterinary association at Salina on the subject "Prevalent Diseases Among Sheep."

Miss Ruth Garvin left Wednesday for her home in Lawrence after spending a few days at the Alpha Delta Pi house.

The Busy Body

Question: "What do you think of people who take their Christmas vacation as a time to get married?"

Prof. H. H. King: "After the strenuous time in school the fall semester, up to the Christmas time, we naturally take the Christmas period as a period of relaxation and a time that we can turn from our natural and normal occupation to that of more foolish and frivolous thoughts."

Morse Salisbury: "It's a crime to spoil such a happy season as Christmas time by laying up future trouble. However, if the parents of the people are willing to work and support them—it's no business of mine."

Prof. Albert Dickens: "It's the proper thing to do. I used a 'Xmas vacation' that way myself once. Not while I was a student, though."

AGGIE AMATEURS SEE K. U. SHOW

PLAY CAST GO TO LAWRENCE
MONDAY

Dramatic Departments Desire Closer
Cooperation—Jayhawk Representatives Coming Here

A party made up of nine of the members of the "Come Out of the Kitchen" cast, accompanied by Prof. J. G. Emerson and Prof. H. T. Hill, Miss Florence Heizer, H. C. McClelland, and Vorin Whan, made a trip to Lawrence Monday for the purpose of seeing the play put on by the K. U. dramatic club. Those of the cast who made the trip were Donald Elbert, H. Riggs, Earl Bruce, Miss Curtis Watts, Miss Gladys Newton, and Miss Alice Carter.

The title of the four act drama put on at K. U. was "Mrs. Goring's Necktie," the action of which was supposed to take place in a small town near London.

Miss Heizer reports that due to the able direction of Prof. Arthur McMurray, the acting was of such superior quality that Purple Masque must strive hard in order to parallel it.

It is the desire of the dramatic departments of the two schools to come in closer cooperation with each other, and with this purpose in view, it is the intention of Professor McMurray to be here at the presentation of "Come Out of the Kitchen."

The miniature theater in the University's law building proved to be of much interest to the visitors. This theater is complete in every way, although plays for the public are never staged here since an audience of only 100 can be accommodated. Rehearsals are carried on in the theater and one act plays are acted out for the benefit of the dramatic club.

From Lawrence Miss Heizer went to Kansas City, where she succeeded in getting some fine costumes for "Come Out of the Kitchen." To accommodate her desires, some of the costumes were specially made, while others had to be bought new for her by Theodore Lieben and Son, costumers.

GAMES WILL LIKELY CONTINUE
MONDAY EVENING

Delta Taus Lead Pan-Hellenic Group
—Alpha Tau Omegas and Kappa
Sigs Tie for Second Place

Activity in intra-mural basketball circles has been totally lacking this week. No games have been played since vacation.

Due to the fact that the Varsity is using the floor each night, a complete rearrangement of the inter-mural schedule had to be made which necessitated a temporary discontinuation of the games. The new schedule, which will be out today, will be posted in some prominent place in the gymnasium, and it is thought that the games will likely continue Monday. Those in charge explain that the new schedule is arranged so that the games will be finished the last of January and the championship matches will be played off before the end of the semester.

In the pan-hellenic group the Delta Tau Deltas are leading with a percentage of 1,000, the Alpha Tau Omegas and the Kappa Sigmas are next with a percentage of 800, and the Betas and Sigma Nus are third, both with a percentage of 600.

In division A, the Elkhart club has a percentage of 1,000, being the only one in the division with a clean slate. Glenwood club is second with a percentage of 800, and the Erwin Independent is third with the percentage of 666.

In division B, the Y. M. C. A. and the Phi Delta Taus are tied for first, both with a percentage of 1,000. The first and second battalions are tied for second, both with a percentage of 666, while the Boomerang club and the Miami county club with a percentage of 600 each are tied for third.

A number of the teams still persist in failing to report the results of their games to the athletic office. It is decidedly to the advantage of the winning team to have the score recorded because when scores are not turned in the game is simply dropped from the records and thus it works to the disadvantage of the winners when the percentages are figured.

According to Coach Knoth, who is in charge of intra-mural basketball, the team winning the finals between division A and B will receive either a medal or a loving cup, depending upon what class of organization wins. If a local fraternity should win, a cup will probably be awarded, but should an independent team win medals would not do so. The winner of the pan-hellenic division will receive a new loving cup and also the old pan-hellenic cup which has been in use for several years, and of which the Delta Taus already have the first two legs. Should they again win this year the cup will be theirs permanently. The coach said there would be nothing awarded to the team winning over all the divisions.

DE KOVEN CLUB RECEIVES HONOR

TAKEN INTO THE PHI MU ALPHA
FRATERNITY

Organization Is Professional—Purpose Is to Promote American Music

The De Koven club, an organization of men of this college who are interested in music, has recently been taken into the Phi Mu Alpha fraternity. This fraternity has chapters in all parts of this country and has a high standing in musical circles. The fraternity is professional in its nature and the requirements are that the men must be interested in music. The purpose of the organization is the promotion of American music.

The new officers of the fraternity are, president, Walter Knapp; secretary, Marion Smith; treasurer, George Bush. There are several members of the faculty that are members of this organization. They are A. E. Westbrook, A. L. Lovejoy, H. P. Wheeler, and R. B. Williams.

The Kansas chapter of this fraternity will be installed the latter part of February.

Rubber Stamp Brings Three Student Love Affairs To Sad Untimely End

"Use Pure Bred Sires"

Sure it's a good slogan for the farmers of Kansas, but it's a darned poor stamp for a love letter. Just how would you like to write a letter to your best girl or gentleman friend, and have the postmistress stamp on the slogan, "Use Pure Bred Sires?"

Well, that is exactly what has happened during the last week to many letters, and from all appearance at least, three blissful and happy romances in the "College of Matrimony," our present popular nickname, have been blasted to smithereens.

Tuesday afternoon a youth with disheveled hair and the look on his face of one of the Old Man's own offspring, rushed through Anderson hall. He stopped in front of the post office window, and with much jesticulation began to vociferate incoherently at Miss May.

He held up a letter and angrily told how after he had written it to "the girl," she had returned it to him unopened, accompanied by a biting note informing him that all communications were now cut off. Across the back of the letter in big letters was stamped, "Use Pure Bred Sires."

Things did not end here for soon two coeds came up with the same trouble. The first one was evidently quite worried. With a puzzled look on her face, she offered the lady be-

AGGIE CAGERS PREPARE FOR SOONER GAME

SQUAD DEVELOPS STRONG
OFFENSIVE

WORK FOR SPEED AND FINISH

Coach Trying to Outfit Knostman
with Face Protection—Twenty
Men Drive Day and
Night

"We're working day and night with the basketball squad in preparation for the Oklahoma games," says Coach Knoth. "The results of the Ottawa game were not all that had been expected. We are trying to develop a stronger offensive than was displayed in the Saturday game."

Those who saw the Ottawa game are agreed that the showing of the Aggie team was disappointing, although it was playing against one of the strongest teams in the Kansas conference. The floor work of the Wildcats lacked speed and finish, and the basket shooting was not as accurate as that of the Aggie teams of the last three years. The lack of finish in the work of the team can be laid in large measure to the fact that the squad spent the first three weeks of the practice in somewhat desultory fashion, as they lacked a coach.

Coach Has Promising Material

Coach Knoth has a large squad with some promising material to work with, and with the intensive drill he is giving the men this week, should be able to build a scoring machine of the usual Aggie power. He is trying to outfit Bill Knostman with a face protector of unusual design such as was used last year by one of the Princeton university players. Should Bill be able to wear his glasses on the court, he will be one of the main cogs in the Aggie machine, for such a scheme will remove the handicap of near sighted vision that has kept him on the bench in other campaigns.

The intra-mural games for this week were cancelled in order to permit the rearranging of the schedule so the Varsity could use the gymnasium in the evenings. The squad of some 20 odd men is returning to the floor every evening after dinner for two hours' work.

Sooner Team of Veterans

The brace of games with Oklahoma next Friday and Saturday looms as two of the hardest the Aggies will play. The Sooners have poor gymnasium facilities, but to offset this they have a large assortment of veterans on their team, all of them large men. The short stature of the Cowell brothers, Aggie guards, will work against them in the Sooner contest as they will be obliged to guard large men at both forward positions. The 1920 season games with Oklahoma were an even break, the Wildcats winning at Manhattan and the Sooners at Norman. This year but two games are played with the south-erners.

Coach Bachman is issuing another call for Aggie track men to report at the gymnasium for practice. The

Wildcat team will be especially weak in the field events and men are needed badly for the weights and jumps. Coach Bachman says, "All men who are interested in track work should come out to insure a top notch aggregation for both the indoor and the outdoor meets. Every man has some time during the day when he can appear at Nichols gym for practice. I shall be on the job all day, both mornings and afternoons, and want to urge all students who have had track experience or who want to get some to come when they can."

Swanson Works On Sorghum

A. F. Swanson, '19, of the Hays branch experiment station will spend January, February, and part of March in Manhattan working on the sorghum breeding problem in cooperation with the agronomy department. Mr. Swanson is helping take notes on some 15,000 heads of a sorghum cross for the purpose of studying the inheritance of different characters. It is hoped to produce an improved variety of sorghum equal in forage value to the varieties now in use, and which will have white grain of higher feeding value.

PHI KAPPA FRAT GRANTS CHARTER

LOCAL CATHOLIC FRATERNITY
IN NATIONAL ORGANIZATION

Installation to be in Charge of Epsilon
Chapter of Kansas
University

Another of K. S. A. C.'s local fraternities has recently become national. At its convention in Boston, Mass., held from December 29 to 30, the Phi Kappa fraternity granted an Iota chapter to the local Phi Gamma fraternity located at 1031 Bluemont avenue.

The Phi Gammas were originally known as the K. of C. club and made their home at 714 Poyntz during the year 1917, and at 1521 Leavenworth in 1918 until disbanded by the S. A. T. C. In the spring of 1920 the club took the name of Phi Gamma and purchased the property at 1031 Bluemont which is now its present home.

The installation, which will be in charge of the Epsilon chapter of Phi Kappa at the University of Kansas, will be held some time during the second semester.

Phi Kappa was organized at Brown university in 1888 to afford social opportunity to the large class of students attending the university who professed the Roman Catholic faith. There are seven active chapters, and no inactive chapters. The membership is 825.

The badge is a square shield displaying a monogram with the Greek letters arranged along one diagonal, and having a jeweled border.

COLLEGE NEEDS PASTURE LAND

NECESSARY FOR INSTRUCTION
OF ANIMAL HUSBANDRY

Legislature Will Decide Question
but Kansas Stock Men Should
Insist on Fair Deal

Unless the college secures by purchase on the part of the state the pasture land it is now using, it will lose the use of the land on the expiration of the lease this year. Since several parties are waiting for the lease to expire so that they may purchase this particularly desirable piece of land, Dr. C. W. McCampbell, head of the animal husbandry department, is anxious to have the matter settled at once and to have authorization for the purchase of the land made by the Kansas legislature which convenes in regular session next Monday.

The college must have this pasture if it is to maintain its present high standard. Without the land, the animal husbandry department would have to teach animal husbandry with books instead of animals, and that is not the kind of instruction the Kansas boy wants.

Although the board of administration has approved President Jardine's recommendation to the legislature that the land be purchased, the state auditor who knows nothing about the work of the college has stricken the recommendation from the budget. The big question is whether or not the live stock men of Kansas are interested enough in the matter to insist that their representatives in the legislature provide means which will enable the college to render the state the greatest possible service.

NORMAL AND AMES TEAMS DEBATE HERE

AGGIES INVADE OPPONENTS'
TERRITORY SAME NIGHTS

FREE TO ALL, FOLLOWING GAMES

Both Girls' and Boys' Teams Will
Debate on Question of Japanese
Immigration Legislation

The debate season this year opens Friday night, January 14, in Recreation hall, when the affirmative girls' team of K. S. A. C. meets a team from Emporia State normal. The question to be debated is: Resolved, That the United States, through Appropriate Legislation, Exclude from Immigration All Persons Ineligible for Naturalization. The affirmative side of the question will be taken by the K. S. A. C. team and the normal team will take the negative. Those on the K. S. A. C. affirmative team are Mrs. Elizabeth Winter, Miss Ada Songer, and Miss Clementine Paddelford. On the normal team are Miss Mildred Chatterton, Miss Nora Mothes, and Miss Josephine Weaver.

Negative Team to Emporia
While the team here is taking the affirmative, the K. S. A. C. negative team will be debating the negative side of the same question at Emporia. The girls on the negative team are Miss Marie Correll, Miss Luella Whan, and Miss Luella Sherman.

The judges for the debate here are Dr. J. C. Peterson, chairman, Prof. Henry Shinn of the department of public speaking at Kansas university, Supt. J. H. Clements of the Junction City schools, and Dr. A. T. Walton, head of the Latin department at Kansas university.

Men Debate Ames

Saturday evening, January 15, the men's affirmative debate squad of K. S. A. C. will meet the negative team from Ames in the domestic science room. The subject for the debate is: Resolved, that the United States Should, through Appropriate Legislation, Prohibit All Further Immigration of Japanese into This Country. The K. S. A. C. affirmative team is Charles W. Howard, H. R. Richards, and J. Wheeler Barger. The negative team from Ames is made up of Karl Wagoner, J. W. Sutherland, and D. D. Offringa. Judges for this contest are Prof. I. Victor Iles, chairman, Prof. Henry Shinn of K. U., Supt. J. H. Clements of Junction City, and Supt. W. S. Huesner of Salina.

The K. S. A. C. negative team will debate at Ames the same time. The men on this team are Vincent Cool, Arnold Englund, and Ellis Kimball.

Debates Start After Games

Both the debates here will take place immediately after the basketball games. This will be about 8:45. No admission will be charged. The subjects are ones which at the present time are occupying a prominent place in American politics and should be of interest to everyone. The time for the main speeches is 12 minutes with five minutes for the rebuttals. The extemporaneous system of speaking will be used instead of the previous system of memorizing the speeches. The Ames debate is probably the most important that the men's debate team will have this year and the fact that Ames is the sister agricultural college to K. S. A. C. in the Missouri valley makes the contest doubly interesting.

Ship Livestock To Denver

Livestock of the Kansas State Agricultural college which will be entered in the Western National Livestock show held at Denver this month, was shipped from Manhattan last week. Only cattle and sheep will be shown. The three ranking steers of the college entries at the International Livestock show held at Chicago in December, including the champion Galloway, were included in the herd of eight head which will represent the college at the western show. Twenty-five sheep, none of which have been exhibited before, will make their debut into the show ring in the face of nation-wide competition, at the Denver exhibition, in an attempt to bring back a few more blue ribbons to the animal husbandry department of K. S. A. C.

H. E. Howell of Abilene, was a week end guest at the Sigma Nu house.

Tom Neely of Abilene, spent the week end at the Sigma Nu house.

Miss Frances Batdorf was a dinner guest at the Alpha Delta Pi house Monday.

THE KANSAS STATE COLLEGIAN

The Student Newspaper of the Kansas State Agricultural College
Published Every Tuesday and Friday of the College Year.
Entered at the Postoffice of Manhattan for transmission through the mails as second class matter.

Address all communications regarding stories, etc., to the editor of the Collegian and all letters in regard to advertising and subscription rates to the business manager.

TEN DOLLARS SAVES ONE LIFE

"Even if we give money for things here, we can't get no flour, sugar, butter, eggs, or nothin' at all. The people here can't get no wood or coal to burn. We will die of hunger or freeze to death."

This is what a little Slav girl says in a letter published in the Literary Digest of January 8. This gives only a slight idea of the conditions prevailing in the war devastated countries of Europe. And this little girl is only one of three and a half millions of children who are starving and freezing and who except for our aid must die. Think of it! Three and a half millions of babies dying for lack of food and shelter while we do not deny ourselves even luxuries.

These little children have only one hope, but they cling to that in a great and beautiful confidence, that America will come to their relief. We cannot live apart from the world and if we could what kind of a Christian nation would we be if we fail to listen to this great call of three and a half millions of God's helpless children, if we close our eyes and ears to this great demand of duty?

If the small amount of \$10 will save a life of one of these little children, can we afford not to give as many of the \$10 units as we can spare even through sacrifice?

The American Relief committee are forced through lack of funds to restrict the food to the extreme cases. Only those children who have reached the limit of hunger endurance are fed by the American kitchens, one meal a day. They come to the American kitchens in long lines and some of them must be turned away. They are not like the children we see in America. There are no healthy or happy faces in the long lines. Their faces are drawn and hunger marked, their bodies shrunken and emaciated. They are undernourished and underdeveloped, physically and mentally.

If food can be obtained for them, they will gradually regain their health and strength but help must come soon or it will be too late. We can all do something to save, walk and save carfare, refrain from one package of cigarettes, a coke, or candy. Remember only \$10 saved will save the life of one child!

CAMPUS IS NO GRAZING GROUND

Under the head "A Cause for Pride," a recent editorial in the Daily Drovers Telegram calls attention to some of the achievements of this college. In another article the same paper points out to its readers—farmers and livestock men—the inestimable worth of the animal husbandry department of the college to the livestock industry of the mid-west, and the necessity for keeping up the investigations and work in feeding, breeding, livestock diseases, and other vital problems of the stock raiser.

The writer realizes the danger threatening the college if adequate funds for carrying on its important work are not provided. He recognizes the importance, the practical value of its work, and points out and holds up to the light of publicity the absurdity, the fallacy, of a state trying to economize at the expense of that industry upon which the future greatness, the very existence of the state rests—agriculture.

And yet, our state auditor, Mr. Fred Knapp, having suddenly become imbued with the spirit of economy, and without personal investigation of conditions here, has recommended to the legislature that the appropriations asked for by President W. M. Jardine, be reduced by approximately 40 per cent. For instance, the lease on the pasture lands used by the animal husbandry department has expired and the owners refuse to renew, necessitating purchase of the pastures. An appropriation for this purpose was included in the president's report. Mr. Knapp, never having taken the trouble to investigate, evidently thinks that the livestock can graze around the class rooms or on the campus. Or perhaps he believes that books alone will teach a man how to raise cattle—at any rate, Mr. Knapp disapproved of the request. Let us hope that our legislators have a broader vision and will not be greatly influenced by the recommendations of Mr. Knapp.

AGGIE DANCERS ON PROBATION

Aggie dancers are on probation. Whether or not the regular student dances at "Johnnie's" can continue depends entirely on the manner in which the students conduct themselves at the hall during the next month.

It is unfortunate that such a condition should exist, unfortunately that students should conduct themselves in such a way that outside regulation becomes necessary. But now the matter of student dancing has gone beyond the "hill." The welfare board members who have charge of all public dance halls in Manhattan declare that the student dances are worse than any others in the city.

At a joint meeting of S. S. G. A., student affairs committee, and the city Welfare board the Welfare board strongly favored forbidding any more student dances to be held at Harrison's. The board was finally persuaded to allow one month's probation.

Cheek to cheek dancing, lip to lip, the toddle, the shuffle—all must go if dancing is to continue as a student recreation at K. S. A. C. Maybe it was funny when only the faculty and S. S. G. A. objected, but since the city has stepped in, the matter becomes one for the serious consideration of every Aggie dancer.

Each student should make it his business to help settle the matter satisfactorily, and to improve dancing at student affairs. An investigation of this sort reflects upon the student body, not only here in Manhattan, but all over the state and among other institutions; it reflects upon the standing of the institution as

a whole, upon the organizations, and upon the individual students, many of whom are not to blame.

The S. S. G. A. is solidly behind the Welfare board's mandate. The majority of the students realize that the forms of dancing which have become popular here can be tolerated at no reputable dance hall. And they have one month in which to redeem themselves.

So, even if you, personally, don't enjoy dancing unless you can break all standard rules, there are lots of people who do. Are you going to deprive them of pleasure, through your selfishness? Will we mend our ways? Or will dancing at K. S. A. C.—only so recently permitted under college sanction—become past history?

VAMPS KEEP OUT OF THIS KITCHEN

You who are tired of Theda Bara and her seven husbands, you who are tired of blood and thunder, go to see "Come Out of the Kitchen." There is not a murder in this play, there is not even a shot fired, unless it be orally. In fact it is everything a play should be to please, and give you your money's worth.

The girls are fair and beautiful, the men are handsome and chivalrous and if you are a pessimist the story will make you happy. It will make you believe in things again and it may turn you into an optimist. So prepare to be entertained in the best possible way when you go to see "Come Out of the Kitchen."

"Come Out of the Kitchen" is written by Alice Duer Miller, who also wrote "The Charm School," which was shown at Kansas City during Christmas vacation. The presentation of the play which is a three act comedy will be remarkable in that the cast is composed almost entirely of freshmen students.

The Purple Masque is paying a royalty of \$80 in order to get the play here. By attending the play January 21 students may show, and it will be no unpleasant duty either, that they appreciate the efforts the Purple Masque is making to secure other than those hoary-with-age plays for K. S. A. C.

JUDGE CONTEST IS OPEN AGAIN

SCHOOLS COMPETE IN COLLEGE WIT NUMBER OF MAGAZINE

Cornell Wins Trophy Last Year—Offer Two Individual Prizes—Material Due February 1

Judge magazine, which published its first annual College Wits number last year, is offering a large silver loving cup to the college having the most points in a contest it conducts for the purpose of getting material for this number.

The material the magazine wants and is willing to pay for is poems, short essays, and jokes. Each article accepted must bear the name of the contributor, his class in college, and the name of his school.

Cornell won the cup last year. Before the cup becomes the permanent property of any college that school must win it three times in succession.

Judge also offers two individual cups in addition to the college cup. One of these trophies is offered to the artist who submits the best drawing. The other cup goes to the author having the best article published. Charles Baskerville, Jr., of Cornell won the cup for having the best drawing last year, and Albert R. Stewart of Dartmouth won the cup offered to the author of the best article.

The rules of the contest are that the contribution must be original and exclusive. The material must be at the Judge office by February 1. Color designs must be in two weeks earlier. Address all material to College Wits Contest, Judge Magazine, 225 Fifth avenue, New York.

PLAN TO PUSH WORLD FORUM

RELIGIOUS FEDERATION HAS FIRST MEETING

Speakers of International Fame to Be Here for Convention in February

The purpose of the Religious federation of K. S. A. C. is to promote cooperative religious effort, to create an equal social and religious program in the college, and to provide for religious leadership. Monday night the first meeting of this federation was held. Plans were made and committees appointed to promote the World forum which will be held here February 18, 19, and 20. President Jardine appointed Prof. J. W. Searson as his personal representative. Professor Searson said that he was heartily in sympathy with this program.

Some of the speakers who are to be here are Bishop Waldorf, one of the strongest men in the Methodist church, according to Dr. A. A. Holts, President Montgomery of Muskingum college, Clara Pinkham, who was to have been here last year but on account of illness was unable to be present, and David R. Porter, who has charge of the International student work. Fred B. Smith may also be here, as he has written to Doctor Holts about this special program. Mr. Smith is president of a hardware company but he devotes three months of the year to religious work. Mr. Smith and Raymond Robins are forceful speakers, who have won international fame.

Seven churches and the Y. W. C. A. and Y. M. C. A. are members of this federation. The ministers of

the various churches gave short talks at the meeting Monday night in which they expressed the idea that this would be a fine thing for K. S. A. C. It is hoped that the chamber of commerce will aid this movement. Prof. J. W. Searson and Mr. Reid assured the members that the Rotary club would be back of the movement although they were not direct representatives of the club.

During the evening committees for this year were appointed. The committees with chairmen are as follows: promotion, Frances Whitmire; program, Herbert Moyer; publicity, M. J. Lucas; entertainment, A. B. Collom; finance, Paul Roote; Baptist, J. W. Barger; Presbyterian, Percy Dupuy; Congregational, E. H. Teagarden; Christian, Clinton Guy; United Presbyterian, Mildred Pence; Episcopal, Prof. R. W. Conover; Methodist, S. D. Capper; Y. M. C. A., Ray Knox; Y. W. C. A., Frances Whitmire.

Miss Mercedes Sullivan of Lawrence spent the week end at the Alpha Delta Pi house.

Dinner guests at the Alpha Delta Pi house Sunday were Tom Neely and Ross Mowry.

Dr. R. K. Nabours and Prof. R. B. Williams were dinner guests at the Phi Delta Tau house Sunday.

Paul Tupper spent the week end in Salina visiting with Harold Layton.

Dean R. A. Seaton drove to Manhattan with his family last Sunday to visit with relatives.

Sunday dinner guests at the Kappa Sigma house were Miss Mercedes Sullivan of Kansas university, Miss Elizabeth Meade of Emporia, Miss Lillis Harkey, and Miss Velma Meserve.

A. C. Hancock and W. W. Eckerman of St. Francis, were week end guests at the Kappa Sigma house.

Lloyd Beardsley was called to his home in Russell last week.

Hurst Aus of Fort Scott was a week end guest at the Kappa Sigma house.

Dr. Helen B. Thompson will speak to the Community club at Concordia on Saturday, January 15. She will talk on the problems of nutrition.

COEDS HIKE FOR W. A. A. POINTS

WALKING IS POPULAR SPORT AT K. S. A. C.

Thirty-three Girls of Original 50 Have Finished Schedule—Give 45 Points Next Term

The fact that a total distance of only 30 miles entitles the coed to 10 points toward a K sweater has made hiking one of the most profitable enjoyments of the would-be W. A. A. girl, or the co-ed who already belongs to the association.

Of the 50 girls who started on the hike schedule this fall, the 33

who have attained their points are: Helen Larson, Nellie Jorns, Josephine Hemphill, Edna Hoke, Florence M. Johnson, Frances Smith, Eunice Anderson, Elmira King, Dorothy Lukert, Helen Case, Nille Kneeland, Grace Turner, Anna Best, Betty McCain, Ethel Benfield, Grace Herr, Beatrice Gaither, Lenora Doll, Alice Marston, Margaret Shrader, Amy Lemert, Marie Correll, Frances Mardis, Grace Schwanndt, Dorothy Schultz, Beulah Weaver, Eleanor White, Hazel Gardiner, Angela Floersch, Ruby Saxton, Florence Barnhisel, Bertha Faulconer, and Corinne Thiele.

Because of a change in the rules of the W. A. A., the total hike distance of 30 miles next semester will entitle the hiker to 15 points instead of 10 points as it was this semester. Also points will be counted for any additional miles over the first 30.

Oh boy!— Sorry, but I gotta be leaving. I forgot to get my copy of "Royal Purple"

SUMMER CAMPS TO HOLD AGAIN

ROOKIES REPORT INTERESTING 1920 PROGRAM

Infantry Will Meet at Fort Snelling
—Coast Artillery at Fort
Winfield Scott

The military department of the college received notice from the war department that the summer camp for the advanced course students in infantry will be held again this year at Fort Snelling, Minnesota, and that for the coast artillery unit at Fort Winfield Scott, California. The camps will be held for six weeks beginning about the middle of June.

Fort Snelling is seven miles from St. Paul and in the midst of a number of fine lakes offering many advantages for a pleasant summer. All students who attended the camp last year reported it an excellent location, with delightful weather. Fort Winfield Scott is part of the reservation of the Presidio on the southern margin of the harbor of San Francisco in the northwest suburbs of the city.

Mileage at the rate of five cents a mile to and from camp, food, clothing and shelter, medicinal and dental attention, excellent care and wholesome surroundings, a summer program that will be interesting, and a dollar a day for spending money, is quite a little for any student to turn down. Seeing and mixing with college men from all parts of the country is another great value to all who attend the camp.

The war department intends to make the 1921 camps far superior to those of 1920 and is already putting them in shape so that every detail that makes for comfort and interest of the student will be provided for.

IMPROVE APPEARANCE IN ROOM OCCUPIED BY FORUM

Names of Debate Teams of Recent Years Have Been Put Up

Extensive improvements have been made in the room in Fairchild hall in which Forum, the honorary debating society holds its meetings.

New curtains have been put up at the windows, and the room has been generally cleaned and refurnished. The placards giving the names of members of debate teams at the College have been taken down and cards bearing the names of teams of recent years have been put up.

The appearance of the hall has been greatly improved and the hall is made a much pleasanter place for the Forum meetings according to Miss Marguerite Hammerly, president of the organization. It is possible that Zeta Kappa Psi, honorary debating fraternity for women, and Pi Kappa Delta, honorary men's debating fraternity may hold their meetings in the Forum hall at a later date.

A great improvement over the thumb tack poster formerly used in Nichols gym are the two large bulletin boards hung near the entrance to the girls' dressing room. On one board may be found all the announcements of the instructors of that department. The other board is used by the W. A. A., the Loyalty club, and by any one desiring to post announcements concerning girls' athletics.

The department of horticulture have completed the plans for the development of the high school grounds at Ottawa. They are now working on plans for West Park at Wellington.

The Horticulture Club met Tuesday evening and elected the officers for next semester. Ham Burger was elected president, George Jennings vice president and D. R. Hooton secretary and treasurer.

Methyl And Ethyl Alcohol Are Hard To Keep Straight

While browsing through the New International Encyclopedia in search of some rare chemical information, an upperclassman came upon a couple of pages which were headed, Methyl Alcohol. Between these pages there was an unsealed, unaddressed letter, written upon the theme paper which is furnished by the college, and undoubtedly left there, forgotten by its author. The letter reads as follows:

Dear Dad and Mother: I have never went into detail to tell you of my course. I thought I was taking a lot of things but really chemistry is all we freshies study.

We read three volumes of the most interesting stuff. There is rapid and intense action taking place continuously. U kno, I was always fond of action—well, they act and react. Some of the most important members of the books behave together, and they just cut up terrible. I'm readin' the third book now. It's most as interesting as "Tarzan of the Apes." There are two girls in this book I can't keep straight. They are Ethyl and Methyl Alcohol.

Methyl Alcohol is the oldest, but Ethyl is more popular. Then there's Ann Hydride, a dry sort of a person. We have some radicals in these books, too. Indeed there are an awful lot of radicals in the last book. I wonder if those radicals wouldn't work on the other members to overthrow peaceable conditions?

Wouldn't it be awful if an OH radical would unite with an Ethyl C₂H₅ and form grain alcohol? They then would be known as Mr. and Mrs. Ethyl Alcohol, only Ethyl would still be most important. That proves to you, mother, that women are coming to the front, doesn't it? I'll bet Ethyl voted Harding, too.

I'll tell you some more about them later, so fatten up a hen, for I'll be home soon, over a week end.—Your most learned daughter, Gypsie.

Lieutenant G. W. Brower, the officer of the new veterinary unit, R. O. T. C. has just recently reported for duty. Lieutenant Brower's duties will include the instruction of the veterinary students in the application of veterinary medicine to military science, and, more definitely, the principles of army meat inspection.

Fred Merrill, formerly a professor in the horticultural department of this college, was a visitor on the hill Monday. Mr. Merrill is now with the Central States Orchard company with his headquarters at Kansas City, Mo. He stated that he spent most of his time in traveling and looking after the interests of the company throughout the central west. His family is located at Kansas City.

Miss Mary Cruzen was a dinner guest at the Aeacia house Sunday.

TEST SEEDS FOR KANSAS FARMERS

MRS. E. P. HARLING IN CHARGE OF WORK

Service Given Free—Reports Compare Well With Those of Government

A valuable service is rendered Kansas farmers and seed houses by the Kansas experiment station through the work of its seed laboratory, maintained by the department of agronomy and directly in charge of Mrs. E. P. Harling.

Although Kansas has no pure seed law which requires all seed to be tested by the state seed laboratory before being offered for sale, many Kansas seedsmen and even more Kansas farmers avail themselves of this free service each year.

In the case of the purity tests, that is, tests which involve the identification of noxious weed seeds and other varieties of crop seeds, the college identified 30 species of weeds and 13 different crop seeds, while the government, using the same samples, was able to find only 13 varieties of weed seeds and eight varieties of crop seeds. It is evident from this report that the college is doing thorough work and that Kansas farmers and seedsmen can safely place a great deal of dependence upon the reports sent out from its laboratory.

Mrs. E. P. Harling, who is in charge of the laboratory and also teaches a class in weed and seed identification, is thoroughly familiar with the seeds of the important grasses and legumes as well as of most of the weeds found in Kansas. Just now Mrs. Harling is conducting some important experiments in connection with what are known as "hard seeds" in sweet clover and alfalfa.

THETA SIGMA PHI TO EDIT SPECIAL CO-ED COLLEGIAN

To Be Entered in "Best Newspaper in Kansas" Contest Farm and Home Week

Theta Sigma Phi, women's journalistic fraternity, will enter a special co-ed edition of the Kansas State Collegian in a "Best Newspaper in Kansas" contest being conducted by the extension division of K. S. A. C.

The newspapers are to be judged on, first, the best front page make-up and second, for the best handling of community news. Two copies of the paper must be submitted. All newspapers of Kansas are eligible. A prize of \$25 will be given to the winner. The judges are disinterested persons outside of Kansas.

The announcement of the winner will be one of the features of "Newspaper Day," February 21, during Farm and Home week.

Miss Ruth Floyd and Miss Alice Dewitt were dinner guests at the Chi Omega house Tuesday evening.

SIEGLINGER DOING EXTENSIVE WORK IN SORGHUM BREEDING

Located At Woodward, Okla.—Holds Master's Degree In Agronomy at K. S. A. C.

J. B. Sieglinger, who took a Master's degree in agronomy at K. S. A. C. in 1914, and who is now in charge of grain sorghum work at the Woodward, Okla., field station of the U. S. D. A. has been doing extensive work in sorghum breeding. He is making special studies of the inheritance of plant, head, and grain characters in sorghum crosses. This work is carried on in variety tests, rate and date seeding, and cultural methods with the grain sorghum crops.

Mr. Sieglinger has been in the office of cereal investigation of the bureau of plant industry since 1914. Since the government experiment station at Amarillo, Tex., has been closed, due to a decrease in funds for field work, the Woodward station has been made the southwest field headquarters for all grain sorghums.

Dinner guests at the Sigma Phi Delta house Sunday were Prof. and Mrs. C. W. Colver and Mr. and Mrs. R. B. Spillman.

Williams Manages Orchard Meeting

A series of interesting orchard meetings has just been held at Belle Plaine by L. C. Williams, extension horticulturist. Mr. Williams visited several hundred acres of young orchards, and gave talks on pruning, cost of spray machinery, and insecticides. Demonstration meetings at Belle Plaine were first started by George O. Greene from the extension division. Methods used by Mr. Williams in carrying out the demonstration have proved effective and popular.

Miss Dorothy Riddle of St. Paul, Minn., was a week end guest of Genevieve Mott at the Pi Beta Phi house.

Miss Florence Barnhisel, Miss Sibyl Watts and Miss Curtis Watts were dinner guests at the Pi Beta Phi house Sunday.

Prof. and Mrs. Harold Guilbert were dinner guests at the Sigma Alpha Epsilon house Sunday.

Prof. and Mrs. H. H. Haymaker are the parents of a baby girl born Saturday, January 8.

Mr. and Mrs. Joe Cassidy are the parents of a baby girl born December 21.

Miss Maurine McLachlin has withdrawn from school and returned to her home at Paola.

ARE YOU A "WISHER"?

Many people go through life "wishing" while others start saving and then get the good things that the other people "wish" for.

In which class are you? Get in the saving class. It's easy. A dollar starts you at this bank. We will pay interest on your savings no matter how small they may be. Before long you'll have enough to be really proud of.

Life is cruel. It hasn't much time for the "wisher." But to the person who is backed by a little capital the world opens the doors of opportunity.

Start saving now. That one thing takes you out of the "wishing" class and puts you in the "having" class.

PROFESSIONAL DEGREE TO MANY ALUMNI ENGINEERS

Must Have Three Years Of Practical Experience After Completing College Course

This year the number of engineering alumni who are applying for their professional degrees is far in excess of that of any previous year.

The professional degree closely resembles the master's degree given in other divisions of the college. The two differ however, in that the master's degree is given for residence work following graduation, while to secure his professional degree the engineer must have had three years of practical experience after completing the prescribed college curriculum.

In addition, he must declare his candidacy and file with the dean of engineering a detailed statement of his professional study and experience, and an outline of the thesis he is going to prepare on some phase of his experience, both of which are to be in the hands of the dean not later than the November 15 next preceding the June commencement at which the degree is to be conferred.

The mechanical and civil engineers lead the list of applicants from all branches of engineering in college. Their names with present locations follow: A. M. Butcher, electrical engineering, '16, superintendent of the Central Dehydrator, Empire Pipe Line company, Eldorado; Charles A. Frankenhoff, mechanical engineering, '18, sales manager of Abbot-Converse company, Houston, Tex.; C. M. Haines, mechanical engineering, '09, works manager, Mid-town Fire Arms and Specialty company, Middletown, Conn.; G. W. Hanson, mechanical engineering, 1900, consulting engineer, Wichita; A. J. Mack, mechanical engineering, '12, professor of steam and gas engineering, K. S. A. C.; I. O. Mall, mechanical engineering, '18 consulting mechanical engineer, Gate City Windmill Manufacturing company, El Paso, Tex.; F. E. Gilmore, civil engineering, '16, member of the firm Fosters and Gilmore, Petroleum engineers, Tulsa, Okla.; M. E. Hartzel, civil engineering, '14, Petroleum engineer, Flagler, Colo.; H. W. Tyrrell, civil engineering, '17, Kansas highway commission, Montgomery county.

The cast of the Purple Masque play spent Tuesday in Lawrence. They attended the university Dramatic club play. They were accompanied by the coach, Miss Florence Helzer.

L. E. Conrad, professor of civil engineering, is attending a meeting of highway engineers in Chicago, Ill., today and tomorrow.

Attacks on Hungry Cafeteria Mobs Are Planned by Wily Cub

Pity the poor journalist. Even here in K. S. A. C. the path of a reporter is rough and rocky at best, yet added to all the trials of his ordinary daily grind the news hound finds that he has to buck a certain other faction before he is able to rush in with his latest scoop just before noon or evening. This faction is the hunger crazed cafeteria line.

The reporter may suddenly get a bright idea (as does sometimes happen on rare occasions) just before noon or 5 o'clock. He rushes madly toward Kedzie hall only to be confronted by a solid line of voracious human beings. He stops, stops quite abruptly, in fact, but duty is duty, so after a moment's speculation as to the best mode of attack he elbows toward the door, his back pierced and his coat riddled by the suspicious glances of those he has left behind. He eventually reaches the closed door, and after much twisting and turning of door knobs and knocking back and forth, the enemy on the inside begin to fear that they may be ruffling some instructor's temper so they give way for a moment. Seizing the advantage the hero lunges through, takes the defenders completely by surprise and gains the coveted stairway.

He rushes to the editorial rooms, corals a typewriter and—nothing happens, nothing but terrible, excruciating agony—the reporter has forgotten the story. The idea has been knocked into eternity by the cafeteria fiends, and after all his heroic struggle he and the Collegian come out losers.

Thus does each day find some ambitious cub suffering. But the reporters are profiting by experience, they are contemplating mass action, and soon open warfare may result, or else they'll use a ladder.

Timely Topics

We are showing Ice and Roller Skates for boys and girls.

Tools of all kinds for Auto and Tractor Mechanics.

Guns, Rifles, Hunting Coats and Shells for the rabbit hunters.

BEYOND THE HILL

Among the buildings which are needed by the University of Kansas, according to the biennial report of Chancellor E. H. Lindley, are the following: a medical building, an additional saw-tooth unit for electrical engineering, an addition to engineering, an addition to Fowler shops, an addition to geological building, a women's building, a unit for the library, a student hospital, a building for the music department, a greenhouse, the completion to the administration building, and a larger appropriation for the hospital in Rosedale.

The Pan hellenic council at K. U. has recently adopted a rule that no sorority freshman may have a social engagement before 4 o'clock in the afternoon. This is intended to prevent the new girls from obtaining the wrong impressions of university ideals from too many dates. Young high school graduates do have quite susceptible minds, it's true; the rapidity at which they master the art of making spit curls is ample proof of that.

In order to subordinate all fraternity organizations of the University of Kansas for the first two weeks after school starts next fall, the Pan hellenic council of Kansas university has decided to bar all fraternity pins

on the campus for that period of time.

Practically the whole student body at the Kansas State normal is receiving a first hand knowledge of trench life. An epidemic of French itch has recently broken out at the school, and hasn't even exempted the faculty; the whole school is busy scratching. Carl Dent of the extension department, who had the itch during the war has written to his old army doctor for a remedy.

When the football team of Ohio State went on its trip to Pasadena, Cal., for its post-season game with the University of California, on New Year's day, 350 gallons of water from Columbus went with the team so the men could have the same drinking water in their Pacific coast training that they had while they were in Columbus. L. W. St. John, director of athletics, considers drinking water important enough to go to special efforts to provide good old Columbus water for the men on every trip.

Indiana university has a squad of 45 men on its wrestling team, most of whom have had wrestling experience, which will be used in a wrestling meet with Ames, Iowa. A regular wrestling season is observed by these two colleges.

Ames receives radio dispatches of the basketball games which are played away from the home court this season. A special auditorium

has been provided for the purpose of reading of the dispatches and they have in this manner been given wide publicity.

The Inter-Collegiate News service has been conducting an investigation of the number of students in American institutions of higher learning for the past few years, which revealed several interesting features. The percentage of gain in 1920 over 1919 is much smaller than was the percentage of gain for 1919 over 1918 which is probably due to the signing of the armistice. Southern colleges and women's colleges all over the country were the only ones which showed a decrease. The smallest gains in enrollment were made in the eastern colleges. There has been a steady de-

crease in such large universities as Yale, Tulane, Trinity, Butler, Hamline, and Roanoke.

Balled Of Eat Or Get Left
One came from the east, and one from the west, but never the twain could eat,
Till a hundred and fifty fellow Aes had traveled the dinner beat—
And then there was neither soup nor beans, bread nor butter, nor meat,
And the two strong men stood face to face—what they said, I'll never repeat.

Benny Price of Reading has enrolled in the short course. He is member of the Sigma Alpha Epsilon fraternity.

"CHINA NIGHT" TO BE JANUARY 22

CHINESE STUDENTS TO GIVE TYPICAL ORIENTAL PROGRAM

Proceeds to Relieve Suffering from Famines in East—Admission 25 Cents

The Chinese students of this college will put on a typical Oriental program called "China Night," in the college auditorium next Saturday evening, January 22. The program will be unique and will be conducted by the Chinese themselves. Chinese music and antiquated Chinese customs will be exhibited. Tickets will be on sale next Monday, January 17, at 25 cents each. All the proceeds will go to the Chinese Famine Relief fund.

President W. M. Jardine said, "This entertainment will be worth a good deal more than the price of admission. The enterprise is a worthy one and deserves the support of the entire student body and faculty."

China is suffering from one of the greatest famines in the history of the world. Five provinces with a total area of 90,000 square miles in northern China, are in the grip of destitution. About 35,000,000 people are being affected by the terrible drought which has extended over a period of two years. If no efforts are made to relieve this appalling distress, 25,000,000 Chinese will severely suffer, and several millions will perish.

JUDGING TEAM TO DENVER NOW

WESTERN LIVESTOCK SHOW TO START JANUARY 15

Will Be Close Contest—Five States Entered—K. S. A. C. Sends Fat Steers and Sheep

The animal husbandry department is now doing everything possible to prepare for the National Western Livestock show at Denver which starts Saturday of this week. Aleck Watt, the college cattle herdsman, and Tom Deane, the college shepherd, left the first of this week for Denver with nine head of fat steers and 25 head of well finished sheep to be shown in hopes of bringing back some of the prize money.

The stock judging team under the direction of Prof. F. W. Bell has been having some hard workouts in preparation for the coming contest at Denver. The team will be handicapped by the loss of Charles Nitcher and K. R. Crowe, who are unable to make this trip. They were both with the team at the International show at Chicago. The men who are to make the trip are E. D. McCollum, Merton Otto, O. R. Peterson, H. E. Mather, and Homer J. Henney.

Saturday the team took a trip out to the Blumont farms east of Manhattan, where they were able to work on the herd of high class Shorthorns, owned by W. A. Cochel, formerly head of the animal husbandry department.

The stock judging contest at Denver will probably be close as teams are entered from Nebraska, Colorado, Montana, Wyoming, and Idaho. The Nebraska team is a very strong team as they placed second at the International while the Kansas team ranked fourth.

BURN 1,000 MILES OF LAND TO DESTROY CHINCH BUGS

E. G. Kelly Prepares Articles on Controlling Spread of Harlequin Cabbage Pests

E. G. Kelly, extension entomologist of K. S. A. C., estimates that over 1,000 miles of land have been burned during the long period of dry weather, by Kansas farmers in at-

tempting to get rid of the chinch bug.

These reports come from 35 counties, and show conclusively that the farmers do not intend to be bothered with chinch bugs next year.

Mr. Kelly has also prepared for distribution over the state a timely article on the Harlequin Cabbage bug, setting forth its life habits and methods for controlling its spread. The bug is exceedingly harmful to cabbage and similar plants, and the article on its extermination should be of great benefit to the farmer.

GILBERT AND GRIEST WIN \$25 COVER DESIGN PRIZE

Color Page Is For Magazine Published Annually by Department of Architecture

E. E. Gilbert, senior, and T. R. Griest, junior, in the department of architecture won the prize of \$25 offered by the department for the best design for a cover to be used in the annual publication of the department.

The publication will be called the "Kansas Architectural Record" and is to be published annually. The Record will include over 40 cuts of students' work in design as well as various information in regard to the college and the department of architecture.

The same cover design will be used from year to year so that the winning of this prize will perpetuate the creditable work of these two men.

Nichols Accepts Position

R. C. Nichols, who has been doing publicity work for the college the past month, has accepted a position as field representative for the Co-operative Manager and Farmer, a trade journal devoted to farmers' co-operation, published at Minneapolis, Minn. Part of Mr. Nichols' time will be spent in soliciting advertising in market centers through the middle west. He will also do some editorial work.

Interviews Junior and Seniors

L. E. Call, head of the department of agronomy, is interviewing all the junior and senior students regarding their assignments for the next semester. Professor Call is endeavoring to help the students choose the subjects which will be of the most value to them after graduation.

E. L. Rhodes, farm management specialist in the extension division, returned Monday from a conference of farm management demonstrators of the northern and western states, held in Washington, D. C.

Lost: Beta Theta Pi pin. Finder return to 460 and receive reward. 2t

The department of agronomy has recently received a request for men trained in agronomy work. One of the letters offers a fellowship in plant breeding at the Michigan agricultural college, paying \$600. Another opening is the position of professor of farm crops at the University of West Virginia which pays \$2,600. The other offer is that of instructor in plant breeding at the same institution, paying \$2,200.

E. F. Chilcott, of the United States office of dry land agriculture, has recently interviewed nearly all the seniors in agronomy with the idea of locating several men for the United States department of agriculture field stations in the great plains area to work next spring and summer. Oregon expects to enlarge its experimental work in crop breeding and has made inquiry as to suitable graduates from K. S. A. C. for those positions.

A. F. Turner, assistant county agent leader, was in Greenwood county January 5 and 6, and in Miami county January 7 and 8, doing organization work for the farm bureaus of those counties.

SOCIETY

SOCIAL CALENDAR

Friday
Oklahoma-Aggie basketball game in gym.
Girls' debate with Emporia normal, in Recreation center.
Royal Purple dance at Harrison's.

Saturday
Oklahoma-Aggie game in gym.
Men's debate with Ames, in Home Economics rest room.
Junior Class party in Recreation hall.
Delta Tau Delta house dance.

Delta Zeta has pledged Miss Loea Johns of Shaw, freshman in home economics.

Kappa Delta sorority have pledged Miss Alice Updegraff of Maple Hill, freshman in home economics.

Kappa Delta sorority was at home to the Delta Tau Delta fraternity Monday evening between 7 and 8 o'clock.

Sigma Phi Epsilon fraternity was at home to the Chi Omega fraternity Monday evening between 7 and 8 o'clock.

Kappa Sigma fraternity have pledged Mr. R. J. Bryant, freshman in electrical engineering and Mr. Harold Potter, freshman in agriculture.

Members of the applied mechanics and machine design department were entertained at the home of Dean R. A. Seaton, Thursday evening, January 13.

Mrs. D. C. Bice, matron at the Delta Zeta house entertained the house mothers of the fraternities and sororities Wednesday afternoon from 3 until 5 o'clock at the Delta Zeta house. Light refreshments were served by the hostess.

Quill club met Monday evening at the home of Miss Clementine Paddelford, 1017 Poyntz. Miss Elizabeth Dickens read a paper on her experiences in editing a newspaper. A two course luncheon was served at the close of the meeting.

Miss Mary Fitzgerald and Mr. Wright E. Turner were married January 1 at Waterville. Mrs. Turner is a sophomore in home economics and a member of the Kappa Delta sorority. Mr. Turner is a senior in agriculture and a member of the Sigma Phi Epsilon fraternity.

The marriage of Miss Neva A. Blanchard and Embert H. Coles took place December 29 at Sabetha. The Rev. J. B. Vernon of the Methodist church performed the ceremony. Miss Blanchard attended the University of Southern California. Mr. Coles is a junior in agronomy, president of the Aacacia fraternity, a member of the Tri K club, and junior class treasurer.

Mr. Harold R. Guilbert and Miss Frances Steele of Sharon Springs, were married at the home of her aunt December 23. Mr. Guilbert was graduated from K. S. A. C. in 1920. He was a member of the stock judging team last year. At present Mr. Guilbert is an instructor in agriculture in connection with the federal board for vocational education. Mr. Guilbert is a member of the Sigma Alpha Epsilon fraternity.

Social club held an afternoon party Monday, January 10, in Recreation hall. The hostesses were Mrs. A. F. Pene, Mrs. J. V. Cortleyou, Mrs. I. Victor Iles, Mrs. Albert Dickens, Mrs. P. J. Newman, Mrs. C. E. Aubel, Miss Grace Hesse, Mrs. W. N. Skourup, Mrs. W. H. Andrews, Miss Hildegard Kneeland, Miss Edith Bond, and Mrs. W. E. Davis. Dr. R.

K. Nabours talked about his trip through Russia. Refreshments of coffee and sandwiches were served.

Mrs. Charles Lantz, Mrs. E. L. Holton, and Miss Florence Barnhisel were dinner guests at the Pi Beta Phi house Tuesday.

Pres. W. M. Jardine will speak Saturday, January 15, in Topeka at a meeting of the association of collegiate alumni which will be held at the lunch hour in Pelletiers tea room. The subject of his talk will be, "What we are doing for the girls at K. S. A. C."

Mr. and Mrs. W. F. Smith, Miss Margaret Ruffington, and Miss Gertrude Ramsey were dinner guests at the Delta Zeta house Wednesday evening. Miss Ramsey has been a guest of the Smiths since leaving the hospital.

Miss Mary Polson, of the department of clothing and textiles, accompanied the girls of the debating team who went to Emporia today, where they are to debate tonight against a team from the normal. The girls on the team are Lucile Whan, Marie Correll, and Luella Sherman. The girls will return Saturday.

Miss Mildred Johnson was operated on for appendicitis at the Charlotte Swift hospital Wednesday. Miss Johnson is a clerk in the chemistry department.

Miss Elithe Kaull, who graduates this semester, has accepted a position in the Wynne Wood, Okla., high school, teaching zoology and English.

Dinner guests at the Sigma Nu house Sunday were Miss Marjorie Fisher, Miss Mildred Sterling, Miss Anne Ratliff, Miss Louise Mangledorf, and Miss Etta Conroy.

The United States department of agriculture has recently issued bulletin No. 1158 entitled "Growing and Utilizing Sorghums for Forage." R. E. Getty of the Hays branch station, is joint author and most of the conclusions in the publication are based on work done in Kansas.

Mrs. Merrill Gould of Jamestown, was the guest of Miss Ila Knight at dinner at the Delta Zeta house Tuesday evening. Mrs. Gould, who was formerly Miss Velora Fry, '15, is visiting her parents, Mr. and Mrs. L. S. Fry, on Manhattan avenue.

Miss Frances Batdorf, Miss Fern Thornton, Miss Eva Bonecutter, and Miss Irene Bradley were dinner guests at the Alpha Delta Pi house Tuesday.

Fred McElhinney was a dinner guest at the Sigma Nu house Tuesday.

"ALL OUT FOR TRACK" ORDER RAY AND BACH

COACH GIVES ATHLETES PRELIMINARY WORK

ARE WEAK IN FIELD EVENTS

Many Distance Men Out—Heavy Schedule Outlined for Indoor Season

"In the spring a young man's fancy lightly turns—no, not to love, but to track and field. To the thrill of breaking the tape yards ahead of the rival sprinter or the equally memorable sensation of clearing the bar in the pole vault after his opponent has failed. And the brand of weather the forecaster has been passing out recently, which has fooled even the campus elms and caused them to put forth buds, has started the aspirants for places on the Aggie track team at their workouts with a vim.

Inter-class Meet January 28
The athletic hopefuls who are striving for their first K and the veteran campaigners who have made K. S. A. C. track history have been on the track since the end of the football season striving to round into shape for the indoor season which starts with the inter-class meet January 28. Coach Bachman is giving his proteges a series of development exercises in addition to their work on the track which is calculated to fit Wildcat track and field artists for the long grind of the indoor and outdoor season. These exercises include workouts at handball and on the parallel bars, Swedish horses, chest weights and other gymnasium equipment.

Track Prospects Bright
Aggie prospects are bright in the track section, but in the field events the Wildcats cannot be given many points by the dopesters unless some dark horses are uncovered before the season opens. The distance events will be well taken care of by a large squad of athletes. Included in the list are Kuykendall, Henre, Stotts, Matthias, Coe, and Captain Ray Watson of Olympic fame.

In the dashes the old reliable point setters, Gallagher and Evans will be on deck for the Purple and White in the 1921 meets. Gallagher will also perform in the hurdles, teaming up with Shaw, a member of last year's freshman squad. Neely and Turner will run the 440 yard dash and with Shaw and Gallagher will probably be the Aggie entries in the half mile relays. The mile relay team will be picked from Gallagher, Neely, Evans, Shaw, and Watson. The four mile relay team will be selected from the distance runners.

That includes the most likely of the prospects at this writing for the track events. Should Hope, a 1920 freshman return to school the second semester he will prove a welcome addition to the team as he is an all round athlete, running either dashes or hurdles in fast time, and pole vaulting and high jumping as well.

Field Outlook Poor
In the field events, however, the Wildcats do not loom as formidably as they do on the track. The aspirants for the job of putting the shot are Jenkins and Hahn, neither of whom has had varsity experience. Constable, Rogers, and Axline are prospective pole vaulters, and they, again, are new to varsity competition. The high jump entries are limited to Constable and Winter at present.

Coach Bachman and Captain Watson unite in urging all Aggie men who have had any track experience or who wish to accumulate some experience to turn out every afternoon at Nichols gymnasium. The Wildcats have a stiff indoor schedule this year and need a goodly number of athletes. As it stands at present the schedule includes:
January 28—Inter-class meet.

February 5—Purple and White meet (Varsity tryouts divided into two squads).
February 9—Haskell Indians at Lawrence.
February 19—Kansas university at Lawrence.
February 26—K. C. A. C. at Kansas City.
March 5—Illinois Relay Carnival at Urbana, Ill.

"Rotation and its Effect on Crop Production," "Fertilizers for Alfalfa," "Value of Fall or Winter Plowing," "Erosion or Soil Washing," "Value of Farm Manure," and "Composition of Kansas Soils" are subjects being used by Ernest B. Wells, extension specialist in soils. Mr. Wells delivers these talks at meetings held over the state, and assists the farmers in determining the crops which will grow on their soils to the best advantage.

ANNOUNCEMENTS

Browning literary society meets Saturday, January 15.

Ionian literary society will have its regular meeting Saturday.

New members of the Eurodelphian literary society will give the program for January 15.

Aggies will play Oklahoma Friday and Saturday nights, January 14 and 15, in the Nichols gym.

Ames-Aggie debate will occur after the basketball game Saturday, January 15 in Home Economics hall.

Athenians and Franklins will not hold their regular meeting but will attend the Ames-Aggie debate Saturday.

Freshmen and sophomore students who did not call for their intelligence test scores before the holidays may learn their scores by calling at G28, Monday, January 17.

Willard Chemical society will meet Tuesday evening, January 18. The topic for discussion will be "Packing House Chemistry," led by Prof. W. L. Latshaw of the chemical experiment station.

Safe To Pay Debts Now
Now that it is definitely announced that Mr. Harding's plurality was 7,557,677 there is no longer any doubt of his election and it is safe to pay all debts.—Drovers Telegram.

Sunday dinner guests at the Alpha Delta Pi house were Dale Simonson, George Fisher, Ross Mowry, Ralph Jenkins, Tom Neely.

The third-year School of Ag. class will hold their regular meeting Tuesday in G51 at 4 o'clock.

Prof. R. R. Price's Sunday school class will have a social in Recreation hall next Tuesday afternoon.

Dewey Infes spent Sunday in Kansas City.
Dr. Helen B. Thompson, dean of the home economics division, spoke at the Thursday evening session of the fiftieth annual meeting of the Kansas state board of agriculture held in Topeka January 12 to 14. She talked on "The Farm Daughter's Hope Chest."

W. R. Horiacher, fellow in animal husbandry, spent Christmas in Louisiana.

During the Christmas vacation, Harrison W. Broberg, and J. R. Carnahan visited relatives in Manhattan. Mr. Broberg, civil engineer, '11, is now resident engineer on Federal Aid Project Number 43, at Altoona, while Mr. Carnahan, a former student in civil engineering, is at present employed in the Nebraska State Highway office at Lincoln.

The Golden Belt Medical association, an organization of doctors from all parts of Kansas, were dinner guests of the Manhattan city doctors last Thursday evening. The dinner was prepared and served by the dietetics class of the home economics division and served in the dining room of the home economics building.

Lost: Gold "Eversharp" pencil. Box 253. Reward offered.

FOODS EXPERT TO TRAIN HERE

CAPTAIN TREUTHARDT STUDIES SPECIAL COURSES HERE

War Department Selects K. S. A. C. as Best School for Such Training

The War department has selected the Kansas State Agricultural college as the right place to send one of the officers of the quartermaster corps to continue his training as a food expert. Captain Ernest L. P. Treuthardt, graduate of the Massachusetts Institute of Technology in the chemistry course in the year 1909, has been sent here to take a year's study in the courses of flour milling, grain and forage crops, meats and dairy products.

Captain Treuthardt, since his graduation from college, has been engaged in government work with the bureau of chemistry both in the laboratories in Washington and in other parts of the country. He has done research work on the metallic impurities of foods and especially canned goods of all kinds. He has published quite a few of his reports on studies which he made while in the bureau of chemistry work and since going into the army.

Captain Treuthardt is in charge of the inspection branch of the subsistence section of the quartermaster corps at Washington, D. C. The work of this branch is that of investigating the relative values of commercial varieties of different foods which must be purchased by the quartermaster corps of the army. Captain Treuthardt states that he was sent here for further study in order that he might learn something which would be of value to the War department in systematizing their methods of food inspection and regulation.

SIX HUNDRED MEN TAKE IN WOLF MUNT NEAR ZEANDALE

Get Three Wolves—Many Students Take Part in Drive

Nearly 600 men took part in the wolf drive near Zeandale Monday, in which three wolves were killed.

About 100 went from Manhattan, many of whom were college students. Major Terrill, who takes an interest in such sports, arranged to excuse men from drill who cared to go on the hunt. Two truck loads left the college shortly after 8 o'clock. At one time when the shooting was lively two small shots struck Major Terrill in the face. The force of the shot was nearly spent when they struck him and he suffered no injury.

Dr. C. W. McCampbell, head of the animal husbandry department, returned from St. Paul, Minn., where he gave an address before the Minnesota Livestock Breeders' association on "Factors That Would Improve the Meat Producing Situation." Doctor McCampbell has been invited to address the Kansas State Board of Agriculture at Topeka January 13, on "Meat Production in Kansas."

WELSH CONCERT CHOIR SUCCESS

PROFESSOR RICHARDS, MUSICAL DIRECTOR, MAKES DECIDED HIT

Each Singer Proves to Be Real Artist—Professor Evans, Accompanist, Receives Favorable Comment

The concert given by the Mountain Ash Concert Choir at the college auditorium was one of tremendous success. It was a rare treat for the people of Manhattan and the students of K. S. A. C. to hear a group of men possessing voices of such remarkable volume and quality. Every member of the choir is an artist.

Prof. T. Glyndwr Richards, musical director of the choir, made a decided hit with the audience by his directing ability and stage personality.

The musicianship of Prof. William Evans, accompanist, was favorably commented upon. His playing was done with the utmost ease, without affectation, avoiding any tendency for display.

It will be a long time before the people of Manhattan and K. S. A. C. forget the remarkable concert that was given last Tuesday evening.

KANSAS BAKERS HOLD MEETING

PRINCIPAL ADDRESS GIVEN BY DEAN F. D. FARRELL

Men of Association Talk "Flour" in Manhattan For Two Days

Kansas Bakers' association held their annual 2 day short course and convention in Manhattan, Wednesday and Thursday, January 12-13.

The principal address on Wednesday's program was that of Dean F. D. Farrell, "The Relation of the State Experiment Station to Bakers." Another important message "Patent Against Straight Flours" was delivered by L. A. Fitz, head of the milling department.

A 7 o'clock dinner was given at the Gillett hotel, followed by a discussion which dealt with the technicalities of bread manufacture.

The second day was equal to the first in importance. "The Purpose of Standard Ingredients in Your Loaf" was discussed by Miss Lella Dunton of the department of milling industry. Following this was an address, "Effects of Different Waters Upon Flour and Dough," delivered by Prof. E. L. Tagues, also of the department of milling industry. Closing the convention C. G. Chenaworth, of Junction City, spoke upon "Standard Weights."

Karl Knaus, county agent leader, is attending the annual meeting of the state board of agriculture in Topeka this week.

Dr. H. L. Isben, professor of genetics, visited in Chicago during the Christmas holidays.

THE KANSAS STATE COLLEGIAN

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, TUESDAY, JANUARY 18, 1921

NO. 31

VOTE LUELLA MORRIS MOST POPULAR GIRL

GERTRUDE RAMSEY IS SECOND IN POPULARITY RACE

FOUR SENIORS PLACE IN CONTEST

Marcia Seeber, Hortense Caton, Rowena Thornburg, and Ruth Peck Among Winners—Dr. H. H. King Announces Names

Friday evening between the hours of 10 and 11 o'clock a pair of curtains, hung on the south side of Harrison's dance hall, opened and closed six times, and each time they parted an Aggie coed stood in the opening. It was the announcement of the winners of the Popularity contest which is carried out each year by the Royal Purple. The announcements were made at the annual Popularity ball which was held in Harrison's hall.

Luella Morris Wins Contest

Miss Luella Morris, Kappa Delta, Ionia, Y. M. C. A. first cabinet, and S. S. G. A. executive council, was elected the most popular Aggie girl. Miss Gertrude Ramsey, Delta Zeta, Eurodelphian, and Quill club, received second place. Third place was won by Miss Marcia Seeber, who is a member of Eurodelphian and Theta Chi Gamma. Miss Rowena Thornburg, a member of Chi Omega, Ionia, Purple Masque, and Theta Chi Gamma was elected to fourth place. Miss Hortense Caton, member of Pi Beta Phi, Eurodelphian, Y. W. C. A., second cabinet, Y. W. C. A. conference committee, senior invitation committee, placed fifth in the contest. Sixth place was won by Miss Ruth Peck, president of the junior class, Eurodelphian, and Theta Chi Gamma. Of the winners of the contest, Luella Morris, Gertrude Ramsey, Marcia Seeber, and Hortense Caton are seniors and the remaining two, Rowena Thornburg and Ruth Peck are juniors.

Announce Names at Ball

The announcement of the winners at the Popularity ball Friday evening was the culmination of the contest which started December 8, when 19 of the most popular coeds in school were nominated. This contest is carried out each year by the Royal Purple and pictures of the winning girls are placed in the annual for that year.

Each year some novel method is used in announcing the winning candidates. This year curtains were hung over one of the doorways in Harrison's hall and as the curtains parted one of the six winners of the contest was seen standing in the opening. Directly above her was suspended a number which indicated to which of the six places she had been elected.

Name Winner Last

The winner of the first place, Miss Luella Morris, was announced last. The curtains parted but the only thing that could be seen was a card bearing the number one. A tense moment followed, then a flash and a dense cloud of smoke, and when this had cleared away Miss Morris was seen standing between the parted curtains. Dr. H. H. King announced the names of the winners as they appeared in person.

The different candidates were voted upon by the student body. In order to vote the voter must have purchased a Royal Purple. If the entire sum is paid at once the purchaser is entitled to 25 votes. For part payment he is entitled to 10 votes. Also for every 10 books sold 20 votes are awarded.

Much enthusiasm was shown in the contest this year. Electioneering was carried on by the enthusiasts of the various candidates and black boards and walks on the campus were used to good advantage.

The six girls elected this year are typical all-round, loyal, Aggie girls and are well deserving of the places to which they have been elected.

The rank of the winning girls was as follows: Luella Morris, 5,725 votes; Gertrude Ramsey, 5,045; Marcia Seeber, 4,165; Hortense Caton, 4,014; Rowena Thornburg, 3,915; Ruth Peck, 3,819.

An analysis of the ballots made by Prof. H. H. King showed that the seniors cast 162 ballots, juniors, 142; sophomores, 201; freshmen, 189; faculty, 26; all other classes, 138. The total vote this year was 858 as compared with the 250 ballots cast in last year's contest.

Franklin N. Wray has not returned to school since the holidays because of illness.

New Skeptic Words Draw More Visitors Than Mecca's Shrine

Speaking of meccas, nearly enough men flock from all parts of the college campus to look on the bulletin boards of the military department every year, to rival the hordes of orientals who annually flock to their favorite shrines.

The attraction to the vicinity of the military offices is merely a few sheets of paper, but upon them is printed the fate of nearly a third of the students taking military training. Let a young man be absent but once, intentionally or otherwise, and he is soon to be seen creeping with a feeling of apprehension toward the all important bulletin boards.

He looks upon the sheets of paper, sees beside his name a few cryptic words that signify to him three hours of hard labor and again creeps silently out, gently cursing the first sergeant who marked him absent. And as he leaves, another pilgrim with awe in his eyes takes his place.

COUNCIL WANTS RAISE GRANTED

AGRICULTURISTS FEEL IMPORTANCE OF THE COLLEGE

President and Instructors Should Get More Pay—No Advance Made in Wages at This Time

At a meeting held in Topeka recently the Kansas Agricultural council recommended that the salaries of the president and instructors of the Kansas State Agricultural college at least be made equal to salaries paid such officers in any of the other educational institutions in the state.

After a discussion as to the inequality of the present salaries of the president of K. S. A. C. and of the state university the resolution was unanimously accepted.

The resolution reads as follows: That we are unalterably opposed to any general advance of salaries, but in view of the supreme importance of agriculture to the state and the unquestioned supremacy of our agricultural college, we ask that the salaries of the president and instructors of our state agricultural college be made at least equal to the salaries paid such officers in other educational institutions of the state.

FORMER AGGIE STUDENT DIES

HAROLD LAYTON PASSES AWAY AT HOME IN SALINA

Is Buried in Manhattan Cemetery—Contracted Tuberculosis During Service in Navy

Harold A. Layton, formerly a student at the Kansas State Agricultural college, died at his home in Salina Tuesday evening, January 11. Interment was in the Manhattan cemetery on Thursday, January 13.

Layton was a sophomore in college last year when he was taken ill. He was taken to Colorado where he was in a sanitarium for six months where treatment was given for the tuberculosis which he had contracted during his service in the United States navy. Death occurred two months after he was taken to his home in Salina.

Mr. Layton was a member of the Sigma Alpha Epsilon fraternity. He was in the college glee club last year, a member of the Purple Masque, and was in many other student activities.

QUILL CLUB TO HOLD ANNUAL CANTON BANQUET JANUARY 24

Members Going Must Notify Clementine Paddelford Not Later Than Wednesday

The Quill club will hold its annual Canton banquet at the Gillett, Monday, January 24.

Milton Eisenhower will act as toastmaster. There will be toasts by Miss Clementine Paddelford, Prof. H. W. Davis, Prof. N. A. Crawford, Prof. J. W. Seaton, Morse Salisbury, and Edward Shaffer.

Members of the club who intend to attend and bring guests must notify Miss Paddelford not later than Wednesday morning.

Head stenographer of the chemistry department, Miss Mildred Johnson, was taken to the Charlotte Swift hospital Wednesday morning of last week where she underwent an operation for appendicitis.

JUDGING TEAM WINS FIRST IN DENVER SHOW

NEBRASKA PLACES SECOND, COLORADO THIRD, WYOMING FOURTH

WIN TWO SUCCESSIVE CONTESTS

In Individual Placings Henney Is Second, Mather and Otto Tie for Third, McCollum, Seventh

The Aggies place first at Denver, Nebraska, second; Colorado Aggies, third; Wyoming fourth. Otto and Mather tie for third. McCollum, seventh. Henney second individual. The Aggie team is only one in the United States or Canada to win two national contests in one year.—Press Dispatch.

K. S. A. C. stock judging team at the National Western Stock show at Denver set a new high mark for other judging teams to shoot at when they won the contest January 15. The victory of the four Aggies on the team over 7 strong aggregations of stock judges from other colleges in the west was the second this year, as the team won the National Swine show at Des Moines early in the fall. Nebraska defeated the Aggies at the International in Chicago last fall, but were beaten by the Aggies at Denver. The first four teams and their rankings are Kansas Aggies, first; Nebraska, second; Colorado Aggies, third; Wyoming, fourth.

Have Record Team

The Aggie team is the only team in the United States or Canada to win two successive contests in one year. In addition to the two wins of the stock judging team in national contests, the dairy team won the dairy congress contest at Chicago. The year has been a prosperous one for Aggie judges.

The individual placings at Denver were Henney, second; Mather and Otto, tied for third; McCollum, seventh. Their victory secures the trophy which last year's team won at Denver for another year. It will remain in the show case of the stock judging team which is now on display in main hall, together with the premium ribbons of the animal husbandry department.

Department Well Pleased

Word had not been received from Coach Bell at the animal husbandry office at the time the Collegian went to press, but the members of the department were naturally much elated by the team's victory. It was looked upon as another proof of the high place K. S. A. C. is attaining among the land grant colleges of the country in general and the middle west in particular. The winning of the contests at two national shows in one year is something unique in the annals of college stock judging teams in the United States and Canada.

Much of the success of the team can be credited to the thorough and intensive training given its individual members by Prof. F. W. Bell of the animal husbandry department who also coached last year's winning team at the Western National show.

PURPLE MASQUE PRESENTS FARCE

IS CLEVERLY ACTED BY THREE STUDENTS

Play Deals with Analysis of Dreams—Every Action Is the Result of a Suppressed Desire

"Suppressed Desires," a one act comedy of psycho-analysis, was played by the Purple Masque fraternity at last Friday's assembly.

Stephen Brewster, (part taken by Verin Whan) a young architect, is very much annoyed by the psycho-analytical theories of his wife Henrietta, (played by Rowena, Thornburg) who wakes him up at night to inquire the nature of his dreams. She is certain that his growing irritability is caused by a "suppressed desire" known only to his subconscious mind, and she urges him to submit to the advice and treatment of her doctor of psychology.

Henrietta also seems suppressed desires in the subconscious life of her sister Mable, (Winifred West) who

has a loyal but non-intellectual dentist husband. The farce is complicated by a dream of Mable's in which she imagines herself a hen. According to Henrietta's thinking this is sufficient proof that Mable has a suppressed desire to wed one Lyman Eggleston, on the basis of the relation of hen to egg. But the doctor of psychology explains that in her primer studies in syllabication Mable pronounced Stephen, "Step-hen," and hence has a suppressed desire to marry that individual. The doctor further explains a dream of Stephen's to indicate a desire to escape the present bonds of matrimony. He also brings forth the indisputable evidence that Brewster might be pronounced, "Be-ye-rooster."

Henrietta, seeing her theories fail is quite dismayed, and renounces her faith in her doctor of psychology, and sees her husband about to flee with Mable, for both are now apparently under the influence of the psychic. The situation is righted however when Henrietta bursts into tears, and is comforted by her husband and assured of his faith.

ARE TO FEATURE CLEVER SCENERY

PURPLE MASQUE HAS NEW SETS FOR PLAY

Colonial Atmosphere to Be Carried Out by Use of Numerous Panels

Purple Masque on January 21 will feature in a complete new set of scenery, designed from the clever ideas of Prof. W. J. Dehner and Miss Florence Helzer, and painted by Herbert McClelland, Verin Whan, and William Giles.

The scenery is unique in that it follows a plan never before tried out at K. S. A. C., and probably not in most of the theaters of the country. Instead of separate drops and curtains being required for each change of setting, numerous panels of varying color and design will answer the purpose. The panels are interchangeable and a background of white panels may be quickly covered with the colored ones, so that the desired effect may be almost immediately obtained. Even doors and windows of one scene will be covered over with the panels of the following scene. Such a scheme does away with considerable loss of time and assures a more effective setting.

A colonial atmosphere will be consistently carried out, since the scene of the play is laid in a Virginia mansion. Many stage properties of colonial design have been built, most interesting of which are a fireplace and a grandfather's clock.

SERVANT WILL AMUSE IN PLAY

"COME OUT OF THE KITCHEN" FEATURES FUNNY SITUATIONS

Members of Proud Southern Family Rent Home and Take Servants' Place

A painful position will become ludicrous Friday night when the trials of the Daingerfield family are portrayed in "Come Out of the Kitchen." The play is produced by the Purple Masque dramatic fraternity.

The Daingerfield family is one of aristocratic Southern type, holding on tenaciously to its pride and traditions of precedent.

Things have abruptly changed at the time action in the play begins. The estate has been heavily mortgaged to pay the expenses of the father and mother who are in Europe for the former's health. With the aid of Weeks, the family friend, Olivia, the eldest of the children, hits upon a plan to dispose of the mortgage which will soon fall due.

She rents the entire plantation to a New York millionaire, Burton Crane, for a short period. Crane, who is seeking a vacation, stipulates, however, that he will tolerate only white servants.

Olivia again finds a way out. She suggests that the Daingerfields themselves become servants, thus saving the family home.

Crane arrives, and soon his invited house guests arrive and the fun begins.

More could be told, but that would be giving too much away. It is sufficient to say that the play will be given Friday evening in the college auditorium.

Miss Eva Armstrong of Holton, was a guest at Pi Phi house Thursday and Friday.

SNOW SOONERS UNDER IN FIRST M. V. GAMES

AGGIES' SPEED AND TEAM WORK FEATURE EASY VICTORIES

IOWA TRIP THIS WEEK

Bunger Off on Free Throws—Knothman Tosses Seven Field Goals in Last Game

Captain Ham Bunger's Wildcat basketball team annexed a substantial hand hold on the halyards of the Valley championship bunting last Friday and Saturday evenings when they won a brace of contests from the Sooners. The score of the first game was 28-16, and that of the second 23-9. Both games were whirlwind affairs with the Aggies holding an edge on the Sooners in speed on the floor and in guarding. The showing of the local five was much improved over their form in the Ottawa game the previous week end.

Bunger Leads in Scoring

At the start of the first Valley game for the Aggies on Friday the Sooners displayed much speed but could not locate the hoop, however, they scored first and rolled up a lead through the free throwing of their center, Waite. The Aggies soon struck the stride, rushing the Sooners off their feet toward the close of the period and piling up an 8 point lead. The score at the half was 18-10. At the beginning of the second frame Oklahoma's quintet staged a rally that brought them within three points of the Wildcats, but were unable to keep the pace. The Aggies pulled away and piled up such a commanding lead that Coach Knoth sent in several second string men including Kuykendall at center and Foval at guard, both of whom proved themselves of Varsity calibre. Captain Bunger led his five in scoring with a total of 8 points, made on a field goal and 6 free throws. Waite, lanky Oklahoma center was the main cog in the Sooner scoring machine, accounting for 10 of his team's points by 2 field goals and 6 free throws.

Cowell Brothers' Guarding Close

The second of the brace of games was a speedy exhibition of the caging pastime with marvelous floor work on the part of both teams, but inclined to grow a bit hoisterous at times. The Sooners came on to the court Saturday evening with a determination to avenge the defeat of the previous night, and perhaps with some small memory of the 7-7 tie with the Aggies that spoiled their all-victorious football season last fall, they played a fast and furious game, but the Aggie play was considerably faster, and mayhap a bit more furious. The Aggie victory can be laid in large measure to excellent guarding on the part of the Cowell brothers, dubbed as the "biggest little men in the Valley." The quality of their work may be judged from the fact that the visitors got just one measly little field goal—and it was an accident, being made on a one-handed "scoop" shot by Cox, Oklahoma captain. The Sooners simply could not work the ball down under their basket and had to resort to long range shots almost any of which shots would have been miracles had they landed in the hoop.

Playing Rough At Times

The Wildcat five piled up a lead of 15-3 in the first period, the Sooners' three points being the result of Aggie violations of the rules which Waite, Oklahoma center, turned into points for his team. In the second half the play grew rough at times, the Sooners fighting desperately to score. Waite, Sooner center, and Brady Cowell, Aggie left guard were both removed from the game on personal fouls toward the close of the period. Several Aggie substitutes were sent in by Coach Knoth during the game, Kuykendall and Foval again getting a chance to show their wares, as also did Wilhoite. Captain Bunger had his sights out of line on free throws, missing 9 of the 10 tries allowed him by Sooner fouls.

Chance For Championship

The excellent showing the Aggies made against the Sooners, touted as one of the Valley's strongest teams this year is cause for gratification to the student body and Coach Knoth. Talk is rife on the hill of a championship this season. However, the Wildcats have several high hurdles to clear before the gonfalon comes to Manhattan. The Missouri Tigers, from all reports, are better speed

merchants than they were last year. Kansas has developed a hard playing, unified team from what seemed at the start of the season to be mediocre material. Ames was decisively beaten by Missouri, but may stage a come back as the Cyclone football team did last fall. Drake was beaten easily by Kansas and should furnish a tally in the "games won" column of the Missouri Valley standing of the Aggies.

Thursday evening the Wildcats leave for Iowa where they play four games in five days. They face the Ames Cyclones Friday and Saturday evenings, then journey to Des Moines where they meet Des Moines college Monday and Drake university, Tuesday. The Des Moines college game is not a championship contest but was taken on to help the receipts on the trip.

WORLD FORUM OPEN CONTEST

PRIZES OFFERED TO DESIGNERS OF BEST POSTERS

Any Student Eligible to Try—Work Must Be Left with M. J. Lucas or Doctor Holtz

To more fully set forth the importance and points of interest of the World Forum session, January 18-20, a poster contest has been opened and prizes will be awarded to the designers of the best posters.

The posters are to be of two different types, one for outdoor display and the other to be placed in show windows and other indoor spots of vantage.

The poster for outdoor use is to be made up of decorative printing only, with no illustrations. It must be in the hands of the contest committee by 5 o'clock, January 25, and will be judged on originality of design and cleverness of presentation. The person winning the first prize will receive \$3, the second \$2, and the third \$1.

Illustrations, cartoons, and designs of any sort are permitted on the indoor poster, which will be judged on presentation and artistic value. It must be handed in to the committee by 5 o'clock, February 8. Three prizes of \$5, and \$3, and \$2 are offered.

Selections for material may be made from the following information: World Forum will be held in the auditorium February 18, 19, and 20, speakers of national and international reputation; talks on world conditions, needs, and opportunities.

Any student is eligible for the contest, and if further information is desired, see M. J. Lucas at the department of illustration building.

All posters are to be given to Lucas or left with Doctor Holtz at the college Y. M. C. A., and are to become the property of the World Forum.

Building Plans On Display

Just before vacation the students in the department of architecture completed plans and perspective drawings for the new agricultural building, the veterinary clinic building, and the addition to the auditorium and Kedzie hall, appropriations for which are now being asked from the state legislature. These drawings were displayed in recreation center the day before school closed for the holidays and are now on exhibition in the free hand drafting room in the department of architecture.

.....

Ticket Sale Started

Have you bought those tickets for Purple Masque yet? They went on sale by special agents yesterday morning, and the sale will continue until Wednesday evening. The prices are 75 cents and \$1, tax included. Thursday morning the seats go on reserve at the Co-op book store in Aggieville and the Palace Drug store down town.

ARE THE AGGIES MISERS?

The children of Europe, starving, freezing, and dying of pestilence, knocked at the gate of K. S. A. C. last week and asked, in the name of Christ, for the means of sustaining life, little children, in no way responsible for the misdeeds of their country, separated from parents in many cases, undergoing suffering, the details of which are hideous to contemplate. K. S. A. C. responded with a niggardly ten cents per student, instead of the \$3 asked by Hoover. In name the subscription campaign has been finished, but the college should never permit this half hearted response. This is not a school of cads or misers, every student is able and wants to contribute liberally; in fact they have done so to other important drives which have been made this year.

There is yet time for K. S. A. C. to swell her quota to overflowing. Come on Aggies! Hand your subscription to Dr. A. A. Holtz or Miss Irene Dean.

IT'S SKIDDING WEATHER—USE YOUR CHAINS

Pneumonia and so called colds cause an alarming number of fatalities in this country yearly. Too many students, girls especially, sit with coats on in a warm classroom, and consequently are chilled upon going out into the open air. Vanity and timidity seem to prevent many from wearing their "African skates" in muddy snowy weather.

High heeled pumps do not furnish much traction on an icy sidewalk, yet many are running the risk of a cracked spine or a broken hip, simply to avoid wearing rubbers for a few days. Folks, put on those rubbers that mother made you tote along and wear them with a smile, even if people don't admire your tiny feet they certainly will admire your good sense.

BUSINESS METHOD IN SCHOOL

Cramming—under ordinary circumstances is there any excuse for it? Are the factors which necessitate cramming ever conducive to progress, to progressive organization and efficiency not only in school work but when applied to any other pursuit of life? In short, does it pay? Do its advantages offset its disadvantages?

This blight which is so especially characteristic of all higher educational institutions is necessitated solely through the lack of the students to apply the simple principles of business and every day life efficiency and organization to their work. Instead of meeting and disposing of each day's problems and labors, which, if tackled singly would be inestimably less difficult, the average student shoves the most of the work that one day should see permanently done away with into a heap in one corner until the end of the month or the term.

Business firms that try to operate on this slip shod principle invariably fail, and the regrettable part of cramming is that it is done by men and women who should know better, who are on the verge of fighting out for themselves, and yet do not seem to realize what the habit may eventually cost them. College students are at the age when they should know something of what to expect when they are through, and should be making preparations to cope with it; yet in many cases it is just at this period that the least thought and time is given to the application of the world's principles to school work.

Progress in any phase of life is made not only through efficiency and organization, but by eliminating every difficulty, the cause of every mistake, every bar to progress at the first encounter, and guarding against its recurrence. Until cramming is recognized as the evil it really is, and a real effort is made to eliminate any necessity for it, colleges will not have attained their maximum achievements, and the quality of the citizens turned out will not be of the best that it is possible to produce.

QUICK, WATSON, THE NEEDLE!

This college has an unusually husky, healthy group of students, according to the college medics. And probably there's a reason. Proper ventilation, wearing of sensible clothing, and such simple but effective precautions help reduce the number of colds, sore throats, and other minor ailments which love to attack the unsuspecting human. Overdressing, say the health authorities, is as bad as going about insufficiently clad, either can be carried to harmful extremes, but judging from the absence of sickness and the healthy condition of the student body as a whole, K. S. A. C. students are dressing, eating, and living quite sanely.

But it is usually at such a time, when we feel perfectly secure in our present good state of health, that our old foe, Epidemic, sneaks into our midst, and before we really awaken from our false sense of security a number of us are flat on our backs in bed and a glaring red sign conspicuously adorns the front of the house.

Ordinary precautions seem to be ineffective when old Epidemic lays plans for an offensive. But without cost and with little personal inconvenience, students can be inoculated against typhoid and vaccinated against smallpox by Dr. C. M. Siever, the college physician. It's just a form of free insurance against contracting either of these two common maladies. Of course you may contract hydrophobia, or flatfoot, or some such rare sickness but you will not lose out on valuable school work because of typhoid or smallpox. Quick, Watson, the needle!

VICTORIOUS IN TWO DEBATES

BOTH MEN'S AND WOMEN'S AFFIRMATIVE TEAMS WIN

Aggies Outclass Opponents in Their Grasp of Actual Knowledge of Question

The dual debates Friday and Saturday night with Emporia and Ames resulted in affirmative victories both at home and at the sister institutions. The Aggie teams outclassed their opponents in their grasp of fundamentals and actual knowledge of the question, according to the judges.

The women's debate Friday night in Recreation hall was the first debate this year. The Aggie members debating at home were Mrs. Elizabeth Winters, Miss Ada Songer, and Miss Clementine Paddleford. The negative team members that debated at Emporia were Miss Lucile Whan, Miss Marie Correll, and Miss Luella Sherman. They were accompanied by Miss Mary Polson of the department of home economics.

The Ames debate, Saturday night was held in the home economics hall. The affirmative team debating here was R. I. Richards, Charles W. Howard, and J. Wheeler Barger. The negative team debating at Ames was V. V. Cool, Arnold Englund, and Ellis Kimble.

"The debate here was one of the hardest college debates that I have ever heard," said Coach O. H. Burns. "It was one instance where a continual hammering of fundamentals and familiarity with subject matter were the deciding factor. It was a clash from start to finish."

The question in both debates was Japanese Exclusion. "Never before have K. S. A. C. debaters had such a large audience to talk to," said Prof. I. V. Iles who was chairman Saturday night. Doctor Hill of the department of public speaking presided Friday evening.

MAY STILL BUY ROYAL PURPLES

THIS IS LAST WEEK ASSESSMENTS MAY BE PAID

Only About One-Third Necessary Number of Books Are Sold

There are now about one-third of the number of class books sold necessary to insure the quality of material which the staff of this year is hoping to put out.

Is the largest and most permanent student enterprise to fall by the wayside for lack of support? That is the question which is worrying the seniors, who by virtue of their years of accumulated wisdom are compelled to back the annual from a financial standpoint.

It is still possible to pay assessments for the Royal Purple if they are paid this week but this is the last week in this semester in which they can be paid.

Miss Ruth Hutchings, '16, whose home is in Manhattan, has accepted the position of secretary to the present session of the Kansas legislature.

Miss Erma Tapp, national inspector of Alpha Delta Pi, spent the week end visiting at the Alpha Delta Pi house.

L. A. Fitz, head of the department of milling industry, was in Topeka Friday for the purpose of inspecting feeds.

SOCIETY

Sigma Delta Chi, honorary journalistic fraternity, held initiation services Monday evening, January 17, at the Sigma Alpha Epsilon house, for V. R. Blackledge, Don C. Ballou, Albert Mead, C. W. Howard, Edward Shaffer, and Maurice Lane. Refreshments were served after the services.

Alpha Delta Pi fraternity entertained Saturday afternoon from 3 until 5 o'clock with a tea in honor of Miss Irma Tapp, visiting national inspector of Alpha Delta Pi. The rooms were decorated in yellow and white. Mrs. A. H. Bressler served tea. During the afternoon Miss Bernice Meyers sang several selections. The guests included all the house mothers, patronesses of the sorority, Mrs. W. M. Jardine, Mrs. Mary Pierce Van Zile, and two representatives of each sorority.

The Popularity ball was given at Harrison's hall Friday night, January 14. One hundred couples were there. Rex Maupin's four piece orchestra furnished the music. Dean Mary Pierce Van Zile, Prof. H. H. King, and Mrs. Beale Webb Birdsall were the chaperones. During intermission the six popular girls were presented and announced by Professor King. The curtains in the doorway were drawn back and each girl appeared and was introduced by Professor King. The six girls were Luella Morris, Gertrude Ramsey, Marcia Seeburg, Hortense Caton, Rowena Thornburg, Ruth Peck.

Miss Inskeep Talks to Girls

At the regular vesper service meeting held Thursday in Recreation hall, Miss Mildred Inskeep, field secretary of the Y. W. C. A. spoke to the girls on "What it Means to be a True Follower of the Lord Jesus Christ." Special music was furnished by the Y. W. octette.

The question of changing the membership basis was voted on by the members. As the constitution now stands, any woman who is a member of a Protestant Evangelical church may become an active member of the Y. W. C. A. If the proposed change is made, any woman may become an active member of the organization who makes the following declaration, "It is my purpose to live as a true follower of the Lord Jesus Christ."

SHOW ORIENTAL SHAWL DISPLAY

COLLECTION BROUGHT HERE BY MRS. W. B. THAYER

Value One Blanket at \$900—Many Pieces Are Worth Several Thousand Dollars

The Thayer collection of Oriental shawls will be on display in the art department this week and next. The collection was brought here by Mrs. W. B. Thayer of Lawrence, who donated the shawls to the state of Kansas, to be used in the Kansas museum.

The shawls of the collection are wonderful in design and rich in color. In the display are beautiful East Indian shawls, both woven and embroidered, Persian cashmere, and silk shawls, and Scotch and French Paisley shawls, and Mexican shawls. Many of the shawls are very old and some of them are worth several thousand dollars.

Two interesting pieces in the collection are the Queen Victorian shawl and the Roosevelt Navajo blanket. The Victorian shawl was given to one of Queen Victoria's ladies in waiting by the East Indians. The Roosevelt Navajo blanket is considered to be the most beautiful Navajo blanket in the world. A collector from the Smithsonian institute appraised this blanket at \$900.

Last Thursday Mrs. Thayer gave two interesting talks to the students of the art department, in which she pointed out the value of an intelligent design both from the point of utility and appearance. She explained that for manufacturing there must be patterns or designs, and that for good designs there must be study and application of art.

Mrs. Thayer ended her talks by telling of some of her experiences in traveling through foreign countries.

Things we think; things others think; and things we think of things others think.

Dear Editor: The Collegian stated there are 67,000 volumes in the library. But that is only half of the story.

I had occasion recently to go to the library to look up a certain point in history. I went to the set of "History of the Nations" but all but three volumes were gone. I turned to the "History for Ready Reference" and it was nix. I looked for "Harper's Encyclopedia" and there wasn't more than half of the set there.

Discouraged I started out, then I noticed a pile of books on one of the tables. There must have been 200 of them. Students were around the table writing, and, one by one adding more books to the pile. Occasionally one person would dig into the bunch of books, extricate one, look it over, and then toss it back.

They were library methods students. They seemed to show good capabilities for taking books off the shelves but had no inclination to put them back. No group of librarians could have kept the list straightened. I went out in disgust. The history could go to and stay put. But I do think that the library methods students might learn to put reference books back on the shelves.—A Sophomore.

Dear Editor: Politics already plays too important a part in student affairs at K. S. A. C. Even in contests between individuals, too often organization affiliations count more than the personality of the con-

testant, as in the case of the Popularity contest carried on by the Royal Purple.

It seems to me that by adopting the method of deciding upon the best Pop Night stunt advocated by Professor Brainard in a recent issue of the Collegian, the college authorities would simply be encouraging college politics. Mr. Brainard's suggestion was that the audience make the decision, voting by means of a coupon attached to the program.

If the method proposed should be adopted, it is highly probable that the organizations competing on Pop Night would have votes promised them long before the date of the contest. The outcome of the contest would not depend so much on the cleverness of the stunt as on how hard the organization members had worked to secure votes.

Judges, brought in from outside, are more likely to be impartial than are townspeople, who are acquainted with the persons who put on the stunts. The old method may not be perfect, but I believe the method proposed would have as many faults.—M. B.

Dear Editor: It takes practice the year around to make a good basketball team. If the playing is limited to eleven men, as is being done now, the basketball team will not only fall down this year, but there will be very little good material developed for the coming year next year.

Here is what has been done. Eleven men were chosen on the first squad before the Aggies ever played a game this year. They were chosen before the plays were given out by the coach. In other words, the men who did not place on the team, were not even given a chance to try for the team or to learn the plays that are to be used in all the games this year.

The result is that there are eleven men who will be out for basketball this year and only the returning ones will be out for the squad next winter. The men who have been refused a chance for the team or even for practice on the court, will not be out next year. They've been shoved out in the cold, so to speak. Heretofore all contestants for places on any athletic team have been allowed to go out all during the season, whether they made the first squad or not. This made the first team men work to hold their places and also prepared good material for the next season.

This is not a question of whether or not the right men have been chosen for the team. The players showed excellent form at the first game. But it is a question of unfairness for the men who were out and were not given a chance at the team. Let's get the politics out of athletics.—One Who Knows.

More Light Weights Needed

The physical educational department insists that more light weight men of 115, 125, and 135 pound class come out for wrestling. This is one sport where light weight men have a good opportunity to make the team. Thus far only a few have turned out for practice.

Timely Topics

We are showing Ice and Roller Skates for boys and girls.

Tools of all kinds for Auto and Tractor Mechanics.

Guns, Rifles, Hunting Coats and Shells for the rabbit hunters.

Paints, Shellac, Varnishes, Wax and Floor Waxing Brushes for the home.

Ranges and Heating Stoves at very low prices.

If you don't see in this list that which you need, come in and ask for it.

DANCE AGAIN IN SOCIAL CENTER

UNDER SUPERVISION OF SOCIAL AFFAIRS COMMITTEE

Place Ban on all Hops not Approved by S. S. G. A.—Report Students Attending Public Halls

The Saturday night dance in Recreational hall will again take its place upon the social calendar of the college. Beginning Saturday night, January 15, dances will be given every Saturday night under the supervision of the social affairs committee of the S. S. G. A.

The Saturday dance at the Recreational hall and the dance given Friday and Saturday evenings at

Harrison hall are the only student dances approved by the S. S. G. A.

There has been some complaint regarding the attendance of students at public dances contrary to the rule of the college, which puts the ban on all dances not approved by the social affairs committee of the S. S. G. A. That association announces that all students reported attending dances not approved will be referred to the discipline committee.

Miss Kinnamon Badly Burned

Miss Lucile Kinnamon of Larned, freshman in home economics, was severely burned Tuesday afternoon in Foods class when an oven exploded. She was taken immediately to Dr. L. E. Downs, who dressed the burn. Miss Kinnamon will be out of school for a week or more.

Miss Peggy Love of Columbus, Ohio, was a guest at the Pi Beta Phi house Thursday and Friday.

ANNOUNCE COLOR TEAM SCHEDULE

TEAMS ARE PICKED FOR BASKET BALL TOURNAMENT

Games Will Begin Monday—To Play Off Two Contests Each Day

The teams for the basket ball color tournament have been chosen and a schedule for the games has been arranged. There will be a total of 24 games, the first of which is to be played Monday, two games being played each afternoon at 5 o'clock. The class teams will be picked from those playing on the color teams.

The following teams with their captains have been chosen: Blue, Gladys Flippo (captain), Clementine Paddlesford, Gail Roderick, Josephine Thorn, Lucille Smith, Margaret Gillett, Hazel Humbarger, Blanche Brooks, Frances Lonnberg, Alice Marston; Orange, Helen Coe (captain), Sue Unruh, Irene Drake, Mary Valle, Lydia Hessel, Ruth Whearty, Mamie Johnson, Dorothy Rugh, Clo Bixler, Mary Nuttle, Katherine Whitten; Purple, Katherine Horner (captain), Edna Hoke, Bertha Butler, Martha Walker, Helen Priestly, Frances Smith, Mary Etzold, Colleta Mayden, Bertha Hyde, Florence Barnhisel, Beatrice Galtner; Pink, Florence Banker (captain), Dorothy Ryherd, Mollie Morton, Grace Lyness, Blanche Kershaw, Myrtle Dubbs, Olive Hering, Irene Bradley, Curtis Watts, Beryl Bulard; Gray, Clara Evans (captain), Belle Hagans, Helen Parker, Beopie Hoke, Jeannette Sleeper, Meta Baker, Gladys Stocker, Mary O'Neil, Roxie Meyer, Ruby Saxton, Mary Roessner; Lavendar, Betty McColn (captain), Abbie Clair Dennen, Grace Turner, Allene Lemons, Hattie Betz, Florence Stebbins, Genevieve Mott, Elmira King, Ethel Benfield, Lonora Doll; Green: Anna Best (captain), Ruth Willis, Irene Hays, Grace Herr, Grace Schwandt, Justine Moss, Christine Burger, Eleanor Davis, Ada Montague, Nille Kneeland, Pearl Gabriel; Yellow: Nellie Jorns (captain), Duella Mall, Corine Thiele, Lillian Rommel, Jessie Campbell, Lavina Waugh, Nellie Griffith, Helen Dunlap, Mildred Bobb, Lanora Russell, Marie Foster; Red: Dot Lukert (captain), Frances Johnston, Lucille Anderson, Inez Coleman, Mary Betz, Margaret Nettleton, Frances Johnstone, Helen Adams, Ida Walker, Joe Davis.

The schedule for the tournament games is as follows: Orange-Pink, Purple-Lavendar, Tuesday, January 18; Grey-Green, Yellow-Red, Wednesday, January 19; Blue-Orange, Pink-Purple, Thursday, January 20; Lavendar-Gray, Green-Red, Friday, January 21; Yellow-Blue, Orange-Purple, Friday, February 4; Pink-Lavendar, Grey-Yellow, Monday, February 7; Red-Pink, Blue-Purple, Tuesday, February 8; Green-Blue, Yellow-Orange, Wednesday, February 9; Orange-Lavendar, Pink-Grey, Thursday February 10; Red-Purple, Blue-Lavendar, Friday, February 11; Green-Orange, Yellow-Pink, Monday, February 14; Yellow-Purple, Red-Lavendar, Tuesday, February 15; Orange-Grey, Green-Pink, Wednesday, February 16; Blue-Grey, Green-Purple, Thursday, February 17; Yellow-Lavendar, Red-Grey, Friday, February 18; Green-Lavendar, Red-Orange, Monday, February 21; Blue-Pink, Purple-Grey, Wednesday, February 23.

endar, Pink-Grey, Thursday February 10; Red-Purple, Blue-Lavendar, Friday, February 11; Green-Orange, Yellow-Pink, Monday, February 14; Yellow-Purple, Red-Lavendar, Tuesday, February 15; Orange-Grey, Green-Pink, Wednesday, February 16; Blue-Grey, Green-Purple, Thursday, February 17; Yellow-Lavendar, Red-Grey, Friday, February 18; Green-Lavendar, Red-Orange, Monday, February 21; Blue-Pink, Purple-Grey, Wednesday, February 23.

SIX FREE GOALS BEAT AG SCHOOL

GAME WITH MANHATTAN IS FREAKISH AFFAIR

Final Score Is 6-5—Preps Do Scoring Against First Team

In what was probably the most freakish game that has been played on the college court for some time, the School of Ag basketballers lost to Manhattan high school by a score of 6 to 5 Saturday afternoon.

The novel thing about the game was the score and the way in which it was obtained. The Ag guards kept a careful watch around their basket and prevented their opponents from throwing a single field goal in the entire game. Manhattan won the game solely by free throws. In the first period the high school started off with her second string team with the exception of her center, and the game was a slow one till the end of the first half, when the score stood at 3 to 0 against the preps, no field goals being made.

In the second period, Manhattan put in her first team which made things move faster but did not seem to baffle the Ags so much as did their predecessors, for it was in this period that the preps did all their scoring.

ing. Scholes, center for the Ags, threw the only field goal in the game. The Ag line up was as follows: Scholes, c; Quinn, f; Brooks, f; Glover, g; Sumner, g; Stolley substituted for Quinn. Prof. H. H. Haymaker was the referee.

HOLD TRYOUTS FOR ORATORICAL

EVERY STUDENT ELIGIBLE TO TRY FOR CONTEST

Hold Valley Classic at University of Missouri March 18—K. S. A. C. Fourth Last Year

On February 18 the try out will be held for the Aggie orator to the Missouri Valley oratorical contest which is to be held at the University of Missouri on Friday, March 18. The try outs will be held under the auspices of the public speaking department of the college. Every student of the college is eligible to the tryouts, as it is not limited to societies. The rules are liberal, requiring only that the oration does not exceed 1,700 words and that it has not been used in any previous inter-collegiate contest.

This contest is the annual oratorical classic of the valley and was held at K. S. A. C. last year after having been revived for the first time since the war. The contest last year was very successful. Orators from the Universities of Missouri, Washington, Oklahoma, and Kansas, and the Iowa State college participated in the event. The University of Nebraska entered but withdrew. In the contest last year J. Oscar Brown, the K. S. A. C. orator placed fourth against strong competition.

The Aggies have a good record, having won third place two years in succession, once at Ames and once at Des Moines. The placing last year

was made ahead of both Iowa and Missouri.

Since this is the annual oratorical classic of the valley, all the best orators of the valley participate and it is essential that the best orator of K. S. A. C. take part in the contest. The Aggies have a very advantageous place on the program this year. The Aggie orator last year had the extreme disadvantage of appearing first.

Prof. J. G. Emerson, head of the public speaking department, makes this statement concerning the contest. "I am anxious that every student with ability try out for the contest. From my observation of the contest in past years, I am sure we have here material for the making of a winning orator."

Entries for the tryout should be made to Professor Emerson before February 15.

VOCATIONAL MEN PLAN CLUB TO FOSTER SOCIAL INTEREST

Appoint Committee of Five to Draw Up Charter to Be Submitted at Next Meeting

Men in college in training under the supervision of the federal board for vocational education at a meeting held Thursday evening decided to organize a club, the purpose of which will be to further the mutual interests of the men and provide a means of becoming better acquainted.

A committee of five was appointed to draw up a charter and complete plans which will be submitted for approval at a later meeting. It is the purpose of the men to secure club rooms if possible where they may meet in a social way.

SPEECH CONTEST NEARING CLOSE

HOLD SEMI-FINALS FRIDAY AND SATURDAY

Eight Representatives from Fifteen Classes To Enter Finals—Public Is Invited

The semi-finals for the \$10 prize in public speaking will be held on Friday and Saturday of this week. It is planned to choose four representatives from Prof. H. T. Hill's eight classes and four from Prof. J. G. Emerson's seven classes and these eight will compete for the cup early in examination week.

Some very promising public speakers are trying in the public speaking contest, demonstrating that much of a practical and entertaining nature can be said in the course of a five or six minute speech.

The public is invited to these finals and notices will be posted giving the time and place.

Mrs. G. A. Bice returned from Denver last week. Her return was delayed because of business.

F. E. Fox, assistant professor of poultry extension, has resigned his position here. He left Manhattan Friday for Corvallis, Ore., where he holds a similar position in Oregon State Agricultural college.

O. D. Gardner, senior in electrical engineering, who has been with the Commonwealth Edison company of Chicago since June, has returned to college to continue his work. Mr. Gardner talked last Thursday afternoon at the electrical engineering seminar. He told of his experiences with the Commonwealth company.

Miss Grace Hesse was a dinner guest at the Alpha Delta Pi house Thursday evening.

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, FRIDAY, JANUARY 21, 1921

NO. 32

ATHLETICS TO BE FEATURED THIS SUMMER

FIVE MEMBERS OF COACHING STAFF OFFER COURSES

WORK IS DESIGNED FOR TEACHERS

Football, Basketball, Track, Field, Playground Management, and Social Courses For Women To Be Given

Mike Ahearn has announced a summer school course which is far more complete than anything ever before offered in the Missouri Valley conference.

Five members of the athletic department instructional staff will offer courses in football, baseball, basketball, track and field sports for men, gymnastics, folk dancing, games, esthetic dancing, and the technique of basketball, baseball, and hockey for women, and playground management for both men and women.

This summer school work is designed primarily to meet the requirements at grade, high school and college teachers, who have part time instructional work in this line, in addition to their work. It is also expected to appeal to coaches who feel the need to further extend their knowledge in the various fields of athletic work.

Mike May Teach Baseball

Coach C. B. Bachman will have charge of the instructional work in football and track. Coach E. B. Knott will offer the courses in basketball and playground management. Mike Ahearn will teach baseball unless another assistant coach is secured by the time the summer school opens.

The class in football will take up the theory, art and practice of the game in different parts of the country, according to Coach Bachman, who has wide experience in the gridiron game, coaching both in colleges and the naval service. The work will include the spirit of the game, rules, tackling the dummy, charging lead, defense, passing, systems of interference, signals, training, and equipment.

In the track and field work, Coach Bachman will give lectures and practical field work. It will cover all track and field events. Bachman was a member of the track team at Notre Dame and has coached track since leaving college. Students in track will have the advantage of working under a man who saw the world's best athletes at the Olympic games last summer. He attended these games for the purpose of improving his knowledge of track and field sports.

Complete Course in Basketball

Purple Masque dramatic fraternity wishes to express its appreciation to those people and business men of the town and college, who have assisted in making possible desired scenery and stage properties. The Paine Furniture company has loaned several expensive pieces of beautiful furniture, the Hull Hardware company furnished various utensils for the kitchen scene, and an electric stove was obtained from the Manhattan Gas and Electric company.

Prof. H. W. Almon of the carpenter shops assisted the Purple Masque by making an antique appearing medallion, a spinning wheel, and a spinning jenny, which are to be used in the play. The attractive portraits which are to be hung on the walls, and the chinaware and windows were all painted by Miss Schell of the design department.

The special courses for women under the direction of Miss Edith Bond have been popular summer school courses in the past. Miss Bond is regularly in charge of the women's physical education during the fall and spring semesters. Miss Bond is a graduate of the University of Wisconsin and has both the training and experience of a trained athletic director.

TRACTOR SHORT COURSE HAS ENROLMENT OF FORTY-THREE

Special Lectures Are Given Every Saturday

The enrolment of tractor operators short course at the present time is 43 with 11 federal board men who will continue in this department until the end of the semester. There are 22 men from the farmers short course taking traction engines, four taking gas engines, and 39 taking field machinery.

A special lecture is given every Saturday at 8 o'clock in the barracks auditorium on topics of present day interest with such speakers as Dean R. A. Seaton, Dean F. D. Farrell, Prof. H. W. Davis, Prof. J. E. Kammerer, and Prof. L. A. Fitz. All students as well as town people are cordially invited to attend these lectures.

The Busy Body

Question: Do you think that the Profs' salaries ought to be raised now when everything else is coming down?

Dr. L. Jean Bogert: "It seems to me that it is necessary to raise the salaries if the instructors are to be kept."

Prof. J. W. Searson: "I do think the salaries should be raised if a high class of professors is to be kept at this institution. I notice merchants are selling shoddy stuff and cheap goods at half price but are reserving their highest class goods to be sold at staple prices. Colleges should get rid of bargain counter professors and should continue to increase salaries of all who continue to do the most valuable service to their colleges and states."

Prof. Cecil F. Baker: "Salaries of professors should have been raised before everything else went up."

PURPLE MASQUE PLAY IS TONIGHT

MUSIC TO BE FURNISHED BY 20 PIECE ORCHESTRA

Towns People and Business Men Lend Stage Properties—H. W. Almon Makes Antique Furniture

The curtain rises on "Come Out of the Kitchen," super attraction of Purple Masque and a Broadway comedy success, at 8 o'clock sharp this evening. Tickets have sold well and reservations have been made rapidly. Seats may yet be reserved at the down town Palace drug store and the Co-op book store.

Practically the same persons who served at the first number of the Artists' series will act again as cashiers. Music will be furnished by a picked orchestra of 20 pieces. It is the orchestra which played excellent music for the chapel presentation of "Madam Butterfly," and it is exceedingly well balanced. A unique feature is that a piano will not be used, since it is not considered necessary to harmony.

All sections, string, wood wind, and brass wind, are fully complete. This is something new in the college orchestra as heretofore some instruments have always been lacking to make a section complete.

Four numbers will be played during the evening: Overture—"Beautiful Galatea," Supper; Selection—"Baron Trenck," Albini; Suite—"Valse Gracieuse" and "Souvenir," Edward German; March—"New York Hippodrome," Sousa.

Purple Masque dramatic fraternity wishes to express its appreciation to those people and business men of the town and college, who have assisted in making possible desired scenery and stage properties. The Paine Furniture company has loaned several expensive pieces of beautiful furniture, the Hull Hardware company furnished various utensils for the kitchen scene, and an electric stove was obtained from the Manhattan Gas and Electric company.

Prof. H. W. Almon of the carpenter shops assisted the Purple Masque by making an antique appearing medallion, a spinning wheel, and a spinning jenny, which are to be used in the play. The attractive portraits which are to be hung on the walls, and the chinaware and windows were all painted by Miss Schell of the design department.

CHINA NIGHT TO BE SATURDAY 22

GIVE ONE ACT PLAY DEPICTING CHINESE SCHOOL LIFE

Girls' Loyalty Club to Have Charge of Ticket Sales—Money To Relieve Famine Stricken East

The Chinese students attending K. S. A. C. will give an original play entitled "China Night" tomorrow evening.

The play will show many interesting things which take place in and around a typical Chinese school house. The actors are all Chinese and know the Oriental life because it is their own. There will be many

of the old Chinese songs during the performance.

The play is given by the Chinese students in order to raise money to relieve the suffering in famine stricken China. There are to be no reservations made and therefore it will be necessary to come early in order to secure a good seat. Twenty five cents admission will be charged.

Girls' Loyalty club are to have charge of the sale of tickets. The sales force has been organized under 10 captains with seven girls under each captain. The captain whose team sells the most tickets gets as first prize a Chinese fan, the one selling second greatest amount gets a box of tea, and the third gets a silk handkerchief. The individual girl who sells the largest amount gets a fan, the second prize is a box of tea, and the third prize a Chinese handkerchief.

INTRAMURAL BASKETBALL GAMES AGAIN IN PROGRESS

Acacias Win from Alpha Psi, Betas from Sigma Phi Eps in Monday Evening Games

Intramural basketball finally got started off again Monday evening. The gym was in use Tuesday, however, so no more games were played until Wednesday evening.

The results of the games Monday were as follows: in division A Eureka club 17, Erwin independent 20, Parman forfeited to Phi Gamma, Alpha Psi 17, Acacia 23, Beta Theta Pi 19, Sigma Phi Epsilon 15. In division B, 1st battalion 15, Y. M. C. A. 27, College club 18, second battalion 19, Veterinary Medical association forfeited to Sigma Phi Delta, and Omega Tau and Boomerang failed to report score.

PLAN TO MAKE COOPERATIVE EXPERIMENTS MORE VALUABLE

Work to Be Increased and Intensified in Few Tests, Laude Explains

H. H. Laude, head of the department of cooperative experiments, has worked out a plan for next year by which he hopes to make the results of the cooperative corn and sorghum experiments more valuable to the farmers of Kansas.

Mr. Laude explains that under the new plan the cooperative work will be increased and intensified in a few tests, and that the number of varieties of corn and sorghums experimented with in the other tests over the state will probably be reduced. The idea is to make less tests but make them more intensive and keep more complete records than before so that the results will be known to be absolutely accurate. These tests will be located in different sections so that the state will be well represented.

OVER SUPPLY OF TEACHERS RAISES STANDARDS IN KANSAS

Return of Former Instructors From Commercial Field Makes Competition Keen

Kansas no longer has a teacher shortage, according to President T. W. Butcher, of the Kansas State Normal.

"The crisis in the shortage of teachers has passed and the rush from the commercial field has begun," President Butcher said.

"The return of former teachers will make competition keen. It will force thousands of below standard teachers now teaching on temporary certificates to drop out of the profession or qualify properly for their jobs. The best teachers will survive. The result will be a greater demand for teachers with professional training than there has been since the war. This reaction will bring increased enrolments in colleges."

Block and Bridle Elect

Block and Bridle club, national organization of animal husbandry, met Tuesday night, January 18. The new officers elected were: president, A. D. Weber; vice president, C. M. Willhoite; secretary, H. D. Finch; treasurer, Halford Moody; marshal, J. J. Moxley.

Bill Knostman Works for Votes Then Forgets to Name Girl of His Choice

Rather unusual to see a man working in a girl's popularity contest but they sometimes do it.

Bill Knostman, being a member of the K fraternity is seen every time a drive is made for athletic tickets out in main hall and on the campus, enthusiastically working for the good of the cause. But this time Bill seemed to think that the popularity contest was a worthy cause, and in accordance with this calculation he placed a receipt book in his coat pocket, put a pencil behind his ear, formulated a salesmanship line of gab, and started out in search of students, who, he thought, could be persuaded to part with the necessary "long

WIT MAGAZINE WILL FEATURE AGGIE QUINTET

EVERY COPY OF COMING ISSUE MUST BE SOLD

TO HAVE HIGH GRADE CARTOONS

Leading Story on Dancing Written by Prof. H. W. Davis—Two Thousand Copies to Be Printed

The next issue of the Brown Bull, which will be published about February 5, is dedicated to the basketball men. A great deal of the material in the magazine pertains to basketball and one entire page features the team. The team's pictures are given and personal notes are written about each of the 11 men on the first squad.

The cover page is to be one of the most artistic that a college wit magazine has ever used. It is in purple and yellow—showing an Aggie basketball player just as he is trying for a goal. It is entitled "A Slim Chance."

Use Many Cartoons

More cartoons are being used for this coming issue. The reading material is, according to the editor, above the standard used by most college wit magazines. Two thousand copies will again be printed, and due to the fact that advertising has taken a slump, every copy must be sold.

A new interesting feature has been added to the Brown Bull. The leading story of the coming issue is written by Prof. H. W. Davis, who is a regular contributor to Judge. The article deals with the several forms of dancing at K. S. A. C.

Another distinctive thing will be the high grade cartoons, drawn by Don C. Ballou, W. G. Giles, and H. H. Hunter. The contest for securing the best name for the picture in the magazine has probably caused more interest than anything else. More than 150 names have been turned in for the picture which appeared in the homecoming number of the magazine. The winners of the contest will be announced in the basketball number and a new contest will be opened.

Every Copy Must Be Sold

Sigma Delta Chi and Theta Sigma Phi, publishers of the Brown Bull, intend to make the publication the leading wit magazine of the American colleges. It has already been recognized as the best humorous publication of the American agricultural colleges.

Due to the fact that the merchants are not advertising at the present time, because of unsettled prices, it will be necessary that every copy of the coming issue be sold.

HONOR TO KANSAS BUILDERS THROUGH EFFORTS OF BAKER

To Form State Chapter of American Institute of Architects

Prof. Cecil F. Baker has just received authority from the Octagon house in Washington, D. C., the headquarters of the American Institute of Architects, to form a Kansas chapter of the American Institute of Architects. This is a real honor for the architectural profession of Kansas, as the American Institute of Architects is one of the oldest and most respected of the national professional societies. There is but one member other than Professor Baker in the state at present, and it is largely through the efforts of Professor Baker that this honor has been granted. The initial steps toward perfecting the organization will be made this week at a meeting in Topeka.

Dignity of Learned Senior Is Ignored By Town Ruffians

The recent snow brought the usual aftermath of crimes and encroachments on the dignity of some of our best students. Gangs of small boys armed with snowballs of more or less doubtful snow content, roamed the streets.

The other day one of our most prominent and most awe inspiring seniors was majestically wending his solitary way down the street. The ruffians saw him coming. He gave them the cold eye and wended masterfully on. But if they were awed they failed to register emotion. The command was given to fire at will. It was an insult to his dignity but he ducked. He had a duck coming. It was at this inopportune moment that his feet decided to relinquish their hold upon the surface of the walk. Hestretched gracefully—more or less—upon the thoroughfare. The law breakers, with generous cheer, praised the agility of their recent victim and passed on to fresh fields.

COLLEGE STOCK MAKES RECORD

SHEEP WIN FIVE FIRSTS AT DENVER SHOW

Steers Win Four Firsts, Four Seconds, One Third, and One Fourth—Ship Livestock to Wichita

Steers and sheep sent from this college to the National Western Stock show held at Denver during the past week made a splendid record according to Dr. C. W. McCampbell, who has just returned from the show.

The steers from the college were entered in 10 different classes, according to their ages and breeds. The cattle won four firsts, four seconds, one third, and one fourth place. Kansas Scot, the Galloway steer that was champion at the Chicago show, was shown at Denver in the Angus calf class and took third place.

The college sheep made the best showing that has ever been made, according to Doctor McCampbell. The sheep had not all been shown when he came away but up until Tuesday they had been shown in eight different classes and had won five first places and three seconds.

Six head of the college steers and 20 head of sheep will be taken from the Denver show to Wichita, where they will be shown at the Kansas National Livestock show next week.

Wednesday the animal husbandry department sent a consignment of stock from Manhattan to the sales which are to be held at the Wichita show. This consignment consists of one Percheron stallion, one Belgian stallion, seven head of hogs, and 10 head of cattle.

HELP VISITORS TO FIND ROOMS

OVER 2,000 EXPECTED FOR FARM AND HOME WEEK

Y. W. in Charge of Lodging Situation—Students Must Cooperate

The members of the Y. W. C. A. have been asked to take charge of the work of securing rooms for the visitors who will be in Manhattan during Farm and Home Week.

Superintendent T. J. Talbert has estimated that there will be a crowd of between 1,500 and 3,000. If rooms are to be provided for all of these visitors, the students must cooperate.

Each college girl who lives near the campus is asked to see that one or two of the little girls who are members of the county clubs have a place to sleep. The guests will pay for their rooms, and will take their meals on the hill. The plan of providing entertainment for the children in the domestic science hall during the noon hour, which was such a success last spring, is to be followed this year.

Key Installing Sewer System

Clyde C. Key, B. S. in civil engineering, 1918, is now office engineer for the C. R. Nichols company, Wichita Falls, Tex. The contract upon which this company is now working is the installation of a new sewer system for Wichita Falls. The total length of the sewer system will be about 35 miles. The sizes of the mains and laterals will vary from 6 inches up to 39 inches in diameter. The depths at which the pipe will be laid will vary from a few feet to that of 22 feet below the surface.

GAMES WITH DRAKE U. AND IOWA STATE

BILL KNOSTMAN WILL WEAR HIS NEW GOGGLES

EXPECT SOME CLOSE CONTESTS

Aggies Are Showing Good Defensive—Practice For Stronger Offensive And Consistency In Free Throwing

Feeling their oats just a little bit, after their two top-sided victories over the Sooners last week end, the Aggies started on their northern swing into Iowa yesterday on the 5:20 Union Pacific. Coach Knott and eight of his basketballers comprised the invading squad that will compete with Iowa State at Ames on Friday and Saturday, January 21 and 22, and with Drake university and Des Moines university, on Monday and Tuesday the 24 and 25. The men taken were Bunker, Williams, and Knostman, forwards; Kuykendall and Jennings, centers; Brady and Blacksmith, Cowl, and Foval, guards.

Bill's Headlights Will Help

Bill Knostman will appear on the northern courts in his new rigging which enables him to wear glasses while on the court. Bill's goggled appearance is calculated to humfozzle the opposition to such an extent that he can better his record of 7 field goals made in the second Sooner contest. Coach Knott expects that Bill's new facial adornment will add much to his accuracy on long shots, and to his speed on the floor, as they will remove the handicap of near sightedness which hampered Bill, both in shooting baskets, and in guarding.

Coach Knott expects some close contests on the trip. The first stop on the team's trip is at Ames. Iowa State has been beaten four straight games so far this season. Two defeats, those by Missouri, were decisive, but the two wins by Kansas were by narrow margins. Had the longer Ames continued a minute longer Ames would probably have won from the Jayhawks. The Drake game should prove easier. The Bulldogs have not as strong a team as other valley aggregations on their showing so far this season. The Des Moines college game is not a conference contest, being taken on to help on the finances of the trip. Drake refused to play two games, so some other contest had to be secured to enable the team to make the three day stay in Des Moines.

Hard Practice This Week

This week's practice has been aimed at developing a stronger offensive than that exhibited in the Sooner games. The guarding and defensive work of the Aggies left little to be desired. The second game ended with but one field goal in the Sooner summary. That fact, in itself, is sufficient evidence of the quality of the team's defensive play. However, many sure points on field goals were bobbed. Cap Bunker's free throwing was decidedly off on Saturday. He missed 9 of 10 tries at the gift counters—enough to have lost a close game. Ham has been putting in a lot of overtime this week trying to gain consistency in free throwing.

After the Iowa trip the Wildcats play a one night stand at Nichols gymnasium with the Phillips university five. This is not a conference game, but should be one worth watching. The Phillips athletes won a close game from the Aggies in their own ballfield last season, but it is exceedingly doubtful if they can repeat this victory at Manhattan.

ELECT WALTERS HEAD FARM SHORT COURSE ORGANIZATION

Men to Have Basketball Team—Practice Starts This Week

The Farmer short course men met last week and organized a club, the purpose of which it to promote good fellowship among the men.

At the meeting the following officers were elected: president, Fred Walters; vice president, William Von Wanden; secretary, Ray Balner; treasurer, Guy Gunn.

The men decided at the meeting to organize a basketball team and to begin practice this week. The following men signed up to try for the team: Fred Walters, John Gehrke, Dan Biegert, Henry E. Dabekquist, Jim Connery, Almon Grover, Leo Carey, Walter Terry, Arthur Regnier, Elmer Fatzner, Wayne Allen, Leslie Oberhelman, Fred Dakin.

THAT PATH OF LEAST RESISTANCE

"Keep Off the Grass."

So say the signs which have been recently put up at various places on the campus where students have shown a tendency to follow the path of least resistance and make a track to the nearest building or entrance.

To be sure, it's a great temptation along about 11:56, for the Aggie coed who has a class in the domestic science hall to make a dash for the coveted place in the cafeteria line, and blame the authorities who obstruct the way with those bothersome signs.

"What's the need of grass signs in the winter anyhow?" she is apt to reason, and as far as some of us are concerned, there does seem to be some question as to their use.

The campus at K. S. A. C. ranks high among those of the United States; do we want to see it cut up by unsightly paths in the spring? Then let's be a little more careful now to observe the rules so that we will have no reason to feel anything but proud of our "campus beautiful."

"THAT FAVORED ELEVEN"

Please tell "One Who Knows" to come out of the bushes, and let us get a look at him. He is just the man we want to help stamp out politics in athletics if such a thing exists. The athletic department makes it one of its chief aims to give everyone a square deal, and if I have been an offender, I certainly want to right my wrongs.

A true sportsman is a good loser and if Mr. "One Who Knows" was among the unfortunates who were cut from the basketball squad, not for political reasons, but because they did not measure up to varsity calibre, he certainly is not a good loser. A poor loser is a detriment, not an advantage to a team, and to a school.

Mr. O. W. K. says, "Eleven men were chosen before the plays, which were to be used all season, and their names were given out." If the gentleman will refresh his memory, he will recall that the very first day after I took charge of the squad our plays, system of team work, and other notes of advice were posted on the team bulletin board in the dressing rooms. Candidates for the team who were really interested studied these and profited thereby. Besides posting these notices I gave blackboard lectures in which I diagrammed every play, to the whole squad.

The squad was not cut to eleven men until two days before the Ottawa game. Had I been given charge of the squad earlier in the season, it would have numbered but eleven men two weeks before the Ottawa game, and I'll dare say that it would have shown better against Ottawa than it did.

The coach must single out the best players on his squad early in the season. This is known in athletic parlance as cutting the squad. Every coach puts his squad through this process which is merely an application of the Darwinian theory of the survival of the fittest. I, myself have been cut from many athletic squads.

Some of the bigger universities in the east having two or three gymnasiums or practice rooms, and a coaching staff numbering from 10 to 15 men take those who have been cut from the squad and carry them throughout the season. Such a practice is manifestly impossible at K. S. A. C. with our limited gymnasium facilities. Take a look into our only gymnasium any afternoon from 4 to 6 o'clock. There in the limited confines of the room are being carried on instruction in boxing, varsity and freshman varsity basketball, track, highjump, pole vault, shot put, and wrestling. In addition a waiting list is always in the southeast corner room where handball is played. I would advise Mr. O. W. K. to try this sport. It makes a person quick on his feet, which is a big factor in playing basketball. Practice on one of the intra-mural teams would also be a help in developing ability for those not on the varsity squad.

I hope that I have shown Mr. "One Who Knows" and others who may be of like mind that it would be folly to try to turn out a winning team if I could not center my attention on only a few men rather than a large number in such a crowded space. The eleven men whom I selected were, in my judgment, the best men who came out for the squad, regardless of creed, fraternity, religion, or any other political, or so-called political, reason.

If there are better players in this school I would be delighted to see them. The best and most logical way to get a square deal is to bring any complaints direct to the athletic office, but not to make unjust and ungrounded accusation in an anonymous letter to the press. Be a man, Mr. "One Who Knows," come out, let's talk this over by ourselves, and I assure you that you will sign your next letter, "One Who Knows Better."—E. A. Knoth.

..... through Anderson hall; you're not at home.

Stay on the walks. The first thing you know the K. S. A. C. campus will be looking like K. U.'s.

Call at the post office every day, then if it doesn't hear you, yell at it.

Don't read your mail in front of the post office, the whole school will know all your family history within a week.

Remove your hat in passing

Buy an Artists series ticket and learn to appreciate good paintings.

Sit through any public lecture or concert until the end of the program. You may stumble and fall down on the way out.

Questions That Freshmen Would Like to Ask

How long will the compressed air tank in C26 last if Prof. H. H. King continues to dust his eraser on it 100 times a day?

What are deans for?

How many pieces will a cafeteria pie make?

Do instructors ever have any fun? Are we as hopeless as the teachers say we are?

Where does the smell in the veterinary building come from?

What is a college mixer for?

Did we learn anything in high school?

Hush little freshman, don't you wall,

When you're a sophomore, you'll get some mail.

SHOOT PURPLE MASQUE CAST

TAKE PICTURES OF CHARACTERS AND SCENES IN PLAY

Costumes Furnished by Kansas City Firm—Announce Members of Cast

The cast for the Purple Masque play "Come Out of the Kitchen" was lined up and shot Monday afternoon. No, not with a revolver but with a camera. The cast spent the afternoon in the college photography shop where F. E. Colburn took pictures of the cast individually and also of some of the scenes in the play.

The costumes for the play are here and they were used in making the pictures. The costumes were furnished by Theodore Lieben, outfitter, of Kansas City, Mo. One of the costumes was made especially for this play. Miss Helzer wishes to correct the impression that this play is to be a costume play, as only the one costume was made to order.

The members of the cast are Burton Crane, from the north, Earl Bruce; Solon Tucker, his attorney and guest, N. D. Alleman; Paul Daingerfield, alias Smithfield, H. Riggs; Charles Daingerfield, alias Brindlebury, Vernon Carrier; Randolph Weeks, agent for the Daingerfields, H. Sebring; Thomas Lefferts, statistical poet, Donald Elbert; Olivia Daingerfield, alias Jane Ellen, Ruth Martin; Elizabeth Daingerfield, alias Araminta, Curtis Watts; Mrs. Falkener, Tucker's sister, Gladys Newton; Cora Falkener, her daughter, Alice Carter; Amanda, Olivia's black mammy, Dorothy Settle.

Miss Olive Mitchell, Miss Florence Meyer and John Elliott, of the music department, entertained at White City Thursday.

Dr. A. A. Holtz of the Y. M. C. A., was in Topeka Wednesday attending the state executive board meeting of the Y. M. C. A.

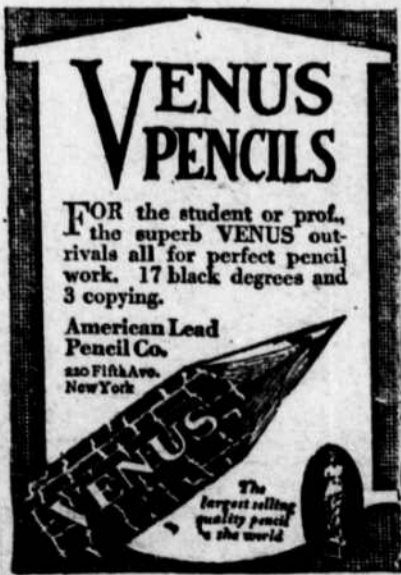

The college has a supply of coal on hand sufficient to last at least to the end of the fiscal year. For some time the college trucks and teamsters have been hauling coal so that there will be no danger of the school having to close down on account of a shortage.

Dean Mary Pierce Van Zile will attend the annual Kansas deans of women meeting in Lawrence January 21 and 22. She will lead the discussion on the duties of the deans of women.

Miss Mildred Inskeep, field secretary of the Y. W. C. A., who spent a week at her home in Manhattan, is now at the Hays Normal school.

Dean E. L. Holton, of the department of education, is attending an administration council meeting in Topeka. He will return Monday.

J. R. Hobart of Bloomington, Ill., will give a talk here Farm and Home week on "Corn Root Rot."

215 Fifth Ave., New York, Dept. D32

R. C. RANKIN TALKS TO MEN OF RURAL CHRISTIAN WORK

Interviews 42 Young Men Interested in Religious Leadership

Rev. Raymond C. Rankin, regular pastor of three rural churches in the Cumberland Mountain district of Tennessee, spent Sunday and Monday at the college for the purpose of interviewing young men in the possibilities of work as Christian leaders in rural communities.

He spoke to the Christian Endeavor society of the Presbyterian church at 6:30 o'clock and at the Baptist church at 7:30 o'clock Sunday evening on the subject "The Call of the Rural Ministry."

He spent a busy day Monday in the office of Doctor Holtz in the Recreation center, having during the day interviews with 42 interested men students. The closing meeting of the day was held at the Y. M. Monday evening, when he gave an address on the "Possibilities of the Neighborhood."

He expressed himself as satisfied with his visit at the institution, feeling that he had accomplished the purpose for which he was sent by the director of education of the Presbyterian Home Mission board.

Shuart Talks To Architects

Theodore Shuart, architecture, '18, was at the college last week at the invitation of the department of architecture to talk to the students of the department. After graduation Shuart was in the navy for a year and a half. After being discharged he worked for a year with Hulise and Company of Hutchinson, later going with Mann and Gerow of the same city. Shuart has been very successful in his architectural work, and is receiving a remarkably good salary for one so recently graduated. He talked to the students of his experiences in the profession, telling them of the difficulties and opportunities one may face in the first years after college. It will be remembered that Mrs. Shuart was Helen Hunter, '18.

Adopt Picture As Symbol

A large copy of "Lincoln Working by the Firelight," has been hung in the outer office of the home study service. F. E. Colburn, college photographer, took to Chicago the small print, used as an illustration in Tarbell's "Life of Lincoln," and supervised the making of the copy. It is the purpose of the department to use this picture to illustrate posters, leaflets, and other advertising material put out by them, until the people of Kansas will recognize it as a symbol of the home study service.

Mike Brulle of the Phi Gamma fraternity is seriously ill in a hospital in St. Joseph, Mo.

Sunday dinner guests at the Delta Tau Delta house were Miss Ruth Willis, Miss Ruth Peck, Miss Hortense Caton and Camp Charles who was back for the week end.

Rev. W. U. Guerrant, student pastor of the Presbyterian church, returned from Chicago Friday where he has been attending the convention of the student pastors of America.

The new members of the Eurodaphian literary society gave the program Saturday afternoon; this is an annual event with the Euros. After the program refreshments were served.

William Barber, who was graduated here last year, is now the general manager of the Larabee mills at Marysville.

FRESHMAN AGS MAKE SHOWING

DEAN F. D. FARRELL COMPLIMENTS FIRST YEAR MEN

Class Made Best Mid-Semester Grades in Division—Combines Size And Quality

After making a study of the situation with reference to grades below passing received by students in the division of agriculture last mid-semester, Dean F. D. Farrell says, "I wish to compliment the freshman class in agriculture. These freshmen, as a class, made a better mid-semester showing than any class in the division except the graduate students."

"At mid-semester a year ago 22 per cent of the members of last year's freshman class secured grades below passing in one or more subjects. This year the freshman percentage is 20, or about 9 per cent better than last year's class. This year's sophomore, junior, and senior classes made a distinctly poorer showing than was made by the corresponding classes at mid-semester a year ago. Of

course, not all the freshmen made good records this year. There is still room for a great deal of improvement. Nor did all this year's sophomores, juniors, and seniors make poor records. The statements made above refer to the respective classes as such."

The agricultural freshmen have an additional distinction this year. The class is the largest freshman class in agriculture which has ever been enrolled in a fall semester or term at K. S. A. C., according to Dean Farrell. If the class will continue to combine size and quality as it has started to do this year, it can and should be in 1924 the finest agricultural class the college has ever graduated.

Miss Jean Stewart, formerly an instructor in foods at this college, is now with the foods department in the University of Nebraska, at Lincoln. For some time after giving up her work here, Miss Stewart was engaged in extension work in Minnesota.

Prof. H. F. Wilson, head of the department of entomology at Wisconsin university, visited at the college last week.

DEMOLAY HOLD FIRST MEETING

TEACHINGS SIMILAR TO THAT
OF MASONRY

Z. R. Hook and N. L. Roberts Advis-
ors of Chapter—Plan to Give All
Student Dance

Last week in the Masonic hall the regular meeting of the Order of DeMolay was held. DeMolay has been recently organized here and at the present time there are over 60 members.

The organization is not a Masonic order, but it is being urged by the Masons as the teachings are similar to that of Masonry. Some of the things taught are patriotism, good son-ship, clean living, and better citizenship.

The first chapter, known as the mother chapter, was organized over a year ago in Kansas City, Mo. Since then chapters have been formed all over the United States. There are three organizations in Kansas, which are at Kansas City, Lawrence, and Manhattan. At present Manhattan is part of the Lawrence chapter and will be until a charter is granted to the group here.

All charter members of DeMolay were sons of Masons, although any boy can join from the age of 16 to 21 by handing his petition to DeMolay. Meetings of DeMolay are held every first and third Wednesday of each month in the Masonic hall.

Z. R. Hook and N. L. Roberts are advisors of the chapter. Officers are master counselor, R. J. Smith; senior counselor, P. J. Phillips; junior counselor, Lloyd Means; treasurer, Lester Jennings; secretary, Ralph Peters.

DeMolay is planning to give a dance the second or third week of the new semester which will be an all student affair.

Prof. H. W. Davis of the English department is conducting a series of Saturday morning lectures for the tractor and auto short course students.

Eye Strain

causes nervousness, irritability, and head aches. It is a simple matter to relieve eye strain. Our scientific test will tell just the kind of lenses required.

Our frames and mountings are comfortable and becoming.

Make Way For the Smiths--Hats Off For the Johnsons

Make way for the Smiths! Not for the Marys and Johns who have had their share of fame but for Opal, Edna, Verna, Thelma, Burr and the rest of them. If the majority rules then let's tip our hats to the Smiths for the Smiths have it over us when it comes to numbers. So says the new student directory which came out recently and is now being sold at the college postoffice.

Not only do the Smiths stand at the head of the student body with a grand total of 23, but five Smiths out number members of the faculty with any other appellation. A musician, a scientist, an architect and an engineer, here they are, A. B. Smith, librarian, B. B. Smith, assistant in farm engineering, R. C. Smith, assistant professor of entomology, S. A. Smith, professor of architecture and Elsie Smith, assistant professor of music.

But seconds deserve honorable mention especially when they stand next in line with a score of 21. Hats off to the Johnsons! But for that fatal "t" which Frances must write in Johnson on the Johnsons would play the Smiths to a tie.

Furthermore, though we of the republican faith have many grievances "against naughty Woodrow," can't we give a faint cheer for the thirds, the Wilsons who number 19?

F. D. Farrell, dean of agriculture, visited the annual meeting of the Kansas board of agriculture held at Topeka last week. The principal speaker of the day was Frank I. Mann of Gilman, Ill. From Topeka Gilman came to Manhattan when he spoke to the short course boys last Saturday at 11 o'clock.

NEW STUDENTS BEGIN COURSES

NEARLY 200 SHORT COURSE MEN
ENROL

K. S. A. C. Has One of Best Plants in
the Country for Instructing
Mechanics

Nearly 200 short course students registered Monday and Tuesday. A little over half of these students took out assignments in agriculture and dairying, the remainder taking auto mechanical work of different kinds. The enrolment shows that despite the slump in economic conditions throughout the country, the farmer realizes that greater activity than ever before is ahead, and is preparing for it.

Forty thousand dollars worth of machinery was purchased from the war department, to be used in the instruction here and in the making of good mechanics. K. S. A. C. has one of the best plants in the country for such instruction. Blacksmithing, woodwork, and carpentry draw many short course students. The only fees charged are for laboratory, making the students' expense much less than in commercial schools.

The student can take as extensive a course as he wishes. In the auto mechanics work, one week is devoted to classics study, two weeks to electrical study such as wiring, starting, and ignition, one week in babbiting and soldering, one week in valve grinding and ring fitting, one week on carburetor, and two weeks on the wiring of the car. The department has Dodge, Ford, Buick, Paige, Maxwell, Overland, Franklin, and Cadillac cars for experimental purposes. To finish the work the student is

given four weeks in the general repair and overhauling departments. All the short courses in both the engineering and agriculture divisions are a boon to the young man who wants to get as much practical and worthwhile knowledge as possible in the shortest space of time.

HOLD HIGH SCHOOL TRACK
AND FIELD MEET IN MAY

Athletes Here from all Over State—
"K" Men May Put on Circus

The annual state high school track and field meet will be held in the early part of May, on Ahearn field. Practically every high school of any importance in the state will be represented at this meet.

In past years these meets have been well attended by high school men as well as by the college students. The quarter mile track at this college is one of the fastest in the state and many of the best records have been made on this oval.

The athletic department have sent out invitations to the high school athletes and their supporters urging them to attend this spring's meet. While the high school men are here, every department of the college will cooperate in furnishing entertainment. One of the present plans is to have the "K" men put on an inter-scholastic circus for the entertainment of the high school athletes.

TO GIVE TRACTOR MOVIES
IN BARRACKS AUDITORIUM

Engineering Division Has Invited All
Interested to Attend

Two reels of tractor farming pictures were shown in the barracks auditorium to an audience of over 200 last week on Friday. It is planned to have tractor movies shown every week during January and February. The means of darkness of the barracks auditorium will be improved by light excluders according to plans of Dean R. A. Seaton.

The engineering division has invited all who are interested to attend these movies. The future dates will be advertised in the Collegian and town papers.

MEMBERS OF KANSAS CITY
CLUB TO DANCE JANUARY 28

Will Invite a Limited Number of
Outside Friends

At a meeting held January 13 the Kansas City club planned a dancing party to be given in recreation hall January 28. It is the purpose of the party to further the fraternal feeling among the Kansas City students so that they may work together in a more unified way in advertising K. S. A. C.

A limited number of outside friends will be invited to increase the number to the desired quota. The

chaperons who are to be asked are Prof. and Mrs. H. H. King, Miss Jessie Machir and Miss Hyde. Miss Machir has a nephew attending school from Kansas City and Miss Hyde was a former teacher in the Kansas City, Kans., high school.

The members of the club may purchase their tickets to the dance from F. F. Kimball, Neal Alleman, Carl Dethloff, Reid Machir, Esther Curtis, H. J. Kapka, and Ruth Gilles.

Clarence Huyche of Topeka, an alumnus of this school, spent the week end at the Phi Gamma house.

Sunday dinner guests at the Alpha Psi house were Miss Tunnicliffe, Dr. M. P. Schlaegel, and Jim Black of Cartersville, Mo., who has returned to resume his work in veterinary medicine.

Royal Ryan of the Phi Kappa chapter at K. U. visited at the Phi Gamma house over the week end.

Prof. L. E. Melchers has recently returned from a trip in the east. Among the points he visited, were Lafayette, Ind., Toledo, Ohio, Bloomington, Ill., and Purdue university. At Toledo, Ohio, Professor Melchers visited one of the largest greenhouses in the country. This greenhouse covers more than 15 acres, planted to lettuce. The crop is grown on the ground and the soil is plowed and prepared with horses.

EXTEND SERVICE TO MERCHANTS

NEW SALESMANSHIP COURSE TO
BE OFFERED HERE

Will Be Largely Introductory—Will
Put Students in Touch With
More Detailed Work

Does K. S. A. C. owe something
to the merchants of the state as well
as to the farmers?

Miss Louise Glanton, head of the
department of clothing and textiles,
thinks that it does, and is very
much in favor of the course in cloth-
ing salesmanship which is to be of-
fered next semester.

The work will not be purely aca-
demic. There is at present a great
demand for trained salesmen in the
big cities of the United States, and
positions are open in the large cloth-
ing establishments in Kansas for the
salesman who knows his work. The
importance of salesmanship has
only begun to be realized within the
last few years, and the field for educa-
tion in this line is comparatively new.

The idea of having a state sup-
ported school for the study of sell-
ing, in which men and women may
fit themselves for high class service
in the stores, is receiving much fa-
vorable comment and may be brought
up at the next session of the legisla-
ture.

Miss Glanton, who has been in
New York for the past month study-
ing salesmanship at the state uni-
versity, says that the work offered
next semester will be largely intro-
ductory, and will put the students in
touch with institutions where they
may further their education. Some
of these institutions are Marshall
Field's in Chicago, where the girls
begin with a salary of \$18 a week,
while they continue their education,
and the New York university, where
a two-year course in retail selling is
offered.

The minimum salary of graduates
from the latter course is \$3,000.
At the Carnegie Institute in Pitts-
burg there is a one-year course in
salesmanship, and while the students
receive no salary while they are in
school, neither are they required to
pay any fees.

According to Miss Glanton, who
clerked in New York for three weeks
during the Christmas season, the
necessary requirements of a first
class salesman are an average de-
gree of intelligence, and an unusu-
ally fine set of manners.

ENGINEERS HOLD NOVEL PROGRAM

MEMBERS RELATE PROFESSION-
AL EXPERIENCES

Guy Brown Explored Underground
While Mac Short Tried the
Heights

K. S. A. C. student branch of the
American Society of Mechanical En-
gineers enjoyed an interesting pro-
gram a short time ago, conducted by
Guy Brown, '21, and Mac Short, '22,
who related some of their summer's
experiences.

Brown took a trip to the western
coast via Colorado, Wyoming, Utah,
and California. A stop was made at
Salt Lake City for a few days with
the Utah Copper company, one of
the largest and oldest companies in
the United States. He experienced
several conditions of servitude while
traveling in different parts of the
Sierra Nevada mountains. His last
job seeking expedition took him up
into the mountains of California back
of Fresno. The trip was made on a
regular mountain climbing train.
The engine was small, a worm
driven eight wheel drive. Four of the
wheels were under the front oil
tanks. The tender consisted of two
large oil tanks.

On and near the top of the moun-

tains were several construction and
operating plants transmitting power
to the vicinity of Los Angeles. These
power plants secure their motive
power from Lake Honeywell, that
has an elevation of 7,000 feet. It is
2,100 feet straight down to the pow-
er plant from the lake.

Mac Short enjoyed his summer
above the ground among the clouds
over Nebraska, Missouri, and Kan-
sas. Mac says the winds in Kansas
have more velocity than in Missouri,
or Nebraska. His experiences in
studying human nature were quite in-
teresting. The people who are first
to see him land ask him varied ques-
tions. Mac found it interesting to
note that people who are quite talk-
ative and brave on land are the op-
posite in the air. Looping the loop
and other stunts seem not to be en-
joyed by a passenger on his first
trip.

K. S. A. C. Serves the Homes

The Kansas City Times of Wednes-
day, January 12, states in an editor-
ial that the biennial report of the
Kansas State Agricultural college to
Governor Allen, which has been is-
sued by President W. M. Jardine, af-
fords a wonderful encouragement to
those who have been hoping that the
day would come when a state college
would make its boasting the service
it renders in the homes and fields of
the state no less than in its educa-
tional work in the classroom. The
Jardine report shows that at last the
hope has been realized.

Not contenting itself with attract-
ing thousands of young men and
women to the school, the agricultur-
al college is using the state of Kan-
sas for a college campus. It is tak-
ing the college into the homes where
the colleges very properly belong.

Miss Mary Hazel Phinney, who is
teaching at Norway, spent two days
of last week at the Delta Zeta house.

Miss Enola Miller spent last week
end at the Chi Omega house. Miss
Miller has given up her work on her
father's paper in Belleville and has
accepted a secretarial position with
Senator Kyle during the session of
the legislature.

Raymond Frager and Russell
Zarker of Topeka were guests over
the week end at the Sigma Phi Delta
house.

Tom Neely spent the week end at
the Sigma Nu house.

The short course students number
98 in the agricultural division and
two in the commercial creamery
course.

Dan Dyatt of Topeka spent the
week end at the Sigma Phi Delta
house.

There will be no photography
course taught this spring due to the
fact that the instructors in the phys-
ics department, especially Prof.
J. O. Hamilton who has always
taught this course are so busy that
there will not be enough time left on
the schedule to give the work.

Sunday dinner guests at the Beta
Theta Pi house were Miss Mae Slet-
kin, Miss Edith Russell, Miss Gera-
ldine Hull, Dick Rogler, and Dr.
Frick.

Timely Topics

We are showing Ice and
Roller Skates for boys

TO HOLD H. S. CONTEST HERE

ANNUAL TRACK MEET COMES AT
SAME TIME

Agricultural Secondary Schools Will
Send Teams to Compete in
Livestock Judging

Next May, at the time of the an-
nual high school track meet at the
college, will be held a high school
judging contest open to the high
schools of the state.

All the agricultural high schools
of Kansas are invited to send judg-
ing teams here to compete in judging
various classes of livestock and farm
crops. Already general plans are
being made by a committee composed

of C. V. Williams, professor of voca-
tional education; Dr. C. W. McCamp-
bell, head of the department of ani-
mal husbandry; J. B. Fitch, head of
the dairy department, and L. E.
Call, professor of agronomy.

The committee believes a large
number of schools will be represented
in the contest, which will afford a
valuable experience in judging work.
Those in charge say that the chance
to see the college and the experiment
station equipment as well as the op-
portunities offered here in all kinds
of agricultural work will easily just-
ify a visit to the college.

Miss Mary Polson returned Satur-
day from Emporia, where she had
gone as chaperone of the girls' de-
bate team.

Dinner guests at the Sigma Nu
house Sunday were Mr. and Mrs.
Michael Ahearn, Coach Charles Bach-
man, Coach Knoth, and Dr. W. E.
Muldoon.

WILL FIND THE STRONGEST OIL

F. J. MOSS AND D. J. MOSTERT
TEST LUBRICANT

Are Preparing Thesis in Mechanical Engineering—Will Interest Auto Owners

A thesis that will be of more than passing interest to the automobile owner is now being worked out by F. J. Moss and D. J. Mostert, senior mechanical engineers.

The subject of the thesis is the effect of operation upon the life of lubricating oils. Various grades of motor oils, ranging from the cheapest to that of the highest price, are subjected to average operating conditions with the view of determining their relative qualities after a definite period of use.

Theoretically, no oil should ever wear out, but all oils are gradually contaminated from vapors of the exploding gas, which leak by the piston into the crank case.

It is the object of the two experimenters to test a number of oils, and thereby determine which will hold up the best. In each case the motor will be run the same length of time, corresponding to a certain number of miles. The oil will then be drained out, and its relative quality determined.

When the thesis is completed it will be filed in the college library, along with other graduation theses.

ANNOUNCEMENTS

China night program will be given tomorrow evening at 8 o'clock.

Eurodelphian literary will give regular program tomorrow afternoon.

Ionian literary will hold its regular meeting tomorrow afternoon at 3 o'clock.

Franklin literary society will give a feature program Saturday evening at 8 o'clock.

"Come Out of the Kitchen," first Purple Masque play begins this evening at 8 o'clock.

Ags of the Hamilton literary society will be in charge of the program tomorrow evening.

Surprise program will be given by Browning literary society Saturday afternoon at 3 o'clock.

Webster literary society will hold initiation for new members tomorrow evening at 8 o'clock.

Alpha Beta literary society gives its last program for this term Saturday evening at 8 o'clock.

Oratorical tryouts will be given in conjunction with Athenian program which begins at 7:30 to morrow evening.

Semi-finals in extemporaneous speaking of Prof. J. G. Emerson's classes will be held at 1 o'clock Saturday in G56.

The semi-finals in extemporaneous speaking of Prof. Howard T. Hill's classes will be held at 2 o'clock Saturday in G56.

All school of Agriculture students expecting freshman assignments next semester must have their entrance credits checked in the Registrar's office.

Baptist Young People's Union meets in the basement of the Baptist church at 6:15 Sunday evening. A social and fellowship hour will be held from 5 to 6:15 o'clock.

Prof. J. E. Kammeyer of the economics department, will give a talk

at 8 o'clock Saturday morning in the barracks auditorium, on the subject of "Banking and Money." He will discuss problems that the farmer meets.

Friday afternoon at 4 o'clock in the barracks auditorium there will be shown a 3-reel feature movie showing tractors at work in the fields, ways of repairing tractors, and general problems that the farmer meets with his tractor. The films are furnished by the Emerson Brantingham Implement company.

KANSAS RANKS HIGH IN WEALTH

INTERESTING STATISTICS GIVEN IN K. U. NEWS LETTER

State Ranks Low in Per Capita Cost of Students and Buildings

An analysis of the educational institutions of the most wealthy states of the union and of the financial ability of these states, as given in the University of Kansas news letter, which is published by the Alumni association of the university, gives some illuminating information regarding the educational situation in our own state.

Out of a group of ten wealthy agricultural and manufacturing states, Kansas ranked fourth in per capita wealth; in the small amount of indebtedness it was tied with Nebraska with none in the number of students enrolled in the state university and the state agricultural college in each state per 10,000 she was first, in the per capita cost of students sixth, and in the worth of buildings per student ninth.

PINES CAFETERIA IS UNDER SUPERVISION OF MRS. LONG

Will be One of the Most Complete Organizations of its Kind in Kansas

Announcement has been made of the purchase of the Pines cafeteria and confectionery business by Mr. and Mrs. Thomas Long of L. C. Shafer, on December 23. Under the new management the Pines opened for business January 1.

Mrs. Long, who has been head cook at the college cafeteria since its origin, will be in charge. Only professional help will be hired.

It is said that this will be one of the most complete organizations of its kind in Kansas and will be a great asset to Manhattan. In connection with the Pines cafeteria, is the agency for the Western Union telegraph, the dance hall, confectionery parlors, and a public telephone.

Bishop Renz, who has been with the Kansas City Mortgage company, is here taking the agricultural short course. The company is sending him in order that he may be more efficient in his work.

Kansas City club will give a dance in Recreation hall Friday evening, January 28.

\$1 Book Sale now on. One lot of 4 for \$1, one lot of 3 for \$1, one lot of 2 for \$1. College Book Store, 32-33

SOCIETY

SOCIAL CALENDAR

Friday
Freshman girls' Pan-Hellenic dance at Harrison's hall.
Purple Masque play in auditorium.
Saturday
Chinese play in auditorium.
Newman club dance in H. E. hall.
Monday
Quill club banquet at Gillett hotel.

Alpha Delta Pi sorority has pledged Miss Frances Batdorf of Burlington.

Delta Zeta has pledged Miss Tavis Daniels, of Arkansas City, freshman in music.

Delta Delta Delta has pledged Miss Helen Crowe, of Wichita, freshman in music.

Kappa Delta has pledged Miss Vada Zobel, and Miss Isla Falkenstein, both of Onaga.

Pi Beta Phi fraternity has pledged Miss Florence Barnhiser of Wichita, freshman in home economics.

Kappa Phi Alpha have pledged Mr. Glynn C. Charlesworth, freshman in agriculture, of Lafayette.

Prof. R. R. Price's Sunday school class held a party in Recreation hall Tuesday evening from 4 to 6 o'clock.

Dean and Mrs. F. D. Farrell entertained Tuesday evening with a dinner in honor of Dr. and Mrs. R. K. Nabours and Dr. and Mrs. J. E. Ackert.

Initiations were held by Purple Masque on Thursday, January 13. Prof. Howard T. Hill of the department of public speaking is a new member of the organization.

Miss Edna Anne Munger, '08, was married to Mr. Edwin Tilton Bamford, January 1 at Los Angeles, Cal. Mr. and Mrs. Bamford will make their home at 1141 West Thirty-sixth Place, Los Angeles, Cal.

Miss Grace Bace and Mr. Frederick H. Fox were married during the Christmas vacation at Chattanooga, Tenn. Mr. Fox is an instructor in civil engineering here. They are now at home at 814 Osage street.

A formal dinner party given at 1318 Fremont Monday evening, the announcement of Miss Mary McDonald to Mr. Maurice Rominger of Charleston, Ill., was announced. Miss McDonald is an instructor in the department of clothing and textiles. Those present at the dinner were Miss Elsie Smith, Miss Grace Hesse, Miss Ruth Trail, Miss Irene Huse, Miss Mary Worcester, and Miss Katherine Hudson. Corsage bouquets were given as favors.

Miss Mildred Inskeep was the guest of honor at a party given Monday evening by Miss Irene Dean, for members of the cabinet and advisory board of the Y. W. C. A. Supper was served by the hostess, assisted by Miss Frances Whitmire and Miss Ruth Peck. After the party the regular monthly meeting of the advisory board was held. Miss Inskeep

spoke about the plans for the spring cabinet training conference, which will be held in Topeka or Manhattan some time in April, after the election of new cabinet members.

Chinese Boy's Father Here
Lim Lung, of Oxnart, Cal., is visiting his son, Roy Lung. Mr. Lung is the father of Fy Lung who was graduated from electrical engineering two years ago. Mr. Lung has lived in this country for 43 years. From here he will go to Kansas City and Chicago and then return to his home in China.

Elect McDowell Club Officers
The MacDowell club met last Monday night. The resignation of Miss Florence Myer as president was accepted and Miss Mildred Thornburg was elected to fill the vacancy. Miss Pearl Hoots was elected treasurer to succeed Miss Thornburg. Miss Helen Hannen and Miss Warren were appointed on the program committee to outline the work to be presented for the balance of the year.

Doctor Slade Speaks at Vesper
Dr. W. F. Slade, pastor of the First Congregational church in Manhattan, spoke at the regular vesper service held Thursday afternoon in Recreation hall. The subject of his address was "Following Him in His Faith." This was the second of a series of follow-up lectures which are given relative to the proposed change in the membership basis of the Y. W. C. A. Music was furnished by the Y. W. octet.

Because of the final examinations next week there will be no vesper service.

Z. G. Clevenger, formerly director of athletics here and now holding a similar position in the University of Missouri, is a member of the national committee which will revise the basketball rules. The committee was appointed by the National Intercollegiate Athletic association and consists of three members.

There are 12 new students enrolled in the commercial creamery course.

Sunday dinner guests at the Chi Omega house were Miss Ruth Helen Bret, Miss Helen Thayer, Miss Clara Evans, and Miss Esther Fayman.

Mrs. Ada Pettit spent the week end in Topeka.

Miss Ruth Helen Bret of Topeka was a week end guest of Miss Ardis Atkins.

Prof. and Mrs. E. V. Floyd and son William were dinner guests at the Pi Kappa Alpha house, Sunday.

So Say We All!!

One night during vacation a certain frat man was calling on a sorority girl. It came time to say "Good-night." It was a wonderful night, with moon 'n everything. They stepped out on the veranda. Forgetting that 'pat's' room was directly overhead and that the window might be slightly raised he said, "Give me a kiss and then I'll go." The fair maiden refused. "O, come on, now. Please give me one and then I'll go." Again she refused. Again and again he asked 'for just one, and then he'd go.' Pater, sticking his head out of the window: "For Heaven's sake, Mary, give him a kiss, so he can go before sun-up."—Washburn Review.

Chemical Society Elect Officers

The Willard Chemical society met Tuesday evening and elected the following officers for next semester: Gladys Hartley, president; Bee Wilson, vice president; Wiley Whitney, secretary; Marion C. Reed, treasurer; Herbert Van Blarcom, marshal. At the meeting Professor Lathaw gave an interesting talk on "Packing House Chemistry."

PROF. T. J. TALBERT TELLS OF EXTENSION WORK HERE

Monday Afternoon Journalists Hear About Plans For Farm and Home Week

"There is nothing that offers a greater opportunity for service than extension work," declared Prof. T. J. Talbert of the extension division in an address before the members of the journalism department last Monday afternoon. Professor Talbert then explained the amount and variety of work that the extension division of K. S. A. C. has carried out this year. The address was closed with a short talk on Farm and Home week and the program that has been arranged for it.

It will be remembered that Professor Talbert is superintendent of Farm and Home week this year and he is the man who has been putting the pep and fire into it.

Ina E. Holroyd, of the department of mathematics, is on the program at the Kansas Teachers of Mathematics association, to be held at Topeka, Saturday, January 22. She will discuss the subject "Results of Experience With Classes in Generalized Mathematics."

AGGIES DEVELOP NEW EXCHANGE

STUDENTS TO TRADE THEORY FOR PRACTICE

Fred Rindge Organizes Industrial Service Commission at K. S. A. C. with M. J. Lucas, President

Educational reciprocity or the exchange of theory for practical experience as a new field of student enterprise, is being developed by the industrial service commission of the Y. M. C. A. This commission and its work are the outgrowth of the recent visit of Fred H. Ringe, social engineer. At that time Mr. Ringe outlined his scheme at a series of talks given to various student groups and in accordance with this scheme the industrial service commission was organized with M. J. Lucas, chairman; Hugh Hartmen, vice chairman; C. H. McCandless in charge of cooperative work with the negroes; G. L. Rucker with the Mexicans; J. J. Seright, technical classes; and Sankey Kelly, Oddfellow home entertainment and vocational classes; and C. E. Pearce, faculty advisor.

In the field of negro work, C. H. McCandless, in cooperation with the colored Methodist church and several other local colored organizations, is assisting in Epworth league programs, boy scout, and literary society work. C. L. Rucker, with the assistance of Manuel C. Valdes, will soon open classes for the Mexicans where students may teach English and receive Spanish instruction in return.

J. J. Seright has concluded arrangements with local labor unions for a few classes where technical knowledge will be exchanged for practical experience. These classes will deal with drafting and mathematics. Sankey Kelly had a later start than the others but he will soon be able to announce his program which includes entertainments for the county poorhouse and jail, and vocational classes among boys of the Oddfellow home.

In all these fields the industrial service commission is in close cooperation with the social service committee of the Y. W. C. A., who under the leadership of Effie Hendricks, have for some time been conducting play hours and sewing classes among the girls of the Oddfellow home and among colored clubs. In this latter work negro girls of the college have taken the lead.

Any student wishing to exchange theory for practical knowledge should see Effie Hendricks or M. J. Lucas.

F. MANN SPEAKS TO AG STUDENTS

KNOWN AS ONE OF ILLINOIS' FOREMOST FARMERS

Coming Agriculturist to Look on His Business as a Manufacturing Proposition

"The true American farmer has not yet arrived but is gradually being brought out by the agricultural schools of the country," said Frank I. Mann, an Illinois farmer, to the students of agriculture Saturday morning.

Frank I. Mann, of Gilman, Ill., is one of the most progressive farmers of that state and came here at the solicitation of Dean F. D. Farrell to give a talk to the students of agriculture of this school.

Mann graduated from the course in agriculture at Illinois university in 1875 and since that time has farmed at his home in Gilman. He has practiced a type of permanent agriculture which has made it possible to average 50 bushels of wheat to the acre and 100 bushels of corn on his fine farm.

In his talk to the agricultural students F. I. Mann stated that there had been three types of farmers in this country: The first generations were merely pioneers. Following the pioneers we had the miners and last

comes the present generation from which should come the true American farmer.

"The coming farmer will look on his business rather as a manufacturing proposition. Therefore he will want to conserve his supply of raw material by trying to retain the fertility of the soil." Mr. Mann further stated that most of his life he had sold farm products at prices which were less than the fertilizing value of the products themselves.

He stated that the Chinese seem to have fared better to adjust their population to their food supply but that in this country we adjust our food supply to our population. If we are to continue to take care of our increasing population we must take more and more care in handling soil fertility.

Mr. Mann remarked that we who are to become the future American farmers must learn to farm well enough so that we can have time to develop into a higher form of civilization than our forefathers.

SHORT VACATION BETWEEN TERMS

MANY GOING HOME BETWEEN SEMESTERS

Plan Dances and Dinner Parties for Week End—New Semester Starts February 1—Large Enrollment Expected

From 11 o'clock Saturday morning, January 29, until 8 o'clock Tuesday morning, February 1, the Aggies will be free to do just as they please. There will be no lessons to prepare, no notebooks to get in, no classes to attend. The mid-semester vacation will be in full swing for two days and a half.

At 11 o'clock next Saturday the last examination will be over and the student body will be given a few days to catch up in sleep before the last four month's spring grind starts.

Already many dances and dinner parties have been planned for the week end. Then too, many of the students have already purchased their tickets in order that they may catch the first train home.

According to various deans an unusually large number of prospective students have written inquiring about the various courses to be taught this spring. All indications point to the fact that the enrollment will be considerably increased the second semester.

The same method of enrolling will be used during registration as was used last fall. This method has proved to be a decided advantage over last year's "stand in line" plan, as the students may be seated in the auditorium while waiting their turn for assignment.

The registration numbers will be handed out at the north auditorium doors promptly at 8 o'clock Tuesday, February 1. Registration will continue up until 11 o'clock Wednesday morning.

Freshman Commission Meet

The two groups of the freshmen commission girls held a joint meeting Tuesday at 4 o'clock in the home economics rest room. Florence Barnhisel, president of the commission, presided. This was also the time for the regular Y. W. C. A. cabinet meeting, and the freshmen girls attended in order that they might learn more about the work of the association, and also the proper method of conducting a business meeting. It was voted that the girls working in groups of six or seven should serve tea at vespers. This work was formerly in charge of the 11 committees of the Y. W., each of which has served at one vesper meeting.

Miss Nellie Klaus, former student from Bendena, is spending the week visiting friends.

Miss Oseloa Burr will fill lyceum engagements in Oklahoma this week end.

Earl Bruce, who has been attending school here, is leaving Saturday for Berkeley, Cal., where he will attend the University of California next semester.

FORUM HONORS MEN DEBATORS

DEBATE IS RECOGNIZED AS AN ALL COLLEGE ACTIVITY

Twenty Members Initiated On January 13—Professor Searson Had Charge of Services

More evidence that debate is coming to the front as an all college activity was given Thursday evening, January 13, when 20 new members were initiated into the Forum. The Forum is an honorary debating society which gives membership to all persons who compete in open contests for debate honors and make a debate squad. More than 300 college debaters belong to this organization which was founded in 1902. Forty students have been initiated into the society this semester.

Prof. J. W. Searson, head of the English department, who is initiating director of the society was in charge at the impressive initiation services. The following members were initiated: Marie Correll, J. W. Farmer, Lois Clark, M. E. Ramsey, Viola Monsey, Helen Van Quist, Nellie Griffiths, Ada Songer, Elizabeth Winter, Ruby Rieckles, Donald Ibach, Paul M. Root, J. J. Seright, H. L. Collins, Verne Stambaugh, Frank Swanson, Gail Roderick, Orpha Russell, Iness Straight, and Leona Thurrow.

BEYOND THE HILL

A ruling passed by the state board in Michigan permits national fraternities to enter the Michigan Agricultural college but does not allow national fraternities. Political leaders throughout the state prefer to give the fraternities a fair trial covering a period of years before they even consider the sorority question. The woman suffrage amendment did not give the women of the state the same rights of social freedom as men though it did give them the ballot.

Because of the living conditions in Columbia, Mo., the federal board of vocational education has granted an additional increase of \$10 a month which makes a total of \$100 for the vocational students in attendance at the university.

The coed dancers of the University of Utah have been asked to dance for the benefit of the Utah Manufacturer's association which is to have its annual banquet in Salt Lake City.

A chapter of Sigma Tau Sigma, honorary salesmanship fraternity, has just been organized at the University of Kansas. The purpose of this fraternity is to recognize students who have shown exceptional ability in salesmanship.

The Basketball games at the Iowa State college are to be held in the afternoon instead of the evenings as is done at this school.

According to a survey just completed at Harvard university, half of the students are working their way through school, either wholly or in part. This means that about 3,000 students earn \$77,000 toward the expenses of the year 1919-20.

The average time required to secure a book in the library of Columbia university is 24.59 minutes, which causes many students to prefer a trip on the subway to the New York public library at Forty-second street where the average time consumed in getting a book is 10.73 minutes.

Forty coeds of Northwestern university recently appeared in their classes with their hair so dressed that more than half of each ear showed. It is claimed by the girls that they not only can hear the professors better but it is cooler with more of their hair on the top of their heads where mother nature intended it should be.

A new advisory system in the University of Michigan whereby one senior is appointed advisor for three freshmen, is being used to help the new students get started in the university.

The board of trustees of Johns Hopkins university have acted favorably on the petition of students for the assessment of a non-athletic fee which is to be used for the support of athletics which are not athletic in their nature. The allotment and distribution of the fees is under the supervision of a student committee.

Although football season of Harvard was one of the most successful, the financial statement of the athletic department showed that there was a loss of \$6,343.44 for the year just past. The only sports which were not run without a loss were football and baseball.

Thirty-four of the Chinese students of the University of Wisconsin celebrated the day of their independence which was the ninth anniversary of the formation of the Chinese Republic. One of these students is a direct descendant in the seventy-seventh generation of Confucius, Chinese philosopher of 478 B. C. and founder of Confucianism, the most popular religion in China.

The faculty of the Colorado Agricultural college has passed a ruling to the effect that "any students found guilty of intoxication, gambling, profane language or other offenses against the morals of the college, committed while on the campus, shall be subject to the penalty of expulsion. The action came as the result of much unfavorable comment by students and visitors at several of the football games last fall.

Alumni of the University of Ohio publish a monthly magazine which gives the needs and the accomplishments of the university and of graduates of the institution. It has been found to be the most efficient means of bringing before the legislature the financial needs and requirements of the school.

The debating team of the Brigham Young university met the team from Princeton university on the question, resolved that: the United States should pass a law prohibiting strikes in essential industries, constitutionality waived, and defeated the Princetonians, thus destroying one of the sacred traditions of the superiority of eastern learning.

The Ottawa Campus in speaking of the game with the Aggies at Manhattan has this to say:

The Aggies have a good team, four of the members of last year's team which was the runner-up in the Missouri valley, being back in school. Three of these men are all-Valley men. They play a hard game of basketball, though their style of play is very rough.

R. O. T. C. members of the University of Kansas have installed a

powerful wireless station in quarters belonging to a unit in the engineering building. The set will be used by the 100 members of the artillery section.

To enable students at the Kansas State Normal to remain in school, practically all of the regular janitor force has been dismissed and the jobs given to men students. Depression in the farm industry has cut off the income of many students who are shoveling coal and dusting furniture to pay their way through school.

Students at the college of Emporia began a revolution against styles last week. The men organized mustache clubs and agreed to grow their mustaches to the best of their ability for at least two weeks. The women organized their clubs for the purpose of doing away with rats and ear bobs.

DAY AND NIGHT SCHOOL at the MANHATTAN BUSINESS COLLEGE

Enroll now with us. Get a thorough Business Training in an up-to-the-minute School of Business.

Thorough courses are offered in: Commercial, Shorthand, Civil Service, Penmanship, Typewriting, Banking, English, Court Reporting, Salesmanship and Business Efficiency, Adding and Listing Machines, Secretarial, and Commercial Teaching.

Shorthand, Typewriting, Book-keeping, and Business English and Correspondence are taught by mail.

For information phone 64, or address L. W. Nutter, President, Manhattan Business College.

Lost: Slide rule last week end with initials P. J. P. on rule and case. Return to post office.

AGGIE QUINTET TAKE SECOND AMES BATTLE

FARMERS LOST FIRST GAME BY TEN POINTS

TO PLAY DRAKE AND DES MOINES

Ham Makes Total of 15 Points in Saturday's Game—Cowell Brothers and Jennings Put Up Good Fight

The Aggie basketball team got away to an inauspicious start in the opening game of the four on their northern invasion Friday afternoon at Ames, losing 27-17, but they staged a comeback Saturday, finishing 4 points ahead of the Cyclones on the long end of a 25-21 score.

Details concerning the two games are meager, particularly about the first of the brace of contests. At the athletic office yesterday all that could be learned was from a wire from Coach Knott stating that the Aggies played their Iowa opponents neck and neck until the last three minutes.

Second Game Closely Contested
The second game of the series was closely contested all the way, the result being in doubt until the pistol shot which closed the game. The Kansas City papers state that with the score at 20-all, in the last few minutes, Capt. Bunker and Foval got lucky and made the deciding points on a field goal each, and a free throw by Bunker. Ham came into his old time form in Saturday's struggle, hooking six field goals and three free throws in five tries for a total of 15 points. The press dispatches also announced that the Cowell brothers and Jennings played well for the Aggies.

Play Two More Games

From Ames the Aggies journeyed on to Des Moines where they play Drake university Tuesday and Des Moines university Monday. Drake lost her fifth consecutive conference game to Washington university Saturday. The fray with the Bulldogs should prove an easy one. The Des Moines university contest is a non-conference battle, taken on to help on the finances of the trip.

Kansas and Missouri each won their sixth victory over conference teams Saturday. The remainder of the Aggie schedule is occupied by contests with these two teams, two each at Manhattan, and two at the home courts of the Jayhawks and the Tigers. To stay in the running the Wildcats must win at least six, and probably all eight of the remainder of the games scheduled.

NEW SEMESTER SCHEDULES OUT

OFFER NEW COURSES IN SPRING TERM

Students Should Make Out Assignments Before Going to Gym—Hope to Avoid Congestion

The schedules for next semester's courses are now on sale at the college post office. At present there are only 750 copies which are selling for 10 cents each.

As usual nearly every department on the hill is offering courses for the spring semester which were not offered in the fall semester.

Among the new courses which are to be given this term is a course in college rhetoric practice. This is an entirely new course in the college and consists of three two hour periods a week. These periods will be taken up by practice work in writing. Another new course to be offered is a course in humorous writing under Prof. H. W. Davis.

All students are advised to purchase or get access to a copy of the schedule in order that they may get their assignment arranged before the day of registration. If they have their assignment made out they will get through registering early and there will not be the congestion that there was at the beginning of the fall semester.

Albert Thomas of Scranton, Pa., and Moreland Thompson of Pittsburgh, Pa., will take out assignments here next semester. They have been attending school at Pennsylvania State college. Both are members of the Sigma Alpha Epsilon fraternity.

The Busy Body

Question: What do you think of girls wearing "goloshes" in snowy weather?

Miss Ada Rice: "If a choice between silk stockings and low shoes, let the girls wear 'goloshes.'"

Prof. H. W. Davis: "They can't make their feet look any worse than they do now. I would not want to be responsible if they start a run in their silk stockings by the loose buckles flopping."

Miss Luella Morris, the most popular girl: "I think they are all right."

DEBATE SYSTEM LIKED BY MANY

EASTERN SCHOOLS ARE USING NEW METHOD

Extemporaneous Plan Makes A Direct Clash Possible—Requires Much Broader Knowledge of Question

The new method of extemporaneous debating as adopted by Coach O. H. Burns of the department of English is receiving considerable comment from students and faculty. The advocates of the new system or style, feel that it is the only practical plan of debate, it is so elastic and gives the debaters greater opportunity of direct clash in argument.

The large universities of the east all use the extemporaneous style but it is very rare in any of the western colleges and universities. The experiment for K. S. A. C. has worked well according to Coach Burns, and will be continued.

"The popularity of the new style is verified by the large audience that packed the small hall to hear the Ames debate after an equal number had heard the same question debated the night before in recreation hall," said Dr. Howard Hill. "The extemporaneous system of debating lends elasticity to the debate. It provides for a direct come back, and has no comparison with the old committed form. When applied, it places college debating in the class of real debate as found in legislative halls."

Prof. I. Victor Hies of the department of history said, "The extemporaneous system, when thoroughly worked out, is very effective. It makes for real debate. Chart demonstrations are very effective and fall very readily into extemporaneous debate."

Miss Margaret Russell, instructor in the department of English, said, "I know this, those debates were much more interesting than any former debates. That debate Saturday night was the most interesting debate I ever heard. The extemporaneous plan makes a direct clash always possible, and requires a much broader knowledge of the question. It is better training for the student. It is practical."

The Rev. M. S. Collins said, "Oh! that's great. There is no comparison. It's got the old stuff beat a mile."

Prof. W. R. Raymond, department of English at Iowa State college, who presided at Ames said, "The form of debating used by the Aggie team is as effective as any I have ever heard."

Prof. V. A. Davis, coach of the debate at Emporia Normal said, "Your girls showed plainly the advantage of extemporaneous debating especially in the way in which they displayed their interest in their subject, and the way they held the attention of their audience."

Prof. H. A. Shinn, coach of debate at Kansas university and judge of the girls' debate here said, "The freedom of expression and forceful delivery of the Aggie girls was outstanding."

COLLECT \$336 THURSDAY FOR CHILD FEEDING FUND

Students Average 17 Cents—Leave Contributions With Dr. Holtz or Miss Dean

The total amount which had been collected for the Child Feeding fund Thursday evening was \$336.46. This is not a very liberal contribution per capita.

Figuring on a basis of 2,000 students the per capita contribution was a little less than 17 cents. Students who have more than 17 cents worth of sympathy, and human love, will be able to give contributions to Dr. A. A. Holtz or Miss Irene Dean this week.

EIGHT WILL COMPETE FOR TEN DOLLAR PRIZE

SEMI-FINALS WERE SATURDAY

Over 250 Students Start in Contest—Wait Large Attendance at Finals in Auditorium Tomorrow

Eight students in extempore speech, who were successful in the first three rounds in the public speaking contest, will meet in the college auditorium Wednesday evening at 5 o'clock to try for one of the prizes offered by that department. Every student in the college is being urged to attend the finals and all public speaking students will be required to be present.

Eliminate Seven Speakers

The semi-final contest, held Saturday afternoon, was a mighty interesting one for it meant the elimination of seven of the speakers from the various classes. The judges at the semi-final contest were Prof. H. W. Davis, Prof. O. H. Burns, and Miss Kathleen Bower.

The speakers who placed and who will appear tomorrow evening at 5 o'clock are: from Professor Hill's classes—H. L. Brown, W. L. Martin, Milton S. Eisenhower, and M. D. Laine; from Professor Emerson's classes—J. C. Gard, Hobart VanBlarcom, Byron Lindsey, and E. L. Griffith. The instructors in public speaking awarded honorary mention to all those who tied in the semi-final. Those who received honorary mention but were eliminated from the finals are Victor Kirk, F. A. Swanson, R. L. Hamilton, H. Dougherty, Jasper Madison, E. E. Kelley, and James H. Gillespie.

Ten Dollars To Winner

More than 250 students started in the contest. The eight speakers who have been chosen to appear tomorrow evening will now compete for the two prizes—\$10 in cash for first place and \$5 in cash for second place.

In order to make it interesting for the speakers at the final round, Professor Emerson and Professor Hill are trying to get a large number of students and faculty members to attend the final. It is probable that the student who places first and the one who places second will try for first place in the Valley oratorical try-out on February 18.

The extempore speeches are limited to five minutes and they cannot be memorized. The judging is based entirely on general effectiveness. At the finals Wednesday there will be a new set of judges in order that any one of the competitors may use the same speech which was used in the semi-final.

MAKE \$900 ON CHINESE PLAY

OVER \$365 IS DONATED TO RELIEF FUND

Phillip Young Is Manager of Stunt—K. U. Students May Put on Similar Program

China Night, the play given by the Chinese students was well attended and the funds raised amounted to \$900.

The advance ticket sale amounted to \$450.00 and \$100.00 worth of tickets were sold at the door. Besides the funds taken in by ticket sales, \$265.19 was donated toward the relief of the famine stricken Chinese. This makes a total of \$915.19 that was collected.

A large part of the success of this undertaking was due to the work of Phillip Young who was the manager. The Chinese students are contemplating putting on the same program at K. U. in the near future in order to raise more money for famine relief work.

J. W. Barger, C. W. Howard, and A. J. England will act as judges in a debate as Eskridge January 28. The debating teams are from Wamego and Eskridge high schools. Both schools are members of the Kansas Debating league. The question for debate is, "Resolved, that labor unions promote the interest of the laboring man."

Notice, Student Organizations

All student organizations which wish to obtain space in the Royal Purple are requested to get into communication with Chauncey Sawyer or Miss Marcia Seiber the latter part of this week or next week, so that the material for organization pages will include any students who may not return to college for the spring semester.

Contagious Diseases Are Reported

Two cases of scarlet fever, one case of chicken pox and one case of measles have been reported to the college medical authorities. Both of the scarlet fever victims, Nathan Divilbiss and Albert Mueller, are confined in the college hospital.

Few students realize the importance of getting a return card when going back to class. It is only by this method that diseases may be checked. When a student gets his permit to class he is re-examined and if there are signs of sickness he is kept out of class until he is able to return.

MAY WORK WITH AIRPLANES HERE

TO INCLUDE COURSE IN ENGINEERING CURRICULUM

Students Feel Need For Such Work—Will Not Teach Art of Flying

There has been a growing demand by engineering students for special training in aeronautical theory. Their interest in this subject has been aroused by the advancements made in aerial navigation and by the fact that many of the engineering students have had practical experience in some phase of airplane work, but have been handicapped by lack of theoretical knowledge in the subject.

In order to give those engineers of K. S. A. C. who desire it a foundation for this field of activity, the mechanical engineering curriculum contemplates the inclusion of an elective course in aerodynamics. The course is not intended to include the art of flying, but will lay stress upon the various types of planes and motors used in successful machines, airplanes and instruments, the theory of air resistance, and the stresses to which airplane wings are subjected.

Little additional theory will be necessary for students who have pursued the regular course in mechanical plane construction. The principles now covered by mechanical engineering students give a substantial ground work and by giving a little attention to the now specialized theory of aerodynamics the student should be well prepared to enter this field of engineering activity.

If this course is added to the curriculum of the engineering department, it will no doubt draw a great deal of interest from the students of the college. The fact that the use of air craft is becoming so common makes the course seem one which will be of use in the future.

Y. W. C. A. RAISES FUNDS TO FEED HUNGRY CHILDREN

Urges Everyone to Eat at Association's Lunchrooms on February 1

Invisible guest day will be observed in all Y. W. C. A. cafeterias and lunchrooms all over the country on February 1. On this day the gross cash receipts from the noon meal will be turned over to the European relief council to help the starving children in Europe.

At least 450 associations are planning to make this a community appeal and urge everyone who can to lunch in these cafeterias that noon to swell the fund.

The idea of the invisible guest and empty chair at each table is to be carried throughout. The special Hoover meal, sold at a generous price, will be served to those who wish to give money in this particular way.

In some cities where the association has no restaurants, the church or club will be asked to serve a noon meal in some down town location.

Aggie Film Having Troubles

The Aggie film of "James Wakes Up" is having troubles of its own. At the last reports it was being held up at Altamont, and much difficulty was being met with in transporting it from place to place because of the lack of a proper carrier. Miss Caldwell, who wrote the scenario, is now busy finding where the film is, as it seems to have been temporarily lost.

JUDGING TEAMS TOTE HOME "THAT BACON"

MEN WIN HIGH HONORS DURING PAST TWO YEARS

WIN SILVER TROPHY CUPS

Aggie Stock Judges Only Men in U. S. This Year to Place First in Two National Contests

Of all the teams, athletic and otherwise, that have represented K. S. A. C. in contests none have been more successful or hold more enviable records than the judging teams from the division of agriculture. In the national contests of the last two

Improve Record This Year

This year both the teams have not only upheld this record, they have boosted it. They won first place in the National Swine contest at Des Moines, first in the National Western contest at Denver, and fourth in the International at Chicago. This is the only team in the United States to win two national contest this year.

The men on this team are: H. E. Mather of Manhattan, M. L. Otto of Riley, E. D. McCollum of Bogard, Mo., H. J. Henney of Horton, O. R.

DAIRY JUDGING TEAM

From Left to Right: George Drumm, Coach H. W. Cave, Robert Lush, Clement Young.

years the dairy judging teams and the stock judging teams have consistently placed either first or near the top. They have "brought home the bacon" in the form of valuable trophy cups. If next year's teams keep up to the same high standard, that has been established by the last two teams, two trophy cups will become the permanent property of the college.

Second Among N. A. Teams

Last year the Kansas team entered the National Western contest at Denver for the first time. They brought home the big cup. One of the Aggie men, K. D. Thompson, placed as high individual while four of the team were among the first 10. This same team was the first to represent K.S.A.C. at the National Swine contest in Des Moines, Iowa. At this show the team won second place and J. D. Montague was second individual. Last year's team also won third place in the International contest at Chicago, competing against teams from 26 states and three teams from Canada. For the year they ranked second of all teams in the United States and Canada.

The dairy cattle judging team of last year made an equally enviable record. They won first place in the National Dairy show contest at Chicago, and fourth place in the National Dairy Cattle congress at Waterloo, Iowa. Twenty-one teams competed in the two contests and the Kansas team brought home three cups.

Peterson of Caney, Charles Nitcher of Hardy, Nebr., and C. A. Newell of Matfield Green.

In the National Swine contest at Des Moines, where the team won first by a margin of 97 points over the Missouri team which was second, Mather placed as second individual, Otto sixth and Henney seventh. In the International contest at Chicago November 29 the team won fourth place competing against 24 teams, three of which were from Canada. Mather placed as fifth individual and McCollum as thirteenth, while Otto tied for high man on swine.

Finally at the National Western contest at Denver January 15 the team scored the second consecutive win, defeating the Nebraska team which had placed second at the International. In this contest Henney placed as second individual, Otto and Mather tied for third, and McCollum placed seventh. The other teams competing were Nebraska, Colorado, and Wyoming. If next year's team wins at this show the big trophy cup which has been on display in Anderson hall will become the permanent property of K. S. A. C.

Win Same Honors Two Years

This year's dairy judging team won the same places as were won last year, but the competition was thought to be stronger this year. They won first in the National Dairy show contest at Chicago, and fourth at the National Dairy congress in Waterloo, Iowa. Several team and

Do your own thinking
Fight your own battles
Pay your own debts
Correct your own mistakes
Keep your own secrets
Follow your own ideals
Be your own self
Answer your own prayers
Mind your own business

ARE YOU ABOVE OR BELOW?

Who is this Average Student person? Is he a member of the well known Average family that we hear so much about? Ever been accused of being an average? Remember the time the dean glared at you suspiciously and accused you of being just an average student? He probably went a little further and volunteered the information that you would never be anything but an average student. Then how you shrank away and hid your face!

If you are an average student you hate to get up. You dislike the searching impudence of the quiz. You will stay up all night to study or you will lose all your books a week before finals. You get flunk slips. Occasionally you get an "E." You are depressed and elated. You are not averse to the classical but you love your low brow. You will graduate with the average amount of information and egotism stored away in your system. You will become an average citizen. You will cast your vote, pay your taxes, and fight for your country. You will live the average life and accept philosophically the results of your best efforts. You will average well with the average.

But the funny thing about this average business is that if you are above the average you will not think so.

AN AG STUDENT'S VIEW

The following editorial was written by a senior in the agricultural division, who feels that much of the work required of the Ag. student, not intending to become a specialist, is impractical. He states that the material contained in this editorial is not only his own opinion but that of many of the students and several professors with whom he has discussed the matter.

He writes as follows:

Practically every student enrolled in agriculture at K. S. A. C. recognizes the fact that he is not deriving all the benefit from his course that is possible. In this article an attempt will be made to point out the more outstanding faults of the work as it is now presented and to suggest tentative remedies thereto. It should be borne in mind that these criticisms apply only to the various agriculture courses and that these conclusions have been reached after mature consideration and consultation with numerous students and with a few professors and instructors.

The method of giving the work in almost all the courses is to outline the so called ground work or foundation work on which the science is based. For example in grain crops or forage crops the student is required to learn the scientific names of all the important grains and grasses in the United States and to make innumerable drawings which are absolutely meaningless and of no value whatsoever when finished.

The average student's artistic ability, or lack of it, prohibits him from reproducing anything even faintly resembling the original. In soils he must learn the geological classification of all the different rocks, the chemical and physical agents instrumental in breaking them down into the various soils and the soils themselves under different headings. In feeds and feeding he must know the different enzymes that act on the food during its passage through the digestive tract, how fat globules are held in suspension in milk, and exactly what takes place in the animal body when feeds deficient in one or more of the nutrients is fed. The points mentioned are typical examples of what the student must burden his head with if he is to pass the course. To the specialist they are not only interesting but necessary. To the average man who is going into county agent or vocational work or on the farm their learning constitutes a waste of time which he cannot afford. To the student who desires to specialize the foundation work could be given in a later course.

Would it not be time and energy better spent if the grain crops instructor should take the class into the field, let them become familiar with the different grains as they look there and not as they look in the laboratory, show them why this particular grain is grown here, suggest cultural methods, and attempt to make the course as practical as possible by further instruction of this sort?

Would not the work demand more interest if the soils instructor would show which soil was the best adapted to certain crops, and why, instead of making the student learn a vast number of meaningless terms which he proceeds to forget as quickly as possible after the final examination is passed? If a feeding experiment were conducted by a class would they not finish the course feeling that their time was spent to much better advantage than under the present system?

Remember that no attempt has been made to criticize the so called cultural courses, but why not make a practical course practical?

It is a generally recognized fact that the student forgets about 75 per cent of his work within two or three months after a particular course is finished, and he forgets the little technicalities much more quickly than he would forget something that he could apply to his work occasionally. If at the end of each course the instructor would outline 10 or 20 of the vital points covered during the course and require the student to obtain a grade of 90 per cent on them in order to pass, it would insure a thorough knowledge of the essentials and the student would never forget them. Instead of a mass of homogeneous material from which he can derive little benefit, he would have something substantial upon which to stand.

VOCATIONAL MEN FORM NEW CLUB

ELECT ARTHUR BREWER PRESIDENT FOR SEMESTER

Name Organization "Disabled War Veterans"—All Federal Board Students Eligible

The men attending K. S. A. C. under the jurisdiction of the federal board for vocational education met last Tuesday, and with revisions adopted the constitution submitted by the committee appointed at the previous meeting. Officers for the next semester were elected and it was decided to call the club the "Disabled War Veterans."

Arthur Brewer, senior engineer, was elected president of the club. C. O. Nelson was elected vice president; M. C. Reed, secretary; C. O. Watson, treasurer; and C. O. Dailey marshal.

All students in school under the supervision of the federal board are eligible for membership. Membership dues will be paid which will go toward providing for expenses that may be incurred incidental to the activities of the club.

The club was organized with the view toward aiding in any way possible, the disabled veterans of the war, especially those attending K. S. A. C. This organization of men will aid in furthering the fellowship engendered by service in the war, between them and the college. It is the intention of the club to reserve space in the Royal Purple and otherwise take part in college activities as do the other organizations on the hill.

COMPLETE GRAIN JUDGING PLANS

OFFER IN CONTEST \$300 IN CASH PRIZES

Seed Men and Farm Papers Contribute Liberally—Teagarden in Charge

At a special meeting of the Kiod and Kernel Klub on January 20, the final details of the third annual grain judging contest were perfected.

Persons who have been in school the last two years will remember this contest as one of the big events of the year in the agricultural division. It is an annual affair staged by the students in the department of agronomy and consists of judging, classifying, and placing varieties and classes of grains.

As has been the custom in both previous contests, every student in college is eligible. The men who placed in last year's contest will not be barred because of that fact.

E. H. Teagarden, who is manager of the contest, claims that the contest this year will eclipse all others, especially in the matter of prizes. To date \$300 in cash prizes have already been assured with a chance of considerable more coming in. Seed and grain men this year are contributing to the prize money very liberally, partly, perhaps, as an expression of appreciation for the germinating and purity tests that the agronomy department conducts for them free of charge. Farm papers have been also asked to offer prizes and already some of the leading papers such as the Country Gentleman and Breeder's Gazette have offered five to 10 yearly subscriptions. At present it appears that in number and amount the prizes for this year's meet will surpass those of any previous contest ever given on the hill.

In speaking of the contest Teagarden said, "We would like to have a large number of students plan on entering this year and it is not too early to be making preparations."

The exact date for the contest has not been given out, but it will no doubt come toward the middle of the second semester.

Miss Hutchings to Topeka

Miss Ruth Hutchings of Manhattan, has accepted a position as secretary to Senator Alfred Docking during the present session of the legislature. She assumed her duties January 10.

Miss Hutchings is a graduate of the college with the class of 1917. Since her graduation she has been deputy county clerk of Riley county, resigning a short time ago in order to take up the work in Topeka. While in college she was active in student affairs, especially in Y. W. C. A. and church work. She is a charter member of the local chapter of Delta Zeta.

Capt. E. N. Wentworth, formerly a professor in animal husbandry, visited at the Sigma Alpha Epsilon house Monday. At present Captain Wentworth is with Armour and company as head of the bureau of livestock research and economics and is located at Chicago.

"Proc" Randells of the Pi Kappa Alpha fraternity and an Aggie football player is sick with inflammatory rheumatism. It was necessary that he be taken to his home at Anthony for special treatment.

The annual meeting and banquet of the Kansas Authors' club will be held in Topeka, January 29. Prof. J. W. Searson, head of the English department and Prof. N. A. Crawford, head of the journalism department, will both give addresses at the banquet.

Miss Nell Robinson was a guest at the Chi Omega house Friday.

C. R. Gearhart of the dairy extension division spent Monday and Tuesday of last week in Holton.

Miss Florence Banker, senior in home economics, was called to her home in Lawrence Tuesday on account of the serious illness of her mother.

W. T. Crandall, dairy extension man, will go to Kansas City, Kan., Thursday of this week to organize a calf club.

Mrs. Hitch of Manhattan, and Miss Zephyr Drake of Junction City, were dinner guests at the Delta Zeta house Sunday.

STUDENTS HEAR C. B. GRIFFITH

LECTURES ON "JEALOUSY THE
LEPROSY OF THE SOUL"

Miss Cline, Representative from Pawnee County, Speaks—Apollo Club Gives Two Numbers

"Jealousy is the primitive passion of the human heart," stated the Hon. C. B. Griffith in his talk in chapel last Friday morning. Mr. Griffith, besides being state representative from Bourbon county, is a student of Shakespeare and a chautauqua platform lecturer of note. The subject of his talk was "Jealousy, the Leprosy of the Soul."

He showed where Shakespeare's power lay, how he used this passion of jealousy as a foundation for many of his plots, and interpreted and quoted from the Elizabethan poet's play of Othello, the plot of which was built entirely upon the theme of jealousy.

Miss Cline, representative from Pawnee county, gained the applause of the entire audience when, just before the Honorable Griffith's speech she stated that she was doing every thing that was possible for her to do to see that K. S. A. C. received the appropriations that it so much needs.

The program was ended with two songs by the Apollo club.

JUDGING TEAMS TOTE HOME "THAT BACON"

(Concluded from page one)

Individual prizes were also won. In the National Dairy show contest Clement Young was high individual and George Drumm was high man on Jersey cattle. Kansas is the first school to win the National Dairy contest for two consecutive years and if another win is scored another cup will remain here permanently.

The men on the dairy judging team are Clement Young of Manhattan, George Drumm of Jola, and Robert H. Lush of Altamont.

Young Is Progressive Breeder

Young is one of the most progressive breeders of dairy cattle in the state and one of the most successful feeders. Young and his brother have a first class herd of Holsteins just west of the college campus. Ever since he has been in college Young has milked some of these cows on test and has made more records of higher production than any other herder in the state. Last year he broke the state record for 3-year-olds and at present he holds five state records among various classes. Two years ago Young won third place in the annual student judging contest held here.

Drumm Has Practical Experience

George Drumm has had much practical experience in feeding and test milking. For four years he was herder of a high class Holstein herd in Minnesota. He fed and milked test cows four times a day. With these cows he completed some splendid records, having six cows to make over 1,000 pounds of butter for a year and 30 pounds in seven days. This record can be appreciated when it is understood that there is not a cow in the state that has reached the 1,000 pound production mark. There are only three that have produced over 30 pounds in seven days. Drumm recently made a 32 pound record with one of the college cows. This cow produced 100 pounds of milk daily. Drumm is president of the college dairy association. Last spring he won third place in the annual contest here and this fall he won first in Jersey cattle at Chicago. This win carried with it a \$400 scholarship offered by the American Jersey Cattle club.

The third member of the team, Robert Lush, has had considerable experience with dairy cattle on his father's farm near Altamont. He has also done much work with cattle here at the college. Last year he was president of the college dairy association and also an alternate on the judging team. He went to Waterloo with last year's team.

Prof. F. W. Bell coached the stock judging teams both this year and last, and is to be congratulated on the remarkable record they have made. He is a graduate of Cornell university and came to K. S. A. C. from the Texas College of Agriculture and Mechanic Arts.

H. W. Cave, associate professor of dairy husbandry, coached the dairy judging teams. He is the first coach to put out winning teams in two consecutive years. He is a graduate of Iowa State college and began his work with the dairy teams after completing graduate work here.

NINETEEN SHORT COURSE MEN ARE TAKING DAIRY HUSBANDRY

Special Feature of Work Is Lectures Given by Prominent Men

Of the 99 men enrolled in the farmers' short course 19 are taking the regular course of dairy husbandry. Last year there were 117 men enrolled in the short course but there were fewer taking the course in dairy husbandry.

The boys enrolled in the short course are working hard as they realize that a period of eight weeks is decidedly short to take advantage of the many opportunities offered at K. S. A. C. And in order to accomplish the entire curriculum offered to them, they are forced to travel at a high rate of speed during their short course semester.

One of the features of the course this year is the special lectures given by outside authorities, among whom is H. J. Waters, formerly president of K. S. A. C., editor of the Kansas City Weekly Star.

CONOVER TELLS ABOUT WHITMAN

LECTURE ONE OF A SERIES BY
ENGLISH DEPARTMENT

Gives Story of Writer's Life and
Reads Selections from his Works
—Lectures Given Every Week

Walt Whitman was the subject of the second of the series of lectures on American writers that is now being given from time to time by Prof. R. W. Conover of the English department.

Professor Conover gave a brief sketch of the writer's life, his characteristics, a short analysis of his poetry, and read from some of the writer's representative works.

Professor Conover stated that Whitman was a man of unusual personality, and that he was admired for his own personal characteristics as well as for his poetry. He stated that many people accused Whitman of being extremely egotistical, but that a closer examination of many of the works in which the trait is seemingly brought out would vindicate him to a certain degree. The most representative of Whitman's works is "Leaves of Grass," a collection of poems, and it was from this work that Professor Conover read his selections.

These lectures will be conducted regularly throughout the spring. It has been arranged for them to be given from 5 to 6 o'clock in the afternoon so that every one who cares to may attend.

The Kansas Editorial association will meet in Topeka January 28 and 29. All of the faculty from the journalism department here will attend the meeting. Prof. C. E. Rogers will talk on "Feature Stories for Country Newspapers" and Prof. N. A. Crawford will present the report of the committee on agricultural advertising.

Kappa Delta has pledged Miss Tyrone Thurston of Kansas City, freshman in home economics.

Sunday dinner guests at the Sigma Nu house were Miss Renna Rosenthal, Miss Garnet Grover, Miss Ella Wilson, Miss Elsa Lear, and Miss Evalene Kramer.

The engagement of Miss Bertha Butler to Mr. Ralph Foster has been announced. Miss Butler is a sophomore in home economics. Mr. Foster graduated here last year and is now in the extension department of the University of Arkansas at Little Rock.

Students from Crawford county were entertained by Prof. and Mrs. George Gemmell at their home, 411 North Sixteenth street, last Thursday evening. There were 18 present at the party. Plans for organizing a club to boost the college were discussed.

STUDENT ASSEMBLY WILL NOT HOLD DURING FINALS

Henry J. Waters, Former President of K. S. A. C., Will Speak at Next Meeting

Because of examinations there will be no chapel period next week. The majority of the students will be busy enough that they will not miss it. At least it has been thought that it would not be advisable to break into quiz week.

In the first week of next semester on February 4, Henry J. Waters, editor of the Weekly Kansas City Star, will address the students in assembly. Doctor Waters, for years the well loved president of the Kansas State Agricultural college, left this school in 1917 to accept his present position on the Weekly Star.

Friday evening dinner guests at the Kappa Delta house were Mrs. George Murphey and Mrs. W. A. Lipincott.

John Grady, '20, who is employed as a construction engineer at Neodesha, spent the week end in Manhattan.

INTRA-MURAL CONTESTS END NEXT MONDAY

DELTA TAUS HAVE BEST CHANCE
AMONG FRATS

PLAY CHAMPIONSHIP VACATION

Elkharts May Represent Division A
—Y. M. C. A. and Phi Delta
Taus Have Same
Percentage

The last of the intra-mural basketball games are being played this week and by next Monday it is expected that the grand championship of all the three divisions will be known.

Delta Taus In Lead

All of the games within the different divisions will be over by Saturday, and Saturday afternoon the game between the winners of divisions A and B will be played off. The percentages as figured by the athletic office, which include the games of last Friday evening, seem to indicate that the Delta Taus have the best chance to win the pan-hellenic race and capture the third leg of the pan-hellenic cup, making it their permanent property.

Divisions A and B hope has it that in the finals division A will be represented by the Elkharts and division B by either the Phi Delta Taus or the Y. M. C. A., both the latter having the same percentage. So far neither of these teams has lost a game and Saturday they had not yet played each other. Whichever represents division B in the finals, will find in the Elkharts a strong contender. "Jerry" Harris, Healea, and Grothueson of the Elkharts each have permanent positions on the freshman varsity, which speaks well for the strength of the Elkhart aggregation. Lane of the Y. M. C. A. is also a member of the verdant quintet. The other freshman basketballer, Dobson, is a Delta Tau.

To Play Championship Monday

The fact that the Elkharts have three fifths of the freshman team and that the Y. M. C. A. has a representative on it are indications which point to a fast and snappy game Saturday afternoon in the finals, should these teams be involved. The winner of the game Saturday will play the winner of the pan-hellenic group Monday to decide the grand championship of the intra-mural basketball for 1921.

The standing of the teams last Saturday is as follows:

Pan-Hellenic				
Team	Played	Won	Lost	Pct.
Delta Tau Delta	5	5	0	1000
Beta Theta Pi	7	5	2	715
Kappa Sigma	7	5	2	715

Gets His Pegging "Wing" By Swinging An Axe Down on His Farm Near Topeka

Scene: St. Louis American league baseball park, St. Louis, Mo.
Time: July, 1920.

Action: Runner on first base with instructions to steal second. The pitcher shoots the ball over and the batter lets it go by. The runner on first has left his base and is speeding toward second. Zowie! The second baseman has the ball and the runner slides. He is tagged a foot away from the base. Billings, St. Louis catcher, puts on his mask and goes back to his post behind the bat, oblivious to the cheers directed at him from the bleachers.

Along with her 4,000 graduates in the different occupations of life, K. S. A. C. has sent one graduate into major league baseball. J. A. Billings, catcher for the Browns and

graduate in agriculture, is that man. "Josh," as he was known while a student here, used to catch on the Aggie baseball team away back in '11, '12, and '13. Mike says that he was a "whale" of a catcher and Mike ought to know.

"They never stole any bases on that boy," mused Mike. "He had a peg like a rifle shot, and when a man started to steal a base, Josh used to stand there behind the bat and hold the ball in his hand just to sort of encourage the runner to go on and then would nail him every time."

During the winter months when baseball players get their vacation, "Josh" spends his on his farm down near Topeka, where he doubtless acquires that pegging "wing" by swinging an axe.

er, first and second; wether lambs, first and second; pen five long wool lambs, first; champion wether, Hampshire class; get of sire, first, pen of lambs, second; prize flock, third.

Cotswold: aged ram, first; yearling ewe, first; champion ram and champion yearling.

Shropshires: aged ram, first and second; ram lamb, first and second; aged ewes, first and second; first on flock, first on pen, first on get of sire, champion ram and champion ewe.

Prof. C. E. Rogers of the journalism department, spent Wednesday in Salina at the Kansas Wesleyan college. He talked to the class in magazine writing.

G. A. Maxey spent Saturday in Topeka.

TALKS GIVEN TO MECHANICS NOW

SHORT COURSE MEN HEAR FROM
ALL DEPARTMENTS

Lectures Afford Students A Broader
Vision of the College—Speeches
Supplement the Eight Weeks
Engineering Course

The tractor mechanics short course is now on in full sway and the men are hitting the ball hard. There are 48 regularly enrolled men in the course and 23 men in the agriculture division are taking some of the tractor work as a side line. This enrolment in the course is far below the enrolment of last year when there were 130 men.

The work of the course is divided according to weeks, and there are eight different classes taking work along different lines at the same time. The work as it is divided, places a week on each of these subjects: tractor construction, details, carburetion, ignition, stationary engines in operation, dead engine study, running of tractors, repairs, and tractor field tools. The first five days of the week are spent in laboratory work, lectures, and recitation, and on Saturday a test is given on all the work that has been taken up in the week's work.

Along with the regular work of the course, the custom was started last year of having on Saturday morning a lecture to the men in the course by some noted man. The aim of these lectures is to give the men

a rest from the mechanics and to give them some good things to think about in lines other than just the tractor work. It was formerly felt by the members of the faculty that the men went back to their homes with a narrower idea of things than they had before they took the work because they put in their time too closely on the one line. The Saturday morning lectures are given by men from all different departments of the college and tend to open the eyes of the men to broader things. In a great many cases men who have entered the regular college courses of K. S. A. C. are men who

have had their eyes opened to the value of a college education through the short course and the ideas which have obtained from their eight weeks of association with college people.

Prof. J. E. Kammeyer, J. W. Barger, and C. W. Howard will act as judges at a debate between the Manhattan and Kansas City, Kans., high school teams, to be held in the high school auditorium Friday evening, January 21. The question for the debate is, "Resolved that the United States should establish an industrial court similar to the Kansas Industrial Court."

THE KANSAS STATE COLLEGIAN

VOL. XXVII

KANSAS STATE AGRICULTURAL COLLEGE, MANHATTAN, FRIDAY, JANUARY 28, 1921

NO. 34

ROUGH GAMES ON TRIP—LOSE TWO, WIN TWO

TEAM SHOWS EFFECTS OF THE
TUSSEL

DRAKE CONTEST FAST AND CLEAN

Phillips University Cancels Game for
Saturday—Bethany College
to Play Instead

The Wildcats returned from their northern invasion Wednesday with a record of two wins and two losses. However, one of the games lost was not a Missouri Valley contest, so the conference record for the trip stands as two won, one lost. This showing betters the road record of last year when the Aggie five dropped all the contests played on foreign courts.

The team shows the effects of Monday's tussel with the Des Moines university team which was rough in the extreme. Burger has a charley horse, Jennings a beautiful shining black eye, Foval a strained side, and Brady Cowell an injured foot. The Des Moines Capital's account of the D. M. U.-Aggie battle on Monday night which the Iowans won 30-22 says: "The game was one of the roughest seen by local fans this year. Everything went, even to the display a number of times on the part of various players of their knowledge of the manly art. Ten personal fouls and one technical were called, perhaps a fifth of what were committed."

The Wildcats led the way in the first half of Monday's game, but the second half turned into the rough house described by the Des Moines Capital as follows: "During the second half, as the affair turned into more of a football encounter than a basketball game, the visitors lost the easy passing style with which they had outplayed Des Moines during the first period, and went wild missing some of the easiest chances under the basket." Al Jennings led the Wildcats in the scoring with 4 field goals.

The Drake game was a different affair than the Monday battle. The refereeing was close and the playing fast and clean. The Aggies led all the way and were never headed. The final count was Aggies 27, Drake 20. This win makes the Aggies' standing to date in the valley .800 with four wins and one loss.

Phillips U. Cancels Game

Phillips university cancelled the game scheduled for Saturday quite unexpectedly at the first of the week. After much telephoning and telegraphing Mike Ahern has finally secured a game with Bethany college of Lindsborg for Saturday evening at Nichols gymnasium to take the place of the cancelled Phillips game. Bethany is one of the average teams of the Kansas conference, not having shown any startling form so far this season.

The remainder of the Aggies' games are with the two leaders in the valley race, Missouri and Kansas. Two games with each of them at Manhattan, and two on the home courts of the respective schools are on the list. It is a hard finish the Aggies must stage, but Coach Knott is optimistic regarding prospects. He says, "The losing of the one game at Ames does not ruin our chances. Far from it. Ames has probably the fastest floor work in the valley and Kansas and Missouri were extremely lucky to trim the Cyclones in their games. Both schools played the Ames team on their home courts."

PROPOSE NAMES FOR DEDICATION

ROYAL PURPLE STAFF TO
CHOOSE CANDIDATE

Prexy, Mike, Some Dean, or a Pro-
fessor, Year Book May
Honor

To whom will the Royal Purple staff dedicate the 1921 year book? Many say it will be Prexy, and why not? Isn't Prexy the one who is working hard to get the appropriation bill across so we can have a new side walk or two? Why not Prexy? Others say it be Dean Mary Pierce Van Zile. Surely there is not a person on the hill more democratic than the dean of women. Why not the dean of women?

Rumor whispers to other people that it will be Doctor Helen B. Thompson, queen of cooks, or Dean

DECIDE YOUR FUTURE CAREER

Rumors on the campus indicate that more students than usual are planning to leave college at the end of this semester—largely due, I understand, to finances. I can appreciate the circumstances in which a good many of the students find themselves. We are now passing through rather trying times and each step we take should be taken only after serious consideration. Your decision at this time will no doubt determine your future career. That is why it is so serious. Never before in the history of this country has it been so important that boys and girls be thoroughly trained for the field they plan to enter. Competition is keener. The efficient, well trained man or woman is the one who will succeed.

Before withdrawing find out if, with a little more economy, you cannot tide over this period of financial depression. I am sure there are a good many boys and girls in the college who, if they were sufficiently determined and if they really knew the seriousness and possible results of withdrawing, would find a way to stay in college. With the opening up of spring the financial conditions of the country will improve.

Recently I had a talk with the father of one of our students. The young man expects to leave college at the end of this semester. He has been spending \$100 a month. His father can give him \$50 a month but cannot afford more. I believe that a student who can get \$50 from his father until the end of this year can take care of his expenses if he really wants an education. He can always earn a few dollars on the side and at the same time carry the normal assignment. I believe there are a good many students who can reduce their expenses one-half by a little more planning and economizing, and thus remain in college; and this will mean so much to them in future years.

Determination and a realization of the importance of an education are what is needed, and I urge and plead with you to give your best consideration to this matter before making your final decision.

W. M. JARDINE,
President.

J. T. Willard, man of general knowledge. Dean F. D. Farrell, father of all the Ags, is a strong candidate and Dean R. R. Dykstra has much favorable comment. The engineers say that it shall be Dean R. A. Seaton, the engineer.

Others says that no other than the friend of all, the manager of athletics, that noble Mike shall have the honor. The great chemist, popular professor, and famous prank player, "the King," is another speculation.

There are three dozen or so suggested but scarcely any one can agree on who is to draw the lucky number. However, the suspense has begun, for none will know until they have presented their receipt at the window some morning late in May and received their Royal Purple, and turned the pages and see, three guesses—and you missed it. Guess again.

CUP WILL GO TO KANSAS COUNTY

TO BE GIVEN BY EXTENSION DI-
VISION

Awarded to Community Sending
Largest Number Here February
7 to 12

A silver loving cup 15 1/2 inches in height and 6 1/2 inches in circumference is shown in Robert C. Smith's jewelry window downtown. This cup is to be given by the extension division, through Karl Knaus, county agent leader, to the county sending the largest delegation to Farm and Home week.

The cup is to be kept in the county agent's office of the winning county. If there is no county agent, the cup is to be kept in the office of the county superintendent.

Indications are that there will be a record attendance here this year. Reports from 53 county agents in Kansas show the smallest number that is expected from any one of these counties is 25. The agricultural class of the Woodston high school is coming in an army truck.

Journalism Faculty Attend Meeting

Members of the faculty of the department of industrial journalism are in attendance at the Kansas State Editorial association which is meeting at Topeka this week. Prof. N. A. Crawford, head of the department, at K. S. A. C. and chairman of the agricultural advertising committee will give a report of the work done by that committee. Prof. C. E. Rogers will give an address on "Feature Writing." Others attending the meeting are Prof. E. T. Keith, and Miss Izil Polson.

Ted Gill was a dinner guest at the Kappa Phi Alpha house Friday evening.

PLAN FOR FARM AND HOME WEEK

EXPECT BETWEEN 2,000 AND
3,000

Railroads of Kansas Give Reduced
Round Trip Rate—More Rooms
Needed for Visitors

Between 2,000 and 3,000 people from over the state will attend Farm and Home week here this year if the estimates of J. E. Talbert, who has charge of the event, turn out to be correct. He bases his estimate upon the number of farmers who have shown interest in the program and also upon the number of Missouri farmers who attended Farm and Home week at the University of Missouri. Missouri is even less of an agricultural state than is Kansas but even so, there were over 3,000 people who attended at Columbia.

An additional reason for looking for an increased attendance this year is the reduction of railroad fare which gives a round trip ticket for 1 1/2 fare. The entire facilities of the college and of the people of Manhattan will be taxed to the utmost to take care of the farmers and their families from over the state who come here to spend a few days at this, their greatest service station.

Dr. A. A. Holtz of the Y. M. C. A. has charge of the registration of rooms for the week and is endeavoring to get at least 300 rooms from the faculty. Anyone with any rooms to spare for this week should leave their name and address with Doctor Holtz, stating the number of people they can accommodate.

Kansas railroads have granted a round trip rate of a fare and a half from any point in Kansas to Manhattan and return for the dates of Farm and Home week, February 7 to 12. In order to secure this rate it is necessary to secure a certificate from the local agent and to have it endorsed on arrival by Mr. Talbert, who is in charge of Farm and Home week arrangements.

Holton Gives Address At Banquet

Dean E. L. Holton delivered an address on "The Needs of Rural Schools," at the Legislative banquet in Topeka Friday evening. The banquet was arranged by the secretary of the State Teachers' association. Two hundred Kansas teachers were present and each had a legislator as his or her guest. The evening was given to a discussion of school problems confronting the state. Other members of the K. S. A. C. faculty who were present were W. H. Andrews, J. W. Searson, C. V. Williams, and V. L. Strickland.

Mr. Paul B. Gwinn, K. S. A. C. 1916, has been appointed county agent for Morris county.

EISENHOWER WINS FIRST IN CONTEST

W. L. MARTIN GIVEN SECOND IN
EXTEMPO FINALS

OVER FIVE HUNDRED HEAR TALKS

H. S. VanBlarcom and H. L. Brown
Tie for Third—Eight Men Com-
pete for Places

First prize in the public speaking contest was awarded to Milton S. Eisenhower and second prize was won by W. L. Martin at the final held in the auditorium Wednesday evening. Honorary mention was given H. S. VanBlarcom and H. L. Brown as the two men tied for third place.

Five Hundred Hear Speeches
The final award was the result of four minor contests, held for the 250 students in extemporaneous speaking. The finals Wednesday were the speeches of the men who placed in the minor contests and who passed the semi-finals last Saturday. More than 500 persons heard the speeches given in the auditorium.

The eight men who participated in the finals appeared in the following order: J. C. Gard, M. S. Laine, W. L. Martin, W. B. Lindsey, H. S. VanBlarcom, H. L. Brown, E. L. Griffith, and M. S. Eisenhower. The judges of the contest were Dr. J. E. Kammerer, Prof. C. W. Matthews, Prof. W. A. Lippincott, and Miss Grace Hesse. Dr. Howard T. Hill was chairman.

Subject Is "Failure of S. S. G. A."

Eisenhower had for his subject "The Failure of the Students' Self Governing Association." Martin spoke on the question of the starving Chinese and made an appeal for more liberal gifts from the college. The former received a \$10 gold piece for first prize and the latter received a \$5 gold piece for second place.

Dr. J. G. Emerson, head of the department of public speaking, and Doctor Hill planned the contest to stir up more interest among the extempore classes. More interest was shown in the contest than is ordinarily displayed in the college debates so that the practice will probably be continued as long as the funds last. The prize awards came from the public speaking department.

The practice that the men have received in the various contests has been beneficial to them and several are planning to try for the Valley oratorical contest. The tryout will be held on February 18.

HAVE TEA ROOM SERVICE TODAY

ANYONE MAY EAT IN THE TEA
ROOM

Serving Will Be by Class in Institu-
tional Management—Decoration
Program Will Be Carried Out

Tea room service will be maintained for an hour and a half this afternoon on the porch dining room of the cafeteria. The institutional management class of the household economics department will run the tea room as a final class problem.

This tea room will be managed on the same plan as are other tea rooms. Although it will be open on the one day only, this afternoon, from 5:15 to 6:45 o'clock, the arrangement, decoration, and service will be complete to the last detail. The porch will be decorated, as will the tables, in order to give the appearance of a well fitted room. Menu cards and order blanks will be provided. Attractiveness and daintiness will be features of the service.

Cards of invitation are being sent to faculty members who take their meals in the cafeteria, and to others interested, to go to the tea room this evening instead of to the cafeteria proper. However, anyone who wishes may eat in the tea room, regardless of notification. It would be an attractive place in which to entertain a dinner guest or a small party of friends.

Miss Burr To Give Entertainments

Miss Osceola Burr will give a series of entertainments in southwest Kansas beginning Saturday of this week. The last engagement in her tour will be in Marion, and was arranged by Miss Ruth Harding, who was graduated here last spring, and is teaching in the Marion high school.

Kaisers And Kipling Mix With Gym Profs In Dreams of Coeds

"In my dreams the Sergeant, the Kaiser, and Kipling mix my feet, saying 'East is left, and Right is right, and never the twain shall meet!'" In my nightmare squad all files are odd, and their fours are horribly queer. With a pace to the left with the front foot, and one to the right with the rear."

The Aggie girls who are taking the finals in physical education this week can sympathize heartily with the rookies who learned to "form fours" a few years ago under the direction of a hard boiled sergeant. If the coed is foresighted, she manages to be either number one or number four when the counting is done, but it sometimes happens that the instructor takes a sudden notion to vary the monotony by beginning at the opposite end of the line. Then, alas, for the schemes of the wise maid.

"Half wheel right!" The command is given, the fours form a half wheel to the right, that is, sometimes they do. Number four is all adfetter with the strain of the awful responsibility which rests upon her. Will she be able to tell her right from her left? She considers for a second, then makes a hasty decision.

"Hey, that ain't your right!" A loud whisper makes the leader do a sudden "to the rear." "Right about face! Left about face! To the rear, march! Left, right, left, right!"

There she is, standing all alone at the south end of the gym, her tie hanging over one dishevelled ear bob, and a determined look in her eye. The other members of the class may all be wrong, but she's right—or is it left?

One ingenious coed discovered a method by which she could keep her directions straight.

"See," she explained, "I wear this ruby ring on my right hand, and this plain one on my left, and when—"

"Fall in!" The order came suddenly, the girl wheeled about, started for the gym, and returned.

"Say," she spoke widely, "which hand did I say I put this ruby on?"

TO POSTPONE INTRA-MURAL
FINALS UNTIL NEXT WEEK

Phi Delta Taus to Represent Division
B Against Division A

Intra-mural basketball finals, which were to be played Saturday and Monday, have been postponed until after enrolment according to the athletic office. It is planned to play the remainder of the games and finals between the winners of divisions A and B, and then between the winner of divisions A and B and the pan-hellenic champion immediately after the beginning of the second semester.

In a fast game Wednesday evening the Phi Delta Taus won from the Y. M. C. A. team by a score of 18 to 11, making it quite certain that the Phi Delta Taus will represent division B in the finals against division A, which will probably be represented by the Elkharts. Until Wednesday neither of the teams had been defeated. The game was among the fastest that have been played and at no time in the game was either team certain of victory.

At the end of the first half the Phi Delta Taus were in the lead 12 to 6, but in the second period the Y's came back with a rush and seemed to score more easily than their opponents but were unable to overcome the lead which the Phi Delta Taus had annexed in the first half.

Miss Sara Weide will be the guest of Mrs. Dan McIntire in Wakefield over the week end.

The Webster literary society held initiation Saturday night for the new members.

Use New Registration Method

According to Miss Jessie Ma-chir, registrar, the registration will be Tuesday, by a different method than is usual. The numbers will be given to the students, beginning at 7 o'clock by the divisions they are to be seated in. Students will seat themselves in the auditorium in the section reserved for their respective class and division. The doors to be used by the different divisions are as follows: A's, middle door on the north; engineers, northeast door on the north; general science, northwest door on north; home economics, east door; Vets. and School of Ag, west door.

RIFLE TEAMS PRACTICE FOR MAY CONTEST

WILL HAVE RIFLE, GALLERY,
AND PISTOL FIRING

IS A MISSOURI VALLEY CONTEST

Can Have Any Number of Teams of
16 Men Each—All Men In R.
O. T. C. Are Eligible For
Tryouts

With the opening of the second semester all schools of the Missouri Valley will organize R. O. T. C. rifle, gallery, and pistol teams, and in the latter part of May the teams will compete for the small arms firing championship.

The gallery or indoors firing will be with the .22 calibre rifle, and outdoors with the service rifle and pistol. Just as soon as the weather will permit every school that will be in the contest is going to be on the job training for the big meet, and it is expected that some excellent shooters will be developed.

Many Positions Open

Each team will consist of 16 members, and a unit may enter any number of teams that it wishes, although a man may fire on only one team in any particular competition. In case there is more than one team each team will have a number. The firing will be done on the range regularly used by any R. O. T. C. unit. There will be no sighting shots, practice firing or coaching at the firing point on the day of the competition. The record firing will be done under the immediate supervision of an army officer who will certify to the correctness of the shots.

Dates of Contest Set

Gallery firing will be done between March 1 and April 15, the rifle firing between April 1 and May 31, and the pistol firing between April 1 and May 31. Gallery firing will be at a distance of 50 and 75 feet from prone, sitting, kneeling, and standing positions. The outdoor firing with the service rifle will be at a distance from 100 yards to 500 yards and from the same four positions. The pistol firing will be done at from 25 to 50 yards at a stationary and a moving target. There will also be rapid firing with the rifle and pistol and time limits will be put on the shooting.

Much Practice Offered

The R. O. T. C. unit here is out for the championship. "Just as soon as the weather permits it will be shooting, shooting, shooting," said Captain Van Fleet, and he is confident that some excellent shooters will be developed here. There is an abundance of ammunition on hand and all the R. O. T. C. men who can shoot are asked to come out and practice, whether they belong to the rifle club or not. There will be firing on the regular drill days and all during the week, the gallery being open every day from noon to dark, and any student who is a bona fide member of the R. O. T. C. may report and fire as much as he wishes.

ARCHITECTS GIVE HONOR TO BAKER

SOCIETY HOLDS STATE MEETING
IN TOPEKA

Delegates Present Architectural
Problems to Kansas Legislature
Saturday

Prof. C. F. Baker, of the department of architecture, was made a director of the Kansas Society of Architects at a meeting in Topeka Friday.

The society was entertained by the Topeka chamber of commerce and the Builders' club. The three sections of the conference were held in the Elks' hall. The opening session was given over to a business meeting. At the next meeting, outside speakers addressed the society on technical subjects. Bishop Wise was the principal speaker at the banquet session.

Charles Shaver, a former student in the department of architecture, was made secretary of the society.

Most of the delegates remained Saturday to present the proposed legislation relating to architectural problems, in the meeting of the Kansas house and senate.

Miss Josie Long spent a few days in Topeka last week.

THE KANSAS STATE COLLEGIAN

The Student Newspaper of the Kansas State Agricultural College
Published Every Tuesday and Friday of the College Year.
Entered at the Postoffice of Manhattan for transmission through the mails as second class matter.

Address all communications regarding stories, etc., to the editor of the Collegian and all letters in regard to advertising and subscription rates to the business manager.

WHAT IS THE EDITOR'S JOB?

The influence of a school paper depends so largely on the originality, tact, truthfulness, and broadmindedness of the editorial staff that these qualities are constantly receiving more attention in the choice of staff officers.

A newspaper should present its news in a concise, truthful, interesting manner, but in its editorial columns it should publish in a positive frank way interpretive editorial comment. Every live newspaper has the right and responsibility of making editorial comment, but it also has the responsibility of keeping its news columns free from partisanship, biased opinion and free advertising.

The Collegian is striving to print news of general college interest, emphasizing by editorial discussion aspects of student life which deserve especial consideration by "John Student."

An editor, as well as anyone else, has a right to his own opinions. He has a right to take a stand on matters that affect the school and to uphold what he believes to be right. But he should take good care that he is right. What he publishes may have and should have considerable influence in school affairs. He must be sure that that influence is used to the best advantage of the school and to uphold right. But he may as well make a mistake occasionally as to take no definite stand. After all editorial writers are human and have the inalienable right to make a mistake now and then.

No editorial staff can have much luck doing the thinking for the school, but if it can stimulate the students to do their own thinking it will have accomplished much. The editorial staff of the Collegian will make errors. But they must not fear mistakes for by mistakes they must profit.

The editorial staff will be criticised, but they should remember that someone has truly said that to escape criticism you must "Say nothing, be nothing, and do nothing."

STAY WITH THE SHIP

In the last assembly held before the holidays, President W. M. Jardine strongly urged every student to come back and finish the first semester's work at least, even though existing economic conditions had conspired to put a crimp in the finances of many students.

The importance of the president's appeal cannot be over-emphasized. A few have withdrawn from school recently. They have declared their intention of coming back next fall, or at some other more favorable time to take up their work where it was left off.

To be sure, time spent in study is never wasted, and should they never return to complete their education, they will be some four months of study better off than if they had not enrolled last fall. But should they decide to come back, and we feel that they will, they will have to cover again the work gone over in the last four months, and life is far too short to spend nine months acquiring that which is ordinarily obtained in half that time.

The student who has embarked in the good ship Determination, with education as his objective, cannot afford to leave the boat in mid-ocean. If he has almost run out of coal, it is better to go forward under difficulties, than to turn back for supplies and have the entire trip to make over again. The clouds of impending finals may be threatening, and the rocks of financial difficulties may be on all sides, but with skillful management the good ship Determination will soon float smoothly into the placid waters of better times with the promised land of the second semester at hand. This, you may cross or not, as you wish, but at least you have completed one leg of the journey towards education. Stay with the ship, and don't turn back.

HOW ABOUT IT, SENIORS?

There comes a time in the life of every college student when he cares no more to be put in the limelight. But at the same time when a student has attended college four years there are certain privileges which he has the right to enjoy. One of these at K. S. A. C. has been that the senior class should have the sole right of occupying the "pit" in the auditorium during chapel. Of late, however, it has been noticed that fewer and fewer are in this section which by all traditions is theirs. Perhaps this has been partly due to the fact that the seats have been filled by underclassmen and partly because the seniors themselves have not made it a point to sit there.

Besides the fact that the senior class should occupy the pit because of tradition there is another reason equally as important. All of the seniors cannot wear Stetson hats or corduroy suits and thus many of them are unknown, especially to the freshmen. Then why not let the pit be the distinction of honor and occupied only by the seniors? In order to carry this out all must cooperate. Foreigners must stay out and seniors get in the pit. Let's see what our seniors look like.

ONLY 75 LOYAL AGGIES

Where were the loyal Aggies? They were at the Union Pacific depot last Thursday afternoon at 5:20 o'clock when the basketball team left to play Ames.

How many did they number? About 75 or 100. Just reflect, dear student, isn't that a miserable showing for a student body of 3,000? Surely there are more than 75 people in this school who are really interested in our basketball team.

The Aggie basketball team has a more than average chance

to win the valley basketball championship. Win or lose, they deserve the support of all students of the college. Although the football team did not have an all victorious season they had the undivided support of the student body. Let's give the basketball team the same kind of a send off we gave the football team. If 600 Aggies can get up at 5 o'clock in the morning to give the football team a real sendoff, surely more than 75 students are willing to go to the depot in the daytime to see the basketball team off. Come out of the woods, Aggies, and get that voluntary inertia out of your system.

THE BROWN BULL DOES IT

A laugh a day keeps the blues away—and discourages flunk slips. Laughter insures good humor, good humor begets optimism, which in turn breeds self confidence and efficiency, in business, in pleasure, and in study. Humor routs depression, creates good feeling towards mankind, and drives away the black clouds of hatred and worry, replacing them with the sunshine of friendliness and hope. It would be more effective in avoiding war than any League of Nations. It is the enemy of intolerance and suspicion, it causes man to appreciate and enjoy his fellows, his work and his play. There is too little humor interspersed with our daily grind, and any effort to increase the available supply should have our active encouragement.

The Brown Bull has earned recognition, both from K. S. A. C. officials and from other literary authorities, as a humorous publication of real merit. Twenty-five cents, or two bits in the American vernacular, is the price of one issue of the Bull. This is the price of a good cigar, a malted milk, an ice cream sundae, or a movie. We have a conviction that no person, however much he enjoys a grouch has read through a past issue of the Bull without having acquired a more tolerant attitude towards his fellows and his work.

A school magazine of wit and humor is worth much to an institution and most colleges are officially recognizing the value of this form of school enterprise.

Reserve a two-bit piece for the coming issue of the Brown Bull. It will not be a donation, but a good investment from any viewpoint. In its pages will be found the panacea for all mental ills, from homesickness to lovesickness.

TO THE S. S. G. A.

The Y. M. C. A., regretting the publicity which has been given to the college by some unthinking press agent, nevertheless realize that we are facing a situation that demands definite and immediate action. As a representative organization of the student body they feel justified in calling the attention of the S. S. G. A. to the following resolutions which have been drawn up.

First: We believe that the dancing situation should be cleaned up from within the college. The S. S. G. A. is the student organization that should be responsible for such a clean up.

Second: To that purpose we pledge to the S. S. G. A. and to its duly authorized executive officers the moral support and influence of this organization.

Third: We further recommend that extreme forms of dancing, such as lip to lip, toddling, etc., should be abolished and publicity given to the fact that such forms of dancing will not be tolerated at student functions.

Fourth: We strongly recommend that in order to meet the demand of the situation that faculty chaperones be chosen jointly by the student affairs committee in conference with President W. M. Jardine and that these chaperones be definitely instructed as to their duties and responsibilities and they further be informed that they have the moral support of faculty and students.

We again pledge our hearty support to the S. S. G. A. and firmly believe in the integrity and ability of the executive committee to meet this and all other situations.—S. D. Capper, President of Y. M. C. A.

Things we think things others think
think; and things we think
of things others think.

Dear Editor: I am just wondering if it would be possible to have the postoffice boxes reassigned? In passing through Anderson hall I have noticed many freshmen who have not been fortunate enough to "grow up," standing in front of their boxes and jumping up to see if there are any of the three letters from home, mother's, dad's or "yours truly back home." Then again my sympathy has gone out to the poor six foot three down on his knees looking for a letter. Can't there be something done for the comfort of the freshmen, as they have so many troubles?—A Freshman Friend.

Dear Editor: No one enjoys a basketball game more than I do and I am sure that everyone in the college is pushing the team for this year.

It has occurred to me that some sort of entertainment could be provided between halves at the basketball games. Last year a boxing match was held during those periods. Wrestling matches could be held or, better still, some Aggie girl could give a solo dance. The band is there to furnish the music so why couldn't some fair codd put on a classic dance?—A Regular Attendant.

Dear Editor: I don't agree with the boxed in policy of the Collegian which has been published recently. It is a code of individualism, which if followed throughout the ages would result in a veritable standstill of progress and civilization. Seriously, it is the greatest privilege that may come to a man, to be God's instrument in the answering of prayer, in the encouragement of another, and both donor and receiver are better for an unselfish service rendered. However, E. Pluribus Unum, 'ray for KSAC, I am young and may change my mind.—Midnight Marv.

Dear Editor: Will you tell me why the people of the college—students, employees, and especially the instructors, persist in dropping packages and mail in the postoffice, with only the addressee's initials before the surname? Numerous times I have received mail in my box which was not meant for me at all. This was not the fault of Miss May, as there are three persons in school by the same name, the initials of one being "H. P.," the second, "C. H.," and the third, "C. M." If the given names were written out, much of this mis-sent mail would be avoided.—H. C. Spencer.

Dear Editor: One thing completely lacking at present, but which would result in better management of activities at K. S. A. C. is the unification of the "barbs." Class interest in particular would be benefited as well as the S. S. G. A.

I am not advocating strife between the Greek and "barb" groups which would result in antagonistic factions, but rather friendly competition which would secure more interest in student activities. Class elections are, as a rule, mere formalities in which the candidates, which are perhaps previously agreed upon by the fraternity people, are presented. In many cases the non-fraternity element presents no candidates. When the elections are held, the Greeks rush to the window opposite the post office to support their candidates, while the majority of the "barbs" fail to take enough interest to vote at all. The results are, of course, a walk-away for the Greeks. This is to the credit of the fraternity people, and no one has grounds for criticism.

The fault lies with the "barbs" themselves for their indifference. This lack of interest accounts for the fact that more votes are not cast for class officers, S. S. G. A. officers, and council representatives. At K. S. A. C. we work, at present, as organizations. That is the reason I believe organization of the "barb" element for political purposes would result in greater interest in all student activities, the election of better men, and the proper support of the officers elected.

If organization is not possible, then at least this group should show more interest in college affairs.—J. W. B.

Dear Editor: A short time ago, you published a letter from an athlete in which he condemned the

wearing of white sweaters, contending that it was an infringement upon the distinction which belongs to a K man.

The K debaters of the college also have an official letter. Speaking from experience, I know that these people work as hard as an athlete to win this distinction. The debate K is a small pin with the letter K encircled by a ring band. The design is similar to the monogram on our water tower. A number of persons wear K pins as stick pins and other jewelry. These are not exactly similar to the official K pin but they look a great deal alike. One not familiar with the debate K, could easily mistake a person wearing some of this jewelry as a K debater. I believe this infringement upon the distinction conferred upon persons who earn K's should not be tolerated, neither should the wearing of white sweaters.—Aggie Linguist.

Dear Editor: The white sweater with the "K" is the medal of honor, the croix de guerre of K. S. A. C. athletics. The "K" is symbolic of the same thing in the school life of this institution, as were the honor medals in the late war, that is, unusual and outstanding achievement on the part of the wearer, of honors won through service and sacrifice.

No ex-service man would think of wearing a decoration which might be mistaken for a congressional medal of honor. He knows that it is an honor rarely bestowed and that the man who wears one has earned it by performing the extraordinary, and having been in the service he understands the unusual nature of the service of which the medal is symbolic.

Ray Watson has called our attention to a situation existing here that many other schools have recognized as cheapening in its effect on athletic awards and standards, the wearing of sweaters similar to the "K" sweaters by a number of stud-

ents. "K" sweaters are not given out indiscriminately by the athletic board. The men who wear them have earned them and paid for them in sacrifices and services rendered. They have gone through the monotonous grind of training, losing or winning they have given their best to the school, and they alone realize and appreciate the full significance of the "K." No other student should be permitted to wear a sweater which in any way resembles the varsity issue in color or design.—Ex-service Man.

Prof. Charles W. Mathews will address the Teachers' association meeting of Graham county at Hill City Saturday, January 29, on the subject, "Good Reading."

The Busy Body

Question: Should the stenographers of K. S. A. C. be allowed to chew gum?

Prof. R. J. Newman: It all depends on whether they divide with the rest of the office, or not.

Miss Margaret Russell: I see no reason why stenographers should not chew gum if the college students do.

Prof. C. E. West: They should not because: They would undoubtedly get the chewed gum intermingled with typewriter mechanism; they would seal letters and apply stamps when necessary to use an additional adhesive; the continuous mastication tends to cause fatigue of the jaws, loss of a very important digestive principle, with consequent indigestion and general lack of efficiency.

WAREHAM THEATRE

Friday, January 28

Tom Moore

In the Cohan and Harris Notable Stage Success

"Officer 666"

Helping to rob his own house is one of the screamingly ludicrous situations in Tom Moore's latest gloom-chaser. It is crammed full of clean, clever humor, even better than the stage version, which had all Broadway laughing for months.

TO LEARN ABOUT OATS VARIETIES

AGGIE AGRONOMISTS EXPERIMENT WITH BURT OATS

U. S. D. A. Man here This Month to Work on Description of Popular Nebraska Grain

F. A. Coffman, 12, in charge of field experiments for the United States department of agriculture at Akron, Col., will be here at the college during January and February working on the descriptions of a large number of different kinds of Burt oats.

This experimental work, which is being conducted in cooperation with the agronomy department, is being carried on for the purpose of learning the characteristic colors and with the idea of trying to isolate and increase pure types which are early, high yielding, smut resistant and white or yellow in color instead of showing various colors such as are now present in commercial lots of Burt oats.

This variety of oats has been tested by the Nebraska station for 15 years and has been found to be the highest yielding variety there. However, Burt oats are not grown commercially in Kansas to any extent, although cooperative tests with farmers have shown them to be adapted to some parts of the state and they are thought by agronomists to be one of the three varieties which will establish a prominent place in the agriculture of this state. The other two leading varieties are Sixty Day or Kherson oats and the new variety of red oats called Kansas Fulghum, recently distributed by the college.

HAVE WIRELESS TELEPHONE HERE

HERBERT MCLELLAND MAKES FIRST SUCCESSFUL EXPERIMENT

May Give Demonstration of Instrument in Few Weeks—Can Talk Distance of Three Miles

K. S. A. C. boasts of a wireless telephone. Herbert McClelland with some assistance from his radio class has made the first successful experiments at the college with a wireless telephone.

While it is only yet in its experimental stage, and while a distance of only two or three miles has been reached, strong promises are evident for its greater effectiveness.

The instruments used are those belonging to the sensitive French E-10 wireless set recently received by the military department, and which has been in use overseas.

Thursday afternoon one of the physics labs in which the wireless room is located, was the scene of considerable interest. The vibrations from the operator's voice were radiated off from the large aerial at the north of Denison hall. These vibrations, passing through the stone walls of the building, were then picked up on a small indoor aerial constructed along the ceiling of one of the rooms and changed by the receiving instrument back to the speaker's voice. Victrola music was also transmitted in the same way by placing the Victrola close to the telephone transmitter.

When it is realized that the wireless phone is being put to transcendental use, these results may appear rather meager, but, as has been said, it is only experimental here so far. Also a highly effective station entails considerable expense and more power than is available at this school. It is not unlikely that a demonstration to the college will be given sometime in the near future.

H. E. MATHER IS ORATOR FOR ATHENIAN SOCIETY

"Cooperative Marketing" Is Subject of Winning Oration

H. E. Mather, senior in animal husbandry, was chosen orator for the Athenian literary society in the society contest held in the Browning-Athenian hall Saturday night. There were three contestants entered in the tryout, Arnold Englund with an oration entitled "Farm Tenantry," C. C. McPherson whose subject was "Americanism versus Socialism," and H. E. Mather with an oration on the subject "Cooperative Marketing."

The judges were Miss Margaret Russell, Prof. J. V. Cortelyou, Prof. Hugh Durhan, and Prof. N. A. Crawford.

Many applications are being made by R.O.T.C.'s for attendance at the military camps to be held this summer at St. Paul, Minn., and at San Francisco, Cal. The department in order to boost the camps has prepared a large number of posters to be distributed about the campus.

Saturday morning the home study service broke its previous enrolment records. Thirty paid enrolments came in that morning.

Poor Little Coeds To Dress Warmer Right Pronto Now

At last the young women of the west have taken up a sensible style. Those old fashioned Artic overshoes are being worn in Kansas City under the name of "goloshes."

Girls in eastern colleges have been wearing them in snowy weather for years, but until one overworked coed forgot to buckle her four buckle "goloshes" they were not worn for style. Since this important mistake created a new style women of the fashionable cities have started wearing their Artics unbuckled.

The very latest is to wear these Artics of one, two or four buckles without using the buckles and leaving enough space between the top of the "golosh" and the bottom of the skirt for silk hosiery to shine out with its cheery effect.

The reports are that the women take off their shoes and don the "goloshes" and that their escorts being up on "golosh" etiquette never try to offer to help them remove their overshoes. The question that the "Ags." expect to be able to answer in a few weeks is, "where do they carry their shoes?"

INTELLIGENCE OF STUDENTS LOWER THAN PAST YEARS

Report of Dr. F. A. Hall Lays Blame on Work of Individual—Less Serious Since War

According to the annual report of Dr. Frederick A. Hall, chancellor of Washington university, the average intelligence of college students is lower than in previous years.

This conclusion was reached after correspondence with authorities in other institutions. The report also states that the number of college students has been steadily increasing.

The report lays the blame on the work of the student and says that contrary to the expectations of the people that the young would settle down to serious study after the war, they are not inclined to be serious enough to keep up the standards which students of the past have set.

Unless the colleges are very careful this increasing number of students will cause a lower type of graduate to be sent out than that which has been graduated in previous years.

KELLY STARTS ASSOCIATION OF ECONOMIC ENTOMOLOGISTS

Kansas Man Becomes President of New Organization

E. G. Kelly, extension entomologist of the Kansas State Agricultural college, while attending a meeting of the Association of American Economic Entomologists held in Chicago during the holidays, organized an association of extension entomologists with a membership from 12 states. Other states will follow with their delegations.

Mr. Kelly was elected president of this association and W. P. Flint of the University of Illinois was elected secretary.

The engineering division has recently received a 3-reel film on tractor repair and field work. These films are being shown during class periods to the students of the division.

Ward Fetrow, '20, is spending this week at the college. He is now working on farm census work in the United States department of agriculture.

P. G. Martin of Junction City, former student here and junior in civil engineering will return to school next semester. Mr. Martin is a member of the Sigma Alpha Epsilon fraternity.

Sergeant F. L. Weinberg, truck driver for the military department has left for Fort Morgan, Ala.

Miss Cora Akers who finishes her college course this semester has accepted a position in the high school at Delavan, Kan.

OUTLINE COURSE FOR FORTY MANUAL TRAINING TEACHERS

Visit Class of K. C. Instructors Once a Week Is Newest Home Study Service Project

A class of 40 manual training teachers of Kansas City, following a definitely outlined course and visited personally once a week by V. L. Strickland or some other specialist in vocational training, is the latest project of the home study service of this institution. Dean E. L. Holton, and Prof. C. V. Williams will visit the class at least once during the winter.

This project has had the local cooperation of Prof. M. G. Burton, formerly director of home study service here, now directing all manual training teachers in Kansas City.

The purpose of the course is to give the teachers a broader vision

of their work and its underlying philosophy in relation to the rest of the school system. Continuation schools and part-time day schools are represented in the class membership.

There will be 12 two-hour sessions of the class, met Wednesday of each week by a personal representative from the college.

New Extension Pathologist

E. A. Stockdyke, formerly of the University of Wisconsin, has been employed as the plant pathologist for the extension department. He will have charge of the extension work on cereal forage crops, and fruit and vegetable diseases. Professor Stockdyke will have his office in the botany department.

L. A. Fitz, professor of milling industry, was in Topeka Tuesday attending a meeting of the committee which is investigating the flour milling industry.

AGGIE REACHES REAL FARMERS

NICHOLS IS MANAGING EDITOR
OF CAPPER FARM PRESS

Supervises Papers and Magazines Covering Farming Country East of Pacific Coast Territory

Floyd B. Nichols, '12, probably reaches directly as many real farmers every month as any man in the country. He is managing editor of the Capper Farm press. The eight papers and magazines which he supervises cover the farming country east of the Pacific coast territory

FLOYD B. NICHOLS

like a blanket as far as the Atlantic. He has one of the really big jobs with the Capper publications.

Nichols came to the Kansas State Agricultural college from a farm near Buffalo, in Wilson county. He wore the largest size hat in college the entire time he was here. Otherwise he was remarkable for the serious manner of his study, and the positive views he held on anything which interested him. He specialized in industrial journalism under Charles Dillon, then head of that department. During his senior year he edited the Royal Purple, and returned the senior assessment—less the selling price of the book—to the seniors commencement week.

The year following his graduation Floyd went to the Capper Farm papers as field man under Dillon, who had left college to become managing editor of the "57 varieties." Nichols rose steadily. The war came. He spent 18 months in the army, including a year overseas, returning just in time to take Dillon's place as managing editor. Nichols is one of the "Big Five" Aggies on the Capper farm papers. The other four are A. G. Kittell, '09, editor of the Nebraska Farm Journal; George C. Wheeler, '95, associate editor of the Kansas Farmer and Mail and Breeze; Theodore W. Morse, '95, director of livestock advertising for the Farm press; Mrs. Ida (Rigney) Migliario, '09, farm home editor.—Industrialist.

It's Our Mistake

In last Friday's Collegian there was an article headed "Chinese Student's Father Here." The story stated that the visitor was the father of Poy Lung. This was a mistake as the visitor is the father of Poy Lim, a student here and F. Y. Lim who graduated here a few years ago in electrical engineering.

Eye Strain

causes nervousness, irritability, and head aches. It is a simple matter to relieve eye strain. Our scientific test will tell just the kind of lenses required.

Our frames and mountings are comfortable and becoming.

Taxi Horns Now Honk Death Knell of Old Time College Socials

"Come on folks, let's go to the social," said the old Aggie student of forty years ago. "To Johnnie's," says his son to the taxi driver as he slams the door of the machine. Away back in the 80's the college social played as prominent a part in the social life of the college as Harrison's hall or recreation center does now.

The social was given by the faculty for the students every term. In those days dances were rare things and none were ever given under the auspices of the college. As there were no theaters and few places of entertainment, the college social was looked on as the event of the term and whatever was done there was considered to be quite correct.

Old fashioned games were played and conversations engaged in at these socials. Here you met and talked with your profs, on the subjects of the day or anything else other than nitric acid or applied mechanics. There were no refreshments. These were left for a later day. Due to this old college social the students were brought closer together and this stimulated a closer rivalry between classes than that which exists today.

But the college social was doomed as is everything else that has run its day. With the introduction of other forms and places of entertainment the attendance of the social began to gradually drop off. The last one was held on February 21, 1896. A very large crowd attended and several attractive features were presented, among them being a demonstration of the X rays which were discovered only a few months before. So thus perished the old college social in a blaze of glory, a fitting end to a great institution.

Story of Three Neales

Three Neales, who were graduated from college in the last three years, are scattered over quite an extent of territory. J. R. Neale, '17, is superintendent of the Donald Ranching corporation at Melville, Mont. Philip E. Neale, '20, is at Davis, Cal., where he is in charge of registered short horns and also a flock of Hampshire sheep. Miss Comfort Amanda Neale, '18, is teaching domestic science in the high school at Rossville.

Boosts Alumni Association

Lauren W. (Swud) Lawson, '07, still is in the game. Swud is managing the Guarantee Clothing and Shoe company at McPherson. In a recent letter he asks that he be given a job boosting for the college and the alumni association. "Whenever there is anything I can do," Lawson writes, "Just whistle."

Miss Miriam Rusmigel will be a week end guest of Miss Ardis Atkins.

MAKES CAMPUS MORE BEAUTIFUL

HORTICULTURE DEPARTMENT
IS NOW MOVING TREES

Tree Digger Helps Do the Work—
Kansas Climate Makes this
Task Difficult

The horticultural department is not satisfied with the location and appearance of the trees on the campus. But the moving of big trees in Kansas is a difficult task because of the dry climate. The roots dry out while the tree is being moved and thus stunt or kill it.

The department was able to purchase a tree digger from the United States supplies at Camp Funston shortly after the signing of the armistice, which has been used in moving hundreds of trees in Manhattan and is now at work moving trees on the campus.

This machine is a source of interest because of its new methods and efficiency. When moving a tree the limbs are first tied up out of the way. A small ditch about six inches deep is dug around the tree and the small spades of the machine which are arranged in a circle are inserted in the ground about two feet deep. The tree is then lifted with a ball of dirt which prevents the roots from being disturbed. Then it is moved to the desired location where it is dropped in the hole, oriented, tamped thoroughly, watered and mulched.

By this means the department of horticulture hopes to make the grounds at K. S. A. C. an ideal campus.

Missouri Gets Aggie Girl

Mrs. Clare (Lewallen) Montgomery, '11, has been appointed home demonstration agent in Jackson county, Mo. She will work with the Kansas City Consumers league, Kansas City, Mo. Her street address is 3229 Holmes street. News of the appointment was received from Adelle D. Root, '13, who is state home demonstration agent for Missouri with headquarters at the University of Missouri, Columbia.

Dr. R. F. Driggs May Lecture

Dr. R. F. Driggs, of the department of geology and botany at Ohio State university, is expected to come to Manhattan in March to give a lecture and to show the world famous Katal expedition pictures. These expeditions were under the direction of the National Geographic magazine and were very successful.

Dr. Driggs is one of the foremost scientists and one of the three speakers at the Chicago convention. Gamma Sigma Delta, honorary agricultural fraternity, will have charge of the lecture. If Doctor Driggs comes it will be as a personal favor to Prof. E. L. Melchers.

Paper Dated August 1773 Hangs on Wall Of Reference Room

An interesting relic hangs on the north wall of the reference room of the library. It is an original copy of the "Maryland Journal and Baltimore Advertiser" of the issue of August 20, 1773. The copy is yellow with age but is otherwise well preserved. It is interesting both from the standpoint of the modern journalist, and from that of the casual curio seeker. It was printed at a time when the colonies were still referring to "His Gracious Lord and Majesty, George III", instead of "the fat Dutchman."

The paper is about the size of some of our farm publications of to-day and the make-up is such as to give a modern printer disagreeable dreams. The variety and style of type used on the first page would be called a "conglomerate mass" by most instructors in the art of printing.

The paper, which purports to "contain the freshest advices" is a model of conservatism as far as news features are concerned. There are no crying headlines nor any last minute bulletins. The front page is given over almost exclusively to a letter from the Bishop of C to the Earl of Belmont censoring him for an intended duel. The remainder of the front page is used by the editor in telling his troubles to the world. For it seems that even at this early date editors were constantly having trouble with delinquent subscribers.

Of especial interest to students of advertising is the fourth page, which contains the advertising section. There are no attention attracting devices used, each ad being merely an item of news appropriately headed. Jewelers, tailors, and shop keepers, make their announcements. In the lost and strayed column are notices of rewards for the return of indentured servants and slaves.

The paper is rich in local color and the atmosphere of the colonial days. The articles are serious, with no trace of the flippant humor that characterizes publications of the twentieth century. Our forefathers were engaged in a serious business and it is reflected in their journalistic efforts.

About ten years ago, the paper was brought to the library as an exhibition of the early advertising, to be used as a model of that art in its infancy.

Clyde C. Key, '18, graduate in civil engineering, is now office engineer for the C. R. Nichols company at Wichita Falls, Texas. He is working on the installation of a new sewerage system for that city. W. E. Dickerson, senior civil engineer, worked with the same company there last summer.

Sergeant Ryan of the veterinary corps of Camp Funston has been stationed at K.S.A.C. and will assist Lieutenant Brower.

BISHOP WALDORF TO SPEAK HERE

WILL TAKE PART IN WORLD
FORUM

Is Capable Organizer and Practical
Idealist—Heads W. M. A. Area
of Methodist Conference

Bishop Ernest Lynn Waldorf, LL. D., one of the speakers secured for the World Forum, is head of the Wichita area of the Methodist conference.

He was educated at Syracuse university, and entered New York conference in 1900. He has held pastorates at Centenary church of Syracuse, N. Y., Plymouth church, Buffalo, N. Y., and the First church at Cleveland, Ohio, from which place he came to take charge of the Wichita area.

During the time of his service with the above churches, each at least doubled its membership. These instances show that he is a most capable organizer and a good general of his organized forces.

His idea of the church and its mission may be stated as follows: "It is a home, a hospital, a nursery, a life saving station, an educational institution, a training school, a reform agency, a philanthropic institution, a place of inspiring vision, and a home of worship."

Bishop Waldorf's talks and lectures are full of interest, and the impression one gets of him is that he has great vigor of body, mind, and spirit. He likes to work, has the knack of getting others to work, and might even be termed a "practical idealist."

CHURCH SCHOOLS ASK AG STATION

COOPER AND NICKERSON REQUEST APPROPRIATIONS

Farmers Desire New Soil Test Division in Arkansas Valley

A movement has been on foot for some time, which has just become known outside the inner circles, to secure a branch of the Kansas State Agricultural college in connection with Cooper college at Sterling.

Farmers around Sterling complain that soil tests made at the Manhattan or Hays schools are practically worthless so far as soil in that section of the state is concerned. Sterling is the center of a large district where the soil is very similar, and experiments made there would serve a large area. Cooper college has considerable land that could be used for experimental purposes and additional land could easily be secured. It is for these reasons that Sterling is going before the present session of the legislature with a bill asking for appropriation for such purposes.

Since Nickerson is also asking for the same proposition, the legislature will probably decide whether there will be such a branch established, then decide which of the two is to be chosen for the work.

AWARD 12 MEN SCHOLARSHIPS

FUNDS FURNISHED BY NATIONAL
Y. M. C. A.

Council Gives Profits Cleared on Canteen Sales to Help Ex-Servicemen

The local Y. M. C. A. has recently received word that 12 more Aggie students had been awarded scholarships. This makes a total of 33 scholarships that the Y. M. C. A. has granted to students of this institution, this school year. During the last two years 60 students have received Y. M. C. A. scholarships which amounted to from \$50 to \$150.

The money which has been given to K. S. A. C. students is a part of the \$79,000 fund, which the national Y. M. C. A. gave to the state Y. M. C. A., to be awarded to ex-servicemen who needed help to continue their college work, and who because of a lack of disability were unable to qualify for government vocational training.

This money was obtained by the Y. M. C. A. war council through the operations of their army canteens. This awarding of scholarships to ex-servicemen is thus aiding the men from whom it was obtained as profits from canteen sales.

CHICAGO DIRECTOR PRAISES
AGGIE GRADUATE ENGINEERS

Four K. S. A. C. Alumni Electricians Make Good at Central Station Institute

A letter recently received by Prof. C. E. Reid from the director of the Chicago Central Station insti-

tute, a training organization supported by the Commonwealth Edison company of Chicago, and associated companies, contains the following statement:

"I certainly appreciate the hearty cooperation which you gave me in selecting men from your department for the institute. Cook, Schultz, Guldge, and Gfeller are men of very high talent and are held in high esteem by the men for whom they have worked in the Commonwealth Edison company. They reflect the very high standard of training which is given at Kansas State Agricultural college and especially that of the electrical department."

The men referred to are J. A. Cook and H. G. Schultz, electrical engineering graduates with the class of 1919, and John S. Guldge and Lester F. Gfeller, electrical engineering graduates with the class of 1920.

Prof. N. A. Crawford, head of the Journalism department, spent several days last week in Topeka on business.

Dean E. L. Holton was recently elected president of the Schoolmasters' club, a state organization of the prominent public school and college men of Kansas.

Miss Emily Adams spent the week end with her parents in Maple Hill.

A. E. Langworthy, feed inspector, has been summoned to Tyler, Tex., where he is to appear as a witness for the government in its case against the Tyler Cotton and Oil company.

George E. Gemmell will address the teachers of Ottawa county on the subject "Educational Objectives," on February 5.

Dinner guests at the Beta Theta Pi house Sunday were Major and Mrs. F. B. Terril, Mrs. Fishback and Mrs. Simpson of Tulsa, Okla.

Charles M. Weeks, an Aggie student of the nineties, is now in the manufacturing business in Walden, N. Y. Mr. Weeks manufactures coin operated machines.

The senior electrical engineers are now doing some very practical work in their class in illumination. They are designing the lighting systems which would improve the lighting of the Manhattan hospitals, the store windows, some of the residences and the churches. Two of them have been assigned the problem of designing a lighting system for the new engineering building.

Miss Mildred Johnson, stenographer in the chemistry department, who was taken to Charlotte Swift hospital for appendicitis operation last week was able to leave the hospital Saturday.

The class in wireless telephone are making good progress in their work. They have perfected the phone so that they can now get connections with the Manhattan city phones.

Miss Zephyr Drake of Junction City was a week end guest of Miss Winifred West at the Delta Zeta house.

Mrs. Inez Sargent has returned from Rosedale where she has been at Bell Memorial hospital.

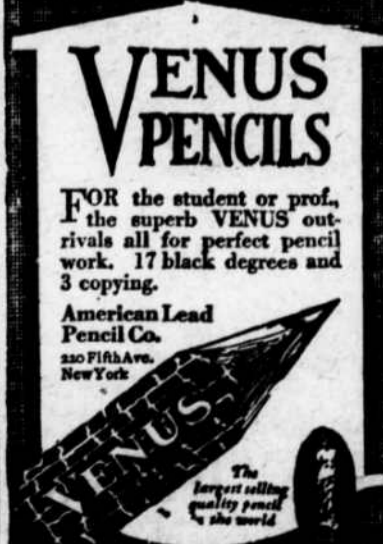

D. A. Kramer, of Washington, spent Monday and Tuesday of this week with his daughter, Miss Evalene Kramer, assistant director of the college cafeteria. Tuesday afternoon Mr. Kramer left for Los Angeles, Cal., where he will spend the remainder of the winter with relatives.

Miss Corinne Locke, of Erie, who was called home by the death of her father soon after the beginning of school, expects to return this week and enroll for the second semester. Miss Locke is a freshman in home economics.

Dean Mary Pierce Van Zile will attend the annual meeting of the Kansas Council of Women at Topeka, Friday. The main topic for discussion is the Legislative campaign for dormitories.

President W. M. Jardine spoke at a joint meeting of the Junction City and Manhattan Rotary clubs Thursday evening on "Constructive Citizenship."

Wanted: student for summer work. Good salary. Opportunity for advancement. Write or call Mrs. Ada Morals before Sunday. 1019 Humboldt. Phone 369J.

STATE SENATORS VISIT K. S. A. C.

ARE HERE ON INVESTIGATION
TRIP

Members of Ways and Means Committee and of Educational Institutions Committee Among the Group

Thirty members of the legislature made a trip of investigation to the college Tuesday. They arrived at 12 o'clock and spent the afternoon looking over the various college buildings and equipment.

Some of the senators on the Ways and Means committee who came on the trip were C. E. Snyder, Henry M. Laing, O. O. Wolf, P. H. Kimball, J. M. Satterthwaite, A. L. Brooke, M. B. Van de Mark, D. A. Chase, S. F. Paul, E. E. Frizell, and C. W. Thompson.

Educational Institutions committee visitors were Bert C. Culp, chairman; H. G. Kyle, Henry M. Laing, F. H. Woodburg, M. G. Vincent, Alfred Docking, and R. C. Gates. President W. M. Jardine showed the men around over the campus. The visitors lunched at the college cafeteria.

Miss Mary Polson and Miss Izil Polson went to Topeka today where the latter will attend the meeting of the state editorial association. Both expect to attend the concert to be given in Topeka this evening by Jan Kubelik, violinist.

Miss Nell Roop will spend the week end at her home in Wakefield.

Miss Ila Knight will spend the week end at her home in Jamestown. C. E. Graves, who has completed the work in agriculture course, will not be assistant in the botany department next term.

Sunday Sour Owl club dance at Harrisona.

Elkhart club dance in Recreation.

Tuesday Tobasco club dance at Elk's hall.

Chi Omega fraternity has pledged Miss Eva Bonecutter of Humboldt, freshman in home economics.

Sigma Phi Epsilon has pledged Mr. Rolin Webb, of Cedarvale, freshman in electrical engineering.

The Alpha Tau Omega fraternity has pledged Mr. Fred McElhinney of Manhattan, sophomore in electrical engineering.

Prof. and Mrs. G. A. Dean entertained at bridge last Friday evening in honor of Dr. and Mrs. J. E. Ackert. There were five tables.

The members of the zoology department entertained at dinner in honor of Dr. and Mrs. J. E. Ackert last Wednesday evening at the college club. After dinner the evening was spent at cards.

Mrs. Ada Pettit entertained the house mothers of the sororities and fraternities Wednesday afternoon with a line party at Marshall theater. After the matinee luncheon was served at the Palace.

Dr. and Mrs. R. K. Nabours entertained with a four course formal dinner in honor of Dr. and Mrs. J. E. Ackert last Thursday evening at their home, 1030 Laramie street. Fifteen guests were present.

The MacDowell club met on Monday evening, January 24. Miss Mabel Leffler played "Scotch Poem" and "Praeludium in E minor" by MacDowell. Miss Florence Myer sang "The Star" by Rogers. Miss Bess Curry played the accompaniment.

Miss Emily Burger gave a farewell oyster supper Sunday evening at the home of Mrs. S. A. Cribfield, 1122 Vattier street. Miss Burger will withdraw from school at the end of this semester and will teach near Seneca. The guests were Mrs. S. A.

Cribfield, Miss Leslie Burger, Miss Clara Evans, Miss Margaret Dubbs, Miss Christine Burger, Miss Corinne Thiele, Miss Olive Herring, Miss Myrtle Dubbs, Miss Georgia Bell Cribfield, Miss Edith Haines, and Mr. Paul Johnson of Wamego.

President and Mrs. W. M. Jardine, Dean and Mrs. F. D. Farrell, Dr. and Mrs. C. W. McCampbell, and Prof. and Mrs. J. B. Fitch entertained the stock judging and dairy teams Saturday evening at the Country Club with a four course dinner. The rooms were decorated with yellow and white.

Freshman Girls' Pan-Hellenic dance was given at Harrison's hall, Friday evening, January 21. The hall was decorated with palms, ferns and flowers. Floor lamps and davenport were arranged around the hall. Rex Maupin's four piece orchestra furnished the music. Punch was served throughout the evening. The chaperones for the evening were the different sorority house mothers. Mrs. D. A. Dodd, Mrs. Elizabeth Warner, Mrs. S. C. Pettit, Mrs. Winifred Miller, Mrs. D. C. Bice, Mrs. S. D. Ricker, and Miss Berenice Fuller.

Miss Louise Dugan and Mr. Andrew E. Dyatt were married Saturday evening at 8 o'clock at the home of the bride, 341 North Fifteenth street. The ceremony was performed by Rev. J. David Arnold of the Christian church. Miss Dorothy Dugan was bridesmaid and Mr. Irl Fleming was best man. Mr. Dyatt was graduated from K. S. A. C. as a civil engineer in the class of 1917, and is now a civil engineer at Topeka. He is a member of the Sigma Phi Delta fraternity.

The annual banquet of the Kansas State chapter of the American College Quill club was held Monday evening at the Gillett hotel. This banquet is held in honor of William Caxton, the first English printer. A four course dinner was served, at a long table attractively decorated with a color scheme of pink and green. Milton S. Eisenhower acted as toastmaster. After the banquet the following toasts were given, the series of subjects carrying out a plan of different types of literary work, "The Epigram," Prof. J. W. Searson; "The Short Story," Edward Shaffer; "The Limerick," Miss Clementine Paddelford; "The Novel," Morse Salisbury; "Poetry," Prof. N. A. Crawford;

"The Scenario," Prof. H. W. Davis. Guests of the club were Major and Mrs. Davidson, Mrs. W. M. Jardine, Mrs. Van Trump Warren, Mrs. J. W. Searson, Mrs. H. W. Davis, Mrs. C. E. Rogers, Miss Florence Heizer, Miss Margaret Russell, Miss Jane Bibler, Miss Jess Evans, Miss Hazel Burdette, Prof. O. H. Burns, Mr. Lloyd Zimmerman, Prof. R. W. Conover, Prof. Albert Dickens, Mrs. George Gemmell, and Mr. E. S. Elcock.

H. G. BRYSON AT TOP IN CONTEST

PRIZE OF TEN DOLLARS GOES TO WINNER

A. E. Goodwin Ranks Second—Five Dollars Offered For Best Editorial and Feature Story

Collegian contest closes for the first semester with this issue. H. G. Bryson leads the 35 contestants with 509 1/2 inches. A. E. Goodwin is second with 374 inches. The next in standing are, Lucile Whan 326, S. G. Swenson 278 1/2, Josephine Hemp-hill 244, Louis Childers 242 1/2, Frances Johnstone 222 1/2, Harold Hobbs 211 1/2, Bess Hansen 211 1/2, and Lillian O'Brien 204 1/2 inches.

A first prize of ten dollars goes to the person having the most inches, and five to the one having next most. There is also a five dollar prize offered for the best editorial and for the best feature story. Edward Shaffer and S. G. Swenson are the two probable winners of these prizes.

In Industrialist writing R. L. Palmer leads with 118 1/2 inches. S. G. Swenson has 73, Albert Mead 51, Mollie Morton 38 1/2, and Josephine Bussey 37. The prize for the highest number of inches in the Industrialist is a year's subscription to any farm publication.

MAY STILL BUY ROYAL PURPLES

MUST SELL 900 MORE TO REACH GOAL

Organizations Should Turn in Pages Before February 12

The Popularity contest came to a close with the book sale of the Royal Purple far behind what it should be. It was hoped that the book sale to students alone would amount to at least 2,000 books.

By reaching this mark in the sale of the books the staff planned to be able to make the annual a true emblem of the Aggie spirit and to make the book the best that has ever been put across by any class of this college. By reaching the 2,000 mark, the staff planned to be able to use moly covers on the annual, thus giving it a more expensive and more highly finished appearance and a better wearing quality. The moly covers are now on display on the Royal Purple bulletin board in Main hall.

A large number of the Royal Purples are to be used by the college as an advertising medium through which many of the young prospective college people are to be drawn to this school. Many high school graduates use the year books of various colleges in order to choose the school which they wish to attend. Several weeks before the high schools of the state are closed, Royal Purples will be placed upon the library tables of the accredited high schools.

The pictures of fraternities and other organizations must be ready by February 12. It will be a big help to the staff if these pages are turned in at an early date and not held until the very last day.

Y. W. CHANGE MEMBERSHIP BASIS OF THE ORGANIZATION

Amended Constitution to Be Forwarded to Headquarters at Denver

The members of the Y. W. C. A. have voted to change the basis for membership of their organization, so that any woman may become an active member who makes the following declaration, "It is my purpose to live as a true follower of the Lord Jesus Christ." Before the change was made only members of a Protestant Evangelical church could become active members of the Y. W. C. A.

The constitution as amended will

be forwarded to headquarters at Denver, and from there to the field office in New York for acceptance.

TYPOGRAPHY STUDENTS TO PUT OUT UNIQUE BOOKLET

Each Student Will Set Up His Own Copy—Purpose to Stimulate Interest in Work

E. A. Amos of the printing department is planning a unique booklet to be put out largely by the typography students. Each student is to bring his copy and set it up himself. There are about 46 students taking printing so that the book after all editorial notes and explanations have been attached will contain about 50 pages.

The articles can either be original or obtained from other sources and may be humorous or simply interesting material. The purpose of the pamphlets is mainly to stimulate the interest of the students in their work and in the department, but it is thought that if results warrant, the magazine may be sent out over the state as an advertiser for the course.

GIVE SHORT COURSE MEN A TASTE OF COLLEGE FUN

Games, Singing, Boxing, Wrestling, and Speeches Furnish Entertainment

Short course students were given a taste of college pleasures last Thursday evening by the social affairs committee of the Y. M. C. A. This committee is under the chairmanship of Herbert Moyer. Students who attended the Y. M. Christmas party can vouch for Moyer and his ability to put life into a large group party.

The entertainment Thursday evening consisted of group games, boxing, and wrestling exhibitions, and speeches by Mike Ahearn, Coach Charles Bachman, and Doctor A. A. Holtz.

This mixer served several purposes. It gets the short course students acquainted with each other, furnishes them entertainment, introduces them to a new side of college life, and demonstrates to them that they are an important part of K. S. A. C.

DAY AND NIGHT SCHOOL at the MANHATTAN BUSINESS COLLEGE

Enroll now with us. Get a thorough Business Training in an up-to-the-minute School of Business.

Thorough courses are offered in—Commercial, Shorthand, Civil Service, Penmanship, Typewriting, Banking, English, Court Reporting, Salesmanship and Business Efficiency, Adding and Listing Machines, Secretarial, and Commercial Teaching.

For information phone 64, or address L. W. Nutter, President, Manhattan Business College. 34-37p.

P. P. Brainard, specialist in educational subjects in the home study service, went to Kansas City Wednesday to have charge of the class in vocational training.

Delegates from K. S. A. C. to the educational council in Topeka Friday and Saturday, were George E. Gemmell, Prof. W. H. Andrews, and Dr. M. T. Harman. The council is made up of representatives of the teachers' organizations of Kansas.

Miss Imogene Chase, who graduated from college last spring, has accepted a position in the high school at Bedford, Ind.

TO REORGANIZE PURPLE MASQUE

FRATERNITY TO GIVE THREE DEGREES NEXT SEMESTER

Nine Students Are Elected to Membership—All Belong to "Come Out of the Kitchen" Cast

Purple Masque, dramatic fraternity, held a meeting Monday night to elect members. This fraternity is planning a reorganization, in which Purple Masque will be the highest degree, with two degrees below this. This reorganization will be completed next semester.

At the present time members who were in the "Come Out of the Kitchen" cast were elected to the lowest degree. Some will undoubtedly be advanced when the new arrangement is completed, and some of the number will eventually rise to the degree of Purple Masque.

The new members elected were Ruth Martin, N. D. Alleman, Vernon Carrier, Gladys Newton, Dorothy Settle, Earl Bruce, Curtis Watts, Alice Carter, and Donald Elbert. Hamilton Riggs, being in the school of agriculture, is ineligible. The other member of the cast, Harold Sebring, is already a member of Purple Masque.

Y. W. ASK FOR TRAINING CLASS

WOULD BE UNDER SUPERVISION OF FIELD SECRETARY

Ten or Twelve Girls to Be Chosen to Take Work—Miss Adella Haass in Charge

At a recent cabinet meeting of the Y. W. C. A. it was voted that a request be sent in to the authorities in Denver asking that K. S. A. C. be made headquarters for one of the five large training classes which are to be established in the west central field of the organization, comprising Kansas, Colorado, Utah, and Wyoming.

If the request is granted, 10 or 12 girls will be chosen because of their natural qualifications for service in the Y. W. C. A., to take the work here. Miss Dean, secretary of the Y. W., believes that the fact that each training class will be under the direct supervision of one of the field secretaries will stimulate better effort on the part of the girls. Miss Adella Haass will have charge of the classes here, and will also supervise the clubs which will be organized for younger girls in the summer.

To Sing in Allen County

Miss Olivet Mitsch, Miss Florence Meyer, and John Elliott, will present entertainments near Topeka and in Allen county between semesters. This trio, the Salon Singers, from the division of music, have presented several entertainments this season.

E. N. Wentworth of Armour Packing company, Chicago, was a visitor at the college Monday. Mr. Wentworth was a professor of animal husbandry here in 1918.

Dinner guests at the Kappa Phi Alpha house Sunday were Miss Marguerite Clarke, Miss Clara Spillman, Miss Elizabeth Agnew, dean of women at Hays normal, and Roy Brainer.

ANNOUNCEMENTS

Literary societies will not meet Saturday.

Registration for the second semester begins Tuesday morning at 8 o'clock and ends Wednesday morning at 11 o'clock.

Joint meeting of Theta Sigma Phi and Sigma Delta Chi will be held in the Journalism practice room Saturday morning at 9 o'clock.

All W. A. A. girls who wish to

have their pictures on the W. A. A. page of the Royal Purple should pay 50 cents to either Corinne Thiele, Alice Marston, or Clara Evans.

Send Out 30,000 Programs

The supply of Farm and Home week programs was received by the extension division last Wednesday. On Friday morning 30,000 copies were in the mails, on their way to individuals whose requests for the program have been making a continually increasing waiting list.

Mrs. H. H. Carrier of Hutchinson, spent the week end with her son, Vernon Carrier.

Prof. W. H. Andrews is to be the principal speaker at a Kansas Day banquet at Postoria on Saturday evening. They are launching a rural high school movement in that community, and Professor Andrews will also assist in that movement.

Russell Prescott will attend the meeting of the legislature in Topeka next week.

Mr. Claude B. Cross, a former student here, has resigned his position as principal of the St. George rural high school, and will finish his course here next semester.

Sam James, former student, was in the city this week.
